February 3, 2003

DEAR SHAREHOLDER,

The year ended December 31, 2002 was among the worst ever for the high yield bond market. Our Fund's leveraged structure magnified the market's poor performance. As we have often reminded our shareholders, leverage is a two-edged sword. New America's total return for the year was approximately -13%, calculated from the decline in the market value of \$.63 cents a share, offset in part by dividends of \$.2875 paid during the year. The Fund's net asset value per share declined from \$2.61 to \$1.89 during 2002. Part of this decline has been recovered in 2003 as the net asset value has risen to \$1.96 at January 31, 2003. The Board has currently targeted a monthly dividend of \$.0175 per share although as we move through the year, market conditions and actual portfolio results will determine what is paid.

For the last two years conventional wisdom has been that the high yield market was at, or near, a bottom. Conventional wisdom proved to be wrong. It is of little comfort to note that the major equity market indices have fared even worse than the high yield bond market. News about corporate malfeasance, declining consumer confidence, and fear of war were some of the factors that influenced investors to flee from any asset class perceived to have high risk. For most of the year, the prices of high yield bonds declined despite a climate of historically low interest rates on higher quality assets and an economy that may be showing signs of a slow recovery.

The reduction in the Fund's Auction Term Preferred Stock (the "ATP") outstanding was a principal cause of the dividend reduction announced in December. The ATP creates the leverage in our Fund. The ATP maintains a AAA rating from Moody's Investors Service and Fitch Ratings, provided the Fund meets specified asset coverage requirements. The Fund must also meet certain asset coverage requirements under federal securities laws. During the year the Fund reduced the amount of ATP outstanding by \$50 million in order to maintain compliance with the applicable asset coverage requirements, leaving \$100 million outstanding at year-end. A reduction in the amount of the Fund's leverage (the ATP) generally causes a reduction in the Fund's income. At year-end, the Fund was paying an effective cost of 4.50% on the ATP, while its portfolio of high yield bonds yielded over 9%. Other factors that contributed to the decline in the Fund's income were portfolio defaults earlier in 2002 and an upgrading of the Fund's portfolio that resulted in a lower portfolio yield. The Fund's portfolio was approximately 43% leveraged at year-end, which should offer an advantage if the high yield market improves in 2003.

The Fund's performance is summarized in the table below.

TOTAL RETURNS FOR T
ENDED DECEMBER 3

3

Edgar Filing: NEW AMERICA HIGH INCOME FUND INC - Form N-CSR

	12 MONTHS	CUMULATIVE
	-----	-----
New America High Income Fund (Stock Price and Dividends)*	(13.0)%	(4.6)%
New America High Income Fund (NAV and Dividends)	(17.1)	(27.6)
Lipper Closed-End Fund Leveraged High Yield Average	(5.9)	(20.6)

* Because the Fund's shares may trade at either a discount or a premium to the Fund's net asset value per share, returns based upon the share price and dividends will tend to differ from those derived from the underlying change in net asset value.

Sources: Lipper Analytical Services and The New America High Income Fund, Inc.

On December 2, 2002, T. Rowe Price Associates, Inc. ("TRP") became the Fund's investment adviser. The Board selected TRP after an extensive search for a very experienced, high yield bond management team with a superior investment record and the resources to service the Fund. We are delighted that TRP and, in particular, Mark Vasselkiv, the portfolio manager responsible for the Fund's investments, were able to take on this assignment. Mark elaborates on the state of the high yield bond market below.

HIGH YIELD MARKET UPDATE

The high yield market rebounded in the last two months of the year, after enduring significant challenges for most of 2002. Improving investor psychology and significant new demand for higher yielding securities had a big positive impact on the asset class. The rally in the stock market helped get the recovery started, but high yield bonds also held their own in December when stocks corrected again. Many individual and institutional investors appear to be viewing high yield bonds as a lower risk alternative to equities, with comparable return potential at significantly lower volatility. This theme is translating to significant new cash flow into the market, and lifting the prices of non-investment grade bonds, as managers put their cash to work.

On the fundamental side, cautious optimism is also returning to the high yield market. Last year all corporate bond sectors were rocked by management malfeasance at major companies, a very high default rate and geopolitical risks which slowed economic activity. While these three big negative forces have not been completely resolved, some light exists at the end of the tunnel. These same forces led to a record wave of downgrades into the high yield market last year, dramatically increasing the overall size of the asset class. Fortunately, management teams have woken up to these challenges and have focused on fixing balance sheets as a major priority in 2003. The emphasis on repairing capital structures will be a major theme this year, which could have favorable implications for high yield investors.

STRATEGY REVIEW

Sector selection remained the critical determining factor for performance in the high yield market last year. Many stable, Old Economy industries generated double digit positive returns in 2002. Included in this category were gaming, energy, broadcasting, healthcare and consumer products. Conversely, four sectors inflicted most of the pain felt by high yield investors over the past twelve months. Utilities, airlines, cable television and technology companies faced major operating problems and industry specific challenges. Restructurings and bankruptcies were disproportionately weighted in these areas of the economy. The Fund's portfolio had meaningful positions in these problem areas, but recently,

Edgar Filing: NEW AMERICA HIGH INCOME FUND INC - Form N-CSR

these sectors have reversed course and are outperforming the market as a whole.

Our last shareholder report noted how bifurcated the high yield market had become. This dynamic has become more pronounced. Specifically, about half the asset class is yielding less than 9%, with most of these securities trading at premiums to par value. On the opposite side of the spectrum, 50% of the market is still priced at discounts, with a shrinking component of bonds classified as fundamentally distressed. Last year, over half the bonds in the market trading at less than 50 defaulted on their obligations, but this year we expect the experience to be different. Therefore, we intend to exercise particular care when considering the sale of the portfolio's discounted securities, mindful of the fact that many could enjoy meaningful capital appreciation in an improving market.

We will also look to further diversify the portfolio, by investing in stable industries that have been underweighted in the fund. Two examples are gaming and broadcasting, sectors that have historically provided consistent positive returns for high yield investors. Both are regarded as defensive because of intrinsic asset protection as well as strong operating cash flows. Broadcasters are highly regarded for the inherent value of radio and television stations, and many gaming companies have valuable "bricks and mortar" facilities in prime real estate locations. We expect these moves to improve the overall credit quality of the portfolio, as well as reduce the volatility of the Fund.

In 2003, the portfolio's leveraged structure should be a positive for performance if our fundamental outlook proves correct. We will look for opportunities presenting higher current yield, as well as capital appreciation potential. We particularly favor B-rated bonds trading at 10-12% yields, putting our focus in the middle of the risk

2

spectrum of the high yield market as a whole, but attractive relative to the income potential of investment grade fixed income sectors. We will maintain, however, our strict risk control priorities of broad diversification, conservative industry allocations and a strong sell discipline implemented by our trading desk. These disciplines have served TRP's clients and shareholders well over the past decade, and can help fulfill an important mission of high yield managers, which is preserving our clients' capital.

The high yield bear market has been long and painful, but we are hopeful that the market is now reaching the point where the perseverance of patient high yield investors will be rewarded. We believe the major sector meltdowns are largely behind us, the economy is slowly improving, and high yield managers have shown new discipline after four tough years of high yield bond market underperformance. Absent surprising negative developments on the global political or military fronts, we are optimistic that the positive momentum growing in this asset class over the past six months can be sustained for the foreseeable future.

Both the Fund and T. Rowe Price Associates look forward to a long and rewarding relationship with the shareholders of The New America High Income Fund.

Sincerely,

/s/ Robert F. Birch

PORTFOLIO TURNOVER RATE	82.47%	38.89%	45.58%	6

(a) Dollars in thousands.

(b) The Fund issued Series C ATP on May 6, 1997 and Series D ATP on May 20, 1998. The per share data and ratios for the years ended December 31, 1997 and 1998 reflect these transactions.

(c) As required, effective January 1, 2001, the Fund has adopted the provisions of the AICPA Audit and Accounting Guide for Investment Companies and began amortizing discount and premium on debt securities. This had no effect on net investment income per share and a \$.01 increase to net realized and unrealized loss per share for the year ended December 31, 2001. The effect of this change did increase the ratio of net investment income to average net assets from 16.29% to 16.70%. Per share, ratios and supplemental data for periods prior to January 1, 2001 have not been restated to reflect this change in presentation.

* Ratios calculated on the basis of expenses and net investment income applicable to the common shares relative to the average net assets of the common stockholders only. The expense ratio and net investment income ratio do not reflect the effect of dividend payments (including net swap settlement receipts/payments) to preferred stockholders.

Calculation is based on average shares outstanding during the indicated period due to the per share effect of the Fund's March 1997 and March 1998 rights offerings.

+ Total investment return is calculated assuming a purchase of common stock at the current market value on the first day and a sale at the current market value on the last day of each year reported. Dividends and distributions are assumed for purposes of this calculation to be reinvested at prices obtained under the dividend reinvestment plan. This calculation does not reflect brokerage commissions.

Preferred Stock Share (2)	\$ 25,000	\$ 25,000	\$ 25,000	\$ 25,000
APPROXIMATE MARKET VALUE:				
Per Preferred Stock Share (2)	\$ 25,000	\$ 25,000	\$ 25,000	\$ 25,000

(1) Calculated by subtracting the Fund's total liabilities (not including the Preferred Stock) from the Fund's total assets and dividing such amount by the number of Preferred Shares outstanding.

(2) Plus accumulated and unpaid dividends.

The accompanying notes are an integral part of these financial statements.

16

The New America High Income Fund, Inc.

NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2002

(1) SIGNIFICANT ACCOUNTING AND OTHER POLICIES

The New America High Income Fund, Inc. (the Fund) was organized as a corporation in the state of Maryland on November 19, 1987 and is registered with the Securities and Exchange Commission as a diversified, closed-end investment company under the Investment Company Act of 1940. The Fund commenced operations on February 26, 1988. The investment objective of the Fund is to provide high current income while seeking to preserve stockholders' capital through investment in a professionally managed, diversified portfolio of "high yield" fixed-income securities.

The Fund invests primarily in fixed maturity corporate debt securities that are rated less than investment grade. Risk of loss upon default by the issuer is significantly greater with respect to such securities compared to investment

Edgar Filing: NEW AMERICA HIGH INCOME FUND INC - Form N-CSR

grade securities because these securities are generally unsecured and are often subordinated to other creditors of the issuer and because these issuers usually have high levels of indebtedness and are more sensitive to adverse economic conditions, such as a recession, than are investment grade issuers. In some cases, the collection of principal and timely receipt of interest is dependent upon the issuer attaining improved operating results, selling assets or obtaining additional financing.

See the schedule of investments for information on individual securities as well as industry diversification and credit quality ratings.

The Fund's financial statements have been prepared in conformity with generally accepted accounting principles in the United States that require the management of the Fund to, among other things, make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

The following is a summary of significant accounting policies consistently followed by the Fund, which are in conformity with those generally accepted in the investment company industry.

(a) VALUATION OF INVESTMENTS--Investments for which market quotations are readily available are stated at market value, which is determined by using the most recently quoted bid price provided by an independent pricing service or principal market maker. Independent pricing services provide market quotations based primarily on quotations from dealers and brokers, market transactions, accessing data from quotations services, offering sheets obtained from dealers and various relationships between securities. Short-term investments having maturities of 60 days or less are stated at amortized cost, which approximates market value. Following procedures approved by the Board of Directors, investments for which market quotations are not readily available (primarily fixed-income corporate bonds and notes) are stated at fair value on the basis of subjective valuations furnished by securities dealers and brokers. Other investments, with a cost of approximately \$7,514,000 and a value of \$0, are valued in good faith at fair market value using methods determined by the Board of Directors.

(b) INTEREST AND DIVIDEND INCOME--Interest income is accrued on a daily basis. Discount on short-term investments is amortized to investment income. Premiums or discounts on corporate debt securities are amortized based on the interest method for financial reporting purposes. All income on original issue discount and step interest bonds is accrued based on the effective interest method for tax reporting purposes as required by federal income tax regulations. The Fund does not amortize market premiums or discounts for tax purposes. Dividend payments received in the

17

form of additional securities are recorded on the ex-dividend date in an amount equal to the value of the security on such date.

(c) FEDERAL INCOME TAXES--It is the Fund's policy to comply with the requirements of the Internal Revenue Code of 1986, as amended, applicable to regulated investment companies and to distribute substantially all of its taxable income to its shareholders each year. Accordingly, no federal income tax provision is required.

(2) TAX MATTERS AND DISTRIBUTIONS

Edgar Filing: NEW AMERICA HIGH INCOME FUND INC - Form N-CSR

At December 31, 2002, the total cost of securities (including temporary cash investments) for federal income tax purposes was approximately \$259,345,000. Aggregate gross unrealized gain on securities in which there was an excess of value over tax cost was approximately \$5,492,000. Aggregate unrealized loss on securities in which there was an excess of tax cost over value was approximately \$31,954,000. Net unrealized loss on investments for tax purposes at December 31, 2002 was approximately \$26,462,000.

At December 31, 2002, the Fund had approximate capital loss carryovers available to offset future capital gains, if any, to the extent provided by regulations:

CARRYOVER AVAILABLE	EXPIRATION DATE
\$ 35,581,000	December 31, 2007
21,822,000	December 31, 2008
67,042,000	December 31, 2009
46,118,000	December 31, 2010

\$ 170,563,000	
=====	

It is the policy of the Fund to reduce future distributions of realized gains to shareholders to the extent of the unexpired capital loss carry forward.

The tax character of distributions paid to common and preferred shareholders of approximately \$22,371,000 in 2002 was from ordinary income.

As of December 31, 2002, the components of distributable earnings on a tax basis were approximately:

Undistributed Net Investment Income	\$ 402,000
Undistributed Long-Term Gain	--
Unrealized Gain (Loss)	\$ (26,462,000)
Capital Losses Carry Forward and Post October Losses Deferred	\$ (176,822,000)

The difference between components of distributable earnings on a tax basis and the amounts reflected in the Statement of Assets and Liabilities are primarily due to wash sales, accrued interest on defaulted bonds and amortization of swap termination payments.

Distributions on common stock are declared based upon annual projections of the Fund's investment company taxable income. The Fund records all dividends and distributions payable to shareholders on the ex-dividend date and declares and distributes income dividends monthly.

The Fund was required to amortize market discounts and premiums for financial reporting purposes beginning January 1, 2001. This new accounting policy resulted in additional interest income for financial reporting purposes only. The Fund does not amortize market discounts or premiums for tax purposes. Therefore, the additional interest income for financial reporting purposes does not result in additional common stock dividend income.

The Fund has recorded several reclassifications in the capital accounts to

Edgar Filing: NEW AMERICA HIGH INCOME FUND INC - Form N-CSR

present undistributed net investment income or accumulated net realized gains and losses on a tax basis, which is considered to be more informative to the shareholder. These reclassifications have no impact on the net asset value of the Fund.

(3) INVESTMENT ADVISORY AGREEMENT

Wellington Management Company, LLP, the Fund's Investment Advisor, for the eleven months ended

18

November 30, 2002 earned approximately \$635,000 in management fees. Management fees paid by the Fund to Wellington Management were calculated at .45 of 1% (on an annual basis) of the average weekly value of the Fund's net assets attributable to common stock.

The Fund's Board of Directors voted to appoint T. Rowe Price Associates, Inc. (T. Rowe Price) as the Fund's investment advisor succeeding Wellington Management Company, LLP in that capacity. An interim investment advisory agreement with T. Rowe Price took effect concurrently with the termination of the existing investment advisory agreement on December 2, 2002. Prior to the expiration of the 150 day term of the interim contract, the Fund will hold a meeting of stockholders to seek stockholder approval of the new advisory agreement with T. Rowe Price. If stockholders approve the new advisory agreement, the annual advisory fee payable to T. Rowe Price will be 0.50% on the first \$50,000,000 of the Fund's average weekly net assets, 0.40% on the next \$50 million and 0.30% on average weekly net assets in excess of \$100 million. T. Rowe Price's fee will be calculated based on assets attributable to the Fund's common and auction term preferred stock. At December 31, 2002, the fee payable to T. Rowe Price was approximately \$51,000, which was included in accrued expenses on the accompanying statement of assets and liabilities.

(4) AUCTION TERM PREFERRED STOCK (ATP)

The Fund had 4,000 shares of ATP issued and outstanding at December 31, 2002. The ATP's dividends are cumulative at a rate determined at an auction, and dividend periods will typically be 28 days unless notice is given for periods to be longer or shorter than 28 days. Dividend rates ranged from 1.40% to 2.35% for the year ended December 31, 2002. The average dividend rate as of December 31, 2002 was 1.47%.

The ATP is redeemable, at the option of the Fund, or subject to mandatory redemption (if the Fund is in default of certain coverage requirements) at a redemption price equal to \$25,000 per share plus accumulated and unpaid dividends. The ATP has a liquidation preference of \$25,000 per share plus accumulated and unpaid dividends. The Fund is required to maintain certain asset coverages with respect to the ATP under the Fund's Charter and the 1940 Act in order to maintain the Fund's Aaa/AAA ratings by Moody's Investors Service, Inc. and Fitch, Inc., respectively.

Under Emerging Issues Task Force (EITF) promulgation Topic D-98, CLASSIFICATION AND MEASUREMENT OF REDEEMABLE SECURITIES, which was issued on July 19, 2001, preferred securities that are redeemable for cash or other assets are to be classified outside of permanent equity to the extent that redemption is at a fixed or determinable price and at the option of the holder or upon the occurrence of an event that is not solely within the control of the issuer. Subject to the guidance of the EITF, the Fund's preferred stock is shown outside of permanent equity (net assets) in the accompanying financial statements. In connection with Topic D-98 distributions related to preferred stock are reflected in the statements of changes in net assets and financial highlights as

Edgar Filing: NEW AMERICA HIGH INCOME FUND INC - Form N-CSR

distributions from operations. Prior year amounts have also been reclassified to conform with this presentation. The impact of this reclassification creates no change to the net assets available to common shareholders.

During 2002, the Fund repurchased \$50,000,000 of ATP.

(5) ATP AUCTION-RELATED MATTERS

Bankers Trust Company (BTC) serves as the ATP's auction agent pursuant to an agreement entered into on

19

January 4, 1994. The term of the agreement is unlimited and may be terminated by either party. BTC may resign upon notice to the Fund, such resignation to be effective on the earlier of the 90th day after the delivery of such notice and the date on which a successor auction agent is appointed by the Fund. The Fund may also replace BTC as auction agent at any time.

After each auction, BTC as auction agent will pay to each broker-dealer, from funds provided by the Fund, a maximum service charge at the annual rate of 0.25 of 1% or such other percentage subsequently agreed to by the Fund and the broker-dealers, of the purchase price of shares placed by such broker-dealers at such auction. In the event an auction scheduled to occur on an auction date fails to occur for any reason, the broker-dealers will be entitled to service charges as if the auction had occurred and all holders of shares placed by them had submitted valid hold orders. The Fund incurred approximately \$278,000 for service charges through December 31, 2002. This amount is included under the caption preferred and auction fees in the accompanying statement of operations.

(6) INTEREST RATE SWAPS

The Fund entered into an interest payment swap arrangement with Fleet Bank (Fleet) for the purpose of partially hedging its dividend payment obligations with respect to the ATP. Pursuant to the Swap Arrangement the Fund makes payments to Fleet on a monthly basis at a fixed annual rate. In exchange for such payment Fleet makes payments to the Fund on a monthly basis at a variable rate determined with reference to one month LIBOR. The variable rates ranged from 1.44% to 2.14% for the year ended December 31, 2002. The effective date, notional amount, maturity and fixed rate of the swap is as follows:

EFFECTIVE DATE	NOTIONAL CONTRACT AMOUNT	MATURITY	FIXED ANNUAL RATE
10/1/01	\$100 million	10/1/06	4.50%

Swap transactions, which involve future settlement, give rise to credit risk. Credit risk is the amount of loss the Fund would incur in the event counterparties failed to perform according to the terms of the contractual commitments. In the event of nonperformance by the counterparty, the Fund's dividend payment obligation with respect to the ATP would no longer be partially hedged. Therefore, the ATP dividend would no longer be partially fixed. In an unfavorable interest rate environment, the Fund would be subject to higher net ATP dividend payments, resulting in less income available for the common share dividend. The Fund does not anticipate nonperformance by any counterparty. While notional contract amounts are used to express the volume of interest rate swap agreements, the amounts potentially subject to credit risk, in the event of

Edgar Filing: NEW AMERICA HIGH INCOME FUND INC - Form N-CSR

nonperformance by counterparties, are substantially smaller.

The Fund accounts for interest rate swaps in accordance with the Statement of Financial Accounting Standards No. 133, ACCOUNTING FOR DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES. This statement requires an entity to recognize all freestanding derivative instruments in the balance sheet as either assets or liabilities and measure them at fair value. Any change in the unrealized gain or loss is recorded in current earnings. For the year ended December 31, 2002, the Fund's obligations under the swap agreements were more than the amount received from Fleet by approximately \$2,851,000 and is included in the accompanying statement of operations.

20

The estimated fair value of the interest rate swap agreement at December 31, 2002 amounted to approximately \$6,768,000 of unrealized loss and is presented in the accompanying balance sheet.

(7) REPURCHASE AGREEMENTS

At the time the Fund enters into a repurchase agreement, the value of the underlying security, including accrued interest, will be equal to or exceed the value of the repurchase agreement, and, in the case of repurchase agreements exceeding one day, the value of the underlying security, including accrued interest, is required during the term of the agreement to be equal to or exceed the value of the repurchase agreement.

The underlying securities for all repurchase agreements are held in safekeeping in an investment account of State Street Bank and Trust Company (SSBT), the Fund's custodian, at the Federal Reserve Bank of Boston. In the case of repurchase agreements exceeding one day, SSBT's Money Market Department monitors the market value of the underlying securities by pricing them daily, and in the event any individual repurchase agreement is not fully collateralized, SSBT advises the Fund and additional collateral is obtained.

(8) PURCHASES AND SALES OF SECURITIES

Purchases and proceeds of sales or maturities of long-term securities during the year ended December 31, 2002 were approximately:

Purchases of securities	\$ 224,214,000
Sales of securities	\$ 261,579,000

(9) RELATED PARTY TRANSACTIONS

A partner of Goodwin Procter LLP, counsel to the Fund, serves as a Director of the Fund. Fees earned by Goodwin Procter LLP amounted to approximately \$248,000 for the year ended December 31, 2002. The Fund paid approximately \$249,000 during the year ended December 31, 2002 to two officers of the Fund for the provision of certain administrative services.

CHANGE IN INDEPENDENT ACCOUNTANTS (UNAUDITED)

On June 27, 2002, the Board of Directors, upon the recommendation of the Board's Audit and Nominating Committee, determined not to retain Arthur Andersen LLP and approved a change in the Fund's independent auditors to KPMG LLP. For the fiscal years ended December 31, 2001 and December 31, 2000, Arthur Andersen LLP's audit reports on the Fund's financial statements contained no adverse opinion or

Edgar Filing: NEW AMERICA HIGH INCOME FUND INC - Form N-CSR

disclaimer of opinion; nor were their reports qualified or modified as to uncertainty, audit scope, or accounting principals. Further, there were no disagreements between the Fund and Arthur Andersen LLP on any matter of accounting principles or practices, financial statement disclosure or audit scope or procedure, which if not resolved to the satisfaction of Arthur Andersen LLP, would have caused them to make reference to the disagreements in their report.

COMMON AND AUCTION TERM PREFERRED STOCK TRANSACTIONS

From time to time in the future, the Fund may effect redemptions and/or repurchases of its ATP as provided in the applicable constituent instruments or as agreed upon by the Fund and sellers. The Fund intends to effect such redemptions and/or repurchases to the extent necessary to maintain applicable asset coverage requirements.

The Fund may purchase shares of its Common Stock in the open market when the Common Stock trades at a discount to net asset value or at other times if the Fund determines such purchases are in the best interest of its stockholders. There can be no assurance that the Fund will take such action in the event of a market discount to net asset value or that Fund purchases will reduce a discount.

21

The New America High Income Fund, Inc.

INDEPENDENT AUDITORS' REPORT

The Board of Directors and Shareholders
The New America High Income Fund, Inc.

We have audited the accompanying statement of assets and liabilities of The New America High Income Fund, Inc., including the schedule of investments, as of December 31, 2002, and the related statement of operations, statement of changes in net assets and financial highlights for the year then ended. These financial statements and financial highlights are the responsibility of the Fund's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audit. The statement of changes in net assets for the year ended December 31, 2001 and the financial highlights for each of the years in the five-year period ended December 31, 2001 were audited by other auditors who have ceased operations. Those auditors expressed an unqualified opinion on that financial statement and those financial highlights in their report dated February 1, 2002.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of December 31, 2002 by correspondence with the custodian and brokers. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of The New America High Income Fund, Inc. as of December 31, 2002, the results of its operations, changes in its net assets and financial highlights for the year then

Edgar Filing: NEW AMERICA HIGH INCOME FUND INC - Form N-CSR

ended, in conformity with accounting principles generally accepted in the United States of America.
