Quarterly report pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934 for the quarterly period
☒ ended September 30, 2016

or

Transition report pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934 for the transition period
from _____ to _____

Commission File Number: 001-15811

MARKEL CORPORATION
(Exact name of registrant as specified in its charter)

Virginia 54-1959284
(State or other jurisdiction of (I.R.S. Employer
incorporation or organization) Identification No.)

4521 Highwoods Parkway, Glen Allen, Virginia 23060-6148
(Address of principal executive offices)
(Zip Code)
(804) 747-0136
(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer ☒ Accelerated filer ☐ Non-accelerated filer ☐ Smaller reporting company ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☒

Number of shares of the registrant's common stock outstanding at October 25, 2016: 13,991,499

MARKEL CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

a) Basis of Presentation. Markel Corporation is a diverse financial holding company serving a variety of niche markets. Markel Corporation's principal business markets and underwrites specialty insurance products and programs. Through its wholly-owned subsidiary, Markel Ventures, Inc. (Markel Ventures), Markel Corporation also owns interests in various industrial and service businesses that operate outside of the specialty insurance marketplace.

The consolidated balance sheet as of September 30, 2016, the related consolidated statements of income and comprehensive income (loss) for the quarters and nine months ended September 30, 2016 and 2015, and the consolidated statements of changes in equity and cash flows for the nine months ended September 30, 2016 and 2015 are unaudited. In the opinion of management, all adjustments necessary for fair presentation of such consolidated financial statements have been included. Such adjustments consist only of normal, recurring items. Interim results are not necessarily indicative of results of operations for the entire year. The consolidated balance sheet as of December 31, 2015 was derived from Markel Corporation's audited annual consolidated financial statements.

The accompanying consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles (U.S. GAAP) and include the accounts of Markel Corporation and its consolidated subsidiaries, as well as any variable interest entities (VIEs) that meet the requirements for consolidation (the Company). All significant intercompany balances and transactions have been eliminated in consolidation. The Company consolidates the results of its Markel Ventures subsidiaries on a one-month lag. Certain prior year amounts have been reclassified to conform to the current presentation.

The preparation of financial statements in accordance with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses and the disclosure of contingent assets and liabilities. Actual results may differ materially from the estimates and assumptions used in preparing the consolidated financial statements.

The consolidated financial statements and notes are presented as permitted by Form 10-Q and do not contain certain information included in the Company's annual consolidated financial statements and notes. In addition to the policies set forth below, readers are urged to review the Company's 2015 Annual Report on Form 10-K for a more complete description of the Company's business and accounting policies.

b) Variable Interest Entities. The Company determines whether it has relationships with entities defined as VIEs in accordance with Accounting Standards Codification (ASC) Topic 810, Consolidation. Under this guidance, a VIE is consolidated by the variable interest holder that is determined to be the primary beneficiary.

An entity in which the Company holds a variable interest is a VIE if any of the following conditions exist: (a) the total equity investment at risk is not sufficient to permit the entity to finance its activities without additional subordinated financial support, (b) as a group, the holders of equity investment at risk lack either the direct or indirect ability through voting rights or similar rights to make decisions about an entity's activities that most significantly impact the entity's economic performance or the obligation to absorb the expected losses or right to receive the expected residual returns, or (c) the voting rights of some investors are disproportionate to their obligation to absorb the expected losses of the entity, their rights to receive the expected residual returns of the entity, or both and substantially all of the entity's activities either involve or are conducted on behalf of an investor with disproportionately few voting rights.

The primary beneficiary is defined as the variable interest holder that is determined to have the controlling financial interest as a result of having both (a) the power to direct the activities of a VIE that most significantly impact the economic performance of the VIE and (b) the obligation to absorb losses or right to receive benefits from the VIE that could potentially be significant to the VIE.

The Company determines whether an entity is a VIE at the inception of our variable interest in the entity and upon the occurrence of certain reconsideration events. The Company continually reassesses whether it is the primary beneficiary of VIEs in which it holds a variable interest.

Table of Contents

c) Revenue Recognition.

Investment Management and Performance Fees

Investment management fee income is recognized over the period in which investment management services are provided and is calculated and billed monthly based on the net asset value of the accounts managed. Performance fee arrangements entitle the Company to participate, on a fixed-percentage basis, in any net income generated in excess of an agreed-upon threshold as established by the underlying investment management agreements. In general, net income is calculated at the end of each calendar year and performance fees are payable annually. Following the preferred method identified in the ASC Topic 605, Revenue Recognition, such performance fee income is recorded at the conclusion of the contractual performance period, when all contingencies are resolved.

2. Recent Accounting Pronouncements

Effective January 1, 2016, the Company adopted Financial Accounting Standards Board (FASB) Accounting Standards Update (ASU) No. 2015-02, Consolidation (Topic 810): Amendments to the Consolidation Analysis, which changes the way reporting enterprises evaluate whether (a) they should consolidate limited partnerships and similar entities, (b) fees paid to a decision maker or service provider are variable interests in a VIE, and (c) variable interests in a VIE held by related parties of the reporting enterprise require the reporting enterprise to consolidate the VIE. It also eliminates the VIE consolidation model based on majority exposure to variability that applied to certain investment companies and similar entities. The ASU also significantly changes how to evaluate voting rights for entities that are not similar to limited partnerships when determining whether the entity is a VIE, which may affect entities for which the decision making rights are conveyed through a contractual arrangement. The adoption of this guidance did not result in any changes to our previous consolidation conclusions.

Effective January 1, 2016, the Company adopted FASB ASU No. 2015-03, Interest-Imputation of Interest (Subtopic 835-30): Simplifying the Presentation of Debt Issuance Costs. ASU No. 2015-03 requires that debt issuance costs related to a recognized debt liability be presented on the balance sheet as a direct deduction from the debt liability, similar to the presentation of debt discounts. The cost of issuing debt is no longer recorded as a separate asset on the balance sheet. The amortization of debt issuance costs continues to be included in interest expense. ASU No. 2015-03 was applied retrospectively to all periods presented. As a result, debt issuance costs totaling \$2.2 million were reclassified from other assets to senior long-term debt and other debt as of December 31, 2015. The adoption of this ASU did not have an impact on the Company's results of operations or cash flows.

Effective January 1, 2016, the Company adopted FASB ASU No. 2015-05, Intangibles-Goodwill and Other-Internal-Use Software (Subtopic 350-40): Customer's Accounting for Fees Paid in a Cloud Computing Arrangement, which clarifies that software licenses contained in a cloud computing arrangement should be capitalized if the customer has the right to take possession of the software and the ability to run the software outside of the cloud computing arrangement. The adoption of this ASU did not have an impact on the Company's financial position, results of operations or cash flows.

Effective January 1, 2016, the Company adopted FASB ASU No. 2015-16, Business Combinations (Topic 805): Simplifying the Accounting for Measurement-Period Adjustments. ASU No. 2015-16 eliminates the requirement to retrospectively adjust the financial statements for measurement-period adjustments that occur in periods after a business combination is consummated. The adoption of this ASU did not have an impact on the Company's financial position, results of operations or cash flows and will be applied on a prospective basis, as applicable.

During the second quarter of 2016, the Company early adopted FASB ASU No. 2016-09, Compensation - Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting, which changes several

aspects of the accounting for share-based payment award transactions. Under the new guidance, all excess tax benefits or deficiencies associated with share-based payment award transactions are required to be recognized as an income tax benefit or expense in net income when the awards vest or are settled, with the corresponding cash flows recognized as an operating activity in the statement of cash flows. Excess tax benefits and deficiencies are no longer recognized in additional paid-in-capital. The new guidance also allows an employer to repurchase more of an employee's shares for tax withholding purposes without triggering liability accounting and to make a policy election to account for forfeitures as they occur, rather than estimating forfeitures upon issuance of the award. Upon adoption of ASU No. 2016-09, the Company elected to account for forfeitures as they occur, which had no impact on the consolidated financial statements. The provisions of ASU No. 2016-09 were adopted as of January 1, 2016 on a prospective basis and did not have a material impact on the Company's financial position, results of operations or cash flows.

Table of Contents

In May 2014, the FASB issued ASU No. 2014-09, Revenue from Contracts with Customers (Topic 606), which creates a new comprehensive revenue recognition standard that will serve as a single source of revenue guidance for all companies in all industries. The guidance applies to all companies that either enter into contracts with customers to transfer goods or services or enter into contracts for the transfer of nonfinancial assets, unless those contracts are within the scope of other standards, such as insurance contracts. ASU No. 2014-09's core principle is that a company will recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods or services. In doing so, companies will need to use more judgment and make more estimates than under the current guidance. These may include identifying performance obligations in the contract, estimating the amount of variable consideration to include in the transaction price and allocating the transaction price to each separate performance obligation. In August 2015, the FASB issued ASU No. 2015-14, Revenue from Contracts with Customers (Topic 606), Deferral of the Effective Date, which deferred the original effective date of ASU No. 2014-09 by one year. As a result, ASU No. 2014-09 becomes effective for the Company during the first quarter of 2018 and may be applied retrospectively or under a modified retrospective method where the cumulative effect is recognized at the date of initial application. Early application is permitted, but not before the first quarter of 2017. ASU No. 2016-08, Revenue from Contracts with Customers (Topic 606): Principal versus Agent Consideration (Reporting Revenue Gross versus Net), ASU No. 2016-10, Revenue from Contracts with Customers (Topic 606): Identifying Performance Obligations and Licensing and ASU No. 2016-12, Revenue from Contracts with Customers (Topic 606): Narrow-Scope Improvements and Practical Expedients were issued in March, April and May 2016, respectively, as amendments to ASU No. 2014-09. These amendments will be evaluated and adopted in conjunction with ASU No. 2014-09. The Company is currently evaluating ASU No. 2014-09, and the related amendments, to determine the potential impact that adopting this standard will have on its consolidated financial statements. Adoption of this ASU is not expected to have a material impact on the Company's insurance operations, but may have a material impact on the Company's non-insurance operations.

In May 2015, the FASB issued ASU No. 2015-09, Financial Services-Insurance (Topic 944): Disclosures about Short-Duration Contracts. The ASU requires significant new disclosures for insurers relating to short-duration insurance contract claims and the unpaid claims liability rollforward for long and short-duration contracts. The guidance requires annual tabular disclosure, on a disaggregated basis, of undiscounted incurred and paid claim and allocated claim adjustment expense development by accident year, on a net basis after reinsurance, for up to 10 years. Tables must also include the total incurred but not reported claims liabilities, plus expected development on reported claims, and claims frequency for each accident year. A description of estimation methodologies and any significant changes in methodologies and assumptions used to calculate the liability and frequency is also required. Based on the disaggregated claims information in the tables, disclosure of historical average annual percentage payout of incurred claims is also required. Interim period disclosures must include a tabular rollforward and related qualitative information for the liability for unpaid losses and loss adjustment expenses. Annual disclosures required by ASU No. 2015-09 become effective for the Company during 2016, with interim disclosures required beginning in the first quarter of 2017. The ASU must be applied retrospectively by providing comparative disclosures for each period presented. Early application is permitted. The adoption of this ASU will not have an impact on the Company's financial position, results of operations or cash flows, but will expand the nature and extent of its insurance contract disclosures, as described above.

In July 2015, the FASB issued ASU No. 2015-11, Inventory (Topic 330): Simplifying the Measurement of Inventory. The ASU changes the measurement principle for inventory from the lower of cost or market to lower of cost and net realizable value and eliminates the requirement to consider replacement cost or net realizable value less an approximately normal profit margin when measuring inventory. ASU No. 2015-11 becomes effective for the Company during the first quarter of 2017 and will be applied prospectively. Adoption of this ASU is not expected to have a material impact on the Company's financial position, results of operations or cash flows.

Table of Contents

In January 2016, the FASB issued ASU No. 2016-01, Financial Instruments (Topic 825): Recognition and Measurement of Financial Assets and Financial Liabilities. The ASU significantly changes the income statement impact of equity investments and the recognition of changes in fair value of financial liabilities attributable to an entity's own credit risk when the fair value option is elected. The ASU requires equity instruments that do not result in consolidation and are not accounted for under the equity method to be measured at fair value and to recognize any changes in fair value in net income rather than other comprehensive income (loss). ASU No. 2016-01 becomes effective for the Company during the first quarter of 2018 and will be applied using a cumulative-effect adjustment to retained earnings as of the beginning of the fiscal year of adoption. The provisions related to equity investments without a readily determinable fair value will be applied prospectively to equity investments as of the adoption date. Early adoption is permitted for certain provisions of the ASU. The Company is currently evaluating ASU No. 2016-01 to determine the potential impact that adopting this standard will have on the consolidated financial statements. Adoption of this ASU is not expected to have a material impact on the Company's financial position, cash flows, or total comprehensive income (loss), but will have a significant impact on the Company's results of operations as changes in fair value will be presented in net income rather than other comprehensive income (loss).

In February 2016, the FASB issued ASU No. 2016-02, Leases (Topic 842). The ASU requires lessees to put most leases on their balance sheets as a lease liability with a corresponding right-of-use asset, but continue to recognize the related leasing expense within net income. The guidance also eliminates the real estate-specific provisions for all entities. For lessors, the guidance modifies the classification criteria and the accounting for sales-type and direct financing leases. ASU No. 2016-02 becomes effective for the Company during the first quarter of 2019 and will be applied under a modified retrospective approach for leases that exist or are entered into after the beginning of the earliest comparative period in the financial statements. Early adoption is permitted. The Company is currently evaluating ASU No. 2016-02 to determine the potential impact that adopting this standard will have on the consolidated financial statements.

In March 2016, the FASB issued ASU No. 2016-07, Investments - Equity Method and Joint Ventures (Topic 323): Simplifying the Transition to the Equity Method of Accounting. The ASU eliminates the requirement for an investor to retroactively apply the equity method when its increase in ownership interest or degree of influence in an investee triggers equity method accounting. ASU No. 2016-07 becomes effective for the Company during the first quarter of 2017 and will be applied prospectively. Early adoption is permitted. Adoption of this ASU is not expected to have an impact on the Company's financial position, results of operations or cash flows.

In June 2016, the FASB issued ASU No. 2016-13, Financial Instruments - Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments. The ASU replaces the current incurred loss model used to measure impairment losses with an expected loss model for trade, reinsurance, and other receivables as well as financial instruments measured at amortized cost. For available-for-sale debt securities, the ASU requires entities to record impairments as an allowance, rather than a reduction of the amortized cost, as is currently required under the other-than-temporary impairment model. ASU No. 2016-13 becomes effective for the Company during the first quarter of 2020 and will be applied using a modified-retrospective approach through a cumulative-effect adjustment to retained earnings as of the beginning of the first reporting period in which the guidance is effective. The Company is currently evaluating ASU No. 2016-13 to determine the potential impact that adopting this standard will have on the consolidated financial statements.

In August 2016, the FASB issued ASU No. 2016-15, Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments, which is intended to reduce diversity in practice in how certain transactions are classified in the statement of cash flows. Some of the topics covered by the ASU include the classification of debt prepayment and extinguishment costs, contingent consideration payments made after a business combination and distributions from equity method investees. ASU No. 2016-15 becomes effective for the Company during the first quarter of 2018 and will be applied using a retrospective transition approach. Early adoption is permitted. The

Company is currently evaluating ASU No. 2016-15 to determine the potential impact that adopting this standard will have on the consolidated statements of cash flows. Adoption of this ASU will not impact the Company's financial position or results of operations and is not expected to have a material impact on the Company's consolidated statements of cash flows.

Table of Contents

3. Acquisitions

In December 2015, the Company acquired 80% of the outstanding shares of CapTech Ventures, Inc. (CapTech), a privately held company headquartered in Richmond, Virginia. CapTech is a management and IT consulting firm, providing services and solutions to a wide array of customers. Total consideration for the CapTech acquisition was \$60.6 million, which included the estimated fair value of contingent consideration the Company expected to pay based on CapTech's earnings, as defined in the stock purchase agreement, through 2018. As of December 31, 2015, the purchase price was preliminarily allocated to the acquired assets and liabilities based on the estimated fair values at the acquisition date. During the first quarter of 2016, the Company completed the process of determining the fair value of the assets and liabilities acquired with CapTech. There were no material adjustments to the provisional estimates recorded as of December 31, 2015. However, during the third quarter of 2016, the Company increased its estimate of the contingent consideration it expects to pay based on an increase in the estimate of CapTech's earnings beyond the initial projection, which resulted in a charge to other expenses of \$10.3 million. Results attributable to this acquisition are included with the Company's non-insurance operations, which are not included in a reportable segment.

4. Investments

a)The following tables summarize the Company's available-for-sale investments.

(dollars in thousands)	September 30, 2016

Total	\$338,281	\$ (9,378)	\$462,422	\$ (17,361)	\$800,703	\$ (26,739)

At September 30, 2016, the Company held 220 securities with a total estimated fair value of \$800.7 million and gross unrealized losses of \$26.7 million. Of these 220 securities, 118 securities had been in a continuous unrealized loss position for one year or longer and had a total estimated fair value of \$462.4 million and gross unrealized losses of \$17.4 million. Of these securities, 101 securities were fixed maturities and 17 were equity securities. The Company does not intend to sell or believe it will be required to sell these fixed maturities before recovery of their amortized cost. The Company has the ability and intent to hold these equity securities for a period of time sufficient to allow for the anticipated recovery of their fair value.

Total	\$2,030,690	\$ (76,054)	\$813,147	\$ (19,842)	\$2,843,837	\$ (95,896)

At December 31, 2015, the Company held 659 securities with a total estimated fair value of \$2.8 billion and gross unrealized losses of \$95.9 million. Of these 659 securities, 271 securities had been in a continuous unrealized loss position for one year or longer and had a total estimated fair value of \$813.1 million and gross unrealized losses of \$19.8 million. Of these securities, 264 securities were fixed maturities and seven were equity securities.

The Company completes a detailed analysis each quarter to assess whether the decline in the fair value of any investment below its cost basis is deemed other-than-temporary. All securities with unrealized losses are reviewed. The Company considers many factors in completing its quarterly review of securities with unrealized losses for other-than-temporary impairment, including the length of time and the extent to which fair value has been below cost and the financial condition and near-term prospects of the issuer. For equity securities, the ability and intent to hold the security for a period of time sufficient to allow for anticipated recovery is considered. For fixed maturities, the Company considers whether it intends to sell the security or if it is more likely than not that it will be required to sell the security before recovery, the implied yield-to-maturity, the credit quality of the issuer and the ability to recover all amounts outstanding when contractually due.

For equity securities, a decline in fair value that is considered to be other-than-temporary is recognized in net income based on the fair value of the security at the time of assessment, resulting in a new cost basis for the security. For fixed maturities where the Company intends to sell the security or it is more likely than not that the Company will be required to sell the security before recovery of its amortized cost, a decline in fair value is considered to be other-than-temporary and is recognized in net income based on the fair value of the security at the time of assessment, resulting in a new cost basis for the security. If the decline in fair value of a fixed maturity below its amortized cost is

considered to be other-than-temporary based upon other considerations, the Company compares the estimated present value of the cash flows expected to be collected to the amortized cost of the security. The extent to which the estimated present value of the cash flows expected to be collected is less than the amortized cost of the security represents the credit-related portion of the other-than-temporary impairment, which is recognized in net income, resulting in a new cost basis for the security. Any remaining decline in fair value represents the non-credit portion of the other-than-temporary impairment, which is recognized in other comprehensive income (loss). The discount rate used to calculate the estimated present value of the cash flows expected to be collected is the effective interest rate implicit for the security at the date of purchase.

Table of Contents

When assessing whether it intends to sell a fixed maturity or if it is likely to be required to sell a fixed maturity before recovery of its amortized cost, the Company evaluates facts and circumstances including decisions to reposition the investment portfolio, potential sales of investments to meet cash flow needs and, ultimately, current market prices.

c)The amortized cost and estimated fair value of fixed maturities at September 30, 2016 are shown below by contractual maturity.

(dollars in thousands)	Amortized Cost	Estimated Fair Value
Due in one year or less	\$798,670	\$803,039
Due after one year through five years	1,292,802	1,349,605
Due after five years through ten years	1,650,289	1,791,219
Due after ten years	4,031,241	4,491,283
	7,773,002	8,435,146
Commercial mortgage-backed securities	981,613	1,028,008

Total realized gains	22,539	12,790	69,706	40,351
Realized losses:				
Sales of fixed maturities	(60)	(3,730)	(608)	(3,947)
Sales of equity securities	(4,187)	(400)	(6,672)	(672)
Other-than-temporary impairments	—	(18,281)	(12,080)	(23,373)
Other	(55)	(279)	(2,972)	(364)
Total realized losses	(4,302)	(22,690)	(22,332)	(28,356)
Gains (losses) on securities measured at fair value through net income	9,179	(4,807)	18,462	(15,026)
Net realized investment gains (losses)	\$27,416	\$(14,707)	\$65,836	\$(3,031)
Change in net unrealized gains on investments included in other comprehensive income (loss):				
Fixed maturities	\$(53,962)	\$102,844	\$399,020	\$(77,369)
Equity securities	80,285	(313,075)	220,029	(319,522)
Short-term investments	58	45	23	36
Net increase (decrease)	\$26,381	\$(210,186)	\$619,072	\$(396,855)

There were no write downs for other-than-temporary declines in the estimated fair value of investments for the quarter ended September 30, 2016. For the nine months ended September 30, 2016, other-than-temporary impairment losses recognized in net income and included in net realized investment gains totaled \$12.1 million and were attributable to 21 equity securities. The write downs for the nine-month period included \$10.8 million related to equities in industrial, consumer, or other types of businesses and \$1.3 million related to equities in insurance, banks, and other financial institutions. For the quarter ended September 30, 2015, other-than-temporary impairment losses recognized in net income and included in net realized investment losses totaled \$18.3 million and were attributable to eight equity securities. The write downs for the quarter included \$14.3 million related to equities in industrial, consumer, or other types of businesses and \$4.0 million related to equities in insurance, banks, and other financial institutions. For the nine months ended September 30, 2015, other-than-temporary impairment losses recognized in net income and included in net realized investment losses totaled \$23.4 million and were attributable to 16 equity securities. The write downs for the nine-month period included \$18.8 million related to equities in industrial, consumer, or other types of businesses and \$4.6 million related to equities in insurance, banks, and other financial institutions.

5. Fair Value Measurements

FASB ASC 820-10, Fair Value Measurements and Disclosures, establishes a three-level hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). If the inputs used to measure the assets or liabilities fall within different levels of the hierarchy, the classification is based on the lowest level input that is significant to the fair value measurement of the asset or liability.

Classification of assets and liabilities within the hierarchy considers the markets in which the assets and liabilities are traded and the reliability and transparency of the assumptions used to determine fair value. The hierarchy requires the use of observable market data when available. The levels of the hierarchy are defined as follows:

Level 1 – Inputs to the valuation methodology are quoted prices (unadjusted) for identical assets or liabilities traded in active markets.

Table of Contents

Level 2 – Inputs to the valuation methodology include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability and market-corroborated inputs.

Level 3 – Inputs to the valuation methodology are unobservable for the asset or liability and are significant to the fair value measurement.

In accordance with FASB ASC 820, the Company determines fair value based on the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. In determining fair value, the Company uses various methods, including the market, income and cost approaches. The Company uses valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs. The following section describes the valuation methodologies used by the Company to measure assets and liabilities at fair value, including an indication of the level within the fair value hierarchy in which each asset or liability is generally classified.

Investments available-for-sale. Investments available-for-sale are recorded at fair value on a recurring basis and include fixed maturities, equity securities and short-term investments. Short-term investments include certificates of deposit, commercial paper, discount notes and treasury bills with original maturities of one year or less. Fair value for investments available-for-sale is determined by the Company after considering various sources of information, including information provided by a third party pricing service. The pricing service provides prices for substantially all of the Company's fixed maturities and equity securities. In determining fair value, the Company generally does not adjust the prices obtained from the pricing service. The Company obtains an understanding of the pricing service's valuation methodologies and related inputs, which include, but are not limited to, reported trades, benchmark yields, issuer spreads, bids, offers, duration, credit ratings, estimated cash flows and prepayment speeds. The Company validates prices provided by the pricing service by reviewing prices from other pricing sources and analyzing pricing data in certain instances.

The Company has evaluated the various types of securities in its investment portfolio to determine an appropriate fair value hierarchy level based upon trading activity and the observability of market inputs. Level 1 investments include those traded on an active exchange, such as the New York Stock Exchange. Level 2 investments include U.S. Treasury securities and obligations of U.S. government agencies, municipal bonds, foreign government bonds, commercial mortgage-backed securities, residential mortgage-backed securities, asset-backed securities and corporate debt securities. Level 3 investments include the Company's investments in insurance-linked securities funds (the ILS Funds), as further described in note 12, which are not traded on an active exchange and are valued using unobservable inputs.

Fair value for investments available-for-sale is measured based upon quoted prices in active markets, if available. Due to variations in trading volumes and the lack of quoted market prices, fixed maturities are classified as Level 2 investments. The fair value of fixed maturities is normally derived through recent reported trades for identical or similar securities, making adjustments through the reporting date based upon available market observable data described above. If there are no recent reported trades, the fair value of fixed maturities may be derived through the use of matrix pricing or model processes, where future cash flow expectations are developed based upon collateral performance and discounted at an estimated market rate. Significant inputs used to determine the fair value of obligations of states, municipalities and political subdivisions, corporate bonds and obligations of foreign governments include reported trades, benchmark yields, issuer spreads, bids, offers, credit information and estimated cash flows. Significant inputs used to determine the fair value of commercial mortgage-backed securities, residential mortgage-backed securities and asset-backed securities include the type of underlying assets, benchmark yields, prepayment speeds, collateral information, tranche type and volatility, estimated cash flows, credit information, default rates, recovery rates, issuer spreads and the year of issue.

Due to the significance of unobservable inputs required in measuring the fair value of the Company's investments in the ILS Funds, these investments are classified as Level 3 within the fair value hierarchy. Changes in fair value of the ILS Funds are included in net realized gains (losses) in net income. The fair value of the securities are derived using their reported net asset value (NAV) as the primary input, as well as other observable and unobservable inputs as deemed necessary by management. Management has obtained an understanding of the inputs, assumptions, process, and controls used to determine NAV, which is calculated by an independent third party. Unobservable inputs to the NAV calculations include assumptions around premium earnings patterns and loss reserve estimates for the underlying securitized reinsurance contracts in which the ILS Funds invest. Significant unobservable inputs used in the valuation of these investments include an adjustment to include the fair value of the equity that was issued by one of the ILS Funds in exchange for notes receivable, rather than cash, which is excluded from NAV. The Company's investments in the ILS Funds are redeemable annually as of January 1st of each calendar year.

Table of Contents

The Company's valuation policies and procedures for Level 3 investments are determined by management. Fair value measurements are analyzed quarterly to ensure the change in fair value from prior periods is reasonable relative to management's understanding of the underlying investments, recent market trends and external market data, which includes the price of a comparable security and an insurance-linked security index.

Senior long-term debt and other debt. Senior long-term debt and other debt is carried at amortized cost with the estimated fair value disclosed on the consolidated balance sheets. Senior long-term debt and other debt is classified as Level 2 within the fair value hierarchy due to variations in trading volumes and the lack of quoted market prices. Fair value for senior long-term debt and other debt is generally derived through recent reported trades for identical securities, making adjustments through the reporting date, if necessary, based upon available market observable data including U.S. Treasury securities and implied credit spreads. Significant inputs used to determine the fair value of senior long-term debt and other debt include reported trades, benchmark yields, issuer spreads, bids and offers.

The following tables present the balances of assets measured at fair value on a recurring basis by level within the fair value hierarchy.

(dollars in thousands)	September 30, 2016

There were no transfers into or out of Level 1 and Level 2 during the quarter and nine months ended September 30, 2016 and 2015.

The Company did not have any assets or liabilities measured at fair value on a non-recurring basis during the nine months ended September 30, 2016 and 2015.

Table of Contents

6. Segment Reporting Disclosures

The Company monitors and reports its ongoing underwriting operations in the following three segments: U.S. Insurance, International Insurance and Reinsurance. In determining how to aggregate and monitor its underwriting results, the Company considers many factors, including the geographic location and regulatory environment of the insurance entity underwriting the risk, the nature of the insurance product sold, the type of account written and the type of customer served. The U.S. Insurance segment includes all direct business and facultative placements written by the Company's insurance subsidiaries domiciled in the United States. The International Insurance segment includes all direct business and facultative placements written by the Company's insurance subsidiaries domiciled outside of the United States, including the Company's syndicate at Lloyd's of London. The Reinsurance segment includes all treaty reinsurance written across the Company. Results for lines of business discontinued prior to, or in conjunction with, acquisitions, including the results attributable to the run-off of life and annuity reinsurance business, are reported in the Other Insurance (Discontinued Lines) segment. All investing activities related to the Company's insurance operations are included in the Investing segment.

The Company's non-insurance operations include the Company's Markel Ventures operations, which primarily consist of controlling interests in various industrial and service businesses. The Company's non-insurance operations also include the results of the Company's legal and professional consulting services, and, effective December 8, 2015, the results of the Company's investment management services attributable to Markel CATCo Investment Management Ltd. For purposes of segment reporting, the Company's non-insurance operations are not considered to be a reportable segment.

Segment profit for the Investing segment is measured by net investment income and net realized investment gains or losses. Segment profit or loss for each of the Company's underwriting segments is measured by underwriting profit or loss. The property and casualty insurance industry commonly defines underwriting profit or loss as earned premiums net of losses and loss adjustment expenses and underwriting, acquisition and insurance expenses. Underwriting profit or loss does not replace operating income or net income computed in accordance with U.S. GAAP as a measure of profitability. Underwriting profit or loss provides a basis for management to evaluate the Company's underwriting performance. Segment profit or loss for the Company's underwriting segments also includes other revenues and other expenses, primarily related to the run-off of managing general agent operations that were discontinued in conjunction with acquisitions. Other revenues and other expenses in the Other Insurance (Discontinued Lines) segment are comprised of the results attributable to the run-off of life and annuity reinsurance business.

For management reporting purposes, the Company allocates assets to its underwriting, investing and non-insurance operations. Underwriting assets are all assets not specifically allocated to the Investing segment or to the Company's non-insurance operations. Underwriting and investing assets are not allocated to the U.S. Insurance, International Insurance, Reinsurance or Other Insurance (Discontinued Lines) segments since the Company does not manage its assets by underwriting segment. The Company does not allocate capital expenditures for long-lived assets to any of its underwriting segments for management reporting purposes.

Table of Contents

⁽¹⁾ incurred losses, loss adjustment expenses and underwriting, acquisition and insurance expenses to earned premiums.

⁽²⁾ NM – Ratio is not meaningful.

Table of Contents

b) The following table reconciles segment assets to the Company's consolidated balance sheets.

(dollars in thousands)	September 30, 2016	December 31, 2015
Segment assets:		
Investing	\$ 19,235,156	\$ 18,056,947
Underwriting	5,681,650	5,385,126
Total segment assets	24,916,806	23,442,073
Non-insurance operations	1,486,839	1,497,042
Total assets	\$ 26,403,645	\$ 24,939,115

7. Senior Long-Term Debt

In the second quarter of 2016, the Company issued \$500 million of 5.0% unsecured senior notes due April 5, 2046. Net proceeds to the Company were \$493.1 million. The Company used a portion of these proceeds to purchase \$70.2 million of principal on its 7.35% Senior Notes due 2034 and \$108.8 million of principal on its 7.125% Senior Notes due 2019 through a tender offer at a total purchase price of \$95.0 million and \$126.4 million, respectively. The Company also expects to use the proceeds from this issuance to retire its 7.20% unsecured senior notes, when they come due April 14, 2017 (\$90.6 million aggregate principal amount of those notes was outstanding at September 30, 2016), and the remainder for general corporate purposes.

In connection with the tender offer and purchase, the Company recognized a loss on early extinguishment of debt of \$44.1 million during the nine months ended September 30, 2016.

8. Other Revenues and Other Expenses

The following tables summarize the components of other revenues and other expenses.

(dollars in thousands)	Quarter Ended September 30,			
	2016	2015	2016	2015
	Other	Other	Other	Other
	Revenues	Expenses	Revenues	Expenses
Insurance:				
Managing general agent operations	\$ 1,704	\$ 1,347	\$ 1,055	\$ 2,339
Life and annuity	466	4,232	42	6,913
Other	—	—	246	—
	2,170	5,579	1,343	9,252
Non-Insurance:

Total	\$ 336,475	\$ 309,713	\$ 306,736	\$ 290,749

Table of Contents

(dollars in thousands)	Nine Months Ended September 30,			
	2016		2015	
	Other	Other	Other	Other
	Revenues	Expenses	Revenues	Expenses
Insurance:				
Managing general agent operations	\$8,811	\$6,446	\$10,043	\$7,250
Life and annuity	1,407	19,432	369	17,610
Other	—	—	2,057	—
	10,218	25,878	12,469	24,860
Non-Insurance:				
Markel Ventures: Manufacturing	589,752	491,188	567,960	513,087
Markel Ventures: Non-Manufacturing	315,863	295,647	216,191	209,947
Investment management	22,820	31,151	—	—
Other	16,686	18,851	20,531	16,092
	945,121	836,837	804,682	739,126
Total	\$955,339	\$862,715	\$817,151	\$763,986

The Company's Markel Ventures operations primarily consist of controlling interests in various industrial and service businesses and are viewed by management as separate and distinct from the Company's insurance operations. While each of the companies is operated independently from one another, management aggregates financial results into two industry groups: manufacturing and non-manufacturing.

9. Reinsurance

The following tables summarize the effect of reinsurance and retrocessional reinsurance on premiums written and earned.

(dollars in thousands)	Quarter Ended September 30,			
	2016		2015	
	Written	Earned	Written	Earned
Direct	\$888,009	\$883,687	\$878,269	\$881,512
Assumed	241,764	292,951	280,095	293,481
Ceded	(200,390)	(202,394)	(205,180)	(211,318)
Net premiums	\$929,383	\$974,244	\$953,184	\$963,675

(dollars in thousands)	Nine Months Ended September 30,			
	2016		2015	
	Written	Earned	Written	Earned
Direct	\$2,724,341	\$2,617,074	\$2,631,734	\$2,601,458
Assumed	1,075,744	878,882	1,044,889	910,640
Ceded	(638,196)	(613,167)	(653,665)	(647,216)
Net premiums	\$3,161,889	\$2,882,789	\$3,022,958	\$2,864,882

The percentage of ceded earned premiums to gross earned premiums was 17% and 18%, respectively, for the quarters ended September 30, 2016 and 2015 and 18% for the nine months ended September 30, 2016 and 2015. The percentage of assumed earned premiums to net earned premiums was 30% for the quarters ended September 30, 2016 and 2015 and 30% and 32%, respectively, for the nine months ended September 30, 2016 and 2015.

Incurred losses and loss adjustment expenses were net of reinsurance recoverables (ceded incurred losses and loss adjustment expenses) of \$83.3 million and \$53.8 million, respectively, for the quarters ended September 30, 2016 and

2015 and \$289.4 million and \$285.9 million, respectively, for the nine months ended September 30, 2016 and 2015.

Table of Contents

10. Life and Annuity Benefits

Life and annuity benefits are compiled on a reinsurance contract-by-contract basis and are discounted using standard actuarial techniques and cash flow models. Since the development of the life and annuity reinsurance reserves is based upon cash flow projection models, the Company must make estimates and assumptions based on cedent experience, industry mortality tables, and expense and investment experience, including a provision for adverse deviation. The assumptions used to determine policy benefit reserves are generally locked-in for the life of the contract unless an unlocking event occurs. Loss recognition testing is performed to determine if existing policy benefit reserves, together with the present value of future gross premiums and expected investment income earned thereon, are adequate to cover the present value of future benefits, settlement and maintenance costs. If the existing policy benefit reserves are not sufficient, the locked-in assumptions are revised to current best estimate assumptions and a charge to earnings for life and annuity benefits is recognized at that time.

Life and annuity benefits are also adjusted to the extent unrealized gains on the investments supporting the policy benefit reserves would result in a reserve deficiency if those gains were realized. During the quarter and nine months ended September 30, 2016, the Company recognized a reserve deficiency resulting from decreases in the market yield on the investment portfolio supporting the policy benefit reserves by increasing life and annuity benefits by \$9.6 million and \$57.5 million, respectively, and decreasing the change in net unrealized holding gains included in other comprehensive income by a corresponding amount. As of September 30, 2016, the cumulative adjustment to life and annuity benefits attributable to unrealized gains on the underlying investment portfolio totaled \$57.5 million.

11. Income Taxes

The effective tax rate was 27% and 21% for the nine months ended September 30, 2016 and 2015, respectively. For the nine months ended September 30, 2016, the effective tax rate differs from the U.S. statutory tax rate of 35% primarily as a result of tax-exempt investment income. For the nine months ended September 30, 2015, the effective tax rate differs from the U.S. statutory tax rate of 35% primarily as a result of foreign tax credits for foreign taxes paid and tax-exempt investment income. The Company's recognition of foreign tax credits in 2015 had a favorable impact on its effective tax rate for the nine months ended September 30, 2015 of 8%. The increase in the effective tax rate in 2016 compared to 2015 was primarily due to the 2015 impact of foreign tax credits described above and a decrease in estimated annual earnings attributable to foreign operations that are taxed at a lower rate in 2016 compared to 2015.

During the first quarter of 2016, the Internal Revenue Service completed its examination of the Company's 2012 federal income tax return. There were no adjustments to our income tax liabilities as a result of this examination.

12. Variable Interest Entities

In December 2015, the Company formed Markel CATCo Investment Management Ltd. (MCIM), a wholly-owned consolidated subsidiary. MCIM is an insurance-linked securities investment fund manager and insurance manager headquartered in Bermuda. Results attributable to MCIM are included with the Company's non-insurance operations, which are not included in a reportable segment.

In December 2015, the Company also formed a mutual fund company and reinsurance company, both of which were organized under Bermuda law and are managed by MCIM. The mutual fund company issues multiple classes of nonvoting, redeemable preference shares to investors through its funds (the Funds) and the Funds are primarily invested in nonvoting shares of the reinsurance company. The underwriting results of the reinsurance company are attributed to the Funds through the issuance of nonvoting preference shares.

The Funds and the reinsurance company are considered VIEs, as their preference shareholders have no voting rights. MCIM has the power to direct the activities that most significantly impact the economic performance of these entities, but does not have a variable interest in any of the entities. Except as described below, the Company is not the primary beneficiary of the Funds or the reinsurance company, as the Company's involvement is generally limited to that of an investment or insurance manager, receiving fees that are at market and commensurate with the level of effort required. The Company is the sole investor in one of the Funds, the Markel Diversified Fund, and consolidates that fund as its primary beneficiary. The Company also holds an investment in another one of the Funds (\$26.0 million as of September 30, 2016) but does not have the obligation to absorb losses or right to receive benefits from the VIE that could potentially be significant to the VIE, and therefore does not consolidate that Fund.

Table of Contents

As of September 30, 2016, total assets of the Markel Diversified Fund were \$166.9 million and total liabilities were \$63.8 million. The assets of the Markel Diversified Fund are available for use only by the Markel Diversified Fund, and are not available for use by the Company. Total assets of the Markel Diversified Fund include an investment in one of the unconsolidated Funds totaling \$164.4 million as of September 30, 2016, which represents 6% of the outstanding preference shares of that fund. This investment is included in equity securities (available-for-sale) on the Company's consolidated balance sheet. Total liabilities of the Markel Diversified Fund include a \$62.5 million note payable delivered as part of the consideration provided for its investment. This note payable is included in senior long-term debt and other debt on the Company's consolidated balance sheet. Other than the note payable, any liabilities held by the Markel Diversified Fund have no recourse to the Company's general credit.

The Company's exposure to risk from the unconsolidated Funds and reinsurance company is generally limited to its investment and any earned but uncollected fees. The Company has not issued any investment performance guarantees to these VIEs or their investors. As of September 30, 2016, total investment and insurance assets under management of MCIM for unconsolidated VIEs were \$3.4 billion.

13. Net Income per Share

Net income per share was determined by dividing adjusted net income to shareholders by the applicable weighted average shares outstanding. Diluted net income per share is computed by dividing adjusted net income to shareholders by the weighted average number of common shares and dilutive potential common shares outstanding during the period.

(in thousands, except per share amounts)	Quarter Ended		Nine Months Ended	
	September 30,		September 30,	
	2016	2015	2016	2015
Net income to shareholders	\$83,796	\$102,519	\$322,963	\$384,880
Adjustment of redeemable noncontrolling interests	(4,928)	1,376	(10,909)	3,091
Adjusted net income to shareholders	\$78,868	\$103,895	\$312,054	\$387,971
Basic common shares outstanding	14,033	13,983	14,013	13,977
Dilutive potential common shares from conversion of options	3	8	4	9
Dilutive potential common shares from conversion of restricted stock	49	71	62	70
Diluted shares outstanding	14,085	14,062	14,079	14,056
Basic net income per share	\$5.62	\$7.43	\$22.27	\$27.76
Diluted net income per share	\$5.60	\$7.39	\$22.16	\$27.60

Table of Contents

14. Other Comprehensive Income (Loss)

Other comprehensive income (loss) includes net holding gains (losses) arising during the period, changes in unrealized other-than-temporary impairment losses on fixed maturities arising during the period and reclassification adjustments for net gains included in net income. Other comprehensive income (loss) also includes changes in foreign currency translation adjustments and changes in net actuarial pension loss.

The following table presents the change in accumulated other comprehensive income by component, net of taxes and noncontrolling interests, for the nine months ended September 30, 2016 and 2015.

(dollars in thousands)	Unrealized Holding Gains on Available-for-Sale Securities	Foreign Currency	Net Actuarial Pension Loss	Total
December 31, 2014	\$ 1,793,254	\$ (43,491)	\$ (45,206)	\$ 1,704,557
Other comprehensive loss before reclassifications	(258,275)) (22,236)) —	(280,511)
Amounts reclassified from accumulated other comprehensive income	(8,037)) —	1,407	(6,630)
Total other comprehensive income (loss)	(266,312)) (22,236)	1,407	(287,141)
September 30, 2015	\$ 1,526,942	\$ (65,727)	\$ (43,799)	\$ 1,417,416
December 31, 2015	\$ 1,472,762	\$ (72,696)	\$ (45,558)	\$ 1,354,508
Other comprehensive income (loss) before reclassifications	411,354	(6,159)) —	405,195
Amounts reclassified from accumulated other comprehensive income	(33,308)) —	1,247	(32,061)
Total other comprehensive income (loss)	378,046	(6,159)	1,247	373,134
September 30, 2016	\$ 1,850,808	\$ (78,855)	\$ (44,311)	\$ 1,727,642

The following table summarizes the tax expense (benefit) associated with each component of other comprehensive income (loss).

(dollars in thousands)	Quarter Ended September 30,		Nine Months Ended September 30,	
	2016	2015	2016	2015
Change in net unrealized gains on investments:				
Net holding gains (losses) arising during the period	\$8,309	\$ (71,549)	\$ 196,189	\$ (129,546)
Change in unrealized other-than-temporary impairment losses on fixed maturities arising during the period	(3)	(10)	(9)	28
Reclassification adjustments for net gains (losses) included in net income	(4,811)	4,647	(12,621)	(1,025)
Change in net unrealized gains on investments	3,495	(66,912)	183,559	(130,543)
Change in foreign currency translation adjustments	2,847	829	1,152	1,662
Change in net actuarial pension loss	86	119	274	352
Total	\$6,428	\$ (65,964)	\$ 184,985	\$ (128,529)

Table of Contents

The following table presents the details of amounts reclassified from accumulated other comprehensive income into income, by component.

	Quarter Ended September 30,		Nine Months Ended September 30,	
(dollars in thousands)	2016	2015	2016	2015
Unrealized holding gains on available-for-sale securities:				
Other-than-temporary impairment losses	\$—	\$(18,281)	\$(12,080)	\$(23,373)
Net realized investment gains, excluding other-than-temporary impairment losses	14,569	7,634	58,009	32,435
Total before taxes	14,569	(10,647)	45,929	9,062
Income taxes	(4,811)	4,647	(12,621)	(1,025)
Reclassification of unrealized holding gains (losses), net of taxes	\$9,758	\$(6,000)	\$33,308	\$8,037
Net actuarial pension loss:				
Underwriting, acquisition and insurance expenses	\$(476)	\$(594)	\$(1,521)	\$(1,759)
Income taxes	86	119	274	352
Reclassification of net actuarial pension loss, net of taxes	\$(390)	\$(475)	\$(1,247)	\$(1,407)

15. Contingencies

Contingencies arise in the normal course of the Company's operations and are not expected to have a material impact on the Company's financial condition or results of operations.

16. Subsequent Events

After the end of the third quarter of 2016, the Caribbean and southeastern and mid-Atlantic regions of the United States sustained losses from Hurricane Matthew. Based on information currently available, the Company estimates its range of net incurred losses on this event is between \$40 million and \$100 million before income taxes. This estimated range of losses was derived based on preliminary industry loss estimates, policy level reviews and direct contact with insureds and brokers when possible. However, we are still gathering loss data from our policy holders and cedents and do not expect that all losses have been reported at this time. Potential losses associated with business interruption are also not yet clear. The Company continues to closely monitor reported claims to refine its estimate of losses, which will be recorded in the fourth quarter of 2016.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The accompanying consolidated financial statements and related notes have been prepared in accordance with U.S. generally accepted accounting principles (U.S. GAAP) and include the accounts of Markel Corporation and its consolidated subsidiaries, as well as any variable interest entities (VIEs) that meet the requirements for consolidation (the Company).

Critical Accounting Estimates

Critical accounting estimates are those estimates that both are important to the portrayal of our financial condition and results of operations and require us to exercise significant judgment. The preparation of financial statements in accordance with U.S. GAAP requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses and the disclosure of material contingent assets and liabilities, including litigation contingencies. These estimates, by necessity, are based on assumptions about numerous factors.

We review the following critical accounting estimates and assumptions quarterly: evaluating the adequacy of reserves for unpaid losses and loss adjustment expenses, life and annuity reinsurance benefit reserves, the reinsurance allowance for doubtful accounts and income tax liabilities, as well as analyzing the recoverability of deferred tax assets, estimating reinsurance premiums written and earned and evaluating the investment portfolio for other-than-temporary declines in estimated fair value. Critical accounting estimates and assumptions for goodwill and intangible assets are reviewed in conjunction with an acquisition and goodwill and indefinite-lived intangible assets are reassessed at least annually for impairment. Actual results may differ materially from the estimates and assumptions used in preparing the consolidated financial statements.

Readers are urged to review our 2015 Annual Report on Form 10-K for a more complete description of our critical accounting estimates.

Effective January 1, 2016, we adopted Financial Accounting Standards Board (FASB) Accounting Standards Update (ASU) No. 2015-02, Consolidation (Topic 810): Amendments to the Consolidation Analysis, which changes the way reporting enterprises evaluate whether (a) they should consolidate limited partnerships and similar entities, (b) fees paid to a decision maker or service provider are variable interests in a VIE, and (c) variable interests in a VIE held by related parties of the reporting enterprise require the reporting enterprise to consolidate the VIE. It also eliminates the VIE consolidation model based on majority exposure to variability that applied to certain investment companies and similar entities. The ASU also significantly changes how to evaluate voting rights for entities that are not similar to limited partnerships when determining whether the entity is a VIE, which may affect entities for which the decision making rights are conveyed through a contractual arrangement. The adoption of this guidance did not result in any changes to our previous consolidation conclusions.

During the second quarter of 2016, we early adopted FASB ASU No. 2016-09, Improvements to Employee Share-Based Payment Accounting, which changes several aspects of the accounting for share-based payment award transactions. Under the new guidance, all excess tax benefits or deficiencies associated with share-based payment award transactions are required to be recognized as an income tax benefit or expense in net income when the awards vest or are settled, with the corresponding cash flows recognized as an operating activity in the statement of cash flows. Excess tax benefits and deficiencies are no longer recognized in additional paid-in-capital. The new guidance also allows an employer to repurchase more of an employee's shares for tax withholding purposes without triggering liability accounting and to make a policy election to account for forfeitures as they occur, rather than estimating forfeitures upon issuance of the award. Upon adoption of ASU No. 2016-09, we elected to account for forfeitures as they occur, which had no impact on the consolidated financial statements. The provisions of ASU No. 2016-09 were adopted as of January 1, 2016 on a prospective basis and did not have a material impact on our financial position,

results of operations or cash flows.

Table of Contents

In May 2014, the FASB issued ASU No. 2014-09, Revenue from Contracts with Customers (Topic 606), which creates a new comprehensive revenue recognition standard that will serve as a single source of revenue guidance for all companies in all industries. The guidance applies to all companies that either enter into contracts with customers to transfer goods or services or enter into contracts for the transfer of nonfinancial assets, unless those contracts are within the scope of other standards, such as insurance contracts. ASU No. 2014-09's core principle is that a company will recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods or services. In doing so, companies will need to use more judgment and make more estimates than under the current guidance. These may include identifying performance obligations in the contract, estimating the amount of variable consideration to include in the transaction price and allocating the transaction price to each separate performance obligation. In August 2015, the FASB issued ASU No. 2015-14, Revenue from Contracts with Customers (Topic 606), Deferral of the Effective Date, which deferred the original effective date of ASU No. 2014-09 by one year. As a result, ASU No. 2014-09 becomes effective for us during the first quarter of 2018 and may be applied retrospectively or under a modified retrospective method where the cumulative effect is recognized at the date of initial application. Early application is permitted, but not before the first quarter of 2017. ASU No. 2016-08, Revenue from Contracts with Customers (Topic 606): Principal versus Agent Consideration (Reporting Revenue Gross versus Net), ASU No. 2016-10, Revenue from Contracts with Customers (Topic 606): Identifying Performance Obligations and Licensing and ASU No. 2016-12, Revenue from Contracts with Customers (Topic 606): Narrow-Scope Improvements and Practical Expedients were issued in March, April and May 2016, respectively, as amendments to ASU No. 2014-09. These amendments will be evaluated and adopted in conjunction with ASU No. 2014-09. We are currently evaluating ASU No. 2014-09, and related amendments, to determine the potential impact that adopting this standard will have on our consolidated financial statements. Adoption of this ASU is not expected to have a material impact on our insurance operations, but may have a material impact on our non-insurance operations.

In January 2016, the FASB issued ASU No. 2016-01, Financial Instruments (Topic 825): Recognition and Measurement of Financial Assets and Financial Liabilities. The ASU significantly changes the income statement impact of equity investments and the recognition of changes in fair value of financial liabilities attributable to an entity's own credit risk when the fair value option is elected. The ASU requires equity instruments that do not result in consolidation and are not accounted for under the equity method to be measured at fair value and to recognize any changes in fair value in net income rather than other comprehensive income (loss). ASU No. 2016-01 becomes effective for us during the first quarter of 2018 and will be applied using a cumulative-effect adjustment to retained earnings as of the beginning of the fiscal year of adoption. The provisions related to equity investments without a readily determinable fair value will be applied prospectively to equity investments as of the adoption date. Early adoption is permitted for certain provisions of the ASU. We are currently evaluating ASU No. 2016-01 to determine the potential impact that adopting this standard will have on our consolidated financial statements. Adoption of this ASU is not expected to have a material impact on our financial position, cash flows, or total comprehensive income (loss), but will have a significant impact on our results of operations as changes in fair value will be presented in net income rather than other comprehensive income (loss).

In February 2016, the FASB issued ASU No. 2016-02, Leases (Topic 842). The ASU requires lessees to put most leases on their balance sheets as a lease liability with a corresponding right-of-use asset, but continue to recognize the related leasing expense within net income. The guidance also eliminates the real estate-specific provisions for all entities. For lessors, the guidance modifies the classification criteria and the accounting for sales-type and direct financing leases. ASU No. 2016-02 becomes effective for us during the first quarter of 2019 and will be applied under a modified retrospective approach for leases that exist or are entered into after the beginning of the earliest comparative period in the financial statements. Early adoption is permitted. We are currently evaluating ASU No. 2016-02 to determine the potential impact that adopting this standard will have on our consolidated financial statements.

In June 2016, the FASB issued ASU No. 2016-13, Financial Instruments - Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments. The ASU replaces the current incurred loss model used to measure impairment losses with an expected loss model for trade, reinsurance, and other receivables as well as financial instruments measured at amortized cost. For available-for-sale debt securities, the ASU requires entities to record impairments as an allowance, rather than a reduction of the amortized cost, as is currently required under the other-than-temporary impairment model. ASU No. 2016-13 becomes effective for us during the first quarter of 2020 and will be applied using a modified-retrospective approach through a cumulative-effect adjustment to retained earnings as of the beginning of the first reporting period in which the guidance is effective. We are currently evaluating ASU No. 2016-13 to determine the potential impact that adopting this standard will have on the consolidated financial statements.

Table of Contents

Our Business

We are a diverse financial holding company serving a variety of niche markets. Our principal business markets and underwrites specialty insurance products. We believe that our specialty product focus and niche market strategy enable us to develop expertise and specialized market knowledge. We seek to differentiate ourselves from competitors by our expertise, service, continuity and other value-based considerations. We also own interests in various industrial and service businesses that operate outside of the specialty insurance marketplace. Our financial goals are to earn consistent underwriting and operating profits and superior investment returns to build shareholder value.

We monitor and report our ongoing underwriting operations in the following three segments: U.S. Insurance, International Insurance and Reinsurance. In determining how to aggregate and monitor our underwriting results, management considers many factors, including the geographic location and regulatory environment of the insurance entity underwriting the risk, the nature of the insurance product sold, the type of account written and the type of customer served. The U.S. Insurance segment includes all direct business and facultative placements written by our insurance subsidiaries domiciled in the United States. The International Insurance segment includes all direct business and facultative placements written by our insurance subsidiaries domiciled outside of the United States, including our syndicate at Lloyd's of London (Lloyd's). The Reinsurance segment includes all treaty reinsurance written across the Company. Results for lines of business discontinued prior to, or in conjunction with, acquisitions are reported in the Other Insurance (Discontinued Lines) segment. All investing activities related to our insurance operations are included in the Investing segment.

Our U.S. Insurance segment includes both hard-to-place risks written outside of the standard market on an excess and surplus lines basis and unique and hard-to-place risks that must be written on an admitted basis due to marketing and regulatory reasons. The following products are included in this segment: general liability, professional liability, catastrophe-exposed property, personal property, workers' compensation, specialty program insurance for well-defined niche markets, and liability coverages and other coverages tailored for unique exposures. Business in this segment is written through our Wholesale, Specialty and Global Insurance divisions. The Wholesale division writes commercial risks, primarily on an excess and surplus lines basis, using a network of wholesale brokers managed on a regional basis. The Specialty division writes program insurance and other specialty coverages for well-defined niche markets, primarily on an admitted basis. The Global Insurance division writes risks outside of the standard market on both an admitted and non-admitted basis. Global Insurance division business written by our U.S. insurance subsidiaries is included in this segment.

Our International Insurance segment writes risks that are characterized by either the unique nature of the exposure or the high limits of insurance coverage required by the insured. Risks written in the International Insurance segment are written on either a direct basis or a subscription basis, the latter of which means that loss exposures brought into the market are typically insured by more than one insurance company or Lloyd's syndicate. When we write business in the subscription market, we prefer to participate as lead underwriter in order to control underwriting terms, policy conditions and claims handling. Products offered within our International Insurance segment include primary and excess of loss property, excess liability, professional liability, marine and energy and liability coverages and other coverages tailored for unique exposures. Business included in this segment is produced through our Markel International and Global Insurance divisions. The Markel International division writes business worldwide from our London-based platform, which includes our syndicate at Lloyd's. Global Insurance division business written by our non-U.S. insurance subsidiaries, which primarily targets Fortune 1000 accounts, is included in this segment.

Our Reinsurance segment includes property, casualty and specialty treaty reinsurance products offered to other insurance and reinsurance companies globally through the broker market. Our treaty reinsurance offerings include both quota share and excess of loss reinsurance and are typically written on a participation basis, which means each reinsurer shares proportionally in the business ceded under the reinsurance treaty written. Principal lines of business

include: property (including catastrophe-exposed property), professional liability, general casualty, credit, surety, auto, and workers' compensation. Our reinsurance product offerings are underwritten by our Global Reinsurance division and our Markel International division.

For purposes of segment reporting, the Other Insurance (Discontinued Lines) segment includes lines of business that have been discontinued prior to, or in conjunction with, acquisitions. The lines were discontinued because we believed some aspect of the product, such as risk profile or competitive environment, would not allow us to earn consistent underwriting profits. The Other Insurance (Discontinued Lines) segment also includes development on asbestos and environmental (A&E) loss reserves and the results attributable to the run-off of our life and annuity reinsurance business.

Table of Contents

In December 2015, we completed the acquisition of substantially all of the assets of CATCo Investment Management Ltd. (CATCo IM) and CATCo-Re Ltd. CATCo IM was an insurance-linked securities investment fund manager and reinsurance manager headquartered in Bermuda focused on building and managing highly diversified, collateralized retrocession and reinsurance portfolios covering global property catastrophe risks. Following the acquisition, we are operating this business through Markel CATCo Investment Management Ltd. (MCIM). MCIM receives management fees for its investment management and insurance management services, as well as performance fees based on the annual performance of the investment funds that it manages. Results attributable to MCIM are included with our non-insurance operations, which are not included in a reportable segment.

Through our wholly-owned subsidiary Markel Ventures, Inc. (Markel Ventures), we own interests in various industrial and service businesses that operate outside of the specialty insurance marketplace. These businesses are viewed by management as separate and distinct from our insurance operations and are comprised of a diverse portfolio of businesses from various industries, including manufacturers of transportation and industrial equipment, and providers of healthcare, housing, data and consulting services. Local management teams oversee the day-to-day operations of these companies, while strategic decisions are made in conjunction with members of our executive management team. While each of these businesses is operated independently, we aggregate their financial results into two industry groups: manufacturing and non-manufacturing. Our strategy in making these investments is similar to our strategy for purchasing equity securities. We seek to invest in profitable companies, with honest and talented management, that exhibit reinvestment opportunities and capital discipline, at reasonable prices. We intend to own the businesses acquired for a long period of time.

In December 2015, we acquired 80% of the outstanding shares of CapTech Ventures, Inc. (CapTech), a privately held company headquartered in Richmond, Virginia. CapTech is a management and IT consulting firm, providing services and solutions to a wide array of customers. Results attributable to CapTech are included with our non-insurance operations, which are not included in a reportable segment. Due to the one month lag in consolidating the results of our Markel Ventures operations, the financial results for CapTech are included in our consolidated statements of income and comprehensive income (loss) beginning in January 2016.

Key Performance Indicators

We measure financial success by our ability to compound growth in book value per share at a high rate of return over a long period of time. To mitigate the effects of short-term volatility, we measure ourselves over a five-year period. We believe that growth in book value per share is the most comprehensive measure of our success because it includes all underwriting, investing and operating results. We measure underwriting results by our underwriting profit or loss and combined ratio. We measure investing results by our taxable equivalent total investment return. We measure our other operating results, which primarily consist of our Markel Ventures operations, by our revenues and net income (loss), as well as earnings before interest, income taxes, depreciation and amortization (EBITDA). Our quarterly performance measures are discussed below in greater detail under "Results of Operations."

Table of Contents

Results of Operations

The following table presents the components of net income to shareholders.

	Quarter Ended		Nine Months Ended	
	September 30,		September 30,	
(dollars in thousands)	2016	2015	2016	2015
Underwriting profit	\$22,318	\$113,319	\$205,075	\$311,000
Net investment income	93,147	87,060	279,437	270,521
Net realized investment gains (losses)	27,416	(14,707)	65,836	(3,031)
Other revenues	336,475	306,736	955,339	817,151
Amortization of intangible assets	(17,010)	(18,914)	(51,474)	(50,503)
Other expenses	(309,713)	(290,749)	(862,715)	(763,986)
Interest expense	(33,152)	(30,064)	(97,690)	(88,664)
Loss on early extinguishment of debt	—	—	(44,100)	—
Income tax expense	(36,060)	(48,271)	(121,968)	(101,619)
Net (income) loss attributable to noncontrolling interests	375	(1,891)	(4,777)	(5,989)
Net income to shareholders	\$83,796	\$102,519	\$322,963	\$384,880

The components of net income to shareholders are discussed in detail under "Underwriting Results," "Investing Results," "Other Revenues and Other Expenses" and "Interest Expense, Loss on Early Extinguishment of Debt and Income Taxes."

Underwriting Results

Underwriting profits are a key component of our strategy to grow book value per share. We believe that the ability to achieve consistent underwriting profits demonstrates knowledge and expertise, commitment to superior customer service and the ability to manage insurance risk. The property and casualty insurance industry commonly defines underwriting profit or loss as earned premiums net of losses and loss adjustment expenses and underwriting, acquisition and insurance expenses. We use underwriting profit or loss as a basis for evaluating our underwriting performance.

Table of Contents

Consolidated

The following table presents selected data from our underwriting operations.

	Quarter Ended September 30,				Nine Months Ended September 30,			
(dollars in thousands)	2016		2015		2016		2015	
Gross premium volume	\$1,129,773		\$1,158,364		\$3,800,085		\$3,676,623

U.S. GAAP Combined Ratios ⁽¹⁾

U.S. Insurance	101	%	90	%	95	%	89	%
International Insurance	91	%	87	%	95	%	87	%
Reinsurance	94	%	86	%	87	%	92	%
Other Insurance (Discontinued Lines)	NM		⁽²⁾ NM		NM		⁽²⁾ NM	
Markel Corporation (Consolidated)	98	%	88	%	93	%	89	%

The U.S. GAAP combined ratio is a measure of underwriting performance and represents the relationship of incurred losses, loss adjustment expenses and underwriting, acquisition and insurance expenses to earned premiums. A combined ratio less than 100% indicates an underwriting profit, while a combined ratio greater than

⁽¹⁾ 100% reflects an underwriting loss. The U.S. GAAP combined ratio is the sum of the loss ratio and the expense ratio. The loss ratio represents the relationship of incurred losses and loss adjustment expenses to earned premiums. The expense ratio represents the relationship of underwriting, acquisition and insurance expenses to earned premiums.

⁽²⁾ NM – Ratio is not meaningful.

Our combined ratio was 98% and 93%, respectively, for the quarter and nine months ended September 30, 2016 compared to 88% and 89%, respectively, for the same periods of 2015.

The combined ratio for the quarter ended September 30, 2016 included \$50.1 million, or five points on the consolidated combined ratio, of losses and loss adjustment expenses resulting from management actions during the third quarter in response to claim trends noted by our actuaries in our medical malpractice and specified medical product lines within the U.S. Insurance segment. Of this amount, \$36.5 million represents reserve strengthening on prior accident years. The adverse development on both of these product lines was driven by an increase in the proportion of business written on classes with higher claim frequencies relative to other classes of business within these product lines over the last several years, including correctional facilities and contract physician staffing. Beginning in late 2015, we saw an increase in claim frequencies on these classes, which was inconsistent with the historical trends indicated by our actuarial analyses. In recent quarters, we have continued to see steady increases in claim frequencies, as well as increases in claims payments on these classes of business. As a result, we have given more credibility to this new trend, and management increased loss reserves accordingly. In response, we have taken corrective actions for business written in the affected classes. We also experienced less favorable development of prior years' loss reserves across various other product lines within each of our ongoing underwriting segments in the third quarter of 2016 compared to the same period of 2015.

The current accident year loss ratio for the quarter ended September 30, 2016 increased slightly compared to 2015. Higher attritional losses within our U.S. Insurance segment, due in part to higher losses on our medical malpractice

and specified medical product lines, and International Insurance segment were largely offset by a decrease in ultimate loss ratios across various product lines. Following the completion of two retroactive reinsurance transactions in 2015, we have less variability in our consolidated loss reserves. Additionally, management continues to gain confidence in the actuarial projections on product lines previously written by Alterra Capital Holdings Limited, which we acquired in 2013. As a result, management's best estimate of the ultimate loss ratios on various product lines across all three of our ongoing underwriting segments has decreased compared to the same period of 2015. We continue to maintain a consolidated confidence level in a range consistent with our historic levels.

Table of Contents

The increase in the consolidated combined ratio for the nine months ended September 30, 2016 was driven by less favorable development on prior years' loss reserves, partially offset by a lower current accident year loss ratio in 2016 compared to 2015.

The decrease in prior year redundancies for the nine months ended September 30, 2016 was attributable to our U.S. Insurance and International Insurance segments. In 2016, redundancies on prior years' loss reserves in our U.S. Insurance segment included \$71.4 million, or two points on the consolidated combined ratio, of adverse development on our medical malpractice and specified medical product lines. Redundancies on prior years' loss reserves in 2015 included \$36.0 million, or one point on the consolidated combined ratio, of favorable development attributable to a decrease in the estimated volatility of our consolidated net reserves for unpaid losses and loss adjustment expenses, as a result of ceding a significant portion of our A&E exposures to a third party. As a result of this decrease in estimated volatility, our level of confidence in our net reserves for unpaid losses and loss adjustment expenses increased. Therefore, management reduced prior years' loss reserves in order to maintain a consolidated confidence level in a range consistent with our historic levels. This reduction in prior years' loss reserves during 2015 occurred in our U.S. Insurance and International Insurance segments.

The consolidated current accident year loss ratio included \$26.1 million, or one point on the consolidated combined ratio, of underwriting loss related to the Canadian wildfires that occurred in the second quarter of 2016. The impact of these losses on the 2016 consolidated current accident year loss ratio was more than offset by lower loss ratios across several other product lines resulting from a decrease in management's best estimate of ultimate loss ratios in 2016, as described above.

U.S. Insurance Segment

The combined ratio for the U.S. Insurance segment was 101% and 95%, respectively, for the quarter and nine months ended September 30, 2016 compared to 90% and 89%, respectively, for the same periods of 2015.

For the quarter ended September 30, 2016, the increase in the combined ratio was driven by less favorable development of prior accident years' loss reserves.

The current accident year loss ratio for the three months ended September 30, 2016 increased slightly compared to 2015. During 2016, we experienced higher attritional losses on our professional liability product lines, most notably our medical malpractice and specified medical product lines, as previously discussed, and on our property product lines compared to 2015. We also experienced more large loss events in 2016 than 2015. These increases were offset by lower attritional losses on our general liability product lines and a favorable impact resulting from a decrease in management's best estimate of ultimate loss ratios on various product lines, as previously discussed.

The U.S. Insurance segment's combined ratio for the quarter ended September 30, 2016 included \$21.5 million of favorable development on prior years' loss reserves compared to \$75.0 million for the same period in 2015. The decrease in redundancies on prior years' loss reserves was driven by adverse development on our medical malpractice and specified medical product lines in 2016 and less favorable development on our property product lines in 2016 compared to 2015. For the quarter ended September 30, 2016, the combined adverse development on our medical malpractice and specified medical product lines totaled \$36.5 million, or seven points on the segment combined ratio, primarily on the 2013 to 2015 accident years. Adverse development on these product lines in 2016 was more than offset by favorable development on prior years' loss reserves across several other product lines, most notably our general liability lines across several accident years. During the third quarter of 2015, favorable development on prior years' loss reserves was most significant on our general liability and property product lines.

For the nine months ended September 30, 2016, the increase in the combined ratio was driven by less favorable development of prior accident years' loss reserves.

•

The current accident year loss ratio for the nine months ended September 30, 2016 was flat compared to 2015. Higher attritional losses, primarily on our medical malpractice and specified medical product lines were largely offset by lower attritional losses, primarily on our general liability product lines, and the favorable impact resulting from a decrease in management's best estimate of ultimate loss ratios on various product lines, as previously discussed.

Table of Contents

The U.S. Insurance segment's combined ratio for the nine months ended September 30, 2016 included \$126.5 million of favorable development on prior years' loss reserves compared to \$211.2 million for the same period in 2015. The decrease in loss reserve redundancies was driven by adverse development on certain of our professional liability product lines in 2016 and less favorable development on our property product lines in 2016 compared to 2015. Additionally, redundancies on prior years' loss reserves in 2015 included \$19.0 million, or one point on the segment combined ratio, attributable to the decrease in the volatility of our consolidated net reserves for unpaid losses and loss adjustment expenses during the first quarter of 2015, as previously discussed. The favorable development on prior years' loss reserves in 2016 was most significant on our general liability product lines across several accident years, on our workers' compensation product line on the 2012 through 2015 accident years, and on our property product lines on the 2013 and 2014 accident years. Favorable development on prior years' loss reserves in 2016 was partially offset by adverse development on our medical malpractice and specified medical product lines, primarily on the 2010 through 2015 accident years, as previously discussed. For the nine months ended September 30, 2016, the combined adverse development on these product lines totaled \$71.4 million, or four points on the segment combined ratio. During 2015, favorable development on prior years' loss reserves was most significant on our general liability, property and workers' compensation product lines.

International Insurance Segment

The combined ratio for the International Insurance segment was 91% and 95%, respectively, for the quarter and nine months ended September 30, 2016 compared to 87% for both the quarter and nine months ended September 30, 2015.

For the quarter ended September 30, 2016, the increase in the combined ratio was driven by less favorable development of prior accident years' loss reserves and a higher current accident year loss ratio, partially offset by a lower expense ratio compared to the same period of 2015.

The increase in the current accident year loss ratio for the three months ended September 30, 2016 was driven by higher attritional losses and large losses in 2016 compared to 2015, primarily on our marine and energy product lines, partially offset by a decrease in management's best estimate of ultimate loss ratios on various product lines, as previously discussed.

The International Insurance segment's combined ratio for the quarter ended September 30, 2016 included \$42.7 million of favorable development on prior years' loss reserves compared to \$57.9 million in 2015. In 2016, the favorable development on prior years' loss reserves was most significant on our professional liability product lines across several accident years. The favorable development in 2015 was most significant on our professional liability, general liability and marine and energy product lines. The decrease in favorable development on prior years' loss reserves in the third quarter of 2016 compared to the third quarter of 2015 was driven by less favorable development across various product lines.

The decrease in the expense ratio was primarily due to lower profit sharing in 2016 compared to 2015 and a favorable impact from a reallocation of expenses between the International Insurance segment and Reinsurance segment in the third quarter of 2016. These movements were partially offset by the impact of higher broker commissions in 2016.

For the nine months ended September 30, 2016, the increase in the combined ratio was driven by less favorable development on prior years' loss reserves and a higher expense ratio, partially offset by a lower current accident year loss ratio compared to the same period of 2015.

The decrease in the current accident year loss ratio for the nine months ended September 30, 2016 was driven by a decrease in management's best estimate of ultimate loss ratios on various product lines, as previously discussed. We also experienced lower attritional losses across various product lines in 2016, which were largely offset by higher attritional and large losses on our marine and energy product lines. The current accident year loss ratio for the nine months ended September 30, 2016 also included \$4.9 million, or one point on the segment combined ratio, of underwriting loss related to the Canadian wildfires that occurred in the second quarter.

Table of Contents

The International Insurance segment's combined ratio for the nine months ended September 30, 2016 included \$111.4 million of favorable development on prior years' loss reserves compared to \$177.9 million in 2015. The decrease in loss reserve redundancies in 2016 compared to 2015 was driven by less favorable development on our marine and energy product lines in 2016. Additionally, redundancies on prior years' loss reserves in 2015 included \$17.0 million, or three points on the segment combined ratio, attributable to the decrease in the volatility of our consolidated net reserves for unpaid losses and loss adjustment expenses during the first quarter of 2015, as previously discussed. For the nine months ended September 30, 2016, the favorable development on prior years' loss reserves was most significant on our professional liability product lines across several accident years and our marine and energy product lines, primarily on the 2012 through 2015 accident years. For the nine months ended September 30, 2015, the favorable development on prior years' loss reserves occurred across several product lines, but was most significant on our marine and energy, professional liability and general liability product lines.

The increase in the expense ratio was attributable to higher broker commissions in 2016 and the write off of previously capitalized software development costs in the second quarter of 2016. These increases were partially offset by lower profit sharing costs in 2016 compared to 2015.

Reinsurance Segment

The combined ratio for the Reinsurance segment was 94% and 87%, respectively, for the quarter and nine months ended September 30, 2016 compared to 86% and 92%, respectively, for the same periods of 2015.

For the quarter ended September 30, 2016 the increase in the combined ratio was driven by a higher expense ratio and less favorable development on prior years' loss reserves compared to the same period of 2015.

The Reinsurance segment's combined ratio for the quarter ended September 30, 2016 included \$19.1 million of favorable development on prior years' loss reserves compared to \$24.2 million in 2015. The decrease in loss reserve redundancies was driven by adverse development on our professional liability lines in 2016 compared to favorable development in 2015, partially offset by more favorable development on our general liability product lines. The favorable development on prior years' loss reserves in 2016 was across several product lines but was most significant on our property product lines, primarily on the 2012 through 2015 accident years, and on our general liability product lines across several accident years. Adverse development on our professional liability lines in 2016 was driven by unfavorable claims experience across multiple accident years. The favorable development on prior years' loss reserves in 2015 was most significant on our property lines of business.

The increase in the expense ratio was primarily due to an unfavorable impact from a reallocation of expenses between the Reinsurance segment and International Insurance segment in the third quarter of 2016, as well as higher profit sharing expenses in 2016 compared to 2015.

For the nine months ended September 30, 2016 the decrease in the combined ratio was driven by more favorable development on prior years' loss reserves and a lower current accident year loss ratio, partially offset by a higher expense ratio compared to the same period of 2015.

The current accident year loss ratio for the nine months ended September 30, 2016 included \$21.2 million, or three points on the segment combined ratio, of underwriting loss related to the Canadian wildfires that occurred in the second quarter. The impact of these losses on the 2016 current accident year loss ratio was more than offset by lower attritional losses and a decrease in management's best estimate of ultimate loss ratios on various product lines, as previously discussed.

The Reinsurance segment's combined ratio for the nine months ended September 30, 2016 included \$90.1 million of favorable development on prior years' loss reserves compared to \$65.7 million in 2015. The increase in loss reserve redundancies in 2016 compared to 2015 was driven by more favorable development on our workers' compensation and property product lines. The favorable development on prior years' loss reserves in 2016 was across several product lines but was most significant on our property product lines, primarily on the 2012 through 2015 accident

years, and on our workers' compensation product lines across several accident years. The favorable development on prior years' loss reserves in 2015 was most significant on our general liability and property lines of business.

• The increase in the expense ratio was primarily due to higher profit sharing expenses in 2016 compared to 2015.

Other Insurance (Discontinued Lines)

The Other Insurance (Discontinued Lines) segment produced an underwriting loss of \$2.7 million and an underwriting profit of \$10.8 million for the quarter and nine months ended September 30, 2016, respectively, compared to an underwriting profit of \$5.0 million and \$3.6 million, respectively, for the same periods of 2015. The underwriting profit in the first nine months of 2016 was driven by a commutation that was completed during the period.

Table of Contents

We complete an annual review of A&E exposures during the third quarter of the year unless circumstances suggest an earlier review is appropriate. During our 2015 and 2016 reviews, we determined that no adjustment to loss reserves was required.

A&E loss reserves are subject to significant uncertainty due to potential loss severity and frequency resulting from an uncertain and unfavorable legal climate. Our A&E reserves are not discounted to present value and are forecasted to pay out over the next 40 to 50 years. We seek to establish appropriate reserve levels for A&E exposures; however, these reserves could be subject to increases in the future. As of September 30, 2016, our reinsurance recoverable on unpaid losses for A&E exposures was 63% of our gross reserves for A&E exposures.

Premiums and Net Retentions

The following tables summarize gross premium volume, net written premiums and earned premiums by segment.

Gross Premium Volume

	Quarter Ended September 30,		Nine Months Ended September 30,	
(dollars in thousands)	2016	2015	2016	2015
U.S. Insurance	\$663,196	\$635,926	\$2,000,454	\$1,890,144
International Insurance	269,093	284,576	879,078	911,962
Reinsurance	196,948	239,094	920,038	875,676
Other Insurance (Discontinued Lines)	536	(1,232)	515	(1,159)
Total	\$1,129,773	\$1,158,364	\$3,800,085	\$3,676,623

Gross premium volume decreased 2% for the quarter ended September 30, 2016 and increased 3% for the nine months ended September 30, 2016, compared to the same periods of 2015. The decrease in gross premium volume for the quarter ended September 30, 2016 was attributable to the Reinsurance and International Insurance segments, partially offset by higher gross premium volume in our U.S. Insurance segment. The increase in gross premium volume for the nine months ended September 30, 2016 was attributable to the U.S. Insurance and Reinsurance segments, partially offset by lower gross premium volume in our International Insurance segment.

Gross premium volume in our U.S. Insurance segment increased 4% and 6% for the quarter and nine months ended September 30, 2016, respectively. The increase in gross premium volume for the three months ended September 30, 2016 was driven by growth within our personal and general liability lines of business. The increase for the nine months ended September 30, 2016 was driven by an additional week of gross premium volume during the first quarter of 2016 compared to the same period of 2015 based on differences in the timing of our underwriting systems closings. The timing of our underwriting systems closings has a negligible impact on our premium earnings. The increase in gross premium volume in the U.S. Insurance segment for the nine months ended September 30, 2016 was also attributable to higher premium volumes, primarily within our general liability and personal lines of business.

Gross premium volume in our International Insurance segment decreased 5% and 4% for the quarter and nine months ended September 30, 2016, respectively. The decrease in gross premium volume for both periods was primarily due to an unfavorable impact from foreign currency exchange rate movements, as well as lower premium volume within our marine and energy and credit and surety product lines.

Gross premium volume in our Reinsurance segment decreased 18% for the quarter ended September 30, 2016 and increased 5% for the nine months ended September 30, 2016. For the quarter ended September 30, 2016, the decrease was driven by lower gross premium volume in our credit and surety product line as a result of a contract that was

re-written and extended during the third quarter of 2015. Also contributing to the decrease in gross premium volume for the quarter ended September 30, 2016, were lower gross premium volume from our general liability, workers' compensation and auto product lines. These decreases were partially offset by an increase in gross premium volume from our property product line as a result of new business, as well as a favorable impact from the timing of renewals on multi-year contracts, which were higher in the third quarter of 2016 compared to 2015. For the nine months ended September 30, 2016, the increase in gross premium volume was driven by our general liability and property lines, due to new business and a favorable impact from the timing of renewals on multi-year contracts in 2016 compared to 2015. These increases were partially offset by lower gross premium volume within our auto, professional liability and credit and surety product lines.

Table of Contents

We have seen small price decreases across many of our product lines during 2016, especially in our international business across most of our property product lines, as well as on our marine and energy lines. Our large account business is also subject to more pricing pressure. Competition remains strong in the reinsurance market, however the rate of price decline has slowed and in a few cases stabilized. When we believe the prevailing market price will not support our underwriting profit targets, the business is not written. As a result of our underwriting discipline, gross premium volume may vary when we alter our product offerings to maintain or improve underwriting profitability.

Net Written Premiums

	Quarter Ended September 30,		Nine Months Ended September 30,	
(dollars in thousands)	2016	2015	2016	2015
U.S. Insurance	\$562,215	\$536,285	\$1,694,193	\$1,587,092
International Insurance	209,656	213,423	680,691	700,260
Reinsurance	157,043	204,336	786,450	736,068
Other Insurance (Discontinued Lines)	469	(860)	555	(462)
Total	\$929,383	\$953,184	\$3,161,889	\$3,022,958

Net retention of gross premium volume for the quarter and nine months ended September 30, 2016 was 82% and 83%, respectively, compared to 82% for both the quarter and nine months ended September 30, 2015. The increase in net retention for the nine months ended September 30, 2016 compared to the same period of 2015 was driven by higher retention within the U.S. Insurance and Reinsurance segments. These increases are largely due to changes in mix of business.

Earned Premiums

	Quarter Ended September 30,		Nine Months Ended September 30,	
(dollars in thousands)	2016	2015	2016	2015
U.S. Insurance	\$548,792	\$534,615	\$1,614,588	\$1,569,615
International Insurance	218,968	225,034	637,365	654,936
Reinsurance	206,018	204,825	630,151	640,719
Other Insurance (Discontinued Lines)	466	(799)	685	(388)
Total	\$974,244	\$963,675	\$2,882,789	\$2,864,882

Earned premiums for both the quarter and nine months ended September 30, 2016 increased 1%, compared to the same periods of 2015. For the quarter ended September 30, 2016, higher earned premiums in our U.S. Insurance segment were partially offset by lower earned premiums in our International Insurance segment. For the nine months ended September 30, 2016, higher earned premiums in our U.S. Insurance segment more than offset lower earned premiums in our International Insurance and Reinsurance segments. The increase in earned premiums in our U.S. Insurance segment for both periods of 2016 was primarily due to the increases in gross premium volume as described above. The decrease in earned premiums in our International Insurance segment for both the quarter and nine months ended September 30, 2016 was primarily due to an unfavorable impact from movements in foreign currency exchange rates. The decrease in earned premiums in our Reinsurance segment for the nine months ended September 30, 2016 was primarily due to lower earned premiums in our auto business, partially offset by the increase in gross premium volume in our property product line as described above. In late 2014, we ceased writing auto reinsurance in the United Kingdom. At the same time, a decision was made to decrease our quota share percentages on our non-standard auto reinsurance business in the United States.

Table of Contents

Investing Results

The following table summarizes our investment performance.

(dollars in thousands)	Quarter Ended September 30,		Nine Months Ended September 30,	
	2016	2015	2016	2015
Net investment income	\$93,147	\$87,060	\$279,437	\$270,521
Net realized investment gains (losses)	\$27,416	\$(14,707)	\$65,836	\$(3,031)
Change in net unrealized gains on investments	\$26,381	\$(210,186)	\$619,072	\$(396,855)
Investment yield ⁽¹⁾	0.6	% 0.6	% 1.8	% 1.8
Taxable equivalent total investment return, before foreign currency effect			5.8	% (0.3)%
Taxable equivalent total investment return			5.8	% (1.2)%

(1) Investment yield reflects net investment income as a percentage of monthly average invested assets at amortized cost.

The increase in net investment income for the quarter ended September 30, 2016 was driven by higher bond income on our fixed maturity portfolio due to increased holdings of fixed maturity securities. See note 4(d) of the notes to consolidated financial statements for details regarding the components of net investment income. There were no write downs for other-than-temporary declines in the estimated fair value of investments for the quarter ended September 30, 2016. Net realized investment gains for the nine months ended September 30, 2016 were net of \$12.1 million of write downs for other-than-temporary declines in the estimated fair value of investments, all of which were attributable to equity securities. Net realized investment losses for the quarter and nine months ended September 30, 2015 included write downs for other-than-temporary declines in the estimated fair value of investments of \$18.3 million and \$23.4 million, respectively, all of which were attributable to equity securities.

We complete a detailed analysis each quarter to assess whether the decline in the fair value of any investment below its cost basis is deemed other-than-temporary. At September 30, 2016, we held securities with gross unrealized losses of \$26.7 million, or less than 1% of invested assets. All securities with unrealized losses were reviewed, and we believe that there were no other securities with indications of declines in estimated fair value that were other-than-temporary at September 30, 2016. However, given the volatility in the debt and equity markets, we caution readers that further declines in fair value could be significant and may result in additional other-than-temporary impairment charges in future periods. Variability in the timing of realized and unrealized gains and losses is to be expected.

We evaluate our investment performance by analyzing taxable equivalent total investment return, which is a non-GAAP financial measure. Taxable equivalent total investment return includes items that impact net income, such as coupon interest on fixed maturities, dividends on equity securities and realized investment gains or losses, as well as changes in unrealized gains or losses, which do not impact net income. Certain items that are included in net investment income have been excluded from the calculation of taxable equivalent total investment return, such as amortization and accretion of premiums and discounts on our fixed maturity portfolio, to provide a comparable basis for measuring our investment return against industry investment returns. The calculation of taxable equivalent total investment return also includes the current tax benefit associated with income on certain investments that is either taxed at a lower rate than the statutory income tax rate or is not fully included in federal taxable income. We believe the taxable equivalent total investment return is a better reflection of the economics of our decision to invest in certain asset classes. We focus on our long-term investment return, understanding that the level of realized and unrealized investment gains or losses may vary from one period to the next.

Table of Contents

The following table reconciles investment yield to taxable equivalent total investment return.

	Nine Months Ended September 30, 2016 2015			
Investment yield ⁽¹⁾	1.8	%	1.8	%
Adjustment of investment yield from book value to market value	(0.3)	%	(0.3)	%
Net amortization of net premium on fixed maturity securities	0.3	%	0.4	%
Net realized investment gains and change in net unrealized gains on investments	3.8	%	(2.2)	%
Taxable equivalent effect for interest and dividends ⁽²⁾	0.3	%	0.3	%
Other ⁽³⁾	(0.1)	%	(1.2)	%
Taxable equivalent total investment return	5.8	%	(1.2)	%

(1) Investment yield reflects net investment income as a percentage of monthly average invested assets at amortized cost.

(2) Adjustment to tax-exempt interest and dividend income to reflect a taxable equivalent basis.

(3) Adjustment to reflect the impact of changes in foreign currency exchange rates and time-weighting the inputs to the calculation of taxable equivalent total investment return.

Other Revenues and Other Expenses

Markel Ventures Operations

Operating revenues and expenses associated with our Markel Ventures operations are included in other revenues and other expenses in the consolidated statements of income and comprehensive income (loss). We consolidate our Markel Ventures operations on a one-month lag. The following table summarizes the operating revenues, net income to shareholders and EBITDA from our Markel Ventures operations.

	Quarter Ended September 30,		Nine Months Ended September 30,	
(dollars in thousands)	2016	2015	2016	2015
Operating revenues	\$321,342	\$299,155	\$905,615	\$784,151
Net income to shareholders	\$13,490	\$6,398	\$49,520	\$14,354
EBITDA	\$41,800	\$29,502	\$133,842	\$76,271

Revenues from our Markel Ventures operations increased \$22.2 million and \$121.5 million for the quarter and nine months ended September 30, 2016, respectively, compared to the same periods of 2015. For the quarter ended September 30, 2016, the increase in revenues was primarily attributable to higher revenues in our non-manufacturing operations, primarily due to our December 2015 acquisition of CapTech, partially offset by lower revenues in our manufacturing operations, due to decreased sales volumes in several of these businesses in 2016 compared to the same period of 2015. For the nine months ended September 30, 2016, the increase in revenues was primarily due to the inclusion of CapTech in our 2016 results and to higher sales volume from one of our transportation related businesses.

Net income to shareholders and EBITDA for the quarters and nine months ended September 30, 2016 and 2015 were impacted by increases in our estimates of contingent consideration obligations. During the third quarter of 2016, operating expenses for our non-manufacturing operations included \$10.3 million of expense as a result of an increase in our estimate of the contingent consideration obligation related to the acquisition of CapTech. A portion of the purchase consideration for CapTech is based on post-acquisition earnings through 2018, as defined in the purchase agreement. During the third quarter of 2016, our estimate of CapTech's earnings increased beyond our initial projection. As of September 30, 2016, the fair value of our outstanding contingent consideration obligation was \$15.6

million, which we expect to pay over the next three years. While this obligation is subject to further changes based on CapTech's actual results through December 31, 2018, we do not believe the impact of such an adjustment would be material to our results of operations or cash flows. During the quarter and nine months ended September 30, 2015, operating expenses for our manufacturing operations included \$9.0 million and \$26.6 million, respectively, of expense as a result of an increase in our estimate of the contingent consideration obligation related to the July 2014 acquisition of Cottrell. This obligation was paid in full during the third quarter of 2016.

Table of Contents

Net income to shareholders and EBITDA from our Markel Ventures operations also increased for the nine months ended September 30, 2016 compared to the same period of 2015 due to higher sales volumes in one of our transportation related businesses, improved results across our non-manufacturing business and the contribution of earnings from CapTech, which were largely offset by the impact of the contingent consideration adjustment previously discussed.

Markel Ventures EBITDA is a non-GAAP financial measure. We use Markel Ventures EBITDA as an operating performance measure in conjunction with U.S. GAAP measures, including revenues and net income, to monitor and evaluate the performance of our Markel Ventures operations. Because EBITDA excludes interest, income taxes, depreciation and amortization, it provides an indicator of economic performance that is useful to both management and investors in evaluating our Markel Ventures businesses as it is not affected by levels of debt, interest rates, effective tax rates or levels of depreciation and amortization resulting from purchase accounting. The following table reconciles EBITDA of Markel Ventures, net of noncontrolling interests, to consolidated net income to shareholders.

	Quarter Ended		Nine Months Ended	
	September 30,		September 30,	
(dollars in thousands)	2016	2015	2016	2015
Markel Ventures EBITDA - Manufacturing	\$35,082	\$26,410	\$105,600	\$62,504
Markel Ventures EBITDA - Non-Manufacturing	6,718	3,092	28,242	13,767
Markel Ventures EBITDA - Total	41,800	29,502	133,842	76,271
Interest expense ⁽¹⁾	(4,005)	(3,404)	(11,610)	(10,272)
Income tax expense	(9,368)	(4,308)	(28,431)	(9,339)
Depreciation expense	(8,247)	(8,715)	(24,075)	(22,957)
Amortization of intangible assets	(6,690)	(6,677)	(20,206)	(19,349)
Markel Ventures net income to shareholders	13,490	6,398	49,520	14,354
Income before income taxes from other Markel operations	96,708	140,015	365,806	462,797
Income tax expense from other Markel operations	(26,402)	(43,894)	(92,363)	(92,271)
Net income to shareholders	\$83,796	\$102,519	\$322,963	\$384,880

Interest expense for the quarters ended September 30, 2016 and 2015 includes intercompany interest expense of ⁽¹⁾ \$2.7 million and \$2.1 million, respectively. Interest expense for the nine months ended September 30, 2016 and 2015 includes intercompany interest expense of \$7.4 million and \$7.2 million, respectively.

Interest Expense, Loss on Early Extinguishment of Debt and Income Taxes

Interest Expense

Interest expense was \$33.2 million and \$97.7 million for the three and nine months ended September 30, 2016, respectively, compared to \$30.1 million and \$88.7 million for the same periods of 2015. The increase in interest expense for both periods of 2016 was due to interest expense associated with our 5.0% unsecured senior notes which were issued in the second quarter of 2016, partially offset by the partial purchase of our 7.125% unsecured senior notes and our 7.35% unsecured senior notes in the second quarter of 2016.

Loss on Early Extinguishment of Debt

In the second quarter of 2016, we issued \$500 million of 5.0% unsecured senior notes due April 5, 2046. Net proceeds were \$493.1 million. We used a portion of these proceeds to purchase \$70.2 million of principal on our 7.35% Senior Notes due 2034 and \$108.8 million of principal on our 7.125% Senior Notes due 2019 through a tender offer at a total purchase price of \$95.0 million and \$126.4 million, respectively. We also expect to use the proceeds from this

issuance to retire our 7.20% unsecured senior notes, when they come due April 14, 2017 (\$90.6 million aggregate principal amount of those notes was outstanding at September 30, 2016), and the remainder for general corporate purposes.

In connection with the tender offer and purchase, we recognized a loss on early extinguishment of debt of \$44.1 million during the second quarter of 2016. Replacing this debt with our 5.0% unsecured senior notes due April 5, 2046 extended the average term of our senior notes at a more favorable interest rate.

Table of Contents

Income Taxes

The effective tax rate was 27% and 21% for the nine months ended September 30, 2016 and 2015, respectively. For the nine months ended September 30, 2016, the effective tax rate differs from the U.S. statutory tax rate of 35% primarily as a result of tax-exempt investment income. For the nine months ended September 30, 2015, the effective tax rate differs from the U.S. statutory rate of 35% primarily as a result of foreign tax credits for foreign taxes paid and tax-exempt investment income. Our recognition of foreign tax credits in 2015 had a favorable impact on our 2015 effective tax rate for the nine months ended September 30, 2015 of 8%. The increase in the effective tax rate in 2016 compared to 2015 was primarily due to the 2015 impact of foreign tax credits described above and a decrease in estimated annual earnings attributable to foreign operations that are taxed at a lower rate in 2016 compared to 2015. Foreign tax credits of the magnitude recognized in 2015 are not expected in future periods.

Our effective tax rate, which is based upon the estimated annual effective tax rate, may fluctuate from period to period based on the relative mix of income or loss reported by jurisdiction and the varying tax rates in each jurisdiction.

Comprehensive Income (Loss) to Shareholders

Comprehensive income to shareholders was \$89.2 million for the third quarter of 2016 compared to a comprehensive loss to shareholders of \$51.1 million for the same period of 2015. Comprehensive income to shareholders for the third quarter of 2016 included net income to shareholders of \$83.8 million, an increase in net unrealized gains on investments, net of taxes, of \$13.3 million and unfavorable foreign currency translation adjustments, net of taxes, of \$8.3 million. Comprehensive loss to shareholders for the third quarter of 2015 included net income to shareholders of \$102.5 million, a decrease in net unrealized gains on investments, net of taxes, of \$143.3 million and unfavorable foreign currency translation adjustments, net of taxes, of \$10.9 million.

Comprehensive income to shareholders was \$696.1 million for the nine months ended September 30, 2016 compared to \$97.7 million for the same period of 2015. Comprehensive income to shareholders for the nine months ended September 30, 2016 included net income to shareholders of \$323.0 million, an increase in net unrealized gains on investments, net of taxes, of \$378.0 million and unfavorable foreign currency translation adjustments, net of taxes, of \$6.1 million. Comprehensive income to shareholders for the nine months ended September 30, 2015 included net income to shareholders of \$384.9 million, a decrease in net unrealized gains on investments, net of taxes, of \$266.3 million and unfavorable foreign currency translation adjustments, net of taxes, of \$22.3 million.

The increase in net unrealized gains on investments, net of taxes, for the quarter ended September 30, 2016 was attributable to an increase in the fair value of our equity portfolio, partially offset by a decrease in the fair value of our fixed maturity portfolio compared to June 30, 2016. The increase in net unrealized gains on investments, net of taxes, for the nine months ended September 30, 2016 was attributable to an increase in the fair value of both our fixed maturity and equity portfolios compared to December 31, 2015. The increase in net unrealized gains on investments for both the quarter and nine months ended September 30, 2016 were net of an adjustment of \$9.6 million and \$57.5 million, respectively, to reclassify unrealized gains on the investments supporting future policy benefits to life and annuity benefit reserves. See note 10 of the notes to consolidated financial statements for further discussion of this adjustment.

The decrease in net unrealized gains on investments, net of taxes, for both the quarter and nine months ended September 30, 2015 was attributable to a decrease in the fair value of our equity portfolio as of September 30, 2015 compared to June 30, 2015 and December 31, 2014, respectively. The nine months ended September 30, 2015 also reflected the impact of a decline in the fair value of our fixed maturity portfolio.

Financial Condition

Investments, cash and cash equivalents and restricted cash and cash equivalents (invested assets) were \$19.4 billion at September 30, 2016 compared to \$18.2 billion at December 31, 2015. Net unrealized gains on investments, net of taxes, were \$1.9 billion at September 30, 2016 compared to \$1.5 billion at December 31, 2015. Equity securities were \$4.5 billion, or 23% of invested assets, at September 30, 2016 compared to \$4.1 billion, or 22% of invested assets, at December 31, 2015.

Table of Contents

Net cash provided by operating activities was \$324.4 million for the nine months ended September 30, 2016 compared \$550.4 million for the same period of 2015. Net cash provided by operating activities for the nine months ended September 30, 2016 included higher claims payments in the U.S. Insurance segment, in particular on our professional liability lines of business, and higher payments for employee profit sharing compared to the same period of 2015. Net cash provided by operating activities for the nine months ended September 30, 2016 was net of a \$51.9 million payment made in connection with a commutation that was completed during the period. Cash flows for the nine months ended September 30, 2016 also included payments totaling \$47.0 million to settle contingent purchase consideration obligations, of which \$32.9 million was included in operating activities.

Net cash used by investing activities was \$994.6 million for the nine months ended September 30, 2016 compared to \$168.2 million for the same period of 2015. During 2016, we increased our purchases of fixed maturities and also allocated funds for purchases of equity securities. Cash flows from investing activities are affected by various factors such as anticipated payment of claims, financing activity, acquisition opportunities and individual buy and sell decisions made in the normal course of our investment portfolio management.

Net cash provided by financing activities was \$203.0 million for the nine months ended September 30, 2016 compared to net cash used by financing activities of \$56.7 million for the same period of 2015. During the second quarter of 2016, we issued \$500 million of 5.0% unsecured senior notes due April 5, 2046. Net proceeds were \$493.1 million. We used a portion of these proceeds to purchase \$70.2 million of principal on our 7.35% Senior Notes due 2034 and \$108.8 million of principal on our 7.125% Senior Notes due 2019 through a tender offer at a total purchase price \$95.0 million and \$126.4 million, respectively. Cash of \$15.5 million and \$27.3 million was used to repurchase shares of our common stock during the first nine months of 2016 and 2015, respectively.

We seek to maintain prudent levels of liquidity and financial leverage for the protection of our policyholders, creditors and shareholders. Our target capital structure includes approximately 30% debt. Our debt to capital ratio was 23% at September 30, 2016 and 22% at December 31, 2015. From time to time, our debt to capital ratio may increase due to business opportunities that may be financed in the short term with debt. Alternatively, our debt to capital ratio may fall below our target capital structure, which provides us with additional borrowing capacity to respond when future opportunities arise.

We have access to various capital sources, including dividends from certain of our insurance subsidiaries, holding company invested assets, undrawn capacity under our revolving credit facility and access to the debt and equity capital markets. We believe that we have sufficient liquidity to meet our capital needs.

Our holding company had \$2.0 billion and \$1.6 billion of invested assets at September 30, 2016 and December 31, 2015, respectively. The increase in invested assets was primarily the result of net proceeds from the net issuance of long-term debt during the second quarter of 2016 and repayment of an intercompany note during the third quarter of 2016.

Shareholders' equity was \$8.5 billion at September 30, 2016 and \$7.8 billion at December 31, 2015. Book value per share increased to \$609.48 at September 30, 2016 from \$561.23 at December 31, 2015, primarily due to \$696.1 million of comprehensive income to shareholders for the nine months ended September 30, 2016.

Table of Contents

Disclosure of Certain Activities Relating to Iran

Under the Iran Threat Reduction and Syria Human Rights Act of 2012, non-U.S. entities owned or controlled by U.S. persons have been prohibited from engaging in activities, transactions or dealings with Iran to the same extent as U.S. persons. Effective January 16, 2016, the Office of Foreign Assets Control of the U.S. Department of the Treasury adopted General License H, which authorizes non-U.S. entities that are owned or controlled by a U.S. person to engage in most activities with Iran permitted for other non-U.S. entities so long as they meet certain requirements. Section 13(r) of the Securities Exchange Act of 1934 requires reporting of certain Iran-related activities that are now permitted under General License H, including underwriting, insuring and reinsuring certain activities related to the importation of refined petroleum products by Iran and vessels involved in the transportation of crude oil from Iran. Certain of our non-U.S. insurance operations underwrite global marine hull policies and global marine hull war policies that provide coverage for vessels or fleets navigating into and out of ports worldwide, potentially including Iran. Under a global marine hull war policy, the insured is required to give notice before entering designated areas, including Iran. During the quarter ended September 30, 2016 we have received notice(s) that one or more vessels covered by a global marine hull war policy were entering Iranian waters. However, no additional premium is required under global marine hull policies or global marine hull war policies for calling into Iran. During the quarter ended September 30, 2016, we have not been asked to cover a specific voyage into or out of Iran that would result in a separate, allocable premium for that voyage.

Certain of our non-U.S. reinsurance operations underwrite marine, energy, aviation and trade credit treaties on a worldwide basis and, as a result, it is possible that the underlying insurance portfolios may have exposure to the Iranian petroleum industry and its related products and service providers.

We provide two energy construction reinsurance contracts in Iran through our syndicate at Lloyd's. We expect our portion of the premium for both contracts to be approximately \$2 million in the aggregate. Except for these two contracts, we are not aware of any premium apportionment with respect to underwriting, insurance or reinsurance activities of our non-U.S. insurance subsidiaries reportable under Section 13(r). Should any such risks have entered into the stream of commerce covered by the insurance portfolios underlying our reinsurance treaties, we believe that the premiums associated with such business would be immaterial.

Our non-U.S. insurance subsidiaries intend to continue to provide insurance and reinsurance for coverage of Iran-related risks, if at all, only to the extent permitted under, and in accordance with, General License H or other applicable economic or trade sanctions requirements or licenses.

Table of Contents

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Market Risk Disclosures

Market risk is the risk of economic losses due to adverse changes in the estimated fair value of a financial instrument as the result of changes in equity prices, interest rates, foreign currency exchange rates and commodity prices. Our consolidated balance sheets include assets and liabilities with estimated fair values that are subject to market risk. Our primary market risks have been equity price risk associated with investments in equity securities, interest rate risk associated with investments in fixed maturities and foreign currency exchange rate risk associated with our international operations. Various companies within our Markel Ventures operations are subject to commodity risk; however, this risk is not material to the Company. During the nine months ended September 30, 2016, there were no material changes to the market risk components described in our Annual Report on Form 10-K for the year ended December 31, 2015.

The estimated fair value of our investment portfolio at September 30, 2016 was \$19.4 billion, 77% of which was invested in fixed maturities, short-term investments, cash and cash equivalents and restricted cash and cash equivalents and 23% of which was invested in equity securities. At December 31, 2015, the estimated fair value of our investment portfolio was \$18.2 billion, 78% of which was invested in fixed maturities, short-term investments, cash and cash equivalents and restricted cash and cash equivalents and 22% of which was invested in equity securities.

Credit risk is the potential loss resulting from adverse changes in an issuer's ability to repay its debt obligations. We monitor our investment portfolio to ensure that credit risk does not exceed prudent levels. We have consistently invested in high credit quality, investment grade securities. Our fixed maturity portfolio has an average rating of "AA," with approximately 97% rated "A" or better by at least one nationally recognized rating organization. Our policy is to invest in investment grade securities and to minimize investments in fixed maturities that are unrated or rated below investment grade. At September 30, 2016, approximately 1% of our fixed maturity portfolio was unrated or rated below investment grade. Our fixed maturity portfolio includes securities issued with financial guaranty insurance. We purchase fixed maturities based on our assessment of the credit quality of the underlying assets without regard to insurance.

Our fixed maturity portfolio includes securities issued by foreign governments and non-sovereign foreign institutions. General concern exists about the financial difficulties facing certain foreign countries in light of the adverse economic conditions experienced over the past several years. We monitor developments in foreign countries, currencies and issuers that could pose risks to our fixed maturity portfolio, including ratings downgrades, political and financial changes and the widening of credit spreads. We believe that our fixed maturity portfolio is highly diversified and is comprised of high quality securities. During the nine months ended September 30, 2016, there were no material changes in our foreign government fixed maturity holdings.

General concern also exists about municipalities that experience financial difficulties during periods of adverse economic conditions. We manage the exposure to credit risk in our municipal bond portfolio by investing in high quality securities and by diversifying our holdings, which are typically either general obligation or revenue bonds related to essential products and services.

Our fixed maturities, equity securities and short-term investments are recorded at fair value, which is measured based upon quoted prices in active markets, if available. We determine fair value for these investments after considering various sources of information, including information provided by a third-party pricing service. The pricing service provides prices for substantially all of our fixed maturities and equity securities. In determining fair value, we generally do not adjust the prices obtained from the pricing service. We obtain an understanding of the pricing service's valuation methodologies and related inputs, which include, but are not limited to, reported trades, benchmark

yields, issuer spreads, bids, offers, duration, credit ratings, estimated cash flows and prepayment speeds. We validate prices provided by the pricing service by reviewing prices from other pricing sources and analyzing pricing data in certain instances.

Table of Contents

Item 4. Controls and Procedures

As of the end of the period covered by this quarterly report, we carried out an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures pursuant to Securities Exchange Act Rule 13a-15 (Disclosure Controls). This evaluation was conducted under the supervision and with the participation of our management, including the Principal Executive Officer (PEO) and the Principal Financial Officer (PFO).

Our management, including the PEO and PFO, does not expect that our Disclosure Controls will prevent all error and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, have been detected. These inherent limitations include the realities that judgments in decision making can be faulty, and that breakdowns can occur because of simple error or mistake. The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions.

Based upon our controls evaluation, the PEO and PFO concluded that effective Disclosure Controls were in place to ensure that the information required to be disclosed in reports we file or submit under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.

There were no changes in our internal control over financial reporting during the third quarter of 2016 that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Safe Harbor and Cautionary Statement

This report contains statements concerning or incorporating our expectations, assumptions, plans, objectives, future financial or operating performance and other statements that are not historical facts. These statements are "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such statements may use words such as "anticipate," "believe," "estimate," "expect," "intend," "predict," "project" and similar expressions as they relate to us or our management.

There are risks and uncertainties that may cause actual results to differ materially from predicted results in forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Additional factors that could cause actual results to differ from those predicted are set forth under "Risk Factors" and "Safe Harbor and Cautionary Statement" in our 2015 Annual Report on Form 10-K, Item 1A in Part II of this report or are included in the items listed below:

- our anticipated premium volume is based on current knowledge and assumes no significant man-made or natural catastrophes, no significant changes in products or personnel and no adverse changes in market conditions;
- the effect of cyclical trends, including demand and pricing in the insurance and reinsurance markets;
- actions by competitors, including consolidation, and the effect of competition on market trends and pricing;
- we offer insurance and reinsurance coverage against terrorist acts in connection with some of our programs, and in other instances we are legally required to offer terrorism insurance; in both circumstances, we actively manage our exposure, but if there is a covered terrorist attack, we could sustain material losses;
- the frequency and severity of man-made and natural catastrophes (including earthquakes and weather-related catastrophes) may exceed expectations, are unpredictable and, in the case of weather-related catastrophes, may be exacerbated if, as many forecast, conditions in the oceans and atmosphere result in increased hurricane, flood, drought or other adverse weather-related activity;
- emerging claim and coverage issues, changing legal and social trends, and inherent uncertainties in the loss estimation process can adversely impact the adequacy of our loss reserves and our allowance for reinsurance recoverables;
- reinsurance reserves are subject to greater uncertainty than insurance reserves, primarily because of reliance upon the original underwriting decisions made by ceding companies and the longer lapse of time from the occurrence of loss events to their reporting to the reinsurer for ultimate resolution;
- changes in the assumptions and estimates used in establishing reserves for our life and annuity reinsurance book (which is in runoff), for example, changes in assumptions and estimates of mortality, longevity, morbidity and interest rates, could result in material increases in our estimated loss reserves for such business;
- adverse developments in insurance coverage litigation or other legal or administrative proceedings could result in material increases in our estimates of loss reserves;
- the failure or inadequacy of any loss limitation methods we employ;
- changes in the availability, costs and quality of reinsurance coverage, which may impact our ability to write or continue to write certain lines of business;
- industry and economic conditions, deterioration in reinsurer credit quality and coverage disputes can affect the ability or willingness of reinsurers to pay balances due;
- after the commutation of ceded reinsurance contracts, any subsequent adverse development in the re-assumed loss reserves will result in a charge to earnings;
- regulatory actions can impede our ability to charge adequate rates and efficiently allocate capital;
- general economic and market conditions and industry specific conditions, including extended economic recessions or expansions; prolonged periods of slow economic growth; inflation or deflation; fluctuations in foreign currency exchange rates, commodity and energy prices and interest rates; volatility in the credit and capital markets; and other factors;
- economic conditions, actual or potential defaults in municipal bonds or sovereign debt obligations, volatility in interest and foreign currency exchange rates and changes in market value of concentrated investments can have a significant impact on the fair value of our fixed maturities and equity securities, as well as the carrying value of our

other assets and liabilities, and this impact may be heightened by market volatility;

• economic conditions may adversely affect our access to capital and credit markets;

• the effects of government intervention, including material changes in the monetary policies of central banks, to address financial downturns and economic and currency concerns;

• the impacts that political and civil unrest and regional conflicts may have on our businesses and the markets they serve or that any disruptions in regional or worldwide economic conditions generally arising from these situations may have on our businesses, industries or investments;

• the impacts that health epidemics and pandemics may have on our business operations and claims activity;

• the impact of the implementation of U.S. health care reform legislation and regulations under that legislation on our businesses;

• we are dependent upon the successful functioning and security of our computer systems; if our information technology systems fail or suffer a security breach, our businesses or reputation could be adversely impacted;

• our acquisition of insurance and non-insurance businesses may increase our operational and control risks for a period of time;

• we may not realize the contemplated benefits, including cost savings and synergies, of our acquisitions;

• any determination requiring the write-off of a significant portion of our goodwill and intangible assets;

• the loss of services of any executive officer or other key personnel could adversely impact one or more of our operations;

• our expanding international operations expose us to increased investment, political and economic risks, including foreign currency exchange rate and credit risk;

• the vote by the United Kingdom to leave the European Union, which could have adverse consequences for our businesses, particularly our London-based international insurance operations;

• our ability to raise third party capital for existing or new investment vehicles and risks related to our management of third party capital;

• the effectiveness of our procedures for compliance with existing and ever increasing guidelines, policies and legal and regulatory standards, rules, laws and regulations;

• the impact of economic and trade sanctions and embargo programs on our businesses, including instances in which the requirements and limitations applicable to the global operations of U.S. companies and their affiliates are more restrictive than those applicable to non-U.S. companies and their affiliates;

• a number of additional factors may adversely affect our Markel Ventures operations, and the markets they serve, and negatively impact their revenues and profitability, including, among others: changes in government support for education, healthcare and infrastructure projects; changes in capital spending levels; changes in the housing market; and volatility in interest and foreign currency exchange rates; and

• adverse changes in our assigned financial strength or debt ratings could adversely impact our ability to attract and retain business or obtain capital.

Our premium volume, underwriting and investment results and results from our non-insurance operations have been and will continue to be potentially materially affected by these factors. By making forward-looking statements, we do not intend to become obligated to publicly update or revise any such statements whether as a result of new information, future events or other changes. Readers are cautioned not to place undue reliance on any forward-looking statements, which speak only as at their dates.

Table of Contents

PART II. OTHER INFORMATION

Item 1A. Risk Factors

Other than the risk factor discussed below, there have been no material changes with regard to the risk factors previously disclosed in our 2015 Annual Report on Form 10-K. For other factors that may cause actual results to differ materially from those indicated in any forward-looking statement contained in this report, see "Safe Harbor and Cautionary Statement."

The United Kingdom's vote to leave, and the eventual exit of the United Kingdom from, the European Union could adversely affect us. On June 23, 2016, the United Kingdom (U.K.) voted to exit the European Union (E.U.) (Brexit). The U.K. has not yet given official notice of its intention to leave the E.U. Once that notice is given, a minimum two-year period would commence during which the U.K. and the E.U. would negotiate the future terms of the U.K.'s relationship with the E.U., including the terms of trade between the U.K. and the E.U. After Brexit terms are agreed, Brexit could be implemented in stages over a multi-year period. The effects of Brexit will depend on any agreements the U.K. makes to retain access to E.U. markets either during a transitional period or more permanently. Brexit could impair the ability of both Markel International Insurance Company Limited (MIICL) and our Lloyd's syndicate to transact business in E.U. countries and the basis on which MIICL's branches can operate in the E.U. could be limited or cease. We may decide to relocate certain of our European operations to a member country of the E.U. in order to continue transacting business in the E.U. The Brexit vote has had immediate adverse effects on global financial markets, including foreign currency markets, and could continue to contribute to instability in global financial markets and in European and worldwide economic or market conditions, both during and after the Brexit process. In addition, Brexit could lead to legal uncertainty and potentially divergent national laws and regulations as the U.K. determines which E.U. laws to replace or replicate. Any of these effects of Brexit, and others we cannot anticipate, could adversely affect our business, business opportunities, results of operations, financial condition and cash flows.
