IBM REPORTS 2004 FOURTH-QUARTER AND FULL-YEAR RESULTS

ARMONK, N.Y., January 18, 2005 . . . IBM today announced fourth-quarter 2004 diluted earnings per common share of \$1.81 from continuing operations as reported, compared with diluted earnings of \$1.56 per share in the same period of 2003, an increase of 16 percent. Fourth-quarter income from continuing operations was \$3.1 billion compared with \$2.7 billion a year ago, an increase of 12 percent. Revenues from continuing operations for the fourth quarter were \$27.7 billion, up 7 percent compared with the fourth quarter of 2003 revenues of \$25.9 billion (and up 18 percent sequentially from \$23.4 billion in the third quarter of this year).

Samuel J. Palmisano, IBM chairman and chief executive officer, said: "IBM delivered a powerful fourth quarter, reflecting the strength of our integrated business model. It was IBM's strongest fourth quarter ever, with earnings exceeding \$3 billion for the first time. Our balance sheet remains strong with superior cash flow, and we took share in key markets. We also returned \$8.3 billion to our shareholders through dividends and stock buyback during 2004, the most we have done in our history. The strategic actions that IBM took last year have increased our focus on delivering high value to enterprises. IBM is well positioned to continue our mission of bringing together the best insight, expertise and technologies to help our clients transform their businesses."

Fourth-quarter revenue growth of 7 percent (3 percent, adjusting for currency) was driven by growth across all geographies. Revenues from the zSeries mainframe product decreased compared with the prior-year quarter, which was particularly strong, while MIPS (millions of instructions per second), an indicator of total delivery of zSeries computing power, increased 6 percent. Revenues for the iSeries midrange servers and Storage Systems decreased primarily as a result of a transition to new products. Revenues from OEM Technology increased. Personal Systems Group increased revenues 2 percent to \$3.5 billion. In the quarter, IBM announced an agreement to sell the Personal Computer Division, a

unit of the Personal Systems Group.

Revenues from Software were \$4.5 billion, an increase of 7 percent (3 percent, adjusting for currency) compared with the fourth quarter of 2003.
