ASX Announcement

Melbourne, Wednesday 11 May 2005

National Australia Bank announces strategic initiatives for long-term growth

Edgar Filing: NATIONAL AUSTRALIA BANK LTD - Form 6-K

National Australia Bank Chief Executive, John Stewart, announced today key elements of the Group strategy to rebuild and transform the company and provide long term sustainable growth.

We have completed the first year of a two to three year turnaround, and over the next six months we will continue the work of stabilising the business, Mr Stewart said.

Transforming the National will be a challenge, but we are pursuing a balanced strategy that addresses the priority areas we identified last year of achieving better business efficiencies, restoring revenue growth, cultural change, and improving compliance and risk management.

Mr Stewart said good progress had been made across each of the four areas.

Business efficiency

Over the past 12 months, Mr Stewart said the National had been tackling inefficiency through a number of programs.

We are simplifying our business, reducing duplication through better integration across the Group, he said. In Australia, we are integrating wealth management and retail and corporate banking, and their associated systems and processes to make it easier to do business with us and allow us to be more nimble.

This integration gave us an opportunity to remove subsequent duplication in back office functions and reduce the size of the Corporate Centre in Australia as we devolve relevant functions to the Australian region. This will result in a more efficient regional business and leaner Corporate Centre, he said. (The impact of this is outlined in the Outcomes section at the end of this announcement.)

Institutional Markets & Services (IMS) has also reviewed its operating model and is now transitioning to a more efficient, higher equity return business model. As a result it will rationalise its activities in Asia and release capital currently invested in assets generating low returns. Its focus will be on markets where the Group can build long-term sustainable growth.

The IMS changes reflect the need for us to be more competitive while reducing inefficiencies. As a result, we have readjusted our IMS Asia network, focusing on retaining a regional hub in Hong Kong to support the wider Group activities and initiatives in Asia and to serve global clients.

Subject to the relevant approvals, IMS offices in Singapore, Korea and Malaysia will be closed and our Tokyo-based securities company will also be closed. In addition, we will be re-focusing our corporate lending activities in Asia on those clients who have, or potentially have, activities or investments in our core banking markets, he said.

Mr Stewart said the National remains committed to the Asia region.

These changes represent a realignment of our business strategy and re-basing of the business from which we can build a greater presence and one which represents a total Group perspective. We remain committed to the Asia region, he said.

The retail businesses in Singapore, Hong Kong and Tokyo will remain, and the National will continue to deliver a high level of service to customers in these locations.

Restoring revenue

Mr Stewart said the National had introduced several new products and processes across each of the regions to make it easier and more rewarding for customers to do business with us.

In Australia, we have listened to our customers and launched a range of new products in response to their needs, including new low-fee deposit accounts, business and housing low documentation loans and new credit card products, including the Visa mini card, he said. We have launched on the spot decisions for business loans, restoring credit settings and extending greater credit authority to our bankers.

In the UK, our growth program has included the opening of 15 financial solutions centres in the South East of England in the first half and three new centres since then, with a total of 30 to open by the end of the year. In the North of England and Scotland markets there are plans for approximately 40 more financial solutions centres and investment in 50 flagship branches.

The UK growth program has included a review of its distribution network, which will result in significant investment in customer facing areas.

This will include the continued expansion into the mortgage intermediary market, revitalisation of call centres, telephone banking and internet banking platforms, an expansion and technology upgrade of its ATM network, and a re-alignment of the branch network to reflect changing customer usage which will include the establishment of 50 flagship branches in key centres. Clydesdale Bank customers are also able to access their accounts at any of the UK's 16,000 Post Offices.

It has also resulted in decisions to close approximately 60 Clydesdale and 40 Yorkshire Bank branches during the next 18 months. This is in response to the changing needs of our customers, which has meant some branches are no longer viable.

Our research has shown that in any one month 75% of our customers do not use a branch at all, and 11% use a branch only once. This is about providing our customers with the appropriate network for their needs, Mr Stewart said.

In New Zealand, a range of customer service initiatives led to the Bank of New Zealand being rated number one of all major banks for branch service in 2004.

Mr Stewart said detailed business briefings on Australia and IMS strategies would be held later in the year (including updates on restructuring activity and investment spend).

Cultural change

Mr Stewart said the National's cultural change program was well underway.

The top levels of the leadership at the National have been refreshed and the new team is committed to rebuilding the National and creating sustainable growth in shareholder value with a balanced approach to all our stakeholders.

As we have restructured we have recruited from a variety of sources and moved talent internally to increase diversity of thinking and bring in new capability in areas such as risk, distribution, treasury and audit, he said.

We have held leadership working sessions with our key leaders across the regions to engage and involve them in their role in leading the Corporate Principles and driving the strategic agenda.

The Principles have been included within our performance management system to ensure our people are rewarded on both performance and behaviours.

A range of proof points are also being developed by the businesses to quantitatively measure our progress against these Principles and ensure they are aligned to the activities, responsibilities and operations of each area.

Compliance and risk management

Mr Stewart said the National's compliance and risk program has been a priority across the whole Group, with significant progress made.

Our compliance program is also progressing, he said. We have tightened our risk management and compliance framework, and are continuing to work closely with our regulators to ensure we have sustainable compliance and risk improvements.

Our foreign currency options trading desk reopened two days ago and we are well advanced on both the APRA remedial actions program and ASIC enforceable undertakings.

Thirty-one of the 81 actions in the APRA remedial actions program were completed to APRA's satisfaction by March 31 2005, with a further 40 submitted to APRA for closure.

Significant improvements in the risk management and compliance framework have been implemented across all the regions although there are still areas needing work. A new Chief Risk Officer in the Group, and Chief Risk Officers for each of the regions and IMS have been appointed, reflecting a greater focus on risk management.

Formal risk and compliance reporting and escalation processes have also been established to improve monitoring and control across the Group.

Outcomes

To support these initiatives, a provision of \$403 million before tax (\$282 million after tax) was booked in the National's first half results for 2005 (see separate release today).

The March half provision covers approximately 2,700 redundancies, including 1,000 in Australia and 1,700 that were previously announced in the United Kingdom.

The first half provision is expected to result in annualised savings of \$375 million when completed.

In the second half, a further provision of up to \$400 million will be booked. This relates to a further 1,500 redundancies, property rationalisation and other restructuring costs.

This will include 1,000 redundancies in the Australian business, 400 redundancies in the Institutional Markets and Services business and 100 redundancies in other areas including the corporate centre which is being progressively down-sized through the wind-down of group-wide projects, devolution of functions to the region and other efficiencies.

As a result of these changes, there will be approximately 2,000 redundancies in Australia over the next two years, the majority of which will be in back office, non-customer-facing roles.

When the redundancies in the United Kingdom and Institutional Markets & Services are included, a total of approximately 4,200 roles are expected to become redundant over the next 24 months globally across the National.

However, we expect to at least maintain our current level of investment of about \$800 million a year to build the business over the next 2 to 3 years. Over time, an increasing proportion of this investment will be focused on customer and revenue generating initiatives.

Template for Key Performance Measures

To assist investors in understanding the National's results we have attached a spreadsheet which sets out the calculations and inputs for a number of key performance measures including earnings per share, return on equity and return on assets.

The spreadsheet contains profit and loss, balance sheet and other inputs, such as share counts which are used in calculating key performance measures and provides a reference to where these inputs are located in the National's Half Year Results Pack.

If you have any questions regarding the spreadsheet please contact Investor Relations.

+ Includes Australia Region and Corporate Centre

Restructuring in September 2005 half

Australia and Institutional Markets & Services restructuring plans being finalised

A restructuring charge up to circa \$400M (pre tax) to be booked in September 2005 half

Further redundancies of up to 1,500 to be announced in September 2005 half

Ongoing cash spend on investments expected to be maintained broadly at current levels

Further details to be provided in September 2005 strategy briefing

Drivers of the Group result

Stronger volumes largely offset by margin decline

Markets and Structured products income restored

Wealth Management steady

Expense growth arrested

Loan loss provision maintained

Agenda

Introduction	John Stewart
Financial Overview	Michael Ullmer
Actions and Outlook	John Stewart
Questions and Answers	

Issues identified in November result briefing

1. People and Culture

2. Regulatory & Compliance

3. Business Inefficiency

Complexity

Bureaucratic

4. Stalled Revenue

Inward looking

Business processes not customer focused

Cultural change

Creating the conditions for transformation

Clear view of where we are and want to be

Talented new leadership

Corporate principles

Effective feedback and monitoring

Risk and Compliance

Good progress on APRA remedial actions

Other regulatory issues also progressing

Investor compensation complete

Good progress on enforceable undertakings

But issues still emerging

2 to 3 year program to strengthen Finance and Risk functions commenced

United Kingdom

Reconfiguring distribution

Expanding IFS sites and creating 50 flagship branches

Closing 60 Clydesdale and 40 Yorkshire branches

Efficiency program targeting £117m in annualised savings

Third party distribution on track to write £800m in new mortgages

Back book repricing and expense pressures to continue

Second half outlook flat

New Zealand

Growing share in housing and youth markets

NZ market remains competitive

Focus on improving the customer proposition to continue

Efficiency gains to support reinvestment in business

Australia

New leadership team and operating model

Distribution and product focus

Greater P&L accountability

Expense growth contained with FTEs down by 350 in the first half

On the spot loans

Improving approval times

Writing more business

Efficiency gains

Tightening risk settings (November 2004)

[CHART]

51

Australia Wealth Management

Integration progressing well

Very competitive marketplace

Focus on improving cross sell

Australian region

Still a long way to go to achieve;

Robust risk and compliance framework

Containing margin reduction

Sustainable cost saves

Sustainable revenue growth

Strategy presentation later in the year

Institutional Markets and Services

Shifting focus to rebasing and rebuilding

FX desk reopened

Focusing on improving ROE

Consolidating Asian footprint

Releasing capital will impact interest income

Medium term outlook subdued

Streamlining and efficiency

Streamline the Corporate Centre

1000 FTEs to approx. 200 FTEs

Restructuring announcements

First half provisioning charge booked

Reduction of up to 4,200 FTE s group wide

Consolidating IMS business in Asia

Rebuilding the National

	IMS	UK & Australia	New Zealand	
<i>In Decline</i>	<i>Stabilising</i>		<i>Rebuilding Capability</i>	<i>Truly Competitive</i>

Challenges as we enter the rebuilding phase

Maintaining business momentum and morale while restructuring

Fixing risk and control weaknesses while reducing costs

IMS rebasing

Increasingly competitive environment

Ongoing investment requirements

Summary and outlook

Earnings have bottomed by remain well down on peak levels

Turnaround timeframe remains 2 to 3 years

Expect acceptable earnings growth consistent with recovery process

Expect to maintain 83c dividend in second half franked between 80 and 100%

Major impacts upon transition to AIFRS

Recognition of net defined benefit pension deficit

Replacement of EMVONA with acquired goodwill

Additional volatility in income and equity reserves from fair value measurement

Recognition of share based payments expense

Expected decrease in general loan loss provision

Balance sheet grossed up by consolidation of SPEs

Regulatory capital implications under discussion with APRA

Current status: AIFRS program on-target to meet 1 October 2005 compliance timeline

Achievements as at April 2005

Identification of of impacts and requirements completed

AIFRS Accounting Policies relating to the 2004/05 transitional year formulated and approved, well advanced with AASB 132/139 policies

1 October 2004 AIFRS Equity Reconciliation and Opening Balance Sheet well progressed

Design of AASB 132/139 related impacts (Hedging, Valuation, Provisioning) complete, well advanced with build and testing activities

Proof of concept of Hedge Accounting solution successfully demonstrated

Briefing sessions on customer impacts with bankers completed

Upcoming Milestones

Remaining AIFRS Accounting Policies formulated and approved

AASB 132/139 system build completed

AASB 132/139 testing, parallel run, cut-over and implementation completed

1 October 2005 Transitional Adjustments completed on time

Application of tax effect accounting completed

Transition to Business As Usual

UK Restructuring will deliver £117m run rate benefits by September 2007

	Restructure Costs (£m)	FTE Reductions	Total run rate Savings 2006/07 (£m)
Distribution	35	c. 400	29
Products	12	c. 200	15
Production	16	c. 500	14
Central Support	46	c. 600	59
Total	109	c. 1,700	117

Benefits are against planned 2005 expense base

£73m of restructure charge is personnel related, £36m is surplus lease provision

Modest use of provision current year, expect 80% to be used by September 2006

Plan to achieve 80% of FTE reductions by September 2006

Summary of UK restructuring plans

Implementation of a UK efficiency program has commenced

Benefits begin in September 2005 half year with full run rate benefits of £117m by September 2007

Program is key part of doing what we do better and consistent with overall UK strategy

Implementation of growth initiatives continuing as planned

Program benefits are consistent with improving profitability. Further work required to achieve UK peer performance levels.
