**Dear Shareholder**

The global economic recovery continues, although global and US economic statistics show that the pace of economic growth has slowed. The sovereign debt crisis in Europe, slowing growth in China and concerns over the possibility that the United States and other developed markets are heading for a double-dip recession have all acted to depress investor sentiment. Despite broadening evidence of a slowdown in global economic activity, market volatility has normalized from the extreme levels seen in recent months. In the United States, economic data continues to be mixed, but it is our view that the preponderance of data suggests that the recovery is continuing. The critical issue for investors remains the question of whether the economy will experience a double-dip recession. We are on the optimistic side of this debate and would point out that while the recovery has been slow, we have made significant progress.

Global equity markets have moved unevenly higher since bottoming out in early 2009 as investors were enticed by depressed valuations, improved corporate earnings, and their desire for higher yields. Several significant downturns, however, have occurred primarily as a result of mixed economic data and concerns about the possibility of prolonged deflation (especially in Europe). As the period drew to a close, equity markets lost ground on weaker-than-expected economic data, most notably from the United States. International equities posted negative returns on both a six- and 12-month basis while US equities posted negative returns over the six months, but were still showing positive returns on a 12-month basis as the domestic economic recovery had been more pronounced and credit-related issues held European markets down. Within the United States, smaller cap stocks continue to outperform large caps year-to-date.

In fixed income markets, yields have fluctuated significantly over the past year as economic data has been mixed. Risk aversion and credit issues have kept interest rates low and US Treasury yields have fallen significantly as investors favored safe haven assets. As the period drew to a close, Treasuries modestly outperformed the spread sectors of the market (those driven by changes in credit risk). Corporate credit spreads benefited from the low rate environment and high yield fixed income remains attractive due to low default rates and better-than-expected results on European bank stress tests. Meanwhile, tax-exempt municipal bonds slightly outperformed US investment grade bonds on a 12-month basis, but underperformed year-to-date as investors rotated to the relative safety of Treasuries.

Regarding cash investments, yields on money market securities remain near all-time lows (producing returns only marginally above zero percent), with the Federal Open Market Committee reiterating that economic circumstances are likely to necessitate an accommodative interest rate stance for an extended period.

Against this backdrop, the major market averages posted the following returns:

<b>Total Returns as of August 31, 2010</b>	<b>6-month</b>	<b>12-month</b>
US large cap equities (S&P 500 Index)	(4.04)%	4.91%
US small cap equities (Russell 2000 Index)	(3.60)	6.60
International equities (MSCI Europe, Australasia, Far East Index)	(3.04)	(2.34)
3-month Treasury bill (BofA Merrill Lynch 3-Month Treasury Bill Index)	0.07	0.14
US Treasury securities (BofA Merrill Lynch 10-Year US Treasury Index)	11.49	11.58
US investment grade bonds (Barclays Capital US Aggregate Bond Index)	5.81	9.18
Tax-exempt municipal bonds (Barclays Capital Municipal Bond Index)	5.42	9.78
US high yield bonds (Barclays Capital US Corporate High Yield 2% Issuer Capped Index)	6.62	21.40

Past performance is no guarantee of future results. Index performance shown for illustrative purposes only. You cannot invest directly in an index.

## Edgar Filing: BLACKROCK CORPORATE HIGH YIELD FUND VI INC - Form N-CSR

Although conditions have improved over the past couple of years, investors across the globe continue to face uncertainty about the future direction of economic growth. Through periods of uncertainty, as ever, BlackRock's full resources are dedicated to the management of our clients' assets. For additional market perspective and investment insight, visit [www.blackrock.com/shareholdermagazine](http://www.blackrock.com/shareholdermagazine), where you'll find the most recent issue of our award-winning *Shareholder*<sup>®</sup> magazine, as well as its quarterly companion newsletter, *Shareholder Perspectives*. We thank you for entrusting BlackRock with your investments, and we look forward to your continued partnership in the months and years ahead.

Sincerely,

Rob Kapito  
President, BlackRock Advisors, LLC

Trust Summary as of August 31, 2010

BlackRock Core Bond Trust

---

**Trust Overview**

---

**BlackRock Core Bond Trust** s (BHK) (the Trust ) investment objective is to provide current income and capital appreciation. The Trust seeks to achieve its investment objective by investing at least 75% of its assets in bonds that are investment grade quality at the time of investment. The Trust s investments will include a broad range of bonds, including corporate bonds, US government and agency securities and mortgage-related securities. The Trust may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust s investment objective will be achieved.

---

**Performance**

---

For the 12 months ended August 31, 2010, the Trust returned 25.93% based on market price and 22.44% based on net asset value ( NAV ). For the same period, the closed-end Lipper Corporate Debt Funds BBB-Rated category posted an average return of 22.14% based on market price and 19.62% based on NAV. All returns reflect reinvestment of dividends. The Trust s discount to NAV, which narrowed during the period, accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV. The Trust benefited from its allocation to securitized sectors including commercial mortgage-backed securities ( MBS ), agency and non-agency MBS, and asset-backed securities. The Trust s higher duration (greater sensitivity to interest rates) relative to its peers contributed to performance as interest rates declined in the latter part of the period. The Trust s underweight in high yield corporate issues detracted from performance as risk assets rebounded sharply during the period and outperformed investment-grade credit. Rising interest rates during the first half of the period were detrimental to the Trust due to its higher duration.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

Trust Summary as of August 31, 2010

BlackRock Corporate High Yield Fund V, Inc.

---

**Trust Overview**

---

**BlackRock Corporate High Yield Fund V, Inc. s (HYV) (the Trust )** investment objective is to provide shareholders with current income by investing primarily in a diversified portfolio of fixed income securities that are rated in the lower rating categories of the established rating services (BB or lower by S&P or Ba or lower by Moody s) or in unrated securities considered by the Trust s investment adviser to be of comparable quality. The Trust also seeks to provide shareholders with capital appreciation. The Trust seeks to achieve its investment objective by investing, under normal market conditions, at least 80% of its assets in domestic and foreign high yield debt instruments, including high yield bonds (commonly referred to as junk bonds) and high yield corporate loans which are below investment grade quality. The Trust may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust s investment objective will be achieved.

---

**Performance**

---

For the 12 months ended August 31, 2010, the Trust returned 34.42% based on market price and 31.40% based on NAV. For the same period, the closed-end Lipper High Current Yield Funds (Leveraged) category posted an average return of 34.35% based on market price basis and 26.92% based on NAV. All returns reflect reinvestment of dividends. The Trust s discount to NAV, which narrowed during the period, accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV. The high yield sector outperformed most other sectors of the fixed income market. We focused on sectors and companies with relatively stable cash flows and the ability to generate steady income. We also invested in a few special situations and recovery stories, most notably in the automotive sector, which contributed to the Trust s outperformance versus its peer group. The Trust s underweight in higher quality speculative grade names and overweight in lower quality credits benefited performance. Toward the end of the period, we moved to an underweight position in lower quality names, which have recently become expensive relative to higher quality names. During the period, the Trust maintained leverage at an average amount just below 20% of its total managed assets, which detracted from relative performance versus competitors that maintained higher leverage, as would be expected when markets are advancing. Exposure to floating rate loan interests also detracted as the bank loan sector underperformed the high yield sector during the period.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

Trust Summary as of August 31, 2010

BlackRock Corporate High Yield Fund VI, Inc.

---

**Trust Overview**

---

**BlackRock Corporate High Yield Fund VI, Inc. s (HYT) (the Trust )** primary investment objective is to provide shareholders with current income. The Trust s secondary investment objective is to provide shareholders with capital appreciation. The Trust seeks to achieve its objectives by investing, under normal market conditions, at least 80% of its assets in domestic and foreign high yield securities, including high yield bonds (commonly referred to as junk bonds), corporate loans, convertible debt securities and preferred securities which are below investment grade quality. The Trust may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust s investment objectives will be achieved.

---

**Performance**

---

For the 12 months ended August 31, 2010, the Trust returned 29.92% based on market price and 29.26% based on NAV. For the same period, the closed-end Lipper High Current Yield Funds (Leveraged) category posted an average return of 34.35% based on market price and 26.92% based on NAV. All returns reflect reinvestment of dividends. The Trust s discount to NAV, which narrowed during the period, accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV. The high yield sector outperformed most other sectors of the fixed income market, as the number of defaults declined and investors became less risk-averse and gravitated to higher yielding investments in the low yield environment. Given our outlook for a continued slow economic environment, we began to focus more on sectors and companies with relatively stable cash flows and the ability to generate steady income, and less on companies which require growth before they can achieve a steady income. Outside of this focus, we invested in a few special situations and recovery stories, most notably in the automotive sector. These investments were key contributors to the Trust s outperformance versus its peer group for the period. The Trust s underweight position in higher quality speculative grade names and overweight in lower quality credits benefited performance during the period. Toward the end of the period, we moved to an underweight position in lower quality names, which we believe will benefit the Trust going forward as lower quality issues have recently become expensive relative to higher quality names. During the period, the Trust maintained leverage at an average amount between 15% to 20% of its total managed assets, which detracted from relative performance versus competitors that maintained higher leverage, as would be expected when markets are advancing. The Trust s exposure to floating rate loan interests detracted from performance (despite favorable security selection within the sector) as the bank loan sector underperformed the high yield sector during the period.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

Trust Summary as of August 31, 2010

BlackRock High Income Shares

---

**Trust Overview**

---

**BlackRock High Income Shares (HIS) (the Trust )** investment objective is to provide the highest current income attainable consistent with reasonable risk as determined by the Trust's investment adviser, through investment in a professionally managed, diversified portfolio of high yield, high risk fixed income securities (commonly referred to as junk bonds ). The Trust's secondary objective is to provide capital appreciation, but only when consistent with its primary objective. The Trust seeks to achieve its objectives by investing primarily in high yield, high risk debt instruments rated in the medium to lower categories by nationally recognized rating services (BBB or lower by S&P or Baa or lower by Moody's) or non-rated securities, which, in the investment adviser's opinion, are of comparable quality. Under normal market conditions, the average maturity of the Trust's portfolio is between eight and twelve years. The Trust may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust's investment objectives will be achieved.

---

Trust Summary as of August 31, 2010

BlackRock Income Opportunity Trust, Inc.

---

**Trust Overview**

---

**BlackRock Income Opportunity Trust, Inc. s (BNA) (the Trust )** investment objective is to provide current income and capital appreciation. The Trust seeks to achieve its investment objective by investing at least 75% of its assets in bonds that are investment grade quality at the time of investment. The Trust s investments will include a broad range of bonds, including corporate bonds, US government and agency securities and mortgage-related securities. The Trust may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust s investment objective will be achieved.

---

**Performance**

---

For the 12 months ended August 31, 2010, the Trust returned 18.69% based on market price and 19.83% based on NAV. For the same period, the closed-end Lipper Corporate Debt Funds BBB-Rated category posted an average return of 22.14% based on market price and 19.62% based on NAV. All returns reflect reinvestment of dividends. The Trust s discount to NAV, which widened during the period, accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV. The Trust benefited from its allocation to securitized sectors, including commercial MBS, agency and non-agency MBS, and asset-backed securities. The Trust s higher duration (greater sensitivity to interest rates) relative to its peers contributed to performance as interest rates declined in the latter part of the period. The Trust s underweight in high yield corporate issues detracted from performance as risk assets rebounded sharply during the period and outperformed investment-grade credit. Rising interest rates during the first half of the period were detrimental to the Trust due to its higher duration.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

Trust Summary as of August 31, 2010

BlackRock Income Trust, Inc.

---

**Trust Overview**

---

**BlackRock Income Trust, Inc. s (BKT) (the Trust )** investment objective is to manage a portfolio of high-quality securities to achieve both preservation of capital and high monthly income. The Trust seeks to achieve its investment objective by investing at least 65% of its assets in mortgage-backed securities. The Trust invests at least 80% of its assets in securities that are (i) issued or guaranteed by the US government or one of its agencies or instrumentalities or (ii) rated at the time of investment either AAA by S&P or Aaa by Moody s. Securities issued or guaranteed by the US government or its agencies or instrumentalities are generally considered to be of the same or higher credit or quality as privately issued securities rated AAA or Aaa. The Trust may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust s investment objective will be achieved.

---

**Performance**

---

For the 12 months ended August 31, 2010, the Trust returned 11.19% based on market price and 13.86% based on NAV. For the same period, the closed-end Lipper US Mortgage Funds category posted an average return of 25.95% based on market price and 18.75% based on NAV. All returns reflect reinvestment of dividends. The Trust s discount to NAV, which widened during the period, accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV. The Trust s underweight in agency mortgage-backed securities (MBS), in favor of US Treasuries and agency debt, detracted from performance as spread sectors (those driven by movements in credit risk) continued to rally during the period. The Trust makes use of derivatives to hedge interest rate risks associated with mortgage-related assets. Derivative losses were concentrated among the use of interest rate futures and interest rate swaps. The losses associated with these derivative positions are largely offset by long positions in mortgage assets. Conversely, the Trust benefited from its allocations to non-agency MBS and commercial MBS. Both of these sectors outperformed agency MBS as risk assets continued to rally on the extended accommodative monetary policy and improving (albeit mixed) economic indicators. In addition, the Trust benefited from security selection with a focus on active management of mortgage exposure across the spectrum of coupon rates.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

Trust Summary as of August 31, 2010

BlackRock Strategic Bond Trust

---

**Trust Overview**

---

**BlackRock Strategic Bond Trust s (BHD) (the Trust )** investment objective is to provide total return through high current income and capital appreciation. The Trust seeks to achieve its investment objective by investing primarily in a diversified portfolio of fixed income securities including corporate bonds, US government and agency securities, mortgage-related and asset-backed securities and other types of fixed income securities. The Trust invests, under normal market conditions, a significant portion of its assets in corporate fixed income securities that are below investment grade quality, including high-risk, high yield bonds (commonly referred to as junk bonds) and other such securities, such as preferred stocks. The Trust may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust s investment objective will be achieved.

---

**Performance**

---

For the 12 months ended August 31, 2010, the Trust returned 23.88% based on market price and 20.38% based on NAV. For the same period, the closed-end Lipper High Current Yield Funds (Leveraged) posted an average return of 34.35% based on market price and 26.92% based on NAV. All returns reflect reinvestment of dividends. The Trust s discount to NAV, which narrowed during the period, accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV. The Trust s allocation to investment-grade credit and bank loans detracted from performance relative to the Lipper category competitors that invest primarily in high yield bonds, which outperformed the broader market during the period. The Trust s relatively conservative amount of leverage (averaging below 10% of total managed assets) detracted from the Trust s performance versus its more highly levered competitors, as would be expected in an advancing market. Contributing positively to performance was the Trust s allocation to high yield bonds and our focus on sectors and companies with relatively stable cash flows and the ability to generate steady income. Investments in a few special situations and recovery stories, most notably in the automotive sector, also aided performance.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

## The Benefits and Risks of Leveraging

The Trusts may utilize leverage to seek to enhance the yield and NAV. However, these objectives cannot be achieved in all interest rate environments.

The Trusts may utilize leverage by borrowing through a credit facility, participation in the TALF, or through entering into reverse repurchase agreements and treasury roll transactions. In general, the concept of leveraging is based on the premise that the financing cost of assets to be obtained from leverage will be based on short-term interest rates, which normally will be lower than the income earned by each Trust on its longer-term portfolio investments. To the extent that the total assets of each Trust (including the assets obtained from leverage) are invested in higher-yielding portfolio investments, each Trust's shareholders will benefit from the incremental net income.

The interest earned on securities purchased with the proceeds from leverage is paid to shareholders in the form of dividends, and the value of these portfolio holdings is reflected in the per share NAV. However, in order to benefit shareholders, the yield curve must be positively sloped; that is, short-term interest rates must be lower than long-term interest rates. If the yield curve becomes negatively sloped, meaning short-term interest rates exceed long-term interest rates, income to shareholders will be lower than if the Trusts had not used leverage.

To illustrate these concepts, assume a Trust's capitalization is \$100 million and it borrows for an additional \$30 million, creating a total value of \$130 million available for investment in long-term securities. If prevailing short-term interest rates are 3% and long-term interest rates are 6%, the yield curve has a strongly positive slope. In this case, the Trust pays borrowing costs and interest expense on the \$30 million of borrowings based on the lower short-term interest rates. At the same time, the securities purchased by the Trust with assets received from the borrowings earn income based on long-term interest rates. In this case, the borrowing costs and interest expense of the borrowings is significantly lower than the income earned on the Trust's long-term investments, and therefore the shareholders are the beneficiaries of the incremental net income.

If short-term interest rates rise, narrowing the differential between short-term and long-term interest rates, the incremental net income pickup will be reduced or eliminated completely. Furthermore, if prevailing short-term interest rates rise above long-term interest rates of 6%, the yield curve has a negative slope. In this case, the Trust pays interest expense on the higher short-term interest rates whereas the Trust's total portfolio earns income based on lower long-term interest rates.

Furthermore, the value of the Trust's portfolio investments generally varies inversely with the direction of long-term interest rates, although other factors can influence the value of portfolio investments. In contrast, the redemption value of the Trust's borrowings do not fluctuate in relation to interest rates. As a result, changes in interest rates can influence the Trust's NAV positively or negatively in addition to the impact on Trust performance from leverage from borrowings discussed above.

The use of leverage may enhance opportunities for increased income to the Trusts and shareholders, but as described above, it also creates risks as short- or long-term interest rates fluctuate. Leverage also will generally cause greater changes in each Trust's NAV, market price and dividend rate than a comparable portfolio without leverage. If the income derived from securities purchased with assets received from leverage exceeds the cost of leverage, each Trust's net income will be greater than if leverage had not been used. Conversely, if the income from the securities purchased is not sufficient to cover the cost of leverage, each Trust's net income will be less than if leverage had not been used, and therefore the amount available for distribution to shareholders will be reduced. Each Trust may be required to sell portfolio securities at inopportune times or at distressed values in order to comply with regulatory requirements applicable to the use of leverage or as required by the terms of leverage instruments, which may cause a Trust to incur losses. The use of leverage may limit each Trust's ability to invest in certain types of securities or use certain types of hedging strategies. Each Trust will incur expenses in connection with the use of leverage, all of which are borne by shareholders and may reduce income.

Under the Investment Company Act of 1940, the Trusts are permitted to borrow through their credit facility, through participation in the TALF or entering into reverse repurchase agreements up to 33 $\frac{1}{3}$ % of their total managed assets. As of August 31, 2010, the Trusts had outstanding leverage from borrowings as a percentage of their total managed assets as follows:

---

**Percent of  
Leverage**

---

BHK	31%
HYV	19%
HYT	18%
HIS	17%

### Derivative Financial Instruments

The Trusts may invest in various derivative instruments, including financial futures contracts, swaps, options and foreign currency exchange contracts, as specified in Note 2 of the Notes to Financial Statements, which may constitute forms of economic leverage. Such instruments are used to obtain exposure to a market without owning or taking physical custody of securities or to hedge market, equity, credit, foreign currency exchange rate, interest rate and/or other risks. Such derivative instruments involve risks, including the imperfect correlation between the value of a derivative instrument and the underlying asset, possible default of the counterparty to the transaction or illiquidity of the derivative instrument. The Trusts' ability to successfully use a derivative instrument depends on the investment advisor's ability to accurately predict pertinent market movements, which cannot be assured. The use of derivative instruments may result in losses greater than if they had not been used, may require a Trust to sell or purchase portfolio securities at inopportune times or for distressed values, may limit the amount of appreciation a Trust can realize on an investment, may result in lower dividends paid to shareholders or may cause a Trust to hold a security that it might otherwise sell. The Trusts' investments in these instruments are discussed in detail in the Notes to Financial Statements.

(c) Based on the change in return of the Consumer Price Index for All Urban Consumers and pays at maturity. See Notes to Financial Statements.

## Schedule of Investments (continued)

## BlackRock Core Bond Trust (BHK)

Credit default swaps on single-name issuers buy protection outstanding as of August 31, 2010 were as follows:

Issuer	Pay Fixed Rate	Counterparty	Expiration	Notional Amount (000)	Unrealized Depreciation
NOVA Chemicals Corp.	5.00%	Citibank NA	March 2012	\$ 50	\$ (955)
NOVA Chemicals Corp.	5.00%	JPMorgan Chase Bank NA	June 2012	\$ 65	(902)
Macy's, Inc.	7.50%	Morgan Stanley Capital Services, Inc.	June 2012	\$ 405	(44,120)
Macy's, Inc.	8.00%	Morgan Stanley Capital Services, Inc.	June 2012	\$ 145	(17,093)
NOVA Chemicals Corp.	5.00%	Goldman Sachs Bank USA	December 2013	\$ 300	(9,775)
Brunswick Corp.	5.00%	Credit Suisse International	September 2014	\$ 570	(30,123)
Macy's, Inc.	1.00%	Morgan Stanley International	September 2014	\$ 150	(429)
<b>Total</b>					<b>\$ (103,397)</b>

Credit default swaps on traded indexes buy protection outstanding as of August 31, 2010 were as follows:

Issuer	Pay Fixed Rate	Counterparty	Expiration	Notional Amount (000)	Unrealized Appreciation
Dow Jones CDX North America Investment Grade High Volatility Index	1.00%	Citibank NA	June 2015	\$ 3,300	\$ 3,636
Dow Jones CDX North America Investment Grade Index Series 14	1.00%	Citibank NA	June 2015	\$ 3,300	641
<b>Total</b>					<b>\$ 4,277</b>

## Edgar Filing: BLACKROCK CORPORATE HIGH YIELD FUND VI INC - Form N-CSR

Credit default swaps on traded indexes sold protection outstanding as of August 31, 2010 were as follows:

Issuer	Receive Fixed Rate	Counterparty	Expiration	Average Credit Rating <sup>1</sup>	Notional Amount (000) <sup>2</sup>	Unrealized Appreciation
Dow Jones CDX North America High Yield Index Series 14	5.00%	Credit Suisse International	June 2015	B	\$ 4,100	\$ 27,442

<sup>1</sup> Using S&P's rating.

<sup>2</sup> The maximum potential amount the Trust may pay should a negative event take place as defined under the terms of agreement.

For Trust compliance purposes, the Trust's industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or rating group indexes, and/or as defined by Trust management. This definition may not apply for purposes of this report, which may combine such industry sub-classifications for reporting ease.

Fair Value Measurements Various inputs are used in determining the fair value of investments and derivatives, which are as follows:

Level 1 price quotations in active markets/exchanges for identical assets and liabilities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust's own assumptions used in determining the fair value of investments and derivatives)

The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Trust's policy regarding valuation of investments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

The following tables summarize the inputs used as of August 31, 2010 in determining the fair valuation of the Trust's investments and derivatives:

Valuation Inputs	Level 1	Level 2	Level 3	Total
<b>Assets:</b>				
Investments in Securities:				
Long-Term Investments:				
Asset-Backed Securities		\$ 21,536,268	\$ 5,104,409	\$ 26,640,677

ANNUAL REPORT

AUGUST 31, 2010

23

## Schedule of Investments (concluded)

## BlackRock Core Bond Trust (BHK)

Valuation Inputs	Derivative Financial Instruments <sup>1</sup>			
	Level 1	Level 2	Level 3	Total
<b>Assets:</b>				
Credit contracts		\$ 31,719		\$ 31,719
Foreign currency exchange contracts		227,544		227,544
Interest rate contracts	\$ 736,244	8,681,423		9,417,667
Other contracts		617,527		617,527
<b>Liabilities:</b>				
Credit contracts		(103,397)		(103,397)
Foreign currency exchange contracts		(287,611)		(287,611)
Interest rate contracts	(433,143)	(13,909,954)		(14,343,097)
<b>Total</b>	\$ 303,101	\$ (4,742,749)		\$ (4,439,648)

<sup>1</sup> Derivative financial instruments are swaps, financial futures contracts, foreign currency exchange contracts and options. Swaps, financial futures contracts and foreign currency exchange contracts are valued at the unrealized appreciation/ depreciation on the instrument and options are shown at value.

The following table is a reconciliation of Level 3 investments for which significant unobservable inputs were used to determine fair value:

	Asset-Backed Securities	Common Stocks	Corporate Bonds	Non-Agency Mortgage-Backed Securities	Other Interests	Preferred Securities	U.S. Government Sponsored Agency Securities	Total
<b>Assets:</b>								
Balance, as of August 31, 2009	\$ 1,198,713		\$ 1,488,845	\$ 1,612,444	\$ 381		\$ 2,690,595	\$ 6,990,978
Accrued discounts/premiums	(91,357)		9,357	2,177			(450,172)	(529,995)
Net realized gain (loss)			(202,155)	30,370			1,504,160	1,332,375
Net change in unrealized appreciation/ depreciation <sup>2</sup>	(85,187)		1,252,664	31,758			(1,012,830)	186,405
Purchases			(2,081,954)					(2,081,954)
Sales			228,293	(105,847)			(2,731,753)	(2,609,307)
Transfers in <sup>3</sup>	4,082,240	\$ 11,492	3,028,432	1,615,000		\$ 56,838		8,794,002
Transfers out <sup>3</sup>			(694,010)	(875,000)				(1,569,010)
<b>Balance, as of August 31, 2010</b>	\$ 5,104,409	\$ 11,492	\$ 3,029,472	\$ 2,310,902	\$ 381	\$ 56,838		\$ 10,513,494

<sup>2</sup> Included in the related net change in unrealized appreciation/depreciation in the Statements of Operations. The net change in unrealized appreciation/depreciation on securities still held at August 31, 2010 was \$(56,998).

The following table is a reconciliation of Level 3 derivative financial instruments for which significant unobservable inputs were used to determine fair value:

	Interest Rate Contracts
<b>Liabilities:</b>	
Balance, as of August 31, 2009	\$ (226,565)
Accrued discounts/premiums	
Net realized gain (loss)	(251,534)
Net change in unrealized appreciation/depreciation	226,565
Purchases	251,534
Sales	
Transfers in <sup>3</sup>	
Transfers out <sup>3</sup>	
<b>Balance, as of August 31, 2010</b>	<b>_____</b>

<sup>3</sup> The Trust's policy is to recognize transfers in and transfers out as of the end of the period of the event or the change in circumstances that caused the transfer.

See Notes to Financial Statements.

GBP	247,000	USD	385,308	UBS AG	10/20/10	(6,628)
<b>Total</b>						<b>\$ (42,193)</b>

For Trust compliance purposes, the Trust's industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or rating group indexes, and/or as defined by Trust management. This definition may not apply for purposes of this report, which may combine such industry sub-classifications for reporting ease.

Fair Value Measurements Various inputs are used in determining the fair value of investments and derivatives, which are as follows:

Level 1 price quotations in active markets/exchanges for identical assets and liabilities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust's own assumptions used in determining the fair value of investments and derivatives)

The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Trust's policy regarding valuation of investments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

The following tables summarize the inputs used as of August 31, 2010 in determining the fair valuation of the Trust's investments and derivatives:

Valuation Inputs	Level 1	Level 2	Level 3	Total
------------------	---------	---------	---------	-------

Edgar Filing: BLACKROCK CORPORATE HIGH YIELD FUND VI INC - Form N-CSR

<b>Assets:</b>				
Investments in Securities:				
Long-Term Investments:				
Common Stocks	\$ 8,038,488	\$ 637,200	\$ 1,056,339	\$ 9,732,027

<sup>1</sup> Using S&P's rating of the issuer.

<sup>2</sup> The maximum potential amount the Trust may be required to pay should a negative credit event take place as defined under the terms of agreement.

## Edgar Filing: BLACKROCK CORPORATE HIGH YIELD FUND VI INC - Form N-CSR

For Trust compliance purposes, the Trust's industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or rating group indexes, and/or as defined by Trust management. This definition may not apply for purposes of this report, which may combine such industry sub-classifications for reporting ease.

**Fair Value Measurements** Various inputs are used in determining the fair value of investments and derivatives, which are as follows:

Level 1 price quotations in active markets/exchanges for identical assets and liabilities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust's own assumptions used in determining the fair value of investments and derivatives)

The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Trust's policy regarding valuation of investments and derivatives and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

See Notes to Financial Statements.

ANNUAL REPORT

AUGUST 31, 2010

39

---

## Schedule of Investments (concluded)

## BlackRock Corporate High Yield Fund VI, Inc. (HYT)

The following tables summarize the inputs used as of August 31, 2010 in determining the fair valuation of the Trust's investments and derivatives:

Valuation Inputs	Level 1	Level 2	Level 3	Total
<b>Assets:</b>				
Investments in Securities:				
Long-Term Investments:				
Common Stocks	\$ 7,417,996	\$ 675,463	\$ 712,707	\$ 8,806,166
Corporate Bonds		384,970,575	4,851,224	389,821,799
Floating Rate Loan Interest		49,221,694	20,602,850	69,824,544
Other Interest		6,797,931	6,747	6,804,678
Preferred Securities	3,779,805		1	3,779,806
Warrants			271	271
Short-Term Securities	1,808,758			1,808,758
<b>Liabilities:</b>				
Unfunded Loan Commitments			(36,123)	(36,123)
<b>Total</b>	<b>\$ 13,006,559</b>	<b>\$ 441,665,663</b>	<b>\$ 26,137,677</b>	<b>\$ 480,809,899</b>

Derivative Financial Instruments <sup>1</sup>				
Valuation Inputs	Level 1	Level 2	Level 3	Total
<b>Assets:</b>				
Credit contracts		\$ 320,659		\$ 320,659
Foreign currency exchange contracts		16,013		16,013
Equity contracts	\$ 180,556			180,556
<b>Liabilities:</b>				
Credit contracts		(304,769)		(304,769)
Foreign currency exchange contracts		(57,910)		(57,910)
<b>Total</b>	<b>\$ 180,556</b>	<b>\$ (26,007)</b>		<b>\$ 154,549</b>

<sup>1</sup> Derivative financial instruments are swaps, financial futures contracts, foreign currency exchange contracts and options. Swaps, financial futures contracts and foreign currency exchange contracts are valued at the unrealized appreciation/ depreciation on the instrument and options are shown at value.

The following table is a reconciliation of Level 3 investments for which significant unobservable inputs were used to determine fair value:

Common Stocks	Corporate Bonds	Floating Rate Loan Interests	Other Interests	Preferred Securities	Warrants	Unfunded Loan	Total
---------------	-----------------	------------------------------	-----------------	----------------------	----------	---------------	-------

## Commitments

<b>Assets/ Liabilities:</b>										
Balance, as of August 31,										
2009	\$	672	\$ 2,197,802	\$ 33,422,195	\$ 6,747	\$	1	\$	10	\$ 35,627,427
Accrued										
discounts/premiums			40,503	437,076						477,579
Net realized gain (loss)			368,701	(7,090,984)						(6,722,283)
Net change in unrealized										
appreciation/depreciation <sup>2</sup>		7,086	(374,968)	18,219,951			(9)	\$	(36,123)	17,815,937
Purchases			(779,842)	(19,872,397)						(20,652,239)
Sales				(3,034,891)						(3,034,891)
Transfers in <sup>3</sup>		712,576	3,399,028	12,407,148			270			16,519,022
Transfers out <sup>3</sup>		(7,627)		(13,885,248)						(13,892,875)
<b>Balance, as of August 31,</b>										
<b>2010</b>	\$	712,707	\$ 4,851,224	\$ 20,602,850	\$ 6,747	\$	1	\$	271	\$ (36,123) \$ 26,137,677

<sup>2</sup> Included in the related net change in unrealized appreciation/depreciation in the Statements of Operations. The net change in the unrealized appreciation/depreciation on the securities still held on August 31, 2010 was \$3,575,817.

<sup>3</sup> The Trust's policy is to recognize transfers in and transfers out as of the end of the period of the event or the change in circumstances that caused the transfer.

See Notes to Financial Statements.

## Schedule of Investments (continued)

**BlackRock High Income Shares (HIS)**  
(Percentages shown are based on Net Assets)

Short-Term Securities	Shares	Value
BlackRock Liquidity Funds, TempFund, Institutional Class, 0.25% (1)(m)	2,032,818	\$ 2,032,818
<b>Total Short-Term Securities</b> (Cost \$2,032,818) 1.7%		2,032,818
<b>Total Investments (Cost \$143,615,534*) 119.2%</b>		142,644,429
<b>Liabilities in Excess of Other Assets (19.2)%</b>		(23,002,738)
<b>Net Assets 100.0%</b>		<b>\$ 119,641,691</b>

\* The cost and unrealized appreciation (depreciation) of investments as of August 31, 2010, as computed for federal income tax purposes, were as follows:

Aggregate cost	\$ 143,737,652
Gross unrealized appreciation	\$ 6,221,884
Gross unrealized depreciation	(7,315,107)
Net unrealized depreciation	\$ (1,093,223)

- (a) Non-income producing security.
- (b) Security exempt from registration under Rule 144A of the Securities Act of 1933.  
These securities may be resold in transactions exempt from registration to qualified institutional investors.
- (c) Represents a payment-in-kind security which may pay interest/dividends in additional face/shares.
- (d) Convertible security.
- (e) Represents a zero-coupon bond. Rate shown reflects the current yield as of report date.
- (f) Variable rate security. Rate shown is as of report date.
- (g) Represents a step-down bond that pays an initial coupon rate for the first period and then a lower coupon rate for the following periods. Rate shown is as of report date.
- (h) Issuer filed for bankruptcy and/or is in default of interest payments.
- (i) Other interests represent beneficial interest in liquidation trusts and other reorganization entities and are non-income producing.

Edgar Filing: BLACKROCK CORPORATE HIGH YIELD FUND VI INC - Form N-CSR

- (j) Amount is less than \$1,000.
- (k) Warrants entitle the Trust to purchase a predetermined number of shares of common stock and are non-income producing. The purchase price and number of shares are subject to adjustment under certain conditions until the expiration date, if any.
- (l) Investments in companies considered to be an affiliate of the Trust during the year, for purposes of Section 2(a)(3) of the Investment Company Act of 1940, as amended, were as follows:

Affiliate	Shares Held at August 31, 2009	Net Activity	Shares Held at August 31, 2010	Income
BlackRock Liquidity Funds, TempFund, Institutional Class	1,250,194	782,624	2,032,818	\$ 2,933

- (m) Represents the current yield as of report date.

Foreign currency exchange contracts as of August 31, 2010 were as follows:

Currency Purchased	Currency Sold	Counterparty	Settlement Date	Unrealized Appreciation (Depreciation)
EUR 42,000	USD 53,174	Citibank NA	9/15/10	\$ 49
USD 4,420,402	EUR 3,490,500	Citibank NA	9/15/10	(2,840)
USD 148,180	EUR 115,000	Deutsche Bank AG	9/15/10	2,449
<b>Total</b>				<b>\$ (342)</b>

Financial futures contracts sold as of August 31, 2010 were as follows:

Contracts	Issue	Exchange	Expiration Date	Notional Value	Unrealized Appreciation
9	S&P 500 Index	Chicago Mercantile	September 2010	\$ 2,404,153	\$ 45,478

For Trust compliance purposes, the Trust's industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or rating group indexes, and/or as defined by Trust management. This definition may not apply for purposes of this report, which may combine such industry sub-classifications for reporting ease.

Fair Value Measurements Various inputs are used in determining the fair value of investments and derivatives, which are as follows:

Level 1 price quotations in active markets/exchanges for identical assets and liabilities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that

## Edgar Filing: BLACKROCK CORPORATE HIGH YIELD FUND VI INC - Form N-CSR

are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust's own assumptions used in determining the fair value of investments and derivatives)

The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Trust's policy regarding valuation of investments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

The following tables summarize the inputs used as of August 31, 2010 in determining the fair valuation of the Trust's investments and derivatives:

Valuation Inputs	Level 1	Level 2	Level 3	Total
<b>Assets:</b>				
Investments in Securities:				
Long-Term Investments:				
Common Stocks	\$ 1,114,736	\$ 61,362	\$ 283,463	\$ 1,459,561
Corporate Bonds		114,986,268	3,070,692	118,056,960
Floating Rate Loan Interests		13,615,526	5,191,058	18,806,584
Other interests		374,153	953	375,106
Preferred Securities	1,496,286		417,114	1,913,400
Short-Term Securities	2,032,818			2,032,818
<b>Liabilities:</b>				
Unfunded Loan Commitments			(2,026)	(2,026)
<b>Total</b>	<b>\$ 4,643,840</b>	<b>\$ 129,037,309</b>	<b>\$ 8,961,254</b>	<b>\$ 142,642,403</b>

See Notes to Financial Statements.

## Schedule of Investments (concluded)

## BlackRock High Income Shares (HIS)

Valuation Inputs	Derivative Financial Instruments <sup>1</sup>			
	Level 1	Level 2	Level 3	Total
<b>Assets:</b>				
Foreign currency exchange contracts		\$ 2,498		\$ 2,498
Equity contracts	\$ 45,478			45,478
<b>Liabilities:</b>				
Foreign currency exchange contracts		(2,840)		(2,840)
<b>Total</b>	\$ 45,478	\$ (342)		\$ 45,136

<sup>1</sup> Derivative financial instruments are financial futures contracts and foreign currency exchange contracts. Financial futures contracts and foreign currency exchange contracts are valued at the unrealized appreciation/depreciation on the instrument. The following table is a reconciliation of Level 3 investments for which significant unobservable inputs were used in determining fair value:

	Common Stocks	Corporate Bonds	Floating Rate Loan Interests	Other Interests	Preferred Stocks	Unfunded Loan Commitments	Total
<b>Assets/Liabilities:</b>							
Balance, as of August 31, 2009		\$ 2,463,780	\$ 8,875,772	\$ 953			\$ 11,340,505
Accrued discounts/premiums		2,965	41,176				44,141
Net realized gain (loss)		(422,836)	(1,747,316)				(2,170,152)
Net change in unrealized appreciation/depreciation <sup>2</sup>		4,929,227	4,543,962			\$ (2,026)	9,471,163
Purchases		223,025	2,535,753				2,758,778
Sales		(5,603,699)	(7,633,681)				(13,237,380)
Transfers in <sup>3</sup>	\$ 283,463	1,713,276	2,973,020		\$ 417,114		5,386,873
Transfers out <sup>3</sup>		(235,046)	(4,397,628)				(4,632,674)
<b>Balance, as of August 31, 2010</b>	\$ 283,463	\$ 3,070,692	\$ 5,191,058	\$ 953	\$ 417,114	\$ (2,026)	\$ 8,961,254

<sup>2</sup> Included in the related net change in unrealized appreciation/depreciation in the Statements of Operations. The net change in unrealized appreciation/depreciation on securities still held at August 31, 2010 was \$2,064,289.

<sup>3</sup> The Trust's policy is to recognize transfers in and transfers out as of the end of the period of the event or the change in circumstances that caused the transfer.

See Notes to Financial Statements.

\* The cost and unrealized appreciation (depreciation) of investments as of August 31, 2010, as computed for federal income tax purposes, were as follows:

Aggregate cost	\$ 52,071,646
Gross unrealized appreciation	\$ 2,282,625
Gross unrealized depreciation	(3,886,389)
Net unrealized depreciation	\$ (1,603,764)

- (a) Non-income producing security.
- (b) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration to qualified institutional investors.
- (c) Represents a zero-coupon bond. Rate shown reflects the current yield as of report date.
- (d) Convertible security.
- (e) Represents a payment-in-kind security which may pay interest/dividends in additional face/shares.
- (f) Variable rate security. Rate shown is as of report date.
- (g) Issuer filed for bankruptcy and/or is in default of interest payments.
- (h) Represents a step-down bond that pays an initial coupon rate for the first period and then a lower coupon rate for the following periods. Rate shown is as of report date.
- (i) Other interests represent beneficial interest in liquidation trusts and other reorganization entities and are non-income producing.
- (j) Amount is less than \$1,000.
- (k) Warrants entitle the Trust to purchase a predetermined number of shares of common stock and are non-income producing. The purchase price and number of shares are subject to adjustment under certain conditions until the expiration date, if any.
- (l) Investments in companies considered to be an affiliate of the Trust during the year, for purposes of Section 2(a)(3) of the Investment Company Act of 1940, as amended, were as follows:

Edgar Filing: BLACKROCK CORPORATE HIGH YIELD FUND VI INC - Form N-CSR

Affiliate	Shares Held at at August 31, 2009	Net Activity	Shares Held at August 31, 2010	Income
BlackRock Liquidity Funds, TempFund, Institutional Class	2,180,193	(606,971)	1,573,222	\$ 2,723

(m) Represents the current yield as of report date.

See Notes to Financial Statements.

## Schedule of Investments (concluded)

## BlackRock High Yield Trust (BHY)

Credit default swaps on single-name issuers buy protection outstanding as of August 31, 2010 were as follows:

Issuer	Pay Fixed Rate	Counterparty	Expiration	Notional Amount (000)	Unrealized Depreciation
Brunswick Corp.	5.00%	Credit Suisse International	September 2014	\$ 70	\$ (3,699)

Credit default swaps on single-name issuers sold protection outstanding as of August 31, 2010 were as follows:

Issuer	Receive Fixed Rate	Counterparty	Expiration	Credit Rating <sup>1</sup>	Notional Amount (000) <sup>2</sup>	Unrealized Appreciation
Levi Strauss & Co.	5.00%	Deutsche Bank AG	June 2015	B+	\$ 55	\$ 168

<sup>1</sup> Using S&P's ratings of the issuer.

<sup>2</sup> The maximum potential amount the Trust may pay should a negative credit event take place as defined under the terms of the agreement.

For Trust compliance purposes, the Trust's industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or rating group indexes, and/or as defined by Trust management. This definition may not apply for purposes of this report, which may combine such industry sub-classifications for reporting ease.

Fair Value Measurements Various inputs are used in determining the fair value of investments and derivatives, which are as follows:

Level 1 price quotations in active markets/exchanges for identical assets and liabilities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust's own assumptions used in determining the fair value of investments and derivatives)

The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Trust's policy regarding valuation of investments and other significant accounting policies, please

## Edgar Filing: BLACKROCK CORPORATE HIGH YIELD FUND VI INC - Form N-CSR

refer to Note 1 of the Notes to Financial Statements.

The following tables summarize the inputs used as of August 31, 2010 in determining the fair valuation of the Trust's investments and derivatives:

Valuation Inputs	Level 1	Level 2	Level 3	Total
<b>Assets:</b>				
Investments in Securities:				
Long-Term Investments:				
Common Stocks	\$ 177,634	\$ 21,170	\$ 86,010	\$ 284,814
Corporate Bonds		39,870,340	1,514,877	41,385,217
Floating Rate Loan Interests		4,635,461	1,544,738	6,180,199
Other Interests		766,857	953	767,810
Preferred Securities	190,813		85,806	276,619
Warrants			1	1
Short-Term Securities	1,573,222			1,573,222
<b>Liabilities:</b>				
Unfunded loan commitments			(4,001)	(4,001)
<b>Total</b>	<b>\$ 1,941,669</b>	<b>\$ 45,293,828</b>	<b>\$ 3,228,384</b>	<b>\$ 50,463,881</b>

### Derivative Financial Instruments<sup>1</sup>

Valuation Inputs	Level 1	Level 2	Level 3	Total
<b>Assets:</b>				
Credit contracts		\$ 168		\$ 168
<b>Liabilities:</b>				
Credit contracts		(10,408)		(10,408)
<b>Total</b>		<b>\$ (10,240)</b>		<b>\$ (10,240)</b>

<sup>1</sup> Derivative financial instruments are swaps and options. Swaps are valued at the unrealized appreciation/depreciation on the instrument and options are shown at value.

The following is a reconciliation of Level 3 investments for which significant unobservable inputs were used to determine fair value:

	Common Stocks	Corporate Bonds	Floating Rate Loan Interests	Other Interests	Preferred Securities	Warrants	Unfunded Loan Commitments	Total
<b>Assets/Liabilities:</b>								
Balance, as of August 31, 2009		\$ 1,149,295	\$ 2,581,647	\$ 953		\$ 1		\$ 3,731,896
Accrued discounts/premiums		5,159	5,282					10,441
Net realized gain (loss)	\$ (957,501)	(208,002)	(557,300)					(1,722,803)
Net change in unrealized appreciation/depreciation <sup>2</sup>	957,501	1,278,827	1,633,274				\$ (4,001)	3,865,601
Purchases		27,502	3,200,033					3,227,535
Sales		(1,318,110)	(4,862,218)					(6,180,328)

Edgar Filing: BLACKROCK CORPORATE HIGH YIELD FUND VI INC - Form N-CSR

Transfers in <sup>3</sup>	86,010	663,793	680,543		\$ 85,806			1,516,152
Transfers out <sup>3</sup>		(83,587)	(1,136,523)					(1,220,110)
<b>Total</b>	<b>\$ 86,010</b>	<b>\$ 1,514,877</b>	<b>\$ 1,544,738</b>	<b>\$ 953</b>	<b>\$ 85,806</b>	<b>\$ 1</b>	<b>\$ (4,001)</b>	<b>\$ 3,228,384</b>

<sup>2</sup> Included in the related net change in unrealized appreciation/depreciation in the Statements of Operations. The net change in unrealized appreciation/depreciation on securities still held at August 31, 2010 was \$606,667.

<sup>3</sup> The Trust's policy is to recognize transfers in and transfers out as of the end of the period of the event or the change in circumstances that caused the transfer.

See Notes to Financial Statements.

## Schedule of Investments (continued)

BlackRock Income Opportunity Trust, Inc. (BNA)

\* The cost and unrealized appreciation (depreciation) of investments as of August 31, 2010, as computed for federal income tax purposes, were as follows:

Aggregate cost	\$ 546,874,632
Gross unrealized appreciation	\$ 37,100,850
Gross unrealized depreciation	(10,371,291)
Net unrealized appreciation	\$ 26,729,559

- (a) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration to qualified institutional investors.
- (b) Variable rate security. Rate shown is as of report date.
- (c) Non-income producing security.
- (d) All or a portion of security has been pledged as collateral in connection with swaps.
- (e) Issuer filed for bankruptcy and/or is in default of interest payments.
- (f) All or a portion of security has been pledged as collateral in connection with open reverse repurchase agreements.
- (g) Represents a step-up bond that pays an initial coupon rate for the first period and then a higher coupon rate for the following periods. Rate shown reflects the current yield as of report date.
- (h) Represents a payment-in-kind security which may pay interest/dividends in additional face/shares.
- (i) All or a portion of security has been pledged as collateral in connection with Term Asset-Backed Securities Loan Facility ( TALF ) Program.
- (j) Amount is less than \$1,000.
- (k) Other interests represent beneficial interest in liquidation trusts and other reorganization entities and are non-income producing.
- (l) Represents a zero-coupon bond. Rate shown reflects the current yield as of report date.
- (m) All or a portion of security has been pledged as collateral in connection with open financial futures contracts.
- (n) Represents or includes a to-be-announced ( TBA ) transaction. Unsettled TBA transactions as of report date were as follows:

Counterparty	Value	Unrealized Appreciation (Depreciation)
Credit Suisse Securities LLC	\$ (4,516,342)	\$ (10,748)

Edgar Filing: BLACKROCK CORPORATE HIGH YIELD FUND VI INC - Form N-CSR

<b>Total</b>				<b>\$ 617,527</b>

(a) Based on the change in return of the Consumer Price Index for All Urban Consumers and pays at maturity.

For Trust compliance purposes, the Trust's industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or rating group indexes, and/or as defined by Trust management. This definition may not apply for purposes of this report, which may combine such industry sub-classifications for reporting ease.

Fair Value Measurements Various inputs are used in determining the fair value of investments and derivatives, which are as follows:

Level 1 price quotations in active markets/exchanges for identical assets and liabilities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust's own assumptions used in determining the fair value of investments and derivatives)

The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Trust's policy regarding valuation of investments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

The following tables summarize the inputs used as of August 31, 2010 in determining the fair valuation of the Trust's investments and derivatives:

Edgar Filing: BLACKROCK CORPORATE HIGH YIELD FUND VI INC - Form N-CSR

Valuation Inputs	Level 1	Level 2	Level 3	Total

(b) Pays fixed interest rate and receives floating rate.

For Trust compliance purposes, the Trust's industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or rating group indexes, and/or as defined by Trust management. This definition may not apply for purposes of this report, which may combine such industry sub-classifications for reporting ease.

Fair Value Measurements Various inputs are used in determining the fair value of investments and derivatives, which are as follows:

Level 1 price quotations in active markets/exchanges for identical assets and liabilities

See Notes to Financial Statements.

## Schedule of Investments (concluded)

BlackRock Income Trust, Inc. (BKT)

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust's own assumptions used in determining the fair value of investments and derivatives)

The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Trust's policy regarding valuation of investments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

The following tables summarize the inputs used as of August 31, 2010 in determining the fair valuation of the Trust's investments and derivatives:

Valuation Inputs	Level 1	Level 2	Level 3	Total
<b>Assets:</b>				
Investments in Securities:				
Long-Term Investments:				
Asset-Backed Securities		\$ 12,245,496	\$ 1,261,564	\$ 13,507,060
Non-Agency Mortgage-Backed Securities		40,501,465	8,085,631	48,587,096
U.S. Government Sponsored Agency Securities		868,699,116	5,750,715	874,449,831

Valuation Inputs	Level 1	Level 2	Level 3	Total
<b>Assets (concluded):</b>				
U.S. Treasury Obligations		\$ 111,371,314		\$ 111,371,314
Short-Term Securities	\$ 857,657			857,657
<b>Liabilities:</b>				
Investments in Securities:				
Long-Term Investments:				
TBA Sale Commitments		(159,088,272)		(159,088,272)
TALF Loans		(11,739,534)		(11,739,534)
<b>Total</b>	\$ 857,657	\$ 861,989,585	\$ 15,097,910	\$ 877,945,152

Derivative Financial Instruments<sup>1</sup>

Valuation Inputs	Level 1	Level 2	Level 3	Total
<b>Assets:</b>				
Interest rate contracts	\$ 64,509	\$ 54,091,317		\$ 54,155,826
<b>Liabilities:</b>				
Interest rate contracts	(1,465,110)	(48,631,405)	\$ (3,446,023)	(53,542,538)
<b>Total</b>	\$ (1,400,601)	\$ 5,459,912	\$ (3,446,023)	\$ 613,288

- <sup>1</sup> Derivative financial instruments are swaps, financial futures contracts, interest rate floors and options. Financial futures contracts and swaps are valued at the unrealized appreciation/depreciation on the instrument and interest rate floors and options are shown at value.

The following table is a reconciliation of Level 3 investments for which significant unobservable inputs were used to determine fair value:

	Asset-Backed Securities	Corporate Bonds	Non-Agency Mortgage-Backed Securities	U.S. Government Sponsored Agency Securities	Total
<b>Assets:</b>					
Balance, as of August 31, 2009	\$ 3,536,160	\$ 582,709	\$ 21,006,613	\$ 14,122,541	\$ 39,248,023
Accrued discounts/premiums	(285,413)		(1,829,207)	(185,468)	(2,300,088)
Net realized gain (loss)				1,311,671	1,311,671
Net change in unrealized appreciation/depreciation <sup>2</sup>	3,329,905	17,640	1,009,436	(977,634)	3,379,347
Purchases		(2,447,899)			(2,447,899)
Sales		1,847,550	(3,335,945)	(8,520,395)	(10,008,790)
Transfers in <sup>3</sup>			5,679		5,679
Transfers out <sup>3</sup>	(5,319,088)		(8,770,945)		(14,090,033)
<b>Balance, as of August 31, 2010</b>	<b>\$ 1,261,564</b>		<b>\$ 8,085,631</b>	<b>\$ 5,750,715</b>	<b>\$ 15,097,910</b>

- <sup>2</sup> Included in the related net change in unrealized appreciation/depreciation in the Statements of Operations. The net change in unrealized appreciation/depreciation on securities still held at August 31, 2010 was \$(1,017,399).

The following table is a reconciliation of Level 3 derivative financial instruments for which significant unobservable inputs were used to determine fair value:

	Interest Rate Contracts
<b>Liabilities:</b>	
Balance, as of August 31, 2009	\$ (7,202,331)
Accrued discounts/premiums	
Net realized gain (loss)	278,833
Net change in unrealized appreciation/depreciation <sup>4</sup>	3,477,475
Purchases	
Sales	
Transfers in <sup>3</sup>	
Transfers out <sup>3</sup>	
<b>Balance, as of August 31, 2010</b>	<b>\$ (3,446,023)</b>

- <sup>3</sup> The Trust's policy is to recognize transfers in and transfers out as of the end of the period of the event or the change in circumstances that caused the transfer.

- <sup>4</sup> Included in the related net change in unrealized appreciation/depreciation in the Statements of Operations. The net change in unrealized appreciation/depreciation on securities still held at August 31, 2010 was \$3,477,475.

See Notes to Financial Statements.

Edgar Filing: BLACKROCK CORPORATE HIGH YIELD FUND VI INC - Form N-CSR

\* The cost and unrealized appreciation (depreciation) of investments as of August 31, 2010, as computed for federal income tax purposes, were as follows:

Aggregate cost	\$ 102,781,211
Gross unrealized appreciation	\$ 5,574,363
Gross unrealized depreciation	(2,398,917)
Net unrealized appreciation	\$ 3,175,446

- (a) Non-income producing security.
- (b) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration to qualified institutional investors.
- (c) Convertible security.
- (d) Represents a zero-coupon bond. Rate shown reflects the current yield as of report date.
- (e) Represents a payment-in-kind security which may pay interest/dividends in additional face/shares.
- (f) Variable rate security. Rate shown is as of report date.
- (g) Issuer filed for bankruptcy and/or is in default of interest payments.
- (h) Represents a step-down bond that pays an initial coupon rate for the first period and then a lower coupon rate for the following periods. Rate shown is as of report date.
- (i) Amount is less than \$1,000.
- (j) Other interests represent beneficial interest in liquidation trusts and other reorganization entities and are non-income producing.
- (k) Security is perpetual in nature and has no stated maturity date.
- (l) Warrants entitle the Trust to purchase a predetermined number of shares of common stock and are non-income producing. The purchase price and number of shares are subject to adjustment under certain conditions until the expiration date, if any.
- (m) Investments in companies considered to be an affiliate of the Trust during the year, for purposes of Section 2(a)(3) of the Investment Company Act of 1940, as amended, were as follows:

Affiliate	Shares Held at August 31, 2009	Net Activity	Shares Held at August 31, 2010	Income
BlackRock Liquidity Funds, TempFund, Institutional Class	4,155,886	(3,023,677)	1,132,209	\$3,384

- (n) Represents the current yield as of report date.

Financial futures contracts purchased as of August 31, 2010 were as follows:

Contracts	Issue	Exchange	Expiration Date	Notional Value	Unrealized Appreciation (Depreciation)
11	2-Year U.S. Treasury Bond	Chicago Mercantile	September 2010	\$ 2,410,157	\$ 3,656

MetLife, Inc.		1.00%	UBS AG	September 2015	A	\$ 175		117

<b>Total</b>	<b>\$ 5,843</b>
--------------	-----------------

<sup>1</sup> Using S&P's rating.

<sup>2</sup> The maximum potential amount the Trust may pay should a negative event take place as defined under the terms of agreement.

For Trust compliance purposes, the Trust's sector classifications refer to any one or more of the sector sub-classifications used by one or more widely recognized market indexes or ratings group indexes, and/or as defined by Trust management. This definition may not apply for purposes of this report, which may combine such sector sub-classifications for reporting ease.

Fair Value Measurements Various inputs are used in determining the fair value of investments and derivatives, which are as follows:

Level 1 price quotations in active markets/exchanges for identical assets and liabilities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust's own assumptions used in determining the fair value of investments and derivatives)

The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Trust's policy regarding valuation of investments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

The following tables summarize the inputs used as of August 31, 2010 in determining the fair valuation of the Trust's investments and derivatives:

Valuation Inputs	Level 1	Level 2	Level 3	Total
<b>Assets:</b>				
Investments in Securities:				
Common Stocks	\$ 197,471	\$ 19,800	\$ 13,235	\$ 230,506
Corporate Bonds		89,441,058	17,453	89,458,511
Floating Rate Loan Interests		7,961,531	3,420,874	11,382,405
Foreign Agency Obligations		435,740		435,740
Other Interests		1,422,686	191	1,422,877
Preferred Securities	425,246	1,403,708	65,455	1,894,409
Warrants				
Short-Term Securities	1,132,209			1,132,209
<b>Liabilities:</b>				
Unfunded Loan Commitments			(8,879)	(8,879)
<b>Total</b>	<b>\$ 1,754,926</b>	<b>\$ 100,684,523</b>	<b>\$ 3,508,329</b>	<b>\$ 105,947,778</b>

#### Derivative Financial Instruments<sup>1</sup>

Valuation Inputs	Level 1	Level 2	Level 3	Total
<b>Assets:</b>				

Edgar Filing: BLACKROCK CORPORATE HIGH YIELD FUND VI INC - Form N-CSR

Credit contracts		\$	17,806	\$	17,806	
Foreign currency exchange contracts			3,454		3,454	
Interest rate contracts	\$	31,096			31,096	
<b>Liabilities:</b>						
Credit contracts			(14,667)		(14,667)	
Interest rate contracts		(36,714)			(36,714)	
<b>Total</b>	\$	(5,618)	\$	6,593	\$	975

- <sup>1</sup> Derivative financial instruments are swaps, financial futures contracts, foreign currency exchange contracts and options. Swaps, financial futures contracts and foreign currency exchange contracts are valued at the unrealized appreciation/depreciation on the instrument and options are shown at value.

See Notes to Financial Statements.

## Schedule of Investments (concluded)

## BlackRock Strategic Bond Trust (BHD)

The following table is a reconciliation of Level 3 investments for which significant unobservable inputs were used to determine fair value:

	Common Stocks	Corporate Bonds	Floating Rate Loan Interests	Other Interests	Preferred Stocks	Unfunded Loan Commitments	Total
<b>Assets/Liabilities:</b>							
Balance, as of August 31, 2009		\$ 804,535	\$ 3,501,727	\$ 191			\$ 4,306,453
Accrued discounts/premiums		4,712	29,217				33,929
Realized gain (loss)		(64,033)	262,611				198,578
Change in unrealized appreciation/depreciation <sup>2</sup>		1,003,734	316,547			\$ (8,879)	1,311,402
Purchases		(409,208)	7,873,916				7,464,708
Sales		(1,153,048)	(9,605,509)				(10,758,557)
Transfers in <sup>3</sup>	\$ 13,235	16,653	2,114,419		\$ 65,455		2,209,762
Transfers out <sup>3</sup>		(185,892)	(1,072,054)				(1,257,946)
<b>Balance, as of August 31, 2010</b>	\$ 13,235	\$ 17,453	\$ 3,420,874	\$ 191	\$ 65,455	\$ (8,879)	\$ 3,508,329

<sup>2</sup> Included in the related net change in unrealized appreciation/depreciation in the Statements of Operations. The net change in unrealized appreciation/depreciation on securities still held at August 31, 2010 was \$19,543.

<sup>3</sup> The Trust's policy is to recognize transfers in and transfers out as of the end of the period of the event or the change in circumstances that caused the transfer.

See Notes to Financial Statements.

ANNUAL REPORT

AUGUST 31, 2010

95

## Notes to Financial Statements

### 1. Organization and Significant Accounting Policies:

BlackRock Core Bond Trust ( BHK ), BlackRock Corporate High Yield Fund V, Inc. ( HYV ), BlackRock Corporate High Yield Fund VI, Inc. ( HYT ), BlackRock High Income Shares ( HIS ), BlackRock High Yield Trust ( BHY ), BlackRock Income Opportunity Trust, Inc. ( BNA ), BlackRock Income Trust, Inc. ( BKT ) and BlackRock Strategic Bond Trust ( BHD ) (collectively the Trusts or individually as a Trust ) are registered under the Investment Company Act of 1940, as amended (the 1940 Act ), as diversified, closed-end management investment companies. HYV, HYT, BNA and BKT are organized as Maryland corporations. BHK, BHY and BHD are organized as Delaware statutory trusts. HIS is organized as a Massachusetts business trust. The Trusts' financial statements are prepared in conformity with accounting principles generally accepted in the United States of America ( US GAAP ), which may require management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from those estimates. The Boards of Directors and the Boards of Trustees of the Trusts are referred to throughout this report as the Board of Trustees or the Board. The Trusts determine and make available for publication the net asset values of their Common Shares on a daily basis.

The following is a summary of significant accounting policies followed by the Trusts:

**Valuation:** The Trusts fair value their financial instruments at market value using independent dealers or pricing services under policies approved by the Board. The Trusts value their bond investments on the basis of last available bid prices or current market quotations provided by dealers or pricing services. Floating rate loan interests are valued at the mean of the bid prices from one or more brokers or dealers as obtained from a pricing service. In determining the value of a particular investment, pricing services may use certain information with respect to transactions in such investments, quotations from dealers, pricing matrixes, market transactions in comparable investments, various relationships observed in the market between investments and calculated yield measures based on valuation technology commonly employed in the market for such investments. Asset-backed and mortgage-backed securities are valued by independent pricing services using models that consider estimated cash flows of each tranche of the security, establish a benchmark yield and develop an estimated tranche specific spread to the benchmark yield based on the unique attributes of the tranche. Financial futures contracts traded on exchanges are valued at their last sale price. To-be-announced ( TBA ) commitments are valued on the basis of last available bid prices or current market quotations provided by pricing services. Swap agreements are valued utilizing quotes received daily by the Trusts' pricing service or through brokers, which are derived using daily swap curves and models that incorporate a number of market data factors, such as discounted cash flows and trades and values of the underlying reference instruments. Investments in open-end investment companies are valued at net asset value each business day. Short-term securities with remaining maturities of 60 days or less may be valued at amortized cost, which approximates fair value.

Equity investments traded on a recognized securities exchange or the NASDAQ Global Market System are valued at the last reported sale price that day or the NASDAQ official closing price, if applicable. For equity investments traded on more than one exchange, the last reported sale price on the exchange where the stock is primarily traded is used. Equity investments traded on a recognized exchange for which there were no sales on that day are valued at the last available bid price. If no bid price is available, the prior day's price will be used, unless it is determined that such prior day's price no longer reflects the fair value of the security.

Securities and other assets and liabilities denominated in foreign currencies are translated into US dollars using exchange rates determined as of the close of business on the New York Stock Exchange ( NYSE ). Foreign currency exchange contracts are valued at the mean between the bid and ask prices and are determined as of the close of business on the NYSE. Interpolated values are derived when the settlement date of the contract is an interim date for which quotations are not available.

Exchange-traded options are valued at the mean between the last bid and ask prices at the close of the options market in which the options trade. An exchange-traded option for which there is no mean price is valued at the last bid (long positions) or ask (short positions) price. If no bid or ask price is available, the prior day's price will be used, unless it is determined that the prior day's price no longer reflects the fair value of the option. Over-the-counter ( OTC ) options and swaptions are valued by an independent pricing service using a mathematical model which incorporates a number of market data factors, such as the trades and prices of the underlying instruments.

In the event that application of these methods of valuation results in a price for an investment which is deemed not to be representative of the market value of such investment or is not available, the investment will be valued in accordance with a policy approved by the Board as reflecting fair value ( Fair Value Assets ). When determining the price for Fair Value Assets, the investment advisor and/or the sub-advisor seeks to determine the price that each Trust might reasonably expect to receive from the current sale of that asset in an arm's-length transaction. Fair value determinations shall be based upon all available factors that the investment advisor and/or sub-advisor deems relevant. The pricing of all Fair Value Assets is subsequently reported to the Board or a committee thereof.

## Edgar Filing: BLACKROCK CORPORATE HIGH YIELD FUND VI INC - Form N-CSR

Generally, trading in foreign instruments is substantially completed each day at various times prior to the close of business on the NYSE. Occasionally, events affecting the values of such instruments may occur between the foreign market close and the close of business on the NYSE that may not be reflected in the computation of each Trust's net assets. If events (for example, a company announcement, market volatility or a natural disaster) occur during such periods that are expected to materially affect the value of such instruments, those instruments may be Fair Value Assets and be valued at their fair values, as determined in good faith by the investment advisor using a pricing service and/or policies approved by the Board.

---

## Notes to Financial Statements (continued)

**Foreign Currency Transactions:** The Trusts' books and records are maintained in US dollars. Purchases and sales of investments are recorded at the rates of exchange prevailing on the date the transactions are entered into. Generally, when the US dollar rises in value against foreign currency, the Trusts' investments denominated in that currency will lose value because its currency is worth fewer US dollars; the opposite effect occurs if the US dollar falls in relative value.

The Trusts report foreign currency related transactions as components of realized gain (loss) for financial reporting purposes, whereas such components are treated as ordinary income for federal income tax purposes.

**Asset-Backed and Mortgaged-Backed Securities:** Certain Trusts may invest in asset-backed securities. Asset-backed securities are generally issued as pass-through certificates, which represent undivided fractional ownership interests in an underlying pool of assets, or as debt instruments, which are also known as collateralized obligations, and are generally issued as the debt of a special purpose entity organized solely for the purpose of owning such assets and issuing such debt. Asset-backed securities are often backed by a pool of assets representing the obligations of a number of different parties. The yield characteristics of certain asset-backed securities may differ from traditional debt securities. One such major difference is that all or a principal part of the obligations may be prepaid at any time because the underlying assets (i.e., loans) may be prepaid at any time. As a result, a decrease in interest rates in the market may result in increases in the level of prepayments as borrowers, particularly mortgagors, refinance and repay their loans. An increased prepayment rate with respect to an asset-backed security subject to such a prepayment feature will have the effect of shortening the maturity of the security. If the Trust has purchased such an asset-backed security at a premium, a faster than anticipated prepayment rate could result in a loss of principal to the extent of the premium paid.

Certain Trusts may purchase certain mortgage pass-through securities. There are a number of important differences among the agencies and instrumentalities of the US Government that issue mortgage-related securities and among the securities that they issue. For example, mortgage-related securities guaranteed by the Government National Mortgage Association (Ginnie Mae) are guaranteed as to the timely payment of principal and interest by Ginnie Mae and such guarantee is backed by the full faith and credit of the United States. However, mortgage-related securities issued by the Federal Home Loan Mortgage Corporation (Freddie Mac) and Federal National Mortgage Association (Fannie Mae), including Freddie Mac and Fannie Mae guaranteed Mortgage Pass-Through Certificates which are solely the obligations of Freddie Mac and Fannie Mae, are not backed by or entitled to the full faith and credit of the United States and are supported by the right of the issuer to borrow from the Treasury.

**Multiple Class Pass-Through Securities:** Certain Trusts may invest in multiple class pass-through securities, including collateralized mortgage obligations (CMOs) and commercial mortgage-backed securities. These multiple class securities may be issued by Ginnie Mae, US government agencies or instrumentalities or by trusts formed by private originators of, or investors in, mortgage loans. In general, CMOs are debt obligations of a legal entity that are collateralized by, and multiple class pass-through securities represent direct ownership interests in, a pool of residential or commercial mortgage loans or mortgage pass-through securities (the Mortgage Assets), the payments on which are used to make payments on the CMOs or multiple pass-through securities. Classes of CMOs include interest only (IOs), principal only (POs), planned amortization classes and targeted amortization classes. IOs and POs are stripped mortgage-backed securities representing interests in a pool of mortgages, the cash flow from which has been separated into interest and principal components. IOs receive the interest portion of the cash flow while POs receive the principal portion. IOs and POs can be extremely volatile in response to changes in interest rates. As interest rates rise and fall, the value of IOs tends to move in the same direction as interest rates. POs perform best when prepayments on the underlying mortgages rise since this increases the rate at which the principal is returned and the yield to maturity on the PO. When payments on mortgages underlying a PO are slower than anticipated, the life of the PO is lengthened and the yield to maturity is reduced. If the underlying mortgage assets experience greater than anticipated pre-payments of principal, the Trust may not fully recoup its initial investment in IOs.

**Capital Trusts:** These securities are typically issued by corporations, generally in the form of interest-bearing notes with preferred securities characteristics, or by an affiliated business trust of a corporation, generally in the form of beneficial interests in subordinated debentures or similarly structured securities. The securities can be structured as either fixed or adjustable coupon securities that can have either a perpetual or stated maturity date. Dividends can be deferred without creating an event of default or acceleration, although maturity cannot take place unless all cumulative payment obligations have been met. The deferral of payments does not affect the purchase or sale of these securities in the open market. Payments on these securities are treated as interest rather than dividends for federal income tax purposes. These securities can have a rating that is slightly below that of the issuing company's senior debt securities.

**Preferred Stock:** Certain Trusts may invest in preferred stocks. Preferred stock has a preference over common stock in liquidation (and generally in receiving dividends as well) but is subordinated to the liabilities of the issuer in all respects. As a general rule, the market value of preferred stock with a fixed dividend rate and no conversion element varies inversely with interest rates and perceived credit risk, while the

## Edgar Filing: BLACKROCK CORPORATE HIGH YIELD FUND VI INC - Form N-CSR

market price of convertible preferred stock generally also reflects some element of conversion value. Because preferred stock is junior to debt securities and other obligations of the issuer, deterioration in the credit quality of the issuer will cause greater changes in the value of a preferred stock than in a more senior debt security with similar stated yield characteristics. Unlike interest payments on debt securities, preferred stock dividends are payable only if declared by the issuer's board of directors. Preferred stock also may be subject to optional or mandatory redemption provisions.

**Floating Rate Loan Interests:** Certain Trusts may invest in floating rate loan interests. The floating rate loan interests the Trusts hold are typically issued to companies (the borrower) by banks, other financial institutions, and privately and publicly offered corporations (the lender). Floating rate loan

### Notes to Financial Statements (continued)

interests are generally non-investment grade, often involve borrowers whose financial condition is troubled or uncertain and companies that are highly levered. The Trusts may invest in obligations of borrowers who are in bankruptcy proceedings. Floating rate loan interests may include fully funded term loans or revolving lines of credit. Floating rate loan interests are typically senior in the corporate capital structure of the borrower. Floating rate loan interests generally pay interest at rates that are periodically determined by reference to a base lending rate plus a premium. The base lending rates are generally the lending rate offered by one or more European banks, such as LIBOR (London Inter Bank Offered Rate), the prime rate offered by one or more US banks or the certificate of deposit rate. Floating rate loan interests may involve foreign borrowers, and investments may be denominated in foreign currencies. The Trusts consider these investments to be investments in debt securities for purposes of their investment policies.

When a Trust buys a floating rate loan interest it may receive a facility fee and when it sells a floating rate loan interest it may pay a facility fee. On an ongoing basis, the Trusts may receive a commitment fee based on the undrawn portion of the underlying line of credit amount of a floating rate loan interest. The Trusts earn and/or pay facility and other fees on floating rate loan interests, which are shown as facility and other fees in the Statements of Operations. Facility and commitment fees are typically amortized to income over the term of the loan or term of the commitment, respectively. Consent and amendment fees are recorded to income as earned. Prepayment penalty fees, which may be received by the Trusts upon the prepayment of a floating rate loan interest by a borrower, are recorded as realized gains. The Trusts may invest in multiple series or tranches of a loan. A different series or tranche may have varying terms and carry different associated risks.

Floating rate loan interests are usually freely callable at the borrower's option. The Trusts may invest in such loans in the form of participations in loans ( Participations ) and assignments of all or a portion of loans from third parties. Participations typically will result in the Trusts having a contractual relationship only with the lender, not with the borrower. The Trusts will have the right to receive payments of principal, interest and any fees to which it is entitled only from the lender selling the Participation and only upon receipt by the lender of the payments from the borrower. In connection with purchasing Participations, the Trusts generally will have no right to enforce compliance by the borrower with the terms of the loan agreement, nor any rights of offset against the borrower, and the Trusts may not benefit directly from any collateral supporting the loan in which it has purchased the Participation. As a result, the Trusts will assume the credit risk of both the borrower and the lender that is selling the Participation. The Trusts' investment in loan participation interests involves the risk of insolvency of the financial intermediaries who are parties to the transactions. In the event of the insolvency of the lender selling the Participation, the Trusts may be treated as general creditors of the lender and may not benefit from any offset between the lender and the borrower.

**Borrowed Bond Agreements:** In a borrowed bond agreement, the Trusts borrow securities from a third party at an agreed upon rate, with the commitment that the securities be returned to the lender on an agreed-upon date. Borrowed bond agreements are primarily entered into to enable the Trusts to settle short bond positions. To support the borrowing, the Trusts' third party broker or prime broker takes possession of collateral of securities or cash that will be released upon termination of the borrowing. The value of the underlying collateral securities or cash approximates the market value of the borrowed bond transaction, including accrued interest. To the extent that borrowed bond transactions exceed one business day, the value of the collateral in the possession of the Trusts' prime broker or third party broker is marked to market on a daily basis to ensure the adequacy of the collateral. In the event of default by the counterparty and the value of noncash collateral increases, the Trusts' amount of loss is the unrealized gain of the collateral. Full realization of the collateral by the Trusts may be limited if the value of an investment purchased with the cash collateral by the lender decreases. The Trusts may also experience delays in gaining access to the collateral.

**TBA Commitments:** Certain Trusts may enter into TBA commitments. TBA commitments are forward agreements for the purchase or sale of mortgage-backed securities for a fixed price, with payment and delivery on an agreed-upon future settlement date. The specific securities to be delivered are not identified at the trade date; however, delivered securities must meet specified terms, including issuer, rate and mortgage terms. The Trusts generally enter into TBA commitments with the intent to take possession of or deliver the underlying mortgage-backed securities but can extend the settlement or roll the transaction. TBA commitments involve a risk of loss if the value of the security to be purchased or sold declines or increases, respectively, prior to settlement date.

**Mortgage Dollar Roll Transactions:** Certain Trusts may sell TBA mortgage-backed securities and simultaneously contract to repurchase substantially similar (same type, coupon and maturity) securities on a specific future date at an agreed-upon price. During the period between the sale and repurchase, the Trusts will not be entitled to receive interest and principal payments on the securities sold. The Trusts account for dollar roll transactions as purchases and sales and realizes gains and losses on these transactions. These transactions may increase the Trusts' portfolio turnover rate. Mortgage dollar rolls involve the risk that the market value of the securities that the Trusts are required to purchase may decline below the agreed upon repurchase price of those securities.

**Treasury Roll Transactions:** A treasury roll transaction involves the sale of a Treasury security, with an agreement to repurchase the same security at an agreed upon price and date. Treasury rolls constitute a borrowing and the difference between the sale and repurchase price represents interest expense at an agreed upon rate. Whether such a transaction produces a positive impact on performance depends upon whether the income on the securities purchased with the proceeds received from the sale of the security exceeds the interest expense incurred by the Trusts. For accounting purposes, treasury rolls are not considered purchases and sales and any gains or losses incurred on the treasury rolls will be deferred until the Treasury securities are disposed.

---

## Notes to Financial Statements (continued)

Treasury roll transactions involve the risk that the market value of the securities that the Trusts are required to purchase may decline below the agreed upon purchase price of those securities. If investment performance of securities purchased with proceeds from these transactions does not exceed the income, capital appreciation and gain or loss that would have been realized on the securities sold as part of the treasury roll, the use of this technique will adversely impact the investment performance of the Trusts.

**Reverse Repurchase Agreements:** Certain Trusts may enter into reverse repurchase agreements with qualified third party broker-dealers. In a reverse repurchase agreement, the Trusts sell securities to a bank or broker-dealer and agrees to repurchase the same securities at a mutually agreed upon date and price. Certain agreements have no stated maturity and can be terminated by either party at any time. Interest on the value of the reverse repurchase agreements issued and outstanding is based upon competitive market rates determined at the time of issuance. The Trusts may utilize reverse repurchase agreements when it is anticipated that the interest income to be earned from the investment of the proceeds of the transaction is greater than the interest expense of the transaction. Reverse repurchase agreements involve leverage risk and also the risk that the market value of the securities that the Trusts are obligated to repurchase under the agreement may decline below the repurchase price. In the event the buyer of securities under a reverse repurchase agreement files for bankruptcy or becomes insolvent, the Trusts' use of the proceeds of the agreement may be restricted while the other party, or its trustee or receiver, determines whether or not to enforce the Trusts' obligation to repurchase the securities.

**Zero-Coupon Bonds:** The Trusts may invest in zero-coupon bonds, which are normally issued at a significant discount from face value and do not provide for periodic interest payments. Zero-coupon bonds may experience greater volatility in market value than similar maturity debt obligations which provide for regular interest payments.

**Segregation and Collateralization:** In cases in which the 1940 Act and the interpretive positions of the Securities and Exchange Commission (SEC) require that the Trusts either deliver collateral or segregate assets in connection with certain investments (e.g., dollar rolls, TBA sale commitments, financial futures contracts, foreign currency exchange contracts, swaps, short sales and options written), or certain borrowings (e.g., reverse repurchase agreements, treasury roll transactions, TALF loans and loan payable) the Trusts will, consistent with SEC rules and/or certain interpretive letters issued by the SEC, segregate collateral or designate on their books and records cash or other liquid securities having a market value at least equal to the amount that would otherwise be required to be physically segregated. Furthermore, based on requirements and agreements with certain exchanges and third party broker-dealers, each party has requirements to deliver/deposit securities as collateral for certain investments.

**Investment Transactions and Investment Income:** For financial reporting purposes, investment transactions are recorded on the dates the transactions are entered into (the trade dates). Realized gains and losses on investment transactions are determined on the identified cost basis. Dividend income is recorded on the ex-dividend dates. Dividends from foreign securities where the ex-dividend date may have passed are subsequently recorded when the Trusts have determined the ex-dividend date. Under the applicable foreign tax laws, a withholding tax at various rates may be imposed on capital gains, dividends and interest. Interest income, including amortization of premium and accretion of discount on debt securities, is recognized on the accrual basis. Consent fees are compensation for agreeing to changes in the terms of debt instruments and are included in facility and other fees in the Statements of Operations.

**Dividends and Distributions:** Dividends from net investment income are declared and paid monthly. Distributions of capital gains are recorded on the ex-dividend dates. If the total dividends and distributions made in any tax year exceeds net investment income and accumulated realized capital gains, a portion of the total distribution may be treated as a tax return of capital. The amount and timing of dividends and distributions are determined in accordance with federal income tax regulations, which may differ from US GAAP.

**Income Taxes:** It is each Trust's policy to comply with the requirements of the Internal Revenue Code of 1986, as amended, applicable to regulated investment companies and to distribute substantially all of its taxable income to its shareholders. Therefore, no federal income tax provision is required.

Each Trust files US federal and various state and local tax returns. No income tax returns are currently under examination. The statute of limitations on BHY, BNA, BKT and BHD's US federal tax returns remains open for the year ended October 31, 2007, the period ended August 31, 2008 and for each of the two years ended August 31, 2010. The statute of limitations on BHK and HIS's US federal tax returns remains open for the year ended December 31, 2007, the period ended August 31, 2008 and for each of the two years ended August 31, 2010. The statutes of limitations on HYV and HYT's tax returns remains open for each of the four years ended August 31, 2010. The statutes of limitations on the Trusts' state and local tax returns may remain open for an additional year depending upon the jurisdiction. There are no uncertain tax positions that require recognition of a tax liability.

**Deferred Compensation and BlackRock Closed-End Share Equivalent Investment Plan:** Under the deferred compensation plan approved by each Trust's Board, non-interested Trustees ( Independent Trustees ) may defer a portion of their annual complex-wide compensation. Deferred amounts earn an approximate return as though equivalent dollar amounts had been invested in common shares of certain other BlackRock Closed-End Funds selected by the Independent Trustees. This has approximately the same economic effect for the Independent Trustees as if the Independent Trustees had invested the deferred amounts directly in certain other BlackRock Closed-End Funds.

The deferred compensation plan is not funded and obligations thereunder represent general unsecured claims against the general assets of each Trust. Each Trust may, however, elect to invest in common shares of certain other BlackRock Closed-End Funds selected by the Independent Trustees in order to match its deferred compensation obligations. Investments to cover each Trust's deferred compensation liability, if any, are included in other assets in the Statements of Assets and Liabilities. Dividends and distributions from the BlackRock Closed-End Fund investments under the plan are included in dividends affiliated in the Statements of Operations.

---

## Notes to Financial Statements (continued)

**Other:** Expenses directly related to a Trust are charged to that Trust. Other operating expenses shared by several funds are pro rated among those funds on the basis of relative net assets or other appropriate methods. The Trusts have an arrangement with the custodian whereby fees may be reduced by credits earned on uninvested cash balances, which if applicable are shown as fees paid indirectly in the Statements of Operations. The custodian imposes fees on overdrawn cash balances, which can be offset by accumulated credits earned or may result in additional custody charges.

### 2. Derivative Financial Instruments:

The Trusts engage in various portfolio investment strategies using derivative contracts both to increase the returns of the Trusts and to economically hedge, or protect, their exposure to certain risks such as credit risk, equity risk, interest rate risk, foreign currency exchange rate risk or other risk (inflation risk). These contracts may be transacted on an exchange or OTC.

Losses may arise if the value of the contract decreases due to an unfavorable change in the market rates or values of the underlying instrument or if the counterparty does not perform under the contract. The Trusts' maximum risk of loss from counterparty credit risk on OTC derivatives is generally the aggregate unrealized gain netted against any collateral pledged by/posted to the counterparty. For OTC options purchased, the Trusts bear the risk of loss in the amount of the premiums paid plus the positive change in market values net of any collateral received on the options should the counterparty fail to perform under the contracts. Options written by the Trusts do not give rise to counterparty credit risk, as options written obligate the Trusts to perform and not the counterparty. Counterparty risk related to exchange-traded financial futures contracts and options is deemed to be minimal due to the protection against defaults provided by the exchange on which these contracts trade.

The Trusts may mitigate counterparty risk by procuring collateral and through netting provisions included within an International Swaps and Derivatives Association, Inc. ( ISDA ) Master Agreement implemented between a Trust and each of its respective counterparties. The ISDA Master Agreement allows each Trust to offset with each separate counterparty certain derivative financial instrument s payables and/or receivables with collateral held. The amount of collateral moved to/from applicable counterparties is generally based upon minimum transfer amounts of up to \$500,000. To the extent amounts due to the Trusts from their counterparties are not fully collateralized contractually or otherwise, the Trusts bear the risk of loss from counterparty non-performance. See Note 1 Segregation and Collateralization for information with respect to collateral practices. In addition, the Trusts manage counterparty risk by entering into agreements only with counterparties that it believes have the financial resources to honor their obligations and by monitoring the financial stability of those counterparties.

Certain ISDA Master Agreements allow counterparties to OTC derivatives to terminate derivative contracts prior to maturity in the event the Trusts' net assets decline by a stated percentage or the Trusts fail to meet the terms of its ISDA Master Agreements, which would cause the Trusts to accelerate payment of any net liability owed to the counterparty.

**Financial Futures Contracts:** The Trusts purchase or sell financial futures contracts and options on financial futures contracts to gain exposure to, or economically hedge against, changes in interest rates (interest rate risk) or in the values of equity securities (equity risk). Financial futures contracts are contracts for delayed delivery of securities or currencies at a specific future date and at a specific price or yield. Pursuant to the contract, the Trusts agree to receive from or pay to the broker an amount of cash equal to the daily fluctuation in value of the contract. Such receipts or payments are known as margin variation and are recognized by the Trusts as unrealized gains or losses. When the contract is closed, the Trusts record a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed. The use of financial futures transactions involves the risk of an imperfect correlation in the movements in the price of financial futures contracts, interest rates and the underlying assets.

**Foreign Currency Exchange Contracts:** The Trusts enter into foreign currency exchange contracts as an economic hedge against either specific transactions or portfolio instruments or to obtain exposure to foreign currencies (foreign currency exchange rate risk). A foreign currency exchange contract is an agreement between two parties to buy and sell a currency at a set exchange rate on a future date. Foreign currency exchange contracts, when used by the Trusts, help to manage the overall exposure to the currency backing some of the investments held by the Trusts. The contract is marked-to-market daily and the change in market value is recorded by the Trusts as an unrealized gain or loss. When the contract is closed, the Trusts record a realized gain or loss equal to the difference between the value at the time it was opened and the value at the time it was closed. The use of foreign currency exchange contracts involves the risk that the value of a foreign currency exchange contract changes unfavorably due to movements in the value of the referenced foreign currencies and the risk that a counterparty to the contract does not perform its obligations under the agreement.

**Options:** The Trusts purchase and write call and put options to increase or decrease their exposure to underlying instruments (including equity risk and/or interest rate risk) and/or, in the case of options written, to generate gains from options premiums. A call option gives the purchaser of the option the right (but not the obligation) to buy, and obligates the seller to sell (when the option is exercised), the underlying instrument at the exercise price at any time or at a specified time during the option period. A put option gives the holder the right to sell and obligates the writer to buy the underlying instrument at the exercise price at any time or at a specified time during the option period. When the Trusts purchase (write) an option, an amount equal to the premium paid (received) by the Trusts is reflected as an asset (liability). The amount of the asset (liability) is subsequently marked-to-market to reflect the current market value of the option purchased (written). When an instrument is purchased or sold through an exercise of an option, the related premium paid (or received) is added to (or deducted from) the basis of the instrument acquired or deducted from (or added to) the proceeds of the instrument sold. When an option expires (or the Trusts enter into a closing transaction), the Trusts realize a gain or loss on the option to the extent of the premiums received or paid (or gain or loss to the extent the cost of the closing transaction exceeds the premiums received or paid). When the Trusts

---

## Notes to Financial Statements (continued)

write a call option, such option is covered, meaning that the Trusts hold the underlying instrument subject to being called by the option counterparty, or cash in an amount sufficient to cover the obligation. When the Trusts write a put option, such option is covered by cash in an amount sufficient to cover the obligation.

Options on swaps (swaptions) are similar to options on securities except that instead of selling or purchasing the right to buy or sell a security, the writer or purchaser of the swap option is granting or buying the right to enter into a previously agreed upon interest rate or credit default swap agreement at any time before the expiration of the option.

The Trusts also purchase or sell listed or OTC foreign currency options, foreign currency futures and related options on foreign currency futures as a short or long hedge against possible variations in foreign exchange rates or to gain exposure to foreign currencies. When foreign currency is purchased or sold through an exercise of a foreign currency option, the related premium paid (or received) is added to (or deducted from) the basis of the foreign currency acquired or deducted from (or added to) the proceeds of the foreign currency sold. Such transactions may be effected with respect to hedges on non-US dollar denominated instruments owned by the Trusts but not yet delivered, or committed or anticipated to be purchased by the Trusts.

In purchasing and writing options, the Trusts bear the risk of an unfavorable change in the value of the underlying instrument or the risk that the Trusts may not be able to enter into a closing transaction due to an illiquid market. Exercise of an option written could result in the Trusts purchasing or selling a security at a price different from the current market value.

**Swaps:** The Trusts enter into swap agreements, in which the Trusts and a counterparty agree to make periodic net payments on a specified notional amount. These periodic payments received or made by the Trusts are recorded in the Statements of Operations as realized gains or losses, respectively. Any upfront fees paid are recorded as assets and any upfront fees received are recorded as liabilities and amortized over the term of the swap. Swaps are marked-to-market daily and changes in value are recorded as unrealized appreciation (depreciation). When the swap is terminated, the Trusts will record a realized gain or loss equal to the difference between the proceeds from (or cost of) the closing transaction and the Trusts' basis in the contract, if any. Generally, the basis of the contracts is the premium received or paid. Swap transactions involve, to varying degrees, elements of interest rate, credit and market risk in excess of the amounts recognized in the Statements of Assets and Liabilities. Such risks involve the possibility that there will be no liquid market for these agreements, that the counterparty to the agreements may default on its obligation to perform or disagree as to the meaning of the contractual terms in the agreements, and that there may be unfavorable changes in interest rates and/or market values associated with these transactions.

**Credit default swaps** The Trusts enter into credit default swaps to manage their exposure to the market or certain sectors of the market, to reduce their risk exposure to defaults of corporate and/or sovereign issuers or to create exposure to corporate and/or sovereign issuers to which they are not otherwise exposed (credit risk). The Trusts enter into credit default agreements to provide a measure of protection against the default of an issuer (as buyer protection) and/or gain credit exposure to an issuer to which it is not otherwise exposed (as seller of protection). The Trusts may either buy or sell (write) credit default swaps on single-name issuers (corporate or sovereign), a combination or basket of single-name issuers or traded indexes. Credit default swaps on single-name issuers are agreements in which the buyer pays fixed periodic payments to the seller in consideration for a guarantee from the seller to make a specific payment should a negative credit event take place (e.g., bankruptcy, failure to pay, obligation accelerators, repudiation, moratorium or restructuring). Credit default swaps on traded indexes are agreements in which the buyer pays fixed periodic payments to the seller in consideration for a guarantee from the seller to make a specific payment should a write-down, principal or interest shortfall or default of all or individual underlying securities included in the index occurs. As a buyer, if an underlying credit event occurs, the Trusts will either receive from the seller an amount equal to the notional amount of the swap and deliver the referenced security or underlying securities comprising of an index or receive a net settlement of cash equal to the notional amount of the swap less the recovery value of the security or underlying securities comprising of an index. As a seller (writer), if an underlying credit event occurs, the Trusts will either pay the buyer an amount equal to the notional amount of the swap and take delivery of the referenced security or underlying securities comprising of an index or pay a net settlement of cash equal to the notional amount of the swap less the recovery value of the security or underlying securities comprising of an index.

**Total return swaps** The Trusts enter into total return swaps to obtain exposure to a security or market without owning such security or investing directly in that market or to transfer the risk/return of one market (e.g., fixed income) to another market (e.g., equity) (equity risk and/or interest rate risk). Total return swaps are agreements in which there is an exchange of cash flows whereby one party commits to make payments based on the total return (coupons plus capital gains/losses) of an underlying instrument in exchange for fixed or floating rate interest payments. To the extent the total return of the instrument or index underlying the transaction exceeds or falls short of

the offsetting interest rate obligation, the Trusts will receive a payment from or make a payment to the counterparty.

**Interest rate swaps** The Trusts enter into interest rate swaps to gain or reduce exposure to or manage duration, the yield curve or interest rate risk by economically hedging the value of the fixed rate bonds which may decrease when interest rates rise (interest rate risk). Interest rate swaps are agreements in which one party pays a stream of interest payments, either fixed or floating rate, for another party's stream of interest payments, either fixed or floating, on the same notional amount for a specified period of time. Interest rate floors, which are a type of interest rate swap, are agreements in which one party agrees to make payments to the other party to the extent that interest rates fall below a specified rate or floor in return for a premium. In more complex swaps, the notional principal amount may decline (or amortize) over time.

**3. Investment Advisory Agreement and Other Transactions with Affiliates:**

The PNC Financial Services Group, Inc. ( PNC ), Bank of America Corporation ( BAC ) and Barclays Bank PLC ( Barclays ) are the largest stockholders of BlackRock, Inc. ( BlackRock ). Due to the ownership structure, PNC is an affiliate of the Trusts for 1940 Act purposes, but BAC and Barclays are not. Each Trust entered into an Investment Advisory Agreement with BlackRock Advisors, LLC (the Manager ), the Trusts investment advisor, an indirect, wholly owned subsidiary of BlackRock, to provide investment advisory services for each Trust and administration services for BHK, HYV, HYT, HIS and BHD.

## Notes to Financial Statements (continued)

The following Trusts' investment advisory fee paid to the Manager is computed weekly and payable monthly based on an annual rate of each Trust's average total assets (including any assets attributable to borrowings) minus the sum of total liabilities (other than debt representing financial leverage):

BHK	0.55%
HIS	0.75% of the first \$200 million and 0.50% thereafter
BHY	1.05%
BHD	0.75%

The following Trusts' investment advisory fee paid to the Manager is computed daily and payable monthly based on an annual rate of each Trust's average total assets (including any assets attributable to borrowings) minus the sum of total liabilities (other than debt representing financial leverage):

HYV	0.60%
HYT	0.70%

The following Trusts' investment advisory fee paid to the Manager is computed weekly and payable monthly based on an annual rate of each Trust's average net assets:

BNA	0.60%
BKT	0.65%

The Manager voluntarily agreed to waive a portion of the investment advisory fees or other expenses on BHD by 0.05% of its average weekly managed assets through February 28, 2010. BHD waived \$22,435, which is included in fees waived by advisor in the Statements of Operations.

BHY, BNA and BKT each have an Administration Agreement with the Manager. The administration fee paid to the Manager is computed weekly and payable monthly based on an annual rate, 0.10% for BNA, and 0.15% for BKT, of each Trust's average net assets and 0.10% for BHY of the Trust's average weekly total assets.

The Manager voluntarily agreed to waive its investment advisory fees by the amount of investment advisory fees each Trust pays to the Manager indirectly through its investment in affiliated money market funds; however, the Manager does not waive its investment advisory fees by the amount of investment advisory fees paid through each Trust's investment in other affiliated investment companies, if any. These amounts are included in fees waived by advisor in the Statements of Operations. For the year ended August 31, 2010, the amounts waived were as follows:

BHK	\$	1,893
HYV	\$	1,917
HYT	\$	2,111
HIS	\$	1,309
BHY	\$	1,241
BNA	\$	2,171
BKT	\$	112,085
BHD	\$	1,338

## Edgar Filing: BLACKROCK CORPORATE HIGH YIELD FUND VI INC - Form N-CSR

The Manager entered into a separate sub-advisory agreement with BlackRock Financial Management, Inc. ( BFM ), an affiliate of the Manager with respect to BHK, HYV, HYT, HIS, and BHD. The Manager pays BFM for services it provides, a monthly fee that is a percentage of the investment advisory fees paid by each Trust to the Manager.

For the year ended August 31, 2010, certain Trusts reimbursed the Manager for certain accounting services, which are included in accounting services in the Statements of Operations. The reimbursements were as follows:

BHK	\$ 9,657
HYV	\$ 8,683
HYT	\$ 8,999
HIS	\$ 2,684
BHD	\$ 1,885

Certain officers and/or trustees of the Trusts are officers and/or directors of BlackRock or its affiliates. The Trusts reimburse the Manager for compensation paid to the Trusts Chief Compliance Officer.

#### 4. Income Tax Information:

**Reclassifications:** US GAAP requires that certain components of net assets be adjusted to reflect permanent differences between financial and tax reporting. These reclassifications have no effect on net assets or net asset values per share. The following permanent differences as of August 31, 2010 attributable to the accounting for swap agreements, amortization and accretion methods on fixed income securities, foreign currency transactions, non-deductible expenses, securities in default, income recognized from pass-through entities, the classification of settlement proceeds, distributions paid in excess of taxable income and the expiration of capital loss carryforwards were reclassified to the following accounts:

	BHK	HYV	HYT	HIS	BHY	BNA	BKT	BHD
Paid-in capital			\$ (43)	\$ (102,576,339)	\$ (8,468,860)		\$ (783,751)	
Undistributed (distributions in excess of) net investment income	\$ 1,878,831	\$ 3,306,857	\$ 3,486,622	\$ 904,506	\$ 2,222	\$ 4,121,073	\$ (2,432,620)	\$ 292,491
Accumulated net realized gain (loss)	\$ (1,878,831)	\$ (3,306,857)	\$ (3,486,579)	\$ 101,671,833	\$ 8,466,638	\$ (4,121,073)	\$ 3,216,371	\$ (292,491)

## Notes to Financial Statements (continued)

The tax character of distributions paid during the fiscal years ended August 31, 2010 and August 31, 2009 was as follows:

	BHK	HYV	HYT	HIS	BHY	BNA	BKT	BHD
Ordinary income								
8/31/2010	\$ 27,023,027	\$ 33,602,969	\$ 35,992,789	\$ 9,230,927	\$ 3,246,508	\$ 27,117,163	\$ 16,803,787	\$ 6,391,382
8/31/2009	20,703,556	39,697,493	42,020,500	11,459,895	3,522,285	21,085,255	18,415,450	6,204,335
Long-term capital gains								
8/31/2010							1,611,663	
Tax return of capital								
8/31/2010					108,660			
8/31/2009					118,809			
Total distributions								
8/31/2010	\$ 27,023,027	\$ 33,602,969	\$ 35,992,789	\$ 9,230,927	\$ 3,355,168	\$ 27,117,163	\$ 18,415,450	\$ 6,391,382
8/31/2009	\$ 20,703,556	\$ 39,697,493	\$ 42,020,500	\$ 11,459,895	\$ 3,641,094	\$ 21,085,255	\$ 18,415,450	\$ 6,204,335

As of August 31, 2010, the tax components of accumulated net earnings (losses) were as follows:

	BHK	HYV	HYT	HIS	BHY	BNA	BKT	BHD
Undistributed ordinary income								
	\$ 7,121,433	\$ 7,065,266	\$ 7,864,723	\$ 3,292,165		\$ 6,617,192		\$ 1,547,611
Capital loss carryforwards								
	(25,062,853)	(83,968,877)	(99,724,971)	(66,989,586)	\$ (17,763,693)	(37,862,770)		(7,248,848)
Net unrealized gains (losses)*								
	22,809,046	(10,313,303)	(11,489,189)	(1,439,362)	(2,620,220)	27,078,408	\$ 17,717,605	3,044,756
<b>Total</b>	\$ 4,867,626	\$ (87,216,914)	\$ (103,349,437)	\$ (65,136,783)	\$ (20,383,913)	\$ (4,167,170)	\$ 17,717,605	\$ (2,656,481)

\* The differences between book-basis and tax-basis net unrealized gains (losses) were attributable primarily to the tax deferral of losses on wash sales, amortization and accretion methods of premiums and discounts on fixed income securities, the accrual of income on securities in default, the realization for tax purposes of unrealized gains/losses on certain futures and foreign currency exchange contracts, the deferral of post-October currency and capital losses for tax purposes, the timing and recognition of partnership income, the accounting for swap agreements, the deferral of compensation to trustees and other book/tax differences.

As of August 31, 2010, the Trusts had capital loss carryforwards available to offset future realized capital gains through the indicated expiration dates:
