- A Treasury Inflation-Protected Security - Treasury security whose principal value is adjusted daily in accordance with changes to the Consumer Price Index for All Urban Consumers. Interest is calculated on the basis of the current adjusted principal value.
- B All or a portion of this security is on loan.
- C All or a portion of this security is collateral to cover futures and options contracts written.
- D Rule 144a Security - A security purchased pursuant to Rule 144a under the Securities Act of 1933 which may not be resold subject to that rule except to qualified institutional buyers. These securities, which the Fund's investment adviser has determined to be liquid, represent 2.69% of net assets.
- E Stepped Coupon Security - A security with a predetermined schedule of interest or dividend rate changes at which time it begins to accrue interest or pay dividends according to the predetermined schedule.
- F Credit Linked Security - The rates of interest earned on these securities are tied to the credit rating assigned by Standard & Poor's Rating Service and/or Moody's Investors Services.
- G Yankee Bond - A dollar-denominated bond issued in the U.S. by foreign entities.
- H Aggregate cost for federal income tax purposes is substantially the same as book cost. At September 30, 2007, the aggregate gross unrealized appreciation and depreciation of investments for federal income tax purposes were substantially as follows:

| | |
|------------------------------------|-----------------|
| Gross unrealized appreciation | \$ 7,277 |
| Gross unrealized depreciation | (3,058) |
| Net unrealized appreciation | \$ 4,219 |

- I Options and futures are described in more detail in the notes to financial statements.

Security Valuation

The Fund's securities are valued on the basis of readily available market quotations or, lacking such quotations, at fair value as determined under policies approved by and under the general oversight of the Board of Trustees. In determining fair value, all relevant qualitative and quantitative factors available are considered. These factors are subject to change over time and are reviewed periodically. The Fund may use fair value pricing instead of market quotations to value one or more securities if the Fund believes that, because of special circumstances, doing so would more accurately reflect the prices the Fund expects to realize on the current sale of those securities. Further, because of the inherent uncertainty of valuation, those estimated values may differ significantly from quoted or published values or from the values that would have been used had a ready market for the investments existed, and the differences could be material.

With respect to the Fund, where a security is traded on more than one market, which may include foreign markets, the securities are generally valued on the market considered by the Fund's adviser to be the primary market. The Fund will value its foreign securities in U.S. dollars on the basis of the then-prevailing exchange rates.

Securities Lending

The Fund may lend its securities to approved brokers to earn additional income, and will receive cash and U.S. government securities as collateral against the loans. Cash collateral received is invested in a money market pooled account by the Fund's lending agent. Collateral is maintained over the life of the loan in an amount not less than 100% of the value of the loaned securities. At September 30, 2007, the market value of the securities on loan to broker-dealers was \$95,234 for which the fund received collateral of \$97,202 in cash. Such collateral is in the Fund's possession of the Fund's custodian. The cash invested in the State Street Navigator Securities Lending Prime Portfolio is included in the

Fund's portfolio of investments. As with other extensions of credit, the Fund may bear the risk of delay in recovery or even loss of rights to the collateral should the borrower of the securities fail financially.

Options, Futures and Swap Agreements

The current market value of an exchange traded option is the last sale price or, in the absence of a sale, the price obtained by reference to broker-dealer quotations. Futures contracts are valued daily at the settlement price established by the board of trade or exchange on which they are traded. Futures contracts are marked-to-market on a daily basis. As the contract's value fluctuates, payments known as variation margin are made or received by the Fund each day, depending on the daily fluctuation in the value of the contract. The daily changes in contract value are recorded as unrealized gains or losses, and the Fund recognizes a gain or loss when the contract is closed.

Swap agreements are generally priced daily based upon quotations from brokers and the change, if any, is recorded as unrealized appreciation or depreciation.

Credit default swaps (denoted in the table below by a superscript 1) involve the exchange of a fixed rate premium for protection against the loss in value of an underlying debt instrument in the event of a defined credit event (such as payment default or bankruptcy). Interest rate swap contracts (denoted in the table below by a superscript 2) involve the exchange of commitments to pay and receive interest based on a notional principal amount. Commodity swaps (denoted in the table below by a superscript 3) are agreements to exchange cash flows at specified intervals to gain investment exposure to the relevant spread of commodity reference prices. Total return swaps (denoted in the table below by a superscript 4) are agreements to exchange the return generated by one instrument for the return generated by another instrument.

If the fund is a seller of protection and a credit event occurs, as defined under the terms of the particular swap agreement, the portfolio will pay to the buyer of the protection an amount up to the notional value of the swap and in certain instances, take delivery of the security.

As of September 30, 2007, the one-and three-month London Interbank Offered Rates were 5.12% and 5.23%, respectively. The year-to-date Dow Jones-AIG Commodity Total Return Index return was 10.98%. The Lehman Brothers US ABS AAA Floating Home Equities In4dex was 5.33%. The 28 day Mexican Interbank Deposit Rate was 7.68%.

The following is a summary of open credit default swap contracts outstanding at September 30, 2007:

| | | The Fund | The Fund | Contract Notional | Unrealized Appreciation/ (Depreciation) |
|-----------------------------|-------------------|------------------|--------------|-------------------|---|
| Agreement With: | Termination Date | Agrees to Pay | Will Receive | Amount | |
| Barclays Capital Inc. | June 20, 2012 | Specified amount | 0.35% | \$ 19,100 | \$ (22) |
| (CDX IG 8) ¹ | | upon credit | Quarterly | | |
