As a consequence of the application of the unifying accounting standards approved by the Comisión Nacional de Valores (CNV), which require that consolidated Financial Statements be presented as established by Technical Resolution No. 21 of the Federación Argentina de Consejos Profesionales de Ciencias Económicas (FACPCE), the Balance Sheet as of March 31, 2009 and 2008 and the Statements of Income and the Statements of Cash Flows for the periods ended on those dates were consolidated on a line by line basis with the financial statements of such companies in which it holds a majority of the voting shares.

During the semester ended December 31, 2008, the Company acquired directly and indirectly 68,712,008 additional shares of IRSA Inversiones y Representaciones Sociedad Anónima (IRSA). The consolidated financial statements as of June 30, 2008 and as of March 31, 2008, disclosed in comparative balances do not include information consolidated with IRSA (See Note 18).

(ex Agropecuaria Cervera S.A.) as of March 31, 2009 and 2008 have been used in order to determine line by line consolidation. Likewise, as the companies FyO Trading S.A. and Agrology S.A were organized on May 2 and 8, 2008, respectively, their financial statements are only consolidated as of March 31, 2009 and June 30, 2008.

For purposes of comparability, certain reclassifications have been made on the information as of June 30, 2008 and March 31, 2008.

The consolidated statement of Income as of March 31, 2009, includes income (loss) of IRSA Inversiones y Representaciones Sociedad Anónima from October 1 through March 31, 2009.

The Financial Statements of the Subsidiary Companies mentioned in Note 2 have been prepared based on accounting principles consistent with those followed by Cresud Sociedad Anónima Comercial, Inmobiliaria, Financiera y Agropecuaria for the preparation of its Financial Statements, as detailed in Note 2 of the basic financial statements.

High relevant valuation and disclosure criteria applied in preparing the financial statements of consolidated companies and not explained in the valuation criteria note of the holding company are as follows:

a) **Revenue recognition**

Real Estate Business

1) **Revenue recognition of IRSA Inversiones y Representaciones Sociedad Anónima**

Sales of properties

IRSA records revenue from the sale of properties when all of the following criteria are met:

The sale has been consummated.

There is sufficient evidence to demonstrate the buyer's ability and commitment to pay for the property.

The Company's receivable is not subject to future subordination.

Edgar Filing: CRESUD INC - Form 6-K

The Company has transferred the property to the buyer.

Cresud Sociedad Anonima,

Comercial, Inmobiliaria, Financiera y Agropecuaria and Subsidiaries

Notes to the Consolidated Financial Statements (continued)

(in thousands of pesos)

NOTE 3: (continued)

In addition, IRSA uses the percentage-of-completion method of accounting with respect to sales of development properties under construction. Under this method, revenue is recognized based on the ratio of costs incurred to total estimated costs according to budgeted costs. IRSA does not commence revenue and cost recognition until such time as the decision to proceed with the project is made and construction activities have begun. The percentage-of-completion method of accounting requires the Company's Management to prepare budgeted costs in connection with sales of properties/units. All changes to estimated costs of completion are incorporated into revised estimates during the contract period.

Revenues from leases

Revenues from leases are recognized on a straight line basis over the life of the related lease contracts.

2) Revenue recognition of Alto Palermo S.A. (APSA)

Net income for admission rights and rental of stores and stands

Leases with tenants are accounted for as operating leases. Tenants are generally charged a rent, which consists of the higher of (i) a monthly base rent (the Base Rent) and (ii) a specified percentage of the tenant's monthly gross revenues (the Percentage Rent) (which generally ranges between 4% and 10% of tenant's gross revenues).

Furthermore, pursuant to the rent adjustment clause in most leases, the tenant's Base Rent generally increases between 7% and 12% each year during the term of the lease. Minimum rental income is recognized following on the accrued criteria.

Certain lease agreements contain provisions, which provide for rents based on a percentage of sales or based on a percentage of revenues volume above a specified threshold. APSA determines the compliance with specific targets and calculates the additional rent on a monthly basis as provided for in the contracts. Thus, these contingent rents are not recognized until the required thresholds are exceeded.

Generally, APSA's lease agreements vary from 36 to 120 months. Law No. 24,808 provides that tenants may rescind commercial lease agreements after the initial six-months, upon not less than 60 days' written notice, subject to penalties which vary from one to one and a half months rent if the tenant rescinds during the first year of its lease, and one month of rent if the tenant rescinds after the first year of its lease.

Additionally, APSA charges its tenants monthly administration fees relating to the administration and maintenance of the common area and the administration of contributions made by tenants to finance promotional efforts for the overall shopping centers operations. The administration fees are prorated among the tenants according to their leases which vary from shopping center to shopping center. Administration fees are recognized monthly when earned.

In addition to rent, tenants are generally charged a non refundable admission fee, that tenants may be required to pay upon entering into a lease or upon lease renewal. Admission right is normally paid in one lump sum or in a small number of monthly installments. Admission rights are recognized in earnings using the straight-line method over the life of the respective lease agreements.

b) Inventories

Real Estate Business

A property is classified as inventories upon determination by the Board of Directors that the property is to be marketed for sale in the normal course of business over the next several years.

Properties classified as inventories have been valued at acquisition or construction cost restated as mentioned in Note 1.c. to the basic financial statements or estimated market value, whichever is lower. Costs include land and land improvements, direct construction costs, construction overhead costs, financial costs and real estate taxes.

Inventories on which advance payments that establish price have been received, and the operation's contract terms and conditions assure that the sale will be effectively accomplished and that the income will be realized, are valued at its fair market value. Profits arising from such valuation are shown in the Gain from valuation of assets at net realizable value caption of the Statements of Income.

Properties held for sale are classified as current or non-current based on the estimated date of sale and the time at which the related receivable is expected to be collected by the Company.

The amount recorded in inventories, net of allowances set up, does not exceed their estimated recoverable value at the end of the period/year.

Credits in kind:

IRSA has credits in kinds related to rights to receive certain property units to be built. The units have been valued according to the accounting measuring standards corresponding to inventories receivables and there have been disclosed under Inventories .

c) Others assets

Agricultural Business

The other assets for which price-fixing prepayments were received and the contractual conditions of the transaction ensure the actual materialization of the sale and the income and they are valued at net realization value.

d) Non-current investments

Real Estate Business

Investments in debt securities:

Investments in debt securities were valued based on the best estimate of the discounted amount receivable, applying the corresponding internal rate of return estimated at the time of incorporation to assets, as IRSA will hold them to maturity.

Investments in subsidiaries and affiliated companies:

Long term investments in subsidiaries and affiliated companies, have been valued by using the equity method of accounting based on the unaudited financial statements at March 31, 2009 issued by them. The accounting standards used by the subsidiaries to prepare their unaudited financial statements are the same as those used by the Company. The accounting standards used by the related companies to prepare their unaudited financial statements are those currently in effect.

The Financial Statements of Banco Hipotecario S.A. and Banco de Crédito y Securitización S.A. are prepared in accordance with the Central Bank of the Argentine Republic (BCRA) standards. For the purpose of the valuation of the investment in IRSA, adjustments necessary to adequate the financial statements to the professional accounting standards have been considered.

This item also includes the lower or higher value paid for the purchase of shares in subsidiaries and affiliated companies assignable to the assets acquired, and goodwill related to the subsidiary Banco Hipotecario S.A. and Manibil S.A.

Banco Hipotecario S.A.:

IRSA has an important investment in Banco Hipotecario S.A. This investment is valued according to the equity method due to the significant influence of the economic group on the decisions of Banco Hipotecario S.A. and to the intention of keeping said investment on a permanent basis.

NOTE 3: (continued)

In accordance with the regulations of the BCRA and the contracts signed as a result of Banco Hipotecario S.A.'s financial debt restructuring process, there are certain restrictions on the distribution of profits by Banco Hipotecario S.A. to IRSA.

The negative goodwill arising from the acquisition of shares in Banco Hipotecario (See Note 9.B.1.e.) has been measured at cost, which in turn had been calculated as the difference between the amount paid for such investment and the book value of the equity interest acquired. The Company is now analyzing the effects of the allocation of the purchase value according to the provisions under Technical Resolution No. 21.

Tyrus S.A.:

Uruguay-based Tyrus S.A. has been classified as not integrated into the Company's operations because it is a company engaged in holding the shares pertaining to the investment in Metropolitan (See Note 9.B.1.d) whose operations are carried out fully abroad. IRSA does not control foreign operations, which are conducted with a significant degree of autonomy with respect to the Company's own operations. Besides, such operations are mainly financed with funds originating in its own transactions or in local loans.

The Tyrus S.A.'s assets and liabilities were converted into Pesos at the exchange rate in force at the close of the period. The Statement of Income accounts have been converted into Pesos at the exchange rates in force at the time of each transaction. Foreign exchange gains/losses arising from the conversion have been charged to the Shareholders' equity caption of IRSA Inversiones y Representaciones Sociedad Anónima, in the line Transitory conversion differences and they amounted to Ps. 14,967 as of March 31, 2009.

The goodwill corresponding to the acquisition of the controlled company Tyrus S.A. has been measured at cost value, which was calculated as the difference between the amounts paid for such investment and the book value of the ownership interest acquired. The Company is now following the procedure to analyze the current value of the assets and liabilities acquired for purpose of allocating of the purchase value, in conformity with Technical Resolution No. 21.

Certificates of participation in IRSA I financial trust:

The certificates of participation in IRSA I financial trust have been valued at the amount resulting from apportioning the participation certificate holding to the trust assets.

Undeveloped parcels of lands:

IRSA acquires undeveloped land in order to provide an adequate and well-located supply for its residential and office building operations. IRSA's strategy for land acquisition and development is dictated by specific market conditions where the Company conducts its operations.

Land held for development and sale and improvements are stated at cost restated as mentioned in Note 1.c. to the basic financial statements or market value, whichever is lower. As of June 30, 2008, IRSA maintained allowances for impairment of certain parcels of undeveloped land for which their market value is lower than cost. The amount charged to reflect the allowance for impairment and its reversal has been disclosed in Unrealized (loss) gain on inventories in the Statement of Income (See Note 4.s).

Land and land improvements are transferred to inventories or fixed assets when construction commences or their trade is decided.

The values thus obtained, net of the allowances recorded, do not exceed their respective estimated recoverable values at the end of the period.

e) **Business combinations**

Real Estate Business

Entities purchased by the Company were recorded in line with the acquisition method set forth in Technical Resolution No.18. All assets and liabilities acquired to third independent parties were adjusted to show their fair value. In to such extent, IRSA identified the assets and liabilities acquired including intangible assets such as:

- The estimated current value of the costs that IRSA avoids incurring as a result of acquiring effective rent contracts, for which the estimated costs of entering into similar contracts were taken into account as well as other factors such as the geographical location and the size of the area rented. The value of the effective rent contracts is included in intangibles and it is amortized as a rental cost in the remaining initial term of each contract.
- The value of the rent contracts acquired, for which the market conditions to the date of acquisition were taken into account as well as other factors including geographical location, size and location of the area rented in the building, profile and credit risk conditions of the lessees to determine if the rental contracts acquired have higher or lesser conditions to those of the market at the time of the acquisition. The current value of the difference between the contracts acquired under the terms of the contracts and the market conditions were taken into account, disclosing an asset or a liability (shown in Other liabilities) depending if the contracts acquired are higher or lesser to the market values.

Cresud Sociedad Anonima,

Comercial, Inmobiliaria, Financiera y Agropecuaria and Subsidiaries

Notes to the Consolidated Financial Statements (continued)

(in thousands of pesos)

NOTE 3: (continued)

The values thus determined should be amortized as an increase or decrease of the income for rentals during the remaining term of the respective contracts, including any renewal considered in the valuation. If a lessee terminates its rent contract, the non-amortized portion of the intangible assets will be recorded in the Statement of Income.

- Relationships with clients. The items that IRSA considered to assign value to such relationships include the nature and extension of the commercial relationships currently existing with lessees, growth prospects for development of new business, lessee's credit qualities and renewal prospects. IRSA has not identified any lessee with whom it has developed a type of relationship allowing the recognition of an intangible asset.

The process of identification and the determination of the price paid is a matter that requires complex judgments and significant estimates.

IRSA used the information contained in valuations estimated by independent appraisers as primary base for assigning the price paid for the land and the building acquired. The amounts assigned to all the other assets and liabilities were based on independent valuations or on the IRSA's own analysis on comparable assets and liabilities. The current value of tangible assets acquired considers the property value as if it was empty.

In accordance with the terms of Technical Resolution No. 21, the difference between the price paid and the addition of the current values of the net assets acquired generate goodwill. If the value of identified tangible and intangible assets and liabilities exceeds the price paid, the intangible assets acquired are not recognized as they would cause an increase of the negative goodwill generated by these acquisitions at the time of the purchase. The goodwill generated due to an acquisition of net assets is shown in line with the tangible asset acquired. Amortizations have been calculated by the straight line method on the basis of the estimated useful life considering the weight average of the remaining useful life of the tangible assets acquired.

During the period/year ended March 31, 2009 and June 30, 2008, financial costs were capitalized in the building known as DIQUE IV for Ps. 7,561 and Ps. 109, respectively.

Accumulated depreciation is computed under the straight-line method over the estimated useful lives of each asset. Expenditures for ordinary maintenance and repairs are charged to results in the period incurred.

IRSA has allowances for impairment of certain rental properties.

The amount charged to reflect the allowance for impairment and its reversal has been disclosed in Unrealized (loss) gain on inventories in the Statement of Income (See Note 4.s).

Significant renovations and improvements, which improve or extend the useful life of the asset are capitalized and depreciated over its estimated remaining useful life. NOTE 7: LAWSUITS AND CLAIMS IN COURSE

A. Agricultural Business

1. Exagrind S.A.lawsuit estancia San Rafael against Tali Sumaj and other damages and losses .

Exagrind S.A. has filed a lawsuit against Inversiones Ganaderas S.A. (IGSA) on claims for damages and losses produced by a fire in Estancia San Rafael , which is close to Tali Sumaj farm, Province of Catamarca. The fire took place on September 6, 2000.

The estimated amount of the legal action is Ps. 2,914 at the date the claim was filed.

In turn, IGSA has filed an extraordinary appeal to the High Court of the Province of Catamarca, requesting for a remainder term to answer the lawsuit as, at the time of revoking the first instance judge decision that postponed the terms to answer until a new notice was dispatched, such period had not yet expired. The management of IGSA is awaiting the decision of the High Court of the Province of Catamarca.

Additionally, in March 2007 -under the request of Exagrind S.A.- the court in charge of the case seized an inhibition of assets. This decision was lifted in June 2007 and a real estate on attachment has been accepted in replacement.

B. Real Estate Business

1. Provision for unexpired claims against Llao Llao Holding S.A.

The Llao Llao Holding S.A. (LLH) Company (in liquidation process following the merges with and into IRSA), predecessor of Llao Llao Resorts S.A. (LLR) as the operator of the Llao Llao Hotel, was sued in 1997 by the National Parks Administration seeking collection of the unpaid balance of the additional sale price, in Titulos de la Deuda Externa Argentina (TDE) amounting to US\$ 2.9 million. A ruling of the court of original jurisdiction sustained the claim. That ruling was appealed and the Court of Appeals confirmed the judgment of the court of original jurisdiction, demanding payment from the company of US\$ 3.8 million, plus interest accrued through payment, punitive interest and lawyers fees. In March 2004, LLH paid Ps. 9,156 in cash and TDE.

The plaintiff requested the court of original jurisdiction to initiate an incidental procedure for execution of sentence by performing a settlement through the Ministry of Economy, the procedure has been questioned by the Company. In view of the fact that the information provided was not sufficient to evaluate the amount settled by the Ministry of Economy, it was requested that the execution be suspended until there is a sentence on the complaint recourse filed to the National Supreme Court for the denial of the extraordinary recourse soliciting that the debt be converted to pesos (pesification).

NOTE 7: (Continued)

In July 2008, the Court of Appeals notified LLR that by means of a resolution dated June 18, 2008 it had confirmed the settlement approved by the court of original jurisdiction.

On March 17, 2009, the National Supreme Court admitted the appeal and decided to suspend the enforcement of the judgment in so far as the extraordinary appeal lodged by LLR is not resolved.

In accordance with the information provided by the attorneys in respect of this lawsuit, the amount to be recorded amounts to Ps. 10,174 as of March 31, 2009 by virtue of the Court sentence, such amount being recorded in Other current liabilities payable to National Parks Administration.

B. Real Estate Business

1. IRSA Inversiones y Representaciones Sociedad Anónima

a. Puerto Retiro S.A.

On April 18, 2000, Puerto Retiro S.A (indirect subsidiary of IRSA) was notified of a filing made by the National Government, through the Ministry of Defense, to extend the bankruptcy petition of Inversora Dársena Norte S.A. (Indarsa) to Puerto Retiro S.A. At the request of plaintiff, the bankruptcy court granted an order restraining the ability of Puerto Retiro S.A. to sell or dispose in any manner the real estate property acquired from Tandanor S.A. in June 1993.

Indarsa had acquired 90% of the capital stock of Tandanor S.A. to a formerly estate owned company privatized in 1991, engaged in the shipyard industry.

Indarsa did not comply with the payment of the outstanding price for the acquisition of the stock of Tandanor, and therefore the Ministry of Defense requested the bankruptcy of Indarsa, pursuing to extend the bankruptcy to Puerto Retiro S.A..

The evidence steps of the legal procedures have been completed. Puerto Retiro S.A. appealed the precautionary measure, the same was confirmed by the Court on December 14, 2000. The parties have submitted their alegatos in due time. When the file was passed for the judge to issue a pronouncement, the judge issued a decree adjourning the summoning of decisions to pronouncement in the understanding that there exists pre-judgment in respect of the penal cause filed against ex-officers of the Ministry of Defense and ex-directors of the Company. Consequently, the matter will not be solved until there is final judgment in penal jurisdiction.

The Management and legal advisors of Puerto Retiro S.A. estimate that there are legal and technical issues sufficient to consider that the request for extension of bankruptcy will be denied by the court. However, taking the circumstances into account and the progress of the legal action, this position cannot be considered definitive.

b. Mortgage guaranteed loan Hoteles Argentinos S.A.

In March 2005, Credit Suisse First Boston (CSFB) acquired the debt for US\$ 11.1 million of Hoteles Argentinos (HASA), which had been in non-compliance since January 2002. In April 2006 HASA made a payment reducing the capital amount payable to US\$ 6.0 million. The balance will accrue interests at a LIBOR rate 6 months plus 7.0% and will be paid off in installments, being the last of US\$ 5.07 due in March 2010.

To support the obligations assumed, IRSA deposited as guarantee the amount of US\$ 1.2 million.

e. Capital increase and irrevocable contributions in Trashop S.A.

As a consequence of the international financial context, a high volatility in interest rates and increases in the so-called systemic default has been noted, both having caused a negative impact on the performance and financing of the consumption financing business. The highest default levels provoked an increase in the subordination of financial trusts that, added to the modification of their tax treatment, to the higher interest rate for risk increasing and to certain deceleration of private consumption, generated the need to review the general and specific economic prospects of Trashop S.A. activities.

To face the increasing volatility of the international financing market and to provide Trashop S.A. with a capital base in line with the current market conditions, in September 2008 APSA decided to participate in a capital increase of Trashop S.A. for up to Ps. 60,000 by increasing the Trashop S.A. shareholding from 80% to 93.4%. The streamlining of resources included areas such as consulting services.

In line with the commercial actions other measures have been implemented, such as:

Structure redesigning of distribution channels.

Changes in cash and financing plans to stores.

Renegotiation of terms and conditions with member stores.

It should also be mentioned that the recent modification of the tax treatment for financial trusts and other changes brought by the national government, forces to perform a constant monetary adjustment focusing the positioning strategy of Tarshop S.A. to face the ups and downs of the current situation.

Exposure to the non-financial public sector

Banco Hipotecario S.A. keeps recorded in its financial statements assets with the Non-Financial Public Sector amounting to Ps. 3,129,617. On the other hand, liabilities to the Argentine Republic Central Banks recorded as of March 31, 2009 amount to Ps. 208,873 being the credit balance related to advances to subscribe BODEN 2012 in line with sections 28 and 29 of Decree 905/02.

The net exposure with the Public Sector, without considering liquid assets in accounts authorized by the Argentine Central Bank, amounts to Ps. 2,920,744 and Ps. 2,628,720 as of March 31, 2009 and 2008, respectively.

Banco Hipotecario S.A. intends to allocate assets portfolio of the public sector as guarantee for the application of the advancement to finance the coverage bonds subscription, as provided for in section 29 of Decree 905/02.

As from January 1, 2006, the dispositions of point 12 of Communication A 3911 (Communication A 4455) became effective, as regards that the assistance to the Public Sector (average measured) cannot exceed 40% of total Assets of the last day of the previous month. Through Communication A 4546 of July 9, 2006, it was established that as from July 1, 2007, such limit was modified to 35%. The exposure of Banco Hipotecario S.A. to the Public Sector originated in compensations granted by the National Government as a result of year 2002 crisis, principally related to the asymmetric pesification of assets and liabilities. To such extent and considering that assets to the Public Sector exceeded the mentioned limit. On January 19, 2006, Banco Hipotecario S.A. reported to the Argentine Central Bank that it will gradually decrease the proportion of assets subject to the exposure to the Public Sector, in line with the amortization and cancellation made by the Government of the bonds received for asymmetric compensation in the currency of issuance. To date, no objections to this issue have been received.

As of March 31, 2009 and 2008 the assistance to the Public Sector arises 24.8% and 26.4%, from total Assets, respectively.

NOTE 15: (Continued)

Although the central countries took immediate action on the matter, the future evolution of the international markets is uncertain, which produce direct effects on the quotation of financial assets, particularly shares, debts, titles and investments funds.

As regards the Argentine Republic, stock-markets showed a pronounced downward trend in the price of public and private bonds and a rise in interest rates, country risk and rates of exchange.

The Bank's management is evaluating and monitoring the effects derived from the situations referred to above on the Company and subsidiaries in order to adopt the necessary measures to soften the effects of the global situation.

As shown in the balance sheet of Banco Hipotecario S.A. all the above matters produced negative effects on the bank investments, the principal impact being the one generated by public bonds received and to be received arising from the offsetting established in sections 28 and 29 of Decree 905/02, and by guaranteed bonds.

Aspects pending of resolution

As mentioned in the notes to the financial statements of Banco Hipotecario S.A. (Banco Hipotecario), there are certain aspects that had been objected to by the Financial Institutions Oversight Department of the Central Bank of Argentina (BCRA): Banco Hipotecario is currently preparing the relevant responses. These matters are related mainly to:

- a) the accounting records entered for certain transactions involving derivative financial instruments, which, according to the requirements of BCRA, are to be booked in accordance with the criteria laid down by the professional accounting standards, would entail a reduction in shareholders' equity as of March 31, 2009.
- b) the regulatory treatment of prudential ratios, mainly in connection with the Non-financial public sector credit risk fractioning and counterparty risk and their impact on the minimum capital requirements arising from certain transactions involving derivative financial instruments: according to BCRA's calculations, there might have been a significant under-statement of the amounts deposited as per such ratio as of December 31, 2008, and

Cresud Sociedad Anonima,

Comercial, Inmobiliaria, Financiera y Agropecuaria and Subsidiaries

Notes to the Consolidated Financial Statements (continued)

(in thousands of pesos)

NOTE 15: (Continued)

c) as regards the accounting for the compensation to be paid by the National Government in connection with the Coverage Bonds: if it were booked as per the requirements imposed by BCRA, would entail a reduction in shareholders' equity as of March 31, 2009 should be revised down.

To book its investment in Banco Hipotecario, the Company uses the bank's shareholders' equity as determined by application of Argentina's professional accounting standards. Therefore, the aspects referred to in a) and c) above do not have a significant impact on the Company's financial statements because they have already been considered in the amounts used to determine shareholders' equity.

d. Tarshop S.A. credit card receivables securitization program

Tarshop S.A. has ongoing securitization programs through which Tarshop S.A., a majority-owned subsidiary of APSA, transfers a portion of its customer credit card receivable balances to master trusts that issues certificates to public and private investors.

Under the securitization programs, Trusts may issue two types of certificates representing undivided interests in the Trusts - Títulos de Deuda Fiduciaria (TDF) and Certificados de Participación (CP), which represent debt, and equity certificates, respectively. Interest and principal services are paid periodically to the TDF holders throughout the life of the security. CPs are subordinated securities which entitle the CP holders to share pro rata in the cash flows of the securitized credit card receivables, after principal and interest on the TDFs and other fees and expenses have been paid. During the revolving period no payments are made to TDF and CP holders.

Principal collections of the underlying financial assets are used by the Trust to acquire additional credit card receivables throughout the revolving period. Once the revolving period ends, a period of liquidation occurs during which: (i) no further assets are purchased, (ii) all cash collections are used to fulfill the TDF service requirements and (iii) the remaining proceeds are used to fulfill the CPs service requirements.

NOTE 16: (Continued)

As regards the Argentine Republic, stock-markets showed a pronounced downward trend in the price of public and private bonds and a rise in interest rates, country risk and rates of exchange.

In connection with the quotation value of shares issued of IRSA and its subsidiary s, the IRSA s management reported that the quotation price of its shares has also been affected, in the understanding that such fall does not coincide with the Company s equity reality or with its true economic situation but that it is a consequence of the current process through which national and international markets are undergoing.

Banco Hipotecario sustained significant losses in the period. However, as of the date hereof, it is in full compliance with the capital requirements laid down in the regulations that govern its functioning. Although Banco Hipotecario s listed shares have shown a decline in value in the period, Management estimates that such decrease is not an indication of Banco Hipotecario s current operating performance.

The factors considered by the IRSA include the following: (i) the reasons for such decrease in the quoted value (and whether they concern loan policies, interest rates or the market), (ii) IRSA s ability and willingness to maintain the investment for a period long enough to recover value, (iii) whether such decrease in value is significant to the Company, (iv) the historical behavior of the variables that caused such decline in value and (v) IRSA s business fundamentals. Testing for non-temporary impairments in value entails qualitative and quantitative processes subject to several risks and uncertainties. As of the date of these financial statements, Management estimates that the drop in the quoted value of shares is temporary.

NOTE 17: **SALES OF REAL ESTATE**

The company sold in different operations both during the last six-month period and as subsequent events office properties representative of 20,315 square meters of gross leasable area in IRSA s portfolio, for a total of Ps. 201.3 million, of which Ps. 66.9 million correspond to operations perfected during the last six-month period and Ps 134.4 million to operations conducted in later form. These operations generated an income of Ps. 41.7 million and of Ps. 77.7 million (approximately), respectively.

Notes to the Financial Statements

(in thousands of pesos)

NOTE 1: ACCOUNTING STANDARDS

Below is a description of the most relevant accounting standards used by the Company in the preparation of these Financial Statements, which have been applied on a consistent basis from the previous period.

a. Presentation standards

These financial statements are stated in Argentine Pesos (Ps.), and have been prepared in accordance with the disclosure and valuation accounting standards contained in the Technical Resolutions issued by the Federación Argentina de Consejos Profesionales de Ciencias Económicas (FACPCE), as approved, with resolutions issued by the Consejo Profesional de Ciencias Económicas de la Ciudad Autónoma de Buenos Aires (CPCECABA) and the Comisión Nacional de Valores (CNV).

b. Unifying of accounting standards

On July 8, 2004, the FACPCE and the CPCECABA entered into an agreement with the purpose of unifying technical standards. The latter council issued Resolution CD 93/05 on August 10, 2005 adopting the accounting standards approved by the former including the changes up to April 1, 2005.

The standards referred to above became effective for annual or interim periods financial statements of years started on January 1, 2006. On the other hand, the CNV has adopted the same standards including certain modifications, and has also established their applicability for the years started as from January 1, 2006 as well.

The changes introduced due to the unifying of accounting standards that have generated significant effects on the Company's financial statements are:

i In accordance with the new accounting standards, the Company has decided not to recognize the deferred liabilities generated by the adjustment for inflation on fixed assets and other non-monetary assets. Consequently, additional information on this issue is stated in Note 6.

j The balance of the Transitory Conversion Differences account has to be shown in the statement of changes in stockholders equity as from the time the unifying accounting standards became effective.

c. The effects of inflation

The financial statements have been prepared in constant currency units by recognizing the effects of inflation up to August 31, 1995. As from this date and

As from such date, in accordance with Resolution 441 issued on April 8, 2003 by the CNV, the Company discontinued the restatement of its financial statements. This criterion does not agree with the terms of Resolution MD 041/2003 of the CPCECABA, by which the restatement of financial statements was discontinued as from October 1, 2003. NOTE 2: (Continued)

In such sense, the Company identifies assets and liabilities acquired, including intangible assets such as: lease agreements acquired under conditions upper or lower than market; costs of executing lease agreements in effect (the latter being the market cost that the Company avoids to incur for acquiring lease agreement in effect), the value of trademarks acquired, the value of deposits related to the investment in Banco Hipotecario and the intangible value of customer relationships.

This identification process and the respective determination of current values call for complex determinations and significant estimates.

The Company use information contained in valuations carried out by independent experts as primary basis to assign the price paid to plots of land, buildings, shopping malls, inventory and hotels of the acquired companies. The amounts assigned to the rest of assets and liabilities are based on independent valuations or in the Company's own analysis with comparable assets and liabilities. The current value of acquired intangible values considers the value of the property as if it were empty.

As provided by Technical Resolution No. 21, if the value of tangible and intangible assets and liabilities exceeds the price paid, intangible assets acquired are not recognized as they would increase the negative goodwill generated by these acquisitions upon the purchase. If the price paid exceeds the value of identified tangible and intangible assets and liabilities, the surplus is considered to be positive goodwill.

Considering the participation in IRSA acquired during the present period, according to mentioned in Note 2.3, the Company is now analyzing the current values of acquired assets and liabilities identifiable according to the provisions under Technical Resolution No. 21 caption 1.3.1.

3. Goodwill

-Negative goodwill

As provided by Technical Resolution No. 21, the negative goodwill related to the equity interest in the affiliate IRSA has been valued at cost restated as of February 28, 2003 as the case may be, which was calculated as the difference between the value paid for such investment and the current value of the equity interest acquired, the latter being determined as established in note 2.k.2.

IRSA's shares were acquired by means of purchases on the market and converting of bonds into shares and exercising warrants issued by IRSA.

NOTE 2: (Continued)

The (negative) goodwill related to acquiring an additional interest in IRSA, resulting from the purchase of shares on the market, has been valued at cost, which was calculated as the difference between the value paid by such investment and the book value of the interest acquired. As to this goodwill, the Company is currently analyzing the book value of assets and liabilities acquired identified as provided by Technical Resolution No. 21, caption 1.3.1.

The amortization of the negative goodwill is recognized over a period equal to the weighted average of the remaining useful life of IRSA's identifiable assets that are subject to depreciation, which ranges from 20 to 29 years or in an accelerated manner, the party proportional to the negative goodwill so long as IRSA carries its identifiable assets. Amortizations have been classified in the account "Gain on equity investees" in the Statement of Income.

-Goodwill

As provided by Technical Resolution No. 21, the positive goodwill related to the equity interest in the affiliates IRSA and BrasilAgro has been valued at cost, which was calculated as the difference between the value paid for such investments and the current value of the equity interests acquired, the latter being determined as established in note 2.k.2. IRSA and BrasilAgro shares were acquired by means purchases on the market.

The goodwill has not been amortized as it has an undefined useful life.

Upon defining the useful life, the following factors have been considered: (i) nature and expected life of acquired businesses; (ii) stability and expected life of the respective industry branch; (iii) effects that the obsolescence of products, changes in demand and other economic factors may have on the acquired business; (iv) feasibility of maintaining the required disbursement value to obtain future economic benefits from the acquired business and (v) the control period over the acquired business and legal or contractual provisions that may affect its useful life.

Based on these factors, the Company has estimated that it is not possible to estimate the specific useful life for the positive goodwill related to equity interests in the controlled IRSA and the affiliate BrasilAgro generated by applying the acquisition method provided by Technical Resolution No. 18, and it has therefore determined that they shall have an undefined useful life.

NOTE 2: (Continued)

As provided by Technical Resolution No. 18, if the Company determines that the goodwill has an undefined useful life, its amortization will not be computed and its recoverable value should be compared at each year-end to verify whether the its value has decreased, allocating losses for impairment in value to income for the year in which such losses were determined.

l. Other investments

Business Highlight

Buenos Aires, May 12, 2009 - Cresud S.A.C.I.F. y A. (Nasdaq: CRESY BCBA: CRES), one of the leading agricultural companies in Argentina, announces today its results for the first nine months of Fiscal Year 2009 ended March 31, 2009.

Effective as from the second quarter of fiscal year 2009, Cresud presents its financial statements in consolidated form with those of IRSA Inversiones y Representaciones S.A., in which we held an equity interest of 54.01% as of March 31, 2009.

Cresud's consolidated income statement for the period beginning July 1, 2008 and ended March 31, 2009 (nine months) includes the results of IRSA Inversiones y Representaciones Sociedad Anónima from October 1, to March 31, 2009 (six months). Cresud's consolidated financial statements as of March 31, 2008, disclosed in the comparative tables; do not include IRSA's consolidated data, thus affecting the comparability of the income statement.

Results for the first nine months of fiscal year 2009 showed a net income of Ps.4.7 million compared to Ps.27.6 million posted the same period of the previous fiscal year. The result mainly reflects the financial effects of the current world crisis and the impact of adverse weather conditions on some productive areas.

Consolidated agribusiness sales for the period amounted to Ps.133.3 million, 29.1% higher than those posted for the same period of the previous fiscal year. Noteworthy in this respect are the 49.5% increase in sales of crops, the of 11.4% increase in sales of milk and the 54.6% increase in sales of the Others line, partially offset by a 39.8% reduction in beef cattle sales compared to the same period of the previous fiscal year.

Agribusiness production revenues amounted to Ps.63.0 million in the period ended March 31, 2009, 10.4% down from those recorded in the same period of the previous fiscal year. The decrease is explained mainly by a Ps.9.8 million drop in the beef cattle segment, partially offset by an increase in the crops and milk segments.

Consolidated sales in the real estate business for the period were Ps.617.8 million for the six month period ended March 31, 2009, whereas gross income for the real estate segment stood at Ps.356.5 million.

Gross profit during the first nine months of fiscal year 2009 amounted to Ps.366.0 million compared to Ps.40.7 million during the same period of the previous year. This increase mainly reflects the effect of considering the gross profit mentioned in the previous paragraph due to the consolidation of the results of the real estate business of our controlled company IRSA.

Operating results for the period ended March 31, 2009 showed a Ps.108.9 million profit, composed of operating income of Ps.137.2 million in IRSA's segments for the six-month period ended March 31, 2009 and a loss of Ps.28.3 million from Cresud's agribusiness activities for the first nine months of fiscal year 2009, compared to Cresud's operating income of Ps.33.8 million recorded in the same period of the previous fiscal year. This reduction in the results from the agribusiness activities reflects its lower gross profit and a lower income of Ps. 20.7 million because of sales of farms in the previous period and absent during this period, combined to a lesser extent with higher selling expenses, in line with the increase in sales and administrative expenses.

Macroeconomic Context

The level of activity in the Argentine economy has started to be affected, mirroring the situation exhibited by other economies over the past months.

Regarding the performance of economic activity in Argentina, according to the most recently released official data available as of the date of this report and concerning the month of February 2009, the Monthly Estimate of Economic Activities (Estimador Mensual de la Actividad Económica, EMAE) shows a 2.1% growth compared to the same month of the previous fiscal year: this suggests that the Argentine economy has grown at a pace slower than in recent months.

When it comes to Public Finances, fiscal accounts, foreign trade current account balances and the reserves held by the Central Bank of Argentina (Banco Central de la República Argentina, BCRA), they have performed irregularly in recent months. Although at the end of 2008 the Primary Result indicator had shown a 26.5% increase compared to the figure posted in calendar 2007, in the first quarter of 2009 this indicator dropped by 49.0% compared to the first quarter of 2008. The reason for such variation can be found in the deterioration of tax revenues because of the deceleration in the level of activity and the decrease in the export values subject to withholdings. As regards the country's external accounts, Argentina posted a US\$ 3,556 million trade surplus during the first quarter of calendar 2009, equivalent to a 12.5% increase compared to the same quarter in the previous fiscal year, thus reverting the trend shown in the last quarter of calendar 2008. As a consequence, BCRA maintains a strong position in terms of reserves and succeeded in accumulating as of March 31, 2009, a level of US\$ 46,509 million, it is thanks to these reserves that the Central Bank has the capability of dealing with the increased volatility in the capital inflows and outflows caused by the uncertainty prevailing in the financial markets.

As regards the various sectors of the economy, the main indicators show a certain slow-down in the pace of growth of activities. As concerns the construction industry, according to the data shown by the Summary Indicator of Construction Activities (Indicador Sintético de la Actividad de la Construcción, ISAC) prepared by the National Institute of Statistics and Censuses (Instituto Nacional de Estadísticas y Censos, INDEC), its activities have dropped by 2.7% for the period January-March 2009 compared to the same period of the previous fiscal year, whereas in calendar 2008 such indicator has grown by 5.0%. As regards retail sales, sales in supermarkets and shopping centers have grown by 21.9% and 1.6% respectively in the first quarter of the calendar year compared to the same quarter of the previous fiscal year whereas during calendar 2008 these sales grew by 34.6% and by 22.0%.

As regards the residential real estate market, the scenario of uncertainty has caused a slow-down in the number of transactions in the first quarter of the year compared to the same quarter in the previous year. However, the prices of the housing units remain relatively stable. It is clear though that there are no expectations in Argentina that a sub-prime mortgage loan crisis may affect the values of housing units as has been the case in other economies because home mortgage loans in the Argentine market remain at hardly 2.0% of the country's GDP.

As concerns the office rental market in Buenos Aires, and according to Colliers, since the end of 2008 and as a result of the changes occurred in the economic scenario, competition started based on prices in order to capture demand. The average prices offered were still in January 2009 higher than those offered in 2007 though lower than those offered in June 2008, as this month had marked a peak in prices.

As regards the Hotel sector, according to data released by the Tourism Secretariat in connection with the International Tourism Poll (Encuesta de Turismo Internacional, ETI) as of February 2009, the number of tourists arriving in Argentina (accumulated over twelve months) is 3.0% smaller than the same accumulated figure in the previous year.

Business Highlight (continued)

Despite an overall less favorable context, the real estate segments accessed by Cresud through its stake in IRSA continue to show a robust position within the current environment: this may be explained by the quality of our assets and by how appealing they are to the market, which in turn translates into high occupancy levels and cash flow generation capacity associated to our low levels of short-term indebtedness. The economy's various sectors and markets are starting to show a gap between the strength of their real assets (considered either in terms of value and/or cash generation capacity) and the value of the instruments representative of such assets (as would be the case of bonds or shares) and our companies are not alien to that situation.

In recent months, Argentina's main productive geographical areas have been experiencing one of the worst droughts in the past 70 years. Therefore, the agricultural and cattle raising business has been adversely affected, and so has been the agricultural 2008/2009 season, the expectations for the next season campaign and beef cattle stocks. The scarcity in rainfalls has had an impact on the yields and surface areas planted and in turn, it has had an impact also on beef cattle herds by causing the death of animals and adversely affecting the output of meat and milk. According to estimates by the Argentine Secretary of Agriculture, Cattle Raising, Fishing and Food Industries (SAGPyA in Spanish), the production of sunflower for this season is expected to be 48.0% less than for the previous season. In the case of wheat, from the 16.3 million tons produced in the previous season, the output for the 2008/2009 season is expected to be only 8.3 million tons. As regards corn, the final output is expected to be between 12.5 million tons and 13.8 million tons although in the past season production had been close to 22 million tons. As regards soybean and according to USDA estimates, Argentina's output will be 39 million tons, down from the 46.2 million tons produced in the previous season. As regards the prices of crops, improvements have been noted in the wake of the drop caused by the economic and financial global crisis, because of the decrease in South America's crop outputs due to the drought.

Summary of Operations

Crops

Crop sales for the nine-month period of fiscal 2009 totaled Ps. 79.3 million, compared to sales for Ps. 53.1 million in the previous period. The volume of crops sold was 132,828 tons at an average price per ton of Ps. 597.2 compared to the 96,201 tons sold at an average price of Ps. 551.7 in the same period of the previous fiscal year. The increase in the tons sold is mainly due to the increase in the levels of stocks of crops at the beginning of fiscal year 2009 and to the 34.6% increase in production, which rose from 60,560 tons for the first nine months of fiscal year 2008 to 81,537 tons for the same period in fiscal year 2009. Income from production totaled Ps. 36.7 million, 0.8% higher than the income obtained from production in the same period of fiscal year 2008. In turn, the result from production for the period ended March 31, 2009 was a Ps. 15.4 million loss, in contrast with the Ps. 11.5 million income for the same period in the previous fiscal year. The decrease in the result from production was mainly due to the reduction in average yields, mainly attributable to the adverse effects of the drought, the decrease in the average price of commodities and the increase in direct and indirect costs arising from higher production volumes and higher input costs.

The stock of crops as of the end of the period totaled 54,500 tons, 18,749 of which were corn, 12,691 were sunflower, 11,750 were wheat and 5,365 were soybean. The rest of the stock includes barley, sorghum and other minor crops.

Business Highlight (continued)

As of March 31, 2009, we had harvested 100% of wheat and sunflower, 20% of the corn and 4% of the soybean. The production of corn and soybean is projected to be lower than the amounts forecasted as a result of the unfavorable weather conditions.

Gross results in the business for the period ended March 31, 2009 shows a Ps.0.1 million profit, compared to a Ps.16.8 million income recorded in the same period of the previous year.

For the current season we have allocated 111,322 hectares to agriculture, 59,501 of which are leased from third parties and 8,067 are operated under concession. Compared to the previous fiscal year, we have increased the number of total hectares allocated to agriculture by 51,775, which stand for an 86.9% increase, mainly due to the inclusion of 10,448 hectares in production located in the Republic of Bolivia.

Beef Cattle

As of March 31, 2009, the Company's cattle stock was 91,892 head, with a total of 128,876 hectares allocated to beef cattle activities.

Beef cattle sales decreased compared to the previous fiscal year, down from Ps. 18.9 million as of March 31, 2008 to Ps. 11.4 million as of March 31, 2009. During the first nine months of fiscal year 2009 the tons sold had amounted to 3,950, whereas in the same period of fiscal 2008 the tons sold had amounted to 7,384. Beef cattle production has been 5,513 tons, which stands for a 21.8% drop compared to the previous fiscal year.

The gross result from the beef cattle segment was a Ps.0.4 million loss for the first nine months of fiscal year 2009, compared to Ps. 7.3 million income for the same period of the previous fiscal year. The decrease in production volumes was mainly due to scarce rainfall in certain areas, which forced us to sell animals prematurely and to relocate cattle in other farms in certain cases, which caused delays in the fattening process. In addition, prices fell due to the early sale of animals in the market.

Milk

Milk production dropped by 0.9% in the period, down from 15.9 million liters as of March 31, 2008 to 15.7 million as of March 31, 2009. This drop was mainly due to decreased efficiency in the daily output per cow measured in liters, as a consequence of the lack of pastures caused by the scarce rainfall.

During the first nine months, sales totaled Ps. 14.7 million, that is, 11.4% higher than in the first nine months of fiscal year 2008. This rise in sales is due to the increase in the average price per liter of milk, offset by the slight decrease in production.

The gross result was Ps. 1.7 million income, compared to Ps. 4.5 million income for the first nine months of the previous fiscal year.

During the first nine-month period of fiscal year 2009 the stock of dairy cattle amounted to 8,351 head over 4,106 hectares allocated to milk production, whereas for the same period of the previous fiscal year we had 8,514 cattle head over 3,723 hectares. On average, there are 3,273 cows in milking per day, 5.6% higher than those in the same period of the previous year.

At present, the Company has three dairy facilities, two in the La Juanita farm and one in El Tigre, a dairy farm equipped with state-of-the-art technology.

Purchase and Sale of Farms

Subsequent to the end of the quarter, a sales deed was executed for the sale of 1,658 hectares in the Los Pozos farm located in the Province of Salta. The price for the transaction was fixed at US\$ 0.5 million, which price was fully paid. The Company had carried the property sold in its books at a price of US\$ 7 per hectare, whereas the price of the transaction was agreed at US\$ 320 per hectare.

Development of marginal lands

During the third quarter of fiscal year 2009, we continued with the development of our Los Pozos farm located in the Province of Salta. As of March 31, 2009, we had approximately 62,000 hectares of prairies sown, 43,000 hectares of which were allocated to beef cattle production. In the first nine months of fiscal year 2009, approximately 4,400 hectares were used for agricultural production. In addition, development continued in Agropecuaria Anta S.A. (formerly named Agropecuaria Cervera S.A.), with our aim to have approximately 8,100 hectares allocated to own production and 5,132 hectares leased to third parties by the end of this fiscal year.

As of March 31, 2009, Cresud held own land reserves amounting to over 218,174 hectares. In addition, we have a concession over 148,785 hectares reserved for future development.

IRSA Inversiones y Representaciones S.A.

As from the second quarter of fiscal year 2009, Cresud started to present its financial statements in consolidated form with those of IRSA Inversiones y Representaciones S.A., in which company we held a 54.01% ownership interest as of March 31, 2009.

The following information corresponds to data extracted from the balance sheet of our subsidiary IRSA Inversiones y Representaciones S.A. as of March 31, 2009:

Offices and Other Rental Properties

During the first nine-month period of fiscal year 2009, income from rental properties totaled Ps.106.6 million, a 46.0% increase compared to the figure of Ps.73.0 million recorded in the same period of fiscal year 2008.

We have grown significantly in this segment in recent years, as shown by the increase in leaseable areas and low vacancy rates, combined with higher lease rates. The acquisitions made have helped us gain a strong leading position in the Buenos Aires office rental market.

Occupancy levels at our offices were 96.3% at the end of the nine-month period of fiscal year 2009, including the Edificio Republica, which is under the process of being absorbed by the market.

Sale of Properties. Along the fiscal year, and after the nine-month period ended in March 2009, the Company executed sales deeds over 19,371 sqm of gross leasable area represented by some of its non-core office assets in several transactions that totaled US\$ 52.0 million. These transactions involve seven functional units in Edificio Dock del Plata representative of 3,739 sqm of gross leasable area; a commercial property in Puerto Madero, named as Crucero I and representative of 192 sqm of gross leasable area, 5 functional units at Edificio Libertador 498 representative of 3,099 sqm of gross leasable area; one functional unit in the building located in Av. Madero 942 representative of 768 sqm of gross leasable area;

5 floors in the building Edificio Laminar Plaza, representative of 6,520 sqm of gross leasable area; 3 parking lot spaces at the building located in Madero 1020 representative of 37 sqm of gross leasable area and the building located in Reconquista street, representative of 5,016 sqm of gross leasable area. These decisions not only allows the company to increase its financial strength, but also allows it to refocus on the execution of potential business opportunities coming into our portfolio. (See references to Dique IV and PAMSA Offices below).

Edificio República. We continue with the process of marketing the square meters incorporated into our portfolio through the acquisition of Edificio República: at the end of the third quarter we had attained a 64.8% occupancy level.

Dique IV, Puerto Madero. We have completed the construction of 11,000 square meters of gross leaseable area in Dique IV, Puerto Madero. Therefore, we have entered into a lease agreement for eight office floors spanning more than 10,000 sqm with a top-notch lessee: the effective date of such lease is subject to compliance with certain technical and operational matters associated to the operation of the building.

PAMSA Offices. Our subsidiary APSA is developing an office building in the intersection of Av. Gral Paz and Panamericana through Panamerican Mall S.A. as referenced later on in this document.

Below is detailed information on our office space as of March 31, 2009:

Alto Palermo S.A. (APSA): Shopping Centers and Consumer Finance

The following information relates to data extracted from the balance sheet of our subsidiary Alto Palermo S.A. (APSA), the company that operates our shopping center business, in which we had a 63.3% interest as of March 31, 2009.

In the nine-month period ended on March 31, 2009 our tenants sales amounted to Ps. 3,033.7 million. In nominal terms, these are 13.2% higher than those posted for the same period of the previous fiscal year.

The business success of our tenants allows us to maintain the occupancy rates at our Shopping Centers at 98.93%.

DOT BAIREES. This is one of the Company s most important projects, and it includes the construction by Panamerican Mall S.A. of a shopping center, a hypermarket, a cinema complex and an office building in the neighborhood of Saavedra, City of Buenos Aires. Our aspiration is that Dot Baires should become synonym with a meeting point, the gateway to the City of Buenos Aires. Dot Baires will be the largest shopping center in the City of Buenos Aires in terms of square meters. The project will have 13,000 square meters for a hypermarket and 37,855 square meters of leaseable area, including a 9,000 square meter anchor store.

We are presently working on the launch of Dot Baires, scheduled for May 13.

Coto Residential Project. On September 24, 1997 we executed a public deed whereby we acquired the rights to receive parking spaces and to perform additional construction works in the real property located on the intersection of Agüero, Lavalle, Guardia Vieja and Gallo streets, in the Abasto neighborhood. On July 31, 2008, we executed a conditional barter agreement whereby we would transfer to CYRSA S.A. (CYRSA) 112 parking spaces and the right to perform additional construction works for developing two tower buildings in the property mentioned above, subject to the satisfaction of certain conditions. As consideration, Cyrsa would deliver to us an amount to be determined in the future of the units comprising the building that would be constructed equivalent to 25% of the square meters, totaling not less than four thousand and five three units with an exclusive area of fifty square meters each. The consummation of this barter is conditioned to the performance of certain material acts by Coto. Possession of the property will be delivered simultaneously with the deed of conveyance of title, which will take place 30 days after the date we give notice to CYRSA of the satisfaction of the conditions precedent. The total amount of the transaction between Cyrsa and the Company amounts to US\$ 5.9 million.

Beruti Plot. Before the closing of the previous fiscal year, Alto Palermo S.A. acquired a plot of land located in Beruti 3351/9, in the neighborhood of Palermo, City of Buenos Aires. The plot has an area of 3,207 square meters and was purchased for US\$ 17.8 million. The importance of this acquisition relies on the property s strategic location, as it is very close to our major shopping center, Shopping Alto Palermo.

Consumer Finance Tarshop S.A. Subsidiary

In recent months, and as a result of the international financial context, we faced the need to review economic prospects in general and to revise the company's business prospects in particular: several decisions were made, all aimed at strengthening the business in the face of the prevailing economic situation.

To face the growing volatility in the international financial scenario and to provide Tarshop S.A. with a suitable capital base taking into account the current market conditions, in September 2008 APSA decided to take part in Tarshop S.A.'s capital increase for up to Ps.60 million, and increased its equity stake in Tarshop S.A. from 80% to 93.4%. The structure costs associated to points of sales were downsized through a 17% cutback, the reduction of 13 points of sales and the leased centralized area by 10% of the total.

In line with the commercial actions, various other measures have been implemented, including:

- (i) Redesign of the distribution channel structure.
- (ii) Changes in cash lending plans and merchant financing.
- (iii) Renegotiation of conditions with merchants.
- (iv) Streamlining of lending and collection policies.
- (v) Revision of provisioning policies, aimed at establishing an even stricter criterion than the one suggested by the Central Bank.

During the second quarter of fiscal year 2009, Tarshop received financial assistance for an amount of Ps. 105 million, subsequently accepted as irrevocable contribution, for the purpose of strengthening its equity position, improving its financial position and repositioning Tarshop S.A., given the complex situation prevailing in the financial trust market in which part of its activity is engaged and its extremely low capitalization relative to its competitors.

Considering the situation described in the preceding paragraphs, the loan portfolio, including coupons securitized as of March 31, 2009 amounted to Ps. 643.8 million, that is, 29.3% smaller than the Ps. 910.7 million portfolio held as of March 31, 2008.

In addition, as regards collections, the 90-day delinquency rate as of March 31, 2009 amounted to 9.2%.

Therefore, net revenues went down a 17.4% from Ps. 212.7 million for the nine-month period ended March 31, 2008, to Ps. 175.7 million for the same period of the current fiscal year. Gross profit stood at Ps 78.5 million and the operating loss was Ps. 120.2 million, which reflects a decrease when compared to the Ps. 11.1 million income obtained in the nine-month period ended on March 31, 2008. Net loss for the nine-month period ended on March 31, 2009 was Ps. 66.9 million.

The operating result for the quarter ended March 2009 was a Ps. 9.4 million loss, which reveals a reduction in losses if we take into consideration the Ps. 73.7 million and Ps. 37.1 million operating losses respectively posted in the first and second quarter of fiscal year 2009. This is due to the improved capitalization combined with the relative stabilization in local financial markets, a reduction in loan loss charges and a decrease in operating expenses.

However, we will continue to work in improving Tarshop S.A.'s performance and in readying it to face the conditions currently prevailing in the market.

Sales and Developments

In the nine-month period ended March 31, 2009, revenues in the sales and developments segment amounted to Ps.137.1 million, compared to Ps.175.2 million for the same period of the previous fiscal year. The following paragraphs describe the Company's major developments:

Caballito. On May 4, 2006 we entered into a US\$7.5 million swap agreement with Koad S.A. (Koad) whereby we transferred title of block 36 of the property Terrenos de Caballito to Koad in order for it to develop at its sole expense, cost and risk, a complex known as Caballito Nuevo. The construction works have already started, and include two apartment towers of 34 floors each, with 1, 2 and 3 room units of 40 to 85 sqm. surface area, including a wide variety of amenities and services. In consideration for it, Koad paid to us US\$0.05 million while the US\$7.45 million balance will be repaid through the delivery of 118 apartment units and 55 parking spaces. The final number of units to be received will depend on the date of actual delivery by Koad, as the agreement provides for rewards based on terms of delivery. At present, this project is in the last development stage. Marketing started in December 2008, and from January 2009 to the date of this release, preliminary sales agreements for 31 units and for 9 parking spaces have been executed.

Solares de Santa Maria, City of Buenos Aires, (formerly Santa María del Plata). The Urban Development Solares de Santa María has reached the Draft Project level, and feasibility studies have been filed with the utility companies. An agreement is being reached with the Government of the City of Buenos Aires to send a mutually acceptable Bill of Law and Agreement to the Legislature of the City of Buenos Aires for its consideration and approval.

Horizons residential project. IRSA-CYRELA is developing one of the most significant developments in Greater Buenos Aires in a plot made up by two adjacent blocks located in the Vicente López neighborhood, which will entail a new concept in residential complexes given its emphasis on the use of common spaces. This project includes two complexes, one in each block, with a total of six buildings; a complex facing the river with three 14-story buildings and another complex on Avenida del Libertador with three 17-story buildings, totaling 59,000 own sqm for sales and 110,000 sqm in total construction distributed into 467 units. The showroom was opened to the public in March 2008 quite successfully as the units have all been reserved. As of the date of these financial statements, preliminary sales agreements had been executed for 99% of the own units subject to sale and results will be reflected as progress is made in the execution of the works, consolidated at 50%. The units will be completed and delivered by early 2011.

As of April 30, 2009, the degree of progress of the works is approximately 2.03% for the Parque complex and 19.16% for the Río complex.

Terreno Caballito, CYRSA. As of the closing of fiscal year 2008, we and CYRSA executed a barter deed pursuant to which we transferred to CYRSA under a swap agreement the property described below, which has a total surface area of 9,784 square meters: plot of land, designated as Parcel ONE L, in block 35, facing Méndez de Andes street between Rojas and Colpayo streets in the Caballito neighborhood.

In turn, CYRSA agreed to carry out in the property a real estate development for residential use, which shall comprise a first stage of two free-perimeter towers and a third building to be developed in a second stage at the option of CYRSA. In exchange for the transfer of the property, CYRSA paid to IRSA US\$ 0.12 million and agreed to make a non-cash consideration consisting in transferring under barter to IRSA certain home units in the buildings to be built which will represent 25% of the meters. Furthermore, as security for the performance of its obligations, CYRSA has created a security interest over the property by mortgaging it in favor of IRSA in the amount of US\$ 12.6 million.

On July 31, 2008, the deed of conveyance of title to the land was executed.

The following is a detail of the properties being developed by IRSA as of March 31, 2009.

Hotels

Income from the hotel segment rose by 10.5%, up from Ps. 115.1 million for the first nine months of fiscal year 2008 to Ps. 127.1 million for the same period in fiscal year 2009.

This was mainly due to the increase in the average rate, which in the first nine-month period of fiscal year 2009 reached an average Ps.642 per room rate, compared to Ps.619 in the previous period whereas average occupancy was 73.9% compared to 75.7% for the same period in the previous fiscal year. This slight drop in the occupancy average can be attributed to Hotel Llao-Llao, whose average occupancy level for the nine-month period ended March 2009 was 60.6%.

The following table shows information regarding our hotels for the nine-month period as of March 31, 2009.

As of March 31, 2009, 61% of the soybean crops were harvested over 19,632 hectares and preparations have started for the sowing of 1,873 hectares of corn (summer crop) and 1,000 hectares of rice in the farms Alto Taquari, Araucária, Chaparral, Cremaq, Jatobá and San Pedro. In turn, in the quarter preparations have started for planting sugar cane over new surface areas in the farms Alto Taquari and Araucária to increase the surface areas planted with such crops.

In the nine-month period ended on March 31, 2009, BrasilAgro revenues from sales of crops amounted to R\$ 10.8 million, 153.1% higher than those posted in the same period of the previous fiscal year. The net result has been a gain of R\$ 4.5 million compared to the R\$ 1.8 million net income posted in the same period of the previous fiscal year. This result reflects, mainly, higher income from sales of crops and a 49% increase in financial results compared to the same period in the previous fiscal year.

For the third quarter of fiscal year 2009, BrasilAgro presented consolidated assets for R\$ 698,0 million, of which R\$ 254.6 million are included in the Cash and Banks and Short-term Investments accounts.

Paraguay

Bolivia

On January 22, 2009, the deed was notarized for the purchase of 4,566 hectares in the Las Londras farm in the Province of Guarayos, Bolivia. Also on that date US\$ 3.8 million were paid, that is, 42.9% of the total amount of the transaction.

Prospects for the coming quarter

We believe that, given the new world scenario, companies such as Cresud, with a long track record and in-depth knowledge of the business, will have with good possibilities of tapping into the opportunities arising in the market.

Edgar Filing: CRESUD INC - Form 6-K

For the coming quarter, our strategy is to continue with the development of our production activities. As concerns crops, the last quarter of the year has the biggest impact on the agricultural business as that is when a major part of the soybean and corn volumes are harvested. In spite of the distortion in the prices of commodities due to the current financial situation, the decrease in South America's output caused by the drought had an impact on the level of prices, which allowed prices to recover. Besides, the demand for crops continues to be firm and global stocks remain at low levels.

Comercial, Inmobiliaria, Financiera y Agropecuaria

Business Highlight (continued)

Looking forward, we will continue to be on the watch-out for tapping into the best opportunities emerging in the business of purchasing and selling land. As regards the development of marginal areas, we will continue to add more land assigned to agricultural and cattle-raising production through the development of our Los Pozos farm and our concession over the Agropecuaria Anta S.A. farm.

Continuing with our regional expansion strategy, the start of the corn and soybean harvest deserves special mention as it spans 10,448 hectares of the farms located in Bolivia. Also noteworthy in this respect is the development of land in our farms located in the Republic of Paraguay in order to add more land assigned to agriculture. In much the same way as we have launched our business in Brazil, we are presently studying possibilities in other countries in Latin America, where we see high potential for land appreciation and conditions fit for agricultural development.

Faced with the change in the economic scenario, Cresud is now assessing different alternatives for maintaining the Company's strength and value on the basis of the quality of its assets, which includes farms with high productive value and appreciation potential and the productive businesses carried out in various areas in Latin America. One of these alternatives, which we are already implementing is the plan for repurchasing own shares to contribute to the strengthening of our shares in the market.

As concerns our investment in IRSA, as from the second quarter of the current fiscal year, Cresud has presented its financial statements in consolidated form with IRSA's.

The deceleration of the economy has started to take its toll on the level of income derived from business activities in general, and our business segments do not stand aloof from this reality.

However, as concerns our Shopping Center segment in particular, our various shopping centers are uniquely attractive to our tenants, as has been shown by their willingness to join the new project that we expect to launch in the coming days: More than 94% of the leasable area of Dot Baires (the shopping center at Av. Gral. Paz. and Panamericana) has already been taken. We believe that given its location and commercial proposal, Dot Baires will add substantial value to our portfolio.

Another important component of our commercial strategy for maintaining the attractiveness of our shopping centers consists in launching marketing campaigns to attract customers and nationally and internationally recognized tenants. Therefore, we will continue to promote tenant diversification and to promote the participation of top brands in our shopping centers so as to offer our consumers the best products in the market. In this way, brands such as Salvatore Ferragamo, North Face and Starbucks have recently joined our proposal.

As concerns our Consumer Finance business, we will continue to take actions on those areas that call for an improvement in this segment's operating and financial performance, taking measures aimed at stabilizing the business in light of the present economic scenario.

As concerns our lease office segment in Buenos Aires, we have recently noted certain caution among potential lessees regarding decisions to lease larger areas. However, we have agreed on a lease for our most recent addition to our portfolio, the Dique IV office building.

Regarding the Sales and Development segment, we will continue to make progress in the execution of the first project launched through the IRSA-CYRELA vehicle, in which sales have been booked for almost 100% of the units and work progress may be already perceived. As concerns our other future ventures, we will continue evaluating the appropriate moment to launch these projects.
