Notes to Consolidated Financial Statements (Unaudited)

Note 1 - Significant Accounting Policies

Basis of Presentation

The accompanying unaudited consolidated financial statements have been prepared in accordance with the instructions to the SEC Form 10-Q; therefore, they do not include all information and footnotes necessary for a fair presentation of financial position, results of operations, and cash flows in conformity with GAAP. All adjustments consisting of normally recurring accruals that, in the opinion of management, are necessary for a fair presentation of the financial position and results of operations for the periods covered by this report have been included. The accompanying unaudited consolidated financial statements should be read in conjunction with the consolidated financial statements and related notes appearing in Synovus' 2010 10-K. There have been no significant changes to the accounting policies as disclosed in Synovus' 2010 10-K.

In preparing the consolidated financial statements in accordance with GAAP, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities as of the date of the respective balance sheets and the reported amounts of revenues and expenses for the periods presented. Actual results could differ significantly from those estimates.

Material estimates that are particularly susceptible to significant change relate to the determination of the fair value of investments; the allowance for loan losses; the valuation of other real estate; the valuation of impaired and other loans held for sale; the valuation of long-lived assets, and other intangible assets; the valuation of deferred tax assets; and the disclosures of contingent assets and liabilities. In connection with the determination of the allowance for loan losses and the valuation of certain impaired loans and other real estate, management obtains independent appraisals for significant properties and properties collateralizing impaired loans. For valuation of impaired loans and other real estate, management also considers other factors or recent developments such as changes in absorption rates or market conditions at the time of valuation and anticipated sales values based on management's plans for disposition.

A substantial portion of Synovus' loans are secured by real estate in five southeastern states (Georgia, Alabama, Florida, South Carolina, and Tennessee). Accordingly, the ultimate collectability of a substantial portion of Synovus' loan portfolio is susceptible to changes in market conditions in these areas. Total commercial real estate loans represent 37.0% of the total loan portfolio at September 30, 2011. Due to declines in real estate values over the past three years, the loans in the commercial real estate portfolio may have a greater risk of non-collection than other loans. Based on available information, management believes that the allowance for loan losses is adequate. While management uses available information to recognize losses on loans, future additions to the allowance may be necessary based on changes in economic conditions, the ability of borrowers to repay their loans, and management's plans for disposition. In addition, various regulatory agencies, as an integral part of their examination process, periodically review Synovus' allowance for loan losses. Such agencies may require Synovus to make changes to the allowance for loan losses based on their judgment of information available to them at the time of their examination.

Goodwill is tested for impairment on an annual basis and as events occur or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying amount. Synovus completed its 2011 annual review as of June 30, 2011 and concluded there was no impairment of goodwill as of this date.

Table of Contents**Notes to Consolidated Financial Statements (Unaudited)****Supplemental Cash Flow Information**

Supplemental cash flow information for the nine months ended September 30, 2011 and 2010 is presented in the table below.

<i>(in thousands)</i>	Nine Months Ended September 30,	
	2011	2010
Cash Paid (Received) During the Period for:		
Income tax payments (refunds), net	\$ 2,821	(324,963)
Interest paid	154,456	240,741
Non-cash Investing Activities (at Fair Value):		
(Decrease) increase in unrealized gains net of unrealized losses on available for sale securities ⁽¹⁾	(15,502)	27,418
(Decrease) increase in unrealized gains net of unrealized losses on hedging instruments ⁽¹⁾	(2,475)	23,993
Mortgage loans held for sale transferred to loans	6,442	2,806
Purchase commitments for mortgage-backed securities TBA	205,938	
Loans foreclosed and transferred to other real estate	173,461	293,555
Loans transferred to other loans held for sale	407,668	337,837
Other loans held for sale transferred to loans	20,043	3,427
Other loans held for sale foreclosed and transferred to other real estate	16,966	2,264
Premises and equipment transferred to other assets held for sale ⁽²⁾	28,048	
Write down to fair value for other loans held for sale	13,213	5,281
Impairment loss on available for sale securities	1,641	1,198

- (1) Changes in unrealized gains on available for sale securities, fair value hedges, and cash flow hedges have not been adjusted for the impact of deferred taxes.
- (2) Amounts transferred include \$17.0 million, net of asset impairment charges, related to premises impacted by branch closings discussed further in Note 2 Restructuring Charges herein and \$11.8 million of other vacant premises and land originally acquired for future branch development. Amounts presented are net of impairment charges incurred to record the transferred assets at the lower of their cost or fair value consistent with ASC 360.

Cash and Cash Equivalents

Cash and cash equivalents consist of cash and due from banks. At September 30, 2011 and December 31, 2010, cash and cash equivalents include \$60.5 million and \$66.6 million, respectively, on deposit to meet Federal Reserve Bank requirements, and includes \$33.1 million at September 30, 2011 which is restricted as to withdrawal. There were no cash and cash equivalents restricted as to withdrawal at December 31, 2010.

Short-term Investments

Short-term investments consist of interest bearing funds with the Federal Reserve Bank, interest earning deposits with banks, and federal funds sold and securities purchased under resale agreements. Interest earning deposits with banks include \$11.4 million at September 30, 2011 and \$11.3 million at December 31, 2010, which is pledged as collateral in connection with certain letters of credit. Federal funds sold include \$141.1 million at September 30, 2011 and \$154.6 million at December 31, 2010, which is pledged to collateralize derivative instruments in a net liability position.

Recently Adopted Accounting Standards Updates

Effective January 1, 2010, Synovus adopted certain of the new disclosure requirements of ASU No. 2010-06, Improving Disclosures about Fair Value Measurements. ASU 2010-06 amends ASC 820-10, Fair Value Measurements and Disclosures. Overall, to add a new requirement to disclose details of significant transfers in and out of Level 1 and Level 2 measurements and the reasons for the transfers. The ASU clarifies that fair value disclosure of assets and liabilities should be by class rather than major category, and further clarifies that reporting entities must disclose the valuation techniques and inputs used in determining the fair value of each class of assets and liabilities. This clarifies that the existing disclosure requirement of ASC 820 applies to Level 2 as well as Level 3 measurements. Further, for recurring measurements, it clarifies that disclosure of the inputs used is required. On January 1, 2011, Synovus adopted the remaining disclosure requirement of ASU 2010-06, which requires the gross presentation of activity within the Level 3 roll forward, presenting separately information about purchases, sales, issuances, and settlements. The impact of adoption for Synovus was the inclusion of additional disclosures in Synovus consolidated financial statements.

Effective December 31, 2010, Synovus adopted certain of the key provisions of ASU No. 2010-20, Disclosures about the Credit Quality of Financing Receivables and the Allowance for Credit Losses,

Table of Contents**Notes to Consolidated Financial Statements (Unaudited)**

(ASU 2010-20). Additionally, in January 2011, ASU 2011-01, Deferral of the Effective Date of Disclosures About Troubled Debt Restructurings in Update No. 2010-20, was issued which temporarily delays the disclosure requirements related to modifications to be effective concurrent with the effective date of ASU 2011-02, A Creditor's Determination of Whether a Restructuring is a Troubled Debt Restructuring. ASU 2010-20 amends ASC 310 by requiring more robust and disaggregated disclosures about the credit quality of an entity's financing receivables and its allowance for loan losses. The objective of enhancing these disclosures is to improve financial statement users' understanding of (1) the nature of an entity's credit risk associated with its financing receivables and (2) the entity's assessment of that risk in estimating its allowance for loan losses as well as changes in the allowance and reasons for those changes. Most of the new and amended disclosures in the ASU were effective December 31, 2010; however, the disclosures that include information for activity that occurs during a reporting period became effective January 1, 2011. Those disclosures include (1) the activity in the allowance for loan losses for each period and (2) disclosures about modifications of financing receivables. The impact of adoption for Synovus was the inclusion of additional disclosures in Synovus consolidated financial statements.

Effective January 1, 2011, Synovus adopted ASU No. 2010-28, When to Perform Step 2 of the Goodwill Impairment Test for Reporting Units with Zero or Negative Carrying Amounts (a consensus of the FASB Emerging Issues Task Force), (ASU 2010-28). Under ASC 350-20, step 1 of the goodwill impairment test requires companies to compare a reporting unit's fair value to its carrying amount. If the reporting unit's carrying amount exceeds its fair value, companies must perform Step 2 of the test and measure the amount of goodwill impairment, if any. When a reporting unit's carrying amount is zero or negative, current guidance does not allow a company to proceed to Step 2, even though other factors may indicate that the goodwill was impaired. The EITF reached a final consensus with ASU 2010-28 that requires entities with reporting units with a zero or negative carrying value to assess, considering qualitative factors such as those listed in ASC 350-20-35-30 (these factors are not all-inclusive), whether it is more likely than not that goodwill impairment exists. If an entity concludes that it is more likely than not that goodwill impairment exists, the entity must perform step 2 of the goodwill impairment test. Synovus' goodwill balance is associated with two financial management services reporting units, both of which had positive carrying amounts as of June 30, 2011. Therefore, Synovus does not expect that the adoption of the provisions of ASU 2010-28, will have a material impact on its financial position, results of operations, or cash flows.

Effective January 1, 2011, Synovus adopted ASU No. 2010-29, Disclosure of Supplementary Pro Forma Information for Business Combinations (a consensus of the FASB Emerging Issues Task Force), (ASU 2010-29). ASU 2010-29 addresses differences in the ways entities have interpreted ASC 805's requirements for disclosures about pro forma revenue and earnings in a business combination. ASU 2010-29 requires that if an entity presents comparable financial statements, the entity should disclose revenue and earnings of the combined entity as though the business combination(s) that occurred during the current year had occurred as of the beginning of the comparable prior annual reporting period. In addition, ASU 2010-29 expands the supplemental pro forma disclosures under ASC 805 to include a description of the nature and amount of material, nonrecurring pro forma adjustments directly attributable to the business combination included in the reported pro forma revenue and earnings. The impact of adoption will be inclusion of additional disclosures in Synovus' consolidated financial statements in connection with any future business combinations.

Effective July 1, 2011, Synovus adopted ASU 2011-02, A Creditor's Determination of Whether a Restructuring is a Troubled Debt Restructuring. The ASU provides additional guidance to assist creditors in determining whether a modification or restructuring of a receivable meets the criteria to be considered a TDR, both for purposes of recognizing loan losses and additional disclosures regarding TDRs. A modification of a credit arrangement constitutes a TDR if it constitutes a concession and the debtor is experiencing financial difficulties. The clarification for classification of loans as TDRs that was provided in ASU 2011-02, was applied to all debt restructurings occurring on or after January 1, 2011, and the measurement of impairment for those newly identified TDRs was applied prospectively beginning on July 1, 2011. The related disclosures, which were previously deferred by ASU 2011-01, were also included for the interim reporting period ended September 30, 2011, and will be included for subsequent reporting periods. While the adoption of ASU 2011-02 resulted in an increase of approximately \$190 million in loans identified as TDRs, primarily due to consideration of the interest rate granted as compared to the market interest rate for a loan with similar risk attributes, there was not a material impact on the September 30, 2011 allowance for loan losses.

Table of Contents**Notes to Consolidated Financial Statements (Unaudited)****Recently Issued Accounting Standards Updates**

In April 2011, the FASB issued ASU 2011-03, *Reconsideration of Effective Control for Repurchase Agreements*. The ASU modifies the criteria for determining when repurchase agreements and other similar agreements would be accounted for as financings (secured borrowings/lending agreements) as opposed to sales (purchases) with commitments to repurchase (resell). In addition, ASU 2011-03 removes from the assessment of effective control the criterion requiring the transferor to have the ability to repurchase or redeem the financial assets on substantially the agreed terms, even in default by the transferee, which makes the level of cash collateral received by the transferor in a repossession or other similar agreement irrelevant in determining if it should be accounted for as a sale. As a result, more agreements will be accounted for as financings. The FASB believes that contractual rights and obligations determine effective control, and there does not need to be a requirement to assess the ability to exercise those rights. The guidance in this ASU is effective prospectively for new transfers and existing transactions that are modified in the first interim or annual period beginning on or after December 15, 2011. Early adoption is not permitted. Synovus is currently evaluating the impact of adopting ASU 2011-03 on its financial position and results of operations but has not yet completed its assessment.

In May 2011, the FASB issued ASU 2011-04, *Fair Value Measurement (Topic 820): Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRS*. This guidance improves and aligns fair value measurement and disclosure requirements under U.S. GAAP and IFRS. ASU 2011-04 requires premiums and discounts, such as control premiums or non-controlling interest discounts, to be applied in a fair value measurement categorized within Level 2 or Level 3 of the fair value hierarchy if market participants would use such factors when pricing the asset or liability. However, blockage factors related to the size of a holding are not permitted in a fair value measurement because a fair value measurement reflects the value of the asset or liability to a market participant for a particular unit of account and is not necessarily representative of the value of the entire holding. This ASU also expands disclosure requirements about fair value measurements including information about the sensitivity of a fair value measurement categorized within Level 3 of the fair value hierarchy to changes in unobservable inputs and the categorization by level of the fair value hierarchy for items that are not measured at fair value in the Consolidated Balance Sheets, but for which the fair value of such items is required to be disclosed. ASU 2011-04 is effective for the first interim or annual period beginning on or after December 15, 2011. Early adoption is not permitted. Synovus is currently evaluating the impact of adopting ASU 2011-04 on its financial position and results of operations but has not yet completed its assessment.

In June 2011, the FASB issued ASU 2011-05, *Comprehensive Income (Topic 220): Presentation of Comprehensive Income*. The main provisions of this ASU provide the option to present comprehensive income in either one or two consecutive financial statements. A single statement presentation must include the components of net income and total net income, the components of other comprehensive income and total other comprehensive income, and a total for comprehensive income. In a two-statement approach, the components of net income and total net income are presented in the first statement. That statement must be immediately followed by a financial statement that presents the components of other comprehensive income, a total for other comprehensive income, and a total for comprehensive income. The option in current GAAP that permits the presentation of other comprehensive income in the statement of changes in equity has been eliminated. The amendments of this ASU will be applied retrospectively by Synovus and are effective for the first interim period beginning on or after December 31, 2011. Early adoption is permitted. The impact of adoption for Synovus will be a change in the format of presentation of comprehensive income. Synovus has not yet determined whether it will use a single statement or a two statement approach.

In September 2011, the FASB issued ASU 2011-08, *Testing Goodwill for Impairment* (the revised standard). Under the new standards, an entity has the option to first assess qualitative factors to determine whether it is necessary to perform the current two-step test. If an entity believes, as a result of its qualitative assessment, that it is more-likely-than-not that the fair value of a reporting unit is less than its carrying amount, the quantitative impairment test is required. Otherwise, no further testing is required. An entity can choose to perform the qualitative assessment on none, some or all of its reporting units. Moreover, an entity can bypass the qualitative assessment for any reporting unit in any period and proceed directly to step one of the impairment test, and then resume performing the qualitative assessment in any subsequent period. The revised standard is effective for

Table of Contents**Notes to Consolidated Financial Statements (Unaudited)**

annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. However, an entity can choose to early adopt even if its annual test date is before the issuance of the final standard, provided that the entity has not yet performed its 2011 annual impairment test or issued its financial statements. Synovus is currently evaluating the impact of adopting ASU 2011-03 on its current approach to evaluating goodwill impairment, and at this point, Synovus does not anticipate making significant changes to the current approach that has been applied on a historic basis.

Reclassifications

Prior period consolidated financial statements are reclassified whenever necessary to conform to the current periods presentation.

Subsequent Events

Synovus has evaluated, for consideration or disclosure, all transactions, events, and circumstances subsequent to the balance sheet date and through the date the accompanying unaudited consolidated financial statements were issued, and has reflected or disclosed those items within the consolidated financial statements and related footnotes as deemed appropriate.

Note 2 - Restructuring Charges

In January 2011, Synovus announced efficiency and growth initiatives intended to streamline operations, boost productivity, reduce expenses, and increase revenue. During the three months ended March 31 and June 30, 2011, Synovus recognized restructuring charges of \$24.3 million and \$3.1 million, respectively, associated with these initiatives. During the three months ended September 30, 2011, Synovus incurred additional restructuring charges of \$2.6 million (\$1.0 million of severance charges and \$1.6 million of professional fees and other charges). For the nine months ended September 30, 2011, total restructuring charges are as follows:

(in thousands)

Severance charges	\$ 17,310
Lease termination charges	3,107
Asset impairment charges	5,625
Professional fees and other charges	3,984
Total restructuring charges	\$ 30,026

As part of these efficiency initiatives, Synovus closed 31 branches during the nine months ended September 30, 2011 and transferred \$17.0 million of premises and equipment, net of asset impairment charges, to other assets held for sale, a component of other assets on the consolidated statement of financial position. During the nine months ended September 30, 2011, Synovus recognized impairment charges of \$5.6 million upon transfer to other assets held for sale.

The liability for restructuring activities was \$2.9 million at September 30, 2011 which includes estimated severance payments and lease termination payments. Cash payments associated with this liability are expected to occur over the next six months.

The liability for severance charges was recognized in accordance with the one-time employee termination benefit provisions of ASC 420-10-25 upon management's commitment to a plan identifying the number of employees to be terminated, the terms of the benefit arrangement, and upon communication of this information to the employees to be terminated. While recognition of restructuring charges is triggered by communication of the plan and benefit information to affected employees, the timing of recognition depends on whether an employee is required to render

Edgar Filing: SYNOVUS FINANCIAL CORP - Form 10-Q

further service in order to receive the termination benefits. For employees who are not required to render further service in order to receive termination benefits or who are not required to render service beyond a minimum retention period of 60 days, a liability is recognized on the date of communication to affected employees. For employees who are required to work beyond the minimum retention period in order to receive termination benefits, the fair value of termination benefits at the communication date is recognized ratably over the future service period.

Table of Contents**Notes to Consolidated Financial Statements (Unaudited)**

Restructuring charges resulting from the impairment of long-lived assets were recognized in accordance with ASC 360-10-35 upon a significant adverse change in the extent or manner in which a long-lived asset is being used (removed from service), or upon management's commitment to a plan to sell an asset, and the asset is available for immediate sale, an active program to locate a buyer has been identified, the sale is probable, the asset is being marketed for a price that is reasonable in relation to its current fair value, and it is unlikely that significant changes to the plan will be made or that the plan will be withdrawn. Restructuring charges resulting from lease termination expenses were recognized in accordance with ASC 840-20 and ASC 840-30 upon notifying the lessor of Synovus' intent to terminate a lease.

Note 3 Comprehensive Income (Loss)

Other comprehensive income (loss) consists of the change in net unrealized losses on cash flow hedges, the change in net unrealized gains (losses) on investment securities available for sale, and the amortization of the post-retirement unfunded health benefit. Comprehensive income (loss) consists of net income (loss) plus other comprehensive income (loss).

Comprehensive income (loss) for the nine and three months ended September 30, 2011 and 2010 is presented below.

<i>(in thousands)</i>	Nine Months Ended September 30,		Three Months Ended September 30,	
	2011	2010	2011	2010
Net (loss) income	\$ (88,200)	(625,424)	30,208	(181,167)
Other comprehensive income (loss), net of tax:				
Change in net unrealized gains on cash flow hedges	(9,451)	(9,768)	(5,091)	(3,188)
Change in net unrealized gains and losses on investment securities available for sale, net of reclassification adjustment	(15,518)	16,756	(28,625)	(6,818)
Amortization of post-retirement unfunded health benefit		(682)		46
Other comprehensive (loss) income	(24,969)	6,306	(33,716)	(9,960)
Comprehensive loss	\$ (113,169)	(619,118)	(3,508)	(191,127)

Note 4 Investment Securities

The following table summarizes Synovus' available for sale investment securities as of September 30, 2011 and December 31, 2010.

<i>(in thousands)</i>	September 30, 2011			Fair Value
	Amortized Cost⁽¹⁾	Gross Unrealized Gains	Gross Unrealized Losses	
U.S. Treasury securities	\$ 41,034	22		41,056
U.S. Government agency securities	37,523	3,168		40,691
Securities issued by U.S. Government sponsored enterprises	926,471	15,926	(1,536)	940,861

Edgar Filing: SYNOVUS FINANCIAL CORP - Form 10-Q

Mortgage-backed securities issued by U.S. Government agencies	393,593	21,104		414,697
Mortgage-backed securities issued by U.S. Government sponsored enterprises	1,673,731	44,842	(1,946)	1,716,627

State and municipal securities	27,209	804	(22)	27,991
Equity securities	6,591		(320)	6,271
Other investments	5,449			5,449
Total	\$ 3,510,936	89,404	(3,829)	3,596,511

Table of Contents**Notes to Consolidated Financial Statements (Unaudited)**

	December 31, 2010			
	Amortized Cost ⁽¹⁾	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
<i>(in thousands)</i>				
U.S. Treasury securities	\$ 251,842	5,830		257,672
U.S. Government agency securities	48,107	3,685	(1)	51,791
Securities issued by U.S. Government sponsored enterprises	846,536	18,845	(3,061)	862,320
Mortgage-backed securities issued by U.S. Government agencies	447,502	12,706	(370)	459,838
Mortgage-backed securities issued by U.S. Government sponsored enterprises	1,569,955	65,421	(5,931)	1,629,445
Collateralized mortgage obligations issued by U.S. Government sponsored enterprises	28,985	1,011	(2)	29,994
State and municipal securities	49,385	1,066	(108)	50,343
Equity securities	11,970	836		12,806
Other investments	84,909	1,150		86,059
Total	\$ 3,339,191	110,550	(9,473)	3,440,268

(1) Amortized cost is adjusted for other-than-temporary impairment charges which have been recognized

At September 30, 2011 and December 31, 2010, investment securities with a carrying value of \$2.47 billion and \$2.63 billion, respectively, were pledged to secure certain deposits, securities sold under repurchase agreements, payment network arrangements, and FHLB advances as required by law and contractual agreements.

Synovus has reviewed investment securities that are in an unrealized loss position as of September 30, 2011 and December 31, 2010 for other-than-temporary impairment and does not consider any securities in an unrealized loss position to be other-than-temporarily impaired. Synovus does not intend to sell these investment securities, and it is more likely than not that Synovus will not be required to sell these securities prior to recovery or maturity. The unrealized losses are related primarily to increases in interest rates on comparable securities from the date of purchase. Synovus regularly evaluates its investment securities portfolio to ensure that there are no conditions that would indicate that the securities are other-than-temporarily impaired. These factors include length of time that the security has been in a loss position, the extent to which the fair value has been below amortized cost, and the credit standing of the issuer.

Table of Contents**Notes to Consolidated Financial Statements (Unaudited)**

Gross unrealized losses on investment securities available for sale, fair value of the related securities aggregated by investment category, and length of time that these securities have been in a continuous unrealized loss position at September 30, 2011 and December 31, 2010 were as follows:

	Less than 12 Months		September 30, 2011 12 Months or Longer		Total Fair Value

Table of Contents**Notes to Consolidated Financial Statements (Unaudited)****Note 5 Other Loans Held for Sale**

Loans are transferred to other loans held for sale at fair value when Synovus makes the determination to sell specifically identified loans. The fair value of the loans is primarily determined by analyzing the underlying collateral of the loan and the anticipated external market prices of similar assets less estimated costs to sell. At the time of transfer, if the fair value is less than the carrying amount, the difference is recorded as a charge-off against the allowance for loan losses. Decreases in the fair value subsequent to the transfer, as well as losses (gains) realized from sale of these loans, are recognized as a component of non-interest expense on the consolidated statements of operations.

During the nine and three months ended September 30, 2011, Synovus transferred loans with a carrying value immediately preceding the transfer totaling \$567.6 million and \$168.8 million, respectively, to other loans held for sale. Synovus recognized charge-offs upon transfer on these loans totaling \$159.9 million and \$50.7 million for the nine and three months ended September 30, 2011, respectively. These charge-offs which resulted in a new cost basis of \$407.7 million and \$118.1 million, respectively, for the loans transferred during the nine and three months ended September 30, 2011 were based on the fair value, less estimated costs to sell, of the loans at the time of transfer.

During the nine and three months ended September 30, 2010, Synovus transferred loans with a carrying value immediately preceding the transfer totaling \$138.0 million and \$28.2 million, respectively, to other loans held for sale. Synovus recognized charge-offs upon transfer on these loans totaling \$55.7 million and \$5.1 million for the nine and three months ended September 30, 2010, respectively. These charge-offs which resulted in a new cost basis of \$82.3 million and \$23.1 million, respectively, for the loans transferred during the nine and three months ended September 30, 2010 were based on the fair value less costs to sell of the loans at the time of transfer.

Note 6 Loans and Allowance for Loan Losses

Loans outstanding, by classification, are summarized below.

<i>(in thousands)</i>	September 30, 2011	December 31, 2010
Investment properties	\$ 4,595,948	5,059,102

Total loans, net of deferred fees and costs	\$ 20,102,086	21,585,763

For purposes of the disclosures required pursuant to the adoption of amendments to ASC 310, Receivables, the loan portfolio was disaggregated into segments and then further disaggregated into classes for certain disclosures. A portfolio segment is defined as the level at which an entity develops and documents a systematic method for determining its allowance for loan losses. There are three loan portfolio segments that include commercial and industrial, commercial real estate, and retail. A class is generally determined based on the initial measurement attribute, risk characteristics of the loan, and an entity's method for monitoring and assessing credit risk. Commercial and industrial is a separate commercial loan class while commercial loan classes within CRE include investment properties, 1-4 family properties, and land acquisition. Retail loan classes include home equity lines, consumer mortgages, credit cards, and other retail loans.

Credit cards	277,442	3,715	3,813	7,528		284,970
Other retail loans	531,010	5,921	225	6,146	5,382	542,538
Total retail	3,830,239	46,747	5,344	52,091	68,478	3,950,808
Total loans	\$ 20,527,821	160,534	16,222	176,756	891,622	21,596,199

Nonaccrual loans as of September 30, 2011 and December 31, 2010 were \$872.1 million and \$891.6 million, respectively. Interest income on nonaccrual loans outstanding at September 30, 2011 and December 31, 2010 that would have been recorded for the three months ended September 30, 2011 and December 31, 2010 if the loans had been accruing was \$18.1 million and \$21.9 million, respectively. Interest payments received on these loans during the nine months ended September 30, 2011 were \$9.5 million. Interest payments received on these loans during the three months ended September 30, 2011 and December 31, 2010 were \$3.4 million and \$4.9 million, respectively. These payments have been recorded as a reduction in loan principal.

The credit quality of the loan portfolio is summarized no less frequently than quarterly using the standard asset classification system utilized by the federal banking agencies. These classifications are divided into three groups: Not Classified (Pass), Special Mention, and Classified or Adverse rating (Substandard , Doubtful , and Loss) and are defined as follows:

Pass - loans which are well protected by the current net worth and paying capacity of the obligor (or guarantors, if any) or by the fair value, less cost to acquire and sell, of any underlying collateral in a timely manner.

Special Mention - loans which have potential weaknesses that deserve management's close attention. These loans are not adversely classified and do not expose an institution to sufficient risk to warrant an adverse classification.

Substandard - loans which are inadequately protected by the current sound worth and paying capacity of the obligor or by the collateral pledged, if any. Loans with this classification are characterized by the

Table of Contents**Notes to Consolidated Financial Statements (Unaudited)**

distinct possibility that the institution will sustain some loss if the deficiencies are not corrected.

Doubtful - loans which have all the weaknesses inherent in loans classified as substandard with the added characteristic that the weaknesses make collection or liquidation in full highly questionable and improbable on the basis of currently known facts, conditions, and values.

Loss - loans which are considered by management to be uncollectible and of such little value that its continuance on the institution's books as an asset, without establishment of a specific valuation allowance or charge-off is not warranted.

In the following tables, retail loans are classified as pass except when a retail loan reaches 90 days past due, it is downgraded to substandard, and upon reaching 120 days past due, it is downgraded to loss and charged off, in accordance with the FFIEC Uniform Retail Credit Classification and Account Management Policy.

- (1) Includes \$825.5 million and \$837.8 million of nonaccrual substandard loans at September 30, 2011 and December 31, 2010, respectively.
- (2) The loans within these risk grades are on nonaccrual status.
- (3) Amount is fully reserved at September 30, 2011 and will be charged off during the fourth quarter of 2011.
- (4) Amount was fully reserved at December 31, 2010 and was charged off during the first quarter of 2011.
- (5) Represent amounts that were 120 days past due. Per regulatory guidance, these credits are downgraded to the loss category with an allowance for loan losses equal to the full loan amount and are charged off in the subsequent quarter.

Table of Contents**Notes to Consolidated Financial Statements (Unaudited)**

The following table details the change in the allowance for loan losses for the nine and three months ended September 30, 2011 and 2010 by loan segment.

Total impaired loans	\$ 1,100,514	1,573,864	

The average recorded investment in impaired loans was \$1.31 billion for the three months ended December 31, 2010. Excluding accruing TDRs, there was no interest income recognized for the investment in impaired loans for the three months ended December 31, 2010. For the three months ended December 31, 2010, interest income recognized for accruing TDRs was \$6.5 million (during the time within the three months ended December 31, 2010 that the loans were impaired).

Effective July 1, 2011, Synovus adopted ASU 2011-02, A Creditor's Determination of Whether a Restructuring is a Troubled Debt Restructuring, with retrospective application to January 1, 2011, and has accordingly included the required disclosures below:

In the normal course of business, Synovus may renew loans to existing customers upon maturity of the existing loan. These renewals are granted provided that the credit meets the underwriting criteria stated for such credit at the time of renewal. Brief extensions are also made from time to time and are intended for circumstances in which the financial statements, tax returns, or other information required for a loan renewal are not available prior to the existing loan's maturity, or for other non-recurring instances that warrant a brief extension of credit. Additionally, as conditions warrant, Synovus extends, restructures, or otherwise modifies the terms of loans or other extensions of credit. These situations are more common in instances where the borrower is experiencing financial difficulties. Synovus' policy requires that loans be accounted for as troubled debt restructurings if the borrower is experiencing financial difficulties and the bank has granted a concession. Therefore, renewals, restructurings, and modifications are all evaluated to determine TDR status. Such restructurings are primarily in the form of a below-market interest rate, a payment extension of terms generally for less than one year, or a period of time generally less than one year with a reduction of required principal and/or interest payments (e.g., interest only for a period of time).

- (1) Subsequently defaulted is defined as the earlier of the troubled debt restructuring being placed on non-accrual status or obtaining 90 days past due with respect to principal and/or interest payments.

All TDRs are considered to be impaired regardless of the accruing status of such TDRs. TDRs on nonaccrual status are generally returned to accrual status after a period of performance (generally six months).

At September 30, 2011, the allowance for loan losses allocated to accruing TDRs was \$68.1 million compared to \$54.9 million at December 31, 2010.

While the adoption of ASU 2011-02 resulted in an increase of approximately \$190 million in loans identified as TDRs, primarily due to consideration of the interest rate granted as compared to the market interest rate for a loan with similar risk attributes, there was not a material impact on the September 30, 2011 allowance for loan losses.

If at the time that a loan was designated as a TDR the loan was not already impaired, the measurement of impairment resulting from the TDR designation changes from a general pool-level reserve to a specific loan measurement of impairment in accordance with ASC 310-10-35, Accounting By Creditors for Impairment of a Loan an amendment of FASB Statements No. 5, ASC 450-20, and No. 15, ASC 310-40. Generally, the change in the allowance for loan losses resulting from such a TDR is not material. Nonaccrual homogenous loans (commercial-type impaired loans) that are designated as TDRs are individually measured for the amount of impairment, if any, both before and after the TDR designation.

Note 7 - Other Real Estate

ORE consists of properties obtained through a foreclosure proceeding or through an in-substance foreclosure in satisfaction of loans. In accordance with provisions of ASC 310-10-35 regarding subsequent measurement of loans for impairment and ASC 310-40-15 regarding accounting for troubled debt restructurings by a creditor, a loan is classified as an in-substance foreclosure when Synovus has taken possession of the collateral regardless of whether formal foreclosure proceedings have taken place.

ORE is reported at the lower of cost or fair value determined on the basis of current appraisals, comparable sales, and other estimates of fair value obtained principally from independent sources, adjusted for estimated selling costs. Management also considers other factors or recent developments such as changes in absorption rates or market conditions from the time of valuation, and anticipated sales values considering management's plans for disposition, which could result in adjustment to lower the collateral value estimates indicated in the appraisals. At the time of foreclosure or initial possession of collateral, any excess of the loan balance over the fair value of the real estate held as collateral, less costs to sell, is recorded as a charge against the allowance for loan losses. Revenue and expenses from ORE operations as well as gains or losses on sales and any subsequent declines in the value are recorded as foreclosed real estate expense, net, a component of non-interest expense on the

consolidated statements of operations.

The carrying value of ORE was \$239.3 million and \$261.3 million at September 30, 2011 and December 31, 2010, respectively. During the nine months ended September 30, 2011 and 2010, \$190.4 million and \$293.6 million of loans were foreclosed and transferred to other real estate at fair value, respectively. During the nine months ended September 30, 2011 and 2010, Synovus recognized foreclosed real estate expense, net, of \$101.7 million and \$142.8 million, respectively. Synovus recognized foreclosed real estate expense, net, of \$37.1 million and \$50.9 million during the three months ended September 30, 2011 and 2010, respectively. These expenses included write-downs for

Table of Contents

Notes to Consolidated Financial Statements (Unaudited)

declines in fair value of ORE subsequent to the date of foreclosure and realized gains or losses resulting from sales transactions totaling \$87.8 million and \$123.1 million for the nine months ended September 30, 2011 and 2010, respectively, and \$33.3 million and \$43.8 million for the three months ended September 30, 2011 and 2010, respectively.

Note 8 - Fair Value Accounting

Synovus carries various assets and liabilities at fair value based on the fair value accounting guidance under ASC 820 and ASC 825. Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. Synovus determines the fair values of its financial instruments based on the fair value hierarchy established under ASC 820-10, which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. There are three levels of inputs that may be used to measure fair value. A financial instrument's categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement. The three levels of inputs are as follows:

- Level 1** Quoted prices in active markets for identical assets or liabilities. Level 1 assets include equity securities as well as U.S. Treasury securities that are highly liquid and are actively traded in over-the-counter markets.
- Level 2** Observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active, or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities. Level 2 assets and liabilities include debt securities with quoted prices that are traded less frequently than exchange-traded instruments and derivative contracts whose value is determined using a pricing model with inputs that are observable in the market or can be derived principally from or corroborated by observable market data. This category generally includes certain U.S. Government sponsored agency securities, mortgage-backed securities issued by U.S. Government sponsored enterprises and agencies, obligations of states and municipalities, collateralized mortgage obligations issued by U.S. Government sponsored enterprises, derivative contracts, and mortgage loans held-for-sale. Certain private equity investments that hold mutual fund investments that invest in publicly traded companies are also included in Level 2 assets.
- Level 3** Unobservable inputs that are supported by little if any market activity for the asset or liability. Level 3 assets and liabilities include financial instruments whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as instruments for which the determination of fair value requires significant management judgment or estimation. This category primarily includes collateral-dependent impaired loans, other real estate, certain equity investments, and certain private equity investments and certain derivative contracts.

Fair Value Option

Synovus has elected the fair value option for mortgage loans held for sale primarily to ease the operational burdens required to maintain hedge accounting for these loans. Synovus is still able to achieve effective economic hedges on mortgage loans held for sale without the operational time and expense needed to manage a hedge accounting program.

Following is a description of the valuation methodologies used for the major categories of financial assets and liabilities measured at fair value.

Trading Account Assets/Liabilities and Investment Securities Available-for-Sale

The fair values of trading account assets and liabilities and investment securities available-for-sale are primarily based on actively traded markets where prices are based on either quoted market prices or observed transactions. These securities are classified as Level 1 within the valuation hierarchy and include U.S. Treasury securities and equity securities. Liquidity is a significant factor in the determination of the fair value of certain trading account assets and liabilities and certain available-

Table of Contents**Notes to Consolidated Financial Statements (Unaudited)**

for-sale securities. The fair values of these instruments also take into account recent market activity as well as other market observable data such as interest rate, spread and prepayment information, volatility, and U.S. Treasury and swap curves. When quoted market prices are not available, which generally occurs due to the lack of liquidity for certain securities, fair values are estimated using bid prices and quoted market prices of pool or tranches of securities with similar characteristics. These types of securities are classified as Level 2 within the valuation hierarchy and consist of collateralized mortgage obligations, mortgage-backed debt securities, debt securities of U.S. Government-sponsored enterprises and agencies, corporate debt, state and municipal bonds, and certificates of deposit. In both cases, Synovus has evaluated the valuation methodologies of its third-party pricing services to determine whether such valuations are representative of an exit price in Synovus' principal markets. In a few cases where there is limited activity or less transparency around inputs to valuation, securities are classified as Level 3 within the valuation hierarchy.

Mortgage Loans Held for Sale

Synovus elected to apply the fair value option for mortgage loans originated with the intent to sell to investors. When quoted market prices are not available, fair value is derived from a hypothetical-securitization model used to estimate the exit price of the loan in securitization. The bid pricing convention is used for loan pricing for similar assets. The valuation model is based upon forward settlement of a pool of loans of identical coupon, maturity, product, and credit attributes. The inputs to the model are continuously updated with available market and historical data. As the loans are sold in the secondary market and predominantly used as collateral for securitizations, the valuation model represents the highest and best use of the loans in Synovus' principal market. Mortgage loans held for sale are classified within Level 2 of the valuation hierarchy.

Private Equity Investments

Private equity investments include equity method investments in venture capital funds which are classified as Level 3 within the valuation hierarchy. The valuation of these investments requires significant management judgment due to the absence of quoted market prices, inherent lack of liquidity, and the long-term nature of such assets. Based on these factors, the ultimate realizable value of these investments could differ significantly from the value reflected in the accompanying financial statements. Private equity investments are valued initially based upon transaction price. Thereafter, Synovus uses information provided by the fund managers in the determination of fair value. Valuation factors such as recent or proposed purchase or sale of debt or equity of the issuer, pricing by other dealers in similar securities, size of position held, liquidity of the market, and changes in economic conditions affecting the issuer are used in the determination of fair value.

Also, Synovus holds an interest in a private equity investment that consists of a fund that invests in publicly traded financial services companies. Although the fund holds investments in publicly traded entities, the fair value of this investment is classified as Level 2 in the valuation hierarchy because there is no actively traded market for the fund itself, and the value of the investment is based on the aggregate market value of the publicly traded companies that are held in the fund for investment.

Derivative Assets and Liabilities

As part of its overall interest rate risk management activities, Synovus utilizes derivative instruments to manage its exposure to various types of interest rate risk. The majority of derivatives entered into by Synovus are executed over-the-counter and consist of interest rate swaps. The fair values of these derivative instruments are determined based on an internally developed model that uses readily observable market data, as quoted market prices are not available for these instruments. The valuation models and inputs depend on the type of derivative and the nature of the underlying instrument and include interest rates, prices and indices to generate continuous yield or pricing curves, volatility factors, and customer credit related adjustments. The principal techniques used to model the value these instruments are an income approach, discounted cash flows, Black-Scholes or Binomial Pricing models. The sale of TBA mortgage-backed securities for current month delivery or in the future and the purchase of option contracts of similar duration are derivatives utilized by Synovus' mortgage subsidiary, and are valued by obtaining prices directly from dealers in the form of quotes for identical securities or options using a bid pricing convention with a spread between bid and offer quotations.

Table of Contents

Notes to Consolidated Financial Statements (Unaudited)

Interest rate swaps, floors, caps and collars, and TBA mortgage-backed securities are classified as Level 2 within the valuation hierarchy.

The mortgage subsidiary enters into commitments to originate mortgage loans which are classified as derivatives prior to the loan closing when there is a note lock commitment outstanding to a borrower to close the loan, if originated, at a specific interest rate. The fair values of these derivative positions, which are related to mortgage loan commitments with interest rate lock commitments, are determined based on a bid pricing convention as mentioned above. The determination of fair value of interest rate lock commitments includes fall-out ratio assumptions related to the likelihood that a commitment will ultimately result in a closed loan, which is a significant unobservable assumption. Therefore, this type of derivative instrument is classified as Level 3 within the valuation hierarchy. These amounts, however, are insignificant.

In November 2009, Synovus sold certain Visa Class B shares to another Visa USA member financial institution. The sales price was based on the Visa stock conversion ratio in effect at the time for conversion of Visa Class B shares to Visa Class A unrestricted shares at a future date. In conjunction with the sale, Synovus entered into a derivative contract with the purchaser (the "Visa Derivative") which provides for settlements between the parties based upon a change in the ratio for conversion of Visa Class B shares to Visa Class A shares. The fair value of the Visa derivative is measured using a discounted cash flow methodology for estimated future cash flows determined through use of probability weighting for estimates of Visa's aggregate exposure to the Covered Litigation. The conversion rate derivative is classified as Level 3 within the valuation hierarchy as the value is determined using discounted cash flow methodologies and involves unobservable inputs which are not supported by market activity for the liability.

Assets and Liabilities Measured at Fair Value on a Recurring Basis

Synovus adopted certain of the new disclosure requirements of ASU 2010-06, Improving Disclosures about Fair Value Measurements, effective January 1, 2010. The guidance requires fair value disclosures by class of assets and liabilities rather than by major category. For equity and debt securities, class was determined based on the nature and risks of the investments. Transfers between levels were inconsequential for the nine months ended September 30, 2011 and the year ended December 31, 2010. The following table presents all financial instruments measured at fair value on a recurring basis, including financial instruments for which Synovus has elected the fair value option as of September 30, 2011 and December 31, 2010, according to the valuation hierarchy included in ASC 820-10.

- (1)Based on an analysis of the nature and risks of these investments, Synovus has determined that presenting these investments as a single asset class is appropriate.
- (2)Represents the Visa derivative.

Fair Value Option

The following table summarizes the difference between the fair value and the unpaid principal balance for mortgage loans held for sale measured at fair value and the changes in fair value of these loans. The table does not reflect the change in fair value attributable to the related economic hedge Synovus uses to mitigate interest rate risk associated with the financial instruments. Changes in fair value were recorded as a component of mortgage revenue, net and other non-interest income in the consolidated statements of operations, as appropriate. An immaterial portion of these amounts was attributable to changes in instrument-specific credit risk.

(1) Included in earnings as a component of other non-interest income.

(2) Represents additional capital contributed to TTP Fund II (a private equity investment fund) for capital calls.

(3) Other derivative contracts include the Visa derivative and the mortgage derivatives.

Assets Measured at Fair Value on a Non-recurring Basis

The following table presents certain assets and liabilities measured at fair value on a non-recurring basis for which an impairment had been recognized as of September 30, 2011 or December 31, 2010, and are not included in the previous tables in this note.

	As of September 30, 2011			Fair Value Adjustments for the Nine Months Ended September 30, 2011

Other real estate	197,615	105,877

(1) Impaired loans that are collateral-dependent.

Table of Contents

Notes to Consolidated Financial Statements (Unaudited)

Loans are evaluated for impairment in accordance with the provisions of ASC 310-10-35 using the present value of the expected future cash flows discounted at the loan's effective interest rate, or as a practical expedient, a loan's observable market price, or the fair value of the collateral if the loan is collateral-dependent.

Under the practical expedient, Synovus measures the fair value of collateral-dependent impaired loans based on the fair value of the collateral securing these loans less costs to sell. These measurements are classified as Level 3 within the valuation hierarchy. A significant amount of nonaccrual impaired loans are secured by real estate and considered collateral-dependent. The fair value of this real estate is generally determined based upon appraisals performed by a certified or licensed appraiser using inputs such as absorption rates, capitalization rates, and comparables, adjusted for estimated selling costs. Management also considers other factors or recent developments, such as changes in absorption rates or market conditions from the time of valuation, and anticipated sales values considering management plans for disposition, which could result in adjustment to the collateral value estimates indicated in the appraisals. Impaired loans are reviewed and evaluated on at least a quarterly basis for additional impairment and adjusted accordingly based on the same factors identified above.

The fair value of ORE is determined on the basis of current appraisals, comparable sales, and other estimates of value obtained principally from independent sources, adjusted for estimated selling costs. An asset that is acquired through, or in lieu of, loan foreclosures is valued at the fair value of the asset less the estimated cost to sell. The transfer at fair value results in a new cost basis for the asset. Subsequent to foreclosure, valuations are updated periodically and assets are marked to current fair value but not to exceed the new cost basis. Determination of fair value subsequent to foreclosure also considers management's plans for disposition, including liquidation sales, which could result in adjustment to the collateral value estimates indicated in the appraisals.

Other assets consist of certain premises and equipment held for sale, primarily related to the efficiency initiatives discussed in Note 2 Restructuring Charges herein. These assets are classified as held for sale and recorded at the lower of their amortized cost or fair value, less costs to sell, consistent with ASC 360-10. The fair value of these assets is determined primarily on the basis of BOV or appraisals, as circumstances warrant. Both techniques engage licensed or certified professionals that use inputs such as absorption rates, capitalization rates, and comparables, adjusted for estimated selling costs.

Fair Value of Financial Instruments

The following table presents the carrying and fair values of on-balance-sheet financial instruments at September 30, 2011 and December 31, 2010. The fair value represents management's best estimates based on a range of methodologies and assumptions.

Cash and due from banks, interest bearing funds with the Federal Reserve Bank, interest earning deposits with banks, and federal funds sold and securities purchased under resale agreements are repriced on a short-term basis; as such, the carrying value closely approximates fair value.

The fair value of loans is estimated for portfolios of loans with similar financial characteristics. Loans are segregated by type such as commercial, mortgage, home equity, credit card, and other consumer loans. Commercial loans are further segmented into certain collateral code groupings. The fair value of the loan portfolio is calculated, in accordance with ASC 825-10-50, by discounting contractual cash flows using estimated market discount rates which reflect the credit and interest rate risk inherent in the loan. This method of estimating fair value does not incorporate the exit-price concept of fair value prescribed by ASC 820-10 and generally produces a higher value than a pure exit price approach.

The fair value of deposits with no stated maturity, such as non-interest bearing demand accounts, interest bearing demand deposits, money market accounts, and savings accounts, is estimated to be equal to the amount payable on demand as of that respective date. The fair value of time deposits is based on the discounted value of contractual cash flows. The discount rate is estimated using the rates

Table of Contents**Notes to Consolidated Financial Statements (Unaudited)**

currently offered for deposits of similar remaining maturities. Short-term debt that matures within ten days is assumed to be at fair value. The fair value of other short-term and long-term debt with fixed interest rates is calculated by discounting contractual cash flows using estimated market discount rates.

Note 9 - Derivative Instruments

As part of its overall interest rate risk management activities, Synovus utilizes derivative instruments to manage its exposure to various types of interest rate risk. These derivative instruments consist of interest rate swaps, interest rate lock commitments made to prospective mortgage loan customers, and commitments to sell fixed-rate mortgage loans. Interest rate lock commitments represent derivative instruments since it is intended that such loans will be sold.

Synovus utilizes interest rate swaps to manage interest rate risks primarily arising from its core banking activities. These interest rate swap transactions generally involve the exchange of fixed and floating rate interest rate payment obligations without the exchange of underlying principal amounts.

Cash Flow Hedges

Synovus designates hedges of floating rate loans as cash flow hedges. These swaps hedge against the variability of cash flows from specified pools of floating rate prime based loans. Synovus calculates effectiveness of the hedging relationship quarterly using regression analysis. The effective portion of the gain or loss on the derivative instrument is reported as a component of other comprehensive income and reclassified into

Edgar Filing: SYNOVUS FINANCIAL CORP - Form 10-Q

earnings in the same period or periods during which the hedged transactions affect earnings. Ineffectiveness from cash flow hedges is recognized in the consolidated statements of operations as a component of other non-interest income. As of September 30, 2011, there were no cash flow hedges outstanding, and therefore, no cumulative ineffectiveness.

Synovus expects to reclassify from accumulated other comprehensive income (loss) \$3.4 million to pre-tax income during the next twelve months as the related payments for interest rate swaps and amortization of deferred gains (losses) are recorded.

Table of Contents

Notes to Consolidated Financial Statements (Unaudited)

Fair Value Hedges

Synovus designates hedges of fixed rate liabilities as fair value hedges. These swaps hedge against the change in fair value of various fixed rate liabilities due to changes in the benchmark interest rate, LIBOR. Synovus calculates effectiveness of the fair value hedges quarterly using regression analysis. As of September 30, 2011, there were no fair value hedges outstanding, and therefore, no cumulative ineffectiveness. Ineffectiveness from fair value hedges is recognized in the consolidated statements of operations as a component of other non-interest income.

Customer Related Derivative Positions

Synovus also enters into derivative financial instruments to meet the financing and interest rate risk management needs of its customers. Upon entering into these instruments to meet customer needs, Synovus enters into offsetting positions in order to minimize the interest rate risk. These derivative financial instruments are recorded at fair value with any resulting gain or loss recorded in current period earnings. As of September 30, 2011, the notional amount of customer related interest rate derivative financial instruments, including both the customer position and the offsetting position, was \$1.54 billion, a decrease of \$358.8 million compared to December 31, 2010.

Visa Derivative

In conjunction with the sale of Class B shares of common stock issued by Visa to Synovus as a Visa USA member, Synovus entered into a derivative contract with the purchaser which provides for settlements between the parties based upon a change in the ratio for conversion of Visa Class B shares to Visa Class A shares. The conversion ratio changes when Visa deposits funds to a litigation escrow established by Visa to pay settlements for certain litigation for which Visa is indemnified by Visa USA members (the "Covered Litigation"). Deposits by Visa to the litigation escrow effectively represent the repurchase of Class B shares for which the sale proceeds are deposited to the litigation escrow. The fair value of the derivative liability is based on an estimate of Synovus' membership proportion of Visa's aggregate exposure to the Covered Litigation, or in effect the future cumulative deposits to the litigation escrow for settlement of the Covered Litigation.

Mortgage Derivatives

Synovus originates first lien residential mortgage loans for sale into the secondary market and generally does not hold the originated loans for investment purposes. Mortgage loans are sold by Synovus for conversion to securities and the servicing is sold to a third party servicing aggregator, or the mortgage loans are sold as whole loans to investors either individually or in bulk on a servicing released basis.

At September 30, 2011, Synovus had commitments to fund primarily fixed-rate mortgage loans to customers in the amount of \$233.1 million. The fair value of these commitments at a locked interest rate at September 30, 2011 resulted in an unrealized gain of \$3.8 million which was recorded as a component of mortgage revenue, net in the consolidated statements of operations.

At September 30, 2011, outstanding commitments to sell primarily fixed-rate mortgage loans amounted to \$279.0 million. Such commitments are entered into to reduce the exposure to market risk arising from potential changes in interest rates which could affect the fair value of mortgage loans held for sale and outstanding commitments at a locked interest rate to originate residential mortgage loans for resale. The commitments to sell mortgage loans are at fixed prices and are scheduled to settle at specified dates that generally do not exceed 90 days. The fair value of outstanding commitments to sell mortgage loans at September 30, 2011 resulted in an unrealized loss of \$3.8 million which was recorded as a component of mortgage revenue, net in the consolidated statements of operations.

Counterparty Credit Risk and Collateral

Entering into derivative contracts potentially exposes Synovus to the risk of counterparties' failure to fulfill their legal obligations including, but not limited to, potential amounts due or payable under each derivative contract. Notional principal amounts are often used to express the volume of these transactions, but the amounts potentially subject to credit risk are much smaller. Synovus assesses the

Table of Contents**Notes to Consolidated Financial Statements (Unaudited)**

credit risk of its dealer counterparties by regularly monitoring publicly available credit rating information and other market indicators. Dealer collateral requirements are determined via risk-based policies and procedures and in accordance with existing agreements. Synovus seeks to minimize dealer credit risk by dealing with highly rated counterparties and by obtaining collateral for exposures above certain predetermined limits. Management closely monitors credit conditions within the customer swap portfolio which management deems higher risk than dealer counterparties. Collateral is secured at origination and credit related fair value adjustments are recorded against the asset value of the derivative as deemed necessary based upon an analysis which includes consideration of the current asset value of the swap, customer credit rating, collateral value, and current economic conditions. The fair value of customer swap asset positions was \$87.3 million as of September 30, 2011. Such asset values fluctuate based upon current interest rates regardless of changes in notional amounts and changes in customer specific risk.

Collateral Contingencies

Certain of Synovus' derivative instruments contain provisions that require Synovus to maintain an investment grade credit rating from each of the major credit rating agencies. When Synovus' credit rating falls below investment grade, these provisions allow the counterparties of the derivative instrument to demand immediate and ongoing full collateralization on derivative instruments in net liability positions and, for certain counterparties, request immediate termination. As Synovus' current rating is below investment grade, Synovus is required to post collateral, including independent amounts for certain counterparties, against these positions. As of September 30, 2011, collateral of \$141.1 million in the form of cash and short-term investments has been pledged to comply with collateral and independent amount requirements.

At September 30, 2011, Synovus did not have any fair value hedges or cash flow hedges. The impact of derivatives on the balance sheet at September 30, 2011 and 2010 is presented below.

Note 10 Earnings Per Share

Synovus basic and diluted earnings per share amount for the nine and three months ended September 30, 2011 and 2010 were calculated as follows:

Table of Contents**Notes to Consolidated Financial Statements (Unaudited)**

	Nine Months Ended		Three Months Ended	
	September 30,		September 30,	
	2011	2010	2011	2010
<i>(in thousands, except per share data)</i>				
Basic (Loss) Earnings Per Share				
Net (loss) income available to common shareholders	\$ (131,490)	(668,190)	15,667	(195,838)
Weighted average number of common shares	785,267	651,507	785,280	784,916
Basic (loss) earnings per share	\$ (0.17)	(1.03)	0.02	(0.25)
Diluted (Loss) Earnings Per Share				
Net (loss) income available to common shareholders	\$ (131,490)	(668,190)	15,667	(195,838)
Weighted average number of common shares	785,267	651,507	785,280	784,916
Add:				
Effect of diluted share based awards	(a)	(a)	2,669	(a)
Effect of tMEDS settlement	(a)	(a)	122,867	(a)
Weighted average number of diluted common shares	785,267	651,507	910,816	784,916
Diluted (loss) earnings per share	\$ (0.17)	(1.03)	0.02	(0.25)

(a) Synovus reported a net loss attributable to common shareholders for the nine months ended September 30, 2011 and for the nine and three months ended September 30, 2010. For these periods, diluted earnings per share equals basic earnings per share pursuant to ASC 260-10-45 as the effect of settling share based awards and tMEDS contracts would be anti-dilutive. For the three months ended September 30, 2011, the number of anti-dilutive shares was 18.1 million.

Note 11 Share-based Compensation*General Description of Share-based Plans*

Synovus has a long-term incentive plan under which the Compensation Committee of the Board of Directors has the authority to grant share-based awards to Synovus employees. At September 30, 2011, Synovus had a total of 28,242,080 shares of its authorized but unissued common stock reserved for future grants under the 2007 Omnibus Plan. The Plan permits grants of share-based compensation including stock options, non-vested shares, and restricted share units. The grants generally include vesting periods ranging from three to five years. Stock options are granted at exercise prices which equal the fair market value of a share of common stock on the grant-date. Non-vested shares and restricted share units are awarded at no cost to the recipient upon their grant. Synovus has historically issued new shares to satisfy share option exercises and share unit conversions. Dividend equivalents are paid on outstanding restricted share units in the form of additional restricted share units that vest over the same vesting period as the original restricted share unit grant.

Share-based Compensation Expense

Synovus share-based compensation costs are recorded as a component of salaries and other personnel expense in the consolidated statements of operations. Share-based compensation expense for service-based awards is recognized net of estimated forfeitures for plan participants on a straight-line basis over the vesting period. Total share-based compensation expense was \$4.3 million and \$2.0 million for the nine and three months ended September 30, 2011 and \$6.0 million and \$1.7 million for the nine and three months ended September 30, 2010, respectively.

Table of Contents

Notes to Consolidated Financial Statements (Unaudited)

Restricted Share Units

During the nine months ended September 30, 2011, Synovus awarded an aggregate amount of 3,797,423 restricted share units to key employees throughout the Synovus organization. The majority of the awards contain a service-based vesting period of two years. In addition to the service vesting requirement, the vesting of certain awards made to senior management is contingent upon the repayment of its Series A Preferred Stock and achievement of profitability vesting requirements. The weighted average grant-date fair value of the awarded restricted share units was \$2.65 per share. At September 30, 2011, there were 4,551,345 restricted share units outstanding with a weighted average grant-date fair value of \$2.67.

Stock Option Awards

During the nine months ended September 30, 2011, 3,646,940 options were cancelled or expired. At September 30, 2011, there were 18,076,441 options to purchase shares of Synovus common stock outstanding with a weighted-average exercise price of \$10.62.

Note 12 - Retiree Medical Plan Curtailment

In December 2010, management amended the Synovus Retiree Medical Plan (the "Retiree Medical Plan" or the "Plan"). Under the provisions of the Retiree Medical Plan, employees who terminated employment after becoming eligible for early retirement (attaining age 50 with 15 or more years of service) could elect medical coverage for themselves and their eligible dependents. This coverage may continue until the former employee (or his spouse) reaches age 65 or cover eligible dependents in accordance with the Plan's provision. Per the amendment, Synovus eliminated the post-retirement medical plan coverage for all employees who retired on or after March 1, 2011. Participants who are already receiving benefits under the Retiree Medical Plan will continue to receive benefits under the Plan. At September 30, 2011, the Retiree Medical Plan had 141 participants.

The amendment is considered a curtailment event under ASC 715 because it eliminates the accrual of defined benefits for all of the future services of a significant number of active employees. At the time of the Plan amendment, Synovus estimated the number of eligible participants that would elect coverage by the specified deadline of March 31, 2011 to calculate the \$7.1 million curtailment gain that was recognized during 2010. Based on the actual number of retirees who elected medical coverage for themselves and/or their eligible dependents, the actual curtailment gain is \$6.7 million, which resulted in an adjustment of \$398 thousand to the curtailment gain that was recorded during the nine months ended September 30, 2011.

Note 13 - Variable Interest Entities

Synovus has a contractual ownership or other interests in certain VIEs for which the fair value of the VIE's net assets may change exclusive of the variable interests. Under ASC 810-10-65, Synovus is deemed to be the primary beneficiary and required to consolidate a VIE if it has a variable interest in the VIE that provides it with a controlling financial interest. For such purposes, the determination of whether a controlling financial interest exists is based on whether a single party has both the power to direct the activities of the VIE that most significantly impact the VIE's economic performance and the obligation to absorb losses of the VIE or the right to receive benefits from the VIE that could potentially be significant to the VIE. ASC 810-10-65, as amended, requires continual reconsideration of conclusions reached regarding which interest holder is a VIE's primary beneficiary.

Synovus' involvement with VIEs is discussed below. Synovus consolidates VIEs for which it is deemed the primary beneficiary.

Consolidated Variable Interest Entities

Rabbi Trusts - Synovus has established certain rabbi trusts related to deferred compensation plans offered to its employees. Synovus contributes employee cash compensation deferrals to the trusts and directs the underlying investments made by the trusts. The assets of these trusts are available to creditors of Synovus only in the event that Synovus becomes insolvent. These trusts are considered VIEs because either there is no equity at risk in the trusts or because Synovus provided the equity

Table of Contents**Notes to Consolidated Financial Statements (Unaudited)**

interest to its employees in exchange for services rendered. Synovus is considered the primary beneficiary of the rabbi trusts as it has the ability to direct the underlying investments made by the trusts, the activities that most significantly impact the economic performance of the rabbi trusts. Synovus includes the assets of the rabbi trusts as a component of other assets and a corresponding liability for the associated benefit obligation in other liabilities in its consolidated balance sheet. At September 30, 2011, the aggregate amount of rabbi trust assets and benefit obligation was \$9.8 million.

Non-consolidated Variable Interest Entities

Low Income Housing Tax Credit Partnerships - Synovus and its subsidiary bank, Synovus Bank, make equity investments as a limited partner in various partnerships which are engaged in the development and operation of affordable multi-family housing utilizing the LIHTC pursuant to Section 42 of the Internal Revenue Code. The purpose of these investments is to earn a return on the investment and to support community reinvestment initiatives of Synovus' subsidiary bank. The activities of these LIHTC partnerships are limited to development and operation of multi-family housing that is leased to qualifying residential tenants. These partnerships are generally located in southeastern communities where Synovus has a banking presence and are considered VIEs because Synovus, as the holder of an equity investment at risk, does not have voting or similar rights and does not participate in the management or direct the operations of the partnerships (activities which affect the success of the partnerships). Synovus provides construction lending for certain of the LIHTC partnerships in which it also has an equity investment. Synovus is at risk for the amount of its equity investment plus the outstanding amount of any construction loans in excess of the fair value of the collateral for the loan but has no obligation to fund the operations or working capital of the partnerships. The general partners of these partnerships are considered the primary beneficiaries because they are charged with management responsibility which give them the power to direct the activities that most significantly impact the financial performance of the partnerships, and they are exposed to losses beyond Synovus' equity investment. At September 30, 2011, the aggregate carrying value of Synovus' investments in LIHTC partnerships was \$14.5 million and the cumulative amount of equity investments was \$28.5 million. Synovus uses the equity method of accounting for these investments which are included as a component of other assets on Synovus' consolidated balance sheet. At September 30, 2011, Synovus had a commitment to fund a remaining \$458 thousand equity investment in a LIHTC partnership subject to satisfaction of certain performance criteria by the general partner.

Historic Rehabilitation Partnerships - Synovus Bank makes equity investments as a limited partner in various partnerships which are engaged in the preservation, renovation, and rehabilitation of historic structures and the subsequent operation of those structures as commercial properties or multi-family housing. Tax credit incentives are awarded based on a percentage of certified rehabilitation costs under Section 1.48-112 of the Internal Revenue Code. The purpose of these investments is to earn a suitable return on the investment and to support community reinvestment initiatives of Synovus' subsidiary bank. The activities of these historic rehabilitation partnerships are limited to preservation and rehabilitation of historic structures, and operation of those structures for leasing to commercial or residential tenants. These partnerships are generally located in southeastern communities where Synovus has a banking presence and are considered VIEs because Synovus, as the holder of an equity investment at risk, does not have voting or similar rights and does not participate in the management or direct the operations of the partnerships (activities which affect the success of the partnerships). Synovus provides construction lending for certain of the partnerships in which it also has an equity investment. Synovus is at risk for the amount of its equity investment plus the outstanding amount of any construction loans in excess of the fair value of the collateral for the loan, but has no obligation to fund the operations or working capital of the partnerships. The general partners of these partnerships are considered the primary beneficiaries because they are charged with management responsibility which give them the power to direct the activities that most significantly impact the financial performance of the partnerships, and they are exposed to losses beyond Synovus' equity investment. At September 30, 2011, the aggregate carrying value of Synovus' investments in historic rehabilitation partnerships was \$2.3 million and the cumulative amount of equity investments was \$9.0 million. Synovus uses the equity method of accounting for these investments which are included as a component of other assets on Synovus' consolidated balance sheet. At September 30, 2011, Synovus had a commitment to fund a remaining \$45 thousand equity investment in a historic rehabilitation tax credit partnership subject to satisfaction of certain performance criteria by the general partner.

Table of Contents**Notes to Consolidated Financial Statements (Unaudited)**

Certain Troubled Commercial Loans - For certain troubled commercial loans, Synovus restructures the terms of the borrower's debt in an effort to increase the probability of receipt of amounts contractually due. A troubled debt restructuring generally requires consideration of whether the borrowing entity is a VIE as economic events have proven that the entity's equity is not sufficient to permit it to finance its activities without additional subordinated financial support or a restructuring of the terms of its financing. As Synovus does not have the power to direct the activities that most significantly impact such troubled commercial borrowers' operations, it is not considered the primary beneficiary, even in situations where, based on the size of the financing provided, Synovus is exposed to potentially significant benefits and losses of the borrowing entity. Synovus has no contractual requirements to provide financial support to the borrowing entities beyond certain funding commitments established upon restructuring of the terms of the debt that allows for preparation of the underlying collateral for sale and the borrowing entity is considered a VIE.

Note 14 Income Taxes

Synovus reported an income tax expense attributable to continuing operations for the nine months ended September 30, 2011 of \$1.7 million compared to a tax benefit of \$21.0 million for the same period in 2010. The tax effect from changes in the net unrealized gains on investment securities available for sale and net unrealized gains on cash flow hedges recorded as a component of other comprehensive income are recognized as income tax benefit (expense) in the statement of operations pursuant to ASC 740-20-45-7. These items resulted in no impact to income taxes for the nine months ended September 30, 2011; an income tax benefit of \$4.8 million for the nine months ended September 30, 2010; and income tax expense of \$4.9 million and \$6.3 million for the three months ended September 30, 2011 and 2010, respectively.

Synovus' DTA valuation allowance increased by \$41.9 million during the nine months ended September 30, 2011, which included a decrease of \$11.7 million during the third quarter. A reconciliation of the beginning and ending amounts of the valuation allowance recorded against DTAs is as follows:

<i>(in thousands)</i>	2011	2010
Balance at January 1,	\$ 774,961	443,332
Increase for the three months ended March 31,	43,906	77,600
Increase for the three months ended June 30,	9,723	93,506
(Decrease) increase for the three months ended September 30,	(11,725)	76,568
Balance at September 30,	\$ 816,865	691,006

In assessing the need for a valuation allowance, Synovus has considered all available evidence about the realization of DTAs, both positive and negative, that could be objectively verified. Synovus' positive evidence considered in support of its use of forecasted future earnings as a source of realizing DTAs was insufficient to overcome the negative evidence associated with its pre-tax cumulative loss position.

At September 30, 2011, Synovus reported a net deferred tax asset, before the valuation allowance, of \$819.0 million compared to \$776.7 million at December 31, 2010. Synovus expects to reverse substantially all (or approximately \$796 million of the current balance of \$817 million) of the valuation allowance once it has demonstrated a sustainable return to profitability. While reversal of the valuation allowance is subject to considerable judgment, this event could occur at the point Synovus has significantly improved its credit quality and experienced consecutive profitable quarters coupled with a forecast of sufficient continuing profitability. This reversal could occur as a single event or over a period of time, depending upon the level of forecasted taxable income, the degree of risk related to realizing the forecasted taxable income, and the estimated risk related to credit quality. Until such event occurs, Synovus expects to record minimal to no tax expense when reporting income before taxes as reductions to the deferred tax asset valuation allowance will be recognized.

Edgar Filing: SYNOVUS FINANCIAL CORP - Form 10-Q

Synovus' income tax returns are subject to review and examination by federal, state, and local taxing jurisdictions. Currently, no years for which Synovus filed a federal income tax return are under examination by the IRS; however, the IRS is in the process of reviewing federal refund claims from the carryback of operating losses sustained in the 2009 tax year. There are also certain state tax examinations currently in progress. Although Synovus is unable to determine the ultimate outcome of these examinations, Synovus believes that current income tax accruals are adequate for any uncertain income tax positions relating to these examinations. Adjustments to income tax accruals are made when necessary to reflect a change in the probability outcome.

Table of Contents**Notes to Consolidated Financial Statements (Unaudited)**

A reconciliation of the beginning and ending amount of unrecognized income tax benefits is presented below. (Unrecognized state income tax benefits are not adjusted for the federal income tax impact).

<i>(in thousands)</i>	2011	2010
Balance at January 1,	\$ 6,315	7,274
First quarter activity:		
Additions based on tax positions related to current year	70	48
Additions for tax positions of prior years		
Reductions for tax positions of prior years	(415)	(168)
Settlements		(75)
Net, first quarter activity	(345)	(195)
Balance at March 31,	\$ 5,970	7,079
Second quarter activity:		
Additions based on tax positions related to current year	\$ 70	32
Additions for tax positions of prior years		
Reductions for tax positions of prior years		
Settlements		
Net, second quarter activity	70	32
Balance at June 30,	\$ 6,040	7,111
Third quarter activity:		
Additions based on tax positions related to current year	\$ 69	33
Additions for tax positions of prior years		
Reductions for tax positions of prior years	(106)	(892)
Settlements		
Net, third quarter activity	(37)	(859)
Balance at September 30,	\$ 6,003	6,252

Accrued interest and penalties related to unrecognized income tax benefits are included as a component of income tax expense (benefit). The amount of accrued interest and penalties on unrecognized income tax benefits totaled \$1.4 million and \$1.6 million as of January 1 and September 30, 2011, respectively. The total amount of unrecognized income tax benefits as of January 1 and September 30, 2011 that if recognized would affect the effective income tax rate was \$5.0 million and \$4.9 million (net of the federal benefit on state income tax issues), respectively, which includes interest and penalties of \$880 thousand and \$1.0 million, respectively. The impact to the effective income tax rate is prior to any offset by the valuation allowance against deferred tax assets. Synovus expects that approximately \$1.3 million of uncertain income tax positions will be either settled or resolved during the next twelve months.

**ITEM 2 MANAGEMENT'S DISCUSSION
AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS**

Forward-looking Statements

Certain statements made or incorporated by reference in this report which are not statements of historical fact, including those under Management's Discussion and Analysis of Financial Condition and Results of Operations, and elsewhere in this report, constitute forward-looking statements within the meaning of, and subject to the protections of, Section 27A of the Securities Act and Section 21E of the Exchange Act. Forward-looking statements include statements with respect to Synovus' beliefs, plans, objectives, goals, targets, expectations, anticipations, assumptions, estimates, intentions, and future performance and involve known and unknown risks, many of which are beyond Synovus' control and which may cause Synovus' actual results, performance, or achievements or the commercial banking industry or economy generally, to be materially different from future results, performance or achievements expressed or implied by such forward-looking statements.

All statements other than statements of historical fact are forward-looking statements. You can identify these forward-looking statements through Synovus' use of words such as believes, anticipates, expects, may, will, assumes, should, predicts, could, would, estimates, projects, plans, potential and other similar words and expressions of the future or otherwise regarding the outlook for Synovus' future business and financial performance and/or the performance of the commercial banking industry and economy in general. Forward-looking statements are based on the current beliefs and expectations of Synovus' management and are subject to significant risks and uncertainties. Actual results may differ materially from those contemplated by such forward-looking statements. A number of factors could cause actual results to differ materially from those contemplated by the forward-looking statements in this report. Many of these factors are beyond Synovus' ability to control or predict. These factors include, but are not limited to:

- (1) further deterioration in credit quality may result in increased non-performing assets and credit losses, which could adversely impact Synovus' capital, financial condition, and results of operations;
- (2) continuing declines in the values of residential and commercial real estate may result in further write-downs of assets and realized losses on disposition of non-performing assets, which may increase credit losses and negatively affect Synovus' financial results;
- (3) continuing weakness in the residential and commercial real estate environment, which may negatively impact Synovus' ability to liquidate non-performing assets, and may result in continued elevated levels of non-performing assets and potential problem loans;
- (4) the impact on Synovus' borrowing costs, capital costs, and liquidity due to further adverse changes in Synovus' credit ratings;
- (5) the risk that Synovus' allowance for loan losses may prove to be inadequate or may be negatively affected by credit risk exposures;
- (6) the concentration of Synovus' non-performing assets by loan type, in certain geographic regions, and with affiliated borrowing groups;
- (7) changes in the interest rate environment and competition in our primary market area may result in increased funding costs or reduced earning assets yields, thus reducing margins and net interest income;
- (8)

Edgar Filing: SYNOVUS FINANCIAL CORP - Form 10-Q

restrictions or limitations on access to funds from historical and alternative sources of liquidity, combined with additional subsidiary capital deployment, could adversely affect Synovus' overall liquidity, which could restrict Synovus' ability to make payments on its obligations or dividend payments on its common stock and Series A preferred stock and Synovus' ability to support asset growth and sustain its operations and the operations of Synovus Bank;

- (9) future availability and cost of capital and liquidity on favorable terms, if at all;
- (10) the risks that Synovus may be required to undertake additional strategic initiatives or seek or deploy additional capital to satisfy applicable regulatory capital standards and pressures in light

Table of Contents

- of expected increases in capital and liquidity requirements or as a result of supervisory actions or directives;
- (11) decreases in non-interest income and increases in non-interest expense due to, among other things, implementation of The Dodd-Frank Act and other regulatory initiatives;
 - (12) changes in the cost and availability of funding due to changes in the deposit market and credit market, or the way in which Synovus is perceived in such markets, including a further reduction in Synovus' debt ratings;
 - (13) risks related to the timing of the recoverability of the deferred tax asset, which is subject to considerable judgment, and the risk that even after the recovery of the deferred tax asset balance under GAAP, there will remain limitations on the ability to include the deferred tax asset for regulatory capital purposes;
 - (14) the risk that Synovus could have an ownership change under Section 382 of the Internal Revenue Code, which could impair the ability to timely and fully utilize Synovus' net operating losses and built-in losses that may exist when such ownership change occurs;
 - (15) the impact of our continued participation in the TARP and CPP, including the impact of compensation and other restrictions imposed under TARP which affect our ability to attract, retain, and compensate talented executives and other employees and the impact of actions that we may be required to take to exit from the CPP and repay the outstanding preferred stock issued under the CPP;
 - (16) the impact of the Dodd-Frank Act and other recent and proposed changes in governmental policy, laws and regulations, including proposed and recently enacted changes in the regulation of banks and financial institutions, or the interpretation or application thereof, including restrictions, increased capital requirements, limitations and/or penalties arising from banking, securities and insurance laws, regulations and examinations and restrictions on compensation;
 - (17) the impact on Synovus' financial results, reputation and business if Synovus is unable to comply with all applicable federal and state regulations and applicable memoranda of understanding, other supervisory actions or directives and any necessary capital initiatives;
 - (18) the actual results achieved by our updated three-year strategic plan and the implementation of our efficiency and growth initiatives announced in January 2011, and the risk that we may not achieve the anticipated cost savings, revenue growth and other benefits from such initiatives;
 - (19) the costs and effects of litigation, investigations, inquiries or similar matters, or adverse facts and developments related thereto;
 - (20) the costs of services and products to Synovus by third parties, whether as a result of financial condition, credit ratings, the way Synovus is perceived by such parties, the economy or otherwise;
 - (21) the effects of any damages to Synovus' reputation resulting from developments related to any of the items identified above; and
 - (22) other factors and other information contained in this Report and in other reports and filings that Synovus makes with the SEC under the Exchange Act, including, without limitation, under the caption "Risk Factors."

Edgar Filing: SYNOVUS FINANCIAL CORP - Form 10-Q

For a discussion of these and other risks that may cause actual results to differ from expectations, refer to **Risk Factors** and other information contained in Synovus' 2010 10-K and other periodic filings, including this report and other quarterly reports on Form 10-Q and current reports on Form 8-K, that Synovus files with the SEC. All written or oral forward-looking statements that are made by or are attributable to Synovus are expressly qualified by this cautionary notice. Undue reliance on any forward-looking statements should not be placed given that those statements speak only as of the date on which the statements are made. Synovus undertakes no obligation to update any forward-looking statement to reflect events or circumstances after the date on which the statement is made or to reflect the occurrence of new information or unanticipated events, except as may otherwise be required by law.

Management's Discussion and Analysis

Executive Summary

Synovus Financial Corp. is a diversified financial services company and a registered financial holding company headquartered in Columbus, Georgia. Synovus provides integrated financial services including commercial and retail banking, financial management, insurance and mortgage services to its customers through 30 locally-branded banking divisions of its wholly-owned subsidiary bank, Synovus Bank, and other offices in Georgia, Alabama, South Carolina, Florida, and Tennessee.

The following financial review summarizes the significant trends affecting Synovus' results of operations and financial condition for the nine and three months ended September 30, 2011. This discussion supplements, and should be read in conjunction with, the unaudited consolidated financial statements and notes thereto contained elsewhere in this report and the audited consolidated financial statements of Synovus, the notes thereto, and management's discussion and analysis contained in Synovus' 2010 10-K.

Economic Overview

Following indications that economic recovery was under way late in 2010, the rate of economic growth moderated during the first quarter of 2011 and slowed further during the second quarter of 2011. A series of global events, including the earthquake and tsunami in Japan, geo-political unrest in the Middle East, the mid-year elevation in energy costs, and continued concerns over the debt of certain European nations, plus the U.S. congressional battle over raising the U.S. debt ceiling have prompted uncertainty and tempered economic growth during 2011. The economy continued to expand during the third quarter of 2011 at a stronger pace than the second quarter, but there continue to be mixed messages in many economic measures. These mixed messages, together with the slowed expansion, have fueled discussion about the possibility of a double-dip recession. National unemployment has increased in recent months and the rate of increase in non-farm employment has decreased significantly. The U.S. President recently proposed jobs legislation, but any final legislation passed by both the House of Representatives and the Senate will most likely include changes to the President's proposal, and the potential impact for the economy cannot presently be determined. Inflation remains subdued; however, increases in the consumer price index for 2011 have exceeded increases for the same periods in 2010. The Federal Reserve's commitment to hold interest rates stable for the next two years appears to be an indication it is more concerned with sustaining recovery than the risk of inflation. Residential mortgage foreclosure and delinquency rates have declined over the past year, but remain at elevated levels compared to historical periods. The large number of foreclosures in process, coupled with the delinquency rate, point to a continuing inflow of cheaper homes into the residential real estate market. While the rate of inflow to the market from foreclosures has decreased, the supply of cheaper homes continues to exceed demand, which has suppressed the construction of new homes and continues to pressure the price of both new and existing homes.

New residential construction decreased slightly to approximately 594,000 units in September as compared to a revised August rate of approximately 625,000 units and the September 2010 rate of 562,000 units, the Census Bureau and HUD reported. In the South, residential units in September decreased by 7.0% from August and increased 1.4% from a year ago. Mortgage rates continue to remain at record lows, due at least in part to Federal Reserve Bank efforts to lower long-term interest rates to stimulate the economy. Sales of new single-family homes were at a seasonally adjusted rate of 313,000 in September, which was 5.7% above the revised August rate of 296,000, but 0.9% below the September 2010 estimate of 316,000. The supply of new homes decreased from 7.7 months in September 2010 to 6.2 months in September 2011 and the median sales price decreased 10.3% to \$204,400 during the same time period. Existing home sales in September declined 3.0% to 4.91 million as compared to August 2011, but are 11.3% above the September 2010 level of 4.41 million. Distressed homes (foreclosures and short sales typically sold at deep discounts) accounted for 30% of sales in September 2011, down from 35% from a year ago. The national median home price was \$165,400 in September 2011, down 3.5% from September 2010.

The Bureau of Economic Analysis advance estimate released in October indicates that real GDP increased at an annual rate of 2.5% in the third quarter of 2011, as compared to 1.3% in the second quarter of 2011, 0.4% in the first quarter of 2011, and 2.3% in the fourth quarter of 2010. The fourth quarter 2011 GDP estimate, to be released at the end of January, is expected to be stronger than the first half of 2011, but weaker than the third quarter. The National Bureau of Economic Research (NBER)

Table of Contents

Management's Discussion and Analysis

determined that the most recent recession began December 2007 and ended in June 2009. During 2010, the economy returned to an expansionary phase marked by relatively slow recovery, but the rate of expansion softened substantially during the second quarter of 2011.

The Southeastern U.S. economy (where Synovus operates) has continued to improve, but at a very subdued pace during the third quarter of 2011. The labor force in Synovus' five state footprint grew by approximately 90 thousand jobs in the first nine months of 2011 as compared to an increase of approximately the same amount during the full calendar year 2010. The unemployment rate in Synovus' five state Southeastern footprint, which was 10.4% in September 2011, has increased from 10.3% in June 2011 and March 2011, and has decreased as compared to 10.9% in December 2010 and 10.7% in September 2010. The national unemployment rate, which was 9.4% in December 2010, fell to 8.8% in March 2010, but increased to 9.2% in June 2011 and decreased slightly to 9.1% in September 2011. The elevated unemployment rates within Synovus' footprint are due to a combination of both the effects of the collapse of the real estate market over recent years, and the number of rural population centers which tend, on average, to experience generally higher rates of unemployment than the national average during all economic phases.

The Mortgage Bankers Association reported that the percentage of mortgage loans in the process of foreclosure to total mortgage loans decreased to 4.43% during the second quarter of 2011, down 4.52% in the first quarter of 2011, and a decrease from 4.57% the second quarter of 2010. The combined percentage of loans that were either at some point in the foreclosure process or at least one payment past due decreased to 12.54% (NSA) over the same period, which is an increase of 23 basis points from the first quarter level and a decrease of 143 basis points from the second quarter of 2010. The delinquency rate for one-to-four-unit residential property mortgage loans increased to 8.44% of all loans outstanding as of the end of the second quarter of 2011. This was an increase of 12 bps from the first quarter and a decrease of 144 bps from the second quarter of 2010.

The Institute of Supply Management indices for manufacturing and non-manufacturing remain above 50, signaling expansion, but at a slightly slower rate for manufacturing (51.6) than non-manufacturing (53). Consumer Confidence continues to show volatility; the consumer confidence index stands at 39.8 for October 2011 as compared to 46.4 for September 2011 and 58.5 in June 2011.

As noted above, the pace of residential foreclosures has provided an excess supply of single family homes in the U.S., which has constrained the sale of new homes and the resale of existing homes. Improvement in the housing and residential construction markets would be a significant boost for employment among construction trades, a sector of the labor force that has been one of the most heavily impacted by the economy. The reduced pace of economic expansion during the first nine months of 2011 has also slowed recovery for commercial properties, and new commercial development remains limited. The spread between 10 year Treasury yields and cap rates for prime commercial properties makes real estate an attractive alternative to non-real estate investments; however, the supply of high grade assets is limited. On the whole, economic conditions are moderately positive, but the recovery continues to be slow and uneven.

Over the past few years, the performance of Synovus' residential construction and development and land acquisition portfolios has been significantly impacted by the economic downturn; however, Synovus has also experienced weakness in other segments of the commercial loan portfolio, particularly in industries that are impacted by commercial real estate and residential development factors. While these factors have severely impacted Synovus' credit costs resulting in elevated levels of loan charge-offs and non-performing asset inflows, significant losses on distressed asset dispositions, and further valuation adjustments on existing non-performing assets, most credit quality indicators are continuing to improve.

Another impact of the economic downturn has been the elevated number of bank failures in Synovus' market area. There have been 74 failures nationally during the first nine months of 2011, including 19 in Georgia, 11 in Florida, 3 in South Carolina and 2 in Alabama, as compared to 157 failures nationally during the twelve months ended December 31, 2010, including 29 in Florida and 21 in Georgia.

Table of Contents

Management's Discussion and Analysis

Overview of Third Quarter 2011 Financial Results

Synovus reported net income available to common shareholders of \$15.7 million for the three months ended September 30, 2011, as compared to a net loss available to common shareholders of \$195.8 million during the same period last year. Net income per diluted common share was \$0.02 for the three months ended September 30, 2011 as compared to a net loss per diluted common share of \$0.25 for the three months ended September 30, 2010. For the nine months ended September 30, 2011, Synovus reported a net loss available to common shareholders of \$131.5 million, or \$0.17 per common share, an 80.3% improvement from the \$668.2 million net loss, or \$1.03 per common share, in the same period last year. Excluding restructuring charges, Synovus reported net income available to common shareholders of \$18.3 million, or \$0.02 per diluted common share, for the three months ended September 30, 2011, and reported a net loss available to common shareholders of \$101.5 million, or \$0.13 per common share, for the nine months ended September 30, 2011. See reconciliation of Non-GAAP Financial Measures in this report.

The improvement for the three months ended September 30, 2011 as compared to the three months ended September 30, 2010 is primarily due to a \$158.4 million decline in total credit costs (provision for losses on loans and other credit costs), a \$24.0 million decrease in core expenses (total non-interest expense excluding other credit costs and restructuring charges), and net gains of \$62.9 million realized upon repositioning the investment securities portfolio. For the nine months ended September 30, 2011 as compared to the same period in the prior year, the improvement is primarily due to a \$570.4 million decline in credit costs, a \$67.1 million decrease in core expenses (total non-interest expense excluding other credit costs, restructuring charges, and curtailment of a post-retirement benefit) and net gains of \$64.7 million on sales of investment securities, which includes gains realized upon repositioning the securities portfolio during the third quarter of 2011. The first nine months of 2010 also reflected a \$43.2 million gain, net of tax, on the sale of the merchant services business. See reconciliation of Non-GAAP Financial Measures in this report.

Although credit costs, charge-offs, and non-performing asset levels remain elevated, most of Synovus' credit quality measures continued to show improvement during the third quarter of 2011. For the three months ended September 30, 2011, total credit costs decreased for the ninth consecutive quarter to \$142.5 million. Provision for losses on loans, the most significant component of total credit costs (which includes provision for losses on loans, foreclosed real estate expense, net, provision for unfunded commitments, and charges related to other loans held for sale) was \$102.3 million for the third quarter of 2011, a 14.9% decrease from \$120.2 million in the second quarter of 2011, and a 57.2% decrease from \$239.0 million in the third quarter of 2010. Net charge-offs of \$138.3 million for the third quarter of 2011 decreased \$28.8 million, or 17.3%, compared to the second quarter of 2011 and decreased \$98.8 million or 41.7% from the third quarter of 2010. Provision for losses on loans is down 83.8% from the peak level in the second quarter of 2009 and net charge-offs are down 72.1% from the peak level in the third quarter of 2009. NPL inflows were \$222.0 million during the third quarter of 2011 compared to \$231.1 million in the second quarter of 2011 and \$421.5 million in the third quarter of 2010. The sale of distressed assets totaled \$168.6 million in the third quarter bringing the total for the first nine months of 2011 to \$555.7 million. Total non-performing assets declined 4.5% from \$1.22 billion at June 30, 2011 to \$1.16 billion at September 30, 2011, representing the sixth consecutive quarterly decline. Past due accruing loans remained at favorable levels with total past due loans and still accruing interest of 0.99% and loans 90 days past due and still accruing interest of 0.13% compared to 0.97% and 0.11% at June 30, 2011, respectively.

Commercial real estate represented the majority of both the provision for losses on loans and loan charge-offs for the first nine months of 2011 and 2010. Provision for losses on loans attributable to the commercial real estate portfolio (excluding the unallocated allowance for loan losses component of the unallocated component) was \$269.6 million, or 74.0% of the total provision for losses on loans, for the first nine months of 2011 while net charge-offs attributable to this portfolio were \$306.5 million, or 64.9% of total net charge-offs. Provision for losses on loans attributable to the commercial real estate portfolio was \$582.7 million, or 66.3% of the total provision for losses on loans, for the first nine months of 2010 while net charge-offs attributable to this portfolio were \$713.7 million, or 72.4% of total net charge-offs. Provision for losses on loans attributable to the commercial and industrial portfolio was \$76.0 million, or 20.9%, of the total expense, excluding the unallocated portion, for the first nine months of 2011 while net charge-offs attributable to this portfolio were \$111.5 million, or 23.6% of total net charge-offs. Provision for losses on loans attributable to the commercial and

Table of Contents

Management's Discussion and Analysis

industrial portfolio was \$225.8 million, or 25.7%, of the total expense, excluding the unallocated portion, during the first nine months of 2010 while net charge-offs attributable to this portfolio were \$187.5 million, or 19.0%, of total net charge-offs.

The decline in non-performing loans since the third quarter of 2010 was driven by the disposition of distressed loans as discussed above, net charge-offs, and, to a lesser extent, by a reduction in NPL inflows.

Pre-tax, pre-credit costs income (which excludes provision for losses on loans, other credit costs, restructuring charges, net investment securities gains, and certain other items) was \$119.4 million for the third quarter of 2011 representing an increase of \$2.4 million, or 2.1%, from the second quarter of 2011 and a decrease of \$4.7 million, or 3.8%, from the third quarter of 2010. See reconciliation of Non-GAAP Financial Measures in this report. As compared to the second quarter of 2011, the increase in pre-tax, pre-credit costs income was driven by a \$3.0 million increase in non-interest income and a \$1.8 million decrease in core expenses partially offset by a \$2.4 million decrease in net interest income. The decline from the third quarter of 2010 was driven by an \$11.9 million decrease in non-interest income and a \$16.9 million decrease in net interest income partially offset by a \$24.0 million decrease in core expenses.

The net interest margin declined 4 bp to 3.47% in the third quarter of 2011 compared to 3.51% for the second quarter of 2011 and increased 14 basis points from 3.33% in the third quarter of 2010. On a sequential quarter basis, a 9 bp decline in the yield on earning assets was partially offset by a 5 bp decrease in the effective cost of funds. Loan yields during the third quarter of 2011 decreased 10 bp compared to the third quarter of 2010, and the effective cost of funds decreased 28 bp as economic uncertainty has resulted in a sustained period of low interest rates.

Total loans were \$20.10 billion at September 30, 2011, a decline of \$402.7 million from June 30, 2011. The decline in loans was driven by charge-offs, the sale of distressed loans, and pay-downs that continued to exceed new originations.

Total deposits increased by \$234.4 million from the second quarter of 2011, primarily due to growth in core deposits of \$767.4 million. The growth in core deposits was led by a \$372.1 million increase in non-interest bearing deposits from the second quarter. Growth in core deposits was partially offset by a decrease in brokered deposits of \$533.0 million as Synovus continues to reduce its dependence on funding from these products through planned reductions. Additionally, core deposits excluding time deposits increased \$865.1 million from the second quarter of 2011. See reconciliation of Non-GAAP Financial Measures in this report. At September 30, 2011, brokered deposits represented 9.3% of Synovus' total deposits compared to 11.8% at June 30, 2011. Synovus intends to continue to reduce the level of this type of deposit during the remainder of 2011. Deposit costs have declined during each of the last seventeen quarters; however, competitive demand for deposits in Synovus markets has somewhat limited the decline in deposit costs.

Total shareholders' equity decreased by \$21.5 million from prior quarter to \$2.83 billion at September 30, 2011. Synovus continues to actively monitor evolving industry capital standards, and changes in regulatory standards and requirements. As part of its ongoing management of capital, Synovus will continue to monitor its capital position and identify, consider, and pursue additional strategies to bolster its capital position as deemed necessary.

Liquidity is another important consideration in assessing Synovus' financial strength. Synovus expects to maintain a significant liquidity cushion primarily in the form of interest bearing funds with the Federal Reserve Bank and unencumbered investment securities.

Table of Contents

Management's Discussion and Analysis

A summary of Synovus' financial performance for the nine and three months ended September 30, 2011 and 2010 is set forth in the table below.

Financial Performance Summary

<i>(in thousands, except per share data)</i> <i>(percentages annualized)</i>	Nine Months Ended September 30,			Three Months Ended September 30,

- (4) Total shareholders' equity divided by total assets.
- (5) Equity and common shares exclude impact of unexercised tMEDS. See Note 10 of the notes to the unaudited interim consolidated financial statements for additional information regarding tMEDS.

Critical Accounting Policies

The accounting and financial reporting policies of Synovus conform to GAAP and to general practices within the banking and financial services industries. Synovus has identified certain of its accounting policies as critical accounting policies. In determining which accounting policies are critical in nature, Synovus has identified the policies that require significant judgment or involve complex estimates. The application of these policies has a significant impact on Synovus' financial statements. Synovus' financial results could differ significantly if different judgments or estimates are applied in the application of these policies.

Table of Contents

Management's Discussion and Analysis

Synovus' critical accounting policies are described within Management's Discussion and Analysis in Synovus' 2010 10-K. Synovus periodically updates the loan loss factors used in determining the allowance for losses on loans. These loan loss factors were updated during the three months ended June 30, 2011. Except for the periodic update of loan loss factors, there have been no material changes to Synovus' critical accounting policies affecting the determination of the allowance for loans losses and the provision for losses on loans estimates and assumptions in 2011.

Allowance for Loan Losses

Note 6 in the notes to consolidated financial statements contains a discussion of the allowance for loan losses. The allowance for loan losses at September 30, 2011 was \$595.4 million compared to \$631.4 million and \$836.4 million at June 30, 2011 and September 30, 2010, respectively.

The allowance for loan losses is a significant estimate and is regularly evaluated by Synovus for accuracy and consistency between the changes in the allowance for loan losses with the credit trends and credit events in the loan portfolio. The allowance for loan losses is determined based on an analysis which assesses the inherent risk for probable loss within the loan portfolio. Significant judgments and estimates are necessary in the determination of the allowance for loan losses. Significant judgments include, among others, loan risk ratings and classifications, the determination and measurement of impaired loans, the timing of loan charge offs, the probability of loan defaults, the net loss exposure in event of loan defaults, qualitative loss factors, management's plan, if any, for disposition of certain loans as well as other qualitative considerations. In determining an adequate allowance for loan losses, management makes numerous assumptions, estimates, and assessments which are inherently subjective. The use of different estimates or assumptions could produce different provisions for losses on loans, allowance for loan losses, non-performing loans and loan charge-offs, and other credit metrics.

Commercial Loans Allowance for Loan Losses

The allowance for loan losses related to commercial loans consists of two components: the allocated commercial loan allowance for loan losses and the unallocated commercial loan allowance for loan losses. The allocated allowance for commercial loans is based upon an analysis of impaired commercial loans to determine the amount of specific reserves (and loan charge-offs), if any, as well as an analysis of historical loan default experience, loan net loss experience and related qualitative factors, if appropriate, for categories of loans with similar risk attributes and further segregated by Synovus' internal loan grading system. The unallocated allowance is considered necessary to provide for certain environmental and economic factors that affect the inherent risk of loss in the entire loan portfolio that is not fully captured in the allocated allowance for loan losses.

Commercial Loans Risk Ratings and Loss Factors

Commercial loans are assigned a risk rating on a nine point scale and are classified based upon the borrower's financial status and collateral position. Impaired loans are generally evaluated on a loan by loan basis with specific reserves recorded as appropriate. For loans that are not considered impaired, the allocated allowance for loan losses is determined based upon EL factors which are applied to groupings of specific loan types, by loan risk ratings. The EL is determined based upon a PD which is the probability that a borrower, segregated by loan type and loan risk grade, will default, and LGD which is the estimate of the amount of net loss in the event of a loan defaulting. The allocated EL factors for commercial type loans may also be adjusted, as necessary, by qualitative factor considerations for the applicable loan categories, which include among other considerations the aging of portfolio default experience data used in the PD calculation and the aging of the portfolio net loss experience data used in the LGD calculation. The groupings of the loans into loan categories are determined based upon the nature of the loan types and the level of inherent risk associated with the various loan categories. The loan groupings are further segregated based upon the individual loan risk ratings, as described below.

The risk ratings are based on the borrowers' credit risk profile considering factors such as debt service history, current and estimated prospective cash flow information, collateral supporting the credit, as well as other variables, as appropriate. Ratings six through nine are defined consistent with the bank regulatory classifications of special mention, substandard, doubtful, and loss, respectively.

Table of Contents

Management's Discussion and Analysis

Each loan is assigned a risk rating during its initial approval process. This process begins with a loan rating recommendation from the loan officer responsible for originating the loan. The loan rating recommendation is subject to approvals from other members of management, regional credit and/or loan committees depending on the size of the new loan and new loan's credit attributes. Loan ratings are regularly reevaluated based upon annual scheduled credit reviews or on a more frequent basis if determined prudent by management. Semi-annual credit servicing reviews are performed by Synovus' regional credit department for borrowers in excess of \$2.5 million. Quarterly problem-loan memos for all loan relationships in excess of \$500,000 graded 6 or worse are prepared by bank divisions and reviewed by regional credit officers. In addition, monthly migration meetings are held by regional credit officers, and all loan relationships in excess of \$500,000 graded 6 or worse are reviewed in those meetings to ensure the loans are properly graded and reserved for, if applicable. Furthermore, an independent loan review function evaluates the Bank's risk rating process on an on-going basis.

As a result of Synovus' past practice of updating default and loss data once per year, loan default and net loan loss upon default data utilized in the PD and LGD calculations did not historically include the most recent periods' portfolio default and net loss experience; therefore, these factors required a qualitative factor adjustment to properly capture the estimated inherent risk of loss in the loan portfolios not identified because of the time lag in the data used for the PD and LGD factors. Other qualitative factor considerations included, among other items, loan concentrations and the level of loan volume/nature of loan growth.

In the second quarter of 2011, Synovus began a new practice of updating, by loan category, the loan default data and net loss upon default data utilized in the calculation of the PD factor and LGD factor, respectively, at least twice a year. The use of this more current data in the PD and LGD calculations eliminated the need for this qualitative factor adjustment to be included in the calculated EL factors beginning June 30, 2011. At September 30, 2011 and June 30, 2011, the PD factors are based upon loan defaults experienced through December 31, 2010, and the LGD factors were based upon losses on defaulted loans through March 31, 2011. Further, management has considered loan default and net loan loss data through the issuance date of the September 30, 2011 interim unaudited consolidated financial statements concluding that defaults and losses during this period had no material impact on the EL factors calculated for purposes of determining the allowance for loan losses at September 30, 2011.

Prior to the change completed in the second quarter of 2011, as described above, the LGD factor was calculated based upon net loan loss data on loans that had defaulted through March 31, 2009 and the net losses on those loans through September 30, 2010, which provided an eighteen-month net loss resolution subsequent to March 31, 2009. As a result of this timing lag, Synovus previously supplemented its internal LGD data with industry LGD data at a weighting of 75% external industry data and 25% internal data. Beginning with the second quarter of 2011, by enhancing its LGD methodology to incorporate current net losses on defaulted loan data in the calculation of the LGD, as described above, it is no longer considered necessary to supplement Synovus' internal net loss given default data with external industry net loss data. Accordingly, the LGD calculations are now based entirely upon Synovus' loan portfolio experience.

Commercial Unallocated Reserve

The unallocated component of the allowance for loan losses is considered necessary to provide for certain environmental and economic factors that affect the inherent risk of loss in the entire loan portfolio that are not fully captured in the allocated allowance for loan losses. Unallocated loss factors included in the determination of the unallocated allowance for loan losses consist of the following:

economic conditions;

changes in the experience, ability, and depth of lending management and loan review staff;

changes in the loan origination and monitoring policies and procedures;

Edgar Filing: SYNOVUS FINANCIAL CORP - Form 10-Q

risk of grading not keeping pace with the degree of deterioration in economic conditions, particularly related to special mention credits;

estimated risk associated with the deterioration in the fair value of collateral supporting the Bank's loans, and

Table of Contents

Management's Discussion and Analysis

other external impacts (as may be applicable).

On a quarterly basis, management updates its analysis and consideration of these factors and determines the impact, if any, on the allowance for loan losses for each respective quarter. The changes to the unallocated component of the allowance for loan losses on a year-to-date basis through September 30, 2011 are related to the commercial portfolio.

The impact on the provision for losses on loans related to the commercial loan portfolio from the use of updated loan default and loss given default data, adjustments to the EL qualitative factors, reductions in unallocated reserves, as well as the utilization of only Synovus' loan portfolio LGD experience data, as discussed above, resulted in a decline in the provision for loan losses of approximately \$22 million during the three months ended June 30, 2011.

Retail Loans Allowance for Loan Losses

The retail loan portfolio allowance for loan losses consists of two components: the allocated retail loan portfolio allowance and unallocated retail loan portfolio allowance. The allocated allowance for loan losses for retail loans consists of the specific reserves, if any, on retail impaired loans, primarily TDRs, as well as allowance amounts allocated to retail loan categories based upon estimates of the EL in the respective retail categories or pools of loans. The allocated retail allowance for non-impaired retail loans is generally determined by segregating the retail loan portfolio into pools of homogeneous loan categories which have similar credit risk attributes. EL factors applied to the retail loan pools are based on the probable loss inherent in the respective loan portfolios, including consideration of qualitative factors as may be appropriate for certain retail loan pools. The EL loss factor considers the PD, the LGD, and certain qualitative factors as applicable to the various retail loan categories, as well as the retail loan risk rating.

PD and LGD factors are updated at least annually, and qualitative factors are evaluated quarterly to determine if adjustments are necessary. PD factors are based on internal default experience, and LGD factors are based on industry data. The qualitative factor adjustments, as applicable for certain retail pools, represent an adjustment to the EL for the inherent risk in the respective retail loan pools. The qualitative factor considers risks not captured in the calculation of the EL factors, for items such as the timing difference in the expected loss data, the use of external LGD data, and current environmental factors specific to each pool of homogenous retail loans. Current qualitative factors also taken into consideration consist of credit concentrations, recent levels and trends in delinquencies and nonaccrual loans, and the nature and volume of growth in the loan portfolio.

Retail Loans Risk Ratings

Retail loans are generally assigned a risk rating on a 6-point scale at the time of origination based on credit bureau scores, with 1 assigned as the lowest level of risk and 6 as the highest level of risk. At 90-119 days past due, a 7-substandard rating is applied and at 120 days past due, the loan is generally downgraded to grade 9-loss and is generally charged off. The credit bureau based ratings are updated at least annually and the ratings based on the past due status are updated quarterly.

Retail Unallocated Reserve

The unallocated component of the allowance for loan losses is considered necessary to provide for certain environmental and economic factors that impact the inherent risk of loss in the entire loan portfolio. While most unallocated factors pertain to the commercial loan portfolio, some of the factors, which are discussed above in the *Commercial Unallocated Reserve* section, also impact the retail portfolio.

Impaired Loans

Nonaccrual commercial loans to borrowers with aggregate outstanding borrowings of \$1 million or more are considered impaired and individually assessed for impairment. At September 30, 2011, substantially all nonaccrual impaired loans are collateral-dependent. Most of these loans are secured by real estate. For the majority of collateral-dependent impaired loans, the fair value of the real

Table of Contents

Management's Discussion and Analysis

estate securing these loans is generally determined based upon appraisals performed by a certified or licensed appraiser. Management also considers other factors or recent developments, such as selling costs and anticipated sales values taking into account management's plans for disposition, which could result in adjustment to the collateral value estimates indicated in the appraisals. The assumptions used in determining fair value are subject to significant judgment. Use of different assumptions, for example changes in management's plan for disposition, could have a significant impact on the amount of impairment. If a collateral-dependent nonaccrual loan is placed on impaired status and a current appraisal is not available (generally at or near the end of a calendar quarter), management records an allowance for loan losses based on the loan's risk rating as well as consideration of other information, if any, related to the fair value less selling costs of the collateral while an updated appraisal is being obtained. As of September 30, 2011, the amount of impaired nonaccrual loans was \$622.8 million, and \$461.8 million of these loans represent loans for which there is no allowance for loan losses generally as a result of estimated losses having been already charged off. At September 30, 2011, total non-accrual loans were \$872.1 million and total impaired loans (including accruing TDRs) were \$1.26 billion.

Management also includes accruing TDRs in total reported impaired loans. Such loans are considered impaired because they have been restructured in a TDR. However, these loans are not considered to be non-performing because they are performing in accordance with the restructured terms. At September 30, 2011, accruing TDRs were \$640.3 million, and non-accruing TDRs were \$171.4 million.

Restructuring Charges

Restructuring charges of \$30.0 million for the nine months ended September 30, 2011 are comprised of \$17.3 million in severance charges, \$3.1 million in lease termination expense, \$5.6 million of asset write-downs associated with branch closings and the decision to sell certain closed properties, and \$4.0 million in professional fees and other charges. The restructuring charges are related to efficiency and expense management initiatives that were implemented during the first nine months of 2011. As of September 30, 2011, Synovus has recognized substantially all of the expected restructuring charges. The efficiency initiatives are expected to generate an estimated \$100 million in annual expense savings by the end of 2012, with approximately \$75 million of these savings to be realized in 2011. Synovus is on track to realize in 2011 the \$75 million in expense savings from these initiatives. For further discussion of restructuring charges, see Note 2 of the notes to the unaudited interim consolidated financial statements and the section titled "Non-interest Expense" in this report.

Statement of Financial Position

During the nine months ended September 30, 2011, total assets decreased by \$1.83 billion, or 6.1%, from December 31, 2010 to \$28.25 billion. The principal components of this decrease were a \$1.38 billion decrease in loans, net of deferred fees and costs and the allowance for loan losses, a \$352.9 million decrease in interest bearing funds with the Federal Reserve Bank, and a \$107.5 million decrease in mortgage loans held for sale. These decreases were partially offset by a \$156.2 million increase in investment securities available for sale. The decrease in net loans is primarily due to charge-offs, the sale of non-performing loans, and principal reductions.

Other Loans Held for Sale

During the nine and three months ended September 30, 2011, Synovus transferred loans with a carrying value immediately preceding the transfer totaling \$567.6 million and \$168.8 million, respectively, to other loans held for sale. Synovus recognized charge-offs upon transfer on these loans totaling \$159.9 million and \$50.7 million for the nine and three months ended September 30, 2011, respectively. These charge-offs which resulted in a new cost basis of \$407.7 million and \$118.1 million, respectively, for the loans transferred during the nine and three months ended September 30, 2011 were based on the fair value, less estimated costs to sell, of the loans at the time of transfer.

During the nine and three months ended September 30, 2010, Synovus transferred loans with a carrying value immediately preceding the transfer totaling \$138.0 million and \$28.2 million, respectively, to other loans held for sale. Synovus recognized charge-offs upon transfer on these loans totaling \$55.7 million and \$5.1 million for the nine and three months ended September 30, 2010, respectively. These charge-offs which resulted in a new cost basis of \$82.3 million and \$23.1 million,

Table of Contents

Management's Discussion and Analysis

respectively, for the loans transferred during the nine and three months ended September 30, 2010 were based on the fair value, less estimated costs to sell, of the loans at the time of transfer.

Goodwill

Goodwill is tested for impairment on an annual basis and as events occur or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying amount. Goodwill is reviewed for impairment annually as of June 30th of each year and at interim periods if indicators of impairment exist. At September 30, 2011 and June 30, 2011, \$24.4 million of goodwill consists of goodwill associated with two financial management services reporting units; \$19.9 million of the goodwill is attributable to a reporting unit that is a provider of investment advisory services. The remaining goodwill of \$4.5 million is attributable to the trust services reporting unit.

Significant judgment is applied when goodwill is assessed for impairment. The judgment includes developing cash flow projections, selecting appropriate discount rates, identifying relevant market comparables, incorporating general economic and market conditions, and selecting an appropriate control premium.

For the annual goodwill impairment test, a third party valuation was obtained on the investment advisory services reporting unit, which accounts for approximately 82% of the recorded goodwill. The fair value of this reporting unit was determined by equally weighting an income approach (50%) and market approach (50%) to assess goodwill for potential impairment at June 30, 2011. The income approach utilized a discounted cash flow method, which focuses on the expected cash flow of the subject business. Expected cash flows were derived from internal forecasts and economic expectations for the reporting unit and discounted to present value to estimate the fair value of the business. The market approach determined the fair value of this reporting unit using comparisons of the reporting unit to publicly-traded companies with reasonably similar operations. Under this method, valuation multiples were: (i) derived from operating data of the selected guideline companies; (ii) evaluated and adjusted based on the strengths and weaknesses of the subject company relative to the selected guideline companies and (iii) applied to the operating data of the subject company to arrive at an indication of value.

As a result of applying the first step of the goodwill impairment testing to determine if potential goodwill impairment existed at June 30, 2011, it was concluded there was no impairment of goodwill in the investment advisory services reporting unit as of this date. The fair value of this reporting unit using the weighted method approach described above was \$25.4 million, which exceeded its respective carrying value of \$21.5 million by \$3.9 million or 18%. Under the market approach, which yielded a lower value, the fair value of the reporting unit exceeded the carrying value by approximately \$2.5 million or 12%. Under the income approach, fair value exceeded the carrying value by \$5.3 million or 25%.

Due to uncertainty regarding market conditions and the current economic environment and their potential impact on the results of operations of this reporting unit, there can be no assurances that management's estimates and assumptions regarding the outlook and trends for the asset management industry, made for purposes of estimating the fair value of this reporting unit, will prove to be accurate predictions of the future. If the assumptions regarding forecasted revenues or assets under management are not achieved, Synovus could be required to record an impairment loss in future periods.

Other Real Estate

ORE consists of properties obtained through a foreclosure proceeding or through an in-substance foreclosure in satisfaction of loans. The carrying value of ORE was \$239.3 million, \$261.3 million, and \$211.9 million at September 30, 2011, December 31, 2010, and September 30, 2010, respectively. During the nine months ended September 30, 2011 and 2010, \$190.4 million and \$293.6 million of loans were foreclosed and transferred to other real estate at fair value, respectively. During the nine months ended September 30, 2011 and 2010, Synovus recognized foreclosed real estate expense, net, of \$101.7 million and \$142.8 million, respectively. These expenses included write-downs for fair value (less costs to sell) declines subsequent to the date of foreclosure and realized gains or losses resulting

Table of Contents

Management's Discussion and Analysis

from sales transactions which have already closed, both totaling \$87.8 million and \$123.1 million for the nine months ended September 30, 2011 and 2010, respectively.

Loans

The following table compares the composition of the loan portfolio at September 30, 2011, December 31, 2010, and September 30, 2010.

<i>(dollars in thousands)</i>	Total Loans			<u>Total Loans</u>	
	September 30, 2011	December 31, 2010	September 30, 2011 vs. December 31, 2010 % Change⁽¹⁾	September 30, 2010	September 30, 2011 vs. September 30, 2010 % Change

(1) Percentage changes are annualized.

At September 30, 2011, loans outstanding were \$20.10 billion, a decrease of \$2.48 billion or 11.0%, compared to September 30, 2010. On a sequential quarter basis, total loans outstanding declined by \$402.7 million or 7.8% annualized driven primarily by a \$353.1 million decline in CRE loans. The CRE portfolio now represents 37.0% of total loans outstanding, down from 40.7% in the third quarter of 2010 and a peak of over 45%. Synovus continues to be encouraged by its recent core lending activity with achieved reported growth in owner-occupied real estate and small business loans during the third quarter of 2011. New loan fundings for the entire loan portfolio are up approximately \$130 million from the previous quarter with new originations steadily increasing monthly, mainly as a result of Synovus' previously announced expansions in the corporate banking team and recently introduced senior housing group.

Edgar Filing: SYNOVUS FINANCIAL CORP - Form 10-Q

Total commercial loans at September 30, 2011 were \$16.26 billion or 80.9% of the total loan portfolio compared to \$17.65 billion or 81.7% at December 31, 2010 and \$18.57 billion or 82.2% at September 30, 2010. Commercial real estate loans consist of investment property loans, 1-4 family properties loans, and land acquisition loans. Commercial real estate loans are primarily originated through Synovus' local market banking divisions. In accordance with Synovus' uniform lending policy, each loan undergoes a detailed underwriting process which incorporates uniform underwriting standards and oversight in proportion to the size and complexity of the lending relationship. Total commercial real estate loans which represent 37.0% of the total loan portfolio at September 30, 2011 were \$7.44 billion, a decline of \$938.3 million or 15.0% annualized from December 31, 2010 and a decline of \$1.74 billion or 18.9% from September 30, 2010.

Investment property loans consist of construction and mortgage loans for income producing properties and are primarily made to finance multi-family properties, hotels, office buildings, shopping centers, warehouses and other commercial development properties. Synovus' investment property portfolio is well diversified with no concentration by property type, geography (other than the fact that most of these loans are in Synovus' primary market areas of Georgia, Alabama, Tennessee, South

Table of Contents

Management's Discussion and Analysis

Carolina, and Florida), or tenants. These loans are generally recourse in nature with short-term maturities (three years or less) allowing for restructuring opportunities that reduce Synovus' overall risk exposure. The investment property loans are primarily secured by the property being financed by the loans; however, they may also be secured by real estate or other assets beyond the property being financed. Investment property loans are subject to the same uniform lending policies referenced above, although such loans have historically been underwritten with stressed interest rates and vacancies. In addition, in early 2008, Synovus placed restrictions on both hotel and shopping center lending to prevent problem loans in these depressed sectors from spreading. These lending restrictions remain in place today. During the fourth quarter of 2009, Synovus began quarterly reviews of all investment property loans of \$1 million or more in order to more closely monitor the performance of the portfolio. Total investment property loans as of September 30, 2011 were \$4.60 billion or 61.8% of the total commercial real estate loan portfolio and 22.9% of the total loan portfolio compared to \$5.06 billion or 60.4% of the total commercial real estate loan portfolio and 23.4% of the total loan portfolio at December 31, 2010.

1-4 family properties loans include construction loans to homebuilders, commercial mortgage loans to real estate investors, and residential development loans to developers and are almost always secured by the underlying property being financed by such loans. These properties are primarily located in the markets served by Synovus. These loans are subject to the same uniform lending policies referenced above. Additionally, underwriting standards for these types of loans include stricter approval requirements as well as more stringent underwriting standards than current regulatory guidelines. Construction and residential development loans are interest-only loans and typically carry maturities of three years or less, and 1-4 family rental properties carry maturities of three to five years, with amortization periods up to fifteen to twenty years. Given the recent turmoil in the housing and real estate markets, including falling real estate prices and increasing foreclosures, Synovus has actively and successfully reduced its exposure to residential construction and development and land acquisition loans over the past three years, including its exposure to the Atlanta market. At September 30, 2011, these loans totaled \$1.73 billion or 23.2% of the total commercial real estate portfolio and 8.6% of the total loan portfolio compared to \$2.10 billion or 25.1% of the total commercial real estate portfolio and 9.7% of the total loan portfolio at December 31, 2010.

Total residential C & D loans (consisting of 1-4 family construction loans and residential development loans) were \$706.0 million at September 30, 2011, a decline of 36.9% annualized from December 31, 2010 and a decline of 44.8% from September 30, 2010. The decline was primarily driven by charge-offs and sales of distressed loans; additionally, Synovus is not actively seeking to originate these types of loans.

Land acquisition loans are secured by land held for future development, typically in excess of one year. They have short term maturities and are typically unamortized. These properties are substantially within the Synovus footprint and carry personal guarantees from the principals. They are underwritten based on the loan to value of the collateral and the capacity of the guarantor(s). This portfolio increased during the recession as land loans originally planned for development moved back into inventory for future development. These loans are generally subject to the same uniform lending policies referenced above, and the maximum loan-to-value limit at the time of origination or refinancing is aligned with regulatory requirements. Total land acquisition loans were \$1.12 billion at September 30, 2011 or 5.6% of the total loan portfolio, a decline of 10.8% annualized from December 31, 2010 and a decline of 18.9% from September 30, 2010. Synovus' combined exposure on performing residential C & D and land acquisition loans has declined \$319.7 million or 24.18% annualized from December 31, 2010.

Alabama	242,508	13.3
Total	\$ 1,825,943	100.0%

(1) Atlanta represents \$416,045 or 22.8%.

The commercial and industrial loan portfolio represents the largest category of Synovus' total loan portfolio. The commercial and industrial loan portfolio is currently concentrated on small to middle market commercial and industrial lending disbursed throughout a diverse group of industries in the southeast, including health care, finance and insurance, manufacturing, construction, real estate leasing and retail trade. The portfolio is relationship focused and, as a result, Synovus' lenders have in-depth knowledge of the borrowers, most of which have guaranty arrangements. Commercial and industrial loans are primarily originated through Synovus' local market banking divisions and made to commercial customers primarily to finance capital expenditures, including real property, plant and equipment, or as a source of working capital. These loans are subject to the same uniform lending policies referenced above. Approximately 93% of Synovus' commercial and industrial loans are secured by real estate, business equipment, inventory, and other types of collateral. Total commercial and industrial loans at September 30, 2011 were \$8.81 billion or 43.8% of the total loan portfolio compared to \$9.26 billion or 42.9% of the total loan portfolio at December 31, 2010.

At September 30, 2011, \$3.91 billion of total commercial and industrial loans, or 19.5% of the total loan portfolio, represent loans for the purpose of financing owner-occupied properties. The primary source of repayment on these loans is revenue generated from products or services offered by the business or organization. The secondary source of repayment on these loans is the real estate. These loans are predominately secured by owner-occupied and other real estate. Other types of collateral securing these loans consist primarily of marketable equipment, marketable inventory, accounts receivable, equity and debt securities, and time deposits.

Commercial and industrial lending is a key component of Synovus' growth strategy. Synovus has actively invested in additional expertise, product offerings, and product quality to provide its commercial and industrial clients with increased and enhanced product offerings and customer service. Synovus has formed a senior housing group to focus on building relationships in the commercial banking segment that include Alzheimer's, convalescent, and assisted-living care facilities, as well as nursing homes. In addition, Synovus has expanded its treasury management group and large corporate banking initiative as part of an overall commercial banking strategy to provide lending solutions and to connect more commercial banking customers with Synovus' full suite of specialized commercial banking products and services that include private banking, treasury management, asset-based lending, insurance, and wealth management in an effort to strengthen, diversify, and drive growth in Synovus' commercial and industrial loan portfolio.

At September 30, 2011 and 2010, Synovus had 23 and 27 commercial loan relationships, respectively, with total commitments of \$50 million or more (including amounts funded). The average funded balance of each of these relationships at September 30, 2011 and 2010 was approximately \$56 million and approximately \$77 million, respectively.

Edgar Filing: SYNOVUS FINANCIAL CORP - Form 10-Q

The retail loan portfolio consists of a wide variety of loan products offered through Synovus' banking network, including first and second residential mortgages, HELOC, credit card loans, automobile loans, small business loans, and other retail loans. These various types of secured and unsecured retail loans are marketed to qualifying existing clients and to other creditworthy candidates in Synovus' market area. The majority of Synovus' retail loans are consumer mortgages and home equity lines secured by first and second liens on residential real estate primarily located in the markets

Table of Contents

Management's Discussion and Analysis

served by Synovus in Georgia, Florida, South Carolina, Alabama, and Tennessee. In accordance with Synovus' uniform lending policy, each loan undergoes a detailed underwriting process which incorporates uniform underwriting standards and oversight that is proportional to the size and complexity of the lending relationship. Retail loans are subject to the same uniform lending policies referenced above and consist primarily of loans with strong borrower credit scores (most recently measured June 30, 2011 weighted-average FICO scores within the residential real estate portfolio were 758 for HELOC and 744 for Consumer Mortgages), conservative debt-to-income ratios (average debt-to-income ratio of loans approved in the third quarter of 2011 was 29.6%), utilization rates (total amount outstanding as a percentage of total available lines) of 61.5% and 62.0% at September 30, 2011 and 2010, respectively, and loan-to-value ratios based upon prudent guidelines to ensure consistency with Synovus' overall risk philosophy. Apart from credit card loans and unsecured loans, Synovus does not originate loans with LTV ratios greater than 100% at origination except for infrequent situations provided that certain underwriting requirements are met. Additionally, at origination, loan maturities are determined based on the borrower's ability to repay (cash flow or earning power of the borrower that represents the primary source of repayment) and the collateralization of the loan, including the economic life of the asset being pledged. Collateral securing these loans provides a secondary source of repayment in that the collateral may be liquidated. Synovus determines the need for collateral on a case-by-case basis. Factors considered include the purpose of the loan, current and prospective credit-worthiness of the customer, terms of the loan, and economic conditions.

Risk levels 1-6 (descending) are assigned based upon risk scores and are considered pass ratings. The retail loan portfolio is sent to a consumer credit reporting agency for a refresh of customers' credit scores at least annually to determine ongoing consistency or negative migration in the quality of the portfolio. As part of the refresh, revolving lines of credit are reviewed for a material change in financial circumstances and suspended for further advances when warranted.

Sub-prime loans are not a part of the retail lending strategy, and Synovus does not currently develop or offer specific sub-prime, alt-A, no documentation or stated income retail residential real estate loan products. Synovus estimates that, as of September 30, 2011, it has approximately \$156.4 million of retail residential real estate loans (5.1% of said portfolio and 0.7% of the total loan portfolio) with FICO scores at origination that were below Fannie Mae and Freddie Mac eligibility thresholds which could be considered sub-prime. While FICO scores are one key indicator of credit risk, Synovus makes retail residential real estate lending decisions based upon a number of key credit risk determinants including FICO scores as well as bankruptcy predictor scores, loan-to-value, and debt-to-income ratios. Through its mortgage subsidiary, Synovus previously originated Fannie Mae alt-A loans with the intent to sell these loans into the secondary market. Synovus no longer originates such loans and as of September 30, 2011 has \$1.2 million of such loans remaining on its balance sheet.

Prior to July 2009, Synovus' loan policy did not specifically prohibit the origination of no documentation or stated income loans as long as such loans were supported by other risk mitigating criteria including, but not limited to, established banking relationship history, significant cash on deposit, and/or compensating loan-to-value or debt-to-income ratios. Since July 2009, as Synovus continues to tighten its retail residential real estate origination policy, no documentation or stated income loans are permitted to be made only on an exception basis and if supplemented by the mitigating criteria previously noted. While Synovus does not currently offer specific no documentation or stated income retail residential real estate loan products, loans with these characteristics could have been issued under the previous loan policy or as an exception under the current loan policy, primarily to individuals with existing banking relationships. Synovus does not believe it has originated a significant dollar amount of such loans and does not believe that extending such loans has had a significant negative impact on the credit quality of the portfolio.

Retail loans at September 30, 2011 totaled \$3.86 billion, representing 19.2% of the total loan portfolio compared to \$3.95 billion, or 18.3%, of the total loan portfolio at December 31, 2010 and \$4.02 billion, or 17.8%, of the total loan portfolio at September 30, 2010. Total retail loans declined at an annualized rate of 3.2% compared to December 31, 2010 and decreased by 4.1% compared to September 30, 2010, led principally by declines in consumer mortgages and home equity lines of credit. The retail loan portfolio credit scores were updated as of June 30, 2011. There was no material migration within the retail loan portfolio.

Table of Contents

Management's Discussion and Analysis

The most recently measured weighted average FICO scores within the retail residential real estate portfolio were 758 (HELOC) and 744 (Consumer Mortgages) as of June 30, 2011 as compared to 752 (HELOC) and 740 (Consumer Mortgages) as of December 31, 2010. FICO scores within the retail residential real estate portfolio have remained stable since 2007. Total past dues within the retail residential real estate portfolio as of September 30, 2011 were 0.83% (HELOC) and 1.92% (Consumer Mortgages) compared to 0.87% (HELOC) and 1.64% (Consumer Mortgages) at December 31, 2010. The annualized net charge-off ratios for the nine months ended September 30, 2011 were 1.86% (HELOC) and 1.15% (Consumer Mortgages) compared to 1.93% (HELOC) and 3.23% (Consumer Mortgages) for the year ended December 31, 2010.

Monitoring of Collateral

Synovus follows a risk-based approach as it relates to the credit monitoring processes for its loan portfolio. The fair value of the real estate securing loans is generally determined based upon appraisals performed by a certified or licensed appraiser. Synovus updates the fair value of the real estate collateral securing collateral-dependent impaired loans each calendar quarter. Management also considers other factors or recent developments, such as selling costs and anticipated sales values considering management's plans for disposition, which could result in adjustments to the collateral value estimates indicated in the appraisals. Synovus updates the values of collateral that is in the form of accounts receivable, inventory, equipment, and cash surrender value of life insurance policies at least annually and the values of collateral that is in the form of marketable securities and brokerage accounts at least monthly.

For credits that are not on impaired status, Synovus generally obtains a third-party appraisal of the value of the real estate collateral prior to each loan renewal. Additionally, if conditions warrant (e.g., loans that are not considered impaired but exhibit a higher or potentially higher risk), Synovus engages a third party to reappraise the value of the collateral on a more frequent basis. Examples of circumstances that could warrant a new appraisal on an existing performing credit include instances in which local market conditions where the real estate collateral is located have deteriorated, the collateral has experienced damage (fire, wind damage, etc.), the lease or sell-out of the collateral has not met the original projections, or the net operating income of the collateral has declined. In circumstances where the collateral is no longer considered sufficient, Synovus seeks to obtain additional collateral.

Loan Guarantees

In addition to collateral, Synovus generally requires a guarantee from all principals on all commercial real estate and commercial and industrial lending relationships. Specifically, Synovus generally obtains unlimited guarantees from any entity (e.g., individual, corporation, or partnership) that owns or controls 50 percent or more of the borrowing entity. Limited guarantees on a pro rata basis are generally required for all 20 percent or more owners.

Synovus evaluates the financial ability of a guarantor through an evaluation of the guarantor's current financial statements, income tax returns for the two most recent years, and financial information regarding a guarantor's business or related interests. In addition, Synovus analyzes substantial assets owned by the guarantor to ensure that the guarantor has the necessary ownership or control over these assets. For loans that are not considered impaired, the allowance for loan losses is determined based on the risk rating of each loan. The risk rating incorporates a number of factors, including guarantors. If a loan is rated doubtful, with certain limited exceptions, a guarantee is not considered in determining the amount to be charged-off.

With certain limited exceptions, Synovus seeks performance under guarantees in the event of a borrower's default. However, because of the current economic environment, and based on the fact that a majority of Synovus' problem credits are commercial real estate credits, Synovus' success in recovering amounts due under guarantees has been limited.

Table of Contents

Management's Discussion and Analysis

Credit Quality

Synovus continuously monitors credit quality and maintains an allowance for loan losses that management believes is sufficient to absorb probable losses inherent in its loan portfolio. Synovus continues to address problem assets and reduce future exposures through asset dispositions as well as timely monitoring of problem loans through review of these loans and applicable current market data. The specific reserves, ORE valuation allowances, and cumulative write-downs on NPAs (non-performing loans which are also referred to as non-accruing loans, ORE, and impaired loans held for sale) as a percentage of unpaid principal balance related to all NPAs at September 30, 2011 was approximately 44%, unchanged from June 30, 2011 and compared to 46% at December 31, 2010.

During the third quarter of 2011, Synovus completed sales of distressed assets with total carrying values of \$168.6 million. These asset sales were comprised of \$82.9 million of investment real estate loans and ORE properties, \$41.5 million of residential real estate loans and ORE properties, \$16.9 million of land acquisition loans and ORE properties, \$21.4 million of commercial and industrial loans and ORE properties, and \$5.9 million of retail loans and ORE properties.

Total credit costs (provision for losses on loans plus other credit costs which consist primarily of foreclosed real estate expense, net, provision for losses on unfunded commitments, and charges to related to other loans held for sale) for the quarters ended September 30, 2011 and 2010 were \$142.5 million and \$300.9 million, respectively, including provision for losses on loans of \$102.3 million and \$239.0 million, respectively, and expenses related to foreclosed real estate of \$37.1 million and \$50.9 million, respectively. Total credit costs decreased for the ninth consecutive quarter and are at the lowest level in almost three years, declining \$15.4 million, or 9.7%, from the second quarter of 2011 and \$158.4 million, or 52.6%, from prior year. Synovus currently believes that total credit costs during the fourth quarter of 2011 will decline at a more significant pace than the sequential quarter decline experienced during the third quarter of 2011.

Total non-performing assets were \$1.16 billion at September 30, 2011 compared to \$1.22 billion and \$1.56 billion at June 30, 2011 and September 30, 2010, respectively, a decrease of \$54.3 million or 4.5% and \$391.8 million or 25.2%, respectively. Non-performing asset levels declined for the sixth consecutive quarter and have been impacted by lower inflows, asset dispositions, and charge-offs. Total non-performing assets as a percentage of total loans, other loans held for sale, and other real estate was 5.71% at September 30, 2011 compared to 5.85% and 6.81% at June 30, 2011 and September 30, 2010, respectively. At September 30, 2011, 43.4% of total non-performing assets were in the Atlanta and South Carolina markets (28.3% and 15.1%, respectively) as compared to 43.9% of NPAs in these areas at June 30, 2011.

While non-performing assets, NPL inflows, and credit costs remain above normalized levels, most of Synovus' credit quality measures have continued to show improvement during the third quarter of 2011. Synovus believes that the best predictor of future credit costs is the level of non-performing loan NPL inflows which have been trending in a positive direction from the peak of \$939.0 million in the first quarter of 2009. NPL inflows during the third quarter of 2011 were \$222 million, down 4.0% from prior quarter additions of \$231.1 million and down 47.3% from third quarter 2010 additions of \$421.5 million. These inflows are at the lowest level since the credit cycle began over three years ago. Synovus presently expects that NPL inflows will continue to decline during the fourth quarter of 2011.

Restructuring of Past Due Loans

Table of Contents

Management's Discussion and Analysis

Loans past due 90 days or more, which based on a determination of collectability are accruing interest, are classified as past due loans. Synovus historic and current policy prohibits making additional loans to a borrower, or any related interest of a borrower, who is on nonaccrual status except under certain workout plans and if such extension of credit aids with loss mitigation. Additionally, Synovus' historic and current policy discourages making additional loans to a borrower or any related interest of the borrower who has a loan that is past due in principal or interest more than 90 days and remains on accruing status.

Troubled Debt Restructurings

Loan Renewals and Modifications - In the normal course of business, Synovus may renew loans to existing customers upon maturity of the existing loan. These renewals are granted provided that the credit meets the underwriting criteria stated for such credit. While this policy has been in place for several years, the underwriting criteria are now stricter in light of the current economic environment. For example, commercial loan to value limits are generally lower than they were two years ago.

Additionally, as conditions warrant, Synovus extends, restructures, or otherwise modifies the terms of loans or other extensions of credit from time to time. Prior to the downturn in the economy, such instances were generally not common. And, when they occurred, they were generally in the form of an extension of maturity until the borrower could obtain an updated appraisal or updated financial statements. During the past two years, modifications have become more common in instances where the borrower is experiencing financial difficulties. Such restructurings are primarily in the form of a below-market interest rate, a payment extension of terms generally for less than one year, or a period of time generally less than one year with a reduction of required principal and/or interest payments (e.g., interest only for a period of time).

Synovus' policy for granting extensions or restructurings of retail loans is as follows:

the loan must be at least six months old,

one extension is permitted within a 12 month period,

two payments can be extended at one time, and

cumulative maximum number of payments extended cannot exceed one for each 12 months of the loan term.

Synovus' policy for granting extensions or restructurings of commercial loans is as follows:

Brief extensions are intended for situations in which the financial statements, tax returns, or other information required for a loan renewal are not available prior to the existing loan's maturity, or for other non-recurring instances that warrant a brief extension of credit. Loans that are in classified status cannot be considered for an extension under this policy.

Extensions or modifications of loans that are in classified status are not an acceptable practice unless done in connection with established and documented workout plans. A credit may only be extended on this basis one time before the annual renewal/review takes place.

Loan Extensions - Loan extensions are evaluated to determine whether the loan should be accounted for as non-performing or as a troubled debt restructuring. Synovus' policy requires that loans be classified as non-performing when reasonable doubt exists as to the full collection of interest or principal, or when they become contractually in default for 90 days or more as to either principal or interest, unless they are both well-secured and in the process of collection. Additionally, Synovus' policy requires that loans be accounted for as troubled debt restructurings if the borrower

Edgar Filing: SYNOVUS FINANCIAL CORP - Form 10-Q

is experiencing financial difficulties and the bank has granted a concession. To ensure consistency in application, Synovus policy requires that lending personnel refer to the risk grading of each loan to make the determination as to whether the borrower is experiencing financial difficulties. The determination as to whether the bank has granted a concession is made based on the terms of the restructuring, including the interest rate in comparison to the market, given the borrower's credit risk.

Management, considering current information and events regarding a borrower's ability to repay its obligations, considers a loan to be impaired when the ultimate collectability of all amounts due, according to the contractual terms of the loan agreement, is in doubt. To date, loan extensions have been primarily within the commercial portfolio and generally consist of brief extensions of maturities in situations where the financial statements, tax returns, or other information required for a loan

Table of Contents

Management's Discussion and Analysis

renewal are not available prior to the existing loan's maturity. Loan extensions have also been made in connection with troubled debt restructurings. These extensions have generally consisted of extensions of maturities of one year or less.

In April 2011, the FASB issued ASU 2011-02, A Creditor's Determination of Whether a Restructuring is a Troubled Debt Restructuring, which is effective for the first interim or annual period beginning on or after June 15, 2011. On July 1, 2011, Synovus adopted the provisions of ASU 2011-02, and as required, applied the provisions of the ASU to all renewals, modifications, and restructurings that have occurred since January 1, 2011. As a result, Synovus' level of TDRs increased by approximately \$190 million at the date of adoption. The primary reason for the increase is due to the consideration of the interest rate granted as compared to the market interest rate for a loan with similar risk attributes. The market interest rate concept in the new ASU states that if a borrower does not otherwise have access to funds at a market interest rate for debt with characteristics similar to those of the restructured debt, the restructuring would be considered to be at a below-market rate, which indicates that the lender may have granted a concession. While the adoption of ASU 2011-02 resulted in an increase of approximately \$190 million in loans identified as TDRs, there was not a material impact on the September 30, 2011 allowance for loan losses.

Accruing restructured loans were \$640.3 million at September 30, 2011 compared to \$551.6 million at June 30, 2011 and \$409.8 million at September 30, 2010. Overall, accruing restructured loans increased on a net basis from the second quarter of 2011 by \$88.7 million or 16.1%. At September 30, 2011, the allowance for loan losses allocated to these accruing restructured loans was \$68.1 million compared to \$61.4 million at June 30, 2011 and \$40.7 million at September 30, 2010. The primary reason for TDR classification is due to Synovus' decision to provide below-market interest rates to assist the borrowers in managing their cash flows, a payment extension of terms generally for less than one year, or a period of time generally less than one year with a reduction of required principal and/or interest payments (e.g., interest only for a period of time). Synovus typically extends the term in a commercial loan modification for less than one year to assist the borrower. Accruing restructured loans are not considered non-performing because they are performing in accordance with the restructured terms. At September 30, 2011, approximately 94% of accruing restructured loans were current, and 39.3% or \$251.1 million of accruing restructured loans are graded as pass (15.0%) or special mention loans (24.3%). At September 30, 2011, troubled debt restructurings (accruing and non-accruing) were \$811.7 million, an increase of \$119.2 million or 17.2% compared to June 30, 2011 and an increase of \$166.0 million or 25.7% compared to September 30, 2010.

Potential problem loans are defined by management as being certain performing loans with a well-defined weakness where there is information about possible credit problems of borrowers which causes management to have doubts as to the ability of such borrowers to comply with the present repayment terms of such loans. Management's decision to include performing loans in the category of potential problem loans indicates that management has recognized a higher degree of risk associated with these loans. In addition to accruing loans 90 days past due and accruing restructured loans, Synovus had \$941.9 million of potential problem commercial loans at September 30, 2011 compared to \$1.20 billion and \$1.87 billion at June 30, 2011 and September 30, 2010, respectively. At September 30, 2011, the allowance for loan losses allocated to these potential problem loans was \$140.4 million compared to \$189.9 million and \$254.5 million at June 30, 2011 and September 30, 2010, respectively. Synovus cannot predict at this time whether these potential problem loans ultimately will become non-performing loans or result in losses. The trend of potential problem commercial loans has been declining and such loans have declined by almost 50% from a year ago. Synovus anticipates that a declining trend will continue.

Table of Contents

Management's Discussion and Analysis

Potential Problem Commercial Loans

<i>(in thousands)</i>	September 30, 2011	June 30, 2011	March 31, 2011	December 31, 2010	September 30, 2010
Investment properties	\$ 172,872	251,156	265,116	330,611	435,797
1-4 family properties	171,433	228,443	236,584	258,459	366,777
Land acquisition	181,808	250,459	257,474	297,945	440,333
Total commercial real estate	526,113	730,058	759,174	887,015	1,242,907
Commercial and industrial	415,770	468,819	524,261	548,539	628,326
Total potential problem commercial loans	\$ 941,883	1,198,877	1,283,435	1,435,554	1,871,233

Special mention loans have potential weaknesses that deserve management's close attention but are not adversely classified and do not expose Synovus to sufficient risk to warrant an adverse classification. At September 30, 2011, there were \$2.09 billion of special mention loans (\$1.14 billion of commercial real estate loans and \$959.0 million of commercial and industrial loans) compared to \$2.33 billion (\$1.27 billion of commercial real estate loans and \$1.06 billion of commercial and industrial loans) at June 30, 2011, a decrease of \$238.7 million or 10.2% from the second quarter of 2011.

Net Charge-offs

Net charge-offs for the three months ended September 30, 2011 were \$138.3 million, a decrease of \$98.9 million compared to the three months ended September 30, 2010. The net charge-off ratio for the three months ended September 30, 2011 was 2.72% annualized compared to 4.12% annualized for the third quarter of 2010. Net charge-offs for the three months ended September 30, 2011 were down \$28.8 million or 17.3% from the prior quarter, driven primarily by lower mark-to-market costs and improvement in the commercial and industrial and retail portfolios. Synovus anticipates that the net charge-off ratio will be below 2.50% for the fourth quarter of 2011 and that there will be continued improvement in 2012.

The following tables show net charge-offs by geography and type for the nine and three months ended September 30, 2011 and September 30, 2010.

Net Charge-offs by Geography

<i>(in thousands)</i>	Nine Months Ended September 30, 2011		Three Months Ended September 30, 2011		Three Months Ended September 30, 2010	
-----------------------	--	--	---	--	---	--

Commercial and industrial	111,502	186,886	14,797	48,425
Retail	54,402	85,077	15,968	27,167
Total	\$ 472,394	986,242	138,343	237,187

Provision for Losses on Loans and Allowance for Loan Losses

Provision for losses on loans for the three months ended September 30, 2011 was \$102.3 million, a decrease of \$17.8 million and \$136.7 million compared to the three months ended June 30, 2011 and September 30, 2010, respectively. Provision for losses on loans for the nine months ended September 30, 2011 also declined to \$364.2 million from \$878.9 million for the nine months ended September 30, 2010. The decline in provision for losses on loans on a year-to-date basis is primarily due to reduced charge-offs and NPL inflows as well as reduced levels of non-accruing loans and total loans outstanding. The decline in provision for losses on loans on a quarter-to-date basis is primarily due to the continued changing mix in the loan portfolio, lower mark-to-market expenses, and improvement in overall credit migration costs.

The allowance for loan losses to non-performing loans coverage was 68.27% at September 30, 2011 compared to 78.91% and 64.63% at December 31, 2010 and September 30, 2010, respectively. This ratio is impacted by collateral-dependent impaired loans which generally have no allowance for loan losses because the estimated losses on these credits have been charged-off. Therefore, a more meaningful allowance for loan losses coverage ratio is the allowance to non-performing loans excluding collateral-dependent impaired loans for which there is no related allowance for loan losses which was 148.87% at September 30, 2011 compared to 190.28% at December 31, 2010 and 177.98% at September 30, 2010.

A substantial number of Synovus' loans are secured by real estate located in five southeastern states (Georgia, Alabama, Florida, South Carolina, and Tennessee). Accordingly, the ultimate collectability of a substantial part of Synovus' loan portfolio is susceptible to changes in market conditions in these areas. Based on current information and market conditions, management believes that the allowance for loan losses is adequate.

Other real estate	239,255	244,313	269,314	261,305	211,869
Non-performing assets ⁽³⁾	\$ 1,164,403	1,218,688	1,275,476	1,280,292	1,556,202
Net charge-offs quarter	\$ 138,343	167,184	166,867	385,203	237,187
Net charge-offs/average loans quarter ⁽⁴⁾	2.72%	3.22	3.12	6.93	4.12
Net charge-offs year to date	\$ 472,394	334,051	166,867	1,371,452	986,242
Net charge-offs/average loans year to date ⁽⁴⁾	3.03%	3.17	3.12	5.82	5.47
Loans 90 days past due and still accruing	\$ 26,860	23,235	10,490	16,222	25,028
As a % of loans	0.13%	0.11	0.05	0.08	0.11
Total past due loans and still accruing	\$ 199,561	199,804	201,754	176,756	253,748
As a % of loans	0.99%	0.97	0.96	0.82	1.12
Restructured loans (accruing)	\$ 640,324	551,603	545,416	464,123	409,768
Allowance for loan losses	\$ 595,383	631,401	678,426	703,547	836,355
Allowance for loan losses as a % of loans	2.96%	3.08	3.23	3.26	3.70
Non-performing loans as a % of total loans	4.34	4.32	4.27	4.13	5.73
Non-performing assets as a % of total loans, other loans held for sale, and ORE	5.71	5.85	5.97	5.83	6.81
Allowance to non-performing loans	68.27	71.33	75.74	78.91	64.63
Collateral-dependent impaired loans ⁽⁵⁾	\$ 612,445	624,322	636,033	631,934	1,037,249

- (1) The specific reserves and cumulative write-downs on non-performing loans as a percentage of unpaid principal balance was approximately 39% at both September 30, 2011 and June 30, 2011.
- (2) Impaired loans held for sale are carried at the lower of cost or fair value less selling costs.
- (3) The specific reserves, ORE valuation allowances, and cumulative write-downs on non-performing assets as a percentage of unpaid principal balance related to all NPAs at September 30, 2011 was approximately 44% compared to 45% at June 30, 2011.
- (4) Ratio is annualized.
- (5) Collateral-dependent impaired loans for which there was no associated reserve were \$451.4 million at September 30, 2011 and \$486.5 million at June 30, 2011.

The allowance for loan losses was \$595.4 million or 2.96% of net loans at September 30, 2011 compared to \$631.4 million or 3.08% of net loans at June 30, 2011 and \$703.5 million or 3.26% of net loans at December 31, 2010. This decline in the allowance for loan losses is mainly a result of improved credit migration driven by declines in potential problem commercial loans and special mention loans as well as the sale of loans with attached reserves.

Deposits

The following table presents the composition of deposits.

<i>(in thousands)</i>	September 30, 2011	June 30, 2011	December 31, 2010	September 30, 2010
Non-interest bearing demand deposits	\$ 5,249,335	4,877,267	4,298,372	4,248,071
Interest bearing demand deposits	3,474,852	3,357,195	3,860,157	3,633,218
Money market accounts excluding brokered deposits	6,753,138	6,378,259	6,798,092	6,839,322
Savings deposits	522,327	521,798	480,184	483,918
Time deposits excluding brokered deposits	4,952,144	5,049,900	5,911,150	6,482,521
Brokered deposits	2,157,631	2,690,598	3,152,349	3,549,175
Total deposits	\$ 23,109,427	22,875,017	24,500,304	25,236,225
Core deposits ⁽¹⁾	\$ 20,951,796	20,184,419	21,347,955	21,687,050
Core deposits excluding time deposits ⁽¹⁾	\$ 15,999,652	15,134,519	15,436,805	15,204,529

(1) See reconciliation of Non-GAAP Financial Measures in this report.

Total deposits increased \$234.4 million, or 4.1% annualized, from June 30, 2011 and decreased \$1.39 billion, or 7.6% annualized, from December 31, 2010. The year-to-date decline in total deposits was driven primarily by a planned reduction of brokered deposits and a continued wind-down of the Shared Deposits program. Non-interest bearing demand deposits as a percentage of total deposits increased to 22.7% at September 30, 2011, up from 21.3% at June 30, 2011 and 17.5% at December 31, 2010. At September 30, 2011, the percentage of loans funded by core deposits was 100%, an increase

Table of Contents

Management's Discussion and Analysis

from 98.4% at June 30, 2011 and 98.9% at December 31, 2010. See reconciliation of Non-GAAP Financial Measures in this report.

Time deposits of \$100,000 and greater at September 30, 2011, June 30, 2011, and December 31, 2010 were \$4.68 billion, \$5.27 billion, and \$6.36 billion, respectively. Brokered time deposits, which are a component of time deposits of \$100,000 and greater, were \$1.83 billion, \$2.34 billion, and \$2.76 billion at September 30, 2011, June 30, 2011, and December 31, 2010, respectively. Total time deposits of \$100,000 and greater represented 20.2%, 23.0%, and 26.0% of total deposits at September 30, 2011, June 30, 2011, and December 31, 2010, respectively. Brokered time deposits represented 7.9%, 10.2%, and 11.3% of total deposits at September 30, 2011, June 30, 2011, and December 31, 2010, respectively.

Prior to the Charter Consolidation, a component of Synovus' deposit growth was through the offering of Shared Deposit products. The Charter Consolidation resulted in the inability to offer the Shared Deposit products in the future. Customers holding Shared CD balances may retain these deposits on a fully insured basis until their maturity. As these Shared CDs mature, overall balances in this product will continue to decline. As of September 30, 2011, remaining balances in Shared Deposit products were \$205.0 million, down from \$277.6 million at June 30, 2011 and \$690.9 million at December 31, 2010.

Following the Charter Consolidation, management developed a strategic plan to diversify Synovus' funding sources and reduce reliance on volatile funding sources such as brokered deposits and Shared Deposit products. The strategic initiatives implemented by management have and will continue to reduce Synovus' dependence on brokered deposits and Shared Deposit products primarily through:

allowing partial runoff of maturing brokered deposits,

reducing utilization of brokered money market accounts,

reduction of Shared Deposit balances as the program expires, and

maintaining and enhancing local market core deposit base.

At September 30, 2011, brokered deposits represented 9.3% of Synovus' total deposits compared to 11.8% at June 30, 2011 and 12.9% at December 31, 2010. As noted above, Synovus intends to continue to reduce the level of these types of deposits during the remainder of 2011.

Management's Discussion and Analysis

Capital Resources and Liquidity*Capital Resources*

Synovus has always placed great importance on maintaining a solid capital base and continues to satisfy applicable regulatory capital requirements. Management is committed to maintaining a capital level sufficient to assure shareholders, customers, and regulators that Synovus is financially sound.

The following table presents certain ratios used to measure Synovus' capitalization.

<i>(dollars in thousands)</i>	September 30, 2011	June 30, 2011	December 31, 2010
Tier 1 capital			
Synovus Financial Corp.	\$ 2,770,971	2,758,282	2,909,912

Synovus Financial Corp.	6.56	6.63	6.73

(1) See reconciliation of Non-GAAP Financial Measures in this report.

As a financial holding company, Synovus and its subsidiary bank, Synovus Bank, are required to maintain capital levels required for a well-capitalized institution as defined by federal banking regulations. The capital measures used by the federal banking regulators include the total risk-based capital ratio, Tier 1 risk-based capital ratio, and the leverage ratio. Synovus Bank is a state-chartered bank operating under the regulations of the Georgia Department of Banking and Finance. Under the regulations, Synovus Bank is considered to be well-capitalized if it has a total risk-based capital ratio of 10% or greater, a Tier 1 capital ratio of 6% or greater, a leverage ratio of 5% or greater, and is not subject to any written agreement, order, capital directive, or prompt corrective action directive from a federal and/or state banking regulatory agency to meet and maintain a specific capital level for any capital measure. However, even if Synovus Bank satisfies all applicable quantitative criteria to

Edgar Filing: SYNOVUS FINANCIAL CORP - Form 10-Q

be considered well-capitalized, the regulations also establish procedures for downgrading an institution to a lower capital category based on supervisory factors other than capital. In June 2010, Synovus Bank entered into a memorandum of understanding with the FDIC and the Georgia Department of Banking and Finance agreeing to maintain a minimum leverage ratio of 8% and a minimum total risk-based capital to risk-weighted assets ratio of 10%. Management believes that, as of September 30, 2011, both Synovus and Synovus Bank meet all capital requirements to which they are subject.

Synovus has experienced significant credit losses in recent years, primarily as a result of an extended period of economic downturn impacting all segments of the United States economy. While the level of credit losses has declined significantly from the peak with most credit quality measures continuing to improve, current levels of credit losses and non-performing assets are still elevated compared to historical levels. The cumulative effect of these credit losses over recent years has

Table of Contents

Management's Discussion and Analysis

negatively impacted Synovus' capital position. As a result, Synovus completed a number of steps over the past three years to strengthen its capital position as described below. Synovus continuously and actively manages capital including forecasting and stress testing for both expected and more adverse economic conditions and will pursue additional strategies designed to bolster its capital position when and as deemed necessary. If credit losses and credit deterioration exceed management's current expectations, they could adversely impact Synovus' capital ratios.

During 2008, 2009, and 2010, Synovus completed several public offerings and other capital-related actions described below.

In December 2008, Synovus issued 967,870 shares of Series A Preferred Stock to the United States Department of the Treasury as part of the CPP, generating \$967.9 million of Tier 1 Capital.

During 2009, Synovus undertook several initiatives to bolster its capital including a public offering of 150,000,000 shares of common stock that generated net proceeds of approximately \$570.9 million, the exchange of \$29.8 million in aggregate principal amount of its 4.875% Subordinated Notes Due 2013 for 9.44 million shares of Synovus' common stock, which resulted in an increase to tangible common equity of approximately \$28 million, and the sale of Synovus' remaining shares of Visa Class B common stock, which resulted in a pre-tax gain of approximately \$51.9 million.

During 2010, Synovus undertook additional initiatives to further boost its capital including the sale of its merchant services business which resulted in a pre-tax gain of approximately \$69.5 million, a public offering of 293,250,000 shares of common stock, and 13,800,000 units of tMEDS. The common stock and tMEDS offerings, which were completed on May 4, 2010, generated aggregate cash proceeds of \$769.1 million and \$333.6 million, respectively, and increased Tier 1 common equity by approximately \$1.03 billion. A tMEDS unit consists of a prepaid common stock purchase contract recorded as equity and a junior subordinated amortizing note recorded as debt. As a result of the tMEDS issuance, \$70.4 million was recorded to debt, an offsetting \$2.3 million was recorded to prepaid debt issuance costs, and \$265.5 million was recorded to additional paid-in capital.

See Capital and Note 13 to the consolidated financial statements in Synovus' 2010 10-K for additional information regarding the public offerings and other capital actions discussed above.

During 2009 and continuing into 2010, Synovus experienced both significant declines in the value of collateral underlying real estate loans and heightened credit losses, which resulted in record levels of non-performing assets, charge-offs, foreclosures, and losses on disposition of distressed assets. While these levels continue to remain high, most credit quality measures are continuing to improve; however, it remains difficult to predict whether the recent improvements experienced will continue, or whether the effects of any further potential future negative developments in the credit, economic, and regulatory environments will adversely impact these improving trends.

Management currently believes, based on current internal capital analyses and earnings projections, that Synovus' capital position is adequate to meet current regulatory minimum capital requirements. However, Synovus continues to actively monitor economic conditions, evolving industry capital standards, and changes in regulatory standards and requirements, and engages in regular discussions with its regulators regarding capital at both Synovus and Synovus Bank. As part of its ongoing management of capital, Synovus will continue to identify, consider, and pursue additional strategic initiatives to bolster its capital position as deemed necessary, including strategies to refinance or restructure Synovus' Series A Preferred Stock in connection with any future repayment of Synovus' obligations under the CPP.

Liquidity

Liquidity represents the extent to which Synovus has readily available sources of funding needed to meet the needs of depositors, borrowers and creditors, to support asset growth, to maintain reserve requirements, and to otherwise sustain the operations of Synovus and its subsidiary bank, at a reasonable cost, on a timely basis, and without adverse consequences. The ALCO, operating under liquidity and funding policies approved by the Board of Directors, actively analyzes contractual and anticipated cash flows in order to properly manage Synovus' liquidity position.

Table of Contents

Management's Discussion and Analysis

Contractual and anticipated cash flows are analyzed under normal and stressed conditions to determine forward looking liquidity needs and sources. Emphasis is placed on maintaining numerous sources of current and potential liquidity in order for the company to meet its obligations to depositors, borrowers, and creditors on a timely basis.

Liquidity is generated through maturities and repayments of loans by customers, maturities of investment securities, deposit growth, and access to sources of funds other than deposits. Management constantly monitors and maintains appropriate levels of liquidity so as to provide adequate funding sources to meet estimated customer deposit withdrawals and future loan requests. Liquidity is also enhanced by the acquisition of new deposits. Each of the banking markets monitors deposit flows and evaluates alternate pricing structures in an effort to retain and grow deposits. In the current market environment, customer confidence is a critical element in growing and retaining deposits. In this regard, Synovus' asset quality could play a larger role in the stability of the deposit base. In the event asset quality declines significantly from its current level, the ability to grow and retain deposits could be diminished, which in turn could reduce deposits as a liquidity source.

Synovus' subsidiary bank, Synovus Bank, also generates liquidity through the national deposit markets. Synovus Bank historically has issued longer-term certificates of deposit across a broad geographic base to increase its liquidity and funding position. Access to these deposits could become limited if Synovus Bank's asset quality and financial performance were to significantly deteriorate. Synovus Bank has the capacity to access funding through its membership in the FHLB System. At September 30, 2011, Synovus Bank had access to incremental funding, subject to available collateral and FHLB credit policies, through utilization of FHLB advances.

Synovus pledges cash, cash equivalents, or investment securities as collateral in connection with derivative instruments in a net liability position, FHLB advances, payment network arrangements, securities sold under repurchase agreements, certain letters of credit, and government banking deposit arrangements. Pledged amounts are restricted as to withdrawal or sale during the effective period of the pledge. See Notes 1, 4, and 9 of the notes to the unaudited interim consolidated financial statements for further discussion of financial instruments pledged as collateral.

In addition to bank level liquidity management, Synovus must manage liquidity at the holding company level for various operating needs including potential capital infusions into subsidiaries, the servicing of debt, the payment of general corporate expenses, and the payment of dividends to shareholders. The primary source of liquidity for Synovus is dividends from Synovus Bank, a transaction that is governed by certain rules and regulations of state and federal banking regulatory agencies. Dividends from subsidiaries in 2009 and 2010 were significantly lower than those received in previous years. Synovus does not expect to receive subsidiary dividends in the near future. During 2009 and 2010, Synovus was required to contribute capital to certain subsidiary banks, including Synovus Bank following the Charter Consolidation. Synovus Bank is currently required to maintain regulatory capital levels in excess of minimum well-capitalized requirements primarily as a result of non-performing asset levels. Due to these requirements, Synovus could be required to contribute additional capital to Synovus Bank which could adversely affect liquidity at the holding company level.

Historically, Synovus' holding company has enjoyed a solid reputation in the capital markets and has been able to raise funds in the form of either short or long-term borrowings or equity issuances including the public offerings completed in September 2009 and May 2010. Current regulation of financial institutions places great emphasis on liquidity at the holding company level as well as capital requirements. In light of the current regulatory environment and Synovus' recent financial performance and related credit ratings, there can be no assurance that Synovus would be able to obtain new borrowings or issue additional equity on favorable terms, if at all. Synovus will continue to identify, consider, and pursue additional strategic initiatives to further strengthen its liquidity position as deemed necessary.

Synovus presently believes that the sources of liquidity discussed above, including existing liquid funds on hand, are sufficient to meet its anticipated funding needs through the near future. However, if economic conditions or other factors worsen to a greater degree than the assumptions underlying Synovus' internal financial performance projections, regulatory capital requirements for Synovus or Synovus Bank increase as the result of regulatory directives or otherwise, or Synovus believes it is prudent to enhance current liquidity levels, then Synovus may seek additional liquidity from external

sources. See Risk Factors in Part I-Item 1A. of Synovus' 2010 Form 10-K.

Earning Assets, Sources of Funds, and Net Interest Income

Average total assets for the nine months ended September 30, 2011 decreased \$3.50 billion, or 10.8%, to \$28.78 billion compared to \$32.29 billion for the first nine months of 2010. Average earning assets decreased \$3.07 billion, or 10.3%, in the first nine months of 2011 compared to the same period in 2010 and represented 92.8% of average total assets as compared to 92.2% in 2010. The reduction in average earning assets resulted from a \$2.90 billion net decrease in loans outstanding and a \$221.7 million decrease in interest bearing funds at the Federal Reserve Bank which was offset in part by a \$139.7 million increase in the investment securities portfolio. Average interest bearing liabilities decreased \$3.96 billion, or 16.1%, to \$20.63 billion in the first nine months of 2011 compared to the same period in 2010. The decrease in funding sources utilized to support earning assets was driven by a \$3.87 billion decrease in interest bearing deposits and an \$81.1 million decrease in short-term borrowings which were offset in part by an \$891.7 million increase in non-interest bearing demand deposits.

Net interest income for the nine months ended September 30, 2011 was \$697.0 million, a decrease of \$47.4 million, or 6.4%, compared to \$744.4 million for the nine months ended September 30, 2010.

The net interest margin for the nine months ended September 30, 2011 was 3.50% up 14 bp from 3.36% for the nine months ended September 30, 2010. Earning asset yields decreased by 17 bp compared to the nine months ended September 30, 2010 while the effective cost of funds decreased by 31 bp. The primary factor negatively impacting earning asset yields was a 95 bp decrease in the yield on taxable investment securities. This decrease was due to significantly lower yields available for the reinvestment of maturing higher yielding securities. These lower reinvestment yields are due to the continued historically low interest rate environment. A 3 bp decrease in loan yields as well as a \$2.90 billion decrease in average loan balances also contributed to the earning asset yield decrease. The effective cost of funds was positively impacted by the downward repricing of maturing certificates of deposit, a decrease in the effective cost of money market accounts, and a deposit mix shift from time deposits to lower-cost core deposits. Compared to the nine months ended September 30, 2010, core certificates of deposit declined by 48 bp, and core money market accounts declined by 33 bp.

On a sequential quarter basis, net interest income decreased by \$2.4 million while the net interest margin decreased 4 bp to 3.47%. Yields on earning assets decreased 9 bp, and the effective cost of funds decreased by 5 bp. Yields on earning assets were negatively impacted by a 5 bp decrease in loan yields, an 18 bp decrease in taxable investment security yields, and a \$119.6 million increase in average balance of lower yielding funds held at the Federal Reserve Bank. The yield on taxable investment securities was negatively impacted by the portfolio repositioning undertaken during the third quarter. A key component of this repositioning was the sale of higher coupon, more prepayment-sensitive MBS, and the purchase of lower coupon MBS with less prepayment risk. While increasing the future stability of cash flows and yields on the portfolio, the short-term impact of selling higher coupon MBS is negative to the overall portfolio yield. This negatively impacted the investment yields by approximately 8 bp for the quarter and overall earning asset yields by 1 bp for the quarter. The effective cost of funds was positively impacted by the downward repricing of core certificates of deposit, which declined by 9 bp, and a \$264.5 million increase in average non-interest bearing demand deposits.

Synovus anticipates a generally stable margin for the fourth quarter of 2011. Earning asset yields will be negatively impacted by the bond portfolio repositioning and the continued low market yield environment. Further downward repricing of maturing certificates of deposit, downward pricing adjustments on non-maturity deposits, and further improvements in deposit mix should positively impact the effective cost of funds. Trends in the negative impact of nonaccrual assets, levels of excess liquidity, and competitive market conditions will also be key determinants in any change in net interest margin.

Other non-interest income	22,512	18,735	8,652	8,723
Total non-interest income	\$ 265,405	225,456	133,392	81,764

Edgar Filing: SYNOVUS FINANCIAL CORP - Form 10-Q

Total non-interest income for the nine and three months ended September 30, 2011 was \$265.4 million and \$133.4 million, respectively, up 17.7% and 63.1%, respectively, from the same periods in 2010 primarily due to investment securities gains, net. During the third quarter, Synovus implemented a repositioning of the investment securities portfolio. The primary purpose of this repositioning was to reduce prepayment risk in the MBS portfolio and enhance capital by realizing market premiums on existing securities. This activity resulted in net realized securities gains of \$62.9 million for the third quarter of 2011. For the nine months ended September 30, 2011, Synovus realized total net securities gains of \$64.7 million. Other-than-temporary impairment charges of \$1.6 million are included in net realized securities gains for the nine and three months ended September 30, 2011.

Service charges on deposit accounts were \$59.6 million and \$20.0 million for the nine and three months ended September 30, 2011, down 26.3% and 25.0%, respectively, from the same periods in 2010. Service charges on deposit accounts consist of NSF fees (which represent 50.2% and 51.2% of the total for the nine and three months ended September 30, 2011, respectively), account analysis fees, and all other service charges.

NSF fees for the nine and three months ended September 30, 2011 were \$29.9 million and \$10.3 million down \$16.9 million or 36.1% and \$5.0 million or 32.6%, respectively, compared to the same periods in 2010. This decrease was primarily due to the adoption of Regulation E, discussed below, and other regulatory changes. Account analysis fees were \$16.9 million and \$5.4 million for the nine and three months ended September 30, 2011, respectively, down \$2.8 million or 14.3% and \$1.1 million or 17.5%, respectively, compared to the same periods in 2010. All other service charges on deposit accounts, which consist primarily of monthly fees on retail demand deposit and saving accounts, were \$12.8 million and \$4.4 million for the nine and three months ended September 30, 2011, respectively, down \$1.5 million or 10.8% and \$566 thousand or 11.4%, respectively, compared to the same periods in 2010.

Table of Contents

Management's Discussion and Analysis

On August 1, 2010, Regulation E became effective. This regulation limits the ability of a financial institution to assess an overdraft fee for paying automated teller machine and debit card transactions that overdraw a customer's account unless the customer affirmatively consents, or opts-in, to the institution's payment of overdrafts for these transactions. The impacts to NSF fees from this regulation for the nine and three months ended September 30, 2011 were decreases of approximately \$11.6 million and approximately \$4.1 million, respectively. Synovus estimates the total impact from Regulation E for the year ending December 31, 2011 will be a reduction of NSF fees of approximately \$15 million compared to a reduction of approximately \$5.2 million in 2010.

On January 19, 2011, Synovus implemented certain processing changes as required by regulatory guidance that resulted in decreases in NSF fees of \$9.3 million and \$3.6 million for the nine and three months ended September 30, 2011, respectively. Synovus estimates the total impact from these changes for the year ending December 31, 2011 will be a reduction of NSF fees of approximately \$12.9 million. Certain strategies are being evaluated to partially offset the declines in fee income resulting from recent regulatory changes.

Financial management services revenues (which primarily consist of fiduciary and asset management fees, brokerage revenue, and customer interest rate swap revenue which is included in other fee income) increased \$1.4 million or 2.4% to \$58.3 million and increased \$952 thousand or 5.1% to \$19.7 million for the nine and three months ended September 30, 2011, respectively, compared to the same periods in 2010.

Mortgage banking income decreased \$6.8 million or 30.6% and decreased \$2.7 million or 26.9% for the nine and three months ended September 30, 2011, respectively, as compared to the same periods in 2010. Mortgage production volume was \$829.3 million and \$324.1 million for the nine and three months ended September 30, 2011, respectively, which decreased \$237.7 million or 22.3% and decreased \$142.4 million or 30.5%, respectively, as compared to the same periods in 2010.

Bankcard fees increased \$4.4 million or 14.5% and increased \$888 thousand or 8.3% for the nine and three months ended September 30, 2011, respectively, as compared to the same periods in 2010. Bankcard fees consist primarily of credit card interchange fees and debit card interchange fees. Debit card interchange fees were \$20.1 million up 11.5% and \$6.8 million up 10.2% for the nine and three months ended September 30, 2011, respectively, compared to the same periods in 2010. Credit card interchange fees were \$14.6 million up 6.9% and \$5.0 million up 7.3% for the nine and three months ended September 30, 2011, respectively, compared to the same periods in 2010. The increase in interchange fees is primarily due to an increase in transaction volume and size.

Synovus is anticipating a significant impact on debit interchange fees as a result of certain provisions of the Dodd-Frank Wall Street Reform and Consumer Protection Act which took effect on October 1, 2011. These provisions, commonly referred to as the Durbin Amendment, amended the Electronic Fund Transfer Act and required the Board of Governors of the Federal Reserve System to develop rules that implement, among other things, interchange fee restrictions on debit card transactions. Based on these provisions, Synovus expects a reduction of approximately \$3 million in its debit card interchange fee revenue for the year ending December 31, 2011 as compared to 2010.

Other fee income includes fees for letters of credit, safe deposit box fees, access fees for automatic teller machine use, official check issuance fees, customer swap dealer fees, and other miscellaneous fee-related income. Other fee income decreased \$729 thousand or 4.5% and decreased \$17 thousand or 0.3% for the nine and three months ended September 30, 2011, respectively, as compared to the same periods in 2010 principally due to a decline in fees associated with letters of credit.

Other non-interest income increased \$3.8 million or 20.2% and decreased \$71 thousand or 0.8% for the nine and three months ended September 30, 2011, respectively, as compared to the same periods in 2010. The main components of other non-interest income are income from company-owned life insurance policies, insurance commissions, card service fees, and other miscellaneous items.

Table of Contents

Management's Discussion and Analysis

Non-interest Expense

The following table summarizes non-interest expense for the nine and three months ended September 30, 2011 and 2010.

<i>(in thousands)</i>	Nine Months Ended September 30,		Three Months Ended September 30,	
	2011	2010	2011	2010
Salaries and other personnel expense	\$ 278,033	313,885	\$ 93,184	105,933
Net occupancy and equipment expense	86,698	91,877	27,981	31,311
FDIC insurance and other regulatory fees	45,826	52,794	15,463	16,178
Foreclosed real estate expense	101,716	142,837	37,108	50,890
(Gains) losses on other loans held for sale	(2,591)	73	(846)	
Professional fees	30,264	33,399	10,135	12,424
Data processing expense	27,225	33,123	9,024	11,117
Restructuring charges	30,026	3,420	2,587	3,420
Loss on curtailment of post-retirement defined benefit plan	398			
Other operating expenses	87,088	109,162	27,916	37,738
Total non-interest expense	\$ 684,683	780,570	\$ 222,552	269,011

Non-interest expense decreased by 12.3% and 17.3% for the nine and three months ended September 30, 2011, respectively, compared to the same periods in 2010. The decline was driven by lower expenses in predominantly all categories with significant declines in salaries and other personnel expenses and lower foreclosed real estate expense, net. For the nine and three months ended September 30, 2011, core expenses which exclude credit costs, restructuring charges, and loss on curtailment of post-retirement defined benefit plan decreased by \$67.1 million or 11.0% and \$24.0 million or 11.8% for the nine and three months ended September 30, 2011, respectively, compared to the same periods in 2010.

For the nine and three months ended September 30, 2011, salaries and other personnel expenses decreased by \$35.9 million, or 11.4%, and decreased \$12.7 million, or 12.0%, respectively, compared to the same periods in 2010. The decline in expense was largely due to planned reductions in headcount as a result of Synovus' implementation of efficiency and expense management initiatives during the first quarter of 2011. Total employees at September 30, 2011 were 5,285, down 824 as compared to December 31, 2010 and down 972 compared to September 30, 2010.

The efficiency initiatives announced in January of 2011 are expected to generate an estimated \$100 million in annual expense savings by the end of 2012 with approximately \$75 million of these savings to be realized in 2011. Synovus is on track to realize in 2011 the \$75 million in expense savings from these initiatives.

FDIC insurance and other regulatory fees for the nine and three months ended September 30, 2011 declined \$7.0 million or 13.2% and declined \$715 thousand or 4.4%, respectively, compared to the same periods in 2010. The decline is due primarily to a decrease in the assessment base.

Foreclosed real estate expense for the nine and three months ended September 30, 2011 declined \$41.1 million or 28.8% and declined \$13.8 million or 27.1%, respectively, compared to the same periods in 2010. The decline was the result of a reduction in the level of foreclosures, a reduction in charges related to declines in fair value, and a reduction in losses on the disposition of foreclosed real estate. For further discussion of foreclosed real estate, see the section captioned "Other Real Estate."

Edgar Filing: SYNOVUS FINANCIAL CORP - Form 10-Q

Data processing expense for the nine and three months ended September 30, 2011 declined \$5.9 million or 17.8% and declined \$2.1 million or 18.8%, respectively, compared to the same periods in 2010. The decline is primarily driven by renegotiated and/or terminated provider services.

Restructuring charges of \$30.0 million for the nine months ended September 30, 2011 are comprised of \$17.3 million in severance charges, \$3.1 million in lease termination expenses, \$5.6 million consisting primarily of asset write-downs associated with branch closings, and \$4.0 million in professional fees. The restructuring charges are related to efficiency and expense management initiatives that were implemented during the first nine months of 2011. As of September 30, 2011,

Table of Contents

Management's Discussion and Analysis

Synovus has recognized substantially all of the expected restructuring charges relating to the efficiency initiatives announced in January 2011. For further discussion of restructuring charges, see Note 2 of notes to the unaudited interim consolidated financial statements and the section titled "Restructuring Charges" herein.

The loss on curtailment of post-retirement defined benefit plan of \$398 thousand was recorded as an adjustment to the gain on curtailment of post-retirement defined benefit plan recorded during the fourth quarter of 2010. For further discussion of the curtailment of the Synovus Retiree Medical Plan, see Note 12 "Retiree Medical Plan Curtailment".

Other operating expenses for the nine and three months ended September 30, 2011 decreased \$22.1 million or 20.2% and decreased \$9.8 million or 26.0%, respectively, compared to the same periods in 2010, primarily due to declines in credit related expenses.

Income Tax Expense

Synovus expects to record minimal to no tax expense when reporting a pre-tax profit because reductions to the DTA valuation allowance will be recognized. Reversal of the DTA balance valuation allowance is subject to considerable judgment. However, Synovus expects to reverse substantially all (or approximately \$796 million of the current balance of \$817 million) of the DTA valuation allowance once it has demonstrated a sustainable return to profitability, perhaps at the point it has significantly improved credit quality and experienced consecutive profitable quarters coupled with a forecast of sufficient continuing profitability. This reversal could occur as a single event or over a period of time depending upon the level of forecasted taxable income, the degree of risk related to realizing the forecasted taxable income, and the estimated risk related to credit quality. In that event, there will remain limitations on the ability to include the deferred tax assets for regulatory capital purposes. Pursuant to regulatory requirements, as taxes paid in carryback periods are exhausted, financial institutions must deduct from Tier I capital the greater of (1) the amount by which net deferred tax assets exceed what they would expect to realize within one year or (2) the amount by which the net deferred tax assets exceeds 10% of Tier I capital.

In April 2010, the Synovus Board of Directors approved a shareholder rights plan designed to preserve Synovus' substantial tax assets. This plan was ratified by Synovus' shareholders in April 2011. This plan is similar to tax benefit preservation plans adopted by other public companies with significant tax attributes whose ability to enjoy such benefit may become restricted by an ownership change under IRC Section 382. Synovus' tax attributes include net operating losses, tax credit carryforwards, reversing temporary differences and certain built-in losses that it could utilize in certain circumstances to offset taxable income and reduce its federal income tax liability.

An "ownership change", as defined under Section 382 of the IRC and related Internal Revenue Service pronouncements, substantially limits a company's ability to use its tax attributes. In general, an ownership change would occur if Synovus' 5-percent shareholders, as defined under Section 382, collectively increase their ownership in Synovus by more than 50 percentage points over a rolling three-year period. The shareholder rights plan is designed to reduce the likelihood that Synovus experiences such an ownership change by deterring acquisitions that would increase the holdings of existing 5-percent shareholders or cause any person or group to become a 5-percent shareholder. 5-percent shareholders generally do not include certain institutional holders, such as mutual fund companies, that hold Synovus equity securities on behalf of several individual mutual funds where no single fund owns 5 percent or more of Synovus equity securities. Synovus' public offerings of 293,250,000 shares of common stock and 13,800,000 Tangible Equity Units during the three months ended June 30, 2010 did not result in an ownership change under Section 382.

At September 30, 2011, Synovus reported a net deferred tax asset, before the valuation allowance, of \$819 million compared to \$776.7 million at December 31, 2010. Of this amount, \$286.5 million was generated from temporary differences of which the majority relates to the provision for losses on loans. This component does not have a set expiration date as the temporary differences have not yet reduced taxable income. The remaining net deferred tax asset balance of \$532.5 million relates to tax carryforwards that have set expiration dates, typically 15 or 20 years, from the date they are originally generated. Synovus currently expects that approximately \$21 million of its net deferred tax assets will

Table of Contents

Management's Discussion and Analysis

expire before they can be realized. The majority of these at-risk DTAs relate to state income tax credits that have various expiration dates through the tax year 2016.

The year-to-date pre-tax loss, changes in the valuation allowance, and state tax liabilities all impact the actual effective tax rate for continuing operations. Currently, losses must be carried forward (by recording a deferred tax asset with a corresponding valuation allowance) resulting in a close to zero effective tax rate. During the third quarter 2011, Synovus realized net securities gains on investment securities in the amount of \$62.9 million which reduced the balance in net unrealized securities gains causing the recapture of current year income tax benefits of \$4.9 million previously recognized on the fair value appreciation on the securities portfolio during the second quarter 2011. Synovus relies on the actual effective tax rate for the year-to-date period to determine the tax expense (or benefit).

The table below shows the effective tax rate for the nine and three months ended September 30, 2011 and 2010.

	Nine Months Ended September 30, 2011			Three Months Ended September 30, 2011		
	Discontinued Operations	Continuing Operations	Total	Discontinued Operations	Continuing Operations	Total
<i>(dollars in thousands)</i>

(1) Negative percentages reference a net tax benefit and positive percentages reference net tax expense.

Dividends

Synovus has historically paid a quarterly cash dividend to the holders of its common stock. Management closely monitors trends and developments in credit quality, liquidity (including dividends from subsidiaries, which are expected to be significantly lower than those received

in previous years), financial markets and other economic trends, as well as regulatory requirements regarding the payment of dividends, all of which impact Synovus' capital position, and will continue to periodically review dividend levels to determine if they are appropriate in light of these factors and the restrictions on payment of dividends described below. Synovus' participation in the Capital Purchase Program restricts its ability to increase the quarterly cash dividends payable on Synovus' common stock (without consent of the Treasury) until the earlier of December 19, 2011, or until Synovus has redeemed the Series A Preferred Stock in whole or the Treasury has transferred the Series A preferred stock to a third party. In addition, Synovus must seek the Federal Reserve's permission to increase the quarterly dividend on its common stock above \$0.01 per common share. Synovus is presently subject to, and in the future may become subject to, additional supervisory actions and/or enhanced regulation that could have a material negative effect on business, operating flexibility, financial condition, and the value of Synovus common stock. In the current environment, regulatory restrictions may limit Synovus' ability to continue to pay dividends. Synovus must inform and consult with the Federal Reserve Board prior to declaring and paying any future dividends on its common and preferred stock, and the Federal Reserve Board could decide at any time that paying any dividends could be an unsafe or unsound banking practice. In addition, Synovus must obtain the prior approval of the Banking Commissioner of

Table of Contents

Management's Discussion and Analysis

the State of Georgia prior to increasing the cash dividend on Synovus' common stock above the current level of \$0.01 per share. See Part I Item I-Business Supervision, Regulation and Other Factors-Dividends, Part I-Item IA. Risk factors-Business Risks-We presently are subject to, and in the future may become subject to additional supervisory actions and/or enhanced regulation that could have a material negative effect on Synovus' business, operating flexibility, financial condition, and the value of Synovus' common stock in Synovus' 2010 10-K and Risk Factors in Part I- Item IA. of Synovus' 2010 Form 10-K.

Synovus' ability to pay dividends is partially dependent upon dividends that it receives from its banking subsidiary and its non-banking subsidiaries which are restricted by various regulations administered by federal and state bank regulatory authorities. Synovus does not expect to receive dividends from Synovus Bank in the near future.

Synovus declared dividends of \$0.03 per common share and \$0.01 per common share for the nine and three months ended September 30, 2011, respectively. Synovus declared dividends of \$0.03 per common share and \$0.01 per common share for the nine and three months ended September 30, 2010, respectively.

In addition to dividends paid on its common stock, Synovus paid dividends of \$36.3 million and \$12.1 million to the Treasury on the Series A Preferred Stock during the nine and three months ended September 30, 2011, respectively. Synovus paid dividends of \$36.3 million and \$12.1 million to the Treasury on the Series A Preferred Stock during the nine and three months ended September 30, 2010, respectively.

Contingencies

During 2010, financial institutions experienced a dramatic increase in the number of repurchase demands they received, including from government sponsored enterprises, mortgage insurers, and other purchasers of residential mortgage-backed securitizations, generally due to findings of mortgage fraud and underwriting deficiencies in the mortgage origination process and misrepresentations in the packaging of mortgages by certain mortgage lenders. Also during 2010, foreclosure practices of financial institutions nationwide came under scrutiny because of the discovery of fraudulent documentation and questionable residential foreclosure procedures of certain large financial institutions. The current focus in foreclosure practices of financial institutions nationwide led Synovus to evaluate its foreclosure process related to home equity and consumer mortgage loans within its loan portfolio.

Repurchase Obligations for Mortgage Loans Originated for Sale

Synovus' wholly-owned subsidiary, Synovus Mortgage, originates residential mortgage loans, sells them to third party purchasers, and does not retain the servicing rights. These loans are primarily originated and underwritten internally by Synovus personnel and are primarily to borrowers in Synovus' geographic market footprint. These sales are typically non-recourse loan sales to GSEs and non-GSE purchasers.

Each GSE and non-GSE purchaser has specific guidelines and criteria for sellers of loans, and the risk of credit loss with regard to the principal amount of the loans sold is generally transferred to the purchasers upon sale. While the loans are sold without recourse the purchase agreements require Synovus Mortgage to make certain representations and warranties regarding the existence and sufficiency of file documentation and the absence of fraud by borrowers or other third parties such as appraisers in connection with obtaining the loan. If it is determined that the loans sold were in breach of these representations or warranties, Synovus Mortgage has obligations to either repurchase the loan for the unpaid principal balance and related investor fees or make the purchaser whole for the economic benefits of the loan.

To date, repurchase activity pursuant to the terms of these representations and warranties has been minimal and has primarily been associated with the periods from 2005 through 2008. From January 1, 2005 through September 30, 2011, Synovus Mortgage originated and sold approximately \$5.95 billion of first lien GSE eligible mortgage loans and approximately \$3.15 billion of first and second lien non-GSE eligible mortgage loans. Losses to Synovus arising from such repurchases have been inconsequential.

Table of Contents

Management's Discussion and Analysis

Based on information currently available, management believes that it does not have significant exposure to contingent losses that may arise relating to the representations and warranties that it has made in connection with its mortgage loan sales. See "Risk Factors" in Part I-Item 1A. of Synovus' 2010 Form 10-K.

Mortgage Loan Foreclosure Practices

Due to the current focus in foreclosure practices of financial institutions nationwide, Synovus evaluated its foreclosure process related to home equity and consumer mortgage loans within its loan portfolio. At September 30, 2011, Synovus had \$3.03 billion of home equity and consumer mortgage loans which are secured by first and second liens on residential properties. Of that amount, \$898.2 million consists of mortgages relating to properties in Florida and South Carolina which are states in which foreclosures proceed through the courts. Foreclosure activity in the home equity lines and consumer mortgage loan portfolio is minimal. Any foreclosures on these loans are handled by designated Synovus personnel and external legal counsel, as appropriate, following established policies regarding legal and regulatory requirements. Synovus has not imposed any freezes on foreclosures. Based on information currently available, management believes that it does not have significant exposure to faulty foreclosure practices. In addition, management believes that the nationwide foreclosure moratorium will not have a material adverse impact to our business.

Legal Proceedings

See Part II - Item 1 - Legal Proceedings in this report and Note 22 of the Notes to Consolidated Financial Statements in Synovus' 2010 10-K for a discussion of legal proceedings and related loss contingencies.

Recently Issued Accounting Standards

See Note 1 of the notes to the unaudited interim consolidated financial statements for a discussion of recently issued accounting standards updates.

Non-GAAP Financial Measures

The measures entitled pre-tax, pre-credit costs income; core expenses; core deposits and core deposits excluding time deposits; the tangible common equity to tangible assets ratio; net loss per common share excluding restructuring charges; tangible book value per common share; and the tangible common equity to risk-weighted assets are not measures recognized under U.S. GAAP and therefore are considered non-GAAP financial measures. The most comparable GAAP measures are income (loss) before income taxes, total non-interest expense, total deposits, the ratio of total common shareholders' equity to total assets, net loss per common share, book value per common share; and the ratio of total common shareholders' equity to risk-weighted assets, respectively.

Management uses these non-GAAP financial measures to assess the performance of Synovus' core business and the strength of its capital position. Synovus believes that these non-GAAP financial measures provide meaningful additional information about Synovus to assist investors in evaluating Synovus' operating results, financial strength and capital position. These non-GAAP financial measures should not be considered as a substitute for operating results determined in accordance with GAAP and may not be comparable to other similarly titled measures at other companies. Pre-tax, pre-credit costs income is a measure used by management to evaluate core operating results exclusive of credit costs as well as certain non-core income and expenses such as investment securities gains and restructuring charges. Core expenses are measures used by management to gauge the success of expense management initiatives focused on reducing recurring controllable operating costs. Core deposits and core deposits excluding time deposits are measures used by management to evaluate organic growth of deposits and the quality of deposits as a funding source. Net loss per common share excluding restructuring charges is a measure used by management to exclude certain non-recurring charges to allow for greater clarity in assessment of ongoing operating results and evaluating historical performance. The tangible book value per common share is a measure used by management and investment analysts to evaluate the market value of Synovus' common stock. The tangible common equity to tangible assets ratio and the tangible common equity to risk-weighted assets ratio are used by

Table of Contents

Management's Discussion and Analysis

management and investment analysts to assess the strength of Synovus' capital position. The computations of these measures are set forth in the table below.

Reconciliation of Non-GAAP Financial Measures*(dollars in thousands,*

**ITEM 3 QUANTITATIVE AND
QUALITATIVE DISCLOSURES ABOUT
MARKET RISK**

Interest rate risk is the primary market risk to which Synovus is potentially exposed. Synovus measures its sensitivity to changes in market interest rates through the use of a simulation model. Synovus uses this simulation model to determine a baseline net interest income forecast and the sensitivity of this forecast to changes in interest rates. These simulations include all of Synovus' earning assets, liabilities, and derivative instruments. Forecasted balance sheet changes, primarily reflecting loan and deposit growth forecasts, are included in the periods modeled. Anticipated deposit mix changes in each interest rate scenario are also included in the periods modeled.

Synovus has modeled its baseline net interest income forecast assuming a flat interest rate environment with the federal funds rate at the Federal Reserve's current targeted range of 0% to 0.25%. Due to short-term interest rates being at or near 0% at this time, only rising rate scenarios have been modeled. Synovus has modeled the impact of a gradual increase in short-term rates of 100 and 200 basis points to determine the sensitivity of net interest income for the next twelve months. As of September 30, 2011, the interest rate sensitivity of Synovus has not significantly changed as compared to December 31, 2010. Synovus continues to maintain an asset sensitive position which would be expected to benefit net interest income in a rising interest rate environment. The level of measured asset sensitivity decreased moderately in the past quarter. This decrease in asset sensitivity is primarily due to a modestly higher level of fixed rate earning assets, primarily due to growth in the investment securities portfolio. Several factors could serve to diminish or eliminate this asset sensitivity, including an increase in the expected level of deposit pricing competition. A higher than projected level of deposit customer migration to higher cost deposits, such as certificates of deposit, could also serve to reduce the realized level of asset sensitivity. The following table represents the estimated sensitivity of net interest income to these changes in short term interest rates at September 30, 2011, with comparable information for December 31, 2010.

Estimated % Change in Net Interest Income as Compared to		
Unchanged Rates (for the next twelve months)		
Change in Short-term Interest		
Rates (in basis points)	September 30, 2011	December 31, 2010
+ 200	3.0%	1.5%
+ 100	1.0%	1.7%

While these estimates are reflective of the general interest rate sensitivity of Synovus, local market conditions and their impact on loan and deposit pricing would be expected to have a significant impact on the realized level of net interest income. Actual realized balance sheet growth and mix would also impact the realized level of net interest income.

ITEM 4 CONTROLS AND PROCEDURES

Synovus has evaluated the effectiveness of the design and operation of disclosure controls and procedures as of the end of the period covered by this quarterly report as required by Rule 13a-15 of the Exchange Act. This evaluation was carried out under the supervision and with the participation of Synovus management, including the chief executive officer and chief financial officer. Based on this evaluation, these officers have concluded that Synovus disclosure controls and procedures are effective in timely alerting them to material information relating to Synovus (including its consolidated subsidiaries) required to be included in periodic SEC filings. No change in Synovus internal control over financial reporting occurred during the period covered by this report that materially affected, or is reasonably likely to materially affect, internal control over financial reporting.

Table of Contents

PART II OTHER INFORMATION

ITEM 1 LEGAL PROCEEDINGS

Synovus and its subsidiaries are subject to various legal proceedings and claims that arise in the ordinary course of its business. Additionally, in the ordinary course of business, Synovus and its subsidiaries are subject to regulatory examinations, information gathering requests, inquiries, and investigations. Synovus establishes accruals for litigation and regulatory matters when those matters present loss contingencies that Synovus determines to be both probable and reasonably estimable. Based on current knowledge, advice of counsel and available insurance coverage, management does not believe that liabilities arising from legal claims in excess of the amounts currently accrued, if any, will have a material adverse effect on Synovus' consolidated financial condition, results of operations, or cash flows. However, in light of the significant uncertainties involved in these matters, the early stage of various legal proceedings described below, and the indeterminate amount of damages sought in some of these matters, it is possible that the ultimate resolution of these matters, if unfavorable, could be material to Synovus' results of operations for any particular period.

Synovus is a member of the Visa USA network. Under Visa USA bylaws, Visa members are obligated to indemnify Visa USA and/or its parent company, Visa, Inc., for potential future settlement of, or judgments resulting from, certain litigation, which Visa refers to as the covered litigation. Synovus' indemnification obligation is limited to its membership proportion of Visa USA. See Note 20 of Notes to Consolidated Financial Statements included in Part II Item 8 of Synovus' 2010 Form 10-K for further discussion of the Visa litigation.

CB&T and CompuCredit Corporation (CompuCredit) previously were parties to an affinity agreement (Affinity Agreement) pursuant to which CB&T issued credit cards that were marketed and serviced by CompuCredit. On October 24, 2008, a putative class action lawsuit was filed against CompuCredit and CB&T in the United States District Court for the Northern District of California, *Greenwood v. CompuCredit, et. al.*, Case No. 4:08-cv-04878 (CW) (Greenwood), alleging that one of the credit card programs offered pursuant to the Affinity Agreement violated the Credit Repair Organization Act, 15 U.S.C. § 1679 (CROA Claims) and the California Unfair Competition Law, Cal. Bus. & Prof. Code § 17200 (California UCL Claims). CB&T intends to vigorously defend itself against these allegations. On January 22, 2009, the Georgia Superior Court in separate litigation between CB&T and CompuCredit ruled that CompuCredit must pay the reasonable attorneys' fees incurred by CB&T in connection with the Greenwood case pursuant to the indemnification provision of the Affinity Agreement described above. Any losses that CB&T incurs in connection with Greenwood are also expected to be subject to the indemnification provisions of the Affinity Agreement described above.

On May 2, 2011, the United States Supreme Court granted a writ of certiorari to review the decision of the Ninth Circuit Court of Appeals that affirmed a denial of the defendants' motion to compel arbitration of the CROA Claims in Greenwood. The CROA claims have been stayed pending the resolution of the appeal. The Supreme Court heard oral arguments on the case on October 11, 2011. The District Court has certified the California UCL claims as a class action, but following the April 27, 2011 decision of the United States Supreme Court in *AT&T Mobility LLC v. Concepcion* that overruled prior California law limiting arbitration of class actions, defendants have moved to compel arbitration of the State UCL Claims, and that motion is currently pending before the district court. At this stage of the lawsuit, and in view of the inherent inability to predict the outcome of litigation, particularly where there are many claimants, Synovus cannot determine the probability of a material adverse result or reasonably estimate a range of potential exposures, if any. At this time, based on current knowledge and advice of counsel, management does not believe that the eventual outcome of this case will have a material adverse effect on Synovus' consolidated financial condition, results of operations or cash flows.

On July 7, 2009, the City of Pompano Beach General Employees' Retirement System filed suit against Synovus, and certain of Synovus' current and former officers, in the United States District Court, Northern District of Georgia (Civil Action File No. 1:09-CV-1811) (the Securities Class Action) and on June 11, 2010, Lead Plaintiffs, the Labourers' Pension Fund of Central and Eastern Canada and the Sheet Metal Workers' National Pension Fund, filed an amended complaint alleging that Synovus and the named individual defendants misrepresented or failed to disclose material facts that artificially inflated Synovus' stock price in violation of the federal securities laws. Lead Plaintiffs' allegations are

Table of Contents

based on purported exposure to Synovus' lending relationship with the Sea Island Company and the impact of such alleged exposure on Synovus' financial condition. Lead Plaintiffs in the Securities Class Action seek damages in an unspecified amount. On May 19, 2011, the Court ruled that the amended complaint failed to satisfy the mandatory pleading requirements of the Private Securities Litigation Reform Act. The Court also ruled that Lead Plaintiffs would be allowed the opportunity to submit a further amended complaint. Lead Plaintiffs served their second amended complaint on June 27, 2011. Defendants filed a Motion to Dismiss that complaint on July 27, 2011. The motion is fully briefed and the parties are waiting on a ruling by the court. Discovery continues to be stayed pursuant to the Private Securities Litigation Reform Act.

On November 4, 2009, a shareholder filed a putative derivative action purportedly on behalf of Synovus in the United States District Court, Northern District of Georgia (Civil Action File No. 1:09-CV-3069) (the "Federal Shareholder Derivative Lawsuit"), against certain current and/or former directors and executive officers of Synovus. The Federal Shareholder Derivative Lawsuit asserts that the individual defendants violated their fiduciary duties based upon substantially the same facts as alleged in the Securities Class Action described above. The plaintiff is seeking to recover damages in an unspecified amount and equitable and/or injunctive relief.

On December 1, 2009, the Court consolidated the Securities Class Action and Federal Shareholder Derivative Lawsuit for discovery purposes, captioned *In re Synovus Financial Corp.*, 09-CV-1811-JOF, holding that the two cases involve common issues of law and fact.

On December 21, 2009, a shareholder filed a putative derivative action purportedly on behalf of Synovus in the Superior Court of Fulton County, Georgia (the "State Shareholder Derivative Lawsuit"), against certain current and/or former directors and executive officers of Synovus. The State Shareholder Derivative Lawsuit asserts that the individual defendants violated their fiduciary duties based upon substantially the same facts as alleged in the Federal Shareholder Derivative Lawsuit described above. The plaintiff is seeking to recover damages in an unspecified amount and equitable and/or injunctive relief. On June 17, 2010, the Superior Court entered an Order staying the State Shareholder Derivative Lawsuit pending resolution of the Federal Shareholder Derivative Lawsuit.

Synovus and the individual named defendants collectively intend to vigorously defend themselves against the Securities Class Action and Shareholder Derivative Lawsuits' allegations. There are significant uncertainties involved in any potential class action and derivative litigation. Although the ultimate outcome of these lawsuits cannot be ascertained at this time, at this stage of the Securities Class Action and Shareholder Derivative Lawsuits, based upon information that presently is available to it, Synovus' management is unable to predict the outcome of the Securities Class Action or the Shareholder Derivative Lawsuits and cannot determine the probability of an adverse result or reasonably estimate a range of potential loss, if any. In addition, management is unable to estimate a range of reasonably possible losses with respect to these claims.

Synovus has received a letter from the SEC Atlanta regional office, dated December 15, 2009, informing Synovus that it is conducting an informal inquiry to determine whether any person or entity has violated the federal securities laws. The SEC has not asserted, nor does management believe, that Synovus or any person or entity has committed any securities violations. Synovus intends to cooperate fully with the SEC's informal inquiry. Based upon information that presently is available to it, Synovus' management is unable to predict the outcome of the informal SEC inquiry and cannot currently reasonably determine the probability of a material adverse result or reasonably estimate a range of potential exposure, if any. Although the ultimate outcome of this informal inquiry cannot be ascertained at this time, based upon information that presently is available to it, Synovus' management presently does not believe that the informal inquiry, when resolved, will have a material adverse effect on Synovus' consolidated financial condition, results of operations, or cash flows.

In the wake of the ongoing financial credit crisis that began in 2007, Synovus, like many other financial institutions, has become the target of numerous legal actions and other proceedings asserting claims for damages and related relief for losses resulting from this crisis. These actions include claims and counterclaims asserted by individual borrowers related to their loans and allegations of violations of state and federal laws and regulations relating to banking practices, including several purported putative class action matters. Synovus Bank was named as a defendant in a purported putative class action relating to overdraft fees charged to customers. The case, *Griner et. al. v. Synovus Bank, et. al.*

Table of Contents

was filed in Gwinnett County State Court (state of Georgia) on July 30, 2010, and asserts claims for usury, conversion and money had and received for alleged injuries suffered by the plaintiffs as a result of Synovus Bank's assessment of overdraft charges in connection with its POS/debit and automated-teller machine cards used to access customer accounts. On September 1, 2010, Synovus Bank removed the case to the United States District Court for the Northern District of Georgia, Atlanta Division. The plaintiffs filed a motion to remand the case to state court. On July 22, 2011, the federal court entered an order granting plaintiffs' motion to remand the case to the Gwinnett County State Court. Synovus Bank subsequently filed a motion to dismiss. On November 2, 2011, the state court denied the motion to dismiss. The court, however, granted Synovus Bank's request for a certificate of immediate review thereby permitting Synovus Bank to petition the Georgia Court of Appeals for a discretionary appeal of the motion to dismiss.

On September 21, 2010, Synovus, Synovus Bank and Columbus Bank and Trust Company were named as defendants in a second putative class action relating to the manner in which Synovus Bank charges overdraft fees to customers. The second case *Childs et al. v. Columbus Bank and Trust et al.*, was filed in the Northern District of Georgia, Atlanta Division, and asserts claims for breach of contract and breach of the covenant of good faith and fair dealing, unconscionability, conversion and unjust enrichment for alleged injuries suffered by plaintiffs as a result of Synovus Bank's assessment of overdraft charges allegedly resulting from the sequence used to post payments to the plaintiffs' accounts. On October 25, 2010, the *Childs* case was transferred to a multi district proceeding in the Southern District of Florida. *In Re; Checking Account Overdraft Litigation*, MDL No. 2036. Synovus Bank's response to the complaint will be filed in November 2011. These cases, and certain of the other litigation and regulatory matters to which Synovus is subject, assert claims for substantial or indeterminate damages. Additional lawsuits containing claims similar to those described above may be filed in the future.

Synovus intends to vigorously pursue all available defenses to these claims. These cases are in the early stages and no damages have been specified, and there are significant uncertainties involved in any potential class action. Although the ultimate outcome of these lawsuits cannot be ascertained at this time, based upon information that presently is available to it, Synovus' management is unable to predict the outcome of these cases and cannot determine the probability of an adverse result or reasonably estimate a range of potential loss, if any. In addition, management is unable to estimate a range of reasonably possible losses with respect to these claims.

Table of Contents

ITEM 1A RISK FACTORS

In addition to the other information set forth in this Report, you should carefully consider the factors discussed in **Risk Factors** in Part I-Item 1A of Synovus' 2010 10-K and Synovus' quarterly reports on Form 10-Q which could materially affect its business, financial position, results of operations, cash flows, or future results. Please be aware that these risks may change over time and other risks may prove to be important in the future. New risks may emerge at any time, and we cannot predict such risks or estimate the extent to which they may affect our business, financial condition or results of operations, or the trading price of our securities.

There were no material changes during the period covered by this report to the risk factors previously disclosed in Synovus' 2010 10-K and in Synovus' quarterly report on Form 10-Q/A for the period ended June 30, 2011.

ITEM 2 UNREGISTERED SALES OF EQUITY

SECURITIES AND USE OF PROCEEDS

In prior periods, Synovus received previously owned shares of its common stock as payment of the exercise price of stock options and shares withheld to cover taxes on vesting for non-vested shares granted. No shares of Synovus common stock were delivered during the three months ended September 30, 2011.
