QUESTION AND ANSWER

[]

Steven Fisher

Okay, that's helpful. Kevin, thanks for the bridge there on the quarter. Maybe if you can just give us a sense for the framework around what things you're going to be including and excluding from earnings, adjusted earnings, as we close CH2M. Just kind of wondering how wide the gap is going to be GAAP earnings and adjusted to make sure we're kind of consistently including and excluding things.

And along those lines, what's in the \$0.30 to \$0.35 that you have assumed already for fiscal '18?

Kevin Berryman

\$0.30 to \$0.35 accretion?

Steven Fisher

Yes.

Kevin Berryman

We have not included the one-time costs associated with the transaction. So, what we're separating is let's call it the discrete. We will separate and call out the discrete costs, whether they're investment banking fees, change in control costs, other advisory fees, IMO related activities which will continue for the time being into the balance of not necessarily the full year of '18 but certainly a big chunk of it, as they are driving the integration efforts. So, it's really we're separating the discrete costs versus what we consider to be the sustainable kind of margin profile that the business will be able to deliver once we're complete with the acquisition.

The numbers, especially when you include the one-time change in control costs, are pretty significant. Those numbers are kind of adjusting as we speak, so I don't really want to quote a number yet because I'll probably be wrong as we're working through the integration. But at the end of the day, they're somewhat sizable and will be another chunk on top of the 225.

I will tell you, though, that those numbers were always embedded into our evaluation. There's no change versus what our original expectations were, so they are kind of probably the biggest piece will come in our Q2, probably, or Q1, late Q1. It depends on, ultimately, with the timing and how that works. But I think that ultimately the biggest chunk of change is going to be coming in Q1/Q2 and then it will ramp down, slide down to a normal kind of IMO related, activity-related cost, so big numbers in Q1 and Q2.

Steven Fisher

And that excludes the amortization, the \$0.30 to \$0.35?

Kevin Berryman

Yes.

Steven Fisher

Okay, I ll turn it over. Thanks.

1

Kevin Berryman

No, I'm sorry, it includes the incremental amortization. I'm sorry. So, that's a reported EPS accretion number, adjusted reported EPS number.

Steven Fisher

Okay, great. Thanks.

Kevin Berryman

Okay.

The next question will come from Tahira Afzal of KeyBanc Capital Markets. Please go ahead.

Tahira Afzal

Hi. Good morning guys. So first question, and maybe this is more for Kevin. Kevin, it seems like you've included in this adjusted EPS accretion, maybe it seems that there's more than \$1.00 per annum in amortization costs that you're including in there. Would that be kind of correct?

Kevin Berryman

No. No. A dollar would be sizable in addition to their already existing depreciation and amortization. So, I'm not sure how you got to that number, but it would not be a dollar.

Tahira Afzal

It wouldn't be that high?

Kevin Berryman

Tahira, maybe I can help you. If you can remember, we said 25% on a cash accretion basis. So, if you take the difference between those two numbers, they're going to get more accurate as it relates to the 15 versus 25 number.

Tahira Afzal

Okay. And Kevin, if you're looking at how that amortization dissipates, is it a very gradual effect? So, we shouldn't assume this is a visible tailwind to your adjusted EPS beyond fiscal year 18?

Kevin Berryman

Say again?

Steve Demetriou

The amortization, is it a gradual effect?

Tahira Afzal

I guess I m just wondering if that wears off.

Kevin Berryman

Yes. No, look, we will have an opening balance sheet that incorporates our views of the revised balance sheet, which will incorporate goodwill. It will incorporate the value of intangible assets. And those intangible assets will begin to amortize immediately. So it will basically happen over the course of 2018 as soon as we close.

There is a process that we will go through over the course of 2018 where we will look to finalize exactly what the numbers are. Once we get the company and we have the figures and we're able to do the detailed analysis, there may be some adjustments that are ultimately embedded into that opening balance sheet. But that will be done within the first year and will have the revised figures kind of going forward by the end of our fiscal '18.
