(A) Securities Valuation

U.S. generally accepted accounting principles (U.S. GAAP) provides guidance on fair value measurements. In accordance with the standard, fair value is defined as the price that the Trust would receive to sell an investment or pay to transfer a liability in a timely transaction with an independent buyer in the principal market, or in the absence of a principal market the most advantageous market for the investment or liability. It establishes a single definition of fair value, creates a three-tier hierarchy as a framework for measuring fair value based on inputs used to value the Trust s investments, and requires additional disclosure about fair value. The hierarchy of inputs is summarized below:

- Level 1- unadjusted quoted prices in active markets for identical investments
- Level 2- Other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)
- Level 3- significant unobservable inputs (including the Trust s own assumptions in determining the fair value of investments)

For Level 1 inputs, the Trust uses unadjusted quoted prices in active markets for assets or liabilities with sufficient frequency and volume to provide pricing information as the most reliable evidence of fair value.

The Trust s Level 2 valuation techniques include inputs other than quoted prices within Level 1 that are observable for an asset or liability, either directly or indirectly. Level 2 observable inputs may include quoted prices for similar assets and liabilities in active markets or quoted prices for identical or similar assets or liabilities in markets that are not active in which there are few transactions, the prices are not current, or price quotations vary substantially over time or among market participants. Inputs that are observable for the asset or liability in Level 2 include such factors as interest rates, yield curves, prepayment speeds, credit risk, and default rates for similar liabilities.

For Level 3 valuation techniques, the Trust uses unobservable inputs that reflect assumptions market participants would be expected to use in pricing the asset or liability. Unobservable inputs are used to measure fair value to the extent that observable inputs are not available and are developed based on the best information available under the circumstances. In developing unobservable inputs, market participant assumptions are used if they are reasonably available without undue cost and effort.

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The following is a summary of the inputs used as of September 30, 2018 in valuing the Trust s investments carried at fair value:

Notes to Portfolio of Investments (unaudited) (continued)

The primary third party pricing vendor for the Trust s listed preferred stock investments is FT Interactive Data (IDC). When available, the Trust will obtain a closing exchange price to value the preferred stock investments and, in such instances, the investment will be classified as Level 1 since an unadjusted quoted price was utilized. When a closing price is not available for the listed preferred stock investments, IDC will produce an evaluated mean price (midpoint between the bid and the ask evaluation) and such investments will be classified as Level 2 since other observable inputs were used in the valuation. Factors used in the IDC evaluation include trading activity, the presence of a two-sided market, and other relevant market data.

The Trust s policy is to recognize transfers in and transfers out at the fair value as of the beginning of the period. The portfolio may hold securities which are periodically fair valued in accordance with the Trust s fair value procedures. This may result in movements between Levels 1, 2 and 3 throughout the period. \$25,378,500 was transferred out of Level 1 into Level 2 during the period ended September 30, 2018 due to the unavailability of significant observable pricing inputs. \$3,651,072 was transferred out of level 2 into level 1 during the period ended September 30, 2018 due to the availability of significant observable pricing inputs. Pursuant to the Trust s fair value procedures noted previously, equity securities (including exchange traded securities and open-end regulated investment companies) and exchange traded derivatives (i.e. futures contracts and options) are generally categorized as Level 1 securities in the fair value hierarchy. Fixed income securities, non-exchange traded derivatives and money market instruments are generally categorized as Level 2 securities in the fair value hierarchy. Investments for which there are no such quotations, or for which quotations do not appear reliable, are valued at fair value as determined in accordance with procedures established by and under the general supervision of the Trustees. These valuations are typically categorized as Level 2 or Level 3 securities in the fair value hierarchy.

For the period ended September 30, 2018, there have been no significant changes to the Trust s fair valuation methodology.

(B) Forward Foreign Currency Contracts

The Trust enters into forward foreign currency contracts in order to hedge its exposure to changes in foreign currency exchange rates on its foreign portfolio holdings, to hedge certain Trust purchase and sales commitments denominated in foreign currencies and for investment purposes. A forward foreign currency contract is a commitment to purchase or sell a foreign currency on a future date at a negotiated forward rate. The gain or loss arising from the difference between the original contracts and the closing of such contracts would be included in net realized gain or loss on foreign currency transactions.

Fluctuations in the value of open forward foreign currency contracts are recorded for financial reporting purposes as unrealized appreciation and depreciation by the Trust.

The Trust s custodian will place and maintain cash not available for investment or other liquid assets in a separate account of the Trust having a value at least equal to the aggregate amount of the Trust s commitments under forward foreign currency contracts entered into with respect to position hedges.

Risks may arise from the potential inability of counterparty to meet the terms of a contract and from unanticipated movements in the value of a foreign currency relative to the U.S. dollar. The face or contract amount, in U.S. dollars, reflects the total exposure the Trust has in that particular currency contract. As of September 30, 2018, the Trust did not hold any forward foreign currency contracts.

(C) Options

The Trust may purchase or sell (write) options on securities and securities indices which are listed on national securities exchange or in the over-the-counter (OTC) market as a means of achieving additional return or of hedging the value of the Trust s portfolio.

An option on a security is a contract that gives the holder of the option, in return for a premium, the right to buy from (in the case of a call) or sell to (in the case of a put) the writer of the option the security underlying the option at a specified exercise or strike price. The writer of an option on a security has an obligation upon exercise of the option to deliver the underlying security upon payment of the exercise price (in the case of a call) or to pay the exercise price upon delivery of the underlying security (in the case of a put).

There are several risks associated with transactions in options on securities. As the writer of a covered call option, the Trust forgoes, during the option s life, the opportunity to profit from increases in the market value of the security covering the call option above the sum of the premium and the strike price of the call but has retained the risk of loss should the price of the underlying security decline. The writer of an option has no control over the time when it may be required to fulfil its obligation as writer of the option. Once an option writer has received an exercise notice, it cannot effect a closing purchase transaction in order to terminate its obligation under the option and must deliver the underlying security at the exercise price. Written Options for the period ended September 30, 2018 are disclosed in the Trust s Portfolio of Investments.

(D) New Accounting Pronouncement

In August 2018, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2018-13, Fair Value Measurement (Topic 820): Disclosure Framework Changes to the Disclosure Requirements for Fair Value Measurements. The amendments in the ASU modify the disclosure requirements on fair value measurements in Topic 820. The ASU is effective for interim and annual reporting periods beginning after December 15, 2019. Management is currently evaluating the impact, if any, of applying this provision and believes the adoption of this ASU will not have a material impact on the financial statements.

Item 2. Controls and Procedures.

- (a) The Trust s principal executive officer and principal financial officer have evaluated the Trust s disclosure controls and procedures within 90 days of this filing and have concluded that the Trust s disclosure controls and procedures were effective, as of that date, in ensuring that information required to be disclosed by the Trust in this Form N-Q was recorded, processed, summarized, and reported timely.
- (b) The Trust s principal executive officer and principal financial officer are aware of no changes in the Trust s internal control over financial reporting that occurred during the Trust s most recent quarter that has materially affected, or is reasonably likely to materially affect, the Trust s internal control over financial reporting.

Item 3. Exhibits.

Certification of chief executive officer and chief financial officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
