SKYE INTERNATIONAL, INC. AND SUBSIDIARIES

Notes to the Condensed Financial Statements

June 30, 2008 (unaudited) and December 31, 2007

NOTECONDENSED FINANCIAL STATEMENTS

1 -

The accompanying financial statements have been prepared by the Company without audit. In the opinion of management, all adjustments (which include only normal recurring adjustments) necessary to present fairly the financial position, results of operations, and cash flows at June 30, 2008, and for all periods presented herein, have been made.

Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted. It is suggested that these condensed financial statements be read in conjunction with the financial statements and notes thereto included in the Company's December 31, 2007 audited financial statements. The results of operations for the periods ended June 30, 2008 and 2007 are not necessarily indicative of the operating results for the full years.

NOTEGOING CONCERN

2 -

The Company's financial statements are prepared using generally accepted accounting principles applicable to a going concern, which contemplates the realization of assets and liquidation of liabilities in the normal course of business. The Company has not yet established an ongoing source of revenues sufficient to cover its operating costs and allow it to continue as a going concern. Historically, the Company has incurred significant annual losses, which have resulted in an accumulated deficit of \$13,697,997 at June 30, 2008 which raises substantial doubt about the Company's ability to continue as a going concern. The ability of the Company to continue as a going concern is dependent on the Company increasing sales to the point it becomes profitable. The Company may need to raise additional capital for marketing to increase its sales. If the Company is unable to increase sales sufficiently or obtain adequate capital, it could be forced to cease operation. The accompanying financial statements do not include any adjustments relating to the recoverability and classification of asset carrying amounts or the amount and classification of liabilities that might result from the outcome of this uncertainty.

Management plans to increase sales by increasing its marketing program and to obtain additional capital from the private placement of shares of its common stock. However, management cannot provide any assurances that the Company will be successful in accomplishing any of its plans.

NOTEGAIN ON THE EXTINGUISHMENT OF DEBT

3 -

During the six months ended June 30, 2008, the Company determined that the statute of limitations under the laws of the state of Arizona had expired on certain debts previously carried on its financial statements. Also two of the Company's subsidiaries were involuntarily dissolved by the state of Arizona and ceased to be consolidated with the Company. A third subsidiary filed chapter 7 bankruptcy and its debts were discharged by the bankruptcy court. Accordingly, the Company recognized a gain of \$1,823,954 for the extinguishment of those debts.

NOTESIGNIFICANT EVENTS

4 -

During the three months ended June 30, 2008, the Company issued 62,500 shares of its common stock to directors at \$0.80 per share and 659,199 shares to consultants at \$0.79 per share for services performed. During the three months ended June 30, 2008 the Company issued 3,018,150 shares of its common stock at \$0.28 per share for debt. During the three months ended June 30, 2008 the Company issued 1,597,656 shares of its common stock at \$0.32 per share for cash.

During the three months ended June 30, 2008, the Company's common stock was reverse split on a 1 share for 4 shares basis. The financial statements have been restated to reflect the reverse stock split on a retro-active basis.

NOTE INVENTORY

5 -

The Company contracts with several third parties to manufacture Fortis unit sub and final assemblies. Parts and material inventory is stated at the lower of cost (first-in, first-out) or net realizable value of \$106,944 at June 30, 2008. Parts and materials purchased for development and testing are directly expensed to Research and Development.

As of June 30, 2008, inventory consisted of the following:

Raw Materials	\$ 67,969
Work In Process	28,475
Finished Goods	10,500
Total Inventory	\$ 106,944

NOTE USE OF ESTIMATES

6 -

The discussion and analysis of the Company's financial condition and results of operations are based upon the Company's consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires making estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results may differ from these estimates under different assumptions or conditions. Critical accounting policies are defined as those that entail significant judgments and estimates, and could potentially result in materially different results under different assumptions and conditions.

7

ITEM MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF 2. OPERATIONS

The following discussion should be read in conjunction with the financial statements and accompanying notes included in this Form 10-Q.

Plan of Operation.

The Company is in the business of designing, developing, manufacturing and marketing consumer lifestyle products, including, initially, several models of electronic, tankless water heaters. Previously the Company produced, marketed and sold its electronic tankless water heater products directly through the internet. The Fortis™ and Paradigm™ units, and future products, however, are proposed to be sold primarily through manufacturer's representatives in the wholesale market.

Liquidity and Capital Resources.

A critical component of our operating plan impacting our continued existence is the ability to obtain additional capital through equity and/or debt financing. Since inception, we have financed our cash flow requirements through issuances of debt and common stock and cash generated from our limited operations. As we continue our activities, we will continue to experience net negative cash flows from operations, pending receipt of significant revenues that generate a positive sales margin. Commencing in the first quarter of 2007 and continuing throughout the second quarter, all of the Company's cash needs were met through loans advanced to the Company by certain of its related party directors, as well as private placements of common stock.

The Company expects that additional operating losses will occur until net margins gained from sales revenue is sufficient to offset the costs incurred for marketing, sales and product development. Until the Company has achieved a sales level sufficient to break even, it will not be self-sustaining or be competitive in the areas in which it intends to operate. The Company will require additional funds to complete the ramping up for production of the FORTIS™, and to fully implement its marketing plans and for continued operations. Additionally, the Company will also require further development funds in order to finalize a commercialized version of its consumer product utilizing the patented Paradigm™ technology. We anticipate obtaining additional financing to fund operations through common stock offerings, debt offerings and bank borrowings, to the extent available, or to obtain additional financing to the extent necessary to augment our working capital. In the event we cannot obtain the necessary capital to pursue our strategic plan, we may have to significantly curtail our operations. This would materially impact our ability to continue operations. There is no assurance that the Company will be able to obtain additional funding when needed, or that such funding, if available, can be obtained on terms acceptable to the Company.

As of December 31, 2007 and continuing through June 30, 2008, the existing capital and anticipated funds from operations were not sufficient to sustain Company operations or the business plan over the next twelve months. We anticipate substantial increases in our cash requirements; which will require additional capital generated from the sale of common stock, the sale of preferred stock, or debt financing. No assurance can be made that such financing will be available, or available on terms acceptable to the Company and if available it may take either the form of debt or equity. In either case, any financing will have a negative impact on our financial condition and will likely result in an immediate and substantial dilution to our existing stockholders.

Executive Summary

The Company's business is the design production, marketing and sale of consumer appliances. Skye's premier consumer product is the FORTIS™, a new series of electric tankless water heater. Skye will market the FORTIS™

tankless water heater shortly through an established and growing list of manufacturer's representatives located in many states across the United States. On the heels of FORTIS™ will be a new technology that Skye refers to as Paradigm™. This technology ushers in an entirely new method of heating water that is both fast and extremely efficient. The primary application for the Paradigm™ technology will be for the point-of-use instantaneous water heating market. Skye is currently working to commercialize this technology into a suite of products to be manufactured under the brand HotSpot™ that can be used in homes across North America and Europe.

Once FORTIS™ is ready for commercial production and distribution, in late 2008, the Company's success will be dependent upon its ability to attract high quality distributors and manufacturer's representatives to market its products. To date, the Company has been able to attract distributors and manufacturer's representative groups with a solid track record selling tankless water heating devices to home builders and the wholesale plumbing trade. The Company is unable to provide forecasts as to the amount of product it anticipates selling. As of June 30, 2008, the Company has entered into contracts with a number of manufacturer's representatives located in states across the Southwest and Southeast of the U.S. Although existing agreements are currently under review by management, the current major terms of the contracts are: (a) distributors receive a graduated discount based on volume with the greatest discount being 35%, and 7% commissions to manufacturer's representatives; (b) non-exclusive territories; (c) termination upon 30 days' notice and; (d) no maximum purchase requirements and sales goals to be mutually agreed, or in default, \$1,000,000 per territory. The Company plans on assisting in the training of its U.S. distributors and manufacturers representatives in the safe installation and use of its products. The Company has, as of July 2, 2008, hired, on a probationary basis, a National Sales Manager to prepare the Company for the sale of its product. The National Sales Manager is also responsible for, among other duties, hiring regional sales representatives, appoint additional manufacturer's representatives, establish and train a sales and marketing staff and develop and distribute sales and marketing information to the market.

ITEMMANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF
2. OPERATIONS - continued

Going Forward

The Company has established relationships with a contract manufacturer Electrosem, LLC, to produce its FORTIS™ line of products. Electrosem has recently passed a site inspection by Intertek Testing Services and is thus authorized to mark Skye products with the ETL safety mark evidencing compliance of the products with UL Standard 499. Despite commencing commercial production late in late 2008, the Company expects that it may take up to one year for the production design and processes to stabilize and all cost reductions to be effectively implemented.

The Company has also continued to focus development efforts on the commercialization of its new Paradigm™ technology. Although we have been very excited about the functionality that the Paradigm™ technology offers, we have not been successful in developing a cost effective means to commercialize the technology into a consumer product line. We are currently engaged in a joint engineering and product development project with a critical supplier to jointly complete the engineering and commercialization process, and then subsequently the engineering for manufacturing phase. In the event we are successful in concluding the engineering phases of this project, the Company expects that it will have first delivery of prototype product utilizing the Paradigm™ technology by late 2008 or early 2009, with commercial availability in 2009. The Company has made significant progress towards the completion of a commercial design for a product to be marketed as the HotSpot™, however, as we have not yet completed the engineering phase of the project there can be no assurance that we will be successful in developing a commercialized product for that will be available for sale and distribution within a reasonable period of time.

Access to capital remains one of the most pressing considerations for the Company. Although we have been successful in the past in raising capital to fund Company operations, such funds were not sufficient to provide adequate working capital to meet the needs of the Company. As such, the Company has continued to fund operations with loans from, and equity private placements made to, the Company's related party directors and others. In order to execute our business strategy, the Company must raise in excess of \$3 million over the next 12-month period in order to fully execute our current production and business plan. There can be no assurance that we will be able to raise such additional funding by way of either new debt or equity, and, in the event we are unable to raise the funds necessary to fund our business plan, it will be necessary to curtail such plans and this could have a detrimental impact on our business. Management believes that, in order to properly exploit the introduction of both the FORTIS™ and Paradigm™ HotSpot™ technologies, it will be necessary that we be positioned not only as a quality supplier of products, but that we also be able to supply a sufficient volume of product to meet wholesale demand. We believe that, relative to the wholesale market, there is a very high expectation that product be available in a timely fashion when ordered. In order to meet this expectation, we must be capable of not only producing our products in sufficient volume, but expand our management team, corporate infrastructure, and working capital base. These goals all require additional capital and we must be successful in our efforts to obtain this funding if we are to be successful in the wholesale sales and distribution channel.

Over the balance of the year we will continue to focus our efforts on initiating production of the FORTIS™ product line and in getting it into the market to be sold. We will continue to develop the HotSpot™ product line and deliver such products for the required UL 499 safety compliance testing. We will continue also to develop our markets and train installers and field service personnel in cooperation with our appointed manufacturer's representatives. This is no small task and it will require a significant investment of capital, as well as a greatly expanded staff in order to execute the business plan resulting in effective sales and service of the FORTIS™ product line.

Over the balance of 2008, we will continue to focus on completing the Paradigm™ technology and developing a suite of products utilizing this powerful technology. While Paradigm™ will require a significant investment of time and capital

in order to yield a line of marketable products, we are confident that products based on this technology will be amongst the most efficient and technologically advanced in the market.

ITEM MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF
 2. OPERATIONS - continued

Results of Operations

Revenues

For the six months ended	2008	2007	Increase/(decrease)	
June 30:			\$	%
Revenue	\$47,339	\$0	\$47,339	100

Revenues for the second quarter ended June 30, 2008 were \$23,589, compared to revenues of \$0 for the three months ended June 30, 2007. Revenues for the six-month period were \$47,339 as compared to revenues of \$0 in the same period ended in 2007. The Company recorded its first revenues from the commercial sales of its FORTIS™ product line in late March

2008, however, commercial volumes of product sales are not expected until late third quarter 2008. Revenues recorded are for product sold, shipped and for which payment was received during the quarter.

General and Administrative expenses

For the three months ended	2008	2007	Increase/(decrease)	
June 30:			\$	%
General & Administrative expenses	\$661,293	\$170,799	\$490,494	287

General and administrative expenses increased by \$490,494 during the three-month period ended June 30, 2008 as compared to the same period in 2007 reflecting the fact that the Company had begun to staff up for business operations, including the payment of rent for its 2,189 square foot leased premises in Scottsdale, Arizona, as well as the addition of administrative, legal, marketing and sales personnel during the period. During the six-month period ended June 30, 2008, general and administrative expenses increased \$587,384 over the comparable period during 2007. The Company also incurred \$351,808 in consulting and legal expenses associated with the value of shares issued to consultants for services and legal services performed. General and Administrative expenses are likely to continue to escalate as the Company continues to expand its sales and marketing presence, and as we add more operational and administrative personnel, and professional assistance with our continued efforts to execute our business plan and market our products.

Total Operating Expenses

For the three months ended	2008	2007	Increase/(decrease)	
June 30:			\$	%
Total operating expenses	\$693,570	\$709,015	\$(15,445)	2

Overall operating expenses during the quarter ended June 30, 2008 decreased marginally by approximately 2% despite additional costs incurred in connection with the addition of sales and marketing personnel, as well as the addition of certain administrative personnel. During the six-month period ended June 30, 2008 overall operating expenses increased by 2% as compared to the six-month period ended June 30, 2007. The marginal increase is mostly attributable to legal fees to conclude much of the Company's outstanding litigation. During the quarter the Company also incurred costs in connection with sales and marketing initiatives targeted towards the wholesale market for the Company's FORTIS™ product line. Legal and professional fees declined \$519,349 or 97% as compared to the same period in the prior year, and research and development expenses also increased by \$12,535 from the three-month

period ended June 30, 2007 reflecting the near completion of research and development activities in connection with the FORTIS™ product line. Research and Development expenses are again expected to increase in the successive quarters of 2008 as the Company emphasizes the completion of the Paradigm™ engineering project and moves to commercialize the HotSpot™ product line as well as other product lines utilizing the Paradigm™ technology.

For the three months ended June 30:	2008	2007	Increase/(decrease)
			\$
Net Income (Loss)	\$605,183	\$(760,957)	\$1,366,140

The net income for the three months ended June 30, 2008 was \$605,183 which is a reversal from the loss recorded in the June 30, 2007 period of (\$760,957). During the six-month period ended June 30, 2008 the Company recorded a gain of \$838,473 which is a reversal from a loss recorded in the comparable six-month period in 2007 of (\$965,987). The income in 2008 was the result of a gain on extinguishment of debt of \$1,823,954 as more fully explained in Note 3 of the Notes to the Financial Statements. Excluding this onetime gain the Company would have incurred a loss of \$985,481 for the six months ended June 30, 2008. The Company recorded its first revenues from the sale of FORTIS™ product in the period ended March 31, 2008 and further revenues are likely to continue throughout the fiscal year as the Company anticipates commercial production of the FORTIS™ product line during the latter part of the third quarter 2008.

The Company recorded an increase in interest expense of \$60,291 for the six-month 2008 period.

Liquidity and Capital Resources

A critical component of our operating plan impacting our continued existence is the ability to obtain additional capital through equity and/or debt financing. Since inception, we have financed our cash flow requirements primarily through issuances of common stock and debt and most of these transactions were with related parties. As we continue our activities, we will likely continue to experience net negative cash flows from operations, pending receipt of significant revenues. Throughout the entire fiscal year 2007, and continuing through June 30, 2008 all of the Company's cash needs were met through loans advanced to the Company by certain of its related party directors and other third parties.

At June 30, 2008, our working capital deficit was \$556,373, as compared to \$3,316,616 at December 31, 2007. The improvement was due primarily to the debt extinguishment of \$1,823,954 and the repayment of related party debt of \$857,133 through the issuance of 3,018,150 shares of common stock.

Net cash change for the six months ending June 30, 2008 was a decrease of \$15,055 as compared to a decrease of \$5,384 for June 30, 2007 period. Net cash used in operating activities was \$514,255 for the six months ended June 30, 2008, as compared to \$212,251 for the same six-month period ended in 2007 reflecting greater expenditures in connection with an expansion of administrative costs, as well as the addition of sales and marketing functions in connection with the marketing of the Company's FORTIS™ product line. Cash provided by financing activities increased during the six-months ended June 30, 2008 to \$522,125 from \$212,461 as recorded in the same period in 2007.

Going Concern

The report of our independent registered public accounting firm on the financial statements for the year ended December 31, 2007, includes an explanatory paragraph indicating substantial doubt as to our ability to continue as a going concern. We have an accumulated deficit of \$13,697,997 and working capital deficit of \$556,373 as of June 30, 2008. We have not generated meaningful revenues in the last two fiscal years. Our ability to establish the Company as a going concern is dependent upon our ability to obtain additional financing, in order to fund our planned operations and ultimately, to achieve profitable operations.

Intangible Assets

The Company's intangible assets consist of two pending patents and four patents for tankless water heater technology. Generally a patent has a life of 17 to 20 years.

The Company performed an impairment test in accordance with the guidance provided in SFAS 142, "Goodwill and Other Intangible Assets", and has determined that, as of December 31, 2007 no impairment exists on any of the Company's assets based on the present value of future cash flows generated from Company assets.

ITEMMANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF
2. OPERATIONS - continued

Critical Accounting Policies

We have identified the following policies as critical to our business operations and the understanding of our results of operations. The preparation of these financial statements require us to make estimates and assumptions that effect the reported amount of assets and liabilities, disclosure of contingent assets and liabilities at the date of our financial statements, and the reported amounts of revenue and expenses during the reporting period. There can be no assurance that actual results will not differ from those estimates. The effect of these policies on our business operations is discussed below where such policies affect our reported and expected financial results.

Revenue Recognition. We record sales when revenue is earned. We sell on credit to our distributors and manufacturer's representatives. Due to our Warranty and Right to Return policy, 6% of the sales are recognized immediately and the balance is recognized 25 – 40 days after shipment of the product to the customer. All shipments are FOB shipping point. Sales to distributors and manufacturer's representatives are sold FOB shipping point with receivables recorded 25 to 40 days post shipping. We no longer manufacture the ESI-2000 product lines. Accordingly, we plan to refund the purchase price paid for undelivered heaters or, alternatively, to ship new heaters to those customers that did not receive delivery of an ESI-2000 heater. We recorded our first revenues from sales of the Company's FORTIS™ product line during the first quarter of 2008.

Warranty and Right of Return. In connection with the sale of each product, we provide a limited 30-day money back guarantee less a 6% restocking charge. After the 30 days, we provide a five-year warranty on replacement of parts. The tank chamber is warranted not to leak for 10 years. We have limited history with claims against our warranty. We defer a portion of the revenue as would generally be required for post-contract customer support arrangements under SOP 97-2. Accordingly, the revenue allocated to the warranty portion of such sales is deferred and recognized ratably over the life of the warranty. As of June 30, 2008, a total of \$42,913 in refunds and warranty allowances were recorded against product sales.

Patents We evaluate potential impairment of long-lived assets in accordance with FAS No. 144, "Accounting for the Impairment or Disposal of Long-Lived Assets." FAS No. 144 requires that certain long-lived assets be reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be fully recoverable based on expected undiscounted cash flows that result from the use and eventual disposition of the asset. The amount of any impairment is measured as the difference between the carrying value and the fair value of the impaired asset. Patent and software costs include direct costs of obtaining patents. Costs for new patents are either expensed as they are incurred or capitalized and amortized over the estimated useful lives of seventeen years and software over five years.

Research and Development. Our research and development efforts concentrate on new product development, improving product durability and expanding technical expertise in the manufacturing process. We expense product research and development costs as they are incurred. We incurred research and development expense of \$21,334 and \$30,000 during the six months ended June 30, 2008 and 2007, respectively.

Stock Based Compensation. In December 2004, the FASB issued FAS No. 123R, "Share-Based Payment." This statement is a revision to FAS No. 123, "Accounting for Stock-Based Compensation," and it supersedes APB Opinion No. 25, "Accounting for Stock Issued to Employees," and amends FAS No. 95, "Statement of Cash Flows." FAS No. 123R requires all share-based payments to employees, including grants of employee stock options, to be recognized in the income statement based on their fair values. We use the Black-Scholes pricing model for determining the fair value of stock based compensation.

Equity instruments issued to non-employees for goods or services are accounted for at fair value and are marked to market until service is complete or a performance commitment date is reached.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Not required.

ITEM 4T. CONTROLS AND PROCEDURES

Evaluation of disclosure controls and procedures

Management, with the participation of our Chief Executive Officer and the Chief Financial Officer, carried out an evaluation of the effectiveness of our “disclosure controls and procedures” (as defined in the Exchange Act, Rules 13a-15(e) and 15d-15(e)) as of the end of the period covered by this report (the “Evaluation Date”). Based upon that evaluation, the Company’s Chief Executive Officer and Chief Financial Officer concluded that, as of June 30, 2008, our disclosure controls and procedures were ineffective to ensure that the information we were required to disclose in reports that we file or submit under the Securities and Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms. More specifically, the company identified a material weakness due to a lack of sufficient personnel with appropriate knowledge in U.S. GAAP and lack of timely recording of transactions, supporting documentation and sufficient analysis of the application of U.S. GAAP to transactions, including but not limited to equity transactions. During the three months ended June 30, 2008, there was no change in our internal control over financial reporting identified in connection with the evaluation that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Internal Control over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting for the Company. Management used the framework of conducting an extensive review of existing documentation and transactions to make that evaluation.

The Company’s management is reviewing the Company’s internal controls over financial reporting to determine the most suitable recognized control framework. The Company will give great weight and deference to the product of the discussions of the SEC’s Advisory Committee on Smaller Public Companies (the “Advisory Committee”) and the Committee of Sponsoring Organizations’ task force entitled Implementing the COSO Control Framework in Smaller Businesses (the “Task Force”). Both the Advisory Committee and the Task Force are expected to provide practical, needed guidance regarding the applicability of Section 404 of the Sarbanes-Oxley Act to small business issuers. The Company’s management intends to perform the evaluation required by Section 404 of the Sarbanes-Oxley Act at such time as the Company adopts a framework. For the same reason, the Company’s independent registered public accounting firm has not issued an “attestation report” on the Company management’s assessment of internal controls.

PART II - OTHER INFORMATION

ITEM LEGAL PROCEEDINGS

1.

Since the Company's quarterly report on Form 10Q for the period ended March 31, 2008 until the date of this Report, there have been no actions initiated, terminated or that have resulted in material changes from the status as reported for such period other than in connection with the Envirotech Bankruptcy matter detailed below:

Envirotech Bankruptcy – Material Change: Envirotech Systems Worldwide Inc. filed a voluntary petition into Chapter 7 Bankruptcy on June 24, 2008 in the Bankruptcy Court for the District of Arizona. The matter was assigned case number 2:08-bk-07554. The trustee assigned by the Bankruptcy Court in the matter is: S. William Manera, Trustee of P.O. Box 44350 Phoenix, AZ 85064. The meeting of creditors in the matter is scheduled for July 31, 2008. All pending litigation and collections of prior judgments against Envirotech have been stayed by the filing of the chapter 7 bankruptcy proceedings.

Envirotech – Sanctions Minute Entry: On May 2, 2008 the court issued sanctions against Envirotech, Skye, Valeo and their principals in the amount of \$40,000 in connection with the prior Chapter 11 proceedings. The Company and certain of the principals and third parties have filed motions to reconsider and objections to jurisdiction with respect to the individuals and parties other than Envirotech. The motions and the objections have not yet been heard by the Bankruptcy Court as of the date of this Report.

Papazian Suit. The Company has settled the lawsuit involving former director William Papazian that was previously pending in Maricopa County Superior Court under case number: CV2007- 002890. The Company agreed to pay Mr. Papazian legal fees and settlement costs totaling \$175,000.

ITEM RISK FACTORS

1A

Our future existence remains uncertain and the report of our independent registered public accounting firm on our December 31, 2007 financial statements contain a “going concern” qualification.

The report of the independent registered public accounting firm on our financial statements for the years ended December 31, 2007 and 2006, includes an explanatory paragraph relating to our ability to continue as a going concern. We have suffered substantial losses from operations, we require substantial additional financing, we are subject to significant and costly litigation and we need to continue the development and marketing of our products. Ultimately we need to generate additional revenues and attain profitable operations. These factors raise substantial doubt about our ability to continue as a going concern. There can be no assurance that we will ever be able to develop commercially viable products or an effective marketing system. Even if we are able to develop commercially viable products, there is no assurance that we will ever be able to attain profitable operations.

We have incurred losses and may continue to incur losses in the future.

At June 30, 2008, our accumulated deficit was \$13,697,997. We have not been able to generate enough revenues to cover our expenses and have survived only by raising funds through the sale of debt and equity securities. We must continue to raise funds in the near future to continue operations. While management has been successful in the past in raising these funds, there is no assurance that management will be successful in raising sufficient funds to continue operations and thus the Company may fail.

Limited Capital and Need for Additional Financing.

The Company does not have sufficient capital to execute its existing business plan and until the Company has achieved a sales and net margin level sufficient to break even, it will not be self-sustaining or be competitive in the areas in which it intends to operate. We believe that current cash on hand and the other sources of liquidity will not be sufficient enough to fund our anticipated expansion of operations through fiscal 2008. We anticipate that we will require up to approximately \$3,000,000 to fund our anticipated expansion of operations over the next twelve months. Additional capital will be required to effectively support the operations and to otherwise implement our overall business strategy.

The Company will require additional funding for continued operations, and will therefore be dependent upon its ability to raise additional funds through bank borrowings, equity or debt financing, or asset sales. We expect to access the public and private equity or debt markets periodically to obtain the funds we need to support our operations and continued growth. There is no assurance that the Company will be able to obtain additional funding when needed, or that such funding, if available, can be obtained on terms acceptable to the Company. If we require, but are unable to obtain, additional financing in the future on acceptable terms, or at all, we will not be able to continue our business strategy, respond to changing business or economic conditions, withstand adverse operating results or compete effectively. If the Company cannot obtain needed funds, the Company may be forced to curtail; as it has of late, or cease all together, its activities. If additional shares are issued to obtain financing, current shareholders will suffer a dilutive effect on their percentage of stock ownership in the Company and this dilutive effect may be substantial. Insufficient financial resources may require the Company to delay or eliminate all or some of its development, marketing and sales plans, as it has of late, which will have a material adverse effect on the Company's business, financial condition and results of operations. There is no certainty that the expenditures to be made by the Company will result in a profitable business.

ITEM RISK FACTORS - continued

1A

The markets for our products are highly competitive and revenues could decline if we are unable to respond to competition.

Our products are sold in highly competitive markets and we compete based on product design, quality of products and services, product performance, maintenance costs, and overall price. We compete with manufacturers and distributors located in the United States and throughout the world. Some of our competitors have greater financial, marketing, manufacturing, and distribution resources than we do. We cannot assure that our products and services will compete successfully with those of our competitors or that we will be able to acquire a strong customer base to establish profit margins. These risks could materially and adversely affect our financial condition, results of operations, and cash flows.

Our products are sold to new residential and commercial construction so our operations could be adversely affected by a decline in residential and commercial construction.

Our products are marketed and sold to new residential and commercial construction. The strength of residential and commercial construction depends on new housing starts and business investment, which are a function of many factors beyond our control, including interest rates, employment levels, availability of credit and consumer confidence. Downturns in these markets could result in lower revenues and lower profitability. New housing starts declined in 2006, which have continued through 2008 and the pace may continue at lower levels than previously expected or decline further.

Our results of operations may be negatively impacted by product liability lawsuits.

Our business exposes us to potential product liability risks that are inherent in the design, manufacture, and sale of our products. While we intend to obtain what we believe to be suitable product liability insurance, we cannot assure you that we will be able to obtain or maintain this insurance on acceptable terms or that this insurance will provide adequate protection against potential liabilities. In addition, we currently self-insure a portion of product liability claims. A series of successful claims against us could materially and adversely affect our reputation and our financial condition, results of operations, and cash flows.

Our results of operations could be adversely affected by fluctuations in the cost of raw materials.

As a manufacturer we are subject to world commodity pricing for many of the raw materials used in the manufacture of our products. Such raw materials are often subject to price fluctuations, frequently due to factors beyond our control, including changes in supply and demand, general U.S. and international economic conditions, labor costs, competition, and government regulation. Inflationary and other increases in the costs of raw materials have occurred in the past and may recur in the future. Any significant increase in the cost of raw materials could reduce our profitability and have a material adverse effect on our business, results of operations and financial condition.

Risks Relating To Our Common Stock

Because our common stock is deemed a low-priced "Penny" stock, an investment in our common stock should be considered high risk and subject to marketability restrictions.

Since our common stock is a penny stock, as defined in Rule 3a51-1 under the Securities Exchange Act, it will be more difficult for investors to liquidate their investment in the limited market which has developed for the common stock. Until the trading price of the common stock rises above \$5.00 per share, if ever, trading in the common stock is

subject to the penny stock rules of the Securities Exchange Act specified in Rules 15g-1 through 15g-10. Those rules require broker-dealers, before effecting transactions in any penny stock, to:

- Deliver to the customer, and obtain a written receipt for, a disclosure document;
- Disclose certain price information about the stock;
- Disclose the amount of compensation received by the broker-dealer or any associated person of the broker-dealer;
- Send monthly statements to customers with market and price information about the penny stock; and
- In some circumstances, approve the purchaser's account under certain standards and deliver written statements to the customer with information specified in the rules.

Consequently, the penny stock rules may restrict the ability or willingness of broker-dealers to sell the common stock and may affect the ability of holders to sell their common stock in the secondary market and the price at which such holders can sell any such securities. These additional procedures could also limit our ability to raise additional capital in the future.

ITEM RISK FACTORS - continued

1A

If we fail to remain current on our reporting requirements, we could be removed from the OTC Bulletin Board which would limit the ability of broker-dealers to sell our securities and the ability of stockholders to sell their securities in the secondary market.

Companies trading on the OTC Bulletin Board, such as us, must be reporting issuers under Section 12 of the Securities Exchange Act of 1934, as amended, and must be current in their reports under Section 13, in order to maintain price quotation privileges on the OTC Bulletin Board. More specifically, FINRA has enacted Rule 6530, which determines eligibility of issuers quoted on the OTC Bulletin Board by requiring an issuer to be current in its filings with the Commission. Pursuant to Rule 6530(e), if we file our reports late with the Commission three times in a two-year period then we will be ineligible for quotation on the OTC Bulletin Board. As a result, the market liquidity for our securities could be severely adversely affected by limiting the ability of broker-dealers to sell our securities and the ability of stockholders to sell their securities in the secondary market. As of the date of this filing, we have one late filing reported by FINRA.

FINRA sales practice requirements may also limit a stockholder's ability to buy and sell our stock.

In addition to the “penny stock” rules described above, the Financial Industry Regulatory Authority (FINRA) has adopted rules that require that in recommending an investment to a customer, a broker-dealer must have reasonable grounds for believing that the investment is suitable for that customer. Prior to recommending speculative low priced securities to their non-institutional customers, broker-dealers must make reasonable efforts to obtain information about the customer's financial status, tax status, investment objectives and other information. Under interpretations of these rules, the FINRA believes that there is a high probability that speculative low priced securities will not be suitable for at least some customers. The FINRA requirements make it more difficult for broker-dealers to recommend that their customers buy our common stock, which may limit your ability to buy and sell our stock and have an adverse effect on the market for our shares.

Our internal controls may be inadequate, which could cause our financial reporting to be unreliable and lead to misinformation being disseminated to the public.

Our management is responsible for establishing and maintaining adequate internal control over financial reporting. As defined in Exchange Act Rule 13a-15(f), internal control over financial reporting is a process designed by, or under the supervision of, the principal executive and principal financial officer and effected by the board of directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles and includes those policies and procedures that: (i) pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the Company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company, and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the financial statements.

Our future operating results may fluctuate and cause the price of our common stock to decline, which could result in substantial losses for investors.

Our limited operating history, the lack of established products and the substantial litigation in which the Company and certain of its officers and consultants is involved make it difficult to predict accurately our future operations. We

expect that our operating results will fluctuate significantly from quarter to quarter, due to a variety of factors, many of which are beyond our control. If our operating results fall below the expectations of investors or securities analysts, the price of our common stock will decline significantly. The factors that will cause our operating results to fluctuate include, but are not limited to:

- ability to commercialize new products from ongoing research and development activities;
- developments in tankless water heating technology;
- price and availability of alternative solutions for water heating systems;
- availability and cost of technology and marketing personnel;
- our ability to establish and maintain key relationships with industry partners;
- the amount and timing of operating costs and capital expenditures relating to maintaining our business, operations, and infrastructure;
- general economic conditions and economic conditions specific to the cost of electricity and water; and
- the ability to maintain a product margin on sales, given the early stage of our market for our products.

These and other external factors have caused and may continue to cause the market price and demand for our common stock to fluctuate substantially, which may limit or prevent investors from readily selling their shares of common stock and may otherwise negatively affect the liquidity of our common stock. In the past, securities class action litigation or shareholder derivative litigation has often been brought against companies following periods of volatility in the market price of their securities, as happened in the case of the Company. If additional derivative litigation or securities class action litigation were to be brought against us it could result in substantial costs and a diversion of our management's attention and resources. Such adverse events, will hurt our business and may result in the inability to continue operations, and in such a case, investors will face the risk of an entire loss of their investment.

ITEM UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

2.

During the second quarter ended June 30, 2008, the Company engaged in the following sales or issuances of equity during the period:

Equity Private Placements and Debt for Equity Exchange: The Company issued (1) 1,597,656 new common shares at \$0.32 per new common share for gross cash proceeds to the Company of \$511,250, and (2) 3,018,150 new common shares as payment of debt for equity of an amount totaling \$857,133.

Common Shares for Legal Fees and Design Services: The Company issued 471,699 new common shares to extinguish accrued legal fees and design fees totaling \$351,808. Of such issued new common shares, 455,574 were issued at \$0.80 per new common share (187,500 new common shares of which had been reported as issued during the period ended March 31, 2008 but were not, in fact, issued until the period ended June 30, 2008) and 16,125 were issued at \$0.37 per new common share.

Director's Fees: As a part of the Company's Director Compensation Plan, directors were each issued 12,500 new common shares at \$0.80 per new common share for services during the second quarter ended June 30, 2008, as well, an additional 37,500 new common shares were issued to each director for services rendered to the Company during the prior three quarters. As such, a total of 250,000 new common shares in payment of Director Fees of \$200,000 were issued during the second quarter ended June 30, 2008.

We believe the issuance of the shares listed in this Item 2 are exempt from the registration and prospectus delivery requirement of the Securities Act of 1933 by virtue of Section 4(2). The shares were issued directly by us and did not involve a public offering or general solicitation. The recipients of the shares were afforded an opportunity for effective access to our files and records of that contained the relevant information needed to make their investment decision, including our financial statements and reports filed under the Securities Exchange Act of 1934. We reasonably believed that the recipients had such knowledge and experience in the Company's financial and business matters that they were capable of evaluating the merits and risks of their investment.

Funds received by the Company of \$191,250 received from private placements made during the second quarter ended June 30, 2008 were expended during the period for research and development costs, parts and components costs and other general operating purposes.

ITEM DEFAULTS UPON SENIOR SECURITIES

3.

None.

ITEM SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

4.

None.

ITEM OTHER INFORMATION

5.

The Company filed a Certificate of Dissolution of its subsidiary Valeo Industries, Inc. on June 26, 2008 with the Nevada Secretary of State. As of the date of dissolution, Valeo had no assets and no payables other than intercompany amounts. Valeo was created in 2006 to engage in product manufacturing for the Company. Because the Company has decided to proceed as a “fabrication free” entity, Valeo was no longer required and thus dissolved.

As a part of an ongoing review of the need to maintain corporate subsidiaries, the Company has elected to not file requisite documents with the Arizona Corporations Commission (the “ACC”) needed to rehabilitate the corporate status of Envirotech Systems Worldwide, Inc. and ION Tankless, Inc. Accordingly, Envirotech (now in Chapter 7 Bankruptcy proceedings) was administratively dissolved by the ACC on February 15, 2007 and ION Tankless was administratively dissolved by the ACC on March 28, 2008. Envirotech has no meaningful assets other than a single patent over which the Company has a secured position. ION Tankless had several issued patents, all of which have been assigned to the Company in exchange for the extinguishment of intercompany debt. The accounting effect of the Envirotech bankruptcy and the Valeo and ION Tankless dissolutions have been fully reflected in the financial statements contained in this Report.
