 - Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))
-

Item 7.01. Regulation FD Disclosure.

On August 27, 2009, the Registrant filed the attached "NI 43-101 Pre-Feasibility Study of the Mineral Resources of the Borealis Gold Project Located in Mineral County, Nevada, USA" dated July 20, 2009 (the "Pre-Feasibility Study") with securities regulatory authorities in Canada, pursuant to Canadian securities laws and the rules of Toronto Stock Exchange. It is hereby being furnished to the Securities and Exchange Commission ("SEC") on Form 8-K to satisfy the Company's "public disclosure" obligations under Regulation FD of the SEC.

The Pre-Feasibility Study was prepared in accordance with National Instrument 43-101 of the Canadian Securities Administrators ("NI 43-101") by John R. Danio, P.E., Senior Associate at Telesto Nevada, Inc. and co-authored by Roger C. Steininger, Ph.D., CPG, Chief Consulting Geologist at the Registrant, Jaye T. Pickarts, P.E., of Knight Piesold and Co., Steven D. Craig, CPG, Senior Consulting Geologist at the Registrant and Kim Drossulis, Senior Mine Engineer at Telesto Nevada, Inc., each of whom is a Qualified Persons as defined by NI 43-101. As a company listed on the Toronto Stock Exchange, the Registrant was required to prepare the Pre-Feasibility Study in accordance with NI 43-101, pursuant to Canadian securities laws and the rules of the Toronto Stock Exchange.

All mineral resources have been estimated in accordance with the definition standards on mineral resources and mineral reserves of the Canadian Institute of Mining, Metallurgy and Petroleum referred to in NI 43-101. U.S. reporting requirements for disclosure of mineral properties are governed by the United States Securities and Exchange Commission ("SEC") Industry Guide 7 ("Guide 7"). NI 43-101 and Guide 7 standards are substantially different. The terms "mineral reserve", "proven mineral reserve" and "probable mineral reserve" are Canadian mining terms as defined in accordance with NI 43-101. These definitions differ from the definitions in Guide 7. Under Guide 7 standards, a "final" or "bankable" feasibility study is required to report reserves, the three-year historical average price is used in any reserve or cash flow analysis to designate reserves and the primary environmental analysis or report must be filed with the appropriate governmental authority.

The Report uses the terms "mineral resource," "measured mineral resource," "indicated mineral resource" and "inferred mineral resource" .. We advise investors that these terms are defined in and required to be disclosed by NI 43-101; however, these terms are not defined terms under Guide 7 and are normally not permitted to be used in reports and registration statements filed with the SEC. Investors are cautioned not to assume that any part or all of mineral deposits in these categories will ever be converted into reserves. "Inferred mineral resources" have a great amount of uncertainty as to their existence, and great uncertainty as to their economic and legal feasibility. It cannot be assumed that all or any part of an inferred mineral resource will ever be upgraded to a higher category. Under Canadian rules, estimates of inferred mineral resources may not form the basis of feasibility or pre-feasibility studies, except in rare cases. Investors are cautioned not to assume that all or any part of an inferred mineral resource exists or is economically or legally mineable. Disclosure of "contained pounds" in a resource is permitted disclosure under Canadian regulations; however, the SEC normally only permits issuers to report mineralization that does not constitute "reserves" by SEC standards as in place tonnage and grade without reference to unit measures.

Item 9.01. Exhibits.

The following Exhibits relating to Item 7.01 are intended to be furnished to , not filed with, the SEC pursuant to Regulation FD.

ExhibitDescription

No.

99.1 "NI 43-101 Pre-Feasibility Study of the Mineral Resources of the Borealis Gold Project Located in Mineral County, Nevada, USA" dated July 20, 2009

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.
