ANGLOGOLD REPORT FOR THE QUARTER AND NINE MONTHS ENDED 30 SEPTEMBER 1999,

PREVIOUSLY FILED WITH THE SEC IN HARD COPY -- REFILED TODAY, ON EDGAR

REPORT FOR THE QUARTER

ENDED 30 SEPTEMBER 1999

HIGHLIGHTS

Despite

- 5% drop in the average dollar gold spot price
- 6% drop in the average rand spot price

headline earnings rise 4% to R525 million (\$86 million)

Sadiola - production up 15%; cash costs down 14% to \$88/oz

South African mines - production up 2%; labour productivity up 3%

South American mines - production up 4%; cash costs down 3%

North American mines - production up 18%; cash costs down 3%

- 17. 5% return on shareholders' equity (17% last quarter)
- 14. 8% return on capital employed (14, 5% last quarter)

Dear Shareholder

The third quarter of 1999 has been one of the most challenging in living memory. The gold price has lows. In dollar terms, the average spot price, at \$259, was 5% lower than the previous quarter. The spot price is the spot price

against the dollar over the quarter, so that the spot price in rand terms was 6% lower. In this gangloGold has produced improved headline earnings of R525 million, or \$86 million. This represent shareholders' equity of 17. 5% (17% last quarter) and 14. 8% on capital employed (14. 5% last quarter)

Gold production at 1. 8 million ounces improved by 4%, cash costs reduced marginally from \$210 to were maintained at last quarter's level of \$239. Labour productivity, as measured in grams of gold from 209 in the last quarter to 220 this quarter. Of all the operations, Sadiola has had an except at levels above management's ongoing expectations. The South American mines have performed particle Production increased at the South African operations, though Matjhabeng mine's important Eland she earthquake in April, only resumed production in early October.

The gas explosion at Mponeng mine is a source of both great sadness and concern to management. Ev learn from this event, and indeed, to enhance the quality of safety at work is being made. In this

note the safety achievements of Moab Khotsong, Great Noligwa and Tau Lekoa.

Two issues have profoundly changed sentiment in gold markets. During September, the International

decided to avoid gold sales as a means of financing debt relief. On 26 September, European Banks, and Switzerland, announced that their gold sales would be limited to no more than 2 000 tonnes of This has laid to rest the notion that most central banks were about to sell most of their gold reand the lease rates at which gold can be borrowed, have moved up dramatically.

When we announced our second quarter results we expressed the view that gold was oversold, and in

not be selling forward in this market. The details of our hedge book are set out as usual, and we a measure of price security is a way of optimising our operations and the value they generate for

We are making an offer to acquire 100% of the equity of Acacia Resources, one of Australia's most companies. Combined with the now substantial North and South American and African production, we Acacia's gold production, good exploration track record and management competencies, will create company of choice.

AngloGold has been able to achieve competitive rates of return for our shareholders in the gloomi Should the gold price remain where it is now, and barring any major operational problems, we antifourth quarter with the outlook for the year being 7 million ounces of production at a cash cost Assuming a realised gold price of \$314 per ounce (at current exchange rates) this should yield not be a support of the production of t

R2. 6 billion with headline earnings before the deferred tax rate adjustment of around R2. 1 bill company intends to release a more detailed strategy, with targeted achievements for the next three the areas of improving labour productivity and cash and total cost performance.

SOUTH AFRICAN OPERATIONS

Overall performance

The South African operations had a satisfactory quarter, notwithstanding the continuing negative

of Matjhabeng's Eland shaft, disabled by a severe earthquake in April.

Repairs to Eland shaft were completed ahead of schedule at the end of the third quarter and produce return to full capacity early in the fourth quarter.

Gold production at 45. 3 tonnes (1. 5 million ounces) was 2% higher than in the second quarter ma

improved performances by Great Noligwa, Kopanang, Deelkraal and Joel.

Productivity in the South African operations improved quarter on quarter by 3% in terms of grams

4% in terms of square metres per employee. Unit cash costs at R43 642 per kilogram, or \$223 per c

previous quarter levels despite the annual wage increases.

As a result, operating profit was 4% higher at R632. 4 million.

Mine performance

In spite of a drop in yield (g/t), gold production at Great Noligwa improved quarter on quarter, milled.

At Kopanang, the quarter saw improved performances on all productivity indices. This, together wi

increase in yield, saw unit cash costs falling by 17% to R41 625 per kilogram.

Tau Lekoa managed to sustain the good performance of the previous two quarters.

Bambanani suffered two underground fires during the quarter which affected production. This was oby an improved yield. Nevertheless, gold production was down by 4% on the previous quarter.

The solid production performance at Tshepong continued with productivity indices showing further introduction of cementitious support packs as a safety measure has contributed to the increased the unit costs are running significantly lower than in the same period last year.

Matjhabeng struggled without Eland shaft production and, in addition, Kudu and Sable shafts experdifficulties. A significant improvement is expected in the fourth quarter at this operation.

The mill lock-up of gold at Joel was resolved during the quarter. This, together with improved familled, resulted in a significant improvement in gold production.

Improvements in productivity and tonnage milled quarter on quarter, resulted in higher gold produ

At Savuka. the repairs to the tertiary shaft have been completed. This will allow access to the h

during the fourth quarter.

A shortfall in tonnes milled at Mponeng was offset by an increase in grade, resulting in gold pro at a level similar to the previous quarter.

The increased focus on grade continued at Elandsrand but has been negatively affected to some ext

high seismicity.

Deelkraal has shown a significantly improved performance quarter on quarter with productivity gai previous quarter.

The fire in the elution section at Ergo has had a minor impact on gold production. The plant has production after the repairs to the damaged area.

Projects

The shaft sinking at Joel has reached 121 level (1 212 metres below surface) and station developm

Expenditure on this project of R20 million was R8 million more than in the second quarter.

Progress on the Mponeng deepening project has been good. At present, sinking operations have reac (3 462 metres below surface) and station development is in progress. Capital expenditure for the R30 million was R5 million lower than in the previous quarter.

The Moab Khotsong project continues to progress well Work in the rock/ventilation and main shafts

acceptable rates with no problems envisaged. The capital expenditure at R78 million was R1 million June quarter.

The carbon technology project at West Wits remains ahead of schedule and within planned expenditu

expenditure at R16 million was R1 million higher than the previous quarter. Project completion is when the residue thickening project is finished.

INTERNATIONAL OPERATIONS

Other African operations

AngloGold has a 38% interest in Sadiola mine in Mali and recently increased its 70% interest in N

Namibia to 100%.

Sadiola had a record quarter in terms of production and profit, arising from a combination of high recoveries resulting in lower unit cash costs. Grades from the pit were higher, and in addition, sourced from ore stockpiles during the unusually heavy rainy season experienced this year. Work of Kayes/Sadiola road prevented a repetition during this year's rainy season of the transport problems that year's rains.

The average grade for the fourth quarter is expected to be lower than for the quarter under review

are planned to be higher as normal mining conditions resume in the pit after the rainy season.

The feasibility study for the Yatela heap leach project continues on schedule, for completion by year when all outstanding tenders will be adjudicated. The final capital cost for the project will successful tenders. Assuming a positive investment decision is made in December and that Government timely, construction is expected to begin in February 2000, with gold production starting in January 2000, with gold production starting in January 2000, which gold production starting in January 2000, with gold production starting in January 2000, which gold pr

Navachab maintained production at a similar level to the previous quarter (on a 100% attributable with improved cost management decreased unit costs by 6% to \$242 per ounce. Plans to extend the pwere placed under review due to the low spot gold price, ongoing unstable labour relations, no productions are supported by the state of the low spot gold price, ongoing unstable labour relations, no production at a similar level to the previous quarter (on a 100% attributable with improved cost management decreased unit costs by 6% to \$242 per ounce. Plans to extend the previous quarter (on a 100% attributable with improved cost management decreased unit costs by 6% to \$242 per ounce. Namibian Government in having the mine declared a continuous operation and persistent difficultie permits for non-Namibian employees.

American Operations

Overall, the American operations in the third quarter outperformed the second with production and

North America

These operations comprise AngloGold's 70% interest in the Jerritt Canyon joint venture and the 67 interest in production ounces, subject to contract obligations) in the Cripple Creek and Victor j

In aggregate, these operations improved their production performance relative to the previous qua

two key parameters - ounces produced and unit cash costs achieved. The combined cash costs for the

136 000 ounces were \$176 per ounce.

Jerritt Canyon's production was maintained despite a marginally lower mill head grade. The cash of those for the previous quarter, reflecting the positive results of cost containment programmes, production was maintained despite a marginally lower mill head grade. The cash of the previous quarter, reflecting the positive results of cost containment programmes, production was maintained despite a marginally lower mill head grade. The cash of the previous quarter, reflecting the positive results of cost containment programmes, production was maintained despite a marginally lower mill head grade.

reagent usage and underground haulage productivity gains. The outlook for the year remains encour costs expected to be around \$179 per ounce and the production total in ounces above target.

Employee productivity continued to improve, quarter on quarter, benefiting from the introduction

truck fleet at SSX and Murray mines. There were no lost time injuries reported during this period

As expected, at Cripple Creek and Victor the previously reported build-up of gold inventory in the began to be recovered and production was significantly higher than in the second quarter though of

maintained at similar levels of around \$167 per ounce. This gold production for the period is a ranticipated that 1999 annual production Will be close to target with cash costs around \$5159 per ounce.

Employee productivity improved as a result of the increase in production and ongoing cost contain more than offset increases in diesel costs. There was one minor lost time injury reported during for the year.

Progress on the capital project to extend the leach pad to accommodate the additional reserves as Cresson Pit project progressed according to plan.

Exploration at Cripple Creek and Victor continued to be encouraging, and at the Jerritt Canyon pr

a review with the joint venture partner. Exploration scope and funding at Jerritt Canyon have bee

South America

These operations comprise AngloGold's 100% interest in the Morro Velho mines and the 50% interest

Grande mines, both in Brazil, and the 46. 25% interest in Cerro Vanguardia in southern Argentina.

The three operations on this continent enjoyed an excellent quarter, outperforming in aggregate t respect of ounces produced and unit cash costs achieved. Average cash costs for the 112 000 attri

produced were \$122 per ounce. Outlook for the year indicates an above-target performance with the

somewhat below this quarter's results.

Following a fundamental change in the mode of operation of the cyanide recovery circuit at Cerro reagent usage at this plant has improved considerably - impacting positively on the cost profile high mill head grades enjoyed this year are not projected to continue at these levels into the year continue to remedy throughput constraints associated with the primary crushing section. In respec

Technical Completion Tests for Cerro Vanguardia all certificates, with the exception of the Legal lodged with the senior lenders.

The safety performance at the three operations is under scrutiny with a total of seven minor disa

reported in the period.

Two joint venture agreements to pursue exploration prospects were announced during the quarter, of Solitaire Resources and the other in Ecuador with lamgold. Other exploration in South America continue existing mine exploitation areas and elsewhere in Brazil and Argentina.

GOLD MARKET

The end of the third quarter saw a sharp improvement in the gold market, reflected in a very welcomed price. This change came after a quarter during which the market remained under pressure from and fears of continued official sector gold sales. The gold price slipped to a 20-year low of \$250 average spot price of \$250 per ounce for the quarter compared unfavourably with the average of \$250 per ounce for the quarter compared unfavourably with the average of \$250 per ounce for the quarter compared unfavourably with the average of \$250 per ounce for the quarter compared unfavourably with the average of \$250 per ounce for the quarter compared unfavourably with the average of \$250 per ounce for the quarter compared unfavourably with the average of \$250 per ounce for the quarter compared unfavourably with the average of \$250 per ounce for the quarter compared unfavourably with the average of \$250 per ounce for the quarter compared unfavourably with the average of \$250 per ounce for the quarter compared unfavourably with the average of \$250 per ounce for the quarter compared unfavourably with the average of \$250 per ounce for the quarter compared unfavourably with the average of \$250 per ounce for the quarter compared unfavourably with the average of \$250 per ounce for the quarter compared unfavourably with the average of \$250 per ounce for the quarter compared unfavourably with the average of \$250 per ounce for the quarter compared unfavourably with the average of \$250 per ounce for the quarter compared unfavourably with the average of \$250 per ounce for the quarter compared unfavourably with the average of \$250 per ounce for the quarter compared unfavourably with the average of \$250 per ounce for the quarter compared unfavourably with the average of \$250 per ounce for the quarter compared unfavourably with the average of \$250 per ounce for the quarter compared unfavourably with the average of \$250 per ounce for the quarter compared unfavourably with the average of \$250 per ounce for the quarter compared unfavourabl

previous quarter. However, by mid-September, the market had consolidated around a price of \$255. downside price movement were being replaced by more positive views on gold. Subsequent events cap firmer sentiment and the improved circumstances in the market have carried over into October.

The market was helped in the first instance by growing evidence that the International Monetary F

proposal to sell some 10 million ounces of its total gold holdings of 100 million ounces as part for Heavily Indebted Poor Countries. This led the Fund to seek other means of financing which would sale of gold holdings, and by September alternative proposals had been tabled which would avoid to

news came in time to reassure the market for the second Bank of England gold auction on 21 Septem result, the market firmed around the time of the auction, and some market participants with short

auction as an opportunity to buy back their short positions

However, the single determining event for the market during the past quarter was the announcement Sunday, 26 September 1999 by the members of the European Central Bank, supported by the central bank and Switzerland, of a ceiling of 2 000 tonnes of gold sales by that group over the next five year

of gold already announced (specifically those by the United Kingdom and Switzerland). The announce

indicated that those banks would not increase their lending of gold into the market during this pestablished that the United States Federal Reserve and the Bank of Japan will subscribe to this of

within the same limits announced. The positive effect on the market was immediate, and the price than a week by some \$80 per ounce, touching \$340 per ounce early in October or over 30% above the

quarter.

The extent of the price rise has been increased by uncertainty in the market as to the credit pos

gold mining companies with large hedge positions in proportion to their production. The market re

around \$300 per ounce as it reflects the uncertainty over whether or not producers are likely to forward price exposures.

The centra! bank announcement should be seen in the context of a dialogue between leading individual sector and major gold producers stretching back some two years. The announcement reflects the deep the context of a dialogue between leading individual sector and major gold producers stretching back some two years.

many in the official sectors over negative speculation about official gold sales which has prevail recent years, and a desire to eliminate that distortion from the gold market. In essence, the annual AngloGold has believed for some time, that official sector holders of gold would always be responsable, and that no avalanche of official gold would overwhelm this market.

Looking forward, our market remains volatile, and we should expect continued interest in, and sup There is a degree of uncertainty amongst market participants and a degree of disorder, particular

market. However, we believe that this has been caused at least in part by some mismanagement of parket, and, assuming that official gold lending continues at around current levels, the market sorderly state once current problems have been resolved by these affected participants. Should off

materially reduce the amounts of gold that they are prepared to lend to this market, this would be different situation and is likely to lead to further sharp rises in the gold price.

AngloGold's open hedge position at the end of the third quarter is summarised below. We believe to decision on the part of AngloGold to remain out of the market during much of this past quarter, as price had been unduly depressed by unjustified negative sentiment towards gold. It is worth noting removed all exposure to gold lending rates through to early 2000. Thereafter, we have only limited lending rates, and the overwhelming majority of the forward positions are based on the fixed forward.

contributed substantially to the stability of our hedge position during the current volatile gold

As at 30 September 1999, the company had outstanding the following net forward pricing commitment production, A portion of these sales consists of US dollar-priced contracts which have been converted at average annual forward rand values based on a spot rand/dollar exchange rate of R6. 00 available.
