NOTE 1. BASIS OF PRESENTATION

For purposes of this report, any reference to “Potlatch,” “the company,” “we,” “us,” and “our” means Potlatch Corporation and all of its wholly owned subsidiaries, except where the context indicates otherwise.

The accompanying unaudited consolidated financial statements have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission pertaining to interim financial statements; certain disclosures normally provided in accordance with generally accepted accounting principles in the United States have been omitted. This Quarterly Report on Form 10-Q should be read in conjunction with our Annual Report on Form 10-K for the year ended December 31, 2013, as filed with the Securities and Exchange Commission on February 14, 2014. We believe that all adjustments necessary for a fair statement of the results of such interim periods have been included.

NOTE 2. INCOME TAXES

As a real estate investment trust (REIT), we generally are not subject to federal and state corporate income taxes on income of the REIT that we distribute to our shareholders. We are, however, subject to corporate taxes on built-in gains (the excess of fair market value over tax basis on January 1, 2006) on sales of real property held by the REIT during the first ten years following the REIT conversion. The sale of standing timber is not subject to built-in gains tax. The Small Business Jobs Act of 2010 modified the built-in gains provisions to exempt sales of real properties in 2011, if five years of the recognition period had elapsed before January 1, 2011. The American Taxpayer Relief Act of 2012 extended the reduced five-year holding period for sales occurring in 2012 and 2013. Accordingly, the built-in gains tax did not apply to sales of real property that occurred in 2011, 2012 and 2013.

We conduct certain activities through our taxable REIT subsidiaries (TRS), which are subject to corporate level federal and state income taxes. These activities are principally comprised of our wood products manufacturing operations and certain real estate investments held for development and resale.

For the three months ended March 31, 2014 and 2013, we recorded income tax provisions of \$5.5 million and \$4.8 million, respectively, primarily due to pre-tax income of the TRS.

PERFORMANCE SHARES

The following table presents the key inputs used in the Monte Carlo simulation method to calculate the fair value of the performance share awards in 2014 and 2013, and the resulting fair values:

	2014	2013		
Shares granted	87,441	83,111		
Stock price as of valuation date	\$39.76	\$45.31		
Risk-free rate	0.72	% 0.40	%	%
Fair value of a performance share	\$45.57	\$62.78		

The following table summarizes outstanding performance share awards as of March 31, 2014, and changes during the three months ended March 31, 2014:

(Dollars in thousands, except grant date fair value)	Shares	Weighted Avg. Grant Date Fair Value	Aggregate Intrinsic Value
Unvested shares outstanding at January 1	155,814	\$48.73

Forfeited	—	—	
Unvested shares outstanding at March 31	243,255	47.60	\$9,412

As of March 31, 2014, there was \$7.2 million of unrecognized compensation cost related to unvested performance share awards, which is expected to be recognized over a weighted average period of 1.8 years.

RESTRICTED STOCK UNITS

The following table summarizes outstanding RSU awards as of March 31, 2014, and changes during the three months ended March 31, 2014:

(Dollars in thousands, except grant date fair value)	Shares	Weighted Avg. Grant Date Fair Value	Aggregate Intrinsic Value

The total fair value of RSU awards vested during the three months ended March 31, 2014 was \$0.1 million. As of March 31, 2014, there was \$1.1 million of total unrecognized compensation cost related to unvested RSU awards, which is expected to be recognized over a weighted average period of 1.6 years.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Forward-Looking Information

This report contains, in addition to historical information, certain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, including without limitation, statements regarding recognition of compensation costs relating to our performance shares and RSUs, U.S. housing market conditions, housing starts and recovery, real estate demand and pricing, log prices, lumber demand and prices, business conditions for our business segments, Resource segment results, Wood Products segment results, Real Estate segment results, and similar matters. Words such as “anticipate,” “expect,” “will,” “intend,” “plan,” “target,” “project,” “believe,” “seek,” “schedule,” “estimate,” “estimate,” and similar expressions are intended to identify such forward-looking statements. These forward-looking statements reflect our current views regarding future events based on estimates and assumptions and are therefore subject to known and unknown risks and uncertainties and are not guarantees of future performance. Our actual results of operations could differ materially from our historical results or those expressed or implied by forward-looking statements contained in this report. For a nonexclusive listing of forward-looking statements and potential factors affecting our business, refer to “Cautionary Statement Regarding Forward-Looking Information” on page 1 and “Risk Factors” in Part I, Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2013. Forward-looking statements contained in this report present our views only as of the date of this report. Except as required under applicable law, we do not intend to issue updates concerning any future revisions of our views to reflect events or circumstances occurring after the date of this report.

Overview

The operating results of our Resource, Wood Products and Real Estate business segments have been and will continue to be influenced by a variety of factors, including the cyclical nature of the forest products industry, which is largely dependent on the economy and U.S. housing starts, changes in timber prices and in harvest levels from our timberlands, competition, timberland valuations, demand for our non-strategic timberland for higher and better use purposes, the efficiency and level of capacity utilization of our wood products manufacturing operations, changes in our principal expenses such as log costs and fuel costs, asset dispositions or acquisitions, and other factors. In our Resource segment, we pulled forward a portion of the harvest planned for the second half of 2013 into the first quarter of 2013 to take advantage of market conditions. Consequently, harvest volumes decreased during the first quarter of 2014 compared to the previous period. However, increased Northern sawlog prices resulted in higher operating income in the first quarter of 2014. Adverse winter weather conditions affected transportation and wood products shipments from our manufacturing facilities during the first quarter of 2014. We had one large rural recreation real estate transaction that resulted in strong Real Estate earnings for the first quarter of 2014.

Results of Operations

Our business is organized into three reporting segments: Resource, Wood Products and Real Estate. Sales between segments are recorded as intersegment revenues based on prevailing market prices. Because our Resource segment supplies our Wood Products segment with a portion of its wood fiber needs, intersegment revenues typically represent a significant portion of the Resource segment's total revenues. Our other segments generally do not generate intersegment revenues.

In the analysis of our consolidated results of operations, revenues are reported after elimination of intersegment revenues. In the analysis by business segments, each segment's revenues are presented before elimination of intersegment revenues.

Revenues – Revenues increased slightly in the first three months of 2014 over the same period in 2013 as a result of increased revenues due primarily to a large rural recreation real estate transaction, partially offset by decreased revenues from our Wood Products and Resource segments due to lower shipment volumes. A more detailed analysis of revenues follows in the operating results by business segments.

Cost of goods sold – Cost of goods sold increased slightly in the first three months of 2014 over the same period in 2013, due to the higher cost of logs consumed in our Wood Products segment, primarily related to increased prices for sawlogs in Idaho, and increased land basis of sales from our Real Estate segment, partially offset by decreased logging and hauling costs and depletion expenses in our Resource segment due to decreased harvest volumes.

Selling, general and administrative expenses – Selling, general and administrative expenses decreased in the first three months of 2014 from the same period in 2013 primarily due to non-cash mark-to-market adjustments related to our deferred compensation plans and lower incentive plan expenses.

Environmental remediation charge – In the first quarter of 2013 we recorded a pre-tax charge of \$0.8 million to reflect increased remediation costs associated with our Avery Landing site in Idaho.

Interest expense, net – Net interest expense decreased in the first three months of 2014 from the same period in 2013 due to debt redemptions in 2013.

Income tax provision – Our consolidated effective tax rate for the first three months of 2014 was 21.3% compared to 23.6% in the first three months of 2013. The decrease between periods resulted from proportionately higher operating income in the REIT compared to the TRS.

Revenues decreased in the first three months of 2014 from the same period in 2013 due to lower harvest volumes, primarily in Idaho, partially offset by increased prices. The decrease in harvest volume accounted for a negative \$5.6 million revenue variance, which was partially offset by a positive pricing variance of \$2.5 million.

In our Northern region, improved log prices in Idaho in the first quarter of 2013 resulted in pulling forward a portion of the harvest planned for the second half of 2013 into the first quarter to take advantage of the pricing opportunity. We had comparatively lower harvest volumes in 2014. Sawlog prices continued to increase in the first quarter of 2014 due to improved wood products prices. Pulpwood prices increased in the first quarter of 2014 over the same period in 2013 due to improved markets.

In our Southern region, sawlog volumes decreased as we shifted to harvest regions that contained less pine sawlog volumes. However, pulpwood volumes increased due to additional pine plantation thinnings. Prices for both sawlogs and pulpwood were basically unchanged between quarters.

Expenses for the segment decreased \$3.8 million, or 10%, in the first quarter of 2014 from the same period in 2013, primarily due to lower logging and hauling costs and depletion expense resulting from the decreased harvest volumes.

Wood Products Segment

(Dollars in thousands)	Three Months Ended March 31,		Increase (Decrease)	Percent Change	
	2014	2013			
Revenues	\$87,804	\$91,544	\$(3,740)	(4))%

Lumber sales prices (\$ per MBF)	\$402	\$412	\$(10)	(2))%

Revenues for the segment decreased in the first three months of 2014 compared to the same period in 2013 due to lower average lumber prices realized, partially offset by a small increase in shipments. Expenses for the segment increased \$2.5 million, or 3%, due primarily to the higher cost of logs consumed, primarily related to increased prices for sawlogs in Idaho.

Real Estate Segment

(Dollars in thousands)	Three Months Ended March 31,		Increase (Decrease)	Percent Change
	2014	2013		
Revenues	\$14,439	\$4,635	\$9,804	n/m

Non-strategic timberland	228	\$793	979	\$785
Total	13,499		3,486	

Revenues increased \$9.8 million, expenses increased \$4.6 million and operating income increased \$5.2 million in the first three months of 2014 compared to the same period of 2013, due primarily to the sale of 11,000 acres of rural recreation real estate in Idaho in a transaction that closed in the first quarter of 2014.
