DUNKIN' BRANDS GROUP, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Unaudited)

(1) Description of business and organization

Dunkin' Brands Group, Inc. ("DBGI"), together with its consolidated subsidiaries, is one of the world's leading franchisors of restaurants serving coffee and baked goods, as well as ice cream, within the quick service restaurant segment of the restaurant industry. We develop, franchise, and license a system of both traditional and nontraditional quick service restaurants and, in limited circumstances, have owned and operated locations. Through our Dunkin' Donuts brand, we develop and franchise restaurants featuring coffee, donuts, bagels, breakfast sandwiches, and related products. Additionally, we license Dunkin' Donuts brand products sold in certain retail outlets such as retail packaged coffee and Dunkin' K-Cup® pods. Through our Baskin-Robbins brand, we develop and franchise restaurants featuring ice cream, frozen beverages, and related products. Additionally, we distribute Baskin-Robbins ice cream products to Baskin-Robbins franchisees and licensees in certain international markets.

Throughout these unaudited consolidated financial statements, "Dunkin' Brands," "the Company," "we," "us," "our," and "management" refer to DBGI and its consolidated subsidiaries taken as a whole.

(2) Summary of significant accounting policies

(a) Unaudited consolidated financial statements

The consolidated balance sheet as of July 1, 2017, the consolidated statements of operations and comprehensive income for the three and six months ended July 1, 2017 and June 25, 2016, and the consolidated statements of cash flows for the six months ended July 1, 2017 and June 25, 2016 are unaudited.

The accompanying unaudited consolidated financial statements include the accounts of DBGI and its consolidated subsidiaries and have been prepared in accordance with the rules and regulations of the Securities and Exchange Commission ("SEC") for interim financial information. Accordingly, they do not include all of the information and footnotes required in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP") for complete financial statements. All significant transactions and balances between subsidiaries and affiliates have been eliminated in consolidation. In the opinion of management, all adjustments necessary for a fair presentation of such financial statements in accordance with U.S. GAAP have been recorded. Such adjustments consisted only of normal recurring items. These unaudited consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto for the fiscal year ended December 31, 2016, included in the Company's Annual Report on Form 10-K.

(b) Fiscal year

The Company operates and reports financial information on a 52- or 53-week year on a 13-week quarter basis with the fiscal year ending on the last Saturday in December and fiscal quarters ending on the 13th Saturday of each quarter (or 14th Saturday when applicable with respect to the fourth fiscal quarter). The data periods contained within the three- and six-month periods ended July 1, 2017 and June 25, 2016 reflect the results of operations for the 13-week and 26-week periods ended on those dates, respectively. Operating results for the three- and six-month periods ended July 1, 2017 are not necessarily indicative of the results that may be expected for the fiscal year ending December 30, 2017.

(c) Cash, cash equivalents, and restricted cash

In accordance with the Company's securitized financing facility, certain cash accounts have been established in the name of Citibank, N.A. (the "Trustee") for the benefit of the Trustee and the noteholders, and are restricted in their use. The Company holds restricted cash which primarily represents (i) cash collections held by the Trustee, (ii) interest, principal, and commitment fee reserves held by the Trustee related to the Company's Notes (see note 4), and (iii) real estate reserves used to pay real estate obligations.

Table of Contents

Pursuant to new accounting guidance for fiscal year 2017, restricted cash is combined with cash and cash equivalents when reconciling the beginning and end of period balances in the consolidated statements of cash flows (see note 2(f)). Cash, cash equivalents, and restricted cash within the consolidated balance sheets that are included in the consolidated statements of cash flows as of July 1, 2017 and December 31, 2016 were as follows (in thousands):

	July 1, 2017	December 31, 2016
Cash and cash equivalents	\$264,662	361,425
Restricted cash	74,952	69,746
Restricted cash, included in Other assets	629	661
Total cash, cash equivalents, and restricted cash	\$340,243	431,832

(d) Fair value of financial instruments

Financial assets and liabilities are categorized, based on the inputs to the valuation technique, into a three-level fair value hierarchy. The fair value hierarchy gives the highest priority to the quoted prices in active markets for identical assets and liabilities and lowest priority to unobservable inputs. Observable market data, when available, is required to be used in making fair value measurements. When inputs used to measure fair value fall within different levels of the hierarchy, the level within which the fair value measurement is categorized is based on the lowest level input that is significant to the fair value measurement.

Financial assets and liabilities measured at fair value on a recurring basis as of July 1, 2017 and December 31, 2016 are summarized as follows (in thousands):

	July 1, 2017		December 31, 2016	
	Significant other observable inputs (Level 2)	Total	Significant other observable inputs (Level 2)	Total

Assets:

Company-owned life insurance	\$10,018	10,018	9,271	9,271
Total assets	\$10,018	10,018	9,271	9,271

Liabilities:

Deferred compensation liabilities	\$12,534	12,534	11,126	11,126
Total liabilities	\$12,534	12,534	11,126	11,126

The deferred compensation liabilities relate to the Dunkin' Brands, Inc. non-qualified deferred compensation plans ("NQDC Plans"), which allow for pre-tax deferral of compensation for certain qualifying employees and directors. Changes in the fair value of the deferred compensation liabilities are derived using quoted prices in active markets of the asset selections made by the participants. The deferred compensation liabilities are classified within Level 2, as defined under U.S. GAAP, because their inputs are derived principally from observable market data by correlation to hypothetical investments. The Company holds company-owned life insurance policies to partially offset the Company's liabilities under the NQDC Plans. The changes in the fair value of any company-owned life insurance policies are derived using determinable cash surrender value. As such, the company-owned life insurance policies are classified within Level 2, as defined under U.S. GAAP.

The carrying value and estimated fair value of long-term debt as of July 1, 2017 and December 31, 2016 were as follows (in thousands):

	July 1, 2017		December 31, 2016	
	Carrying value	Estimated fair value	Carrying value	Estimated fair value
Financial liabilities				
Long-term debt	\$2,417,732	2,459,558	2,426,998	2,460,544

The estimated fair value of our long-term debt is estimated primarily based on current market rates for debt with similar terms and remaining maturities or current bid prices for our long-term debt. Judgment is required to develop these estimates. As such, our long-term debt is classified within Level 2, as defined under U.S. GAAP.

Table of Contents

(e) Concentration of credit risk

The Company is subject to credit risk through its accounts receivable consisting primarily of amounts due from franchisees and licensees for franchise fees, royalty income, and sales of ice cream and other products. In addition, we have note and lease receivables from certain of our franchisees and licensees. The financial condition of these franchisees and licensees is largely dependent upon the underlying business trends of our brands and market conditions within the quick service restaurant industry. This concentration of credit risk is mitigated, in part, by the large number of franchisees and licensees of each brand and the short-term nature of the franchise and license fee and lease receivables. As of July 1, 2017 and December 31, 2016, one master licensee, including its majority-owned subsidiaries, accounted for approximately 20% and 15%, respectively, of total accounts and notes receivable. No individual franchisee or master licensee accounted for more than 10% of total revenues for each of the three and six months ended July 1, 2017. For the three and six months ended June 25, 2016, one master licensee, including its majority-owned subsidiaries, accounted for approximately 11% and 10%, respectively, of total revenues. Additionally, the Company engages various third parties to manufacture and/or distribute certain Dunkin' Donuts and Baskin-Robbins products under licensing arrangements. As of July 1, 2017, one of these third parties accounted for approximately 11% of total accounts and notes receivable. No individual third party accounted for more than 10% of total accounts and notes receivable as of December 31, 2016.

(f) Recent accounting pronouncements

Recently adopted accounting pronouncements

In January 2017, the Financial Accounting Standards Board (the "FASB") issued new guidance for goodwill impairment which requires only a single-step quantitative test to identify and measure impairment and record an impairment charge based on the excess of a reporting unit's carrying amount over its fair value. The option to perform a qualitative assessment first for a reporting unit to determine if a quantitative impairment test is necessary does not change under the new guidance. The Company early adopted this guidance in fiscal year 2017. The adoption of this guidance had no impact on the Company's consolidated financial statements, and we do not expect any impact from this guidance when performing our annual goodwill impairment test as of the first day of the third quarter of fiscal year 2017.

In November 2016, the FASB issued new guidance addressing diversity in practice that exists in the classification and presentation of changes in restricted cash in the statements of cash flows. The Company early adopted this guidance retrospectively in fiscal year 2017. Accordingly, changes in restricted cash that have historically been included within operating and financing activities have been eliminated, and restricted cash is combined with cash and cash equivalents when reconciling the beginning and end of period balances for all periods presented. The adoption of this guidance primarily resulted in an increase of \$289 thousand in net cash provided by operating activities for the six months ended June 25, 2016 and had no impact on the consolidated statements of operations and balance sheets.

In March 2016, the FASB issued new guidance for employee share-based compensation which simplifies several aspects of accounting for share-based payment transactions, including excess tax benefits, forfeiture estimates, statutory tax withholding requirements, and classification in the statements of cash flows. The Company adopted this guidance in fiscal year 2017, which had the following impact on the consolidated financial statements:

On a prospective basis, as required, the Company recorded excess tax benefits of \$660 thousand and \$6.8 million to the provision for income taxes in the consolidated statements of operations for the three and six months ended July 1, 2017, respectively, instead of additional paid-in capital in the consolidated balance sheets. As a result, net income increased \$660 thousand and \$6.8 million, for the three and six months ended July 1, 2017, respectively, and basic and diluted earnings per share increased \$0.01 and \$0.07 for the three and six months ended July 1, 2017, respectively.

Excess tax benefits are presented as operating cash inflows instead of financing cash inflows in the consolidated statements of cash flows, which the Company elected to apply on a retrospective basis. As a result, the Company classified \$6.8 million and \$1.8 million for the six months ended July 1, 2017 and June 25, 2016, respectively, of excess tax benefits as operating cash inflows included within the change in prepaid income taxes, net in the consolidated statements of cash flows. The retrospective reclassification resulted in increases in cash provided by operating activities and cash used in financing activities of \$1.8 million for the six months ended June 25, 2016.

The Company prospectively excluded the excess tax benefits from the assumed proceeds available to repurchase shares in the computation of diluted earnings per share under the treasury stock method, which did not have a material impact on diluted earnings per share for the three and six months ended July 1, 2017.

Table of Contents

Recent accounting pronouncements not yet adopted

Leases

In February 2016, the FASB issued new guidance for lease accounting, which replaces existing lease accounting guidance. The new guidance aims to increase transparency and comparability among organizations by requiring lessees to recognize lease assets and lease liabilities on the balance sheet and requiring disclosure of key information about leasing arrangements. This guidance is effective for the Company in fiscal year 2019 with early adoption permitted, and modified retrospective application is required. The Company expects to adopt this new guidance in fiscal year 2019 and is currently evaluating the impact the adoption of this new guidance will have on the Company's consolidated financial statements and related disclosures. The Company expects that substantially all of its operating lease commitments will be subject to the new guidance and will be recognized as operating lease liabilities and right-of-use assets upon adoption, thereby having a material impact to its consolidated balance sheet.

Revenue from Contracts with Customers

In May 2014, the FASB issued new guidance for revenue recognition related to contracts with customers, except for contracts within the scope of other standards, which supersedes nearly all existing revenue recognition guidance. The new guidance provides a single framework in which revenue is required to be recognized to depict the transfer of goods or services to customers in amounts that reflect the consideration to which a company expects to be entitled in exchange for those goods or services.

The new guidance is effective for the Company in fiscal year 2018. The Company intends to adopt this new guidance in fiscal year 2018 using the full retrospective transition method, which will result in restating each prior reporting period presented, fiscal years 2016 and 2017, in the year of adoption. Additionally, a cumulative effect adjustment will be recorded to the opening balance of accumulated deficit as of the first day of fiscal year 2016, the earliest period presented. Based on the expected impacts described below, the Company expects such cumulative effect adjustment to be material to the opening balance of accumulated deficit.

The Company expects the adoption of the new guidance to change the timing of recognition of initial franchise fees, including master license and territory fees for our international business, and renewal fees. Currently, these fees are generally recognized upfront upon either opening of the respective restaurant or when a renewal agreement becomes effective. The new guidance will generally require these fees to be recognized over the term of the related franchise license for the respective restaurant, which we expect will result in a material impact to revenue recognized for initial franchise fees and renewal fees. The Company does not expect this new guidance to materially impact the recognition of royalty income. Additionally, rental income is outside the scope of this new guidance, and therefore will not be impacted.

The Company also expects the adoption of this new guidance to change the reporting of advertising fund contributions from franchisees and the related advertising fund expenditures, which are not currently included in the consolidated statements of operations. The Company expects the new guidance to require these advertising fund contributions and expenditures to be reported on a gross basis in the consolidated statements of operations. For the fiscal year ended December 31, 2016, franchisee contributions to the U.S. advertising funds were \$430.3 million, and therefore we expect this change to have a material impact to our total revenues and expenses. However, we expect such contributions and expenditures to be largely offsetting and therefore do not expect a significant impact on our reported net income.

Though the majority of the assessment phase is complete, the Company continues to evaluate the impact the adoption of this new guidance will have on these and other revenue transactions, in addition to the impact on accounting policies and related disclosures. Additionally, the Company is in the process of implementing new accounting systems, business processes, and internal controls related to revenue recognition to assist in the application of the new guidance.

(4) Debt

Securitized Financing Facility

In January 2015, DB Master Finance LLC (the “Master Issuer”), a limited-purpose, bankruptcy-remote, wholly-owned indirect subsidiary of DBGI, entered into a base indenture and a related supplemental indenture (collectively, the “Indenture”) under which the Master Issuer may issue multiple series of notes. On the same date, the Master Issuer issued Series 2015-1 3.262% Fixed Rate Senior Secured Notes, Class A-2-I (the “Class A-2-I Notes”) with an initial principal amount of \$750.0 million and Series 2015-1 3.980% Fixed Rate Senior Secured Notes, Class A-2-II (the “Class A-2-II Notes” and, together with the Class A-2-I Notes, the “Class A-2 Notes”) with an initial principal amount of \$1.75 billion. In addition, the Master Issuer also issued Series 2015-1 Variable Funding Senior Secured Notes, Class A-1 (the “Variable Funding Notes” and, together with the Class A-2 Notes, the “Notes”), which allow the Master Issuer to borrow up to \$100.0 million on a revolving basis. The Variable Funding Notes may also be used to issue letters of credit. The Notes were issued in a securitization transaction pursuant to which most of the Company’s domestic and certain of its foreign revenue-generating assets, consisting principally of franchise-related agreements, real estate assets, and intellectual property and license agreements for the use of intellectual property, are held by the Master Issuer and certain other limited-purpose, bankruptcy-remote, wholly-owned indirect subsidiaries of the Company that act as guarantors of the Notes and that have pledged substantially all of their assets to secure the Notes.

The legal final maturity date of the Class A-2 Notes is in February 2045, but it is anticipated that, unless earlier prepaid to the extent permitted under the Indenture, the Class A-2-I Notes will be repaid in February 2019 and the Class A-2-II Notes will be repaid in February 2022 (the “Anticipated Repayment Dates”). If the Class A-2 Notes have not been repaid or refinanced by their respective Anticipated Repayment Dates, a rapid amortization event will occur in which residual net cash flows of the Master Issuer, after making certain required payments, will be applied to the outstanding principal of the Class A-2 Notes. Various other events, including failure to maintain a minimum ratio of net cash flows to debt service (“DSCR”), may also cause a rapid amortization event. Borrowings under the Class A-2-I and Class A-2-II Notes bear interest at fixed rates equal to 3.262% and 3.980%, respectively. If the Class A-2 Notes are not repaid or refinanced prior to their respective Anticipated Repayment Dates, incremental interest will accrue. Principal payments are required to be made on the Class A-2-I and Class A-2-II Notes equal to \$7.5 million and \$17.5 million, respectively, per calendar year, payable in quarterly installments. No principal payments are required if a

specified leverage ratio, which is a measure of outstanding debt to earnings before interest, taxes, depreciation, and amortization, adjusted for certain items (as specified in the Indenture), is less than or equal to 5.0 to 1.0, though the Company intends to continue to make the scheduled principal payments. Other events and transactions, such as certain asset sales and receipt of various insurance or indemnification proceeds, may trigger additional mandatory prepayments.

Table of Contents

It is anticipated that the principal and interest on the Variable Funding Notes will be repaid in full on or prior to February 2020, subject to two additional one-year extensions. Borrowings under the Variable Funding Notes bear interest at a rate equal to a base rate, a LIBOR rate plus 2.25%, or the lenders' commercial paper funding rate plus 2.25%. If the Variable Funding Notes are not repaid prior to February 2020 or prior to the end of an extension period, if applicable, incremental interest will accrue. In addition, the Company is required to pay a 2.25% fee for letters of credit amounts outstanding and a commitment fee on the unused portion of the Variable Funding Notes which ranges from 0.50% to 1.00% based on utilization.

As of July 1, 2017, approximately \$733.1 million and \$1.71 billion of principal were outstanding on the Class A-2-I Notes and Class A-2-II Notes, respectively. Total debt issuance costs incurred and capitalized in connection with the issuance of the Notes were \$41.3 million. The effective interest rate, including the amortization of debt issuance costs, was 3.5% and 4.3% for the Class A-2-I Notes and Class A-2-II Notes, respectively, as of July 1, 2017.

As of July 1, 2017 and December 31, 2016, \$25.9 million of letters of credit were outstanding against the Variable Funding Notes, which relate primarily to interest reserves required under the Indenture. There were no amounts drawn down on these letters of credit as of July 1, 2017 or December 31, 2016.

The Notes are subject to a series of covenants and restrictions customary for transactions of this type, including (i) that the Master Issuer maintains specified reserve accounts to be used to make required payments in respect of the Notes, (ii) provisions relating to optional and mandatory prepayments, including mandatory prepayments in the event of a change of control as defined in the Indenture and the related payment of specified amounts, including specified make-whole payments in the case of the Class A-2 Notes under certain circumstances, (iii) certain indemnification payments in the event, among other things, the assets pledged as collateral for the Notes are in stated ways defective or ineffective, and (iv) covenants relating to recordkeeping, access to information, and similar matters. As noted above, the Notes are also subject to customary rapid amortization events provided for in the Indenture, including events tied to failure to maintain stated DSCR, failure to maintain an aggregate level of Dunkin' Donuts U.S. retail sales on certain measurement dates, certain manager termination events, an event of default, and the failure to repay or refinance the Class A-2 Notes on the applicable scheduled maturity date. The Notes are also subject to certain customary events of default, including events relating to non-payment of required interest, principal, or other amounts due on or with respect to the Notes, failure to comply with covenants within certain time frames, certain bankruptcy events, breaches of specified representations and warranties, failure of security interests to be effective, and certain judgments.

Other	28,585	22,756
Total other current liabilities	\$237,236	298,266

The decrease in the gift card/certificate liability was driven by the seasonality of our gift card program. The franchisee profit-sharing liability represents amounts owed to franchisees from the net profits primarily on the sale of Dunkin' K-Cup® pods and retail packaged coffee in certain retail outlets.

(6) Segment information

The Company is strategically aligned into two global brands, Dunkin' Donuts and Baskin-Robbins, which are further segregated between U.S. operations and international operations. As such, the Company has determined that it has four operating segments, which are its reportable segments: Dunkin' Donuts U.S., Dunkin' Donuts International,

Baskin-Robbins U.S., and Baskin-Robbins International. Dunkin' Donuts U.S., Baskin-Robbins U.S., and Dunkin' Donuts International primarily derive their revenues through royalty income and franchise fees. Baskin-Robbins U.S. also derives revenue through license fees from a third-party license agreement and rental income. Dunkin' Donuts U.S. also derives revenue through rental income. Prior to the sale of all remaining company-operated restaurants in the fourth quarter of fiscal year 2016, Dunkin'

Table of Contents

Donuts U.S. also derived revenue through retail sales at company-operated restaurants. Baskin-Robbins International primarily derives its revenues from sales of ice cream products, as well as royalty income, franchise fees, and license fees. The operating results of each segment are regularly reviewed and evaluated separately by the Company's senior management, which includes, but is not limited to, the chief executive officer. Senior management primarily evaluates the performance of its segments and allocates resources to them based on operating income adjusted for amortization of intangible assets, long-lived asset impairment charges, impairment of our equity method investments, and other infrequent or unusual charges, which does not reflect the allocation of any corporate charges. This profitability measure is referred to as segment profit. When senior management reviews a balance sheet, it is at a consolidated level. The accounting policies applicable to each segment are generally consistent with those used in the consolidated financial statements.

Revenues for all operating segments include only transactions with unaffiliated customers and include no intersegment revenues. Revenues reported as "Other" include revenues earned through certain licensing arrangements with third parties in which our brand names are used, including the licensing fees earned from the Dunkin' K-Cup® pod licensing agreement, revenues generated from online training programs for franchisees, and revenues from the sale of Dunkin' Donuts products in certain international markets, all of which are not allocated to a specific segment. (a) Treasury stock

During the three months ended July 1, 2017, the Company entered into and completed an accelerated share repurchase agreement (the "May 2017 ASR Agreement") with a third-party financial institution. Pursuant to the terms of the May 2017 ASR Agreement, the Company paid the financial institution \$100.0 million in cash and received 1,757,568 shares of the Company's common stock during the three months ended July 1, 2017 based on a weighted average cost per share of \$56.90 over the term of the May 2017 ASR Agreement.

The Company accounts for treasury stock under the cost method based on the cost of the shares on the dates of repurchase and any direct costs incurred. During the three months ended July 1, 2017, the Company retired the 1,757,568 shares of treasury stock repurchased under the May 2017 ASR Agreement. The repurchase and retirement of these shares of treasury stock resulted in a decrease in additional paid-in capital of \$14.6 million and an increase in accumulated deficit of \$85.4 million.

(b) Equity incentive plans

During the six months ended July 1, 2017, the Company granted stock options to purchase 1,172,348 shares of common stock and 78,660 restricted stock units ("RSUs") to certain employees and members of our board of directors. The stock options generally vest in equal annual amounts over a four-year period subsequent to the grant date, and have a maximum contractual term of seven years. The stock options were granted with a weighted average exercise price of \$55.05 per share and have a weighted average grant-date fair value of \$9.88 per share. The RSUs granted to employees and members of our board of directors vest in equal annual amounts over a three-year period and a one-year period, respectively, subsequent to the grant date and have a weighted average grant-date fair value of \$52.71

per share.

In addition, the Company granted 84,024 performance stock units (“PSUs”) to certain employees during the six months ended July 1, 2017. These PSUs are generally eligible to cliff-vest approximately three years from the grant date. Of the total PSUs granted, 36,712 PSUs are subject to a service condition and a market vesting condition linked to the level of total shareholder

Table of Contents

return received by the Company's shareholders during the performance period measured against the companies in the S&P 500 Composite Index ("TSR PSUs"). The remaining 47,312 PSUs granted are subject to a service condition and a performance vesting condition based on the level of adjusted operating income growth achieved over the performance period ("AOI PSUs"). The maximum vesting percentage that could be realized for each of the TSR PSUs and the AOI PSUs is 200% based on the level of performance achieved for the respective awards. All of the PSUs are also subject to a one-year post-vesting holding period. The TSR PSUs were valued based on a Monte Carlo simulation model to reflect the impact of the total shareholder return market condition, resulting in a weighted average grant-date fair value of \$67.59 per share. The probability of satisfying a market condition is considered in the estimation of the grant-date fair value for TSR PSUs and the compensation cost is not reversed if the market condition is not achieved, provided the requisite service has been provided. The AOI PSUs have a weighted average grant-date fair value of \$52.45 per share. Total compensation cost for the AOI PSUs is determined based on the most likely outcome of the performance condition and the number of awards expected to vest based on the outcome.

Total compensation expense related to all share-based awards was \$3.8 million and \$4.2 million for the three months ended July 1, 2017 and June 25, 2016, respectively, and \$7.2 million and \$8.3 million for the six months ended July 1, 2017 and June 25, 2016, respectively, and is included in general and administrative expenses, net in the consolidated statements of operations.

(c) Accumulated other comprehensive loss

The changes in the components of accumulated other comprehensive loss were as follows (in thousands):

	Effect of foreign currency translation	Unrealized gains on interest rate swaps	Other	Accumulated other comprehensive gain (loss)
Balance as of December 31, 2016	\$ (23,019)	1,144	(2,109)	(23,984)

(d) Dividends

The Company paid a quarterly dividend of \$0.3225 per share of common stock on June 14, 2017 and March 22, 2017, totaling approximately \$29.2 million and \$29.6 million, respectively. On July 27, 2017, the Company announced that its board of directors approved the next quarterly dividend of \$0.3225 per share of common stock payable September 6, 2017 to shareholders of record as of the close of business on August 28, 2017.

(8) Earnings per share

The computation of basic and diluted earnings per common share is as follows (in thousands, except for share and per share data):

	Three months ended		Six months ended

Earnings per common share:				
Common—basic	\$0.61	0.54	1.13	0.95
Common—diluted	0.60	0.54	1.11	0.94

The weighted average number of common shares in the common diluted earnings per share calculation includes the dilutive effect of 1,399,070 and 947,350 equity awards for the three months ended July 1, 2017 and June 25, 2016, respectively, and includes the dilutive effect of 1,431,371 and 940,387 equity awards for the six months ended July 1, 2017 and June 25, 2016, respectively, using the treasury stock method. The weighted average number of common shares in the common diluted earnings per share calculation for all periods excludes all contingently issuable equity awards for which the contingent vesting criteria were not yet met as of the fiscal period end. As of July 1, 2017 and

June 25, 2016, there were 150,000 restricted shares that were contingently issuable and for which the contingent vesting criteria were not yet met as of the fiscal period end. Additionally, the weighted average number of common shares in the common diluted earnings per share calculation excludes

Table of Contents

1,123,482 and 4,210,753 equity awards for the three months ended July 1, 2017 and June 25, 2016, respectively, and 1,629,480 and 4,361,416 equity awards for the six months ended July 1, 2017 and June 25, 2016, respectively, as they would be antidilutive.

(9) Commitments and contingencies

(a) Supply chain guarantees

The Company has various supply chain agreements that provide for purchase commitments, the majority of which result in the Company being contingently liable upon early termination of the agreement. As of July 1, 2017 and December 31, 2016, the Company was contingently liable under such supply chain agreements for approximately \$122.4 million and \$136.2 million, respectively. For certain supply chain commitments, as product is purchased by the Company's franchisees over the term of the agreement, the amount of the guarantee is reduced. The Company assesses the risk of performing under each of these guarantees on a quarterly basis, and, based on various factors including internal forecasts, prior history, and ability to extend contract terms, we accrued an immaterial amount of reserves related to supply chain commitments as of July 1, 2017 and December 31, 2016.

(b) Letters of credit

As of July 1, 2017 and December 31, 2016, the Company had standby letters of credit outstanding for a total of \$25.9 million. There were no amounts drawn down on these letters of credit.

(c) Legal matters

The Company is engaged in several matters of litigation arising in the ordinary course of its business as a franchisor. Such matters include disputes related to compliance with the terms of franchise and development agreements, including claims or threats of claims of breach of contract, negligence, and other alleged violations by the Company. As of July 1, 2017 and December 31, 2016, \$6.1 million and \$5.6 million, respectively, was included in other current liabilities in the consolidated balance sheets to reflect the Company's estimate of the probable losses which may be incurred in connection with all outstanding litigation.

(10) Related-party transactions

(a) Advertising funds

As of July 1, 2017 and December 31, 2016, the Company had a net payable of \$6.1 million and \$11.9 million, respectively, to the various advertising funds.

To cover administrative expenses of the advertising funds, the Company charges each advertising fund a management fee for items such as facilities, accounting services, information technology, data processing, product development, legal, administrative support services, and other operating expenses, as well as share-based compensation expense for employees that provide services directly to the advertising funds. Management fees totaled \$2.7 million and \$2.5 million for the three months ended July 1, 2017 and June 25, 2016, respectively, and \$5.6 million and \$4.8 million for the six months ended July 1, 2017 and June 25, 2016, respectively. Such management fees are included in the consolidated statements of operations as a reduction in general and administrative expenses, net.

The Company made discretionary contributions to certain advertising funds for the purpose of supplementing national and regional advertising in certain markets of \$2.3 million during the three and six months ended July 1, 2017. An immaterial amount of such contributions were made during the three and six months ended June 25, 2016. Additionally, the Company made contributions to the advertising funds based on retail sales at company-operated restaurants of \$233 thousand and \$514 thousand during the three and six months ended June 25, 2016, which are included in company-operated restaurant expenses in the consolidated statements of operations. No such contributions were made during the three and six months ended July 1, 2017, as the Company did not have any company-operated restaurants during these periods. The Company also funded advertising fund initiatives of \$630 thousand and \$495 thousand during the three months ended July 1, 2017 and June 25, 2016, respectively, and \$1.2 million and \$1.0 million during the six months ended July 1, 2017 and June 25, 2016, respectively, which were contributed from the gift card breakage liability included within other current liabilities in the consolidated balance sheets (see note 5).

As of July 1, 2017 and December 31, 2016, the Company had \$1.2 million and \$1.1 million, respectively, of royalties receivable from its equity method investees, which were recorded in accounts receivable, net of allowance for doubtful accounts, in the consolidated balance sheets.

The Company made net payments to its equity method investees totaling approximately \$742 thousand and \$805 thousand during the three months ended July 1, 2017 and June 25, 2016, respectively, and \$1.8 million and \$1.6 million during the six months ended July 1, 2017 and June 25, 2016, respectively, primarily for the purchase of ice cream products.

The Company recognized \$958 thousand and \$1.3 million during the three months ended July 1, 2017 and June 25, 2016, respectively, and \$2.0 million and \$1.7 million during the six months ended July 1, 2017 and June 25, 2016, respectively, in the consolidated statements of operations from the sale of ice cream and other products to Palm Oasis Ventures Pty. Ltd. ("Australia JV"). As of July 1, 2017 and December 31, 2016, the Company had \$3.0 million and \$2.6 million, respectively, of net receivables from the Australia JV, consisting of accounts and notes receivable, net of current liabilities.

Forward-Looking Statements

Certain statements contained herein are not based on historical fact and are "forward-looking statements" within the meaning of the applicable securities laws and regulations. Generally, these statements can be identified by the use of words such as "anticipate," "believe," "could," "estimate," "expect," "feel," "forecast," "intend," "may," "plan," "potential," "predict," or "would," and similar expressions intended to identify forward-looking statements, although not all forward-looking statements contain these identifying words. These forward-looking statements include all matters that are not historical facts.

By their nature, forward-looking statements involve risks and uncertainties because they relate to events and depend on circumstances that may or may not occur in the future. These risks and uncertainties include, but are not limited to: the ongoing level of profitability of franchisees and licensees; our franchisees' and licensees' ability to sustain same store sales growth; successful westward expansion; changes in working relationships with our franchisees and licensees and the actions of our franchisees and licensees; our master franchisees' relationships with sub-franchisees; the strength of our brand in the markets in which we compete; changes in competition within the quick service restaurant segment of the food industry; changes in consumer behavior resulting from changes in technologies or alternative methods of delivery; economic and political conditions in the countries where we operate; our substantial indebtedness; our ability to protect our intellectual property rights; consumer preferences, spending patterns and demographic trends; the impact of seasonal changes, including weather effects, on our business; the success of our growth strategy and international development; changes in commodity and food prices, particularly coffee, dairy products and sugar, and other operating costs; shortages of coffee; failure of our network and information technology systems; interruptions or shortages in the supply of products to our franchisees and licensees; the impact of food borne-illness or food safety issues or adverse public or media opinions regarding the health effects of consuming our products; our ability to collect royalty payments from our franchisees and licensees; uncertainties relating to litigation; the ability of our franchisees and licensees to open new restaurants and keep existing restaurants in operation; our ability to retain key personnel; any inability to protect consumer credit card data and catastrophic events.

Forward-looking statements reflect management's analysis as of the date of this quarterly report. Important factors that could cause actual results to differ materially from our expectations are more fully described in our other filings with the Securities and Exchange Commission, including under the section headed "Risk Factors" in our most recent annual report on Form 10-K. Except as required by applicable law, we do not undertake to publicly update or revise any of these forward-looking statements, whether as a result of new information, future events or otherwise.

Introduction and overview

We are one of the world's leading franchisors of quick service restaurants ("QSRs") serving hot and cold coffee and baked goods, as well as hard serve ice cream. We franchise restaurants under our Dunkin' Donuts and Baskin-Robbins brands. With more than 20,000 points of distribution in more than 60 countries worldwide, we believe that our portfolio has strong brand awareness in our key markets. QSR is a restaurant format characterized by counter or drive-thru ordering and limited or no table service. As of July 1, 2017, Dunkin' Donuts had 12,350 global points of distribution with restaurants in 41 U.S. states, the District of Columbia, and 45 foreign countries. Baskin-Robbins had 7,892 global points of distribution as of the same date, with restaurants in 43 U.S. states, the District of Columbia, Puerto Rico, and 51 foreign countries.

We are organized into four reporting segments: Dunkin' Donuts U.S., Dunkin' Donuts International, Baskin-Robbins U.S., and Baskin-Robbins International. We generate revenue from four primary sources: (i) royalty income and franchise fees associated with franchised restaurants, (ii) rental income from restaurant properties that we lease or sublease to franchisees, (iii) sales of ice cream and other products to franchisees in certain international markets, and (iv) other income including fees for the licensing of our brands for products sold in certain retail outlets, the licensing of the rights to manufacture Baskin-Robbins ice cream products sold to U.S. franchisees, refranchising gains, transfer fees from franchisees, and online training fees. Prior to completing the sale of all remaining company-operated restaurants in fiscal year 2016, we also generated revenue from retail store sales at our company-operated restaurants. Franchisees fund the vast majority of the cost of new restaurant development. As a result, we are able to grow our system with lower capital requirements than many of our competitors. With no company-operated points of

distribution during fiscal year 2017, we are less affected by store-level costs, profitability, and fluctuations in commodity costs than other QSR operators.

Our franchisees fund substantially all of the advertising that supports both brands. Those advertising funds also fund the cost of our marketing, research and development, and innovation personnel. Royalty payments and advertising fund contributions typically are made on a weekly basis for restaurants in the U.S., which limit our working capital needs. For the six months ended July 1, 2017, franchisee contributions to the U.S. advertising funds were \$216.3 million.

Table of Contents

We operate and report financial information on a 52- or 53-week year on a 13-week quarter basis with the fiscal year ending on the last Saturday in December and fiscal quarters ending on the 13th Saturday of each quarter (or 14th Saturday when applicable with respect to the fourth fiscal quarter). The data periods contained within the three- and six-month periods ended July 1, 2017 and June 25, 2016 reflect the results of operations for the 13-week and 26-week periods ended on those dates. Operating results for the three- and six-month periods ended July 1, 2017 are not necessarily indicative of the results that may be expected for the fiscal year ending December 30, 2017.

Our financial results are largely driven by changes in systemwide sales, which include sales by all points of distribution, whether owned by Dunkin' Brands or by our franchisees and licensees, including joint ventures. While we do not record sales by franchisees, licensees, or joint ventures as revenue, and such sales are not included in our consolidated financial statements, we believe that this operating measure is important in obtaining an understanding of our financial performance. We believe systemwide sales information aids in understanding how we derive royalty revenue and in evaluating our performance relative to competitors.

Comparable store sales growth (decline) for Dunkin' Donuts U.S. and Baskin-Robbins U.S. is calculated by including only sales from franchisee- and company-operated restaurants that have been open at least 78 weeks and that have reported sales in the current and comparable prior year week. Comparable store sales growth (decline) for Dunkin' Donuts International and Baskin-Robbins International generally represents the growth in local currency average monthly sales for franchisee-operated restaurants, including joint ventures, that have been open at least 13 months and that have reported sales in the current and comparable prior year month.

Overall growth in systemwide sales of 4.6% for each of the three- and six-month periods ended July 1, 2017 over the same periods in the prior fiscal year resulted from the following:

Dunkin' Donuts U.S. systemwide sales growth of 5.7% and 5.4% for the three and six months ended July 1, 2017 was primarily a result of 375 net new restaurants opened since June 25, 2016 and comparable store sales growth of 0.8% and 0.4%, respectively. The increases in comparable store sales were driven by increased average ticket, offset by a decline in traffic. Growth was primarily driven by sales of breakfast sandwiches. Beverage sales increased for the three months ended July 1, 2017, led by an increase in iced coffee as Cold Brew sales continue to grow, while beverage sales decreased for the six months ended July 1, 2017 due primarily to a decline in hot coffee, offset by an

increase in iced coffee, driven by Cold Brew sales.

Dunkin' Donuts International systemwide sales declined 3.2% for the three months ended July 1, 2017, driven primarily by sales declines in South Korea, Southeast Asia, and Europe, offset by sales growth in South America, the Middle East, and China. Systemwide sales grew 0.5% for the six months ended July 1, 2017, driven primarily by sales

growth in the Middle East, South America, and China, offset by a decline in South Korea. For both the three- and six-month periods, sales in South Korea were positively impacted by foreign exchange rates, while sales in Southeast Asia were negatively impacted by foreign exchange rates. Additionally, sales in South America for the six months ended July 1, 2017 were positively impacted by foreign exchange rates. On a constant currency basis, systemwide sales decreased by approximately 3% for the three months ended July 1, 2017, while systemwide sales remained flat for the six months ended July 1, 2017. Dunkin' Donuts International comparable store sales declined 2.8% and 1.3% for the three and six months ended July 1, 2017, respectively, due primarily to declines in South Korea, Europe, and the Middle East, offset by growth in South America. Additionally, declines in Southeast Asia contributed to the comparable store sales decline for the three-month period, while growth in Southeast Asia offset the comparable store sales decline for the six-month period.

Baskin-Robbins U.S. systemwide sales growth of 2.5% and 1.2% for the three and six months ended July 1, 2017, respectively, was primarily a result of 21 net new restaurants opened since June 25, 2016. Offsetting the systemwide sales growth were comparable store sales declines of 0.9% and 1.4% for the three and six months ended, respectively, driven by a decline in traffic, offset by increased average ticket. Sales of cups and cones, desserts, and beverages decreased, offset by increased sales in take-home products for the three months ended July 1, 2017. Sales of beverages, soft serve, and sundaes decreased, offset by increased sales in take-home products for the six months ended July 1, 2017.

Baskin-Robbins International systemwide sales growth of 3.0% and 3.8% for the three and six months ended July 1, 2017, respectively, was driven by sales growth in South Korea and Japan, offset by declines in Europe and the Middle East. Also contributing to the systemwide sales growth for the six months ended July 1, 2017 was an increase in sales in Canada, offset by a decline in China. Sales in South Korea were positively impacted by foreign exchange rates, while sales in Japan were negatively impacted by foreign exchange rates. On a constant currency basis, systemwide sales increased by approximately 3% for each of the three- and six-month periods ended July 1, 2017. Baskin-Robbins International comparable store sales growth of 3.3% and 0.9% for the three and six months ended July 1, 2017 was driven primarily by growth in South Korea and Japan, offset by declines in the Middle East.

Changes in systemwide sales are impacted, in part, by changes in the number of points of distribution. Points of distribution and net openings as of and for the three and six months ended July 1, 2017 and June 25, 2016 were as follows:

	July 1, 2017		June 25, 2016	
Points of distribution, at period end:				
Dunkin' Donuts U.S.	8,948		8,573	
Dunkin' Donuts International	3,402		3,368	
Baskin-Robbins U.S.	2,551		2,530	
Baskin-Robbins International	5,341		5,198	
Consolidated global points of distribution	20,242		19,669	
	Three months ended July 1, 2017		Six months ended June 25, 2016	
Net openings (closings) during the period:				
Dunkin' Donuts U.S.	64	73	120	142
Dunkin' Donuts International	(1)	35	(28)	49
Baskin-Robbins U.S.	12	12	13	1
Baskin-Robbins International	58	78	57	120
Consolidated global net openings	133	198	162	312

Total revenues increased \$2.2 million, or 1.0%, and \$3.1 million, or 0.8%, for the three and six months ended July 1, 2017, respectively, due primarily to increased royalty income as a result of systemwide sales growth, as well as an increase in rental income due to an increase in the number of leases for franchised locations. These increases in

revenues were offset by a decrease in sales at company-operated restaurants as there were no company-operated points of distribution during 2017. Also offsetting the increases in revenues was a decrease in other revenues due primarily to decreases in transfer fees and refranchising gains, as well as a decrease in sales of ice cream and other products due to a decline in sales of ice cream and other products to the Middle East.

Operating income and adjusted operating income for the three months ended July 1, 2017 increased \$7.4 million, or 7.0%, and \$7.6 million, or 6.9%, respectively, from the prior year period. Operating income and adjusted operating income for the six months ended July 1, 2017 increased \$13.4 million, or 7.0%, and \$13.1 million, or 6.5%, respectively, from the prior year period. The increases were primarily a result of the increase in royalty income, an increase in rental margin, and a decrease in general and administrative expenses. Additionally, the prior year periods were unfavorably impacted by the operating results of company-operated restaurants. The increases in operating income and adjusted operating income were offset by a gain recognized in connection with the sale of company-operated restaurants in the prior year periods, as well as the decrease in other revenues.

Net income and adjusted net income for the three months ended July 1, 2017 increased \$6.1 million, or 12.3%, and \$6.3 million, or 11.9%, respectively, primarily as a result of the increases in operating income and adjusted operating income, offset by an increase in tax expense.

Net income and adjusted net income for the six months ended July 1, 2017 increased \$16.4 million, or 18.9%, and \$16.3 million, or 17.4%, respectively, primarily as a result of the increases in operating income and adjusted operating income, as well as a decrease in tax expense. Tax expense for the six months ended July 1, 2017 included \$6.8 million of excess tax benefits from share-based compensation, which are now included in the provision for income taxes as a result of the required adoption of a new accounting standard in the first quarter (see note 2(f) to the unaudited consolidated financial statements included herein).

Adjusted operating income and adjusted net income are non-GAAP measures reflecting operating income and net income adjusted for amortization of intangible assets, long-lived asset impairments, impairment of our equity method investments, and other non-recurring, infrequent, or unusual charges, net of the tax impact of such adjustments in the case of adjusted net income. We use adjusted operating income and adjusted net income as key performance measures for the purpose of evaluating performance internally. We also believe adjusted operating income and adjusted net income provide our investors with useful information regarding our historical operating results. These non-GAAP measurements are not intended to replace the presentation of our financial results in accordance with GAAP. Use of the terms adjusted operating income and adjusted net income may differ from similar measures reported by other companies.

Adjusted operating income and adjusted net income are reconciled from operating income and net income, respectively, determined under GAAP as follows:

Earnings per share

Earnings per share and diluted adjusted earnings per share were as follows:

	Three months ended		Six months ended	
	July 1, 2017	June 25, 2016	July 1, 2017	June 25, 2016

Common—diluted	0.60	0.54	1.11	0.94
Diluted adjusted earnings per share	0.64	0.57	1.18	1.01

Diluted adjusted earnings per share is calculated using adjusted net income, as defined above, and diluted weighted average shares outstanding. Diluted adjusted earnings per share is not a presentation made in accordance with GAAP, and our use of the term diluted adjusted earnings per share may vary from similar measures reported by others in our industry due to the potential differences in the method of calculation. Diluted adjusted earnings per share should not be considered as an alternative to earnings per share derived in accordance with GAAP. Diluted adjusted earnings per share has important limitations as an analytical tool and should not be considered in isolation or as a substitute for analysis of our results as reported under GAAP. Because of these limitations, we rely primarily on our GAAP results. However, we believe that presenting diluted adjusted earnings per share is appropriate to provide investors with useful information regarding our historical operating results.

The following table sets forth the computation of diluted adjusted earnings per share:

Total revenues	\$218,522	216,309	2,213	1.0	%	\$409,194	406,085	3,109	0.8	%

Total revenues for the three and six months ended July 1, 2017 increased \$2.2 million, or 1.0%, and \$3.1 million, or 0.8%, respectively. The increases were due primarily to an increase in franchise fees and royalty income driven by Dunkin' Donuts U.S. systemwide sales growth, as well as an increase in rental income due to an increase in the number of leases for franchised locations. These increases in revenues were offset by a decrease in sales at company-operated restaurants as there were no company-operated points of distribution during 2017. Also offsetting the increases in revenues was a decrease in other revenues due primarily to decreases in transfer fees and refranchising gains, as well as a decrease in sales of ice cream and other products due to a decline in sales of ice cream products to our licensees in the Middle East.

Operating income	\$ 113,550	106,141	7,409	7.0	%	\$ 204,843	191,474	13,369	7.0	%

Occupancy expenses for franchised restaurants for the three and six months ended July 1, 2017 increased \$0.7 million and \$1.6 million, respectively, due primarily to an increase in the number of leases for franchised locations.

Net margin on ice cream and other products for the three and six months ended July 1, 2017 decreased \$0.5 million, or 4.3%, and \$0.8 million, or 3.8%, respectively, due primarily to a decline in sales.

Company-operated restaurant expenses for the three and six months ended July 1, 2017 decreased \$5.3 million and \$11.8 million, respectively, as all remaining company-operated points of distribution were sold by the end of fiscal 2016.

General and administrative expenses for the three and six months ended July 1, 2017 decreased \$1.1 million and \$1.0 million, respectively, due primarily to decreases in professional fees and other general expenses. These decreases in general and administrative expenses were offset by costs incurred during the three months ended July 1, 2017 to support brand-building activities, as well as an increase in personnel costs.

Depreciation and amortization for the three and six months ended July 1, 2017 decreased \$0.3 million and \$0.8 million, respectively, due primarily to certain intangible assets becoming fully amortized and favorable lease intangible assets being written-off upon termination of the related leases.

Long-lived asset impairment charges for the three and six months ended July 1, 2017 increased slightly from the prior year periods, as such charges generally fluctuate based on the timing of lease terminations and the related write-off of favorable lease intangible assets and leasehold improvements.

Net income of equity method investments for the three and six months ended July 1, 2017 increased \$0.6 million and \$0.5 million, respectively, primarily as a result of an increase in net income from our Japan joint venture.

Other operating income, net, which includes gains recognized in connection with the sale of real estate, fluctuates based on the timing of such transactions. Other operating income, net, for the three and six months ended June 25, 2016 includes a \$2.1 million gain recognized in connection with the sale of twelve company-operated points of distribution.

The decrease in net interest expense of \$0.4 million and \$0.6 million for the three and six months ended July 1, 2017, respectively, was driven primarily by an increase in interest income earned on our cash balances, as well as a decrease in interest expense due to a lower principal balance as a result of principal payments made on our long-term debt since the prior year periods, offset by an increase in amortization of capitalized debt issuance costs.

The fluctuation in other losses (income), net, for the three and six months ended July 1, 2017 resulted primarily from net foreign exchange gains and losses driven primarily by fluctuations in the U.S. dollar against foreign currencies.

Effective tax rate	37.5 %	38.9 %	33.9 %	38.7 %

The decrease in the effective tax rate for the three and six months ended July 1, 2017 was driven by \$0.7 million and \$6.8 million, respectively, of excess tax benefits from share-based compensation, which are now included in the provision for income taxes as a result of the required adoption of a new accounting standard (see note 2(f) to the unaudited consolidated financial statements included herein).

Operating segments

We operate four reportable operating segments: Dunkin' Donuts U.S., Dunkin' Donuts International, Baskin-Robbins U.S., and Baskin-Robbins International. We evaluate the performance of our segments and allocate resources to them based on operating income adjusted for amortization of intangible assets, long-lived asset impairment charges, and other infrequent or unusual charges, which does not reflect the allocation of any corporate charges. This profitability measure is referred to as segment profit. Segment profit for the Dunkin' Donuts International and Baskin-Robbins International segments includes net income of equity method investments, except for the other-than-temporary impairment charges and the related reduction in depreciation, net of tax, on the underlying long-lived assets. For reconciliations to total revenues and income before income taxes, see note 6 to the unaudited consolidated financial statements included herein. Revenues for all segments include only transactions with unaffiliated customers and include no intersegment revenues. Revenues not included in segment revenues include revenue earned through certain licensing arrangements with third parties in which our brand names are used, revenue generated from online training programs for franchisees, and revenues from the sale of Dunkin' Donuts products in certain international markets, all of which are not allocated to a specific segment.

Dunkin' Donuts U.S. revenues increased \$3.4 million and \$6.6 million for the three and six months ended July 1, 2017, respectively, due primarily to increases in royalty income driven by systemwide sales growth, as well as an increase in rental income driven by an increase in the number of leases for franchised locations. Additionally, franchise fees increased due primarily to an increase in renewal income, offset by a decrease in gross openings. The increases in revenues were offset by a decline in sales at company-operated restaurants as there were no company-operated points of distribution during 2017, as well as a decrease in other revenues driven by transfer fees and refranchising gains in the prior year periods.

Dunkin' Donuts U.S. segment profit increased \$6.5 million and \$14.0 million for the three and six months ended July 1, 2017, respectively, driven primarily by increases in royalty income, franchise fees, and rental margin. Additionally, prior year periods were unfavorably impacted by the operating results of company-operated restaurants. The increases in segment profit were offset by a gain recognized in connection with the sale of company-operated restaurants during the three months ended June 25, 2016, as well as a gain recognized in connection with the sale of real estate during the six months ended June 25, 2016.

Dunkin' Donuts International revenues for the three and six months ended July 1, 2017 decreased by \$0.7 million and \$2.7 million, respectively, primarily as a result of a decline in franchise fees, as well as a decrease in other revenues due to a decrease in transfer fees. The decline in franchise fees for the six-month period was due primarily to a significant market development fee recognized upon entry into a new market in the prior year period.

Segment profit for Dunkin' Donuts International for the three and six months ended July 1, 2017 decreased \$0.5 million and \$2.4 million, respectively, primarily as a result of the decreases in revenues, as well as decreases in net income from our South Korea joint venture, offset by decreases in general and administrative expenses.

Baskin-Robbins U.S. revenues for each of the three- and six-month periods ended July 1, 2017 increased \$0.6 million from the prior year periods due primarily to increases in royalty income and increases in sales of ice cream and other products. Offsetting the increase in revenues for the six months ended July 1, 2017 were decreases in other revenues and franchise fees.

Baskin-Robbins U.S. segment profit for the three and six months ended July 1, 2017 increased \$0.2 million and \$0.3 million, respectively, due primarily to the increases in revenues, offset by increases in cost of ice cream and other products and general and administrative expenses.

Baskin-Robbins International revenues for the three and six months ended July 1, 2017 decreased \$0.9 million and \$1.6 million, respectively, due primarily to decreases in sales of ice cream products to our licensees in the Middle East.

Baskin-Robbins International segment profit for the three and six months ended July 1, 2017 increased \$1.4 million and \$1.0 million, respectively, primarily as a result of increases in net income from our Japan and South Korea joint ventures, as well as decreases in general and administrative expenses. Also offsetting the segment profit increase for the six-month period was a decrease in net margin on ice cream and other products driven by the decrease in sales.

Liquidity and capital resources

As of July 1, 2017, we held \$264.7 million of cash and cash equivalents and \$75.0 million of short-term restricted cash that was restricted under our securitized financing facility. Included in cash and cash equivalents is \$123.7 million of cash held for advertising funds and reserved for gift card/certificate programs. Cash reserved for gift card/certificate programs also includes cash that will be used to fund initiatives from the gift card breakage liabilities (see note 5 to the unaudited consolidated financial statements included herein). In addition, as of July 1, 2017, we had a borrowing capacity of \$74.1 million under our \$100.0 million Variable Funding Notes (as defined below). As a result of the adoption of new accounting standards during fiscal year 2017 that impacted the consolidated statements of cash flows (see note 2(f) to the unaudited consolidated financial statements included herein), the

“Operating, investing, and

26

Table of Contents

financing cash flows” and “Adjusted operating and investing cash flow” sections below have been revised to reflect these changes for all periods presented.

Operating, investing, and financing cash flows

Net cash provided by operating activities was \$64.0 million for the six months ended July 1, 2017, as compared to \$82.1 million in the prior year period. The \$18.2 million decrease in operating cash flows was driven primarily by unfavorable cash flows related to our gift card program due primarily to the timing of holidays and our prior year fiscal year end, as well as the timing of receipts and payments related to the sale of Dunkin’ K-Cup® pods and the related franchisee profit-sharing program. Additionally, other changes in working capital contributed to the decrease in operating cash flows. Offsetting these decreases were an increase in pre-tax net income related to operating activities, excluding non-cash items, and payments made in connection with the settlement of the Bertico litigation in the prior year period.

Net cash used in investing activities was \$3.7 million for the six months ended July 1, 2017, as compared to \$220 thousand in the prior year period. The \$3.5 million decrease in investing cash flows was driven primarily by a decrease in proceeds received from the sale of real estate and company-operated restaurants of \$7.4 million, offset by a reduction in capital expenditures of \$3.2 million.

Net cash used in financing activities was \$152.2 million for the six months ended July 1, 2017, as compared to \$94.0 million in the prior year period. The \$58.2 million decrease in financing cash flows was driven primarily by incremental cash used in the current year period for repurchases of common stock of \$70.0 million, as well as additional cash used to pay the increased quarterly dividend of \$4.0 million, offset by incremental cash generated from the exercise of stock options in the current year period of \$16.0 million.

Adjusted operating and investing cash flow

Net cash flows from operating activities for the six months ended July 1, 2017 and June 25, 2016 include decreases of \$54.2 million and \$25.5 million, respectively, in cash held for advertising funds and reserved for gift card/certificate programs, which were primarily driven by the seasonality of our gift card program. Excluding cash held for advertising funds and reserved for gift card/certificate programs, we generated \$114.4 million and \$107.4 million of adjusted operating and investing cash flow during the six months ended July 1, 2017 and June 25, 2016, respectively. The increase in adjusted operating and investing cash flow was due primarily to an increase in pre-tax net income related to operating activities, excluding non-cash items, payments made in connection with the settlement of the Bertico litigation in the prior year period, and a reduction in capital expenditures. Offsetting these increases were the timing of receipts and payments related to the sale of Dunkin’ K-Cup® pods and the related franchisee profit-sharing program, a decrease in proceeds from the sale of real estate and company-operated restaurants, and other changes in working capital.

Adjusted operating and investing cash flow is a non-GAAP measure reflecting net cash provided by operating and investing activities, excluding the cash flows related to advertising funds and gift card/certificate programs. We use adjusted operating and investing cash flow as a key liquidity measure for the purpose of evaluating our ability to generate cash. We also believe adjusted operating and investing cash flow provides our investors with useful information regarding our historical cash flow results. This non-GAAP measurement is not intended to replace the presentation of our financial results in accordance with GAAP, and adjusted operating and investing cash flow does not represent residual cash flows available for discretionary expenditures. Use of the term adjusted operating and investing cash flow may differ from similar measures reported by other companies.

Adjusted operating and investing cash flow is reconciled from net cash provided by operating activities determined under GAAP as follows (in thousands):

	Six months ended July 1, 2017	June 25, 2016

Borrowing capacity

Our securitized financing facility included original aggregate borrowings of approximately \$2.60 billion, consisting of \$2.50 billion Class A-2 Notes (as defined below) and \$100.0 million of Variable Funding Notes (as defined below) which were

Table of Contents

undrawn at closing. As of July 1, 2017, there was approximately \$2.44 billion of total principal outstanding on the Class A-2 Notes, while there was \$74.1 million in available commitments under the Variable Funding Notes as \$25.9 million of letters of credit were outstanding.

On January 26, 2015, DB Master Finance LLC (the “Master Issuer”), a limited-purpose, bankruptcy-remote, wholly-owned indirect subsidiary of Dunkin’ Brands Group, Inc. (“DBGI”), entered into a base indenture and a related supplemental indenture (collectively, the “Indenture”) under which the Master Issuer may issue multiple series of notes. On the same date, the Master Issuer issued Series 2015-1 3.262% Fixed Rate Senior Secured Notes, Class A-2-I (the “Class A-2-I Notes”) with an initial principal amount of \$750.0 million and Series 2015-1 3.980% Fixed Rate Senior Secured Notes, Class A-2-II (the “Class A-2-II Notes” and, together with the Class A-2-I Notes, the “Class A-2 Notes”) with an initial principal amount of \$1.75 billion. In addition, the Master Issuer also issued Series 2015-1 Variable Funding Senior Secured Notes, Class A-1 (the “Variable Funding Notes” and, together with the Class A-2 Notes, the “Notes”), which allow the Master Issuer to borrow up to \$100.0 million on a revolving basis. The Variable Funding Notes may also be used to issue letters of credit. The Notes were issued in a securitization transaction pursuant to which most of the Company’s domestic and certain of its foreign revenue-generating assets, consisting principally of franchise-related agreements, real estate assets, and intellectual property and license agreements for the use of intellectual property, are held by the Master Issuer and certain other limited-purpose, bankruptcy-remote, wholly-owned indirect subsidiaries of the Company that act as guarantors of the Notes and that have pledged substantially all of their assets to secure the Notes.

The legal final maturity date of the Class A-2 Notes is in February 2045, but it is anticipated that, unless earlier prepaid to the extent permitted under the Indenture, the Class A-2-I Notes will be repaid in February 2019 and the Class A-2-II Notes will be repaid in February 2022 (the “Anticipated Repayment Dates”). Principal amortization repayments, payable quarterly, are required on the Class A-2-I Notes and Class A-2-II Notes equal to \$7.5 million and \$17.5 million, respectively, per calendar year through the respective Anticipated Repayment Dates. No principal payments are required if a specified leverage ratio, which is a measure of outstanding debt to earnings before interest, taxes, depreciation, and amortization, adjusted for certain items (as specified in the Indenture), is less than or equal to 5.0 to 1.0, though the Company intends to continue to make the scheduled principal payments. If the Class A-2 Notes have not been repaid or refinanced by their respective Anticipated Repayment Dates, a rapid amortization event will occur in which residual net cash flows of the Master Issuer, after making certain required payments, will be applied to the outstanding principal of the Class A-2 Notes. Various other events, including failure to maintain a minimum ratio of net cash flows to debt service, may also cause a rapid amortization event.

It is anticipated that the principal and interest on the Variable Funding Notes will be repaid in full on or prior to February 2020, subject to two additional one-year extensions.

In order to assess our current debt levels, including servicing our long-term debt, and our ability to take on additional borrowings, we monitor a leverage ratio of our long-term debt, net of cash (“Net Debt”), to adjusted earnings before interest, taxes, depreciation, and amortization (“Adjusted EBITDA”). This leverage ratio, and the related Net Debt and Adjusted EBITDA measures used to compute it, are non-GAAP measures, and our use of the terms Net Debt and Adjusted EBITDA may vary from other companies, including those in our industry, due to the potential inconsistencies in the method of calculation and differences due to items subject to interpretation. Net Debt reflects the gross principal amount outstanding under our securitized financing facility and capital lease obligations, less short-term cash, cash equivalents, and restricted cash, excluding cash reserved for gift card/certificate programs. Adjusted EBITDA is defined in our securitized financing facility as net income before interest, taxes, depreciation and amortization, and impairment charges, as adjusted for certain items that are summarized in the table below. Net Debt should not be considered as an alternative to debt, total liabilities, or any other obligations derived in accordance with GAAP. Adjusted EBITDA should not be considered as an alternative to net income, operating income, or any other performance measures derived in accordance with GAAP, as a measure of operating performance, or as an alternative to cash flows as a measure of liquidity. Net Debt, Adjusted EBITDA, and the related leverage ratio have important limitations as analytical tools and should not be considered in isolation or as a substitute for analysis of our results as reported under GAAP. However, we believe that presenting Net Debt, Adjusted EBITDA, and the related leverage ratio are appropriate to provide additional information to investors to demonstrate our current debt levels and ability to

take on additional borrowings.

As of July 1, 2017, we had a Net Debt to Adjusted EBITDA ratio of 4.6 to 1.0. The following is a reconciliation of our Net Debt and Adjusted EBITDA to the corresponding GAAP measures as of and for the twelve months ended July 1, 2017, respectively (in thousands):

^(a) Represents costs and fees associated with various franchisee-related investments, bank fees, legal reserves, the allocation of share-based compensation expense to the advertising funds, and other non-cash gains and losses.

Based upon our current level of operations and anticipated growth, we believe that the cash generated from our operations and amounts available under our Variable Funding Notes will be adequate to meet our anticipated debt service requirements, capital expenditures, and working capital needs for at least the next twelve months. We believe that we will be able to meet these obligations even if we experience no growth in sales or profits. There can be no assurance, however, that our business will generate sufficient cash flows from operations or that future borrowings will be available under our Variable Funding Notes or otherwise to enable us to service our indebtedness, including our securitized financing facility, or to make anticipated capital expenditures. Our future operating performance and our ability to service, extend, or refinance the securitized financing facility will be subject to future economic conditions and to financial, business, and other factors, many of which are beyond our control.

Recently Issued Accounting Standards

See note 2(f) to the unaudited consolidated financial statements included in Item 1 of Part I of this 10-Q, for a detailed description of recent accounting pronouncements.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

There have been no material changes in the foreign exchange or interest rate risks discussed in Part II, Item 7A “Quantitative and Qualitative Disclosures about Market Risk” included in our Annual Report on Form 10-K for the fiscal year ended December 31, 2016.

Item 4. Controls and Procedures

Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures as of July 1, 2017. The term “disclosure controls and procedures,” as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (“Exchange Act”), means controls and other procedures of a company that are designed to ensure that information

required to be disclosed by a company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to

Table of Contents

ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the company's management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure. Management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives and management necessarily applies its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Based on the evaluation of our disclosure controls and procedures as of July 1, 2017, our Chief Executive Officer and Chief Financial Officer concluded that, as of such date, our disclosure controls and procedures were effective.

During the quarterly period ended July 1, 2017, there were no changes in the Company's internal controls over financial reporting that have materially affected or are reasonably likely to materially affect the Company's internal control over financial reporting.

Part II. Other Information

Item 1. Legal Proceedings

We are engaged in several matters of litigation arising in the ordinary course of our business as a franchisor. Such matters include disputes related to compliance with the terms of franchise and development agreements, including claims or threats of claims of breach of contract, negligence, and other alleged violations by us. As of July 1, 2017, \$6.1 million is recorded within other current liabilities in the consolidated balance sheets in connection with all outstanding litigation.

Item 1A. Risk Factors.

There have been no material changes from the risk factors disclosed in Part I, Item 1A “Risk Factors” included in our Annual Report on Form 10-K for the fiscal year ended December 31, 2016.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The following table contains information regarding purchases of our common stock made during the quarter ended July 1, 2017 by or on behalf of Dunkin’ Brands Group, Inc. or any “affiliated purchaser,” as defined by Rule 10b-18(a)(3) of the Securities Exchange Act of 1934:

- (1) On May 10, 2017, our board of directors increased the availability under the existing share repurchase program to \$250.0 million of outstanding shares of our common stock. This repurchase authorization expires two years from the date of such increase. Under the program, purchases may be made in the open market or in privately negotiated transactions from time to time subject to market conditions.

During the three months ended July 1, 2017, the Company entered into and completed an accelerated share repurchase agreement (the “May 2017 ASR Agreement”) with a third-party financial institution. Pursuant to the terms of the May 2017 ASR Agreement, the Company paid the financial institution \$100.0 million in cash and received 1,757,568 shares of the Company’s common stock during the three months ended July 1, 2017 based on a weighted average cost per share of \$56.90 over the term of the May 2017 ASR Agreement.
