Forward-Looking Statements

This report on Form 10-Q contains, and our officers and representatives may from time to time make, "forward-looking statements" within the meaning of the safe harbor provisions of the U.S. Private Securities Litigation Reform Act of 1995. Forward-looking statements can be identified by words such as: "anticipate," "intend," "plan," "goal," "seek," "believe," "project," "estimate," "expect," "continuing," "ongoing," "strategy," "future," "likely," "may," "should," "could," "will" and similar references to future periods. Examples of forward-looking statements include, among others, statements we make regarding expected operating results, such as anticipated revenue; anticipated levels of capital expenditures for our current fiscal year; our belief that we have sufficient liquidity to fund our business operations during the next 12 months; strategy for gaining customers, growth, product development, market position, financial results and reserves.

Forward-looking statements are neither historical facts nor assurances of future performance. Instead, they are based only on our current beliefs, expectations and assumptions regarding the future of our business, future plans and strategies, projections, anticipated events and trends, the economy and other future conditions. Because forward-looking statements relate to the future, they are subject to inherent uncertainties, risks and changes in circumstances that are difficult to predict and many of which are outside of our control. Our actual results and financial condition may differ materially from those indicated in the forward-looking statements. Therefore, you should not rely on any of these forward-looking statements. Important factors that could cause our actual results and financial condition to differ materially from those indicated in the forward-looking statements include, among others, the following: lack of available funding; general economic and business conditions; competition from third parties; intellectual property rights of third parties; regulatory constraints; changes in technology and methods of marketing; delays in completing various engineering and manufacturing programs; changes in customer order patterns; changes in product mix; success in technological advances and delivering technological innovations; shortages in components; production delays due to performance quality issues with outsourced components; those events and factors described by us in Item 1.A "Risk Factors" in our most recent Annual Report on Form 10-K; other risks to which our Company is subject; other factors beyond the Company's control.

LIGHTWAVE LOGIC, INC.

NOTES TO FINANCIAL STATEMENTS

SEPTEMBER 30, 2016 AND 2015

NOTE 1- NATURE OF BUSINESS AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Financial Statements

The accompanying unaudited financial statements have been prepared by Lightwave Logic, Inc. (the Company). These statements include all adjustments (consisting only of its normal recurring adjustments) which management believes necessary for a fair presentation of the statements and have been prepared on a consistent basis using the accounting policies described in the Summary of Accounting Policies included in the 2015 Annual Report. Certain financial information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States have been condensed or omitted pursuant to the rules and regulations of the Securities and Exchange Commission, although the Company firmly believes that the accompanying disclosures are adequate to make the information presented not misleading. The financial statements should be read in conjunction with the financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2015, as filed with the Securities and Exchange Commission. The interim operating results for the three and nine months ending September 30, 2016 may not be indicative of operating results expected for the full year.

Nature of Business

Lightwave Logic, Inc. is a technology company focused on the development of next generation photonic devices and non-linear optical polymer materials systems for applications in high speed fiber-optic data communications and optical computing markets. Currently the Company is in various stages of photonic device and materials development and evaluation with potential customers and strategic partners. The Company expects to obtain a revenue stream from dotcom and telecom devices, sales of non-linear optical polymers, and product development agreements prior to moving into full-scale production.

The Company's current development activities are subject to significant risks and uncertainties, including failing to secure additional funding to operationalize the Company's technology now under development.

Stock-based Payments

The Company accounts for stock-based compensation under the provisions of Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 718, "Compensation - Stock Compensation" which requires the measurement and recognition of compensation expense for all stock-based awards made to employees and directors based on estimated fair values on the grant date. The Company estimates the fair value of stock-based awards on the date of grant using the Black-Scholes model. The value of the portion of the award that is ultimately expected to vest is recognized as expense over the shorter of the vesting period or the requisite service periods using the straightline method. The Company accounts for stock-based compensation awards to nonemployees in accordance with FASB ASC 505-50, "Equity-Based Payments to Non-Employees ("ASC 505-50"). Under ASC 505-50, the Company determines the fair value of the warrants or stock-based compensation awards granted as either the fair value of the consideration received or the fair value of the equity instruments issued, whichever is more reliably measurable. All issuances of stock options or other equity instruments to non-employees as consideration for goods or services received by the Company are accounted for based on the fair value of the equity instruments issued. Any stock options issued to non-employees are recorded as an expense and additional paid in capital in stockholders' equity over the applicable service periods. Non-employee equity based payments are recorded as an expense over the service period, as if the Company had paid cash for the services. At the end of each financial reporting period, prior to vesting or prior to the completion of the services, the fair value of the equity based payments will be re-measured and the non-cash expense recognized during the period will be adjusted accordingly. Since the fair value of equity based payments granted to non-employees is subject to change in the future, the amount of the future expense will include fair value re-measurements until the equity based payments are fully vested or the service completed.

LIGHTWAVE LOGIC, INC.

NOTES TO FINANCIAL STATEMENTS

SEPTEMBER 30, 2016 AND 2015

**NOTE 1- NATURE OF BUSINESS AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES
(CONTINUED)**

Loss per Share

The Company follows FASB ASC 260, "Earnings per Share", resulting in the presentation of basic and diluted earnings per share. Because the Company reported a net loss in 2016 and 2015, common stock equivalents, including stock options and warrants were anti-dilutive; therefore, the amounts reported for basic and dilutive loss per share were the same.

Comprehensive Income

The Company follows FASB ASC 220.10, "Reporting Comprehensive Income." Comprehensive income is a more inclusive financial reporting methodology that includes disclosure of certain financial information that historically has not been recognized in the calculation of net income. Since the Company has no items of other comprehensive income, comprehensive income (loss) is equal to net income (loss).

Recently Issued Accounting Pronouncements Not Yet Adopted

As of September 30, 2016, there are no recently issued accounting standards not yet adopted which would have a material effect on the Company's financial statements through 2017.

Recently Adopted Accounting Pronouncements

As of September 30, 2016 and for the period then ended, there were no recently adopted accounting pronouncements that had a material effect on the Company's financial statements.

NOTE 2 – MANAGEMENT'S PLANS

As a technology company focusing on the development of the next generation photonic devices and non-linear optical polymer materials systems, substantial net losses have been incurred since inception. The Company has satisfied capital requirements since inception primarily through the issuance and sale of its common stock. The Company currently has a cash position of approximately \$2,225,000. Based upon the current cash position and expenditures of approximately \$300,000 per month and no debt service, management believes the Company has sufficient funds currently to finance its operations through June 2017. In January 2016, the Company signed a Purchase Agreement with an institutional investor to sell up to \$20,000,000 of common stock. A Registration Statement related to the transaction with the U.S. Securities and Exchange Commission registering 5,000,000 shares of the Company's common stock went effective on April 7, 2016. Under the Purchase Agreement and at Company's sole discretion, the institutional investor has committed to invest up to \$20,000,000 in common stock over a 36-month period. The Company has raised \$964,200 as of September 30, 2016.

NOTE 3 – PROPERTY AND EQUIPMENT

Property and equipment consists of the following:

	September 30, 2016	December 31, 2015
Office equipment	\$55,817	\$51,323
Lab equipment	757,775	722,555
Furniture	32,693	26,028
Leasehold Improvements	231,860	231,859
	1,078,145	1,031,765
Less: Accumulated depreciation	637,874	536,703
	\$440,271	\$495,062

Depreciation expense for the nine months ending September 30, 2016 and 2015 was \$133,740 and \$115,491. Depreciation expense for the three months ending September 30, 2016 and 2015 was \$44,113 and \$41,338. During the second quarter of 2016, the Company sold equipment for proceeds of \$19,500 and a gain of \$644.

LIGHTWAVE LOGIC, INC.**NOTES TO FINANCIAL STATEMENTS****SEPTEMBER 30, 2016 AND 2015****NOTE 4 – INTANGIBLE ASSETS**

This represents legal fees and patent fees associated with the prosecution of patent applications. The Company has recorded amortization expenses on the Spacer and Chromophore patents granted by the United States Patent and Trademark Office in February 2011, April 2011 and September 2012, which are amortized over the remaining legal life and Chromophore patent granted by the Australian Patent Office in November 2012 which is amortized over the remaining legal life. Certain patent applications are abandoned by the Company when the claims are covered by patents already granted to the Company. Patent applications abandoned have been written off at full capitalized cost. No amortization expense has been recorded on the remaining patent applications since patents have yet to be granted

Patents consists of the following:

	September 30, 2016	December 31, 2015
Patents	\$ 732,962	\$ 690,162
Less: Accumulated amortization	82,314	70,395
Intangible Assets - net	\$ 650,648	\$ 619,767

Amortization expense for the nine months ending September 30, 2016 and 2015 was \$11,918 and \$11,146. Amortization expense for the three months ending September 30, 2016 and 2015 was \$3,972 and \$3,715. Expense for abandoned patents for claims covered by patents already granted to the Company are recorded in research and development expenses and for the three months and nine months ending September 30, 2016 and 2015 were \$0 and \$0.

NOTE 5 – INCOME TAXES

There is no income tax benefit for the losses for the three and nine months ended September 30, 2016 and 2015 since management has determined that the realization of the net deferred tax asset is not assured and has created a valuation allowance for the entire amount of such benefits.

The Company's policy is to record interest and penalties associated with unrecognized tax benefits as additional income taxes in the statement of operations. As of January 1, 2016, the Company had no unrecognized tax benefits, or any tax related interest or penalties. There were no changes in the Company's unrecognized tax benefits during the period ended September 30, 2016. The Company did not recognize any interest or penalties during 2016 related to unrecognized tax benefits. With few exceptions, the U.S. and state income tax returns filed for the tax years ending on December 31, 2012 and thereafter are subject to examination by the relevant taxing authorities.

LIGHTWAVE LOGIC, INC.

NOTES TO FINANCIAL STATEMENTS

SEPTEMBER 30, 2016 AND 2015

NOTE 6 – STOCKHOLDERS' EQUITY

Preferred Stock

Pursuant to the Company's Articles of Incorporation, the Company's board of directors is empowered, without stockholder approval, to issue series of preferred stock with any designations, rights and preferences as they may from time to time determine. The rights and preferences of this preferred stock may be superior to the rights and preferences of the Company's common stock; consequently, preferred stock, if issued could have dividend, liquidation, conversion, voting or other rights that could adversely affect the voting power or other rights of the common stock. Additionally, preferred stock, if issued, could be utilized, under special circumstances, as a method of discouraging, delaying or preventing a change in control of the Company's business or a takeover from a third party.

Common Stock Options and Warrants

In October 2013, under the 2007 Employee Stock Option Plan, the Company issued an option to a new director to purchase 200,000 shares of common stock at a purchase price of \$0.93 per share for a directorship commencing November 1, 2013. The option was valued at \$174,106 using the Black-Scholes option pricing model. The option expires in 10 years with 50,000 vesting in annual installments commencing November 1, 2013. The option is expensed over the vesting terms. For the nine month ending September 30, 2016, the Company recognized \$32,675 of expense. For the three months ending September 30, 2016, the Company recognized \$10,971 of expense. As of September 30, 2016, the option to purchase 200,000 shares of common stock is still outstanding.

In March 2014, under the 2007 Employee Stock Option Plan, the Company issued options to a new employee to purchase 30,000 shares of common stock at a purchase price of \$0.92 per share. The options expire in 10 years vesting in quarterly equal installments of 3,750 from date of employment. The options are expensed over the vesting terms. For the three and nine months ending September 30, 2016, the Company recognized \$0 and \$1,552 of expense. As of September 30, 2016, the options to purchase 30,000 shares of common stock are still outstanding.

In March 2014, under the 2007 Employee Stock Option Plan, the Company issued options to a new employee to purchase 75,000 shares of common stock at a purchase price of \$0.92 per share. The options were valued at \$58,384, fair value, using the Black-Scholes Option Pricing Formula. The options expire in 10 years vesting in quarterly equal installments of 9,375 from date of employment. The options are expensed over the vesting terms. For the three and nine months ending September 30, 2016, the Company recognized \$0 and \$4,363 of expense. As of September 30, 2016, the options to purchase 75,000 shares of common stock are still outstanding.

In March 2014, under the 2007 Employee Stock Option Plan, the Company issued options to a new employee to purchase 50,000 shares of common stock at a purchase price of \$0.92 per share. The options were valued at \$38,922, fair value, using the Black-Scholes Option Pricing Formula. The options expire in 10 years vesting in quarterly equal installments of 6,250 from date of employment. The options are expensed over the vesting terms. For the three and nine month ending September 30, 2016, the Company recognized \$0 and \$3,331 of expense. As of September 30, 2016, the options to purchase 50,000 shares of common stock are still outstanding.

LIGHTWAVE LOGIC, INC.

NOTES TO FINANCIAL STATEMENTS

SEPTEMBER 30, 2016 AND 2015

NOTE 6 – STOCKHOLDERS’ EQUITY (CONTINUED)

Common Stock Options and Warrants (Continued)

In May 2014, under the 2007 Employee Stock Option Plan, the Company issued options to a new director to purchase 200,000 shares of common stock at a purchase price of \$0.763 per share. The options were valued at \$122,515 using the Black-Scholes Option Pricing Formula. The options expire in 10 years with 50,000 vesting immediately and the remainder vesting in annual equal installments of 50,000 commencing on the one year anniversary of the date of grant. The options are expensed over the vesting terms. For the nine month ending September 30, 2016, the Company recognized \$22,992 of expense. For the three months ending September 30, 2016, the Company recognized \$7,720 of expense. As of September 30, 2016, the options to purchase 200,000 shares of common stock are still outstanding.

During July 2015, the Company issued a warrant to purchase 125,000 shares of common stock at a purchase price of \$0.70 per share for accounting services to be rendered over a twelve month period commencing July 1, 2015. The warrant was valued at \$46,897, fair value at December 31, 2015, using the Black-Scholes Option Pricing Formula, vesting over the next twelve months with 10,416 vesting immediately, 10,416 vesting per month on the first day of the next ten months and 10,424 vesting on the first day of the twelfth month of the corresponding service agreement. The warrant expires in five years. The expense is being recognized based on service terms of the agreement over a twelve month period. For the nine months ending September 30, 2016, the Company recognized \$23,452 of expense. For the three months ending September 30, 2016, the Company recognized \$0 of expense. As of September 30, 2016, the warrants to purchase 125,000 shares of common stock are still outstanding.

During August 2015, under the 2007 Employee Stock Option Plan, the Company issued an option to an employee to purchase 50,000 shares of common stock at a purchase price of \$0.67 per share. The option was valued at \$19,930, fair value, using the Black-Scholes Option Pricing Formula. The option expires in 10 years and vests 12,500 immediately and the remaining in equal quarterly installments of 12,500 over the next three quarters. The option is expensed over the vesting terms. For the nine month ending September 30, 2016, the Company recognized \$7,203 of expense. For the three months ending September 30, 2016, the Company recognized \$0 of expense. As of September 30, 2016, the options to purchase 50,000 shares of common stock are still outstanding.

During August 2015, under the 2007 Employee Stock Option Plan, the Company issued options to three employees to purchase an aggregate of 75,000 shares of common stock at a purchase price of \$0.69 per share. The options were valued at \$32,734, fair value, using the Black-Scholes Option Pricing Formula. The options expire in 10 years and vest 15,000 immediately and the remaining in equal quarterly installments of 15,000 over the next four quarters. The options are expensed over the vesting terms. For the nine month ending September 30, 2016, the Company recognized \$17,142 of expense. For the three months ending September 30, 2016, the Company recognized \$4,053 of expense. As of September 30, 2016, the options to purchase 75,000 shares of common stock are still outstanding.

NOTES TO FINANCIAL STATEMENTS

SEPTEMBER 30, 2016 AND 2015

NOTE 6 – STOCKHOLDERS’ EQUITY (CONTINUED)

Common Stock Options and Warrants (Continued)

In January 2016, the Company signed a Purchase Agreement with an institutional investor to sell up to \$20,000,000 of common stock. The Company also entered into a Registration Rights Agreement with the institutional investor whereby the Company agreed to file a registration statement related to the transaction with the U.S. Securities and Exchange Commission registering 5,000,000 shares of the Company’s common stock. The registration statement was filed on March 25, 2016. The registration became effective April 7, 2016. Under the Purchase Agreement and at Company's sole discretion, the institutional investor has committed to invest up to \$20,000,000 in common stock over a 36-month period. The Company issued 350,000 shares of restricted common stock to the institutional investor as an initial commitment fee valued at \$237,965, fair value and 650,000 shares of common stock are reserved for additional commitment fees to the institutional investor in accordance with the terms of the agreement. During three and nine month period ending September 30 2016, the institutional investor purchased 1,400,000 shares of common stock for proceeds of \$964,200 and the Company issued 31,338 shares of common stock as additional commitment fee, valued at \$22,177, fair value, leaving 618,662 in reserve for additional commitment fees. During October and November 2016, the institutional investor purchased 500,000 shares of common stock for proceeds of 246,320 and the Company issued 9,897 shares of common stock as additional commitment fee, valued at \$6,241, fair value, leaving 608,765 in reserve for additional commitment fees.

In February 2016, under the 2007 Employee Stock Option Plan, the Company issued options to the Company’s six independent directors to each purchase 50,000 shares of common stock at a purchase price of \$0.68 per share. The options were each valued at \$21,475, fair value, using the Black-Scholes Option Pricing Formula. The options expire in 10 years with an aggregate of 20,000 vesting immediately and the remaining vest in quarterly equal installments of 10,000 commencing April 1, 2016. The options are expensed over the vesting terms. For the nine month ending September 30, 2016, the Company recognized \$128,562 of expense. For the three months ending September 30, 2016, the Company recognized \$25,770 of expense. As of September 30, 2016, the options to purchase 300,000 shares of common stock are still outstanding.

For the three months ending September 30, 2016 the Company issued 8,517 shares, with a fair value of \$6,000, to a director serving as a member of the Company’s Operations Committee commencing August 2015. For the three months ending September 30, 2016, the Company recognized \$6,000 of expense. For the nine months ending

Edgar Filing: Lightwave Logic, Inc. - Form 10-Q

September 30, 2016 the Company issued 28,744 shares, with a fair value of \$18,000. For the nine months ending September 30, 2016, the Company recognized \$18,000 of expense. During October 2016, the Company issued 3,182 additional shares of common stock valued at \$2,000.

In May 2016, under the 2007 Employee Stock Option Plan, the Company issued an option to a director to purchase 200,000 shares of common stock at a purchase price of \$0.60 per share. The option was valued at \$67,376, fair value, using the Black-Scholes Option Pricing Formula. The option expires in 10 years and vests immediately. The option is expensed over the vesting terms. For the nine month ending September 30, 2016, the Company recognized \$67,376 of expense. For the three months ending September 30, 2016, the Company recognized \$0 of expense. As of September 30, 2016, the option to purchase 200,000 shares of common stock is still outstanding.

LIGHTWAVE LOGIC, INC.

NOTES TO FINANCIAL STATEMENTS

SEPTEMBER 30, 2016 AND 2015

NOTE 6 – STOCKHOLDERS’ EQUITY (CONTINUED)

Common Stock Options and Warrants (Continued)

In May 2016, under the 2007 Employee Stock Option Plan, the Company issued an option to an employee to purchase 5,000 shares of common stock at a purchase price of \$0.60 per share. The option was valued at \$1,738, fair value, using the Black-Scholes Option Pricing Formula. The option expires in 10 years and vesting in quarterly equal installments of 625 commencing August 4, 2016. The option is expensed over the vesting terms. For the nine month ending September 30, 2016, the Company recognized \$354 of expense. For the three months ending September 30, 2016, the Company recognized \$223 of expense. As of September 30, 2016, the option to purchase 5,000 shares of common stock is still outstanding.

During the three month period ending June 30, 2016, an option issued in May 2011 to purchase 200,000 shares of common stock at an exercise price of \$1.12 expired and warrants issued in April 2011 to purchase 150,000 shares of common stock at an exercise price of \$1.18 expired.

In July 2016, under the 2016 Equity Incentive Plan, the board of directors approved a grant to a new employee of an option to purchase up to 15,000 shares of common stock at a purchase price of \$0.63 per share. Using the Black-Scholes Option Pricing Formula, the option was valued at \$6,216, fair value. The option expires in 10 years and vests 1,875 on September 27, 2016 and the remaining in equal quarterly installments of 1,875 over the next 21 months. The option is expensed over the vesting terms. For the three month and nine months ending September 30, 2016, the Company recognized \$803 of expense. As of September 30, 2016, the option to purchase 15,000 shares of common stock is still outstanding.

During July 2016, the Company issued a warrant to purchase 150,000 shares of common stock at a purchase price of \$0.63 per share for accounting services to be rendered over a twelve month period commencing July 1, 2016. The warrant was valued at \$60,272, fair value, using the Black-Scholes Option Pricing Formula, vesting over the next twelve months with 12,500 vesting immediately, 12,500 vesting per month on the first day of the next ten months and 12,500 vesting on the first day of the twelfth month of the corresponding service agreement. The warrant expires in five years. The expense is being recognized based on service terms of the agreement over a twelve month period. For

Edgar Filing: Lightwave Logic, Inc. - Form 10-Q

the three and nine months ending September 30, 2016, the Company recognized \$14,768 of expense. As of September 30, 2016, the warrants to purchase 150,000 shares of common stock are still outstanding.

Effective June 24, 2016, the 2007 Employee Stock Plan was terminated. The Board of Directors approved a new 2016 Equity Incentive Plan in the amount of 3,000,000 shares on April 15, 2016, which the Company's shareholders approved on May 20, 2016.

LIGHTWAVE LOGIC, INC.**NOTES TO FINANCIAL STATEMENTS****SEPTEMBER 30, 2016 AND 2015****NOTE 7 – STOCK BASED COMPENSATION**

The Company uses the Black-Scholes option pricing model to calculate the grant-date fair value of an award, with the following assumptions for 2016: no dividend yield, expected volatility, based on the Company's historical volatility, 65% to 78%, risk-free interest rate 1.05% to 1.80% and expected option life of 5 to 5.6 years.

As of September 30, 2016, there was \$153,669 of unrecognized compensation expense related to non-vested market-based share awards that is expected to be recognized through September 2018.

The following tables summarize all stock option and warrant activity of the Company during the nine months ended September 30, 2016:

	Non-Qualified Stock Options and Warrants Outstanding and Exercisable		
	Number of Shares	Exercise Price	Weighted Average Exercise Price
Outstanding, December 31, 2015	18,528,367	\$0.63 - \$1.69	\$ 0.92
Granted	895,000	\$0.60 - \$0.86	\$ 0.66
Expired	(385,000)	\$1.00 - \$1.18	\$ 1.13
Forfeited			
Exercised			
Outstanding, September 30, 2016	19,038,367	\$0.60 - \$1.69	\$ 0.90
Exercisable, September 30, 2016	18,545,242	\$0.60 - \$1.69	\$ 0.91

The aggregate intrinsic value of options and warrants outstanding and exercisable as of September 30, 2016 was \$26,575. The aggregate intrinsic value is calculated as the difference between the exercise price of the underlying options and warrants and the closing stock price of \$.665 for the Company's common stock on September 30, 2016. No options or warrants were exercised during the three and nine months periods ending September 30, 2016.

Non-Qualified Stock Options and Warrants Outstanding

Range of Exercise Prices	Number Outstanding Currently Exercisable at June 30, 2016	Weighted Average Remaining Contractual Life	Weighted Average Exercise Price of Options and Warrants Currently Exercisable
\$0.60 - \$1.69	18,545,242	4.38 Years	\$0.91

LIGHTWAVE LOGIC, INC.

NOTES TO FINANCIAL STATEMENTS

SEPTEMBER 30, 2016 AND 2015

NOTE 8 – RELATED PARTY

At September 30, 2016 the Company had a legal accrual to related party of \$4,300 and travel and office expense accruals of officers in the amount of \$3,651. At December 31, 2015 the Company had a legal accrual to related party of \$1,420 and travel and office expense accruals of officers in the amount of \$3,649.

NOTE 9 – RETIREMENT PLAN

The Company established a 401(k) retirement plan covering all eligible employees beginning November 15, 2013. A contribution of \$15,000 was charged to expense and accrued for the nine months ending September 30, 2016 to all eligible non-executive participants. A contribution of \$5,000 was charged to expense and accrued for the three months ending September 30, 2016 to all eligible non-executive participants. There were no contributions charged to expense in 2015.

NOTE 10 – SUBSEQUENT EVENTS

During November 2016, under the 2016 Equity Incentive Plan, the Company issued options to an employee to purchase 15,000 shares of common stock at a purchase price of \$0.60 per share. The option was valued at \$5,674, fair value, using the Black-Scholes Option Pricing Formula. The options expire November 9, 2026 with 1,875 shares vesting on December 1, 2016 and the remaining vesting in seven equal quarterly installments of 1,875. The option is expensed over the vesting terms.

Item 2 Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

Lightwave Logic, Inc. (the “**Company**”) is a development stage, electro-optical device and organic nonlinear materials company. Our primary area of expertise is the chemical synthesis of chromophore dyes used in the development of organic Application Specific Electro-Optic Polymers (ASEOP) and organic Non-Linear All-Optical Polymers (NLAOP) that have high electro-optic and optical activity. Our family of materials are thermally and photo-chemically stable, which we believe could have utility across a broad range of applications in devices that address markets such as telecommunication, data communications, high-speed computing and photovoltaic cells. Secondarily, our Company is developing proprietary electro-optical and all-optical devices utilizing the advanced capabilities of our materials for applications in the fields mentioned above.

Electro-optic devices convert data from electric signals into optical signals for use in communications systems and in optical interconnects for high-speed data transfer. We expect our patented and patent-pending optical materials (chromophores), when combined with selected polymers to make ASEOP and NLAOP material systems and when completed and tested, to be the core of the future generations of optical devices, modules, sub-systems and systems that we will develop or be licensed by electro-optic device manufacturers, such as telecommunications component and systems manufacturers, networking and switching suppliers, semiconductor companies, aerospace companies and government agencies.

Our ASEOP material systems are property-engineered at the molecular level (nanotechnology level) to meet the exacting thermal, environmental and performance specifications demanded by electro-optic devices. We believe that our patented and patent pending technologies will enable us to design polymer based material systems that are free from the numerous diverse and inherent flaws that plague competitive polymer technologies employed by other companies and research groups. We engineer our polymer based material systems with the intent to have temporal, thermal, chemical and photochemical stability within our patented and patent pending molecular chromophore architectures.

Our non-linear all optical NLAOP material systems have demonstrated resonantly enhanced third-order properties approximately 2,630 times larger than fused silica, which means that they are highly photo-optically active in the absence of an RF circuit. In this way they differ from other polymer technologies and are considered more advanced next-generation materials.

Our revenue model relies substantially on the assumption that we will be able to successfully develop our polymer based material systems and photonic device products, which will use our polymer based material systems, for applications within the industries named below. When appropriate, we intend to create specific materials for each of

these applications and use our proprietary knowledge base to continue to enhance its discoveries.

- Cloud computing and data centers
- Telecommunications/data communications
- Backplane optical interconnects
- Photovoltaic cells
- Medical applications
- Satellite reconnaissance
- Navigation systems
- Radar applications
- Optical filters
- Spatial light modulators
- All-optical switches

To be successful, we must, among other things:

- Develop and maintain collaborative relationships with strategic partners;
- Continue to expand our research and development efforts for our products;
- Develop and continue to improve on our manufacturing processes and maintain stringent quality controls;
 - Produce commercial quantities of our products at commercially acceptable prices;
- Rapidly respond to technological advancements;
- Attract, retain and motivate qualified personnel; and
- Obtain and retain effective intellectual property protection for our products and technology.

We believe that Moore's Law (a principle which states the number of transistors on a silicon chip doubles approximately every eighteen months) will create markets for our high-performance electro-optic materials and photonic device products.

Plan of Operation

Since inception, we have been engaged primarily in the research and development of our electro-optic polymer based material systems and photonic device products. We are devoting significant resources to engineer next-generation electro-optic polymer based material systems for future applications to be utilized by electro-optic device manufacturers, such as telecommunications component and systems manufacturers, networking and switching suppliers, semiconductor companies, aerospace companies, government agencies and internal device development. We expect to continue to develop products that we intend to introduce to these rapidly changing markets and to seek to identify new markets. We expect to continue to make significant operating and capital expenditures for research and development activities.

As we move from a development stage company to a product supplier, we expect that our financial condition and results of operations will undergo substantial change. In particular, we expect to record both revenue and expense from product sales, to incur increased costs for sales and marketing and to increase general and administrative expense. Accordingly, the financial condition and results of operations reflected in our historical financial statements are not expected to be indicative of our future financial condition and results of operations.

Some of our more significant milestones that we achieved during 2014-2016 include:

In January 2014 we created a new methodology to combine multiple chromophores into a single polymer host that significantly improves their ability to generate more powerful organic, nonlinear electro-optical polymer systems. The new synthetic chemistry process can enable multiple chromophores (dyes) to work in concert with each other within a single polymer host. This proprietary process has created two new material systems, which have demonstrated outstanding electro-optic values. In addition, we now have a significant amount of data on the thermal aging of our materials. We have demonstrated that our materials can withstand more than 2,000 hours at 110 degrees C with little to no change in electro-optic activity in our materials, which is a significant milestone. To our knowledge, this is something that has not been achieved before in any polymer. We are also concurrently creating prototype waveguides with our proprietary material system.

In February 2014 we received our first purchase order for our advanced organic nonlinear electro-optic polymer from Boulder Nonlinear Systems (BNS) of Boulder, Colorado in connection with the development of a next generation LADAR system. A LADAR system is a radar system that utilizes a pulse laser to calculate the distance to a target, but is also capable of rendering a 3-D image. In the event BNS continues to move forward with the development of this LADAR system, we expect to receive additional purchase orders from BNS.

In March 2014 we began the process of manufacturing an advanced design Silicon Organic Hybrid Transceiver prototype and we released the completed chip design to the OpSIS Center at the University of Delaware who contracted with a third party to produce the initial silicon chips, which were delivered to us in December 2014 and January 2015. We will look at similar designs to these chips for utilization in our Silicon Organic Transceiver as our device development program continues. The initial application will target inter and intra-data center interconnections of more than 500 meters.

In April 2014 we entered into a sole worldwide license agreement with Corning Incorporated enabling us to integrate Corning's organic electro-optical chromophores into our portfolio of electro-optic polymer materials. The agreement allows us to use the licensed patents within a defined license field that includes communications, computing, power, and power storage applications utilizing the nonlinear optical properties of their materials.

In August 2014 the University of Colorado successfully fabricated and tested a bleached electro-optic waveguide modulator designed and fabricated through a sponsored collaborative research agreement. The results of this initial bleached waveguide modulator correlated well with previous electro-optic thin film properties. These initial results of our first in-house device were significant to our entire device program and were an important starting point for our current modulators being developed for target markets.

In October 2014 we submitted an order with Reynard Corporation to produce gold-layered fused silica substrates for our bleached waveguide modulators to be coated with several of our organic electro-optical polymers, which we received in early November 2014 and performance tested throughout December 2014. In May, 2015, we subsequently decided to eliminate this product from our commercial development plans due to its limited commercial value, low speed characteristics, difficulty to mass-produce and limited ability to integrate with existing architectures. In lieu of this development program, a commercially viable prototype ridge waveguide modulator program was started to replace the bleached waveguide development. We believe that the ridge waveguide modulator represents a viable telecom device opportunity for the Company that does not have the inherent limitations seen in bleached waveguide structures.

In May 2015 we achieved operating capability of our in-house Class 100 Clean Room where we do thin film processing and expect to complete the development of prototype photonic devices enabled by our advanced organic electro-optic polymer material systems in a timelier manner. Additionally, the Joint Institute for Laboratory Astrophysics (JILA) certified three of our employees, which allows us access to JILA's world-class semiconductor facility located at the University of Colorado, Boulder. Access to this facility provides us with better control over the quality of our development work and the speed at which it progresses.

In August 2015 we completed 2,000+ hours of thermal aging tests on several blends of materials created by our multi-chromophore process, which included lengthy exposure to high temperatures (85°C and 110°C). The data collected indicated minimal loss of electro-optical activity (R_{33}) of our materials, which means that our organic polymers are expected to provide decades of operational performance. These results exceed previously published efforts for other organic polymers and are an important part of our commercialization effort as we begin to implement these material systems into advanced photonic devices for the telecom and datacom markets.

Additionally, in August 2015, we completed 500+ hours of photochemical stability testing of our material candidates by exposing them to the visible light spectrum. The data collected indicated no discernible change in the chemical structures in an oxygen free environment. An accepted industry standard is 2,000 hours. This stability testing was begun to help us understand more clearly the processing and manufacturing requirements of our future commercial products, and provide initial assurances to expect the same results as we move these materials into actual photonic device structures.

In October 2015, we successfully surpassed 2,000 hours of photochemical stability testing of our material candidates with little to no change in the electro-optic characteristics (R_{33}) of our material; and, in January 2016, we successfully surpassed 4,000 hours of photochemical stability testing of our material candidates with little to no change in the optical density of our material. These photochemical stability test results, along with the thermal stability at 110°C, should enable the Company to demonstrate that organic polymers can compete head-to-head with inorganic crystalline legacy telecom and datacom devices which currently provide the backbone for the entire infrastructure that converts almost incalculable amounts of electronic (binary) data into pulses of light and back on a daily basis.

electro-optic

In February 2016, we

electro-optic

In April 2016, we

electro-optic

In May 2016, we broadened our photonic device development to include our new P²IC™ (Polymer Photonics Integrated Circuit) design platform. The P²IC™ design platform utilizes high-speed ridge waveguide and slot waveguide modulator designs that scale up in performance as well as down in cost structure. Furthermore, the Lightwave Logic P²IC™ design platform combines the best of Polymer Photonics with the best of Silicon Photonics (SiP) to create a powerful, yet scalable platform that addresses the desires of both the telecom and datacom industries.

In August 2016, we gained enormous industry exposure for our first organic electro-optic polymer-enabled prototype photonic device when our board member, Michael Leiby, Ph.D., presented to the Prestigious European Conference on Optical Communication (ECOC) Exhibition, the scientific and economic case for our Company's high-performance polymer photonics for next-generation photonic integrated circuits as future competition for installed legacy photonic devices and emerging silicon photonic systems. We expect to demonstrate our prototype during the last quarter of 2016.

In August 2016, we obtained highly successful independent third party verification of our organic polymer thin film properties from Metricon, a company that specializes in making precision instruments designed to obtain optical measurements on thin film materials and optical waveguides. Metricon concluded a battery of scientific tests to verify the inherent properties of several of our advanced organic electro-optic polymer materials, which are currently being implemented into a series of photonic devices. Measurements by Metricon of several planar waveguide samples determined that our polymer thin film materials at 1550 nm (Telecom frequency band) should exceed industry requirements that target overall device loss at <4 dB/cm. Additionally, Metricon was also able to provide very accurate refractive index measurements on our Company's materials, which is very important for designing high-speed multi-layer polymer modulators.

Presently, we are continuing to move towards completion of our operating organic electro-optic polymer-enabled ridge waveguide modulator prototype using our new multi-chromophore material systems.

We ultimately intend to use our next-generation electro-optic polymer material systems and non-linear all-optical polymer material systems for future applications vital to the following industries. We expect to create specific materials for each of these applications as appropriate:

- Cloud computing and data centers
- Telecommunications/data communications
- Backplane optical interconnects
- Photovoltaic cells
- Medical applications
- Satellite reconnaissance
- Navigation systems
- Radar applications
- Optical filters
- Spatial light modulators

◆All-optical switches

In an effort to maximize our future revenue stream from our electro-optic polymer material systems and non-linear all-optical polymer material systems, our business model anticipates that our revenue stream will be derived from one or some combination of the following: (i) technology licensing for specific product applications; (ii) joint venture relationships with significant industry leaders; (iii) the production and direct sale of our own photonic device components; or (iv) the vertical integration of our modulator into a transceiver device. Our objective is to be a leading provider of proprietary technology and know-how in the photonic device markets. In order to meet this objective, subject to successful testing of our technology and having available financial resources, we intend to:

- Develop electro-optic polymer material systems and non-linear all-optical polymer material systems and photonic devices;
- Continue to develop proprietary intellectual property;
- Streamline our product development process;
- Develop a comprehensive marketing plan;
- Maintain/develop strategic relationships with government agencies, private firms, and academic institutions; and
- Continue to attract and retain high-level science and technology personnel to our Company.

Our Proprietary Products in Development

As part of a two-pronged marketing strategy, our Company is developing several devices, which are in various stages of development that utilize our organic nonlinear optical materials. They include:

- Ridge waveguide modulator
 - Slot waveguide modulator
- 100 Gbps telecommunications modulator
- 200 Gbps datacomm/telecomm photonic transceiver
- Integrated photonic system

Additionally, we must continue to create and maintain an infrastructure, including operational and financial systems, and related internal controls, and recruit qualified personnel. Our failure to do so could adversely affect our ability to support our operations.

Capital Requirements

As a development stage company, we do not generate revenues. We have incurred substantial net losses since inception. We have satisfied our capital requirements since inception primarily through the issuance and sale of our common stock.

Results of Operations

Comparison of three months ended September 30, 2016 to three months ended September 30, 2015

Revenues

As a development stage company, we had no revenues during the three months ended September 30, 2016 and September 30, 2015. The Company is in various stages of material and photonic device development and evaluation. The Company expects to obtain a revenue stream from datacom and telecom devices, sales of non-linear optical polymers, and product development agreements prior to moving into full-scale production.

Operating Expenses

Our operating expenses were \$943,326 and \$1,929,924 for the three months ended September 30, 2016 and 2015, respectively, for a decrease of \$986,598. This decrease in operating expenses is primarily due to decreases in non-cash stock option and warrant amortization, legal expenses, disposal of material and obsolete equipment, investor relations expenses, laboratory materials and supplies and research and development salaries and wages offset by increases in research and development consulting fees and general and administrative salaries and wages.

Included in our operating expenses for the three months ended September 30, 2016 was \$589,038 for research and development expenses compared to \$1,047,963 for the three months ended September 30, 2015, for a decrease of \$458,925. The decrease in research and development expenses is primarily due to decreases in non-cash stock option and warrants amortization, disposal of material and obsolete equipment, laboratory materials and supplies and salaries and wages, offset by an increase in consulting fees.

Research and development expenses currently consist primarily of compensation for employees and consultants engaged in internal research, product development activities; laboratory operations, internal material and device testing and prototype electro-optic device design, development and prototype device processing; costs; and related operating expenses.

We expect to continue to incur substantial research and development expenses to develop and commercialize our photonic devices and electro-optic materials platform. These expenses will increase as a result of accelerated development effort to support commercialization of our non-linear optical polymer materials technology; to build photonic device prototypes in our in-house laboratories; hiring additional technical and support personnel; engaging a senior technical advisor; pursuing other potential business opportunities and collaborations; customer testing and evaluation; and incurring related operating expenses.

Research and development non-cash stock option amortization decreased \$486,466 from \$530,032 for the three months ended September 30, 2015 to \$43,566 for the three months ended September 30, 2016.

Disposal of material and obsolete equipment decreased \$21,706 from \$22,379 for the three months ended September 30, 2015 to \$673 for the three months ended September 30, 2016.

Laboratory materials and supplies decreased \$8,042 from \$48,340 for the three months ended September 30, 2015 to \$40,298 for the three months ended September 30, 2016.

Wages and salaries, including benefits decreased \$7,148 from \$281,258 for the three months ended September 30, 2015 to \$274,110 for the three months ended September 30, 2016.

Consulting expenses increased \$67,101 from \$11,926 for the three months ended September 30, 2015 to \$79,027 for the three months ended September 30, 2016.

General and administrative expense consists primarily of compensation and support costs for management staff, and for other general and administrative costs, including executive, sales and marketing, investor relations, accounting and finance, legal, consulting and other operating expenses.

General and administrative expenses decreased \$527,673 to \$354,288 for the three months ended September 30, 2016 compared to \$881,961 for the three months ended September 30, 2015. The decrease is due primarily to decreases in non-cash stock option and warrant amortization, legal expenses and investor relations expenses offset by an increase in salaries and wages.

General and administrative non-cash stock option amortization decreased \$503,301 from \$548,180 for the three months ended September 30, 2015 to \$44,879 for the three months ended September 30, 2016.

Legal fees decreased \$29,979 to \$15,001 for the three months ending September 30, 2016 from \$44,980 for the three months ended September 30, 2015.

Investor relation expenses decreased \$12,513 to \$4,780 for the three months ending September 30, 2016 from \$17,293 for the three months ended September 30, 2015.

Wages and salaries, including benefits increased \$10,045 from \$149,550 for the three months ended September 30, 2015 to \$159,595 for the three months ended September 30, 2016.

We expect general and administrative expense to increase in future periods as we increase the level of corporate and administrative activity, including increases associated with our operation as a public company; and significantly increase expenditures related to the future production and sales of our products.

Other Income (Expense)

Other expense increased \$22,177 to \$22,177 for the three months ending September 30, 2016 from \$0 for the three months ending September 30, 2015, relating to the commitment fee associated with the purchase of shares by an institutional investor for sale under a stock purchase agreement during the three-month period.

Net Loss

Net loss was \$965,441 and \$1,929,861 for the three months ended September 30, 2016 and 2015, respectively, for a decrease of \$964,420, due primarily to decreases in non-cash stock option and warrant amortization, legal expenses, disposal of material and obsolete equipment, investor relations expenses, laboratory materials and supplies and research and development salaries and wages offset by increases in research and development consulting, commitment fee associated with the purchase of shares by an institutional investor for sale under a stock purchase agreement and general and administrative salaries and wages.

Comparison of nine months ended September 30, 2016 to nine months ended September 30, 2015

Revenues

As a development stage company, we had no revenues during the nine months ended September 30, 2016 and September 30, 2015. The Company is in various stages of material and photonic device development and evaluation. The Company expects to obtain a revenue stream from datacom and telecom devices, sales of non-linear optical polymers, and product development agreements prior to moving into full-scale production.

Our operating expenses were \$3,041,967 and \$4,047,715 for the nine months ended September 30, 2016 and 2015, respectively, for a decrease of \$1,005,748. The decrease in operating expenses is primarily due to decreases in non-cash stock option and warrant amortization, outsourced testing and product development expenses, investor relations expenses, laboratory materials and supplies, disposal of material and obsolete equipment and research and development travel expenses offset by increases in research and development consulting expenses, salaries and wages, legal and depreciation.

Included in our operating expenses for the nine months ended September 30, 2016 was \$1,784,871 for research and development expenses compared to \$2,312,662 for the nine months ended September 30, 2015, for a decrease of \$527,791. The decrease in research and development expenses is primarily due to decreases in non-cash stock option and warrant amortization, outsourced testing and product development expenses, laboratory materials and supplies, disposal of material and obsolete equipment and travel expenses offset by increases in consulting expenses, salaries and wages and depreciation.

Research and development expenses currently consist primarily of compensation for employees and consultants engaged in internal research, product development activities; laboratory operations, internal material and device testing and prototype electro-optic device design, development and prototype device processing; costs; and related operating expenses.

We expect to continue to incur substantial research and development expense to develop and commercialize our photonic devices and electro-optic materials platform. These expenses will increase as a result of accelerated development effort to support commercialization of our non-linear optical polymer materials technology; to build photonic device prototypes in our in-house laboratories; hiring additional technical and support personnel; engaging a senior technical advisor; pursuing other potential business opportunities and collaborations; customer testing and evaluation; and incurring related operating expenses.

Edgar Filing: Lightwave Logic, Inc. - Form 10-Q

Non-cash stock compensation and stock option and warrant amortization decreased \$458,605 from \$703,335 for the nine months ended September 30, 2015 to \$244,730 for the nine months ended September 30, 2016.

Laboratory material testing expense and electro-optic device development decreased \$152,654 from \$245,768 for the nine months ended September 30, 2015 to \$93,114 for the nine months ended September 30, 2016.

Laboratory materials and supplies decreased \$42,224 from \$159,307 for the nine months ended September 30, 2015 to \$117,083 for the nine months ended September 30, 2016.

Disposal of material and obsolete equipment decreased \$21,246 from \$23,817 for the nine months ended September 30, 2015 to \$2,571 for the nine months ended September 30, 2016.

Travel expenses decreased \$19,107 from \$62,429 for the nine months ending September 30, 2015 to \$43,322 for the nine months ending September 30, 2016.

Consulting expenses increased \$139,158 from \$57,493 for the nine months ending September 30, 2015 to \$196,651 for the nine months ending September 30, 2016.

Wages and salaries increased \$18,851 from \$800,043 for the nine months ended September 30, 2015 to \$818,894 for the nine months ended September 30, 2016.

Depreciation expense increased \$18,323 from \$110,317 for the nine months ended September 30, 2015 to \$128,640 for the nine months ended September 30, 2016.

General and administrative expense consists primarily of compensation and support costs for management staff, and for other general and administrative costs, including executive, sales and marketing, investor relations, accounting and finance, legal, consulting and other operating expenses.

Edgar Filing: Lightwave Logic, Inc. - Form 10-Q

General and administrative expenses decreased \$477,957 to \$1,257,096 for the nine months ended September 30, 2016 compared to \$1,735,053 for the nine months ended September 30, 2015. The decrease is due primarily to decreases in non-cash stock option and warrant amortization and investor relations expenses offset by increases in salaries and wages and legal expenses.

General and administrative non-cash stock option and warrant amortization decreased by \$497,014 to \$155,028 for the nine months ended September 30, 2016 compared to \$652,042 for the nine months ended September 30, 2015.

Investor relations expenses decreased by \$53,910 from \$87,238 for the nine months ended September 30, 2015 to \$33,328 for the nine months ended September 30, 2016.

Salaries and wages increased \$37,151 from \$446,100 for the nine months ending September 30, 2015 to \$483,251 for the nine months ending September 30, 2016.

Legal fees increased \$21,225 from \$140,188 for the nine months ended September 30, 2015 to \$161,413 for the nine months ended September 30, 2016.

General and administrative expense consists primarily of compensation and support costs for management staff, and for other general and administrative costs, including executive, sales and marketing, investor relations, accounting and finance, legal, consulting and other operating expenses.

Other Income (Expense)

Other expense increased \$260,142 to \$260,142 for the nine months ending September 30, 2016 from \$0 for the nine months ending September 30, 2015, relating to the commitment fee associated with the purchase of shares by an institutional investor for sale under a stock purchase agreement during the nine-month period.

Net Loss

Net loss was \$3,301,918 and \$4,047,528 for the nine months ended September 30, 2016 and 2015, respectively, for a decrease of \$745,610, due primarily to decreases in non-cash stock option and warrant amortization, outsourced testing and product development expenses, investor relations expenses, laboratory materials and supplies, disposal of

material and obsolete equipment and research and development travel expenses offset by increases in research and development consulting expenses, salaries and wages, legal, commitment fee associated with the purchase of shares by an institutional investor for sale under a stock purchase agreement and depreciation.

Significant Accounting Policies

Our discussion and analysis of our financial condition and results of operations are based on our financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. On an ongoing basis, we evaluate our estimates based upon historical experience and various other assumptions that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Our actual results may differ materially from these estimates.

We believe our significant accounting policies affect our more significant estimates and judgments used in the preparation of our financial statements. Our Annual Report on Form 10-K for the year ended December 31, 2015 contains a discussion of these significant accounting policies.

See our Note 1 in our unaudited financial statements for the nine months ended September 30, 2016 as set forth herein for a complete discussion of our Company's accounting policies.

Liquidity and Capital Resources

For the nine months ended September 30, 2016

During the nine months ended September 30, 2016, net cash used in operating activities was \$2,271,725 and net cash used in investing activities was \$121,104, which was due primarily to the Company's research and development activities and general and administrative expenditures. Net cash provided by financing activities for the nine months ended September 30, 2016 was \$964,200. At September 30, 2016, our cash and cash equivalents totaled \$2,302,076, our assets totaled \$3,560,474, our liabilities totaled \$213,224, and we had stockholders' equity of \$3,347,250.

Sources and Uses of Cash

Our future expenditures and capital requirements will depend on numerous factors, including: the progress of our research and development efforts; the rate at which we can, directly or through arrangements with original equipment manufacturers, introduce and sell products incorporating our polymer materials technology; the costs of filing, prosecuting, defending and enforcing any patent claims and other intellectual property rights; market acceptance of our products and competing technological developments; and our ability to establish cooperative development, joint venture and licensing arrangements. We expect that we will incur approximately \$3,600,000 of expenditures over the next 12 months. Our cash requirements are expected to increase at a rate consistent with the Company's path to revenue growth as we expand our activities and operations with the objective of commercializing our electro-optic polymer technology during 2016.

Our business does not presently generate the cash needed to finance our current and anticipated operations. We believe we have raised sufficient capital to finance our operations through June 2017; however, we will need to obtain additional future financing after that time to finance our operations until such time that we can conduct profitable revenue-generating activities. Such future sources of financing may include cash from equity offerings, exercise of stock options, warrants and proceeds from debt instruments; but we cannot assure you that such equity or borrowings will be available or, if available, will be at rates or prices acceptable to us.

On January 29, 2016, we signed a purchase agreement with Lincoln Park Capital Fund, LLC ("Lincoln Park") to sell up to \$20,000,000 of common stock whereby subject to certain conditions and at our sole discretion, Lincoln Park has committed to purchase up to \$20,000,000 of our common stock over a 36-month period. In April 2016 our registration statement became effective, which registered for resale by Lincoln Park under the purchase agreement 5,000,000 shares of our common stock, 350,000 of which were previously issued as a commitment fee and 4,650,000 of which may be sold by us to Lincoln Park during the term of the purchase agreement. Pursuant to the purchase agreement, Lincoln Park is obligated to make purchases as the Company directs in accordance with the purchase agreement, which may be terminated by the Company at any time, without cost or penalty. Sales of shares will be made in specified amounts and at prices that are based upon the market prices of our common stock immediately preceding the

sales to Lincoln Park. We expect this financing to provide us with sufficient funds to maintain our operations for the foreseeable future. With the additional capital, we expect to achieve a level of revenues attractive enough to fulfill our development activities and adequate enough to support our business model for the foreseeable future. We cannot assure you that we will meet the conditions of the purchase agreement with Lincoln Park in order to obligate Lincoln Park to purchase our shares of common stock. In the event we fail to do so, and other adequate funds are not available to satisfy long-term capital requirements, or if planned revenues are not generated, we may be required to substantially limit our operations. This limitation of operations may include reductions in capital expenditures and reductions in staff and discretionary costs.

There are no trading volume requirements or restrictions under the purchase agreement and we will control the timing and amount of any sales of our common stock to Lincoln Park. Lincoln Park has no right to require any sales by us, but is obligated to make purchases from us as we direct in accordance with the purchase agreement. We can also accelerate the amount of common stock to be purchased under certain circumstances. There are no limitations on use of proceeds, financial or business covenants, restrictions on future funding, rights of first refusal, participation rights, penalties or liquidated damages in the purchase agreement. Lincoln Park may not assign or transfer its rights and obligations under stock the purchase agreement.

We expect that our cash used in operations will increase during 2016 and beyond as a result of the following planned activities:

- The addition of management, sales, marketing, technical and other staff to our workforce;
- Increased spending for the expansion of our research and development efforts, including purchases of additional laboratory and production equipment;

- Increased spending in marketing as our products are introduced into the marketplace;
- Developing and maintaining collaborative relationships with strategic partners;
- Developing and improving our manufacturing processes and quality controls; and
- Increases in our general and administrative activities related to our operations as a reporting public company and related corporate compliance requirements.

Analysis of Cash Flows

For the nine months ended September 30, 2016

Net cash used in operating activities was \$2,271,725 for the nine months ended September 30, 2016, primarily attributable to the net loss of \$3,301,918 adjusted by \$73,804 in warrants issued for services, \$325,954 in options issued for services, \$278,142 in common stock issued for services, \$145,658 in depreciation expenses and patent amortization expenses, \$97,012 in prepaid expenses and \$110,267 in accounts payable and accrued expenses and \$644 gain on disposal of property and equipment. Net cash used in operating activities consisted of payments for research and development, legal, professional and consulting expenses, rent and other expenditures necessary to develop our business infrastructure.

Net cash used by investing activities was \$121,104 for the nine months ended September 30, 2016, consisting of \$42,799 for intangibles, \$97,805 in asset additions primarily for the new lab facility and \$19,500 in proceeds from sale of equipment.

Net cash provided by financing activities was \$964,200 for the nine months ended September 30, 2016 and consisted of \$964,200 in proceeds from the sale of common stock to an institutional investor.

Inflation and Seasonality

We do not believe that our operations are significantly impacted by inflation. Our business is not seasonal in nature.

Item 4 Controls and Procedures

Evaluation of Disclosure Controls and Procedures. The Company's management, with the participation of the Company's Principal Executive Officer and Principal Financial Officer, evaluated the effectiveness of the Company's

disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended) as of September 30, 2016. Based on this evaluation, the Company's Principal Executive Officer and Principal Financial Officer concluded that, as of September 30, 2016 the Company's disclosure controls and procedures were effective, in that they provide reasonable assurance that information required to be disclosed by the Company in the reports that it files or submits under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and is accumulated and communicated to the Company's management, including the Company's Principal Executive Officer and Principal Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control Over Financial Reporting. There were no changes in our internal control over financial reporting during the quarter ended September 30, 2016 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II – OTHER INFORMATION**Item 2 Unregistered Sales of Equity Securities and Use of Proceeds**

Date	Security/Value
July 2016	Options – right to buy 15,000 shares of common stock at \$0.63 per share issued for services.
