

FAUQUIER BANKSHARES, INC.  
Form 10-Q  
August 10, 2018

UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, DC 20549

FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended June 30, 2018

Or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from \_\_\_\_\_ to \_\_\_\_\_

Commission File No.: 000-25805

Fauquier Bankshares, Inc.

(Exact name of registrant as specified in its charter)

Virginia 54-1288193  
(State or other jurisdiction of (I.R.S. Employer  
incorporation or organization) Identification No.)

10 Courthouse Square, Warrenton, Virginia 20186  
(Address of principal executive offices) (Zip Code)

(540) 347-2700

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (Section 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer

(Do not check if a smaller reporting company)

Smaller reporting company

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected to not use extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark if the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act.) Yes No

The registrant had 3,773,836 shares of common stock outstanding as of August 10, 2018.

FAUQUIER BANKSHARES, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

Note 1. General

The consolidated financial statements include the accounts of Fauquier Bankshares, Inc. (the “Company”) and its wholly-owned subsidiary, The Fauquier Bank (the “Bank”), and the Bank’s wholly-owned subsidiaries, Fauquier Bank Services, Inc. and Specialty Properties Acquisitions - VA, LLC. Specialty Properties Acquisitions - VA, LLC was formed with the sole purpose of holding foreclosed property. The consolidated financial statements do not include the accounts of Fauquier Statutory Trust II, a wholly-owned subsidiary of the Company. In consolidation, significant intercompany financial balances and transactions have been eliminated. In the opinion of management, the accompanying unaudited consolidated financial statements contain all adjustments (consisting of only normal recurring accruals) necessary to present fairly the financial position as of June 30, 2018 and the results of operations for the three and six months ended June 30, 2018 and 2017, in accordance with accounting principles generally accepted in the United States of America (“U.S. GAAP”). The notes included herein should be read in conjunction with the consolidated financial statements and accompanying notes included in the Company’s 2017 Annual Report on Form 10-K filed with the Securities and Exchange Commission (the “SEC”).

The results of operations for the three and six months ended June 30, 2018 and 2017 are not necessarily indicative of the results expected for the full year or any other interim period.

Certain amounts in the 2017 consolidated financial statements have been reclassified to conform to the 2018 presentation. No reclassifications were significant and there was no effect on net income.

Recent Accounting Pronouncements

In February 2016, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) No. 2016-02, “Leases (Topic 842).” Among other things, in the amendments in ASU 2016-02, lessees will be required to recognize the following for all leases (with the exception of short-term leases) at the commencement date: (1) A lease liability, which is a lessee’s obligation to make lease payments arising from a lease, measured on a discounted basis; and (2) A right-of-use asset, which is an asset that represents the lessee’s right to use, or control the use of, a specified asset for the lease term. Under the new guidance, lessor accounting is largely unchanged. Certain targeted improvements were made to align, where necessary, lessor accounting with the lessee accounting model and Topic 606, Revenue from Contracts with Customers. The amendments in this ASU are effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. Early application is permitted upon issuance. Lessees (for capital and operating leases) and lessors (for sales-type, direct financing, and operating leases) must apply a modified retrospective transition approach for leases existing at, or entered into after, the beginning of the earliest comparative period presented in the financial statements. The modified retrospective approach would not require any transition accounting for leases that expired before the earliest comparative period presented. Lessees and lessors may not apply a full retrospective transition approach. The Company, to date, has not completed its analysis of those leases and is unable to quantify the impact that ASU 2016-02 will have on its consolidated financial statements at this time; however, based on the current nature of its leases, the Company does not expect any significant adjustments.

In June 2016, the FASB issued ASU No. 2016-13, “Financial Instruments – Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments.” The amendments in this ASU, among other things, require the measurement

of all expected credit losses for financial assets held at the reporting date based on historical experience, current conditions, and reasonable and supportable forecasts. Financial institutions and other organizations will now use forward-looking information to better inform their credit loss estimates. Many of the loss estimation techniques applied today will still be permitted, although the inputs to those techniques will change to reflect the full amount of expected credit losses. In addition, the ASU amends the accounting for credit losses on available-for-sale debt securities and purchased financial assets with credit deterioration. The amendments in this ASU are effective for SEC filers for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2019. The Company is currently assessing the impact that ASU 2016-13 will have on its consolidated financial statements. The Company's management is addressing compliance requirements, data gathering and archiving resources, and analyzing the potential impact of this standard.

In March 2017, the FASB issued ASU No. 2017-08, "Receivables—Nonrefundable Fees and Other Costs (Subtopic 310-20), Premium Amortization on Purchased Callable Debt Securities." The amendments in this ASU shorten the amortization period for certain callable debt securities purchased at a premium. Upon adoption of the standard, premiums on these qualifying callable debt securities will be amortized to the earliest call date. Discounts on purchased debt securities will continue to be accreted to maturity. The amendments are effective for fiscal years beginning after December 15, 2018, and interim periods within those fiscal years. Early adoption is permitted, including adoption in an interim period. Upon transition, entities should apply the guidance on a modified retrospective basis, with a cumulative-effect adjustment to retained earnings as of the beginning of the period of adoption and provide the disclosures required for a change in accounting principle. The Company is currently assessing the impact that ASU 2017-08 will have on its consolidated financial statements.

In August 2017, the FASB issued ASU No. 2017-12, "Derivatives and Hedging (Topic 815): Targeted Improvements to Accounting for Hedging Activities." The amendments in this ASU modify the designation and measurement guidance for hedge accounting as well as provide for increased transparency regarding the presentation of economic results on both the financial statements and related footnotes. Certain aspects of hedge effectiveness assessments will also be simplified upon implementation of this update. The amendments are effective for

annual periods, including interim periods within those annual periods, beginning after December 15, 2018. Early adoption is permitted, including adoption in any interim period. The Company is currently assessing the impact that ASU 2017-12 will have on its consolidated financial statements.

In February 2018, the FASB issued ASU No. 2018-03, "Technical Corrections and Improvements to Financial Instruments-Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities." The amendments provide targeted improvements to address certain aspects of recognition, measurement, presentation, and disclosure of financial instruments. Specifically, the amendments include clarifications related to: measurement elections, transition requirements, and adjustments associated with equity securities without readily determinable fair values; fair value measurement requirements for forward contracts and purchased options on equity securities; presentation requirements for hybrid financial liabilities for which the fair value option has been elected; and measurement requirements for liabilities denominated in a foreign currency for which the fair value option has been elected. The amendments are effective for fiscal years beginning after December 15, 2017, and interim periods within those fiscal years beginning after June 15, 2018. Early adoption is permitted. The Company does not expect the adoption of ASU 2018-03 to have a material impact on its consolidated financial statements.

In June 2018, the FASB issued ASU 2018-07, "Compensation- Stock Compensation (Topic 718): Improvements to Nonemployee Share-Based Payment Accounting." The amendments expand the scope of Topic 718 to include share-based payments issued to nonemployees for goods or services, which were previously excluded. The amendments will align the accounting for share-based payments to nonemployees and employees more similarly. The amendments are effective for fiscal years beginning after December 15, 2018, and interim periods within those fiscal years. Early adoption is permitted. The Company does not expect the adoption of ASU 2018-07 to have a material impact on its consolidated financial statements.

## Note 2. Securities

In January 2016, the FASB issued ASU No. 2016-01, "Financial Instruments - Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities." This ASU requires an entity, among other things, to measure equity investments at fair value through net income, with certain exceptions. The Company began measuring its equity investments at fair value through net income and reclassified \$10,000 of Accumulated Other Comprehensive Income ("AOCI") to retained earnings for the six months ended June 30, 2018, with no effect on total shareholders' equity.

The amortized cost and fair value of securities available for sale, with unrealized gains and losses follows:

	June 30, 2018			
	Gross		Gross	
	Amortized	Unrealized	Unrealized	
(In thousands)	Cost	Gains	(Losses)	Fair Value
Obligations of U.S. Government corporations and agencies	\$59,153	\$ 25	\$ (1,543 )	\$ 57,635
Obligations of states and political subdivisions	14,705	70	(181 )	14,594

-------------------------------------	----------	---------	------------	---------	------------	---------	---

At June 30, 2018 there were approximately 70 securities that were in a loss position due to market conditions, primarily interest rates, and not due to credit concerns.

The nature of securities which were temporarily impaired at June 30, 2018 included one corporate bond with a cost basis net of other-than-temporary impairment (“OTTI”) totaling \$669,000. The value of this bond is based on quoted market prices for similar assets and is a “Class B” or subordinated “mezzanine” tranche of pooled trust preferred securities. Trust preferred securities are collateralized by the interest and principal payments made on trust preferred capital offerings by a geographically diversified pool of several different financial institutions. This bond has an estimated maturity of 16 years and could have been called at par on the five year anniversary date of issuance, which has already passed. The bond reprices every three months at a fixed rate index above the three-month London Interbank Offered Rate (“LIBOR”) and has sufficient collateralization and cash flow projections to satisfy its valuation as of June 30, 2018. This bond is projected to repay the full outstanding interest and principal and is classified as performing. During the three months ended June 30, 2018, one corporate bond, previously held by the Company, went to auction and was settled at its par value of \$2.0 million, resulting in a gain of \$303,000. During the six months ended June 30, 2018, two corporate bonds, previously held by the Company, went to auction and were settled at their par value of \$4.0 million, resulting in gains of \$838,000. During the three months ended June 30, 2018 and 2017, \$28,000 and \$53,000 of interest income was recorded, respectively. During the six months ended June 30, 2018 and 2017, \$79,000 and \$104,000 of interest income was recorded, respectively.

Edgar Filing: FAUQUIER BANKSHARES, INC. - Form 10-Q

Additional information regarding each of the pooled trust preferred securities as of June 30, 2018 follows:

(Dollars in thousands)

Cost, net of OTTI	Fair Value (1)	Percent of Underlying Collateral Performing	Percent of Underlying Collateral in Deferral	Percent of Underlying Collateral in Default	Cumulative Amount of OTTI	Cumulative Other Comprehensive Income, net of tax
\$ 669	\$ 850	88.6	% 4.5	% 6.9	% \$ 331	\$ (143 )

(1)Current Moody's Ratings is B2.

The following roll forward reflects the amount related to credit losses recognized in earnings:

Beginning balance as of December 31, 2017	\$ 1,201
Increases in cash flows expected to be collected that are recognized over the remaining life of the securities	(32 )
Reduction for securities called during the period	(838 )
Ending balance as of June 30, 2018	\$331

The carrying value of securities pledged to secure deposits and for other purposes amounted to \$51.8 million and \$47.6 million at June 30, 2018 and December 31, 2017, respectively.

Note 3. Loans and Allowance for Loan Losses

The Company segregates its loan portfolio into several loan segments: commercial and industrial, real estate, consumer and student loans. Real estate loans are segregated into the following classes: construction and land, commercial real estate, residential real estate and home equity lines of credit. The following tables present the total allowance for loan losses, the allowance by impairment methodology (individually evaluated for impairment or collectively evaluated for impairment), and total loans and loans by impairment methodology (individually evaluated for impairment or collectively evaluated for impairment).

U.S. GAAP requires that the impairment of loans that have been separately identified for evaluation be measured based on the present value of expected future cash flows or, alternatively, the observable market price of the loans or the fair value of the collateral. However, for those loans that are collateral dependent (that is, if repayment of those loans is expected to be provided solely by the underlying collateral) and for which management has determined foreclosure is probable, the measure of impairment is to be based on the net realizable value of the collateral.

A loan is considered impaired when it is probable that the Bank will be unable to collect all principal and interest amounts according to the contractual terms of the loan agreement. Factors involved in determining impairment include, but are not limited to, expected future cash flows, financial condition of the borrower, and the current economic conditions. A performing loan may be considered impaired if the factors above indicate a need for impairment. A loan on nonaccrual status may not be impaired if it is in the process of collection or if the shortfall in payment is insignificant. A delay of less than 30 days or a shortfall of less than 5% of the required principal and interest payments generally is considered insignificant and would not indicate an impairment situation, if in management's judgment the loan will be paid in full. Loans that meet the regulatory definitions of doubtful or loss generally qualify as impaired loans under U.S. GAAP. As is the case for all loans, charge-offs for impaired loans occur when the loan or portion of the loan is determined to be uncollectible.

At June 30, 2018, there were eight loans in the portfolio, totaling \$3.7 million, that have been identified as a troubled debt restructure ("TDR"), of which, five were current and performing in accordance with the modified terms. At December 31, 2017, there were 10 loans in the portfolio, totaling \$5.6 million, that have been identified as TDR, of which six were current and performing in accordance with the modified terms. There were no loan modifications that were classified as TDRs during the three and six months ended June 30, 2018 and 2017. There were no defaults on TDRs occurring within 12 months of modification during the three and six months ended June 30, 2018 and 2017.

For the three and six months ended June 30, 2018 and 2017, the Company had no foreclosed residential real estate property in its possession or in the process of foreclosure.

#### Note 4. Junior Subordinated Debt

On September 21, 2006, the Company's wholly-owned Connecticut statutory business trust privately issued \$4.0 million face amount of the trust's Floating Rate Capital Securities in a pooled capital securities offering ("Trust II"). Simultaneously, the trust used the proceeds of that

sale to purchase \$4.0 million principal amount of the Company's Floating Rate Junior Subordinated Deferrable Interest Debentures due 2036. The interest rate on the capital security resets every three months at 1.70% above the then current three-month LIBOR. Interest is paid quarterly. Total capital securities at June 30, 2018 and December 31, 2017 were \$4.1 million. The Trust II issuance of capital securities and the respective subordinated debentures are callable at any time after five years from the issue date. The subordinated debentures are an unsecured obligation of the Company and are junior in right of payment to all present and future senior indebtedness of the Company. The capital securities are guaranteed by the Company on a subordinated basis.

#### Note 5. Derivative Instruments and Hedging Activities

U.S. GAAP requires that all derivatives be recognized in the consolidated financial statements at their fair values. On the date that the derivative contract is entered into, the Company designates the derivative as a hedge of variable cash flows to be paid or received in conjunction with recognized assets or liabilities, as a cash flow or fair value hedge. For a derivative treated as a cash flow hedge, the ineffective portion of changes in fair value is reported in current period earnings. The effective portion of the cash flow hedge is recorded as an adjustment to the hedged item through other comprehensive income. For a derivative treated as a fair value hedge, the gain or loss on the derivative, as well as the offsetting gain or loss on the hedged item attributable to the hedged risk, are recognized in interest income. The Company uses interest rate swaps to reduce interest rate risk and to manage net interest income.

The Company formally assesses, both at the hedges' inception, and on an on-going basis, whether derivatives used in hedging transactions have been highly effective in offsetting changes in cash flows of hedged items and whether those derivatives are expected to remain highly effective in subsequent periods. The Company discontinues hedge accounting when (a) it determines that a derivative is no longer effective in offsetting changes in cash flows of a hedged item; (b) the derivative expires or is sold, terminated or exercised; (c) probability exists that the forecasted transaction will no longer occur; or (d) management determines that designating the derivative as a hedging instrument is no longer appropriate. In all cases in which hedge accounting is discontinued and a derivative remains outstanding, the Company will carry the derivative at fair value, recognizing changes in fair value in current period income in the consolidated statements of income. There was no cash flow hedge ineffectiveness identified for the three and six months ended June 30, 2018 and 2017.

Interest differentials paid or received under the swap agreements are reflected as adjustments to interest income. These interest rate swap agreements include both cash flow and fair value hedge derivative instruments that qualify for hedge accounting. The notional amounts of the interest rate swaps are not exchanged and do not represent exposure to credit loss. In the event of default by a counter party, the risk in these transactions is the cost of replacing the agreements at current market rates.

The Company entered into an interest rate swap agreement on July 1, 2010 to manage the interest rate exposure on its Floating Rate Junior Subordinated Deferrable Interest Debentures due 2036. By entering into this agreement, the Company converts a floating rate liability into a fixed rate liability through 2020. Under the terms of the agreement, the Company receives interest quarterly at the rate equivalent to three-month LIBOR plus 1.70%, repricing every three months on the same date as the Company's Floating Rate Junior Subordinated Deferrable Interest Debentures, and pays interest expense monthly at the fixed rate of 4.04%. Interest expense on the swap was \$11,000 and \$21,000 for the three months ended June 30, 2018 and 2017, respectively and \$26,000 and \$43,000 for the six months ended June 30, 2018 and 2017, respectively. In addition, on June 24, 2016, the Company entered into a forward interest rate swap agreement to convert the floating rate liability on the same Floating Rate Junior Subordinated Deferrable Interest Debentures to fixed from 2020 to 2031. There was no interest expense recognized on the forward interest rate swap for the three and six months ended June 30, 2018 and 2017, and there will be no exchange of payments until 2020. Both of these swaps are designated as cash flow hedges and changes in the fair value are recorded as an adjustment through other comprehensive income.

The Company entered into two swap agreements to manage the interest rate risk related to two commercial loans. The agreements allow the Company to convert fixed rate assets to floating rate assets through 2022 and 2025. The Company receives interest monthly at the rate equivalent to one-month LIBOR plus a spread repricing on the same date as the loans and pays interest at fixed rates. Interest income on these swaps was \$300 for the three months ended June 30, 2018. Interest expense on these swaps was \$13,000 for the three months ended June 30, 2017, and \$4,000 and \$29,000 for the six months ended June 30, 2018 and 2017, respectively. These swaps are designated as fair value hedges and changes in fair value are recorded in current earnings.

Cash collateral held at other banks for these swaps was \$580,000 and \$1.2 million at June 30, 2018 and December 31, 2017, respectively. Collateral posted and received is dependent on the market valuation of the underlying hedges.

Edgar Filing: FAUQUIER BANKSHARES, INC. - Form 10-Q

The effects of derivative instruments on the consolidated financial statements as of June 30, 2018 and December 31, 2017 are as follows:

Interest rate swap - cash flow	\$ 4,000	\$ (119 )	Other Liabilities		9/15/2020
Interest rate forward swap - cash flow	4,000	164	Other Assets		6/15/2031
Interest rate swap - fair value	1,219	20	Other Assets		4/9/2025
Interest rate swap - fair value	4,475	49	Other Assets		2/12/2022

Note 6. Earnings Per Share

The following table shows the weighted average number of shares used in computing earnings per share and the effect on weighted average number of shares of dilutive potential common stock.

	For the Three Months Ended				For the Six Months Ended			
	June 30, 2018	Per Share	June 30, 2017	Per Share	June 30, 2018	Per Share	June 30, 2017	Per Share
	Shares	Amount	Shares	Amount	Shares	Amount	Shares	Amount
Basic earnings per share	3,773,739	\$ 0.44	3,769,201	\$ 0.26	3,770,983	\$ 0.86	3,765,372	\$ 0.47
Effect of dilutive stock awards	10,833		9,331		9,875		8,253	
Diluted earnings per share	3,784,572	\$ 0.44	3,778,532	\$ 0.26	3,780,858	\$ 0.86	3,773,625	\$ 0.47

Non-vested restricted shares have voting rights and receive non-forfeitable dividends during the vesting period; therefore, they are included in calculating basic earnings per share. The portion of non-vested performance-based stock awards that are expected to vest, but have not yet been awarded, are included in the calculation of diluted earnings per share.

Note 7. Stock Based Compensation

Stock Incentive Plan

On May 19, 2009, the shareholders of the Company approved the Company's Stock Incentive Plan (the "Plan"), which superseded and replaced the Omnibus Stock Ownership and Long Term Incentive Plan.

Under the Plan, stock options, stock appreciation rights, non-vested and/or restricted shares, and long-term performance unit awards may be granted to directors and certain employees for purchase of the Company's common stock. The Company's Board of Directors approved the Plan, effective March 19, 2009, with a termination date of December 31, 2019. The Company's Board of Directors may terminate, suspend or modify the Plan within certain restrictions. The Plan authorizes for issuance 350,000 shares of the Company's common stock. The Plan requires that options be granted at an exercise price equal to at least 100% of the fair market value of the common stock on the date of the grant. Such options are generally not exercisable until three years from the date of issuance and generally require continuous employment during the period prior to exercise. The options will expire in no more than ten years after the date of grant. The stock options, stock appreciation rights, restricted shares, and long-term performance unit awards for certain employees are generally subject to vesting requirements and are subject to forfeiture if vesting and other contractual provision requirements are not met. The Company did not grant stock options during the three and six months ended June 30, 2018 and 2017 and there were no options outstanding at June 30, 2018 and 2017.

## Restricted Shares

The restricted shares are accounted for using the fair market value of the Company's common stock on the date the restricted shares were awarded. The restricted shares issued to certain officers are subject to a vesting period, whereby, the restrictions on the shares lapse on the third year anniversary of the date the restricted shares were awarded. Compensation expense for these shares is recognized over the three-year period. The restricted shares issued to nonemployee directors are not subject to a vesting period; however, they are subject to certain restrictions for the three-year period. Compensation expense for nonemployee directors is recognized at the date the shares are granted.

The Company has granted 7,333 and 10,525 shares of non-vested restricted stock to certain officers and 4,194 and 5,139 shares of vested restricted stock to nonemployee directors during the six months ended June 30, 2018 and 2017, respectively. Compensation expense, net of forfeitures, for non-vested shares was \$34,000 for the three months ended June 30, 2018 and 2017, and \$65,000 and \$64,000 for the six months ended June 30, 2018 and 2017, respectively. For the six months ended June 30, 2018 and 2017, there was \$265,000 and \$261,000, respectively, of total unrecognized compensation expense related to these non-vested shares, which will be recorded in conjunction with the remaining vesting periods. For the three months ended June 30, 2018 compensation expense for nonemployee director shares was \$5,000. There was no compensation expense for nonemployee directors for the three months ended June 30, 2017. There was \$90,000 of compensation expense for nonemployee director shares for the six months ended June 30, 2018 and 2017.

A summary of the status of the Company's non-vested restricted shares granted under the Plan is presented below:

	June 30, 2018		June 30, 2017	
	Weighted Average Fair Value		Weighted Average Fair Value	
	Shares	Per Share	Shares	Per Share
Non-vested shares, beginning	18,062	\$ 16.44	18,045	\$ 15.04
Granted	11,527	21.47	15,664	17.50
Vested	(6,652 )	21.47	(9,123 )	16.74
Forfeited	(368 )	21.47	-	-
Non-vested shares, ending	22,569	\$ 17.98	24,586	\$ 15.98

The Company granted 6,867 and 10,525 shares of performance-based stock rights with respect to certain officers during the six months ended June 30, 2018 and 2017, respectively. The performance-based stock rights are accounted for using the fair market value of the Company's common stock on the date awarded, and adjusted as the market value of the stock changes. The performance-based stock rights are subject to a vesting period, whereby the restrictions on the shares lapse on the third year anniversary of the date the shares were awarded. Until vesting, the shares are not issued and not included in shares outstanding. The awards are subject to the Company reaching a predetermined three-year performance average on the return on average equity ratio, compared to a predetermined peer group of banks. Compensation expense for performance-based stock rights totaled \$21,000 and \$28,000 for the three months ended June 30, 2018 and 2017, respectively, and \$40,000 and \$42,000 for the six months ended June 30, 2018 and 2017, respectively. As of June 30, 2018 and 2017, there was \$227,000 and \$234,000 of total unrecognized compensation expense, respectively, related to non-vested share-based compensation arrangements granted under the Plan.

A summary of the status of the Company's non-vested performance-based stock rights is presented below:

	June 30, 2018		June 30, 2017	
	Weighted		Weighted	
	Average		Average	
	Fair Value		Fair Value	
	Performance Based		Performance Based	
	Stock Rights		Stock Rights	
	Per Share		Per Share	
Non-vested shares, beginning	18,062	\$ 16.44	18,045	\$ 15.72
Granted	6,867	21.47	10,525	17.50
Vested	-	-	-	-
Forfeited	(2,826 )	21.47	(3,984 )	15.75
Non-vested shares, ending	22,103	\$ 17.90	24,586	\$ 16.49

#### Note 8. Employee Benefit Plans

The Company has a defined contribution retirement plan under Internal Revenue Code of 1986 (“Code”) Section 401(k) covering all employees who work at least 1,000 hours per year. Under the plan, a participant may contribute an amount equal to 100% of their covered compensation for the year, not to exceed the dollar limit set by law (Code Section 402(g)). The Company will make an annual matching contribution equal to 100% on the first 6% of compensation deferred, for a maximum match of 6% of compensation. The Company makes an

additional safe harbor contribution equal to 3% of compensation to all eligible participants. The Company's 401(k) plan expenses for the three months ended June 30, 2018 and 2017 were \$181,000 and \$160,000, respectively, and were \$353,000 and \$354,000 for the six months ended June 30, 2018 and 2017, respectively.

The Company maintains a Director Deferred Compensation Plan ("Deferred Compensation Plan"). This plan provides that any nonemployee director of the Company may elect to defer receipt of all or any portion of his or her compensation as a director. A participating director may elect to have amounts deferred under the Deferred Compensation Plan held in a deferred cash account, which is credited on a quarterly basis with interest equal to the highest rate offered by the Bank at the end of the preceding quarter. Alternatively, a participant may elect to have a deferred stock account in which deferred amounts are treated as if invested in the Company's common stock at the fair market value on the date of deferral. The value of a stock account will increase and decrease based upon the fair market value of an equivalent number of shares of common stock. In addition, the deferred amounts deemed invested in common stock will be credited with dividends on an equivalent number shares. Amounts considered invested in the Company's common stock are paid, at the election of the director, either in cash or in whole shares of the common stock and cash-in-lieu of fractional shares. Directors may elect to receive amounts contributed to their respective accounts in one or up to five installments. No directors participated in the Deferred Compensation Plan during the three and six months ended June 30, 2018 and 2017.

The Company has a nonqualified deferred compensation program for a former key employee's retirement, in which the contribution expense is solely funded by the Company. The retirement benefit to be provided is variable based upon the performance of underlying life insurance policy assets. Deferred compensation expense for the three and six months ended June 30, 2018 was \$14,000 and \$27,000, respectively. Deferred compensation expense for the three and six months ended June 30, 2017 was \$8,000 and \$16,000, respectively. Concurrent with the establishment of the deferred compensation program, the Company purchased life insurance policies on this employee with the Company named as owner and beneficiary. These life insurance policies are intended to be utilized as a source of funding the deferred compensation program. Income on these life insurance policies amounted to \$7,000 for the three months ended June 30, 2018 and 2017, and \$14,000 and for six months ended June 30, 2018 and 2017. The Company has recorded on its consolidated balance sheets \$1.3 million in cash surrender value of these policies at June 30, 2018 and December 31, 2017, and \$103,000 and \$93,000, respectively, in accrued liabilities.

#### Note 9. Fair Value Measurement

U.S. GAAP requires public business entities to use the exit price notion when measuring the fair value of financial instruments for disclosure purposes, effective for financial statement periods beginning after December 15, 2017. Therefore, the fair value presented herein may not be comparable to prior periods. Methodologies utilized are as follows:

Income Approach: Fair value is determined based on a discounted cash flow analysis. The discounted cash flow analysis was based on the contractual maturity of the loan and market indications of rates, prepayment speeds, defaults and credit risk.

Asset Approach: Fair value is determined based on the estimated values of the underlying collateral or individual analysis of receipts. This provides a better indication of value than the contractual income streams when loans are not performing or exhibit strong signs indicative of nonperformance.

Fair value has been estimated in accordance with U.S. GAAP, and is intended to represent the price that would be received in an orderly transaction between market participants as of the measurement date. In general, fair value is based upon quoted market prices, where available. If such quoted market prices are not available, at least one significant assumption not observable in the market was utilized. These unobservable assumptions reflect estimates that market participants would use in pricing the asset or liability. Inputs to these valuation techniques are subjective in nature, involve uncertainties and require significant judgement and therefore cannot be determined with precision. Accordingly, the fair value estimates presented are not necessarily indicative of the amounts to be realized in a current market exchange.

U.S. GAAP also indicates that fair value estimates are presented according to a fair value hierarchy comprised of three levels. The levels are based on the markets in which the assets and liabilities are traded and the reliability of the assumptions used to determine fair value. The level within the fair value hierarchy for an asset or liability is based on the highest level of input that is significant to the fair value measurement (with Level 1 considered highest and Level 3 considered lowest). A brief description of each level follows:

Level 1: Inputs are defined as quoted prices (unadjusted) in active markets for identical assets or liabilities.

- Level 2: Inputs are defined as inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly.

Level 3: Inputs are defined as unobservable inputs for the asset or liability.

The following describes the valuation techniques used by the Company to measure certain financial assets and liabilities recorded at fair value on a recurring basis in the financial statements:

Securities available for sale: Securities available for sale are recorded at fair value on a recurring basis. Fair value measurement is based upon quoted market prices, when available (Level 1). If quoted market prices are not available, fair values are measured utilizing independent

valuation techniques of identical or similar securities for which significant assumptions are derived primarily from or corroborated by observable market data (Level 2). If the inputs used to provide the evaluation for certain securities are unobservable and/or there is little, if any, market activity, then the security would fall to the lowest level of the hierarchy (Level 3). The Company's investment portfolio is primarily valued using fair value measurements that are considered to be Level 2. The Company has contracted with a third party portfolio accounting service vendor for valuation of its securities. The vendor's primary source for security valuation is Interactive Data Corporation ("IDC"), which evaluates securities based on market data. IDC utilizes evaluated pricing models that vary by asset class and include available trade, bid, and other market information. Generally, the methodology includes broker quotes, proprietary models, vast descriptive terms and conditions databases, as well as extensive quality control programs.

Interest rate swaps: Interest rate swaps are recorded at fair value on a recurring basis. The Company utilizes interest rate swap agreements as part of the management of interest rate risk to modify the repricing characteristics of certain portions of the Company's interest-bearing assets and liabilities. The Company has contracted with a third party to provide valuations for interest rate swaps using standard valuation techniques and therefore classifies such valuation as Level 2. The Company has considered counterparty credit risk in the valuation of its interest rate swap assets and has considered its own credit risk in the valuation of its interest rate swap liabilities.

The following table presents the balances of financial assets and liabilities measured at fair value on a recurring basis as of June 30, 2018 and December 31, 2017 by levels within the valuation hierarchy:

(In thousands)	Fair Value Measurements			
	Balance	Level 1	Level 2	Level 3
Assets at June 30, 2018:				
Available for sale securities:				
Obligations of U.S. Government corporations and agencies	\$57,635	\$-	\$57,635	\$-
Obligations of states and political subdivisions	14,594	-	14,594	-
Corporate bonds	850	-	850	-
Total available for sale securities	73,079	-	73,079	-
Interest rate swaps	512	-	512	-
Total assets at fair value	\$73,591	\$-	\$73,591	\$-
Liabilities at June 30, 2018:				
Interest rate swaps	\$39	\$-	\$39	\$-
Total liabilities at fair value	\$39	\$-	\$39	\$-
Assets at December 31, 2017:				
Available for sale securities:				
Obligations of U.S. Government corporations and agencies	\$52,377	\$-	\$52,377	\$-
Obligations of states and political subdivisions	15,255	-	15,255	-
Corporate bonds	4,139	-	4,139	-
Mutual funds	382	382	-	-
Total available for sale securities	72,153	382	71,771	-
Interest rate swaps	233	-	233	-
Total assets at fair value	\$72,386	\$382	\$72,004	\$-
Liabilities at December 31, 2017:				
Interest rate swaps	\$119	\$-	\$119	\$-
Total liabilities at fair value	\$119	\$-	\$119	\$-

Certain assets are measured at fair value on a nonrecurring basis in accordance with U.S. GAAP. Adjustments to the fair value of these assets usually result from the application of lower-of-cost-or-market accounting or write-downs of individual assets.

The following describes the valuation techniques used by the Company to measure certain financial assets recorded at fair value on a nonrecurring basis in the financial statements:

**Mortgage Loans Held for Sale:** Mortgage loans held for sale are carried at lower of cost or market value. These loans currently consist of 1-4 family residential loans originated for sale in the secondary market. Fair value is based on the price secondary markets are currently offering for similar loans using observable market data which is not materially different than cost due to the short duration between origination and sale (Level 2). As such, the Company records any fair value adjustments on a nonrecurring basis. No nonrecurring fair value adjustments were recorded on mortgage loans held for sale during the three and six months ended June 30, 2018. Gains and losses on the sale of loans are recorded as a component of noninterest income on the consolidated statements of income.

**Impaired Loans:** A loan is designated as impaired when, in the judgment of management based on current information and events, it is probable that all amounts due according to the contractual terms of the loan agreement will not be collected. The measurement of loss associated with

impaired loans can be based on either the observable market price of the loans or the fair value of the collateral securing the loans, or the present value of the cash flows. Collateral may be in the form of real estate or business assets including equipment, inventory, and accounts receivable. The vast majority of the Company's collateral is real estate. The value of real estate collateral is determined utilizing an income or market valuation approach based on an appraisal, of one year or less, conducted by an independent, licensed appraiser outside of the Company using observable market data (Level 2). However, if the collateral is a house or building in the process of construction or if an appraisal of the real estate property is more than one year old and not solely based on observable market comparables or management determines the fair value of the collateral is further impaired below the appraised value, then the fair value is considered Level 3. The value of business equipment is based upon an outside appraisal, of one year or less, if deemed significant, or the net book value on the applicable business' financial statements if not considered significant using observable market data. Likewise, values for inventory and accounts receivable collateral are based on financial statement balances or aging reports (Level 3). Impaired loans allocated to the allowance for loan losses are measured at fair value on a nonrecurring basis. Any fair value adjustments are recorded in the period incurred as provision for loan losses on the consolidated statements of income.

Other Real Estate Owned ("OREO"): OREO is measured at fair value less estimated selling costs. Fair value is based upon independent market prices, appraised values of the collateral, or management's estimation of the value of the collateral. The Company considers the OREO as nonrecurring Level 3.

The following table summarizes the Company's financial assets that were measured at fair value on a nonrecurring basis at June 30, 2018 and December 31, 2017.

(In thousands)	June 30, 2018			
	Balance	Level 1	Level 2	Level 3

The fair value of a financial instrument is the current amount that would be exchanged between willing parties, other than in a forced liquidation. Fair value is best determined based upon quoted market prices. However, in many instances, there are no quoted market prices for the Company's various financial instruments. In cases where quoted market prices are not available, fair values are based on estimates using present value or other valuation techniques. Those techniques are significantly affected by the assumptions used, including the discount rate and estimates of future cash flows. Accordingly, the fair value estimates may not be realized in an immediate settlement of the instruments. U.S. GAAP excludes certain financial instruments and all non-financial instruments from its disclosure requirements. Accordingly, the aggregate fair value amounts presented may not necessarily represent the underlying fair value of the Company.

The following methods and assumptions were used to estimate the fair value of each class of financial instruments for which it is practicable to estimate that value:

**Cash and cash equivalents:** The carrying amounts of cash and short-term instruments with a maturity of three months or less approximate fair value. Instruments with maturities of greater than three months are estimated using a discounted cash flow calculation that applies interest rates currently being offered on similar instruments.

**Securities:** For securities held for investment purposes, fair values are based on quoted market prices or dealer quotes. If quoted market prices are not available, fair values are based on quoted market prices for similar securities. Restricted securities are carried at cost based on redemption provisions of the issuers. See Note 2 "Securities" for further discussion on determining fair value for pooled trust preferred securities.

**Mortgage loans held for sale:** Fair value for mortgage loans held for sale is based on the price secondary markets are currently offering for similar loans.

**Loans:** For variable-rate loans that reprice frequently and with no significant change in credit risk, fair values are based on carrying values. Fair values for certain mortgage loans (e.g., 1-4 family residential), credit card loans, and

other consumer loans are based on quoted market prices of similar loans sold in conjunction with securitization transactions, adjusted for differences in loan characteristics. Fair values for other loans (i.e., commercial real estate and investment property mortgage loans, commercial and industrial loans) are estimated using discounted cash flow analyses, using interest rates currently being offered for loans with similar terms to borrowers of similar credit quality. Fair value for impaired loans is described above.

Accrued Interest: The carrying amounts of accrued interest approximate fair value.

Bank-owned life insurance: The carrying amount of life insurance contracts is assumed to be a reasonably appropriate fair value. Life insurance contracts are carried on the balance sheet at their redemption value. This redemption value is based on existing market conditions and therefore represents the fair value of the contract.

Interest Rate Swaps: The fair values are based on quoted market prices or mathematical models using current and historical data.

**Deposits:** The fair values disclosed for demand deposits (i.e., interest and noninterest-bearing checking, statement savings and money market accounts) are, by definition, equal to the amount payable at the reporting date (that is, their carrying amounts). Fair values of fixed rate certificates of deposit are estimated using a discounted cash flow calculation that applies interest rates currently being offered to a schedule of aggregated expected monthly maturities on time deposits.

**Borrowings:** The fair values of the Company's advances from the Federal Home Loan Bank of Atlanta and other borrowings are estimated using discounted cash flow analyses based on the Company's current incremental borrowing rates for similar types of borrowing arrangements.

**Off-Balance Sheet Financial Instruments:** The fair value of commitments to extend credit is estimated using the fees currently charged to enter similar agreements, taking into account the remaining terms of the agreements and the present creditworthiness of the counterparties. For fixed-rate loan commitments, fair value also considers the difference between current levels of interest rates and the committed rates. The fair value of standby letters of credit are based on fees currently charged for similar agreements or on the estimated cost to terminate them or otherwise settle the obligations with the counterparties at the reporting date. At June 30, 2018 and December 31, 2017, the fair value of loan commitments and standby letters of credit were deemed immaterial.

The Company assumes interest rate risk (the risk that general interest rate levels will change) as a result of its normal operations. As a result, the fair values of the Company's financial instruments will change when interest rate levels change and that change may be either favorable or unfavorable to the Company. Management attempts to match maturities of assets and liabilities to the extent believed necessary to minimize interest rate risk. However, borrowers with fixed rate obligations are less likely to prepay in a rising rate environment. Conversely, depositors who are receiving fixed rates are more likely to withdraw funds before maturity in a rising rate environment and less likely to do so in a falling rate environment. Management monitors rates and maturities of assets and liabilities and attempts to minimize interest rate risk by adjusting terms of new loans and deposits and by investing in securities with terms that mitigate the Company's overall interest rate risk.

#### Note 10. Accumulated Other Comprehensive Income (Loss)

Changes in accumulated other comprehensive income (loss), net of tax, for the six months ended June 30, 2018 and 2017 were:

	Gains (Losses) on Cash Flow Hedges	Unrealized Gains (Losses) on Available for Sale Securities	Supplemental Executive Retirement Plans	Total
(In thousands)				
Balance December 31, 2017	\$ 37	\$ (37 )	\$ 125	\$125
Reclassification of net unrealized gains on equity securities from AOCI per ASU 2016-01	-	(10 )	-	(10 )
Net current-period other comprehensive income (loss)	189	(1,099 )	-	(910)
Balance June 30, 2018	\$ 226	\$ (1,146 )	\$ 125	\$(795)

Note 11. Investment in Affordable Housing Projects

The Company has investments in certain affordable housing projects located in the Commonwealth of Virginia through seven limited liability partnerships of the Bank. These partnerships exist to develop and preserve affordable housing for low income families through residential rental property projects. The Company exerts no control over the operating or financial policies of the partnerships. Return on these investments is through receipt of tax credits and other tax benefits which are subject to recapture by taxing authorities based on compliance features at the project level. The investments are due to expire by 2035. The Company accounts for the affordable housing investments using the equity method and has recorded \$4.6 million and \$3.8 million in other assets at June 30, 2018 and December 31, 2017, respectively, and \$1.2 million in other liabilities related to unfunded capital calls through 2021 at June 30, 2018 and December 31, 2017. The related federal tax credits, included in income tax expense in the consolidated statements of income, for the six months ended June 30, 2018 and 2017 were \$252,000 and \$270,000, respectively. There were \$63,000 and \$65,000 in flow-through losses recorded in noninterest income during the three months ended June 30, 2018 and 2017, respectively, and \$143,000 and \$87,000 in flow-through losses for the six months ended June 30, 2018 and 2017, respectively.

Note 12. Revenue Recognition

On January 1, 2018, the Company adopted ASU 2014-09, “Revenue from Contracts with Customers (Topic 606)”, and all amendments thereto (collectively, ASU 2014-09), which (i) creates a single framework for recognizing revenue from contracts with customers that fall within its scope and (ii) revises when it is appropriate to recognize a gain/loss from the transfer of nonfinancial assets, such as other real estate owned.

The Company adopted ASU 2014-09 using the modified retrospective method applied to all contracts not completed as of January 1, 2018. Results for reporting periods beginning after January 1, 2018 are presented under ASU 2014-09, while prior period amounts continue to be reported in accordance with pronouncements in effect prior to January 1, 2018. The adoption of ASU 2014-09 did not result in a change to the accounting for any of the in-scope revenue streams; therefore, no cumulative effect adjustment was recorded.

Most revenue associated with the Company's financial instruments, including interest income, are outside the scope of ASU 2014-09. The Company's services that fall within the scope of ASU 2014-09 are presented within noninterest income and are recognized as revenue as the Company satisfies its obligation to the customer. A description of the Company's primary revenue streams accounted for under ASU 2014-09 follows:

**Trust, estate and brokerage fee income:** Income is primarily comprised of fees earned from the management and administration of trusts, estates and other customer assets and by providing investment brokerage services. Fees that are transaction-based (e.g., execution of trades) are recognized on a monthly basis. Other fees, or commissions, are earned over time as the contracted monthly or quarterly services are provided and are generally assessed based on either account activity or the market value of assets under management at month end.

**Service charges on deposit accounts:** The Company earns fees from its deposit customers for overdraft and account maintenance services. Overdraft fees are recognized when the overdraft occurs. Account maintenance fees, which relate primarily to monthly maintenance, are earned over the course of a month, representing the period over which the Company satisfies the performance obligation. The Company also earns fees from its customers for transaction-based services. Such services include safe deposit box, ATM, stop payment and wire transfer fees. In each case, these service charges and fees are recognized in income at the time or within the same period that the Company's performance obligation is satisfied.

**Interchange fee income, net:** The Company earns interchange fees from debit and credit cardholder transactions conducted through various payment networks. Interchange fees from cardholder transactions represent a percentage of the underlying transaction value and are recognized daily, concurrently with the transaction processing services.

Noninterest income by major source, for the three and six months ended June 30, 2018 and 2017, consisted of the following:

	For the Three Months Ended June 30, 2018		For the Six Months Ended June 30, 2017

## ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

### CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS

In addition to the historical information contained herein, this report contains forward-looking statements.

Forward-looking statements are based on certain assumptions and describe future plans, strategies, and expectations of Fauquier Bankshares, Inc. (the "Company"), and are generally identifiable by use of the words "believe," "expect," "intend," "anticipate," "estimate," "project" "may," "will" or similar expressions. Although the Company believes its plans, intentions and expectations reflected in these forward-looking statements are reasonable, the Company can give no assurance that these plans, intentions, or expectations will be achieved. The Company's ability to predict results or the actual effect of future plans or strategies is inherently uncertain, and actual results could differ materially from those contemplated. Factors that could have a material adverse effect on the Company's operations and future prospects include, but are not limited to, changes in: interest rates, general economic conditions, the legislative/regulatory climate, monetary and fiscal policies of the U.S. Government, including policies of the U.S. Treasury and the Board of Governors of the Federal Reserve System, the quality or composition of the loan or investment portfolios, the value of the collateral securing loans in the portfolio, demand for loan products, deposit flows, the level of net charge-offs on loans and the adequacy of the allowance for loan losses, competition, demand for financial services in the Company's market area, the Company's plans to increase market share, mergers, acquisitions and dispositions, and tax and accounting principles, policies and guidelines. These risks and uncertainties should be considered in evaluating forward-looking statements in this report and you should not place undue reliance on such statements, which reflect the Company's position as of the date of this report.

### GENERAL

The Company was incorporated under the laws of the Commonwealth of Virginia on January 13, 1984. The Company is a registered bank holding company and owns all of the voting shares of The Fauquier Bank (the "Bank"). The Company engages in its business through the Bank, a Virginia state-chartered bank that commenced operations in 1902. The Company has no significant operations other than owning the stock of the Bank. The Bank has 11 full service branch offices located in the Virginia communities of Old Town-Warrenton, Warrenton, Catlett, The Plains, Sudley Road-Manassas, New Baltimore, Bealeton, Bristow, Haymarket, Gainesville, and Centreville Road-Manassas. The executive offices of the Company and the main office of the Bank are located at 10 Courthouse Square, Warrenton, Virginia 20186.

The Bank's general market area principally includes Fauquier County, Prince William County, and neighboring communities and is located approximately 50 miles southwest of Washington, D.C.

The basic services offered by the Bank include: interest and noninterest-bearing demand deposit accounts, money market deposit accounts, NOW accounts, time deposits, safe deposit services, automated teller machines ("ATM"), debit and credit cards, cash management, direct deposits, notary services, night depository, cashier's checks, domestic and international collections, automated teller services, drive-in tellers, mobile and internet banking, telephone banking, and banking by mail. In addition, the Bank makes secured and unsecured commercial and real estate loans, issues stand-by letters of credit and grants available credit for installment, unsecured and secured personal loans, residential mortgages and home equity loans, as well as, automobile and other types of consumer financing. The deposits of the Bank are insured up to applicable limits by the Deposit Insurance Fund of the Federal Deposit Insurance Corporation ("FDIC"). The Bank provides ATM cards, as a part of the Maestro, Accel-Exchange, and Plus ATM networks, thereby permitting customers to utilize the convenience of larger ATM networks. The Bank also is a member of the Certificate of Deposit Account Registry Service ("CDARS") and Insured Cash Sweep Service ("ICS"), to provide customers multi-million dollar FDIC insurance on certificates of deposit investments and deposit sweeps through the transfer and/or exchange with other FDIC insured institutions. CDARS and ICS are registered trademarks of Promontory Interfinancial Network, LLC.

The Bank operates a Wealth Management Services (“WMS” or “Wealth Management”) division that began with the granting of trust powers to the Bank in 1919. This division provides personalized services including investment management, financial planning, trust, estate settlement, retirement, insurance, and brokerage services.

The Bank, through its subsidiary Fauquier Bank Services, Inc., has equity ownership interests in Bankers Insurance, LLC, a Virginia independent insurance company, Bankers Title Shenandoah, LLC, a title insurance company, and Infinex Investments, Inc., a full service broker/dealer. Bankers Insurance and Bankers Title Shenandoah are owned by a consortium of Virginia community banks, and Infinex is owned by banks and banking associations in various states.

The revenues of the Bank are primarily derived from interest on, and fees received in connection with, real estate and other loans, and from interest and dividends from investment securities, and short-term investments. The principal sources of funds for the Bank’s lending activities are its deposits, repayment of loans, maturity of investment securities, and borrowings from the Federal Home Loan Bank of Atlanta (“FHLB”). Additional revenues are derived from fees for deposit related and WMS related services. The Bank’s principal expenses are salaries and benefits and occupancy expense.

The Bank's operations are materially and significantly influenced by general economic conditions and by related monetary and fiscal policies of financial institution regulatory agencies, including the Board of Governors of the Federal Reserve System ("Federal Reserve"). As a Virginia-chartered bank and a member of the Federal Reserve, the Bank is supervised and examined by the Federal Reserve and the Virginia State Corporation Commission. Interest rates on competing investments and general market rates of interest influence deposit flows and costs of funds. Lending activities are affected by the demand for financing of real estate and other types of loans, which in turn is affected by the interest rates at which such financing may be offered and other factors affecting local demand and availability of funds. The Bank faces strong competition in the attraction of deposits, its primary source of lendable funds, and in the origination of loans.

## CRITICAL ACCOUNTING POLICIES

**GENERAL.** The Company's financial statements are prepared in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP"). The financial information contained within the Company's statements is, to a significant extent, based on measures of the financial effects of transactions and events that have already occurred. A variety of factors could affect the ultimate value that is obtained either when earning income, recognizing an expense, recovering an asset or relieving a liability. The Company uses historical loss factors as one factor in determining the inherent loss that may be present in its loan portfolio. Actual losses could differ significantly from the historical factors that the Company uses in its estimates. In addition, U.S. GAAP itself may change from one previously acceptable accounting method to another method. Although the economics of the Company's transactions would be the same, the timing of the recognition of the Company's transactions could change.

**ALLOWANCE FOR LOAN LOSSES.** The allowance for loan losses is an estimate of the losses that may be sustained in the Company's loan portfolio. The allowance is based on three basic accounting principles: (i) Accounting Standards Codification ("ASC") 450 "Contingencies", which requires losses to be accrued when they are probable of occurring and estimable, (ii) ASC 310 "Receivables", which requires losses be accrued based on the differences between the value of collateral, present value of future cash flows or values that are observable in the secondary market and the loan balance and (iii) Securities and Exchange Commission (the "SEC"), Staff Accounting Bulletin No. 102, "Selected Loan Loss Allowance Methodology and Documentation Issues", which requires adequate documentation to support the allowance for loan losses estimate.

The Company's allowance for loan losses has three basic components: the specific allowance, the general allowance and the unallocated component. Each of these components is determined based upon estimates that can and do change as actual events occur. The specific allowance is used to individually allocate an allowance for larger balance and/or non-homogeneous loans identified as impaired. The specific allowance uses various techniques to arrive at an estimate of loss. Analysis of the borrower's overall financial condition, resources and payment record, the prospects for support and financial guarantors, and the fair market value of collateral are used to estimate the probability and severity of inherent losses. The general allowance is used for estimating the loss on pools of smaller-balance, homogeneous loans; including 1-4 family mortgage loans, installment loans and other consumer loans. Also, the general allowance is used for the remaining pool of larger balance and/or non-homogeneous loans which were not identified as impaired. The general allowance begins with estimates of probable losses inherent in the homogeneous portfolio based upon various statistical analyses. These include analysis of historical delinquency and credit loss experience, together with analyses that reflect current trends and conditions. The Company also considers trends and changes in the volume and term of loans, changes in the credit process and/or lending policies and procedures, and an evaluation of overall credit quality. The general allowance uses a historical loss view as an indicator of future losses. As a result, even though this

history is regularly updated with the most recent loss information, it could differ from the loss incurred in the future. The general allowance also captures losses that are attributable to various economic events, industry or geographic sectors whose impact on the portfolio have occurred but have yet to be recognized. The unallocated component of the allowance reflects the margin of imprecision inherent in the underlying assumptions used in the methodologies for estimating specific and general losses in the portfolio.

Specifically, the Company uses both external and internal qualitative factors when determining the non-loan-specific allowances. The external factors utilized include: unemployment in the Company's defined market area of Fauquier County, Prince William County, and the City of Manassas ("market area"), as well as state and national unemployment trends; new residential construction permits for the market area; bankruptcy statistics for the region and the United States; and foreclosure statistics for the market area and the state. Quarterly, these external qualitative factors, as well as relevant anecdotal information, are evaluated from data compiled from local periodicals such as The Washington Post, The Fauquier Times, and The Bull Run Observer, which cover the Company's market area. Additionally, data is gathered from the Federal Reserve Beige Book for the Richmond Federal Reserve District, Global Insight's monthly economic review, the George Mason School of Public Policy Center for Regional Analysis, and daily economic updates from various other sources. Internal Bank data utilized includes: past due loan aging statistics, nonperforming loan trends, trends in collateral values, loan concentrations, loan review status downgrade trends, and lender turnover and experience trends. Both external and internal data is analyzed on a rolling twelve quarter basis to determine risk profiles for each qualitative factor. Ratings are assigned through a defined matrix to calculate the allowance consistent with authoritative accounting literature. A narrative summary of the reserve allowance is produced quarterly and reported directly to the Company's Board of Directors. The Company's application of these qualitative factors to the allowance for loan losses has been consistent over the reporting period.

The Company employs an independent outsourced loan review function, which annually substantiates and/or adjusts internally generated risk ratings. This independent review is reported directly to the Company's Board of Directors' audit committee, and the results of this review are factored into the calculation of the allowance for loan losses.

**OTHER-THAN-TEMPORARY IMPAIRMENT (“OTTI”) FOR SECURITIES.** Impairment of securities occurs when the fair value of a security is less than its amortized cost. For debt securities, impairment is considered other-than-temporary and recognized in its entirety in net income if either (i) the Company intends to sell the security or (ii) it is more-likely-than-not that the Company will be required to sell the security before recovery of its amortized cost basis. If, however, the Company does not intend to sell the security and it is not more-likely-than-not that the Company will be required to sell the security before recovery, the Company must determine what portion of the impairment is attributable to a credit loss, which occurs when the amortized cost basis of the security exceeds the present value of the cash flows expected to be collected from the security. If there is no credit loss, there is no OTTI. If there is a credit loss, OTTI exists, and the credit loss must be recognized in net income and the remaining portion of impairment must be recognized in other comprehensive income (loss). For equity securities, impairment is considered to be other-than-temporary based on the Company's ability and intent to hold the investment until a recovery of fair value. OTTI of an equity security results in a write-down that must be included in net income. The Company regularly reviews each investment security for OTTI based on criteria that includes the extent to which cost exceeds market price, the duration of any market decline, the financial health of and specific prospects for the issuer, the best estimate of the present value of cash flows expected to be collected from debt securities, the intention with regard to holding the security to maturity and the likelihood that the Company would be required to sell the security before recovery.

## EXECUTIVE OVERVIEW

This discussion is intended to focus on certain financial information regarding the Company and the Bank and may not contain all the information that is important to the reader. The purpose of this discussion is to provide the reader with a more thorough understanding of the Company's financial statements. As such, this discussion should be read carefully in conjunction with the consolidated financial statements and accompanying notes contained elsewhere in this report.

The Company strives to be a top performing community bank by providing financial services in its market including consistent quality customer service, premier technological support, value-added products, a strong commitment to the community and enhancing shareholder value.

Net income was \$1.7 million, or \$0.44 per diluted share, for the second quarter of 2018, an increase of \$669,000 from net income of \$1.0 million, or \$0.26 per diluted share, for the second quarter of 2017. Net income was \$3.2 million for the six months ended June 30, 2018, or \$0.86 per diluted share, an increase of \$1.5 million from \$1.8 million, or \$0.47 per diluted share, for the six months ended June 30, 2017.

As of June 30, 2018, the Company had total assets of \$651.5 million compared with \$644.6 million at December 31, 2017. Loans, net of the allowance for loan losses, were \$505.6 million at June 30, 2018, an increase of \$7.9 million from \$497.7 million at December 31, 2017. Deposits, totaling \$565.8 million at June 30, 2018, decreased \$4.2 million when compared with December 31, 2017 of \$570.0 million. Assets under WMS management, totaling \$297.5 million in market value at June 30, 2018, compared with \$297.7 million at December 31, 2017.

Net interest income is the largest component of net income, and is the difference between income generated on interest-earning assets and interest expense incurred on interest-bearing liabilities. Future trends regarding net interest income are dependent on the absolute level of market interest rates, the shape of the yield curve, the amount of lost income from nonperforming assets, the amount of prepaying loans, the mix and amount of various deposit types, competition for loans and deposits, and many other factors. These factors are individually difficult to predict, and when taken together, the uncertainty of future trends compounds. Based on management's current projections, net interest income may increase as average interest-earning assets increase, but this may be offset in part or in whole by a possible contraction in the Bank's net interest margin resulting from competitive market conditions and/or a flat or inverted yield curve. A steeper yield curve is projected to result in an increase in net interest income, while a flatter or inverted yield curve is projected to result in a decrease in net interest income.

The Bank's nonperforming assets totaled \$9.1 million or 1.40% of total assets at June 30, 2018, compared with \$10.4 million or 1.61% of total assets at December 31, 2017. Nonaccrual loans totaled \$2.7 million or 0.52% of total loans at June 30, 2018 compared with \$3.2 million or 0.63% of total loans at December 31, 2017. The allowance for loan losses was \$5.0 million or 0.98% of total loans at June 30, 2018 compared with \$5.1 million or 1.01% of total loans at December 31, 2017.

#### OPERATING RESULTS FOR THE THREE AND SIX MONTHS ENDED JUNE 30, 2018 AND 2017

##### NET INCOME

Net income was \$1.7 million, or \$0.44 per diluted share, for the quarter ended June 30, 2018, an increase of \$669,000 from \$1.0 million, or \$0.26 per diluted share for the same period in 2017. Net income for the six months ended June 30, 2018 was \$3.2 million, or \$0.86 per diluted share, compared with \$1.8 million, or \$0.47 per diluted share, for the six months ended June 30, 2017. Profitability as measured by return on average assets and return on average equity increased to 1.02% and 11.66%, respectively, for the second quarter of 2018 from 0.63% and 7.10%, respectively, for the second quarter of 2017. Profitability as measured by return on average assets and return on average equity increased to 0.99% and 11.55%, respectively, for the six months ended June 30, 2018 compared with 0.57% and 6.40%, respectively, for the six months ended June 30, 2017.

## NET INTEREST INCOME AND EXPENSE

Net interest income increased \$650,000 or 12.49% to \$5.9 million for the quarter ended June 30, 2018 from \$5.2 million for the quarter ended June 30, 2017. For the six month periods ended June 30, 2018 and 2017, net interest income was \$11.6 million and \$10.2 million, respectively, an increase of \$1.4 million or 14.01%. The Company's net interest margin increased to 3.88% in the second quarter of 2018 from 3.60% in the second quarter of 2017. For the six months ended June 30, 2018 and 2017, the Company's net interest margin was 3.81% and 3.56%, respectively.

Interest income increased \$827,000 or 14.48% to \$6.5 million for the second quarter of 2018 from \$5.7 million for the second quarter of 2017. Interest income was \$12.9 million and \$11.1 million for the six months ended June 30, 2018 and 2017, respectively, an increase of \$1.8 million or 16.01%. This increase was due to higher average balances on earning assets for the three and six months ended June 30, 2018 compared with the three and six months ended June 30, 2017. The yield on earning assets increased 39 basis points from 3.94% during the second quarter of 2017 to 4.33% during the second quarter of 2018 and increased 35 basis points from 3.90% for the six months ended June 30, 2017 to 4.25% for the six months ended June 30, 2018. The changes in earnings assets were:

- Average balances for loans increased \$49.3 million from \$457.5 million for the second quarter of 2017 to \$506.8 million for the second quarter of 2018, and increased \$49.1 million from \$456.4 million for the six months ended June 30, 2017 to \$505.5 million for the six months ended June 30, 2018. As a result of increasing balances, the Company's loan pricing strategies and the current interest rate environment, the tax equivalent yield increased 20 basis points to 4.71% for the second quarter of 2018, compared with 4.51% for the second quarter of 2017, and increased 20 basis points to 4.67% for the six months ended June 30, 2018 from 4.47% for the six months ended June 30, 2017.

- Average balances for securities increased \$10.5 million from \$63.4 million for the second quarter of 2017 to \$73.9 million for the second quarter of 2018, and increased \$15.8 million from \$58.0 million for the six months ended June 30, 2017 to \$73.8 million for the six months ended June 30, 2018. The tax equivalent yield decreased from 2.90% for the second quarter of 2017 to 2.76% for the second quarter of 2018, and decreased from 2.87% for the six months ended June 30, 2017 to 2.71% for the six months ended June 30, 2018. The decline in yield was due primarily to maturities and calls on higher yielding securities held in the portfolio. Management continues to invest, in accordance with the Investment Policy, in securities that diversify the portfolio and strengthen the Company's liquidity position.

- Average balances for deposits in other banks decreased to \$26.7 million for the second quarter of 2018 from \$66.2 million for the second quarter of 2017, and decreased to \$35.6 million for the six months ended June 30, 2018 from \$66.3 million for the six months ended June 30, 2017. This decline was the result of lower balance requirements at the Federal Reserve Bank of Richmond.

Interest expense increased \$177,000 or 34.77% from \$509,000 for the second quarter of 2017 to \$686,000 for the second quarter of 2018. Interest expense was \$1.3 million and \$978,000 for the six months ended June 30, 2018 and 2017, respectively, an increase of \$360,000 or 36.81%. These increases were primarily due to increases in volume and average rates paid for interest-bearing deposit accounts and FHLB advances. The average rate on total interest-bearing liabilities increased to 0.49% for the second quarter of 2018 from 0.36% for the second quarter of 2017 and increased to 0.45% for the six months ended June 30, 2018 from 0.34% for the six months ended June 30, 2017.

- Average balances for deposits increased \$11.1 million from \$442.1 million for the second quarter of 2017 to \$453.2 million for the second quarter of 2018, and increased \$15.0 million from \$435.9 million for the six months ended June 30, 2017 to \$450.9 million for the six months ended June 30, 2018. Interest paid on deposits increased \$161,000 or 41.07% from \$392,000 for the second quarter of 2017 to \$553,000 for the second quarter of

2018. Interest paid on deposits was \$996,000 and \$733,000 for the six months ended June 30, 2018 and 2017, respectively, an increase of \$264,000 or 36.02%.

- Average balances for federal funds purchased and FHLB advances increased \$5.3 million from \$10.7 million for the second quarter of 2017 to \$16.0 million for the second quarter of 2018, and increased \$13.3 million from \$11.8 million for the six months ended June 30, 2017 to \$25.1 million for the six months ended June 30, 2018. Interest expense on federal funds purchased and FHLB advances was \$84,000 and \$67,000 for the second quarter of 2018 and 2017, respectively. Interest expense on federal funds purchased and FHLB advances was \$243,000 and \$147,000 for the six months ended June 30, 2018 and 2017, respectively. These increases were due to the Company's funding needs during the periods.

The following table sets forth information, for the periods indicated, relating to the Company's average balance sheet and reflects the average yield on assets and average cost of liabilities and the average yields and rates paid. These yields and costs are derived by dividing income or expense by the average daily balances of assets and liabilities, respectively.

## RATE VOLUME ANALYSIS

The following table sets forth certain information regarding changes in interest income and interest expense of the Company for the periods indicated. For each category of interest-earning asset and interest-bearing liability, information is provided on changes attributable to changes in volume (change in volume multiplied by old rate) and changes in rates (change in rate multiplied by old volume). Changes in rate-volume, which cannot be separately identified, are allocated proportionately between changes in rate and changes in volume.

## PROVISION FOR LOAN LOSSES

The provision for loan losses was \$12,000 for the second quarter of 2018 compared to \$235,000 for the second quarter of 2017, and was \$312,000 and \$285,000 for the six months ended June 30, 2018 and 2017, respectively. Changes to provision expense were due to portfolio growth, historical net charge-off history, asset quality indicators, impaired loans and other qualitative factors.

The amount of the provision for loan loss is based upon management's evaluation of the adequacy of the allowance for loan losses, which encompasses the overall risk characteristics of the loan portfolio, trends in the Bank's delinquent and nonperforming loans, estimated values of collateral, and the impact of economic conditions. The loss history and prolonged changes in portfolio delinquency trends by loan category, and changes in economic trends are also considered in determining the allowance. There can be no assurances, however, that future losses will not exceed estimated amounts, or that increased amounts of provisions for loan losses will not be required in future periods.

## NONINTEREST INCOME

Noninterest income increased \$231,000 or 16.52% to \$1.6 million for the second quarter of 2018 from \$1.4 million for the second quarter of 2017. Noninterest income was \$3.5 million for the six months ended June 30, 2018, an increase of \$682,000 or 24.34%, compared with \$2.8 million for the six months ended June 30, 2017. The following summarizes noninterest income for the three and six months ended June 30, 2018 and 2017:

(In thousands)	Three Months Ended June 30, 2018		Six Months Ended June 30, 2018	
	2018	2017	2018	2017
Noninterest income				
Trust and estate fees	\$403	\$412	\$775	\$772
Brokerage fees	47	34	88	91
Service charges on deposit accounts	404	499	848	985
Interchange fee income, net	327	335	612	620
Bank-owned life insurance	91	91	180	180
Other service charges, commissions and other income	31	22	122	157
Gain on call of securities available for sale	303	-	838	-
Gain on sale of mortgage loans held for sale, net	18	-	24	-
Total noninterest income	\$1,624	\$1,393	\$3,487	\$2,805

The primary changes in noninterest income were:

Trust, estate and brokerage fee income increased \$4,000 for the second quarter of 2018 when compared with the second quarter of 2017. This increase was the result of increased production in the Company's brokerage services for the second quarter of 2018. Trust, estate and brokerage fee income remained unchanged at \$863,000 for the six months ended June 30, 2018, when compared with the six months ended June 30, 2017.

Service charges on deposit accounts decreased \$95,000 for the second quarter of 2018 when compared with the second quarter of 2017, and decreased \$137,000 for the six months ended June 30, 2018 when compared to the six months ended June 30, 2017. This decrease has been occurring over several periods and was attributable to changes in customer behavior and funds management as a result of greater access to account information via multiple

technology channels.

Other service charges, commissions and fees increased \$9,000 for the second quarter of 2018 when compared with the second quarter of 2017. Other service charges, commissions and fees decreased \$35,000 for the six months ended June 30, 2018 when compared to the six months ended June 30, 2017. The decrease for the six month period was primarily due to an increase in losses recognized in the Company's investment in affordable housing projects through the Virginia Community Development Corporation ("VCDC"). These losses will be more than offset in future periods by federal tax credits related to low and moderate income housing projects and/or projects financed for the rehabilitation of buildings of historical significance.

The call of a pooled trust preferred security resulted in a gain of \$303,000 for the second quarter of 2018. Gains of \$838,000 were recognized for the six months ended June 30, 2018 from the call of two pooled trust preferred securities. There were no gains on the call of securities for the three and six month periods ended June 30, 2017.

Gains of \$18,000 on mortgage loans held for sale was recognized for the second quarter of 2018, and \$24,000 for the six months ended June 30, 2018. The Company began originating and selling qualifying residential mortgage loans on the secondary market in the third quarter of 2017.

## NONINTEREST EXPENSE

Noninterest expense was \$5.6 million and \$5.2 million for the second quarter of 2018 and 2017, respectively, an increase of \$424,000 or 8.23%. Noninterest expense was \$11.1 million and \$10.6 million for the six months ended June 30, 2018 and 2017, respectively, an increase of \$490,000 or 4.63%. The following summarizes noninterest expense for the three and six months ended June 30, 2018 and 2017:

(In thousands)	Three Months Ended June 30,		Six Months Ended June 30,	
	2018	2017	2018	2017
Noninterest Expenses				
Salaries and benefits	\$2,970	\$2,770	\$5,938	\$5,589
Occupancy	567	584	1,172	1,181
Furniture and equipment	245	248	517	646
Marketing	170	95	278	236
Legal, audit and consulting	272	266	500	546
Data processing	346	316	602	644
Federal Deposit Insurance Corporation	93	61	193	141
Other operating expenses	911	810	1,855	1,582
Total noninterest expenses	\$5,574	\$5,150	\$11,055	\$10,565

The primary changes in noninterest expense were:

Salaries and benefits increased \$200,000 for the second quarter of 2018 compared with the second quarter of 2017. Salaries and benefits increased \$349,000 for the six months ended June 30, 2018 when compared to the six months ended June 30, 2017. These increases were primarily the result of the Company's new secondary market loan origination business line and additional expenses related to incentive compensation and commissions.

Occupancy expense decreased \$17,000 and \$9,000 for second quarter of 2018 and the six months ended June 30, 2018, respectively, compared with the same periods in 2017. Furniture and equipment expense decreased \$3,000 and \$129,000 for the second quarter of 2018 and the six months ended June 30, 2018, respectively, compared to the same periods in 2017. These decreases of expenses are the result of management's initiative to manage and control expenses.

Legal, auditing and consulting expense increased \$6,000 for the second quarter of 2018 and decreased \$46,000 for the six months ended June 30, 2018 compared with the same periods in 2017. While these expenses increased slightly for the second quarter of 2018, the decrease for the six months ended June 30, 2018 was attributed to less loan related legal expenses for the comparable periods. Legal expenses were higher in 2017 due to expenses related to loans charged-off in prior years.

Data processing expense increased \$30,000 for the second quarter of 2018 and decreased \$42,000 for the six months ended June 30, 2018 compared with the same periods in 2017. Increases in expenses were due primarily to new technology, in particular online delivery, offset by improved management of expenses.

FDIC deposit insurance premium expense increased \$32,000 and \$52,000 for second quarter of 2018 and the six months ended June 30, 2018, respectively, compared with the same periods in 2017 due to changes in the assessment rate on higher deposits.

Other operating expenses increased \$101,000 and \$273,000 for second quarter of 2018 and the six months ended June 30, 2018, respectively, compared with the same periods in 2017. The majority of these increases are due to

operating expenses associated with the Company's newly established business lines, including mortgage loan production fees and private banking through Wealth Management.

#### INCOME TAXES

Income tax expense was \$233,000 and \$222,000 for the second quarter ended June 30, 2018 and 2017, respectively, resulting in an effective tax rate of 12.31% and 18.32%, respectively. Income tax expense was \$447,000 and \$347,000 for the six months ended June 30, 2018 and 2017, respectively, resulting in an effective tax rate of 12.10% and 16.49%, respectively. The Tax Cuts and Jobs Act was signed into law on December 22, 2017, which reduced the Company's corporate tax rate from 34% to 21%. The effective tax rate differed from the statutory federal income tax rate due to the Bank's investment in tax-exempt loans and securities, income from the bank-owned life insurance policies, and community development tax credits. The Company's estimated tax credits were \$252,000 and \$241,000 for the six months ended June 30, 2018 and 2017, respectively.

#### FINANCIAL CONDITION AT JUNE 30, 2018 AND DECEMBER 31, 2017

Total assets were \$651.5 million at June 30, 2018 compared with \$644.6 million at December 31, 2017, an increase of \$6.9 million. Total liabilities were \$593.8 million, an increase of \$5.4 million from \$588.5 million at December 31, 2017. Total shareholders' equity was \$57.7 million, an increase of \$1.6 million from \$56.1 million at December 31, 2017.

- Cash and cash equivalents decreased \$4.6 million primarily due to the decrease in funds held at the Federal Reserve Bank to meet the minimum reserve requirement for the period.
- Mortgage loans held for sale was \$344,000 at June 30, 2018. The Company began originating and selling residential mortgage loans on the secondary market in the third quarter of 2017. These loans are funded at closing and are subsequently purchased by investors. Loans are typically sold within 30 – 45 days of closing.
- Other assets increased \$2.3 million primarily due to the Company's additional investment of \$1.0 million in a new affordable housing project through the VCDC.
- Total deposits decreased \$4.2 million. Growth in savings and money market accounts were more than offset by the decline in noninterest-bearing and interest-bearing checking accounts and time deposits, primarily due to balance fluctuations in the Company's public deposit accounts.
- Total FHLB advances and federal funds purchased increased \$9.9 million. This increase was due, in part, to fund loan growth.
- Total shareholders' equity increased \$1.6 million, primarily due to growth in net income and market valuations for available for sale securities.

## ASSET QUALITY

Nonperforming assets, which include nonperforming loans and other real estate owned, were \$9.1 million at June 30, 2018 compared with \$10.4 million at December 31, 2017. Factors contributing to the changes in nonperforming assets were:

- Nonaccrual loans were \$2.7 million compared with \$3.2 million at December 31, 2017. The changes in nonaccrual loans include the disposition of one nonaccrual loan through foreclosure. This loan was subsequently purchased during the same period by a third party. One loan was added to nonaccrual during the period. Loans are placed on nonaccrual status when principal or interest is delinquent for 90 days or more, unless the loans are well secured and in the process of collection. Any unpaid interest previously accrued on such loans is reversed from income. Interest income generally is not recognized on nonaccrual loans unless the likelihood of further loss is remote. Interest payments received on such loans are applied as a reduction to the loan principal balance.
  - Student loans that were greater than 90 days past due and still accruing interest totaled \$1.2 million at June 30, 2018 compared with \$1.6 million at December 31, 2017. These loans continue to accrue interest when past due because repayment of both principal and accrued interest are 98% guaranteed by the U.S. Department of Education.
- Loans greater than 90 days past due and still accruing interest totaled \$489,000 at June 30, 2018 compared with \$49,000 at December 31, 2017.
- Restructured loans that are not on nonaccrual status totaled \$3.4 million at June 30, 2018 compared with \$4.2 million at December 31, 2017. There were no loans modified as a troubled debt restructure ("TDR") during the second quarter of 2018 or the six months ended June 30, 2018. There were no defaults on TDRs occurring within 12 months of modification during the three and six months ended June 30, 2018 and 2017. At June 30, 2018, there were eight loans in the portfolio, totaling \$3.7 million, that have been identified as TDRs, of which five were current and performing in accordance with the modified terms.

The decrease in the allowance for loan losses from \$5.1 million at December 31, 2017 to \$5.0 million at June 30, 2018 reflects the improvement in loan quality as evidenced by the decline in nonperforming and risk rated loans, modest loan growth and changes in specific reserves for impaired loans.

The following table sets forth certain information with respect of the Company's nonperforming assets:

	June 30,	December 31,		
(Dollars in thousands)	2018	2017		
Nonaccrual loans	\$ 2,661	\$ 3,180		
Restructured loans still accruing	3,442	4,182		
Student loans greater than 90 days past due and accruing	1,176	1,616		
Loans greater than 90 days past due and accruing	489	49		
Total nonperforming loans	7,768	9,027		
Other real estate owned, net	1,356	1,356		
Total nonperforming assets	\$ 9,124	\$ 10,383		
Allowance for loan losses	\$ 4,978	\$ 5,094		
Allowance for loan losses to total loans	0.98	%	1.01	%
Nonaccrual loans to total loans	0.52	%	0.63	%
Allowance for loan losses to nonperforming loans	64.08	%	56.43	%
Nonperforming loans to total loans	1.52	%	1.80	%
Nonperforming assets to total assets	1.40	%	1.61	%

## CAPITAL

One of management's strategic objectives is to continue to increase the Company's shareholders' return on equity while maintaining a strong capital base. The Company and the Bank are subject to various capital requirements administered by bank regulatory agencies. Failure to meet minimum capital requirements can trigger certain mandatory and discretionary actions by regulators that could have a direct material effect on the Company's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Bank must meet specific capital guidelines that involve quantitative measures of its assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. The Bank's capital amounts and classifications are also subject to qualitative judgments by the regulators about components, risk weightings and other factors. Quantitative measures, established by regulation to ensure capital adequacy, required the Bank to maintain minimum amounts and ratios of Total capital and Tier 1 capital (as defined in the regulations) to risk-weighted assets (as defined in the regulations), and of Tier 1 capital to average assets (as defined in the regulations).

As of June 30, 2018 and December 31, 2017, management believes the Bank satisfies all capital adequacy requirements to which it was subject and is considered "well capitalized" as defined by the regulatory authorities. The following table provides information on the regulatory capital ratios for the Bank at June 30, 2018 and December 31, 2017. Management believes that the Bank's capital structure is strong and exceeds all capital adequacy requirements, at June 30, 2018.

(Dollars in thousands)	June 30, 2018	December 31, 2017
<b>Tier 1 Capital:</b>		
Common equity	\$60,829	\$ 59,334
Unrealized loss on securities available for sale, net	1,029	30
Unrealized benefit obligation for supplemental retirement plans	(12 )	(104 )
Total Common equity tier 1 capital	61,846	59,260
<b>Tier 2 Capital:</b>		
Allowable allowance for loan losses	4,978	5,094
Total Capital:	\$66,824	\$ 64,354
<b>Risk Weighted Assets:</b>	\$515,012	\$ 518,562
<b>Regulatory Capital Ratios:</b>		
Leverage Ratio	9.46 %	9.17 %
Common Equity Tier 1 Capital Ratio	12.01 %	11.43 %
Tier 1 Capital Ratio	12.01 %	11.43 %
Total Capital Ratio	12.98 %	12.41 %

During 2006, the Company established a subsidiary trust that issued \$4.0 million of capital securities as part of a separate pooled trust preferred security offering with other financial institutions. Under current applicable regulatory guidelines, the capital securities are treated as Tier 1 capital for purposes of the Federal Reserve's capital guidelines for bank holding companies, as long as the capital securities and all other cumulative preferred securities of the Company

together do not exceed 25% of Tier 1 capital. As previously discussed, banking regulations have established minimum capital requirements for financial institutions, including risk-based capital ratios and leverage ratios.

## LIQUIDITY

Liquidity management involves meeting the present and future financial obligations of the Company with the sale or maturity of assets or with the occurrence of additional liabilities. Liquidity needs are met with cash on hand, deposits in other banks, federal funds sold, securities classified as available for sale and loans maturing within one year. At June 30, 2018, liquid assets totaled \$225.7 million, or 34.7%, of total assets and 38.1% of total liabilities. Securities provide a constant source of liquidity through paydowns and maturities. Also, the Company maintains short-term borrowing arrangements, namely federal funds lines of credit, with larger financial institutions as an additional source of liquidity. The Bank's membership with the FHLB also provides a source of borrowings with numerous rate and term structures. Management monitors the liquidity position regularly and attempts to maintain a position which utilizes available funds most efficiently. As a result of the Company's management of liquid assets and the ability to generate liquidity through liability funding, management believes that the Company maintains overall liquidity sufficient to satisfy its depositors' requirements and meet its customers' credit needs.

## CONTRACTUAL OBLIGATIONS

As of June 30, 2018, there have been no material changes outside the ordinary course of business to the contractual obligations disclosed in "Management's Discussion and Analysis and Results of Operations" in the Company's Annual Report on Form 10-K for the year ended December 31, 2017.

## OFF-BALANCE SHEET ARRANGEMENTS

As of June 30, 2018, there have been no material changes to the off-balance sheet arrangements disclosed in “Management’s Discussion and Analysis and Results of Operations” in the Company’s Annual Report on Form 10-K for the year ended December 31, 2017.

## IMPACT OF INFLATION AND CHANGING PRICES

The consolidated financial statements and the accompanying notes presented elsewhere in this document have been prepared in accordance with U.S. GAAP, which require the measurement of financial position and operating results in terms of historical dollars without considering the change in the relative purchasing power of money over time and due to inflation. Unlike most industrial companies, virtually all the assets and liabilities of the Company and the Bank are monetary in nature. The impact of inflation is reflected in the increased cost of operations. As a result, interest rates have a greater impact on the Company’s performance than inflation. Interest rates do not necessarily move in the same direction or to the same extent as the prices of goods and services.

## CHANGES IN ACCOUNTING PRINCIPLES

For information regarding recent accounting pronouncements and their effect on the Company, see “Recent Accounting Pronouncements” in Note 1 of the Notes to Consolidated Financial Statements contained herein.

### ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

An important component of both earnings performance and liquidity is management of interest rate sensitivity. Interest rate sensitivity reflects the potential effect on net interest income and economic value of equity from a change in market interest rates. The Bank is subject to interest rate sensitivity to the degree that its interest-earning assets mature or reprice at different time intervals than its interest-bearing liabilities. However, the Bank is not subject to the other major categories of market risk such as foreign currency exchange rate risk or commodity price risk. The Bank uses a number of tools to manage its interest rate risk, including simulating net interest income under various scenarios, monitoring the present value change in equity under the same scenarios, and monitoring the difference or gap between rate sensitive assets and rate sensitive liabilities over various time periods. Management believes that rate risk is best measured by simulation modeling.

There have been no material changes to the quantitative and qualitative disclosures made in the Company's Annual Report on Form 10-K for the year ended December 31, 2017.

### ITEM 4. CONTROLS AND PROCEDURES

#### Disclosure Controls and Procedures

The Company maintains disclosure controls and procedures that are designed to provide assurance that the information required to be disclosed in the reports filed or submitted under the Securities Exchange Act of 1934 is recorded, processed, summarized, and reported within the time periods required by the SEC. An evaluation of the effectiveness of the design and operations of the Company's disclosure controls and procedures at the end of the period covered by this report was carried out under the supervision and with the participation of the management of Fauquier Bankshares, Inc., including the Chief Executive Officer and the Chief Financial Officer. Based on such an evaluation, the Chief Executive Officer and the Chief Financial Officer concluded the Company's disclosure controls and procedures were effective as of the end of such period.

The Company regularly assesses the adequacy of its internal control over financial reporting and enhances its controls in response to internal control assessments and internal and external audit and regulatory recommendations. There have not been any significant changes in the Company's internal control over financial reporting or in other factors that have materially affected or are reasonably likely to materially affect, such controls during the quarter ended June 30, 2018.

## Part II. OTHER INFORMATION

### ITEM 1. LEGAL PROCEEDINGS

There are no pending or threatened legal proceedings to which the Company or the Bank is a party or to which the property of either the Company or the Bank is subject to that, in the opinion of management, may materially impact the financial condition of either the Company or the Bank.

#### ITEM 1 A. RISK FACTORS

Not required for smaller reporting companies.

### ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

On January 18, 2018, the Company's Board of Directors authorized the Company to repurchase up to 112,880 shares (3% of common stock outstanding on January 1, 2018) beginning January 1, 2018 and continuing until the next Board reset. During the six months ended June 30, 2018, 368 shares of common stock were repurchased at an average price of \$21.47 per share. Under the share repurchase program, the Company has the remaining authority to repurchase up to 112,512 shares of the Company's common stock as of June 30, 2018.

Repurchases may be made through open market purchases or in privately negotiated transactions, and shares repurchased will be returned to the status of authorized and unissued shares of common stock. The actual timing, number, and value of shares repurchased under the program will be determined by management.

The following table summarizes repurchases of the Company's common stock that occurred during the three months ended June 30, 2018.

	Total number of shares purchased	Average price paid per share (\$)	Total number of shares purchased as part of a publicly announced plan	Maximum number of shares that may yet be purchased under a plan
April 30, 2018	-	\$ -	-	112,512
May 31, 2018	-	-	-	112,512
June 30, 2018	-	-	-	112,512
Total	-	\$ -	-	112,512

## ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None.

## ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

## ITEM 5. OTHER INFORMATION

None.

## ITEM 6. EXHIBITS
