NOTE 1 — Summary of Significant Accounting Policies

Basis of Presentation

The Unaudited Condensed Consolidated Financial Statements include the accounts of NIKE, Inc. and its subsidiaries (the "Company") and reflect all normal adjustments which are, in the opinion of management, necessary for a fair statement of the results of operations for the interim period. The year-end Condensed Consolidated Balance Sheet data as of May 31, 2015 was derived from audited financial statements, but does not include all disclosures required by accounting principles generally accepted in the United States of America ("U.S. GAAP"). The interim financial information and notes thereto should be read in conjunction with the Company's latest Annual Report on Form 10-K. The results of operations for the three and six months ended November 30, 2015 are not necessarily indicative of results to be expected for the entire year.

On November 19, 2015, the Company announced a two-for-one split of both NIKE Class A and Class B Common Stock. The stock split was in the form of a 100 percent stock dividend payable on December 23, 2015 to shareholders of record at the close of business December 9, 2015. Common stock began trading at the split-adjusted price on December 24, 2015. All share and per share amounts presented reflect the stock split.

Reclassifications

Certain prior year amounts have been reclassified to conform to fiscal 2016 presentation.

Revisions

During the third quarter of fiscal 2015, management determined it had incorrectly reflected unrealized gains and losses from re-measurement of non-functional currency intercompany balances between certain of its foreign wholly-owned subsidiaries in its Consolidated Statements of Cash Flows. These unrealized gains and losses should have been classified as non-cash reconciling items from Net income to Cash provided by operations, but were instead reported on the Effect of exchange rate changes on cash and equivalents line of the Consolidated Statements of Cash Flows. This resulted in an understatement of Cash provided by operations reported on the Consolidated Statements of Cash Flows for certain prior periods; there was no impact for any period to Net increase (decrease) in cash and equivalents reported on the Consolidated Statements of Cash Flows, or Cash and equivalents reported on the Consolidated Statements of Cash Flows and Balance Sheets. The Company assessed the materiality of the misclassifications on prior periods' financial statements in accordance with SEC Staff Accounting Bulletin ("SAB") No. 99, Materiality, codified in Accounting Standards Codification ("ASC") 250, Presentation of Financial Statements, and concluded that these misstatements were not material to any prior annual or interim periods. Accordingly, in accordance with ASC 250 (SAB No. 108, Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements), the amounts have been revised in the applicable Consolidated Statements of Cash Flows. For the six months ended November 30, 2014 of fiscal 2015, the revisions increased Cash provided by operations and decreased Effect of exchange rate changes on cash and equivalents by \$312 million. These amounts have been reflected in the table below. As part of the revision to the Consolidated Statements of Cash Flows, the Company has updated its presentation to separately report Net foreign currency adjustments, which was previously included within Amortization and other.

NIKE, Inc. Unaudited Condensed Consolidated Statements of Cash Flows			
Six Months Ended November 30, 2014			
(In millions)	As Reported	Adjustment	As Revised
Cash provided by operations:			
Net income	\$1,617	\$—	\$1,617
Income charges (credits) not affecting cash:			
Amortization and other	(54) 69	15
Net foreign currency adjustments	—	243	243
Cash provided by operations	1,235	312	1,547
Effect of exchange rate changes on cash and equivalents	288	(312) (24
Net increase (decrease) in cash and equivalents	53	—	53

Cash and equivalents, beginning of period	2,220	—	2,220
CASH AND EQUIVALENTS, END OF PERIOD	\$2,273	\$—	\$2,273

Recently Issued Accounting Standards

In May 2014, the Financial Accounting Standards Board ("FASB") issued an accounting standards update that replaces existing revenue recognition guidance. The updated guidance requires companies to recognize revenue in a way that depicts the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. In addition, the new standard requires that reporting companies disclose the nature, amount, timing and uncertainty of revenue and cash flows arising from contracts with customers. Based on the FASB's decision in July 2015 to defer the effective date and to allow more flexibility with implementation, the Company anticipates the new standard will be effective for the Company beginning June 1, 2018. The new standard is required to be applied retrospectively to each prior reporting period presented or retrospectively with the cumulative effect of initially applying it recognized at the date of initial application. The Company has not yet selected a transition method and is currently evaluating the effect the guidance will have on the Consolidated Financial Statements.

Table of Contents

In November 2015, the FASB issued ASU No. 2015-17, Income Taxes (Topic 740): Balance Sheet Classification of Deferred Taxes to simplify the presentation of deferred taxes in the statement of financial position. The updated guidance requires that deferred tax assets and liabilities be classified as noncurrent in a classified balance sheet. The update to the standard is effective for the Company beginning June 1, 2017 with early application permitted as of the beginning of any interim or annual reporting period. This guidance may be applied either prospectively to all deferred tax assets and liabilities or retrospectively to all periods presented. The Company has not yet determined whether to early adopt the updated guidance, or selected a transition method, and is currently evaluating the effect the guidance will have on the Consolidated Financial Statements.

In January 2016, the FASB issued ASU No. 2016-01, Financial Instruments - Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities. The updated guidance enhances the reporting model for financial instruments, which includes amendments to address aspects of recognition, measurement, presentation and disclosure. The update to the standard is effective for the Company beginning June 1, 2018. The Company is currently evaluating the effect the guidance will have on the Consolidated Financial Statements.

NOTE 2 — Inventories

Inventory balances of \$4,600 million and \$4,337 million at November 30, 2015 and May 31, 2015, respectively, were substantially all finished goods.

NOTE 3 — Accrued Liabilities

Accrued liabilities included the following:

(In millions)	As of November 30, 2015	As of May 31, 2015
Collateral received from counterparties to hedging instruments	\$725	\$968
Compensation and benefits, excluding taxes	724	997
Dividends payable	273	240
Endorsement compensation	273	388
Fair value of derivatives	202	162
Taxes other than income taxes	192	174
Import and logistics costs	174	207
Advertising and marketing	135	117
Other ⁽¹⁾	753	698
TOTAL ACCRUED LIABILITIES	\$3,451	\$3,951

(1) Other consists of various accrued expenses with no individual item accounting for more than 5% of the total Accrued liabilities balance at November 30, 2015 and May 31, 2015.

NOTE 4 — Fair Value Measurements

The Company measures certain financial assets and liabilities at fair value on a recurring basis, including derivatives and available-for-sale securities. Fair value is the price the Company would receive to sell an asset or pay to transfer a liability in an orderly transaction with a market participant at the measurement date. The Company uses the three-level hierarchy established by the FASB that prioritizes fair value measurements based on the types of inputs used for the various valuation techniques (market approach, income approach and cost approach).

The levels of the fair value hierarchy are described below:

Level 1: Quoted prices in active markets for identical assets or liabilities.

Level 2: Inputs other than quoted prices that are observable for the asset or liability, either directly or indirectly; these include quoted prices for similar assets or liabilities in active markets and quoted prices for identical assets or liabilities in markets that are not active.

Level 3: Unobservable inputs for which there is little or no market data available, which require the reporting entity to develop its own assumptions.

The Company's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment and considers factors specific to the asset or liability. Financial assets and liabilities are classified in their entirety based on the most conservative level of input that is significant to the fair value measurement.

Pricing vendors are utilized for certain Level 1 and Level 2 investments. These vendors either provide a quoted market price in an active market or use observable inputs without applying significant adjustments in their pricing.

Observable inputs include broker quotes, interest rates and yield curves observable at commonly quoted intervals, volatilities and credit risks. The fair value of derivative contracts is determined using observable market inputs such as the daily market foreign currency rates, forward pricing curves, currency volatilities, currency correlations and interest rates and considers nonperformance risk of the Company and that of its counterparties.

The Company's fair value processes include controls that are designed to ensure appropriate fair values are recorded. These controls include a comparison of fair values to another independent pricing vendor.

Table of Contents

The following tables present information about the Company's financial assets measured at fair value on a recurring basis as of November 30, 2015 and May 31, 2015, and indicate the level in the fair value hierarchy in which the Company classifies the fair value measurement.

As of November 30, 2015				
(In millions)	Assets at Fair Value	Cash and Equivalents	Short-term Investments	Other Long-term Assets
Cash	\$731	\$731	\$—	\$—
Level 1:				
U.S. Treasury securities	1,283	233	1,050	—
Level 2:				
Time deposits	734	734	—	—
U.S. Agency securities	1,015	250	765	—
Commercial paper and bonds	781	331	450	—
Money market funds	1,572	1,572	—	—
Total Level 2:	4,102	2,887	1,215	—
Level 3:				
Non-marketable preferred stock	17	—	—	17
TOTAL	\$6,133	\$3,851	\$2,265	\$17
As of May 31, 2015				
(In millions)	Assets at Fair Value	Cash and Equivalents	Short-term Investments	Other Long-term Assets
Cash	\$615	\$615	\$—	\$—
Level 1:				
U.S. Treasury securities	869	225	644	—
Level 2:				
Time deposits	684	684	—	—
U.S. Agency securities	976	110	866	—
Commercial paper and bonds	914	352	562	—
Money market funds	1,866	1,866	—	—
Total Level 2:	4,440	3,012	1,428	—
Level 3:				
Non-marketable preferred stock	8	—	—	8
TOTAL	\$5,932	\$3,852	\$2,072	\$8

The Company elects to record the gross assets and liabilities of its derivative financial instruments on the Unaudited Condensed Consolidated Balance Sheets. The Company's derivative financial instruments are subject to master netting arrangements that allow for the offset of assets and liabilities in the event of default or early termination of the contract. Any amounts of cash collateral received or posted related to these instruments associated with the Company's credit-related contingent features are recorded in Cash and equivalents and Accrued liabilities, the latter of which would further offset against the Company's derivative asset balance (refer to Note 10 — Risk Management and Derivatives). Cash collateral received or posted related to the Company's credit-related contingent features is presented in the Cash provided by operations component of the Unaudited Condensed Consolidated Statements of Cash Flows. Any amounts of non-cash collateral received, such as securities, are not recorded on the Unaudited Condensed Consolidated Balance Sheets pursuant to the accounting standards for non-cash collateral received.

Table of Contents

The following tables present information about the Company's derivative assets and liabilities measured at fair value on a recurring basis as of November 30, 2015 and May 31, 2015, and indicate the level in the fair value hierarchy in which the Company classifies the fair value measurement.

(In millions)	As of November 30, 2015					
	Derivative Assets			Derivative Liabilities		
	Assets at Fair Value	Other Current Assets	Other Long-term Assets	Liabilities at Fair Value	Accrued Liabilities	Other Long-term Liabilities
Level 2:						
Foreign exchange forwards and options ⁽¹⁾	\$1,476	\$1,036	\$440	\$196	\$195	\$1
Embedded derivatives	7	2	5	10	2	8
Interest rate swaps ⁽²⁾	—	—	—	5	5	—
TOTAL	\$1,483	\$1,038	\$445	\$211	\$202	\$9

If the foreign exchange derivative instruments had been netted on the Unaudited Condensed Consolidated Balance Sheets, the asset and liability positions each would have been reduced by \$196 million as of November 30, 2015.

(1) As of that date, the Company had received \$725 million of cash collateral from various counterparties related to these foreign exchange derivative instruments. No amount of collateral was posted on the Company's derivative liability balance as of November 30, 2015.

(2) As of November 30, 2015, no amount of cash collateral had been posted on the derivative liability balance related to the Company's interest rate swaps.

(In millions)	As of May 31, 2015					
	Derivative Assets			Derivative Liabilities		
	Assets at Fair Value	Other Current Assets	Other Long-term Assets	Liabilities at Fair Value	Accrued Liabilities	Other Long-term Liabilities
Level 2:						
Foreign exchange forwards and options ⁽¹⁾	\$1,554	\$1,034	\$520	\$164	\$160	\$4
Embedded derivatives	7	2	5	11	2	9
Interest rate swaps ⁽²⁾	78	78	—	—	—	—
TOTAL	\$1,639	\$1,114	\$525	\$175	\$162	\$13

If the foreign exchange derivative instruments had been netted on the Consolidated Balance Sheets, the asset and liability positions each would have been reduced by \$161 million as of May 31, 2015. As of that date, the

(1) Company had received \$900 million of cash collateral and \$74 million of securities from various counterparties related to these foreign exchange derivative instruments. No amount of collateral was posted on the Company's derivative liability balance as of May 31, 2015.

(2) As of May 31, 2015, the Company had received \$68 million of cash collateral related to its interest rate swaps. Available-for-sale securities comprise investments in U.S. Treasury and Agency securities, money market funds, corporate commercial paper and bonds. These securities are valued using market prices on both active markets (Level 1) and less active markets (Level 2). The gross realized gains and losses on sales of available-for-sale securities were immaterial for the three and six months ended November 30, 2015 and 2014. Unrealized gains and losses on available-for-sale securities included in Accumulated other comprehensive income were immaterial as of November 30, 2015 and May 31, 2015.

The Company regularly reviews its available-for-sale securities for other-than-temporary impairment. For the six months ended November 30, 2015 the Company did not consider any of its securities to be other-than-temporarily impaired and, accordingly, did not recognize any impairment losses.

As of November 30, 2015, the Company held \$2,020 million of available-for-sale securities with maturity dates within one year and \$245 million with maturity dates over one year and less than five years within Short-term investments on the Unaudited Condensed Consolidated Balance Sheets.

Included in Interest expense (income), net for the three months ended November 30, 2015 and 2014 was interest income related to the Company's available-for-sale securities of \$2 million and \$2 million, respectively, and \$4 million and \$3 million for the six months ended November 30, 2015 and 2014, respectively.

The Company's Level 3 assets comprise investments in certain non-marketable preferred stock. These Level 3 investments are an immaterial portion of the Company's portfolio. Changes in Level 3 investment assets were immaterial during the six months ended November 30, 2015 and the fiscal year ended May 31, 2015.

Derivative financial instruments include foreign exchange forwards and options, embedded derivatives and interest rate swaps. Refer to Note 10 — Risk Management and Derivatives for additional detail.

No transfers among the levels within the fair value hierarchy occurred during the six months ended November 30, 2015.

As of November 30, 2015 and May 31, 2015, the Company had no assets or liabilities that were required to be measured at fair value on a non-recurring basis.

Financial Assets and Liabilities Not Recorded at Fair Value

For fair value information regarding Long-term debt, refer to Note 6 — Long-Term Debt.

Table of Contents

The carrying amounts reflected on the Unaudited Condensed Consolidated Balance Sheets for Notes payable approximate fair value.

At both November 30, 2015 and May 31, 2015, the Company had \$150 million of outstanding receivables related to its investments in reverse repurchase agreements recorded within Prepaid expenses and other current assets on the Unaudited Condensed Consolidated Balance Sheets. The carrying amount of these agreements approximates their fair value based upon observable inputs other than quoted prices (Level 2). The reverse repurchase agreements are fully collateralized.

NOTE 5 — Short-Term Borrowings and Credit Lines

There have been no significant changes to the short-term borrowings and credit lines reported in the Company's Annual Report on Form 10-K for the fiscal year ended May 31, 2015, except for the following:

On August 28, 2015, the Company entered into a committed credit facility agreement with a syndicate of banks which provides for up to \$2 billion of borrowings. The facility matures August 28, 2020, with a one year extension option prior to any anniversary of the closing date, provided that in no event shall it extend beyond August 28, 2022. Based on the Company's current long-term senior unsecured debt ratings of AA- and A1 from Standard and Poor's Corporation and Moody's Investor Services, respectively, the interest rate charged on any outstanding borrowings would be the prevailing LIBOR plus 0.455%. The facility fee is 0.045% of the total commitment. Under this committed credit facility, the Company must maintain certain financial ratios, among other things, with which the Company was in compliance at November 30, 2015. This facility replaces the prior \$1 billion credit facility agreement entered into on November 1, 2011, which would have matured November 1, 2017. As of, and for the six month period ended, November 30, 2015, no amounts were outstanding under either committed credit facility.

Table of Contents

NOTE 6 — Long-Term Debt

Long-term debt, net of unamortized premiums and discounts and swap fair value adjustments, comprises the following:

					Book Value Outstanding	
Scheduled Maturity (Dollars and Yen in millions)	Original Principal	Interest Rate	Interest Payments		As of November 30, 2015	As of May 31, 2015
Corporate Bond Payables: ⁽¹⁾						
October 15, 2015 ⁽²⁾	\$ 100	5.15	% Semi-Annually		\$—	\$101
May 1, 2023 ⁽³⁾	\$500	2.25	% Semi-Annually		499	499
May 1, 2043 ⁽³⁾	\$500	3.63	% Semi-Annually		499	499
November 1, 2045 ⁽⁴⁾	\$ 1,000	3.88	% Semi-Annually		991	—
Promissory Notes:						
April 1, 2017 ⁽⁵⁾	\$40	6.20	% Monthly		38	39
January 1, 2018 ⁽⁵⁾	\$ 19	6.79	% Monthly		19	19
Japanese Yen Notes:						
August 20, 2001 through November 20, 2020 ⁽⁶⁾	¥9,000	2.60	% Quarterly		18	20
August 20, 2001 through November 20, 2020 ⁽⁶⁾	¥4,000	2.00	% Quarterly		8	9
Total					2,072	1,186
Less current maturities					5	107
TOTAL LONG-TERM DEBT					\$2,067	\$1,079

(1) These senior unsecured obligations rank equally with the Company's other unsecured and unsubordinated indebtedness.

The Company had entered into interest rate swap agreements whereby the Company received fixed interest payments at the same rate as the note and paid variable interest payments based on the six-month LIBOR plus a spread. The swaps had the same notional amount and maturity date as the corresponding note. On October 15, 2015, the Company repaid the long-term debt which had previously been hedged with these interest rate swaps. Accordingly, as of November 30, 2015, the Company had no interest rate swaps designated as fair value hedges.

(3) The bonds are redeemable at the Company's option prior to February 1, 2023 and November 1, 2042, respectively, at a price equal to the greater of (i) 100% of the aggregate principal amount of the notes to be redeemed or (ii) the sum of the present values of the remaining scheduled payments, plus in each case, accrued and unpaid interest. Subsequent to February 1, 2023 and November 1, 2042, respectively, the bonds also feature a par call provision, which allows for the bonds to be redeemed at a price equal to 100% of the aggregate principal amount of the notes being redeemed, plus accrued and unpaid interest.

(4) The bonds are redeemable at the Company's option prior to May 1, 2045 at a price equal to the greater of (i) 100% of the aggregate principal amount of the notes to be redeemed or (ii) the sum of the present values of the remaining scheduled payments, plus in each case, accrued and unpaid interest. Subsequent to May 1, 2045, the bonds also feature a par call provision, which allows for the bonds to be redeemed at a price equal to 100% of the aggregate principal amount of the notes being redeemed, plus accrued and unpaid interest.

(5) The Company assumed a total of \$59 million in bonds payable as part of its agreement to purchase certain Corporate properties; this was treated as a non-cash financing transaction. The property serves as collateral for the debt. The purchase of these properties was accounted for as a business combination where the total consideration of \$85 million was allocated to the land and buildings acquired; no other tangible or intangible assets or liabilities resulted from the purchase. The bonds mature in 2017 and 2018 and the Company does not have the ability to re-negotiate the terms of the debt agreements and would incur significant financial penalties if the notes were paid-off prior to maturity. Subsequent to November 30, 2015, the notes due January 1, 2018 were legally defeased and an insignificant loss on defeasance will be recognized in the third quarter of fiscal 2016.

(6) NIKE Logistics YK assumed a total of ¥13 billion in loans as part of its agreement to purchase a distribution center in Japan, which serves as collateral for the loans. These loans mature in equal quarterly installments during the

period August 20, 2001 through November 20, 2020.

The scheduled maturity of Long-term debt in each of the twelve month periods ending November 30, 2016 through 2020 are \$7 million, \$44 million, \$24 million, \$6 million and \$6 million, respectively, at face value.

The Company's long-term debt is recorded at adjusted cost, net of unamortized premiums and discounts and interest rate swap fair value adjustments. The fair value of long-term debt is estimated based upon quoted prices for similar instruments or quoted prices for identical instruments in inactive markets (Level 2). The fair value of the Company's Long-term debt, including the current portion, was approximately \$2,020 million at November 30, 2015 and \$1,160 million at May 31, 2015.

NOTE 7 — Income Taxes

The effective tax rate was 18.7% and 23.3% for the six month periods ended November 30, 2015 and 2014, respectively. The decrease in the Company's effective tax rate was primarily due to adjustments in the prior year to tax expense on intercompany transactions and an increase in the proportion of earnings from operations outside of the United States in the current period, which are generally subject to a lower tax rate. The decrease was partially offset by benefits from the resolution of tax audits across several jurisdictions in the prior year period.

Table of Contents

As of November 30, 2015, total gross unrecognized tax benefits, excluding related interest and penalties, were \$479 million, \$278 million of which would affect the Company's effective tax rate if recognized in future periods. As of May 31, 2015, total gross unrecognized tax benefits, excluding related interest and penalties, were \$438 million. The liability for payment of interest and penalties increased \$16 million during the six months ended November 30, 2015. As of November 30, 2015 and May 31, 2015, accrued interest and penalties related to uncertain tax positions were \$180 million and \$164 million, respectively (excluding federal benefit).

The Company incurs tax liabilities primarily in the United States, China and the Netherlands, as well as various other state and foreign jurisdictions. The Company is currently under audit by the U.S. Internal Revenue Service (IRS) for the 2013 and 2014 fiscal years. The Company has closed all U.S. federal income tax matters through fiscal 2012, with the exception of the validation of foreign tax credits utilized. As previously disclosed, the Company received a statutory notice of deficiency for fiscal 2011 proposing an increase in tax of \$31 million, subject to interest, related to the foreign tax credit matter. This notice also reported a decrease in foreign tax credit carryovers for fiscal 2010 and 2011. The Company has contested this deficiency notice by filing a petition with the U.S. Tax Court in April 2015. The Company does not expect the outcome of this matter to have a material impact on the financial statements. No payments on the assessment would be required until the dispute is definitively resolved. Based on the information currently available, the Company does not anticipate a significant increase or decrease to its unrecognized tax benefits for this matter within the next 12 months.

The Company's major foreign jurisdictions, China and the Netherlands, have concluded substantially all income tax matters through calendar 2005 and fiscal 2009, respectively. Although the timing of resolution of audits is not certain, the Company evaluates all domestic and foreign audit issues in the aggregate, along with the expiration of applicable statutes of limitations, and estimates that it is reasonably possible the total gross unrecognized tax benefits could decrease by up to \$44 million within the next 12 months.

NOTE 8 — Common Stock and Stock-Based Compensation

The authorized number of shares of Class A Common Stock, no par value, and Class B Common Stock, no par value, are 400 million and 2,400 million, respectively. Each share of Class A Common Stock is convertible into one share of Class B Common Stock. Voting rights of Class B Common Stock are limited in certain circumstances with respect to the election of directors. There are no differences in the dividend and liquidation preferences or participation rights of the Class A and Class B common shareholders.

The NIKE, Inc. Stock Incentive Plan (the "Stock Incentive Plan") provides for the issuance of up to 718 million previously unissued shares of Class B Common Stock in connection with stock options and other awards granted under the Stock Incentive Plan. The Stock Incentive Plan authorizes the grant of non-statutory stock options, incentive stock options, stock appreciation rights, restricted stock, restricted stock units and performance-based awards. The exercise price for stock options and stock appreciation rights may not be less than the fair market value of the underlying shares on the date of grant. A committee of the Board of Directors administers the Stock Incentive Plan. The committee has the authority to determine the employees to whom awards will be made, the amount of the awards and the other terms and conditions of the awards. Substantially all stock option grants outstanding under the Stock Incentive Plan are granted in the first quarter of each fiscal year, vest ratably over four years and expire 10 years from the date of grant.

In addition to the Stock Incentive Plan, the Company gives employees the right to purchase shares at a discount to the market price under employee stock purchase plans ("ESPPs"). Employees are eligible to participate through payroll deductions of up to 10% of their compensation. At the end of each six-month offering period, shares are purchased by the participants at 85% of the lower of the fair market value at the beginning or the end of the offering period.

The Company accounts for stock-based compensation by estimating the fair value of options granted under the Stock Incentive Plan and employees' purchase rights under the ESPPs using the Black-Scholes option pricing model. The Company recognizes this fair value as Operating overhead expense over the vesting period using the straight-line method.

The following table summarizes the Company's total stock-based compensation expense recognized in Operating overhead expense:

Edgar Filing: NIKE INC - Form 10-Q

	Three Months Ended November 30,		Six Months Ended November 30,	
(In millions)	2015	2014	2015	2014
Stock options ⁽¹⁾	\$45	\$35	\$84	\$65
ESPPs	8	6	15	12
Restricted stock	9	8	17	15
TOTAL STOCK-BASED COMPENSATION EXPENSE	\$62	\$49	\$116	\$92

Expense for stock options includes the expense associated with stock appreciation rights. Accelerated stock option expense is recorded for employees eligible for accelerated stock option vesting upon retirement. Accelerated stock (1) option expense was \$8 million and \$5 million for the three month periods ended November 30, 2015 and 2014, respectively, and \$14 million and \$9 million for the six month periods ended November 30, 2015 and 2014, respectively.

As of November 30, 2015, the Company had \$333 million of unrecognized compensation costs from stock options, net of estimated forfeitures, to be recognized in Operating overhead expense over a weighted average remaining period of 2.5 years.

Table of Contents

The weighted average fair value per share of the options granted during the six month periods ended November 30, 2015 and 2014, computed as of the grant date using the Black-Scholes pricing model, was \$12.67 and \$8.47, respectively. The weighted average assumptions used to estimate these fair values are as follows:

	Six Months Ended November 30,			
	2015		2014	
Dividend yield	1.0	%	1.2	%
Expected volatility	23.6	%	23.6	%
Weighted average expected life (in years)	5.8		5.8	
Risk-free interest rate	1.7	%	1.7	%

The Company estimates the expected volatility based on the implied volatility in market traded options on the Company's common stock with a term greater than one year, along with other factors. The weighted average expected life of options is based on an analysis of historical and expected future exercise patterns. The interest rate is based on the U.S. Treasury (constant maturity) risk-free rate in effect at the date of grant for periods corresponding with the expected term of the options.

NOTE 9 — Earnings Per Share

The following is a reconciliation from basic earnings per common share to diluted earnings per common share. The computations of diluted earnings per common share excluded options, including shares under employee stock purchase plans ("ESPPs"), to purchase an additional 21.2 million and 19.3 million shares of common stock outstanding for the three month periods ended November 30, 2015 and 2014, respectively, and 21.1 million and 1.3 million shares of common stock outstanding for the six month periods ended November 30, 2015 and 2014, respectively, because the options were anti-dilutive.

(In millions, except per share data)	Three Months Ended November 30,		Six Months Ended November 30,	
	2015	2014	2015	2014
Determination of shares:				
Weighted average common shares outstanding	1,706.5	1,726.2	1,707.8	1,728.0
Assumed conversion of dilutive stock options and awards	44.9	43.4	45.6	43.6
DILUTED WEIGHTED AVERAGE COMMON SHARES OUTSTANDING	1,751.4	1,769.6	1,753.4	1,771.6
Earnings per common share:				
Basic	\$0.46	\$0.38	\$1.15	\$0.94
Diluted	\$0.45	\$0.37	\$1.12	\$0.91

NOTE 10 — Risk Management and Derivatives

The Company is exposed to global market risks, including the effect of changes in foreign currency exchange rates and interest rates, and uses derivatives to manage financial exposures that occur in the normal course of business. The Company does not hold or issue derivatives for trading or speculative purposes.

The Company may elect to designate certain derivatives as hedging instruments under the accounting standards for derivatives and hedging. The Company formally documents all relationships between designated hedging instruments and hedged items as well as its risk management objectives and strategies for undertaking hedge transactions. This process includes linking all derivatives designated as hedges to either recognized assets or liabilities or forecasted transactions.

The majority of derivatives outstanding as of November 30, 2015 are designated as foreign currency cash flow hedges, primarily for Euro/U.S. Dollar, British Pound/Euro and Japanese Yen/U.S. Dollar currency pairs. All derivatives are recognized on the Unaudited Condensed Consolidated Balance Sheets at fair value and classified based on the instrument's maturity date.

Table of Contents

The following table presents the fair values of derivative instruments included within the Unaudited Condensed Consolidated Balance Sheets as of November 30, 2015 and May 31, 2015:

(In millions)	Derivative Assets			Derivative Liabilities		
	Balance Sheet Location	November 30, 2015	May 31, 2015	Balance Sheet Location	November 30, 2015	May 31, 2015
Derivatives formally designated as hedging instruments:						
Foreign exchange forwards and options	Prepaid expenses and other current assets	\$ 860	\$ 825	Accrued liabilities	\$ 75	\$ 140
Interest rate swaps	Prepaid expenses and other current assets	—	78	Accrued liabilities	5	—
Foreign exchange forwards and options	Deferred income taxes and other assets	414	520	Deferred income taxes and other liabilities	1	4
Total derivatives formally designated as hedging instruments		1,274	1,423		81	144
Derivatives not designated as hedging instruments:						
Foreign exchange forwards and options	Prepaid expenses and other current assets	176	209	Accrued liabilities	120	20
Embedded derivatives	Prepaid expenses and other current assets	2	2	Accrued liabilities	2	2
Foreign exchange forwards and options	Deferred income taxes and other assets	26	—	Deferred income taxes and other liabilities	—	—
Embedded derivatives	Deferred income taxes and other assets	5	5	Deferred income taxes and other liabilities	8	9
Total derivatives not designated as hedging instruments		209	216		130	31
TOTAL DERIVATIVES		\$ 1,483	\$ 1,639		\$ 211	\$ 175

The following tables present the amounts affecting the Unaudited Condensed Consolidated Statements of Income for the three and six months ended November 30, 2015 and 2014:

Amount of Gain (Loss) Recognized in Other	Amount of Gain (Loss) Reclassified From Accumulated Other Comprehensive Income into Income ⁽¹⁾
-------------------------------------------	-----------------------------------------------------------------------------------------------------------

(In millions)

Comprehensive Income
on Derivatives⁽¹⁾

	Three Months Ended November 30,		Location of Gain (Loss) Reclassified From Accumulated Other Comprehensive Income into Income	Three Months Ended November 30,	
	2015	2014		2015	2014
Derivatives designated as cash flow hedges:					
Foreign exchange forwards and options	\$ (39)	\$ (4)	Revenues	\$ (29)	\$ (19)
Foreign exchange forwards and options	309	280	Cost of sales	125	21
Foreign exchange forwards and options	187	103	Other (income) expense, net	39	13
Interest rate swaps	(50)	—	Interest expense (income), net	—	—
Total designated cash flow hedges	\$ 407	\$ 379		\$ 135	\$ 15

For the three months ended November 30, 2015 and 2014, the amounts recorded in Other (income) expense, net as (1) a result of hedge ineffectiveness and the discontinuance of cash flow hedges because the forecasted transactions were no longer probable of occurring were immaterial.

Table of Contents

(In millions)	Amount of Gain (Loss) Recognized in Other Comprehensive Income on Derivatives ⁽¹⁾		Amount of Gain (Loss) Reclassified From Accumulated Other Comprehensive Income into Income ⁽¹⁾	
	Six Months Ended November 30,		Location of Gain (Loss) Reclassified From Accumulated Other Comprehensive Income into Income	
	2015 ⁽²⁾		Six Months Ended November 30,	
	2014		2015 ⁽²⁾	
Derivatives designated as cash flow hedges:				
Foreign exchange forwards and options	\$ (10)	\$ (42)	Revenues	\$ (75) \$ (36)
Foreign exchange forwards and options	205	399	Cost of sales	298 13
Foreign exchange forwards and options	—	—	Total selling and administrative expense	— —
Foreign exchange forwards and options	122	140	Other (income) expense, net	100 18
Interest rate swaps	(50)	—	Interest expense (income), net	— —
Total designated cash flow hedges	\$ 267	\$ 497		\$ 323 \$ (5)

For the six months ended November 30, 2015 and 2014, the amounts recorded in Other (income) expense, net as a (1) result of hedge ineffectiveness and the discontinuance of cash flow hedges because the forecasted transactions were no longer probable of occurring were immaterial.

(2) Certain amounts have been updated to reflect the proper classification of \$40 million between Amount of Gain (Loss) Recognized in Other Comprehensive Income on Derivatives and Amount of Gain (Loss) Reclassified from Accumulated Other Comprehensive Income into Income for the three months ended August 31, 2015.

(In millions)	Amount of Gain (Loss) Recognized in Income on Derivatives				Location of Gain (Loss) Recognized in Income on Derivatives
	Three Months Ended November 30,		Six Months Ended November 30,		
	2015	2014	2015	2014	
Derivatives designated as fair value hedges:					
Interest rate swaps ⁽¹⁾	\$ 1	\$ 1	\$ 2	\$ 2	Interest expense (income), net
Derivatives not designated as hedging instruments:					
Foreign exchange forwards and options	63	185	34	278	Other (income) expense, net
Embedded derivatives	—	2	—	1	Other (income) expense, net

All interest rate swaps designated as fair value hedges meet the shortcut method requirements under the accounting standards for derivatives and hedging. Accordingly, changes in the fair values of the interest rate swaps are (1) considered to exactly offset changes in the fair value of the underlying long-term debt. Refer to “Fair Value Hedges” in this note for additional detail.

Refer to Note 3 — Accrued Liabilities for derivative instruments recorded in Accrued liabilities, Note 4 — Fair Value Measurements for a description of how the above financial instruments are valued and Note 11 — Accumulated Other Comprehensive Income for additional information on changes in Accumulated other comprehensive income for the

three and six months ended November 30, 2015 and 2014.

Cash Flow Hedges

The purpose of the Company's foreign exchange risk management program is to lessen both the positive and negative effects of currency fluctuations on the Company's consolidated results of operations, financial position and cash flows. Foreign currency exposures that the Company may elect to hedge in this manner include product cost exposures, non-functional currency denominated external and intercompany revenues, selling and administrative expenses, investments in U.S. Dollar-denominated available-for-sale debt securities and certain other intercompany transactions. Product cost exposures are primarily generated through non-functional currency denominated product purchases and the foreign currency adjustment program described below. NIKE entities primarily purchase products in two ways: (1) Certain NIKE entities purchase product from the NIKE Trading Company ("NTC"), a wholly-owned sourcing hub that buys NIKE branded products from third party factories, predominantly in U.S. Dollars. The NTC, whose functional currency is the U.S. Dollar, then sells the products to NIKE entities in their respective functional currencies. When the NTC sells to a NIKE entity with a different functional currency, the result is a foreign currency exposure for the NTC. (2) Other NIKE entities purchase product directly from third party factories in U.S. Dollars. These purchases generate a foreign currency exposure for those NIKE entities with a functional currency other than the U.S. Dollar.

The Company operates a foreign currency adjustment program with certain factories. The program is designed to more effectively manage foreign currency risk by assuming certain of the factories' foreign currency exposures, some of which are natural offsets to the Company's existing foreign currency exposures. Under this program, the Company's payments to these factories are adjusted for rate fluctuations in the basket of currencies ("factory currency exposure index") in which the labor, materials and overhead costs incurred by the factories in the production of NIKE branded products ("factory input costs") are denominated. For the portion of the indices denominated in the local or functional currency of the factory, the Company may elect to place formally designated cash flow hedges. For all currencies within the indices, excluding the U.S. Dollar and the local or functional currency of the factory, an embedded derivative contract is created upon the factory's acceptance of NIKE's purchase order. Embedded derivative contracts are separated from the related purchase order, as further described within the "Embedded Derivatives" section below. The Company's policy permits the utilization of derivatives to reduce its foreign currency exposures where internal netting or other strategies cannot be effectively employed. Typically, the Company may enter into hedge contracts starting up to 12 to 24 months in advance of the forecasted transaction and may place incremental hedges up to 100% of the exposure by the time the forecasted transaction occurs. The total notional amount of outstanding foreign currency derivatives designated as cash flow hedges was \$12.5 billion as of November 30, 2015.

Table of Contents

As of November 30, 2015, the Company had outstanding a series of forward-starting interest rate swap agreements with a total notional amount of \$500 million. These instruments were designated as cash flow hedges of the variability in the expected cash outflows of interest payments on future debt due to changes in benchmark interest rates. The Company terminated certain forward-starting interest rate swaps with a total notional amount of \$1 billion in connection with the October 29, 2015 debt issuance (refer to Note 6 — Long-Term Debt). Upon termination of these forward-starting swaps, the Company received a cash payment from the related counterparties of \$34 million, which was recorded in Accumulated other comprehensive income and will be released through Interest expense (income), net as interest payments are made over the term of the issued debt.

All changes in fair value of derivatives designated as cash flow hedges, excluding any ineffective portion, are recorded in Accumulated other comprehensive income until Net income is affected by the variability of cash flows of the hedged transaction. In most cases, amounts recorded in Accumulated other comprehensive income will be released to Net income in periods following the maturity of the related derivative, rather than at maturity. Effective hedge results are classified within the Unaudited Condensed Consolidated Statements of Income in the same manner as the underlying exposure. The results of hedges of non-functional currency denominated revenues and product cost exposures, excluding embedded derivatives, are recorded in Revenues or Cost of sales when the underlying hedged transaction affects consolidated Net income. Results of hedges of selling and administrative expense are recorded together with those costs when the related expense is recorded. Amounts recorded in Accumulated other comprehensive income related to forward-starting interest rate swaps will be released through Interest expense (income), net as interest payments are made over the term of the issued debt. Results of hedges of anticipated purchases and sales of U.S. Dollar-denominated available-for-sale securities are recorded in Other (income) expense, net when the securities are sold. Results of hedges of certain anticipated intercompany transactions are recorded in Other (income) expense, net when the transaction occurs. The Company classifies the cash flows at settlement from these designated cash flow hedge derivatives in the same category as the cash flows from the related hedged items, primarily within the Cash provided by operations component of the Unaudited Condensed Consolidated Statements of Cash Flows.

Premiums paid on options are initially recorded as deferred charges. The Company assesses the effectiveness of options based on the total cash flows method and records total changes in the options' fair value to Accumulated other comprehensive income to the degree they are effective.

The Company formally assesses, both at a hedge's inception and on an ongoing basis, whether the derivatives that are used in the hedging transaction have been highly effective in offsetting changes in the cash flows of hedged items and whether those derivatives may be expected to remain highly effective in future periods. Effectiveness for cash flow hedges is assessed based on changes in forward rates. Ineffectiveness was immaterial for the three and six months ended November 30, 2015 and 2014.

The Company discontinues hedge accounting prospectively when: (1) it determines that the derivative is no longer highly effective in offsetting changes in the cash flows of a hedged item (including hedged items such as firm commitments or forecasted transactions); (2) the derivative expires or is sold, terminated or exercised; (3) it is no longer probable that the forecasted transaction will occur; or (4) management determines that designating the derivative as a hedging instrument is no longer appropriate.

When the Company discontinues hedge accounting because it is no longer probable that the forecasted transaction will occur in the originally expected period, but is expected to occur within an additional two-month period of time thereafter, the gain or loss on the derivative remains in Accumulated other comprehensive income and is reclassified to Net income when the forecasted transaction affects consolidated Net income. However, if it is probable that a forecasted transaction will not occur by the end of the originally specified time period or within an additional two-month period of time thereafter, the gains and losses that were in Accumulated other comprehensive income will be recognized immediately in Other (income) expense, net. In all situations in which hedge accounting is discontinued and the derivative remains outstanding, the Company will carry the derivative at its fair value on the Unaudited Condensed Consolidated Balance Sheets, recognizing future changes in the fair value in Other (income) expense, net. For the three and six months ended November 30, 2015 and 2014, the amounts recorded in Other (income) expense, net as a result of the discontinuance of cash flow hedging because the forecasted transactions were no longer probable

of occurring were immaterial.

As of November 30, 2015, \$785 million of deferred net gains (net of tax) on both outstanding and matured derivatives in Accumulated other comprehensive income were expected to be reclassified to Net income during the next 12 months concurrent with the underlying hedged transactions also being recorded in Net income. Actual amounts ultimately reclassified to Net income are dependent on the exchange rates in effect when derivative contracts that are currently outstanding mature. As of November 30, 2015, the maximum term over which the Company was hedging exposures to the variability of cash flows for its forecasted transactions was 30 months.

Fair Value Hedges

The Company is also exposed to the risk of changes in the fair value of certain fixed-rate debt attributable to changes in interest rates. Derivatives used by the Company to hedge this risk are receive-fixed, pay-variable interest rate swaps. All interest rate swaps designated as fair value hedges of the related long-term debt meet the shortcut method requirements under the accounting standards for derivatives and hedging. Accordingly, changes in the fair values of the interest rate swaps are considered to exactly offset changes in the fair value of the underlying long-term debt. The cash flows associated with the Company's fair value hedges are periodic interest payments while the swaps are outstanding, which are reflected within the Cash provided by operations component of the Unaudited Condensed Consolidated Statements of Cash Flows. The Company recorded no ineffectiveness from its interest rate swaps designated as fair value hedges for the three and six months ended November 30, 2015 or 2014. On October 15, 2015, the Company repaid the long-term debt which had previously been hedged with these interest rate swaps.

Accordingly, as of November 30, 2015, the Company had no interest rate swaps designated as fair value hedges.

Net Investment Hedges

The Company has, in the past, hedged and may, in the future, hedge the risk of variability in foreign-currency-denominated net investments in wholly-owned international operations. All changes in fair value of the derivatives designated as net investment hedges, except ineffective portions, are reported in Accumulated other comprehensive income along with the foreign currency translation adjustments on those investments. The Company classifies the cash flows at settlement of its net investment hedges within the Cash used by investing activities component of the Unaudited Condensed Consolidated Statements of Cash Flows. The Company assesses hedge effectiveness based on changes in forward rates. The Company recorded no ineffectiveness from its net investment hedges for the three and six months ended November 30, 2015 or 2014. The Company had no outstanding net investment hedges as of November 30, 2015.

Table of Contents

Undesignated Derivative Instruments

The Company may elect to enter into foreign exchange forwards to mitigate the change in fair value of specific assets and liabilities on the Unaudited Condensed Consolidated Balance Sheets and/or embedded derivative contracts. These forwards are not designated as hedging instruments under the accounting standards for derivatives and hedging. Accordingly, these undesignated instruments are recorded at fair value as a derivative asset or liability on the Unaudited Condensed Consolidated Balance Sheets with their corresponding change in fair value recognized in Other (income) expense, net, together with the re-measurement gain or loss from the hedged balance sheet position or embedded derivative contract. The Company classifies the cash flows at settlement from undesignated instruments in the same category as the cash flows from the related hedged items, generally within the Cash provided by operations component of the Unaudited Condensed Consolidated Statements of Cash Flows. The total notional amount of outstanding undesignated derivative instruments was \$7.4 billion as of November 30, 2015.

Embedded Derivatives

As part of the foreign currency adjustment program described above, an embedded derivative contract is created upon the factory's acceptance of NIKE's purchase order for currencies within the factory currency exposure indices that are neither the U.S. Dollar nor the local or functional currency of the factory. Embedded derivative contracts are treated as foreign currency forward contracts that are bifurcated from the related purchase order and recorded at fair value as a derivative asset or liability on the Unaudited Condensed Consolidated Balance Sheets with their corresponding change in fair value recognized in Other (income) expense, net from the date a purchase order is accepted by a factory through the date the purchase price is no longer subject to foreign currency fluctuations.

In addition, the Company has entered into certain other contractual agreements which have payments that are indexed to currencies that are not the functional currency of either substantial party to the contracts. These payment terms expose NIKE to variability in foreign exchange rates and create embedded derivative contracts that must be bifurcated from the related contract and recorded at fair value as derivative assets or liabilities on the Unaudited Condensed Consolidated Balance Sheets with their corresponding changes in fair value recognized in Other (income) expense, net until each payment is settled.

At November 30, 2015, the total notional amount of embedded derivatives outstanding was approximately \$228 million.

Credit Risk

The Company is exposed to credit-related losses in the event of nonperformance by counterparties to hedging instruments. The counterparties to all derivative transactions are major financial institutions with investment grade credit ratings. However, this does not eliminate the Company's exposure to credit risk with these institutions. This credit risk is limited to the unrealized gains in such contracts should any of these counterparties fail to perform as contracted. To manage this risk, the Company has established strict counterparty credit guidelines that are continually monitored.

The Company's derivative contracts contain credit risk related contingent features designed to protect against significant deterioration in counterparties' creditworthiness and their ultimate ability to settle outstanding derivative contracts in the normal course of business. The Company's bilateral credit-related contingent features generally require the owing entity, either the Company or the derivative counterparty, to post collateral for the portion of the fair value in excess of \$50 million should the fair value of outstanding derivatives per counterparty be greater than \$50 million. Additionally, a certain level of decline in credit rating of either the Company or the counterparty could also trigger collateral requirements. As of November 30, 2015, the Company was in compliance with all credit risk-related contingent features and had no derivative instruments with credit risk-related contingent features in a net liability position. Accordingly, the Company was not required to post any collateral as a result of these contingent features. Further, as of November 30, 2015, the Company had received \$725 million of cash collateral from various counterparties to its derivative contracts (refer to Note 4 — Fair Value Measurements). Given the considerations described above, the Company considers the impact of the risk of counterparty default to be immaterial.

NOTE 11 — Accumulated Other Comprehensive Income

The changes in Accumulated other comprehensive income, net of tax, for the three and six months ended November 30, 2015 were as follows:

(In millions)	Foreign Currency Translation Adjustment ⁽¹⁾⁽²⁾	Cash Flow Hedges	Net Investment Hedges ⁽¹⁾⁽²⁾	Other	Total
Balance at August 31, 2015	\$ (112)	\$ 891	\$ 115	\$(61)	\$ 833
Other comprehensive gains (losses) before reclassifications ⁽³⁾	(29)	425	—	11	407
Reclassifications to net income of previously deferred (gains) losses ⁽⁴⁾	—	(135)	—	2	(133)
Other comprehensive income (loss)	(29)	290	—	13	274
Balance at November 30, 2015	\$ (141)	\$ 1,181	\$ 115	\$(48)	\$ 1,107

The accumulated foreign currency translation adjustment and net investment hedge gains/losses related to an (1) investment in a foreign subsidiary are reclassified to Net income upon sale or upon complete or substantially complete liquidation of the respective entity.

(2) Beginning balances have been updated to reflect the proper classification of \$20 million of deferred tax balances between Foreign Currency Translation Adjustment and Net Investment Hedges.

(3) Net of tax benefit (expense) of \$0 million, \$18 million, \$0 million, \$(2) million and \$16 million, respectively.

(4) Net of tax (benefit) expense of \$0 million, \$0 million, \$0 million, \$0 million and \$0 million, respectively.

Table of Contents

(In millions)	Foreign Currency Translation Adjustment ⁽¹⁾⁽²⁾	Cash Flow Hedges ⁽³⁾	Net Investment Hedges ⁽¹⁾⁽²⁾	Other	Total
Balance at May 31, 2015	\$ (31)	\$ 1,220	\$ 115	\$(58)	\$ 1,246

(4) Net of tax (benefit) expense of \$0 million, \$(7) million, \$0 million, \$3 million and \$(4) million, respectively.

Table of Contents

The following table summarizes the reclassifications from Accumulated other comprehensive income to the Unaudited Condensed Consolidated Statements of Income:

(In millions)	Amount of Gain (Loss) Reclassified from Accumulated Other Comprehensive Income into Income				Location of Gain (Loss) Reclassified from Accumulated Other Comprehensive Income into Income
	Three Months Ended November 30, 2015		Six Months Ended November 30, 2015 ⁽¹⁾		
	2015	2014	2015 ⁽¹⁾	2014	
Gains (losses) on cash flow hedges:					
Foreign exchange forwards and options	\$(29) \$(19) \$(75) \$(36) Revenues
Foreign exchange forwards and options	125	21	298	13	Cost of sales
Foreign exchange forwards and options	—	—	—	—	Total selling and administrative expense
Foreign exchange forwards and options	39	13	100	18	Other (income) expense, net
Total before tax	135	15	323	(5)
Tax (expense) benefit	—	3	(1) 7	
Gain (loss) net of tax	135	18	322	2	
Gains (losses) on other	(2) 9	1	13	Other (income) expense, net
Total before tax	(2) 9	1	13	
Tax (expense)	—	(2) —	(3)
Gain (loss) net of tax	(2) 7	1	10	
Total net gain (loss) reclassified for the period	\$133	\$25	\$323	\$12	

(1) Certain amounts have been updated to reflect the proper classification of \$40 million between Amount of Gain (Loss) Reclassified from Accumulated Other Comprehensive Income into Income for cash flow hedges for the three months ended August 31, 2015.

NOTE 12 — Operating Segments

The Company's operating segments are evidence of the structure of the Company's internal organization. The NIKE Brand segments are defined by geographic regions for operations participating in NIKE Brand sales activity. Each NIKE Brand geographic segment operates predominantly in one industry: the design, development, marketing and selling of athletic footwear, apparel and equipment. The Company's reportable operating segments for the NIKE Brand are: North America, Western Europe, Central & Eastern Europe, Greater China, Japan and Emerging Markets, and include results for the NIKE, Jordan and Hurley brands. The Company's NIKE Brand Direct to Consumer operations are managed within each geographic operating segment. Converse is also a reportable segment for the Company and operates in one industry: the design, marketing, licensing and selling of casual sneakers, apparel and accessories.

Global Brand Divisions is included within the NIKE Brand for presentation purposes to align with the way management views the Company. Global Brand Divisions primarily represent NIKE Brand licensing businesses that are not part of a geographic operating segment and demand creation, operating overhead, and product creation and design expenses that are centrally managed for the NIKE Brand.

Corporate consists largely of unallocated general and administrative expenses, including expenses associated with centrally managed departments; depreciation and amortization related to the Company's headquarters; unallocated insurance, benefit and compensation programs, including stock-based compensation; and certain foreign currency gains and losses, including certain hedge gains and losses.

The primary financial measure used by the Company to evaluate performance of individual operating segments is earnings before interest and taxes (commonly referred to as "EBIT"), which represents Net income before Interest

expense (income), net and Income tax expense in the Unaudited Condensed Consolidated Statements of Income. Reconciling items for EBIT represent corporate expense items that are not allocated to the operating segments for management reporting.

As part of the Company's centrally managed foreign exchange risk management program, standard foreign currency rates are assigned twice per year to each NIKE Brand entity in the Company's geographic operating segments and Converse. These rates are set approximately nine months in advance of the future selling season based on average market spot rates in the calendar month preceding the date they are established. Inventories and Cost of sales for geographic operating segments and Converse reflect use of these standard rates to record non-functional currency product purchases in the entity's functional currency. Differences between assigned standard foreign currency rates and actual market rates are included in Corporate, together with foreign currency hedge gains and losses generated from the Company's centrally managed foreign exchange risk management program and other conversion gains and losses. Accounts receivable, net, Inventories and Property, plant and equipment, net for operating segments are regularly reviewed by management and are therefore provided below.

Certain prior year amounts have been reclassified to conform to fiscal 2016 presentation.

NOTE 13 — Commitments and Contingencies

At November 30, 2015, the Company had letters of credit outstanding totaling \$151 million. These letters of credit were issued primarily for the purchase of inventory and guarantees of the Company's performance under certain self-insurance and other programs.

During the fiscal year ended May 31, 2013, the Company divested of Cole Haan. Preexisting guarantees of certain Cole Haan lease payments remained in place after the sale; the maximum exposure under the guarantees was \$20 million at November 30, 2015. The fair value of the guarantees is not material.

There have been no other significant subsequent developments relating to the commitments and contingencies reported on the Company's latest Annual Report on Form 10-K.

Table of Contents

ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

On November 19, 2015, we announced a two-for-one split of both NIKE Class A and Class B Common Stock. The stock split was in the form of a 100 percent stock dividend payable on December 23, 2015 to shareholders of record at the close of business December 9, 2015. Common stock began trading at the split-adjusted price on December 24, 2015. All share and per share amounts presented reflect the stock split.

For the second quarter of fiscal 2016, NIKE, Inc. Revenues increased 4% to \$7.7 billion. Excluding the impact of foreign currency exchange rates, Revenues increased 12%. For the second quarter of fiscal 2016, Net income was \$785 million and diluted earnings per common share was \$0.45, 20% and 22% higher, respectively, than the second quarter of fiscal 2015.

Income before income taxes increased 10% compared to the second quarter of fiscal 2015 due to revenue growth and gross margin expansion, which more than offset higher selling and administrative expense. The NIKE Brand, which represents over 90% of NIKE, Inc. Revenues, delivered constant currency revenue growth of 13%, reflecting higher revenues across all geographies, footwear and apparel, and most key categories. Our category offense continued to deliver innovative products, deep brand connections and compelling retail experiences to consumers online and at NIKE-owned and retail partner stores, driving strong demand for NIKE Brand products in the second quarter of fiscal 2016. Constant currency revenues for Converse decreased 5%, as growth in the United States and Asia Pacific was more than offset by declines in certain European markets, most notably the United Kingdom.

Our second quarter effective tax rate decreased 630 basis points versus the second quarter of fiscal 2015, primarily due to adjustments in the prior year to tax expense on intercompany transactions and an increase in the proportion of earnings from operations outside the United States in the current year, which are generally subject to a lower tax rate. These factors were partially offset by benefits from the resolution of tax audits across several jurisdictions in the prior year period.

Diluted earnings per common share also benefited from a 1% decline in the diluted weighted average common shares outstanding, driven by our share repurchase program.

(1) Certain prior year amounts have been reclassified to conform to fiscal 2016 presentation. These changes had no impact on previously reported results of operations or shareholders' equity.

Results have been restated using actual exchange rates in use during the comparative prior year period to enhance (2) the visibility of the underlying business trends by excluding the impact of translation arising from foreign currency exchange rate fluctuations.

(3) Global Brand Divisions revenues are primarily attributable to NIKE Brand licensing businesses that are not part of a geographic operating segment.

Corporate revenues primarily consist of foreign currency hedge gains and losses related to revenues generated by (4) entities within the NIKE Brand geographic operating segments and Converse but managed through our central foreign exchange risk management program.

On a currency-neutral basis, NIKE, Inc. Revenues grew 12% and 13% for the second quarter and first six months of fiscal 2016, respectively, driven by higher revenues for the NIKE Brand. Excluding the effects of changes in currency exchange rates, every NIKE Brand geography delivered higher revenues for the second quarter and first six months of fiscal 2016, driven by our broad portfolio of innovative products, deep brand connections and compelling retail experiences to consumers. For both the second quarter and first six months of fiscal 2016, North America contributed approximately 4 percentage points of the increase in NIKE, Inc. Revenues, while Greater China contributed approximately 3 percentage points, Western Europe and Emerging Markets each contributed 2 percentage points, and Central and Eastern Europe contributed approximately 1 percentage point. Japan contributed approximately 1 percentage point for the year-to-date period.

Excluding the effects of changes in currency exchange rates, the increase in NIKE Brand footwear revenues for the second quarter and first six months of fiscal 2016 was attributable to growth in nearly all key categories, led by Sportswear, the Jordan Brand and Running. Unit sales of footwear increased approximately 11% for both the second quarter and first six months of fiscal 2016, and increases in average selling price per pair contributed approximately 5

and 6 percentage points of footwear revenue growth for the respective periods. The increases in average selling price per pair for both periods were due to the favorable impact of growth in our higher-priced Direct to Consumer ("DTC") business as well as shifts in mix to higher-priced products.

The constant currency increase in NIKE Brand apparel revenues for the second quarter and first six months of fiscal 2016 was driven by growth in nearly all key categories, most notably Sportswear, Men's Training, Women's Training and Running, while Action Sports declined for both periods. Global Football also declined for the year-to-date period, due to comparisons to higher World Cup-related sales in the first quarter of fiscal 2015 as well as the expiration of certain club endorsement agreements in Western Europe. For the second quarter and first six months of fiscal 2016, unit sales of apparel increased approximately 8% and 9%, respectively, while increases in average selling price per unit contributed approximately 2 percentage points of apparel revenue growth for both periods. The increases in average selling price per unit for both the second quarter and first six months of fiscal 2016 were primarily attributable to growth in our higher-priced DTC business.

Table of Contents

While wholesale revenues remain the largest component of overall NIKE Brand revenues, we continue to expand our NIKE Brand DTC distribution in each of our geographies. Our NIKE Brand DTC operations include NIKE-owned in-line and factory stores, as well as online sales through NIKE-owned websites. For both the second quarter and first six months of fiscal 2016, DTC revenues represented approximately 24% of our total NIKE Brand revenues compared to 21% and 22% for the second quarter and first six months of fiscal 2015, respectively. On a currency neutral basis, DTC revenues grew 26% for the second quarter of fiscal 2016, led by comparable store sales growth of 13%, online sales growth and the addition of new stores. For the first six months of fiscal 2016, constant currency DTC revenues grew 23% due to comparable store sales growth of 10%, the addition of new stores and online sales growth. Comparable store sales include revenues from NIKE-owned in-line and factory stores for which all three of the following requirements have been met: (1) the store has been open at least one year, (2) square footage has not changed by more than 15% within the past year and (3) the store has not been permanently repositioned within the past year. On a currency-neutral basis, online sales through NIKE-owned websites, which are not included in comparable store sales, grew 49% and 48% for the second quarter and first six months of fiscal 2016, respectively. Online sales represented approximately 21% and 19% of our total NIKE Brand DTC revenues for the second quarter and first six months of fiscal 2016, respectively, compared to 18% and 16% for the second quarter and first six months of fiscal 2015, respectively.

Futures Orders

Futures orders for NIKE Brand footwear and apparel scheduled for delivery from December 2015 through April 2016 totaled \$12.3 billion and were 15% higher than the orders reported for the comparable prior year period. The U.S. Dollar futures orders amount is calculated based upon our internal forecast of the currency exchange rates under which our revenues will be translated during this period. Excluding the impact of currency changes, futures orders increased 20%, with unit orders and average selling price per unit contributing approximately 12 and 8 percentage points of growth, respectively.

By geography, futures orders growth was as follows:

	Reported Futures Orders		Futures Orders Excluding Currency Changes ⁽¹⁾	
North America	14	%	14	%
Western Europe	17	%	25	%
Central & Eastern Europe	3	%	13	%
Greater China	31	%	34	%
Japan	26	%	32	%
Emerging Markets	0	%	14	%
TOTAL NIKE BRAND FUTURES ORDERS	15	%	20	%

⁽¹⁾ Reported futures have been restated using prior year exchange rates for the comparative period to enhance the visibility of the underlying business trends, excluding the impact of foreign currency exchange rate fluctuations.

The reported futures orders growth is not necessarily indicative of our expectation of revenue growth during this period. This is due to year-over-year changes in shipment timing, changes in the mix of orders between futures and at-once orders, and because the fulfillment of certain orders may fall outside of the schedule noted above. In addition, exchange rate fluctuations as well as differing levels of order cancellations, discounts and returns can cause differences in the comparisons between futures orders and actual revenues. Moreover, a portion of our revenue is not derived from futures orders, including sales of at-once and closeout NIKE Brand footwear and apparel, sales of NIKE Brand equipment, sales from our DTC operations and sales from Converse, NIKE Golf and Hurley.

Table of Contents

Gross Margin

(Dollars in millions)	Three Months Ended November 30,			Six Months Ended November 30,		
	2015	2014	% Change	2015	2014	% Change
Gross profit	\$3,501	\$3,327	5 %	\$7,496	\$7,048	6 %
Gross margin %	45.6	% 45.1	% 50 bps	46.6	% 45.9	% 70 bps

For the second quarter and first six months of fiscal 2016, our consolidated gross margin was 50 and 70 basis points higher than the respective prior year periods, primarily driven by the following factors:

Higher NIKE Brand average net selling prices (increasing gross margin approximately 260 basis points for the second quarter and 240 basis points for the first six months) primarily due to shifts in mix to higher-priced products and, to a lesser extent, increased prices, in part reflecting inflationary conditions in certain territories;

Higher NIKE Brand product costs (decreasing gross margin approximately 90 basis points for the second quarter and 100 basis points for the first six months) largely due to shifts in mix to higher-cost products as well as labor input cost inflation;

Our higher-margin NIKE Brand DTC business had an insignificant impact on gross margin for the second quarter as the favorable impact due to growth was largely offset by lower margins due to increased liquidation efforts in the quarter, primarily in North America; for the first six months, growth in NIKE Brand DTC increased gross margin approximately 20 basis points;

Higher other costs (decreasing gross margin approximately 50 basis points for both the second quarter and first six months) primarily driven by higher warehousing expenses in North America, due to additional investments in infrastructure, and higher product design and development costs; and

Unfavorable changes in foreign currency exchange rates, including hedges (decreasing gross margin approximately 50 basis points for the second quarter and 30 basis points for the first six months).

Total Selling and Administrative Expense

(Dollars in millions)	Three Months Ended November 30,			Six Months Ended November 30,		
	2015	2014	% Change	2015	2014	% Change
Demand creation expense ⁽¹⁾	\$769	\$766	0 %	\$1,601	\$1,663	-4 %
Operating overhead expense	1,791	1,672	7 %	3,536	3,255	9 %
Total selling and administrative expense	\$2,560	\$2,438	5 %	\$5,137	\$4,918	4 %
% of Revenues	33.3	% 33.0	% 30 bps	31.9	% 32.0	% (10) bps

(1) Demand creation expense consists of advertising and promotion costs, including costs of endorsement contracts, television, digital and print advertising, brand events and retail brand presentation.

Demand creation expense was nearly flat for the second quarter of fiscal 2016 as increased investments in DTC marketing mostly offset lower sports marketing and other demand creation expenses. For the first six months of fiscal 2016, Demand creation expense decreased 4% primarily due to lower advertising expense compared to higher spending in the first six months of fiscal 2015 to support the World Cup. Changes in foreign currency exchange rates reduced the growth in Demand creation expense by approximately 7 and 8 percentage points for the second quarter and first six months of fiscal 2016, respectively.

Operating overhead expense increased 7% and 9% for the second quarter and first six months of fiscal 2016, respectively. The increase in both periods was driven by continued growth in our DTC business, including new store openings and higher variable expenses, as well as ongoing investments in operational infrastructure and consumer-focused digital capabilities. Changes in foreign currency exchange rates reduced the growth in Operating overhead expense by approximately 6 percentage points for both the second quarter and first six months of fiscal 2016.

Other (Income) Expense, Net

(In millions)	Three Months Ended November 30,		Six Months Ended November 30,	
	2015	2014	2015	2014
Other (income) expense, net	\$(34)) \$2	\$(65)) \$5

Other (income) expense, net comprises foreign currency conversion gains and losses from the re-measurement of monetary assets and liabilities denominated in non-functional currencies and the impact of certain foreign currency derivative instruments, as well as unusual or non-operating transactions that are outside the normal course of business. For the second quarter of fiscal 2016, Other (income) expense, net shifted from \$2 million of other expense, net in the prior year to \$34 million of other income, net primarily due to a \$21 million net change in foreign currency conversion gains and losses, a favorable settlement of a legal judgment related to a bankruptcy case in Western Europe, and other non-operating items.

For the first six months of fiscal 2016, Other (income) expense, net shifted from \$5 million of other expense, net in the prior year to \$65 million of other income, net primarily due to a \$43 million net change in foreign currency conversion gains and losses, the favorable settlement of the bankruptcy case noted above, and other non-operating items.

We estimate the combination of the translation of foreign currency-denominated profits from our international businesses and the year-over-year change in foreign currency related gains and losses included in Other (income) expense, net had unfavorable impacts of approximately \$109 million and \$260 million on our Income before income taxes for the second quarter and first six months of fiscal 2016, respectively.

Table of Contents

Income Taxes

	Three Months Ended November 30,			Six Months Ended November 30,		
	2015	2014	% Change	2015	2014	% Change
Effective tax rate	19.1	% 25.4	% (630) bps	18.7	% 23.3	% (460) bps

Our effective tax rates for the second quarter and first six months of fiscal 2016 were 630 basis points and 460 basis points lower than the respective prior year periods primarily due to adjustments in the prior year to tax expense on intercompany transactions and an increase in the proportion of earnings from operations outside the United States in the current year, which are generally subject to a lower tax rate. These factors were partially offset by benefits from the resolution of tax audits across several jurisdictions in the prior year periods.

We anticipate the effective tax rate for the full fiscal year will be approximately 20.0%.

Table of Contents

Operating Segments

Our operating segments are evidence of the structure of the Company's internal organization. The NIKE Brand segments are defined by geographic regions for operations participating in NIKE Brand sales activity.

Each NIKE Brand geographic segment operates predominantly in one industry: the design, development, marketing and selling of athletic footwear, apparel and equipment. The Company's reportable operating segments for the NIKE Brand are: North America, Western Europe, Central & Eastern Europe, Greater China, Japan and Emerging Markets, and include results for the NIKE, Jordan and Hurley brands. The Company's NIKE Brand DTC operations are managed within each geographic operating segment. Converse is also a reportable segment for the Company and operates in one industry: the design, marketing, licensing and selling of casual sneakers, apparel and accessories. As part of our centrally managed foreign exchange risk management program, standard foreign currency rates are assigned twice per year to each NIKE Brand entity in our geographic operating segments and Converse. These rates are set approximately nine months in advance of the future selling season based on average market spot rates in the calendar month preceding the date they are established. Inventories and Cost of sales for geographic operating segments and Converse reflect use of these standard rates to record non-functional currency product purchases into the entity's functional currency. Differences between assigned standard foreign currency rates and actual market rates are included in Corporate together with foreign currency hedge gains and losses generated from our centrally managed foreign exchange risk management program and other conversion gains and losses.

The breakdown of revenues is as follows:

(Dollars in millions)	Three Months Ended November 30,				Six Months Ended November 30,

(1) Certain prior year amounts have been reclassified to conform to fiscal 2016 presentation. These changes had no impact on previously reported results of operations or shareholders' equity.

Results have been restated using actual exchange rates in use during the comparative prior year period to enhance (2) the visibility of the underlying business trends by excluding the impact of translation arising from foreign currency exchange rate fluctuations.

(3) Global Brand Divisions revenues are primarily attributable to NIKE Brand licensing businesses that are not part of a geographic operating segment.

Corporate revenues primarily consist of foreign currency hedge gains and losses related to revenues generated by (4) entities within the NIKE Brand geographic operating segments and Converse but managed through our central foreign exchange risk management program.

The primary financial measure used by the Company to evaluate performance of individual operating segments is earnings before interest and taxes (commonly referred to as "EBIT"), which represents Net income before Interest expense (income), net and Income tax expense in the Unaudited Condensed Consolidated Statements of Income. As

discussed in Note 12 — Operating Segments in the accompanying Notes to the Unaudited Condensed Consolidated Financial Statements, certain corporate costs are not included in EBIT of our operating segments.

EARNINGS BEFORE INTEREST AND TAXES	\$882	\$785	12	%	\$1,924	\$1,755	10	%

Excluding changes in currency exchange rates, North America revenues for the second quarter and first six months of fiscal 2016 increased 10% and 9%, respectively, driven by strong demand for NIKE Brand products across nearly all key categories, led by Sportswear, the Jordan Brand, Men's Training and Running, with the Jordan Brand having a greater impact than Sportswear for the second quarter. DTC revenue grew 17% for the second quarter of fiscal 2016, driven by online sales growth, comparable store sales growth of 7% and the addition of new stores. For the first six months of fiscal 2016, DTC revenue grew 13% due to online sales growth, the addition of new stores and comparable store sales growth of 4%.

The constant currency footwear revenue growth for the second quarter and first six months of fiscal 2016 was driven by growth in nearly every key category, led by the Jordan Brand, Sportswear and Running. For the second quarter and

first six months of fiscal 2016, unit sales of footwear increased approximately 12% and 8%, respectively, while increases in average selling price per pair contributed approximately 1 and 3 percentage points of footwear revenue growth for the respective periods. The increase in average selling price per pair for the second quarter of fiscal 2016 was due primarily to shifts in mix to higher-priced products. For the first six months of fiscal 2016, the increase in average selling price per pair was driven by shifts in mix to higher-priced products, and to a lesser extent, increases in the proportion of revenues from our higher-priced DTC business.

The increase in apparel revenues for the second quarter and first six months of fiscal 2016 was attributable to growth in most key categories, primarily Men's Training and Sportswear. Second quarter fiscal 2016 unit sales of apparel increased approximately 8% while average selling price per unit was flat compared to the prior year. For the first six months of fiscal 2016 unit sales of apparel increased approximately 9% while increases in average selling price per unit contributed approximately 2 percentage points of apparel revenue growth. The increase in average selling price per unit for the first six months of fiscal 2016 was primarily due to shifts in mix to higher-priced products, and to a lesser extent, the favorable impact of growth in our higher-priced DTC business.

Table of Contents

EBIT grew 12% and 10% for the second quarter and first six months of fiscal 2016, respectively, driven by higher revenues and selling and administrative expense leverage, partially offset by lower gross margin for both periods. Gross margin decreased 20 basis points for both the second quarter and first six months of fiscal 2016 as increased product input costs, higher warehousing costs, inventory obsolescence and higher off-price mix more than offset higher average selling prices. For both the second quarter and first six months of fiscal 2016, selling and administrative expenses decreased as a percent of revenues despite higher operating overhead costs primarily to support DTC growth, and to a lesser extent, increased investments in infrastructure. Demand creation was mostly flat for the second quarter and first six months of fiscal 2016 as lower advertising expense in both periods was mostly offset by increased spending for key brand events and other demand creation costs for the second quarter and by increased sports marketing costs for the first six months of fiscal 2016.

Inventories in North America remain somewhat elevated as of the second quarter, and we continue to work to expeditiously clear excess inventory while continuing to bring new products to market. These liquidation efforts are expected to have a negative impact on gross margin for both North America and NIKE, Inc. for the third quarter, and inventory levels are expected to normalize over the third and fourth quarters of fiscal 2016.

Excluding changes in currency exchange rates, Western Europe revenues for the second quarter and first six months of fiscal 2016 increased 12% and 13%, respectively, due to higher revenues in every territory. Revenue growth for the second quarter was led by three of our largest territories, the UK & Ireland, Southern Europe (which includes Italy, Spain and Portugal) and AGS (Austria, Germany and Switzerland), which grew 12%, 16% and 14%, respectively. For the first six months of fiscal 2016, growth was led by AGS, Southern Europe and the UK & Ireland, which grew 17%, 13% and 10%, respectively. On a category basis, revenues grew in most key categories for the second quarter of fiscal 2016, led by Sportswear and Football (Soccer). For the first six months of fiscal 2016, nearly all key categories grew, most notably Sportswear, while Football (Soccer) declined due to the expiration of certain club endorsement agreements and comparisons to higher World Cup-related revenues in the first quarter of fiscal 2015. DTC revenues grew 26% and 29% for the second quarter and first six months of fiscal 2016, respectively, driven by comparable store sales growth of 16% and 15%, respectively, online sales growth and the addition of new stores.

The constant currency footwear revenue growth for the second quarter and first six months of fiscal 2016 reflected growth in most key categories, led by Sportswear. For the second quarter and first six months of fiscal 2016, unit sales of footwear increased approximately 7% and 11%, respectively, while increases in average selling price per pair contributed approximately 4 percentage points of footwear revenue growth for each period. The increases in average selling price per pair for both periods were primarily driven by shifts in mix to higher-priced products, and to a lesser

extent, the favorable impact of increases in the proportion of sales from of our higher-priced DTC business. Constant currency apparel revenue growth for the second quarter of fiscal 2016 was due to growth in nearly every key category, led by Sportswear. For the first six months of fiscal 2016, revenues grew in most key categories, primarily Sportswear, partially offset by a decline in Football (Soccer). Second quarter fiscal 2016 unit sales of apparel increased approximately 10% while increases in average selling price per unit contributed approximately 5 percentage points of apparel revenue growth. The increase in average selling price per unit for the second quarter of fiscal 2016 was primarily due to the favorable impact of growth in our higher-priced DTC business. For the first six months of fiscal 2016 unit sales of apparel increased approximately 9% while decreases in average selling price per unit reduced apparel revenue growth by approximately 1 percentage point. The decrease in average selling price per unit for the first six months of fiscal 2016 was primarily attributable to shifts in mix to lower-priced products, partly due to comparisons to higher sales of higher-priced Football (Soccer) replica apparel in the first half of fiscal 2015, partially offset by the favorable impact of growth in our higher-priced DTC business. Reported EBIT grew 18% for the second quarter of fiscal 2016, despite the negative translation impact from changes in currency exchange rates, most notably the Euro. Reported revenues declined 1%, but were more than offset by gross margin expansion and selling and administrative expense leverage, as well as the favorable settlement of a legal judgment related to a bankruptcy case reflected in Other (income) expense, net. Gross margin increased 170 basis points for the second quarter of fiscal 2016, primarily driven by higher average selling prices and favorable standard foreign currency exchange rates, partially offset by higher off-price mix. Selling and administrative expense was lower as a percent of revenues despite higher operating overhead, primarily to support DTC growth, as well as investments in infrastructure. Demand creation was higher due to increased advertising, digital brand marketing expense and other demand creation costs, partially offset by lower sports marketing and brand events.

Table of Contents

Reported EBIT for the first six months of fiscal 2016 grew 19%, despite the weaker Euro. Lower reported revenues, which declined 3%, were more than offset by gross margin expansion, selling and administrative expense leverage, and the favorable legal settlement in the second quarter reflected in Other (income) expense, net noted above. Gross margin increased 290 basis points for the first six months of fiscal 2016 primarily driven by higher average selling prices, favorable standard foreign currency exchange rates, and lower third party royalties, partially offset by higher off-price mix. Selling and administrative expense was lower as a percent of revenues despite higher operating overhead, primarily to support DTC growth. Demand creation was higher due to growth in DTC as well as increased digital brand marketing expense and other demand creation costs, partially offset by lower sports marketing expense.

Sales to Wholesale Customers	\$277	\$302	-8	% 10	% \$627	\$653	-4	% 17
Sales Direct to Consumer	49	45	9	% 44	% 100	87	15	% 51
TOTAL REVENUES	\$326	\$347	-6	% 15	% \$727	\$740	-2	% 21
EARNINGS BEFORE INTEREST AND TAXES	\$76	\$57	33	%	\$174	\$126	38	%

On a currency-neutral basis, Central & Eastern Europe revenues increased 15% and 21% for the second quarter and first six months of fiscal 2016, respectively, with double-digit growth in most territories. Revenues in two of our largest territories, Turkey and Russia, grew 37% and 14%, respectively, for the second quarter of fiscal 2016, and 37% and 20%, respectively, for the first six months of fiscal 2016. Our distributors business also grew 8% and 23% for the second quarter and first six months of fiscal 2016, respectively. Revenues in Greece, one of our smallest territories, decreased 21% and 18% for the second quarter and first six months of fiscal 2016, respectively, as a result of on-going macroeconomic volatility. On a category basis, revenues for the second quarter and first six months of fiscal 2016 increased in nearly every key category, led by Sportswear and Running. For the second quarter and first six months of fiscal 2016, DTC revenues increased 44% and 51%, respectively, fueled by strong comparable store sales growth of 28% and 29%, respectively, along with the addition of new stores.

Constant currency footwear revenue growth for the second quarter and first six months of fiscal 2016 was attributable to growth in nearly all key categories, most notably Sportswear. Unit sales of footwear for the second quarter and first six months of fiscal 2016 increased approximately 8% and 9%, respectively, while increases in average selling price per pair contributed approximately 15 and 19 percentage points, respectively, of footwear revenue growth. The increases in average selling price per pair for both periods were primarily attributable to price increases reflecting inflationary conditions in certain territories.

The constant currency increase in apparel revenue for the second quarter of fiscal 2016 was fueled by growth in most key categories, led by Running, Football (Soccer) and Men's Training. For the first six months of fiscal 2016, nearly all key categories increased, led by Running, Sportswear, Women's Training and Men's Training. Unit sales of apparel for the second quarter of fiscal 2016 decreased 3%, but increased 4% for the first six months of fiscal 2016, while increases in average selling price per unit contributed approximately 8 percentage points and 9 percentage points of apparel revenue growth for the respective periods. The increases in average selling price per unit for both periods was primarily attributable to price increases reflecting inflationary conditions in certain territories.

On a reported basis, EBIT for the second quarter of fiscal 2016 increased 33%, despite the negative impact of changes in foreign currency exchange rates, primarily the Russian Ruble and Turkish Lira. On a reported basis, revenues declined 6% and selling and administrative expense increased slightly as a percent of revenues, while gross margin increased 600 basis points. Gross margin expanded significantly due primarily to higher average selling prices and comparisons to higher import duty costs in the prior year, partially offset by unfavorable standard foreign currency exchange rates. Selling and administrative expense grew as a percent of revenues primarily due to higher operating overhead costs resulting from investments in our growing DTC business, including higher variable costs, while demand creation was flat for the second quarter.

On a reported basis, EBIT for the first six months of fiscal 2016 increased 38%, despite the negative impact of translation. Reported revenue declined 2%, but was more than offset by strong gross margin expansion and selling and administrative expense leverage. Gross margin increased 450 basis points primarily due to higher average selling prices, partially offset by higher product costs and unfavorable standard foreign currency exchange rates. Selling and administrative expense declined as a percent of revenues despite higher operating overhead costs to support our growing DTC business, as well as higher demand creation due to increased sports marketing costs.

TOTAL REVENUES	\$938	\$758	24	% 28	% \$1,824	\$1,437	27	% 29
EARNINGS BEFORE INTEREST AND TAXES	\$327	\$258	27	%	\$657	\$476	38	%

Excluding changes in currency exchange rates, Greater China revenues increased 28% and 29% for the second quarter and first six months of fiscal 2016, respectively, driven by higher revenues in nearly all key categories, most notably Sportswear, Running, NIKE Basketball and the Jordan Brand. DTC revenues increased 51% and 49% for the second quarter and first six months of fiscal 2016, respectively, driven by comparable store sales growth of 25% and 23%, respectively, strong online sales growth and the addition of new stores.

Constant currency footwear revenue growth in the second quarter and first six months of fiscal 2016 was attributable to increases in most key categories, led by Sportswear, Running, NIKE Basketball and the Jordan Brand. Unit sales of footwear for the second quarter and first six months of fiscal 2016 increased approximately 29% and 28%, respectively, while increases in average selling price per pair contributed approximately 5 and 7 percentage points, respectively, of footwear revenue growth. The increases in average selling price per pair for both the second quarter and first six months of fiscal 2016 were due primarily to increases in the proportion of revenues from our higher-priced DTC business.

The constant currency growth in apparel revenues for the second quarter and first six months of fiscal 2016 was due to growth in nearly all key categories, led by Sportswear, Running, Women's Training and the Jordan Brand. Second quarter fiscal 2016 unit sales of apparel increased approximately 26% while decreases in average selling price per unit reduced apparel revenue growth by approximately 7 percentage points. For the first six months of fiscal 2016 unit sales of apparel increased approximately 20% while average selling price per unit was flat compared to the prior year. The decrease in average selling price per unit for the second quarter of fiscal 2016 was attributable to shifts in mix to lower-priced products, in part due to a higher percentage of higher-priced outerwear in the prior year.

On a reported basis, EBIT increased 27% for the second quarter of fiscal 2016, driven by higher revenues and gross margin expansion, partially offset by higher selling and administrative expense as a percent of revenue. Gross margin expansion of 40 basis points was primarily attributable to higher average selling prices. Selling and administrative expense increased as a percent of revenues, primarily due to higher demand creation expense resulting from increased advertising, sports marketing and brand events. Operating overhead also increased to support our growing DTC business.

On a reported basis, EBIT increased 38% for the first six months of fiscal 2016, driven by higher revenues, gross margin expansion and selling and administrative expense leverage. Gross margin expanded 110 basis points due to higher average selling prices, the favorable impact of growth in our higher-margin DTC business and favorable off-price margins, which more than offset higher product costs due to shifts in mix to higher-cost products. Selling and administrative expense decreased as a percent of revenues despite higher operating overhead to support DTC and overall growth, as well as increased demand creation expense resulting from higher sports marketing costs and brand

events.

Japan

Table of Contents

Excluding changes in currency exchange rates, revenues for Japan increased 17% and 25% for the second quarter and first six months of fiscal 2016, respectively. The increases for both periods were driven by growth in most key categories, led by Sportswear. DTC revenues grew 44% and 49% for the second quarter and first six months of fiscal 2016, respectively, due to comparable store sales growth of 22% and 25%, respectively, and strong online sales growth.

On a reported basis, EBIT increased 62% and 108% for the second quarter and first six months of fiscal 2016, respectively, despite the significantly weaker Yen. EBIT growth in both periods was driven by higher reported revenues, gross margin expansion and selling and administrative expense leverage. Gross margin increased 480 and 470 basis points for the second quarter and first six months of fiscal 2016, respectively, primarily due to higher average selling prices, in part reflecting lower discounts, and the favorable impact of growth in our higher-margin DTC business, which more than offset the unfavorable impact of standard foreign currency exchange rates. For the second quarter and first six months of fiscal 2016, selling and administrative expense declined as a percent of revenues despite increased operating overhead and demand creation investments, primarily to support our growing DTC business.

Emerging Markets

		Three Months Ended November 30,				Six Months Ended November 30,				
(Dollars in millions)	2015	2014	% Change	% Change Excluding Currency Changes	2015	2014	% Change	% Change Excluding Currency Changes

On a currency-neutral basis, Emerging Markets revenues for the second quarter and first six months of fiscal 2016 increased 11% and 15%, respectively. Growth in the second quarter was attributable to higher revenues in most territories, led by SOCO (which includes Argentina, Uruguay and Chile), Mexico and Pacific (which includes Australia and New Zealand), which grew 21%, 27% and 38%, respectively. For the first six months of fiscal 2016, nearly all territories grew, most notably Mexico, SOCO and Pacific, which grew 57%, 24% and 33%, respectively. Significant revenue growth in Mexico in both periods was due to improved market conditions, as well as favorable comparisons to significantly lower sales in the second quarter and first six months of fiscal 2015. Revenues in one or our largest territories, Brazil, were down 6% for the second quarter and 3% for the first six months of fiscal 2016 due to continued macroeconomic challenges and comparisons to strong sales related to the World Cup in the first quarter of fiscal 2015. On a category basis, revenues were higher for nearly all key categories for the second quarter and first six months of fiscal 2016, led by Sportswear, Action Sports and Running. DTC revenues increased 25% in the second quarter, driven by the addition of new stores, comparable store sales growth of 11% and online sales growth. DTC revenues increased 23% for the first six months of fiscal 2016, attributable to comparable store sales growth of 11%, the addition of new stores and online sales growth.

Constant currency footwear revenue growth for the second quarter and first six months of fiscal 2016 was due to growth in nearly every key category, led by Sportswear, Action Sports and Running in both periods, with Football (Soccer) also driving year-to-date growth. Unit sales of footwear increased approximately 2% and 6%, respectively,

for the second quarter and first six months of fiscal 2016, while increases in average selling price per pair contributed approximately 10 and 11 percentage points, respectively, of footwear revenue growth. The increases in average selling price per pair for both the second quarter and first six months of fiscal 2016 were primarily due to price increases reflecting inflationary conditions in certain territories, as well as growth in our higher-priced DTC business.

The constant currency apparel revenue growth for the second quarter of fiscal 2016 was driven by growth in most key categories, led by Women's Training, Football (Soccer) and Running. For the first six months of fiscal 2016, the growth was led by Sportswear and Women's Training, partially offset by a decline in Football (Soccer). The decrease in Football (Soccer) revenues for the first six months of fiscal 2016 was primarily due to comparisons to strong sales of product related to the World Cup in the first quarter of fiscal 2015. For the second quarter and first six months of fiscal 2016, unit sales of apparel increased approximately 3% and 2%, respectively, while increases in average selling price per unit contributed approximately 7 and 8 percentage points of apparel revenue growth, respectively. The increases in average selling price per unit for both the second quarter and first six months of fiscal 2016 were primarily attributable to price increases reflecting inflationary conditions in certain territories and growth in our higher-priced DTC business.

Reported EBIT increased 2% for the second quarter of fiscal 2016, despite the negative impact of changes in foreign currency exchange rates, primarily the Brazilian Real, Argentine Peso and Mexican Peso. On a reported basis, revenues declined 8% and selling and administrative expense increased as a percent of revenues, while gross margin expanded 450 basis points. Gross margin expanded due to higher average selling prices and lower obsolescence and warehousing costs, which more than offset shifts in mix to higher-cost products. Selling and administrative expense grew due to higher operating overhead, reflecting increased investments in DTC as well as higher performance-based compensation. Demand creation expense also increased primarily due to higher sports marketing costs and advertising expenses.

Table of Contents

For the first six months of fiscal 2016, reported EBIT increased 27%, despite the negative impact of translation. On a reported basis, revenues declined 3%, while gross margin expanded and selling and administrative expense decreased as a percent of revenues. Gross margin expanded 430 basis points due to higher average selling prices, lower obsolescence and warehousing costs, and a refund of certain customs duty charges recognized in prior years, partially offset by shifts in mix to higher-cost products. Selling and administrative expense decreased as a percent of revenues despite higher operating overhead due to increased investments in DTC and higher performance-based compensation.

Global Brand Divisions

(Dollars in millions)	Three Months Ended November 30,				Six Months Ended November 30,			
	2015	2014	% Change	% Change Excluding Currency Changes	2015	2014	% Change	% Change Excluding Currency Changes
Revenues	\$18	\$27	-33	% -26	% \$44	\$56	-21	% -11
(Loss) Before Interest and Taxes	\$(625)	\$(554)	13	%	\$(1,249)	\$(1,088)	15	%

Global Brand Divisions primarily represent demand creation, operating overhead, and product creation and design expenses that are centrally managed for the NIKE Brand. Revenues for Global Brand Divisions are primarily attributable to NIKE Brand licensing businesses that are not part of a geographic operating segment.

Global Brand Divisions' loss before interest and taxes increased for the second quarter and first six months of fiscal 2016 as higher operating overhead more than offset lower demand creation expense. The increases in operating overhead for both periods were due to investments in operational infrastructure, consumer-focused digital capabilities and product creation and design initiatives. For both the second quarter and first six months of fiscal 2016, demand creation expense declined as increased digital brand marketing and higher sports marketing costs were more than offset by lower advertising and other demand creation expense.

Converse

(Dollars in millions)	Three Months Ended November 30,				Six Months Ended November 30,			
	2015	2014	% Change	% Change Excluding Currency Changes	2015	2014	% Change	% Change Excluding Currency Changes
Revenues	\$398	\$434	-8	% -5	% \$953	\$1,009	-6	% -1
Earnings Before Interest and Taxes	\$85	\$88	-3	%	\$232	\$274	-15	%

In territories we define as "direct distribution markets," Converse designs, markets and sells products directly to distributors, wholesale customers and to consumers through DTC operations. The largest direct distribution markets are the United States, the United Kingdom and China. We do not own the Converse trademarks in Japan. Territories other than direct distribution markets and Japan are serviced by third-party licensees who pay royalty revenues to Converse for the use of its registered trademarks and other intellectual property rights.

Excluding changes in currency exchange rates, revenues for Converse decreased 5% and 1% for the second quarter and first six months of fiscal 2016, respectively. Comparable direct distribution markets (i.e., markets served under a direct distribution model for comparable periods in the current and prior fiscal years), declined 1% for the second quarter of fiscal 2016, reducing total Converse revenue by approximately 1 percentage point. For the first six months of fiscal 2016, comparable direct distribution markets grew 1%, contributing approximately 1 percentage point of growth to total Converse revenues. Comparable direct distribution market unit sales decreased approximately 4% and 3% for the second quarter and first six months of fiscal 2016, respectively, while increases in average selling price per unit contributed approximately 3 and 4 percentage points of direct distribution markets revenue growth, respectively. For the second quarter and first six months of fiscal 2016, growth in the United States was more than offset by declines in certain European markets, most notably the United Kingdom. Growth in Asia Pacific also favorably impacted the second quarter. Conversion of markets from licensed to direct distribution reduced total Converse

revenue growth by approximately 1 percentage point for the second quarter of fiscal 2016 and had no impact for the year-to-date period. Revenues from comparable licensed markets decreased 25% and 19% for the second quarter and first six months of fiscal 2016, respectively, reducing total Converse revenue growth by approximately 3 and 2 percentage points, respectively. The decrease in comparable licensed markets revenues was due primarily to weaker sales from European licensees and poor macroeconomic conditions in Latin America.

Reported EBIT for Converse decreased 3% for the second quarter of fiscal 2016 due to lower reported revenues and lower gross margin, partially offset by selling and administrative expense leverage. For the first six months of fiscal 2016, reported EBIT for Converse decreased 15% due to lower reported revenues, lower gross margin and higher selling and administrative expense. Gross margin decreased 80 and 120 basis points for the second quarter and first six months of fiscal 2016, respectively, primarily due to shifts in mix to lower-margin products and territories. Selling and administrative expense was lower for the second quarter of fiscal 2016 due to lower operating overhead costs primarily resulting from a bad debt recovery in the period. For the first six months of fiscal 2016, selling and administrative expense increased due to higher operating overhead costs, primarily driven by higher intellectual property enforcement costs and investments in infrastructure to support growth.

Corporate

(Dollars in millions)	Three Months Ended November 30,			Six Months Ended November 30,		
	2015	2014	% Change	2015	2014	% Change
Revenues	\$(29)	\$(13)	—	\$(68)	\$(27)	—
(Loss) Before Interest and Taxes	\$(365)	\$(273)	34 %	\$(688)	\$(515)	34 %

Table of Contents

Corporate revenues primarily consist of foreign currency hedge gains and losses related to revenues generated by entities within the NIKE Brand geographic operating segments and Converse, but managed through our central foreign exchange risk management program.

The Corporate loss before interest and taxes consists largely of unallocated general and administrative expenses, including expenses associated with centrally managed departments; depreciation and amortization related to our corporate headquarters; unallocated insurance, benefit and compensation programs, including stock-based compensation; and certain foreign currency gains and losses.

In addition to the foreign currency gains and losses recognized in Corporate revenues, foreign currency results in Corporate include gains and losses resulting from the difference between actual foreign currency rates and standard rates used to record non-functional currency denominated product purchases within the NIKE Brand geographic operating segments and Converse; related foreign currency hedge results; conversion gains and losses arising from re-measurement of monetary assets and liabilities in non-functional currencies; and certain other foreign currency derivative instruments.

Corporate's loss before interest and taxes increased \$92 million and \$173 million for the second quarter and first six months of fiscal 2016, respectively. The increases are primarily due to the following:

- a change of \$60 million for the second quarter and \$102 million for the first six months of fiscal 2016 from net foreign currency gains to net foreign currency losses related to the difference between actual foreign currency exchange rates and standard foreign currency exchange rates assigned to the NIKE Brand geographic operating segments and Converse, net of hedge gains and losses; these losses are reported as a component of consolidated gross margin;

- an increase of \$38 million for the second quarter and \$98 million for the first six months of fiscal 2016 in corporate overhead expense driven primarily by corporate initiatives to support the growth of the business and performance-based compensation; and

- a beneficial change of \$11 million for the second quarter and \$42 million for the first six months of fiscal 2016 from net foreign currency losses to net foreign currency gains, from the re-measurement of monetary assets and liabilities denominated in non-functional currencies and the impact of certain foreign currency derivative instruments, reported as a component of consolidated Other (income) expense, net.

Foreign Currency Exposures and Hedging Practices

Overview

As a global company with significant operations outside the United States, in the normal course of business we are exposed to risk arising from changes in currency exchange rates. Our primary foreign currency exposures arise from the recording of transactions denominated in non-functional currencies and the translation of foreign currency denominated results of operations, financial position and cash flows into U.S. Dollars.

Our foreign exchange risk management program is intended to lessen both the positive and negative effects of currency fluctuations on our consolidated results of operations, financial position and cash flows. We manage global foreign exchange risk centrally on a portfolio basis to address those risks that are material to NIKE, Inc. We manage these exposures by taking advantage of natural offsets and currency correlations that exist within the portfolio and, where practical and material, by hedging a portion of the remaining exposures using derivative instruments such as forward contracts and options. As described below, the implementation of the NIKE Trading Company ("NTC") and our foreign currency adjustment program enhanced our ability to manage our foreign exchange risk by increasing the natural offsets and currency correlation benefits that exist within our portfolio of foreign exchange exposures. Our hedging policy is designed to partially or entirely offset the impact of exchange rate changes on the underlying net exposures being hedged. Where exposures are hedged, our program has the effect of delaying the impact of exchange rate movements on our Unaudited Condensed Consolidated Financial Statements; the length of the delay is dependent upon hedge horizons. We do not hold or issue derivative instruments for trading or speculative purposes.

Transactional Exposures

We conduct business in various currencies and have transactions which subject us to foreign currency risk. Our most significant transactional foreign currency exposures are:

-

Product Costs — NIKE's product costs are exposed to fluctuations in foreign currencies in the following ways:

1. Product purchases denominated in currencies other than the functional currency of the transacting entity:

Certain NIKE entities, including those supporting our North America, Greater China, Japan and European geographies, purchase product from the NTC, a wholly-owned sourcing hub that buys NIKE branded products from a. third-party factories, predominantly in U.S. Dollars. The NTC, whose functional currency is the U.S. Dollar, then sells the products to NIKE entities in their respective functional currencies. When the NTC sells to a NIKE entity with a different functional currency, the result is a foreign currency exposure for the NTC.

b. Other NIKE entities purchase product directly from third-party factories in U.S. Dollars. These purchases generate a foreign currency exposure for those NIKE entities with a functional currency other than the U.S. Dollar.

In both purchasing scenarios, a weaker U.S. Dollar reduces the inventory cost incurred by NIKE whereas a stronger U.S. Dollar increases its cost.

Table of Contents

2. Factory input costs: NIKE operates a foreign currency adjustment program with certain factories. The program is designed to more effectively manage foreign currency risk by assuming certain of the factories' foreign currency exposures, some of which are natural offsets to our existing foreign currency exposures. Under this program, our payments to these factories are adjusted for rate fluctuations in the basket of currencies ("factory currency exposure index") in which the labor, materials and overhead costs incurred by the factories in the production of NIKE branded products ("factory input costs") are denominated.

For the currency within the factory currency exposure indices that is the local or functional currency of the factory, the currency rate fluctuation affecting the product cost is recorded within Inventories and is recognized in Cost of sales when the related product is sold to a third party. All currencies within the indices, excluding the U.S. Dollar and the local or functional currency of the factory, are recognized as embedded derivative contracts and are recorded at fair value through Other (income) expense, net. Refer to Note 10 — Risk Management and Derivatives in the accompanying Notes to the Unaudited Condensed Consolidated Financial Statements for additional detail.

As an offset to the impacts of the fluctuating U.S. Dollar on our non-functional currency denominated product purchases described above, a strengthening U.S. Dollar against the foreign currencies within the factory currency exposure indices decreases NIKE's U.S. Dollar inventory cost. Conversely, a weakening U.S. Dollar against the indexed foreign currencies increases our inventory cost.

Non-Functional Currency Denominated External Sales — A portion of our Western Europe and Central & Eastern Europe geography revenues, as well as a portion of our Converse European operations revenues, are earned in currencies other than the Euro (e.g. the British Pound) but are recognized at a subsidiary that uses the Euro as its functional currency. These sales generate a foreign currency exposure.

Other Costs — Non-functional currency denominated costs, such as endorsement contracts, also generate foreign currency risk, though to a lesser extent. In certain cases, the Company has also entered into other contractual agreements, which have payments that are indexed to foreign currencies and create embedded derivative contracts that are recorded at fair value through Other (income) expense, net. Refer to Note 10 — Risk Management and Derivatives in the accompanying Notes to the Unaudited Condensed Consolidated Financial Statements for additional detail.

Non-Functional Currency Denominated Monetary Assets and Liabilities — Our global subsidiaries have various assets and liabilities, primarily receivables and payables, including intercompany receivables and payables, denominated in currencies other than their functional currencies. These balance sheet items are subject to re-measurement which may create fluctuations in Other (income) expense, net within our consolidated results of operations.

Managing Transactional Exposures

Transactional exposures are managed on a portfolio basis within our foreign currency risk management program. We manage these exposures by taking advantage of natural offsets and currency correlations that exist within the portfolio and may also elect to use currency forward and option contracts to hedge the remaining effect of exchange rate fluctuations on probable forecasted future cash flows, including certain product cost exposures, non-functional currency denominated external sales and other costs described above. Generally, these are accounted for as cash flow hedges in accordance with the accounting standards for derivatives and hedging, except for hedges of the embedded derivatives components of the product cost exposures and other contractual agreements as discussed above.

Certain currency forward contracts used to manage the foreign exchange exposure of non-functional currency denominated monetary assets and liabilities subject to re-measurement and embedded derivative contracts are not formally designated as hedging instruments under the accounting standards for derivatives and hedging. Accordingly, changes in fair value of these instruments are immediately recognized in Other (income) expense, net and are intended to offset the foreign currency impact of the re-measurement of the related non-functional currency denominated asset or liability or the embedded derivative contract being hedged.

Refer to Note 4 — Fair Value Measurements and Note 10 — Risk Management and Derivatives in the accompanying Notes to the Unaudited Condensed Consolidated Financial Statements for additional description of how the above financial instruments are valued and recorded as well as the fair value of outstanding derivatives at each reported period end.

Translational Exposures

Many of our foreign subsidiaries operate in functional currencies other than the U.S. Dollar. Fluctuations in currency exchange rates create volatility in our reported results as we are required to translate the balance sheets, operational results and cash flows of these subsidiaries into U.S. Dollars for consolidated reporting. The translation of foreign subsidiaries' non-U.S. Dollar denominated balance sheets into U.S. Dollars for consolidated reporting results in a cumulative translation adjustment to Accumulated other comprehensive income within Shareholders' equity. In the translation of our Unaudited Condensed Consolidated Statements of Income, a weaker U.S. Dollar in relation to foreign functional currencies benefits our consolidated earnings whereas a stronger U.S. Dollar reduces our consolidated earnings. The impact of foreign exchange rate fluctuations on the translation of our consolidated Revenues was a detriment of approximately \$586 million and \$173 million for the three months ended November 30, 2015 and 2014, respectively. The impact of foreign exchange rate fluctuations on the translation of our Income before income taxes was a detriment of approximately \$130 million and \$33 million for the three months ended November 30, 2015 and 2014, respectively. The impact of foreign exchange rate fluctuations on the translation of our consolidated Revenues was a detriment of approximately \$1,287 million and \$185 million for the six months ended November 30, 2015 and 2014, respectively. The impact of foreign exchange rate fluctuations on the translation of our Income before income taxes was a detriment of approximately \$303 million and \$28 million for the six months ended November 30, 2015 and 2014, respectively.

Table of Contents**Managing Translational Exposures**

To minimize the impact of translating foreign currency denominated revenues and expenses into U.S. Dollars for consolidated reporting, certain foreign subsidiaries use excess cash to purchase U.S. Dollar denominated available-for-sale investments. The variable future cash flows associated with the purchase and subsequent sale of these U.S. Dollar denominated investments at non-U.S. Dollar functional currency subsidiaries creates a foreign currency exposure that qualifies for hedge accounting under the accounting standards for derivatives and hedging. We utilize forward contracts and/or options to mitigate the variability of the forecasted future purchases and sales of these U.S. Dollar investments. The combination of the purchase and sale of the U.S. Dollar investment and the hedging instrument has the effect of partially offsetting the year-over-year foreign currency translation impact on net earnings in the period the investments are sold. Hedges of available-for-sale investments are accounted for as cash flow hedges. Refer to Note 4 — Fair Value Measurements and Note 10 — Risk Management and Derivatives in the accompanying Notes to the Unaudited Condensed Consolidated Financial Statements for additional description of how the above financial instruments are valued and recorded as well as the fair value of outstanding derivatives at period end. We estimate the combination of translation of foreign currency-denominated profits from our international businesses and the year-over-year change in foreign currency related gains and losses included in Other (income) expense, net had an unfavorable impact of approximately \$109 million and \$260 million on our Income before income taxes for the three and six month periods ended November 30, 2015, respectively.

Net Investments in Foreign Subsidiaries

We are also exposed to the impact of foreign exchange fluctuations on our investments in wholly-owned foreign subsidiaries denominated in a currency other than the U.S. Dollar, which could adversely impact the U.S. Dollar value of these investments, and therefore the value of future repatriated earnings. We have, in the past, hedged and may, in the future, hedge net investment positions in certain foreign subsidiaries to mitigate the effects of foreign exchange fluctuations on these net investments. These hedges are accounted for in accordance with the accounting standards for net investment hedges. There were no outstanding net investment hedges as of November 30, 2015 and 2014. There were no cash flows from net investment hedge settlements for the three or six month periods ended November 30, 2015 and 2014.

Liquidity and Capital Resources**Cash Flow Activity**

Cash provided by operations was \$1,036 million for the first six months of fiscal 2016 compared to \$1,547 million for the first six months of fiscal 2015. Our primary source of operating cash flow for the first six months of fiscal 2016 was Net income of \$1,964 million compared to 1,617 million for the first six months of fiscal 2015. Changes in working capital for the first six months of fiscal 2016 resulted in a cash outflow of \$1,401 million compared to an outflow of \$770 million for the first six months of fiscal 2015. The change in working capital was primarily due to a net decrease in the amount of cash collateral received from derivative counterparties during the comparative periods; during the six months ended November 30, 2015, cash collateral received from counterparties declined \$243 million, whereas cash collateral received from counterparties increased \$170 million during the six months ended November 30, 2014.

Cash used by investing activities was \$697 million for the first six months of fiscal 2016 compared to \$166 million for the first six months of fiscal 2015. The primary driver of the increased use of cash was the net change in short-term investments (including sales, maturities and purchases) from net sales/maturities to net purchases. For the first six months of fiscal 2016, there were \$91 million of net purchases compared to \$319 million in net sales/maturities for the same period of fiscal 2015.

Cash used by financing activities was \$282 million for the first six months of fiscal 2016 compared to \$1,304 million for the same period of fiscal 2015. The decrease in Cash used by financing activities was primarily due to \$981 million in net proceeds from the issuance of long-term debt in October 2015.

During the first six months of fiscal 2016, we purchased 22.1 million shares of NIKE's Class B Common Stock for \$1,240 million (an average price of \$56.08 per share) as part of our four-year, \$8 billion share repurchase program approved by our Board of Directors in September 2012. As of the end of the second quarter of fiscal 2016, we had repurchased a total of 183.9 million shares at a cost of \$7,191 million (an average price of \$39.10 per share) under this

program. In November 2015, our Board of Directors approved a new four-year, \$12 billion program to repurchase shares of NIKE's Class B Common Stock, which will commence at the completion of the current program. We continue to expect funding of share repurchases will come from operating cash flows, excess cash and/or debt. The timing and the amount of shares purchased will be dictated by our capital needs and stock market conditions.

Capital Resources

On April 23, 2013, we filed a shelf registration statement (the "Shelf") with the SEC which permits us to issue an unlimited amount of debt securities. The Shelf expires on April 23, 2016. On April 26, 2013, we issued \$1.0 billion of senior notes with tranches maturing in 2023 and 2043. The 2023 senior notes were issued in an initial aggregate principal amount of \$500 million at a 2.25% fixed, annual interest rate and will mature on May 1, 2023. The 2043 senior notes were issued in an initial aggregate principal amount of \$500 million at a 3.625% fixed, annual interest rate and will mature on May 1, 2043. Interest on the senior notes is payable semi-annually on May 1 and November 1 of each year. The issuance resulted in proceeds before expenses of \$998 million.

On October 29, 2015, we issued an additional \$1.0 billion of senior notes at a 3.875% fixed, annual interest rate that will mature on November 1, 2045. Interest on the senior notes is payable semi-annually on May 1 and November 1 of each year. The issuance resulted in proceeds before expenses of \$991 million.

On August 28, 2015, we entered into a committed credit facility agreement with a syndicate of banks, which provides for up to \$2 billion of borrowings. The facility matures August 28, 2020, with a one year extension option prior to any anniversary of the closing date, provided that in no event shall it extend beyond August 28, 2022. This facility replaces the prior \$1 billion credit facility agreement entered into on November 1, 2011, which would have matured November 1, 2017. As of, and for the six month period ended, November 30, 2015, we had no amounts outstanding under either committed credit facility.

Table of Contents

We currently have long-term debt ratings of AA- and A1 from Standard and Poor's Corporation and Moody's Investor Services, respectively. If our long-term debt rating were to decline, the facility fee and interest rate under our committed credit facility would increase. Conversely, if our long-term debt rating were to improve, the facility fee and interest rate would decrease. Changes in our long-term debt rating would not trigger acceleration of maturity of any then-outstanding borrowings or any future borrowings under the committed credit facility. Under this committed revolving credit facility, we have agreed to various covenants. These covenants include limits on our disposal of fixed assets and the amount of debt secured by liens we may incur, as well as limitations on the indebtedness we can incur relative to our net worth. In the event we were to have any borrowings outstanding under this facility and failed to meet any covenant, and were unable to obtain a waiver from a majority of the banks in the syndicate, any borrowings would become immediately due and payable. As of November 30, 2015, we were in full compliance with each of these covenants and believe it is unlikely we will fail to meet any of these covenants in the foreseeable future.

Liquidity is also provided by our \$2 billion commercial paper program, which increased \$1 billion during the second quarter of fiscal 2016. During the six months ended November 30, 2015, we did not issue commercial paper, and as of November 30, 2015, there were no outstanding borrowings under this program. We may issue commercial paper or other debt securities during fiscal 2016 depending on general corporate needs. We currently have short-term debt ratings of A1+ and P1 from Standard and Poor's Corporation and Moody's Investor Services, respectively.

As of November 30, 2015, we had cash, cash equivalents and short-term investments totaling \$6.1 billion, of which \$4.6 billion was held by our foreign subsidiaries. Included in Cash and equivalents as of November 30, 2015 was \$725 million of cash collateral received from counterparties as a result of hedging activity. Cash equivalents and short-term investments consist primarily of deposits held at major banks, money market funds, commercial paper, corporate notes, U.S. Treasury obligations, U.S. government sponsored enterprise obligations and other investment grade fixed-income securities. Our fixed-income investments are exposed to both credit and interest rate risk. All of our investments are investment grade to minimize our credit risk. While individual securities have varying durations, as of November 30, 2015, the average duration of our cash equivalents and short-term investments portfolio was 89 days.

To date we have not experienced difficulty accessing the credit markets or incurred higher interest costs. Future volatility in the capital markets, however, may increase costs associated with issuing commercial paper or other debt instruments or affect our ability to access those markets. We believe that existing cash, cash equivalents, short-term investments and cash generated by operations, together with access to external sources of funds as described above, will be sufficient to meet our domestic and foreign capital needs in the foreseeable future.

We utilize a variety of tax planning and financing strategies to manage our worldwide cash and deploy funds to locations where they are needed. We routinely repatriate a portion of our foreign earnings for which U.S. taxes have previously been provided. We also indefinitely reinvest a significant portion of our foreign earnings, and our current plans do not demonstrate a need to repatriate these earnings. Should we require additional capital in the United States, we may elect to repatriate indefinitely reinvested foreign funds or raise capital in the United States through debt. If we were to repatriate indefinitely reinvested foreign funds, we would be required to accrue and pay additional U.S. taxes less applicable foreign tax credits. If we elect to raise capital in the United States through debt, we would incur additional interest expense.

Contractual Obligations

As a result of renewals of, and additions to, outstanding endorsement contracts, cash payments due under these contracts have increased significantly from what was reported in our Annual Report on Form 10-K for the fiscal year ended May 31, 2015.

Obligations under endorsement contracts as of November 30, 2015, including significant contracts entered into through the date of this report, are as follows:

Description of Commitment	Cash Payments Due During the Year Ending May 31,						
	Remainder of 2016	2017	2018	2019	2020	Thereafter	Total
(In millions)							
Endorsement Contracts ⁽¹⁾	\$ 505	\$1,017	\$951	\$753	\$595	\$3,198	\$7,019

(1) The amounts listed for endorsement contracts represent approximate amounts of base compensation and minimum guaranteed royalty fees we are obligated to pay athlete, sport team and league endorsers of our products. Actual payments under some contracts may be higher than the amounts listed as these contracts provide for bonuses to be paid to the endorsers based upon athletic achievements and/or royalties on product sales in future periods. Actual payments under some contracts may also be lower as these contracts include provisions for reduced payments if athletic performance declines in future periods.

In addition to the cash payments, we are obligated to furnish our endorsers with NIKE product for their use. It is not possible to determine how much we will spend on this product on an annual basis as the contracts generally do not stipulate a specific amount of cash to be spent on the product. The amount of product provided to the endorsers will depend on many factors, including general playing conditions, the number of sporting events in which they participate and our own decisions regarding product and marketing initiatives. In addition, the costs to design, develop, source and purchase the products furnished to the endorsers are incurred over a period of time and are not necessarily tracked separately from similar costs incurred for products sold to customers.

Other than the changes reported above, there have been no significant changes to the contractual obligations reported in our Annual Report on Form 10-K for the fiscal year ended May 31, 2015.

Off-Balance Sheet Arrangements

As of November 30, 2015, we did not have any off-balance sheet arrangements that have, or are reasonably likely to have, a current or future effect on our financial condition, results of operations, liquidity, capital expenditures or capital resources.

Table of Contents

Recently Issued Accounting Standards

In May 2014, the Financial Accounting Standards Board ("FASB") issued an accounting standards update that replaces existing revenue recognition guidance. The updated guidance requires companies to recognize revenue in a way that depicts the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. In addition, the new standard requires that reporting companies disclose the nature, amount, timing and uncertainty of revenue and cash flows arising from contracts with customers. Based on the FASB's decision in July 2015 to defer the effective date and to allow more flexibility with implementation, we anticipate the new standard will be effective for us beginning June 1, 2018. The new standard is required to be applied retrospectively to each prior reporting period presented or retrospectively with the cumulative effect of initially applying it recognized at the date of initial application. We have not yet selected a transition method and are currently evaluating the effect the guidance will have on the Consolidated Financial Statements.

In November 2015, the FASB issued ASU No. 2015-17, Income Taxes (Topic 740): Balance Sheet Classification of Deferred Taxes to simplify the presentation of deferred taxes in the statement of financial position. The updated guidance requires that deferred tax assets and liabilities be classified as noncurrent in a classified balance sheet. The update to the standard is effective for us beginning June 1, 2017 with early application permitted as of the beginning of any interim or annual reporting period. This guidance may be applied either prospectively to all deferred tax assets and liabilities or retrospectively to all periods presented. We have not yet determined whether to early adopt the updated guidance, or selected a transition method, and are currently evaluating the effect the guidance will have on the Consolidated Financial Statements.

In January 2016, the FASB issued ASU No. 2016-01, Financial Instruments - Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities. The updated guidance enhances the reporting model for financial instruments, which includes amendments to address aspects of recognition, measurement, presentation, and disclosure. The update to the standard is effective for us beginning June 1, 2018. We are currently evaluating the effect the guidance will have on the Consolidated Financial Statements.

Critical Accounting Policies

Our discussion and analysis of our financial condition and results of operations are based upon our Unaudited Condensed Consolidated Financial Statements, which have been prepared in accordance with U.S. GAAP. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses and related disclosure of contingent assets and liabilities.

We believe that the estimates, assumptions and judgments involved in the accounting policies described in the "Management's Discussion and Analysis of Financial Condition and Results of Operations" section of our most recent Annual Report on Form 10-K have the greatest potential impact on our financial statements, so we consider these to be our critical accounting policies. Actual results could differ from the estimates we use in applying our critical accounting policies. We are not currently aware of any reasonably likely events or circumstances that would result in materially different amounts being reported.

Table of Contents

ITEM 3. Quantitative and Qualitative Disclosures about Market Risk

Other than the items noted below, there have been no material changes from the information previously reported under Part II, Item 7A of our Annual Report on Form 10-K for the fiscal year ended May 31, 2015.

Changes regarding interest rate risk from the information previously reported under Part II, Item 7A of our Annual Report on Form 10-K for the fiscal year ended May 31, 2015 are as follows:

(Dollars in millions)	Expected Maturity Date Year Ending May 31,										Fair Value
	Remainder of 2016	2017	2018	2019	2020	Thereafter	Total				
Interest Rate Risk											
Long-term U.S. Dollar debt — Fixed rate											
Principal payments	\$—	\$38	\$18	\$—	\$—	\$2,000	\$2,057	\$1,992			
Average interest rate	6.4	% 6.2	% 6.8	% 0.0	% 0.0	% 3.4	% 3.5	%			
Anticipated long-term U.S. Dollar debt issuance — Floating rate swapped to fixed rate											
Notional ⁽¹⁾	\$—	\$500	\$—	\$—	\$—	\$—	\$500	\$5			
Weighted-average fixed rate	0.0	% 2.4	% 0.0	% 0.0	% 0.0	% 0.0	%				
Weighted-average floating rate	0.0	% 0.4	% 0.0	% 0.0	% 0.0	% 0.0	%				

(1) Forward-starting interest rate swaps have been included in the maturities category based on when the related forecasted debt issuance and corresponding swap terminations are expected to occur.

ITEM 4. Controls and Procedures

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our Securities Exchange Act of 1934, as amended (“the Exchange Act”) reports is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission’s rules and forms and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow for timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management is required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

We carry out a variety of ongoing procedures under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, to evaluate the effectiveness of the design and operation of our disclosure controls and procedures. Based on the foregoing, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective at the reasonable assurance level as of November 30, 2015.

We have commenced several transformation initiatives to centralize and simplify our business processes and systems. These are long-term initiatives, which we believe will enhance our internal control over financial reporting due to increased automation and further integration of related processes. We will continue to monitor our internal control over financial reporting for effectiveness throughout the transformation.

There have not been any other changes in our internal control over financial reporting during our most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Special Note Regarding Forward-Looking Statements and Analyst Reports

Certain written and oral statements, other than purely historical information, including estimates, projections, statements relating to NIKE's business plans, objectives and expected operating results and the assumptions upon which those statements are based, made or incorporated by reference from time to time by NIKE or its representatives in this report, other reports, filings with the Securities and Exchange Commission, press releases, conferences or otherwise, are "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995 and Section 21E of the Securities Exchange Act of 1934, as amended. Forward-looking statements include, without limitation, any statement that may predict, forecast, indicate, or imply future results, performance or achievements, and may contain the words "believe," "anticipate," "expect," "estimate," "project," "will be," "will continue," "will likely result," or words or phrases of similar meaning. Forward-looking statements involve risks and uncertainties which may cause actual results to differ materially from the forward-looking statements. The risks and uncertainties are detailed from time to time in reports filed by NIKE with the Securities and Exchange Commission, including reports filed on Forms 8-K, 10-Q and 10-K, and include, among others, the following: international, national and local general economic and market conditions; the size and growth of the overall athletic footwear, apparel and equipment markets; intense competition among designers, marketers, distributors and sellers of athletic footwear, apparel and equipment for consumers and endorsers; demographic changes; changes in consumer preferences; popularity of particular designs, categories of products and sports; seasonal and geographic demand for NIKE products; difficulties in anticipating or forecasting changes in consumer preferences, consumer demand for NIKE products and the various market factors described above; difficulties in implementing, operating and maintaining NIKE's increasingly complex information systems and controls, including, without limitation, the systems related to demand and supply planning and inventory control; interruptions in data and information technology systems; consumer data security; fluctuations and difficulty in forecasting operating results, including, without limitation, the fact that advance futures orders may not be indicative of future revenues due to changes in shipment timing, the changing mix of futures and at-once orders and discounts, order cancellations and returns; the ability of NIKE to sustain, manage or forecast its growth and inventories; the size, timing and mix of purchases of NIKE's products; increases in the cost of materials, labor and energy used to manufacture products, new product development and introduction; the ability to secure and protect trademarks, patents and other intellectual property; product performance and quality; customer service; adverse publicity; the loss of significant customers or suppliers; dependence on distributors and licensees; business disruptions; increased costs of freight and transportation to meet delivery deadlines; increases in borrowing costs due to any decline in NIKE's debt ratings; changes in business strategy or development plans; general risks associated with doing business outside the United States, including, without limitation, exchange rate fluctuations, import duties, tariffs, quotas, political and economic instability and terrorism; changes in government regulations; the impact of, including business and legal developments relating to, climate change; natural disasters; liability and other claims asserted against NIKE; the ability to attract and retain qualified personnel; the effects of our decision to invest in or divest of businesses; and other factors referenced or incorporated by reference in this report and other reports. The risks included here are not exhaustive. Other sections of this report may include additional factors which could adversely affect NIKE's business and financial performance. Moreover, NIKE operates in a very competitive and rapidly changing environment. New risks emerge from time to time and it is not possible for management to predict all such risks, nor can it assess the impact of all such risks on NIKE's business or the extent to which any risk, or combination of risks, may cause actual results to differ materially from those contained in any forward-looking statements. Given these risks and uncertainties, investors should not place undue reliance on forward-looking statements as a prediction of actual results. Investors should also be aware that while NIKE does, from time to time, communicate with securities analysts, it is against NIKE's policy to disclose to them any material non-public information or other confidential commercial information. Accordingly, shareholders should not assume that NIKE agrees with any statement or report issued by any analyst irrespective of the content of the statement or report. Furthermore, NIKE has a policy against issuing or confirming financial forecasts or projections issued by others. Thus, to the extent that reports issued by securities analysts contain any projections, forecasts or opinions, such reports are not the responsibility of NIKE.

PART II - OTHER INFORMATION

ITEM 1. Legal Proceedings

There have been no material developments with respect to the information previously reported under Part I, Item 3 of our Annual Report on Form 10-K for the fiscal year ended May 31, 2015.

ITEM 1A. Risk Factors

There have been no material changes in our risk factors from those disclosed in Part I, Item 1A of our Annual Report on Form 10-K for the fiscal year ended May 31, 2015.

ITEM 2. Unregistered Sales of Equity Securities and Use of Proceeds

The following table presents a summary of share repurchases made by NIKE during the quarter ended November 30, 2015 under the four-year, \$8 billion share repurchase program approved by our Board of Directors in September 2012. As of the end of the second quarter of fiscal 2016, we had repurchased 183.9 million shares at an average price of \$39.10 for a total approximate cost of \$7.2 billion under this program.

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs ⁽¹⁾	Maximum Number (or Approximate Dollar Value) of Shares that May Yet Be Purchased Under the Plans or Programs (In millions)
September 1 — September 30, 2015	6,768,764	\$56.05	6,768,764	\$1,082
October 1 — October 31, 2015	1,739,392	\$61.71	1,739,392	\$975
November 1 — November 30, 2015	2,666,600	\$62.01	2,666,600	\$809
	11,174,756	\$58.35	11,174,756	

On September 19, 2012, we announced that our Board of Directors authorized the repurchase of \$8 billion of our (1) shares of Class B Common Stock under a four-year share repurchase program. We intend to use excess cash, future cash from operations and/or proceeds from debt to fund repurchases under the share repurchase program.
