UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, DC 20549

FORM 10-K

ANNUAL REPORT UNDER SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
 TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE
 ACT OF 1934

For Fiscal Year Ended June 2, 2012

Commission File No. 001-15141

Herman Miller, Inc.

(Exact name of registrant as specified in its charter)

Michigan

38-0837640

(State or other jurisdiction of
incorporation or organization)

(I.R.S. Employer Identification No.)

855 East Main Avenue

PO Box 302

Zeeland, Michigan

49464-0302

(Address of principal
executive offices)

(Zip Code)

Registrant's telephone number, including area code: (616) 654 3000

Securities registered pursuant to Section 12(b) of the Act: None

Securities registered pursuant to Section 12(g) of the Act:

Common Stock, \$.20 Par Value
(Title of Class)

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act.

Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 229.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See definition of "accelerated filer," "large accelerated filer," and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

The aggregate market value of the voting stock held by “nonaffiliates” of the registrant (for this purpose only, the affiliates of the registrant have been assumed to be the executive officers and directors of the registrant and their associates) as of December 3, 2011, was \$1,218,876,940 (based on \$21.20 per share which was the closing sale price as reported by NASDAQ).

The number of shares outstanding of the registrant's common stock, as of July 26, 2012: Common stock, \$.20 par value - 58,415,480 shares outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Certain portions of the Registrant's Proxy Statement for the Annual Meeting of Stockholders to be held on October 8, 2012, are incorporated into Part III of this report.

PART I

Item 1 BUSINESS

General Development of Business

The company researches, designs, manufactures, and distributes interior furnishings, for use in various environments including office, healthcare, educational, and residential settings, and provides related services that support organizations and individuals all over the world. The company's products are sold primarily to or through independent contract office furniture dealers. Through research, the company seeks to define and clarify customer needs and problems existing in its markets and to design, through innovation where appropriate and feasible, products, systems, and services as solutions to such problems. Ultimately, the company seeks to enhance the performance of human habitats worldwide, making its customers' lives more productive, rewarding, delightful, and meaningful.

Herman Miller, Inc. was incorporated in Michigan in 1905. One of the company's major plants and its corporate offices are located at 855 East Main Avenue, PO Box 302, Zeeland, Michigan, 49464-0302, and its telephone number is (616) 654-3000. Unless otherwise noted or indicated by the context, the term "company" includes Herman Miller, Inc., its predecessors, and majority-owned subsidiaries. Further information relating to principles of consolidation is provided in Note 1 to the Consolidated Financial Statements included in Item 8 of this report.

Financial Information about Segments

Information relating to segments is provided in Note 14 to the Consolidated Financial Statements included in Item 8 of this report.

Narrative Description of Business

The company's principal business consists of the research, design, manufacture, and distribution of office furniture systems, seating, products, and related services. Most of these systems and products are designed to be used together.

The company works for a better world around our customers by designing furnishings and related services that improve the human experience wherever people work, heal, learn and live. The company's ingenuity and design excellence creates award-winning products and services, that makes us a leader in design and development of furniture and furniture systems. This leadership is exemplified by the innovative concepts introduced by the company in its modular systems (including Action Office®, Canvas Office Landscape™, Ethospace®, Resolve®, and My Studio Environments™). The company also offers a broad array of seating (including Embody®, Aeron®, Mirra®, Setu®, Sayl®, Celle®, Equa®, and Ergon® office chairs), storage (including Meridian® and Tu™ products), wooden casegoods (including Geiger® products), freestanding furniture products (including Abak®, Intent®, Sense™ and Envelop®) and the recently introduced Thrive portfolio of ergonomic solutions.

The company's products are marketed worldwide by its own sales staff, independent dealers and retailers, its owned dealer network, and via our e-commerce website. Salespersons work with dealers, the architecture and design community, and directly with end-users. Independent dealerships concentrate on the sale of Herman Miller products and some complementary product lines of other manufacturers. It is estimated that approximately 78 percent of the company's sales in the fiscal year ended June 2, 2012, were made to or through independent dealers. The remaining sales were made directly to end-users, including federal, state, and local governments, and several major corporations, by the company's own sales staff, its owned dealer network, or independent retailers.

The company is a recognized leader within its industry for the use, development, and integration of customer-centered technologies that enhance the reliability, speed, and efficiency of our customers' operations. This includes proprietary sales tools, interior design and product specification software; order entry and manufacturing scheduling and

production systems; and direct connectivity to the company's suppliers.

The company's furniture systems, seating, freestanding furniture, storage and casegood products, and related services are used in (1) office/institution environments including offices and related conference, lobby, and lounge areas, and general public areas including transportation terminals; (2) health/science environments including hospitals, clinics, and other healthcare facilities; (3) industrial and educational settings; and (4) residential and other environments.

Raw Materials

The company's manufacturing materials are available from a significant number of sources within the United States, Canada, Europe, and Asia. To date, the company has not experienced any difficulties in obtaining its raw materials. The costs of certain direct materials used in the company's manufacturing and assembly operations are sensitive to shifts in commodity market prices. In particular, the costs of steel components, plastics, and particleboard are sensitive to the market prices of commodities such as raw steel, aluminum, crude oil, lumber, and resins. Increases in the market prices for these commodities can have an adverse impact on the company's profitability. Further information regarding the impact of direct material costs on the company's financial results is provided in Management's Discussion and Analysis in Item 7 of this report.

-3-

Patents, Trademarks, Licenses, Etc.

The company has 108 active United States utility patents on various components used in its products and 49 active United States design patents. Many of the inventions covered by the United States patents also have been patented in a number of foreign countries. Various trademarks, including the name and stylized “Herman Miller” and the “Herman Miller Circled Symbolic M” trademark are registered in the United States and many foreign countries. The company does not believe that any material part of its business depends on the continued availability of any one or all of its patents or trademarks, or that its business would be materially adversely affected by the loss of any thereof, except for Herman Miller®, Herman Miller Circled Symbolic M®, Geiger®, Nemschoff®, Action Office®, Ethospace®, Aeron®, Mirra®, Eames®, PostureFit®, and Canvas Office Landscape™. It is estimated that the average remaining life of such patents and trademarks is approximately 5 years and 8 years, respectively.

Working Capital Practices

Information concerning the company's inventory levels relative to its sales volume can be found under the Executive Overview section in Item 7 of this report. Beyond this discussion, the company does not believe that it or the industry in general, has any special practices or special conditions affecting working capital items that are significant for understanding the company's business.

Customer Base

It is estimated that no single dealer accounted for more than 4 percent of the company's net sales in the fiscal year ended June 2, 2012. It is also estimated that the largest single end-user customer, the U.S. federal government, accounted for \$164 million, \$226 million and \$180 million of the company's net sales in fiscal 2012, 2011, and 2010, respectively. This represents approximately 9.5 percent, 14 percent and 14 percent of the company's net sales in fiscal 2012, 2011, and 2010, respectively. The 10 largest customers accounted for approximately 22 percent, 28 percent, and 27 percent of net sales in fiscal 2012, 2011, and 2010, respectively.

Backlog of Unfilled Orders

As of June 2, 2012, the company's backlog of unfilled orders was \$278.0 million. At May 28, 2011, the company's backlog totaled \$275.8 million. It is expected that substantially all the orders forming the backlog at June 2, 2012, will be filled during the next fiscal year. Many orders received by the company are reflected in the backlog for only a short period while other orders specify delayed shipments and are carried in the backlog for up to one year. Accordingly, the amount of the backlog at any particular time does not necessarily indicate the level of net sales for a particular succeeding period.

Government Contracts

Other than standard provisions contained in contracts with the United States Government, the company does not believe that any significant portion of its business is subject to material renegotiation of profits or termination of contracts or subcontracts at the election of various government entities. The company sells to the U.S. Government both through a GSA Multiple Award Schedule Contract and through competitive bids. The GSA Multiple Award Schedule Contract pricing is principally based upon the company's commercial price list in effect when the contract is initiated, rather than being determined on a cost-plus-basis. The company is required to receive GSA approval to apply list price increases during the term of the Multiple Award Schedule Contract period.

Competition

All aspects of the company's business are highly competitive. The company competes largely on design, product and service quality, speed of delivery, and product pricing. Although the company is one of the largest office furniture manufacturers in the world, it competes with manufacturers that have significant resources and sales as well as many smaller companies. In the United States, the company's most significant competitors are Haworth, HNI Corporation, Kimball International, Knoll, and Steelcase.

Research, Design and Development

The company draws great competitive strength from its research, design and development programs. Accordingly, the company believes that its research and design activities are of significant importance. Through research, the company seeks to define and clarify customers and the problems which they are trying to solve. The company designs innovative products and services that address customer needs and solve their problems. The company uses both internal and independent research and design resources. Exclusive of royalty payments, the company spent approximately \$41.0 million, \$35.4 million, and \$33.2 million, on research and development activities in fiscal 2012, 2011, and 2010, respectively. Generally, royalties are paid to designers of the company's products as the products are sold and are not included in research and development costs since they are variable based on product sales.

Environmental Matters

Living with integrity and respecting the environment stands as one of the company's core values. This is based in part, on the belief that environmental sustainability and commercial success are not exclusive ends, but instead exist side by side in a mutually beneficial relationship. The company continues to rigorously reduce, recycle, and reuse solid waste generated by its manufacturing processes and the company's efforts and accomplishments have been widely recognized. Herman Miller continues to power 100% of our global electrical energy demand using green energy. We continue to explore and make progress in achieving our goal of zero impact on the environment by the year 2020.

Based on current facts known to management, the company does not believe that existing environmental laws and regulations have had or will have any material effect upon the capital expenditures, earnings, or competitive position of the company. However, there can be no assurance environmental legislation and technology in this area will not result in or require material capital expenditures or additional costs to our manufacturing process.

Human Resources

The company considers its employees to be another of its major competitive strengths. The company stresses individual employee participation and incentives, believing that this emphasis has helped attract and retain a competent and motivated workforce. The company's human resources group provides employee recruitment, education and development, and compensation planning and counseling. There have been no work stoppages or labor disputes in the company's history, and its relations with its employees are considered good. Approximately 8% percent of the company's employees are covered by collective bargaining agreements, most of whom are employees of its Nemschoff and Herman Miller Limited (U.K.) subsidiaries.

As of June 2, 2012, the company employed 5,482 full-time and 170 part-time employees, representing a 2.4 percent and a 10.1 percent decrease, respectively, compared with May 28, 2011. In addition to its employee work force, the company uses temporary purchased labor to meet uneven demand in its manufacturing operations.

Information about International Operations

The company's sales in international markets are made primarily to office/institutional customers. Foreign sales consist mostly of office furniture products such as Ethospace®, Abak®, Aeron®, Mirra®, Celle®, Sayl® and other seating and storage products. The company conducts business in the following major international markets: Europe, Canada, the Middle East, Latin America, South America and the Asia/Pacific region. In certain foreign markets, the company's products are offered through licensing of foreign manufacturers on a royalty basis.

The company's products currently sold in international markets are manufactured by wholly owned subsidiaries in the United States, the United Kingdom, and China. Sales are made through wholly owned subsidiaries or branches in Canada, France, Germany, Italy, Japan, Mexico, Australia, Singapore, China, India, and the Netherlands. The company's products are offered in the Middle East, South America, and Asia through dealers.

In several other countries, the company licenses manufacturing and selling rights. Historically, these licensing arrangements have not required a significant investment of funds or personnel by the company, and in the aggregate, have not produced material net earnings for the company.

Additional information with respect to operations by geographic area appears in Note 14 of the Consolidated Financial Statements included in Item 8 of this report. Fluctuating exchange rates and factors beyond the control of the company, such as tariff and foreign economic policies, may affect future results of international operations. Refer to Item 7A, Quantitative and Qualitative Disclosures about Market Risk, for further discussion regarding the company's foreign exchange risk.

Available Information

The company's annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and all amendments to those reports are made available free of charge through the "Investors" section of the company's internet website at www.hermanmiller.com, as soon as practicable after such material is electronically filed with or furnished to the Securities and Exchange Commission (SEC). The company's filings with the SEC are also available for the public to read and copy in person at the SEC's Public Reference Room at 100 F Street NE, Washington, DC 20549, by phone at 1-800-SEC-0330, or via their internet website at www.sec.gov.

Item 1A RISK FACTORS

The following risk factors and other information included in this Annual Report on Form 10-K should be carefully considered. The risks and uncertainties described below are not the only ones we face; others, either unforeseen or currently deemed less significant, may also have a negative impact on our company. If any of the following actually occurs, our business, operating results, cash flows, and financial condition could be materially adversely affected.

Our funding obligations and pension expenses are affected by factors outside our control, including the performance of plan assets, interest rates, actuarial data and experience and changes in laws and regulations.

The future funding obligations for the company's U.S. defined benefit pension plans depend upon the future performance of assets set aside in trusts for these plans, the level of interest rates used to determine funding levels, actuarial data and experience and any changes in government laws and regulations. The company has taken steps to mitigate the risk related to the company's pension defined benefit pension plans by announcing its intent to change its employee retirement programs from a defined benefit-based model to a defined contribution structure. The company approved a plan to freeze future benefit accruals of its primary domestic defined benefit plan as of September 1, 2012. At this time, the company will begin to transition employees to a new defined contribution program and subsequently terminate its domestic defined benefit plans. The termination process is expected to take 12 to 24 months from the time that the benefit accruals are frozen. In addition, the company made pension contributions of \$64.9 million to the company's pension and post-retirement plans. Due to the additional contributions and improved funded status the company changed the mix of the investments within the plan however, the company's employee benefit plans still hold a significant amount of equity securities. If the market values of these securities decline significantly, our future pension expenses and funding obligations could increase significantly. Decreases in interest rates that are not offset by contributions and asset returns could also increase the company's obligations under such plans. The company may be legally required to make contributions to its U.S. pension plans in the future, and those contributions could be material. In addition, if local legal authorities increase the minimum funding requirements for the company's defined benefit pension plan outside the United States, the company could be required to contribute more funds, which would negatively affect operating cash flows.

Sustained downturn in the economy could adversely impact our access to capital.

The disruption experienced in the global economic and financial markets has adversely impacted the broader financial and credit markets, at times reducing the availability of debt and equity capital for the market as a whole. Conditions such as these could re-emerge in the future. Accordingly, our ability to access the capital markets could be restricted at a time when we would like, or need, to access those markets, which could have an impact on our flexibility to react to changing economic and business conditions. The resulting lack of available credit, increased volatility in the financial markets and reduced business activity could materially and adversely affect our business, financial condition, results of operations, our ability to take advantage of market opportunities and our ability to obtain and manage our liquidity. In addition, the cost of debt financing and the proceeds of equity financing may be materially and adversely impacted by these market conditions. The extent of any impact would depend on several factors, including our operating cash flows, the duration of tight credit conditions and volatile equity markets, our credit capacity, the cost of financing, and other general economic and business conditions. Our credit agreements contain performance covenants, such as a limit on the ratio of debt to earnings before interest, taxes, depreciation and amortization, and limits on subsidiary debt and incurrence of liens. Although we believe none of these covenants are presently restrictive to our operations, our ability to meet the financial covenants can be affected by events beyond our control.

We may not be successful in implementing and managing our growth strategy.

We have established a set of key strategic goals for our business. Included among these are specific targets for growth in net sales and operating profit as a percentage of net sales. Our strategic plan assumes growth targets will be achieved by pursuing and winning new business in the following areas:

-

Primary Markets — Capturing additional market share within our primary markets by offering superior solutions to customers who value space as a strategic tool.

Adjacent Markets — Further applying our core skills in space environments such as small business, higher education and residential.

Developing Economies — Expanding our geographic reach in areas of the world with significant growth potential.

New Markets — Developing new products and technologies that serve wholly new markets.

While we have confidence that our strategic plan reflects opportunities that are appropriate and achievable and that we have anticipated and will manage the associated risks, there is the possibility that the strategy may not deliver the projected results due to inadequate execution, incorrect assumptions, sub-optimal resource allocation, or changing customer requirements.

There is no assurance that our current product and service offering will allow us to meet these goals. Accordingly, we believe we will be required to continually invest in the research, design, and development of new products and services. There is no assurance that such investments will have commercially successful results.

Certain growth opportunities may require us to invest in acquisitions, alliances, and the startup of new business ventures. These investments may not perform according to plan.

Future efforts to expand our business within developing economies, particularly within China and India, may expose us to the effects of political and economic instability. Such instability may impact our ability to compete for business. It may also put the availability and/or value of our capital investments within these regions at risk. These expansion efforts expose us to operating environments with complex, changing, and in some cases, inconsistently applied legal and regulatory requirements. Developing knowledge and understanding of these requirements poses a significant challenge, and failure to remain compliant with them could limit our ability to continue doing business in these locations.

Pursuing our growth plan in new and adjacent markets, as well as within developing economies, will require us to find effective new channels of distribution. There is no assurance that we can develop or otherwise identify these channels of distribution.

The markets in which we operate are highly competitive, and we may not be successful in winning new business. We are one of several companies competing for new business within the furniture industry. Many of our competitors offer similar categories of products, including office seating, systems and freestanding office furniture, casegoods, storage, and residential and healthcare furniture solutions. We believe that our innovative product design, functionality, quality, depth of knowledge, and strong network of distribution partners differentiates us in the marketplace. However, increased market pricing pressure could make it difficult for us to win new business with certain customers and within certain market segments at acceptable profit margins.

Adverse economic and industry conditions could have a negative impact on our business, results of operations, and financial condition.

Customer demand within the contract office furniture industry is affected by various macro-economic factors; general corporate profitability, white-collar employment levels, new office construction rates, and existing office vacancy rates are among the most influential factors. History has shown that declines in these measures can have an adverse effect on overall office furniture demand. Additionally, factors and changes specific to our industry, such as developments in technology, governmental standards and regulations, and health and safety issues can influence demand. There are current and future economic and industry conditions, which could adversely affect our business, operating results, or financial condition.

Our business presence outside the United States exposes us to certain risks that could negatively affect our results of operations and financial condition.

We have significant manufacturing and sales operations in the United Kingdom, which represents our largest marketplace outside the United States. We also have manufacturing operations in China. Additionally, our products are sold internationally through wholly-owned subsidiaries or branches in various countries including Canada, Mexico, Brazil, France, Germany, Italy, Netherlands, Japan, Australia, Singapore, China, Hong Kong, and India. In certain other regions of the world, our products are offered primarily through independent dealerships.

Doing business internationally exposes us to certain risks, many of which are beyond our control and could potentially impact our ability to design, develop, manufacture, or sell products in certain countries. These factors could include, but would not necessarily be limited to:

- Political, social, and economic conditions
- Legal and regulatory requirements
- Labor and employment practices
- Cultural practices and norms
- Natural disasters
- Security and health concerns
- Protection of intellectual property

In some countries, the currencies in which we import and export products can differ. Fluctuations in the rate of exchange between these currencies could negatively impact our business. Additionally, tariff and import regulations, international tax policies and rates, and changes in U.S. and international monetary policies may have an adverse impact on results of operations and financial condition.

Disruptions in the supply of raw and component materials could adversely affect our manufacturing and assembly operations.

We rely on outside suppliers to provide on-time shipments of the various raw materials and component parts used in our manufacturing and assembly processes. The timeliness of these deliveries is critical to our ability to meet customer demand. Any disruptions in this flow of delivery could have a negative impact on our business, results of operations, and financial condition.

Increases in the market prices of manufacturing materials may negatively affect our profitability.

The costs of certain manufacturing materials used in our operations are sensitive to shifts in commodity market prices. In particular, the costs of steel, plastic and aluminum components and particleboard are sensitive to the market prices of commodities such as raw steel, aluminum, crude oil, lumber, and resins. Increases in the market prices of these commodities may have an adverse impact on our profitability if we are unable to offset them with strategic sourcing, continuous improvement initiatives or increased prices to our customers.

Disruptions within our dealer network could adversely affect our business.

Our ability to manage existing relationships within our network of independent dealers is crucial to our ongoing success. Although the loss of any single dealer would not have a material adverse effect on the overall business, our business within a given market could be negatively affected by disruptions in our dealer network caused by the termination of commercial working relationships, ownership transitions, or dealer financial difficulties.

If dealers go out of business or restructure, we may suffer losses because they may not be able to pay for products already delivered to them. Also, dealers may experience financial difficulties, creating the need for outside financial support, which may not be easily obtained. In the past, we have, on occasion, agreed to provide direct financial assistance through term loans, lines of credit, and/or loan guarantees to certain dealers.

Increasing competition for highly skilled and talented workers could adversely affect our business.

The successful implementation of our business strategy depends, in part, on our ability to attract and retain a skilled workforce. The increasing competition for highly skilled and talented employees could result in higher compensation costs, difficulties in maintaining a capable workforce, and leadership succession planning challenges.

Costs related to product defects could adversely affect our profitability.

We incur various expenses related to product defects, including product warranty costs, product recall and retrofit costs, and product liability costs. These expenses relative to product sales vary and could increase. We maintain reserves for product defect-related costs based on estimates and our knowledge of circumstances that indicate the need for such reserves. We cannot, however, be certain that these reserves will be adequate to cover actual product defect-related claims in the future. Any significant increase in the rate of our product defect expenses could have a material adverse effect on operations.

We are subject to risks associated with self-insurance related to health benefits.

We are self-insured for our health benefits and maintain per employee stop loss coverage however we retain the insurable risk at an aggregate level, therefore unforeseen or catastrophic losses in excess of our insured limits could have a material adverse effect on the company's financial condition and operating results. See Note 1 of the Consolidated Financial Statements for information regarding the company's retention level.

Government and other regulations could adversely affect our business.

Government and other regulations apply to many of our products. Failure to comply with these regulations or failure to obtain approval of products from certifying agencies could adversely affect the sales of these products and have a material negative impact on operating results.

Item 1B UNRESOLVED STAFF COMMENTS — none

Item 2 PROPERTIES

The company owns or leases facilities located throughout the United States and several foreign countries. The location, square footage, and use of the most significant facilities at June 2, 2012 were as follows:

Owned Locations	Square Footage	Use
Holland, Michigan	917,400	Manufacturing, Distribution, Warehouse, Design, Office
Spring Lake, Michigan	582,700	Manufacturing, Warehouse, Office
Zeeland, Michigan	750,800	Manufacturing, Warehouse, Office
Sheboygan, Wisconsin	207,700	Manufacturing, Warehouse, Office
Hildebran, North Carolina	93,000	Manufacturing, Office
England, U.K.	85,000	Manufacturing, Office

Leased Locations

Atlanta, Georgia	176,700	Manufacturing, Warehouse, Office
England, U.K.	100,800	Manufacturing, Warehouse, Office
Ningbo, China	94,700	Manufacturing, Warehouse, Office
Hong Kong	109,300	Warehouse, Office

The company also maintains showrooms or sales offices near many major metropolitan areas throughout North America, Europe, Asia/Pacific, and Latin America. The company considers its existing facilities to be in good condition and adequate for its design, production, distribution, and selling requirements.

Item 3 LEGAL PROCEEDINGS

The company is involved in legal proceedings and litigation arising in the ordinary course of business. In the opinion of management, the outcome of such proceedings and litigation currently pending will not materially affect the company's operations, cash flows and financial condition.

ADDITIONAL ITEM: EXECUTIVE OFFICERS OF THE REGISTRANT

Certain information relating to Executive Officers of the company is as follows.

Name	Age	Year Elected an Executive Officer	Position with the Company
Gregory J. Bylsma	47	2009	Executive Vice President, Chief Financial Officer
James E. Christenson	65	1989	Senior Vice President, Legal Services, and Secretary
Steven C. Gane	57	2009	Senior Vice President, President, Geiger & Specialty/Consumer
Donald D. Goeman	55	2005	Executive Vice President, Research, Design & Development
Kenneth L. Goodson, Jr.	60	2003	Executive Vice President, Operations
Andrew J. Lock	58	2003	Executive Vice President, President, International
Curtis S. Pullen	52	2007	Executive Vice President, President, North American Office and Learning Environments
Michael F. Ramirez	47	2011	Senior Vice President of People, Places and Administration
Jeffrey M. Stutz	41	2009	Treasurer and Vice President, Investor Relations
Brian C. Walker	50	1996	President and Chief Executive Officer
B. Ben Watson	47	2010	Executive Creative Director

Except as discussed below, each of the named officers has served the company in an executive capacity for more than five years.

Mr. Bylsma joined Herman Miller, Inc. in 2000 as Director of Reporting & Planning for North America prior to being appointed Corporate Controller in 2005.

Mr. Gane joined Herman Miller in 2007 as President of Geiger International. Prior to this he worked for Furniture Brands International for 16 years serving mostly as President of HBF.

Mr. Pullen joined Herman Miller in 1991 and served as Chief Financial Officer from 2007 to 2009, Senior Vice President of Dealer Distribution from 2003 to 2007, Senior Vice President of Finance for North America from 2000 to 2003, and Vice President of Finance, Herman Miller International from 1994 to 2000.

Mr. Ramirez joined Herman Miller in 1998 and served as Director of Purchasing from 1998 to 2005, Vice President of Inclusiveness and Diversity from 2005 to 2009, and Vice President of Sales Operations from 2009 to 2011.

Mr. Stutz joined Herman Miller in 2009 as Treasurer and Vice President, Investor Relations. Previously he served as Chief Financial Officer for Izzy Designs Inc., subsequent to holding various positions within Herman Miller finance.

Mr. Watson joined Herman Miller in 2010 as Executive Creative Director, and prior to this he served as Managing Director and CEO of Moroso USA. Prior to this Mr. Watson served in creative roles as Global Creative Director of Apparel at Nike, and Global Marketing Director at Vitra.

There are no family relationships between or among the above-named executive officers. There are no arrangements or understandings between any of the above-named officers pursuant to which any of them was named an officer.

Year	\$27.77	\$16.39	\$24.56	\$1.06	\$0.0880

(1) The sum of the quarters may not equal the annual balance due to rounding associated with the calculation of earnings per share on an individual quarter basis

Dividends were declared and paid quarterly during fiscal 2012 and 2011 as approved by the Board of Directors. While it is anticipated that the company will continue to pay quarterly cash dividends, the amount and timing of such dividends is subject to the discretion of the Board depending on the company's future results of operations, financial condition, capital requirements, and other relevant factors.

Issuer Purchases of Equity Securities

The following is a summary of share repurchase activity during the fourth quarter ended June 2, 2012.

Period	(a) Total Number of Shares (or Units) Purchased	(b) Average Price Paid per Share or Unit	(c) Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Number (or Approximate Dollar Value) of Shares (or Units) that May Yet be Purchased Under the Plans or Programs ⁽¹⁾
3/4/12-3/31/12	351	21.85	351	\$166,644,948
4/1/12-4/28/12	—	—	—	\$166,644,948
4/29/12-6/2/12	2,128	17.87	2,128	\$166,606,920
Total	2,479	18.43	2,479	

(1) Amounts are as of the end of the period indicated

The company repurchases shares under a previously announced plan authorized by the Board of Directors on September 28, 2007, which provided share repurchase authorization of \$300,000,000 with no specified expiration date.

-11-

No repurchase plans expired or were terminated during the fourth quarter of fiscal 2012.

During the period covered by this report the company did not sell any of its equity shares that were not registered under the Securities Act of 1933.

Stockholder Return Performance Graph

Set forth below is a line graph comparing the yearly percentage change in the cumulative total stockholder return on the Company's common stock with that of the cumulative total return of the Standard & Poor's 500 Stock Index and the NASD Non-Financial Index for the five-year period ended June 2, 2012. The graph assumes an investment of \$100 on June 2, 2007 in the company's common stock, the Standard & Poor's 500 Stock Index and the NASD Non-Financial Index, with dividends reinvested.

	2007	2008	2009	2010	2011	2012
Herman Miller, Inc.	\$100	\$69	\$40	\$55	\$71	\$52
S&P 500 Index	\$100	\$91	\$60	\$71	\$87	\$83
NASD Non-Financial	\$100	\$100	\$71	\$92	\$118	\$119

Information required by this item is also contained in Item 12 of this report.

Item 7 MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Management's Discussion and Analysis

You should read the issues discussed in Management's Discussion and Analysis in conjunction with the company's Consolidated Financial Statements and the Notes to the Consolidated Financial Statements included in this Form 10-K.

Executive Overview

At Herman Miller, we work for a better world around you. We do this by designing and developing award-winning furniture and related services and technologies that improve your environment, whether it's an office, hospital, school, home, an entire building, or the world at large. At present, most of our customers come to us for interior environments in corporate office and healthcare settings. We also have a growing presence in educational and residential markets. Our primary products include furniture systems, seating, storage and material handling solutions, freestanding furniture, patient care products, and casegoods. Our other services extend from workplace solutions to furniture asset management.

More than 100 years of innovative business practices and a commitment to social responsibility have established Herman Miller as a recognized global company. A past recipient of the Smithsonian Institution's Cooper-Hewitt "National Design Award," in 2011, Herman Miller again received the Human Rights Campaign Foundation's top rating in its annual Corporate Equality Index and was also named, for the eighth consecutive year, to the Dow Jones Sustainability World Index.

The company's products are sold internationally through wholly-owned subsidiaries or branches in various countries including the United Kingdom, Canada, France, Germany, Italy, Japan, Mexico, Australia, Singapore, China, Hong Kong, India, and the Netherlands. The company's products are offered elsewhere in the world primarily through independent dealerships. The company has customers in over 100 countries.

The company is globally positioned in terms of manufacturing operations. In the United States, the company's manufacturing operations are located in Michigan, Georgia, Wisconsin and North Carolina. In Europe, the company's manufacturing presence is located within the United Kingdom, which is the company's largest marketplace outside of the United States. In Asia, manufacturing operations includes a facility located in Ningbo, China. The company manufactures products using a system of lean manufacturing techniques collectively referred to as the Herman Miller Performance System (HMPS). The company strives to maintain efficiencies and cost savings by minimizing the amount of inventory on hand. Accordingly, production is order-driven with direct materials and components purchased as needed to meet demand. The standard lead time for the majority of our products is 10 to 20 days. These factors result in a high rate of inventory turns and typically cause company inventory levels to appear relatively low compared to sales volume.

A key element of the company's manufacturing strategy is to limit fixed production costs by sourcing component parts from strategic suppliers. This strategy has allowed the company to increase the variable nature of our cost structure while retaining proprietary control over those production processes that we believe provide us a competitive advantage. As a result of this strategy, our manufacturing operations are largely assembly-based.

The business is comprised of various operating segments as defined by generally accepted accounting principles in the United States. These operating segments are determined on the basis of how the company internally reports and evaluates financial information used to make operating decisions. For external reporting purposes, the company has

identified the following reportable segments:

North American Furniture Solutions — Includes the operations associated with the design, manufacture, and sale of furniture products for work-related settings, including office, education, and healthcare environments, throughout the United States and Canada. The North American Furniture Solutions reportable segment is the aggregation of two operating segments in accordance with ASC 280-10-50-10 through 11. In addition, the company has determined that both operating segments within the North American Furniture Solutions reportable segment each represent reporting units.

Non-North American Furniture Solutions — Includes the operations associated with the design, manufacture, and sale of furniture products, primarily for work-related settings, for Mexico and outside of North America as well as the company's Non-North America consumer retail business.

Specialty and Consumer — Includes the operations associated with the design, manufacture, and sale of high-end furniture products including Geiger wood products, Herman Miller Collection products and the company's North American consumer retail business.

The reportable segments described above reflect a change made to the company's reportable segments during the first quarter of fiscal year 2012. The modification is a result of an organizational realignment whereby the company's operations related to the consumer retail business, the Herman Miller Collection, and Geiger are now the responsibility of one segment manager responsible for Specialty and Consumer.

The company also reports a corporate category consisting primarily of startup business and unallocated corporate expenses including restructuring and impairment costs.

Core Strengths

The company relies on the following core strengths in delivering workplace solutions to customers.

Brand - The Herman Miller brand is recognized by customers as a pioneer in design and sustainability, and as an advocate that supports their needs and interests. Within the company's industry, Herman Miller is acknowledged as one of the leading brands that inspires architects and designers to create their best commercial design solutions. Leveraging the company's brand equity across the lines of business to extend the company's reach to customers and consumers is an important element of the company's business strategy.

Problem-Solving Design and Innovation - The company is committed to developing research-based functionality and aesthetically innovative new products and has a history of doing so. The company believes its skills and experience in matching problem-solving design with the workplace needs of customers provides the company with a competitive advantage in the marketplace. An important component of the company's business strategy is to actively pursue a program of new product research, design, and development. The company accomplishes this through the use of an internal research, and engineering staff as well as third party design resources generally compensated on a royalty basis.

Operational Excellence - The company was among the first in our industry to embrace the concepts of lean manufacturing. HMPS provides the foundation for all of our manufacturing operations. The company is committed to continuously improving both product quality and production and operational efficiency. The company has extended this lean process work to our non-manufacturing processes as well as externally to our manufacturing supply chain and distribution channel. The company believes these concepts hold great promise for further gains in reliability, quality and efficiency.

Building and Leading Networks - The company values relationships in all areas of the business. The company considers its network of innovative designers, owned and independent dealers, and suppliers to be among the most important competitive factors and vital to the long-term success of the business.

Channels of Distribution

The company's products and services are offered to most of its customers under standard trade credit terms between 30 and 45 days and are sold through the following distribution channels.

Independent Contract Furniture Dealers and Licensees - Most of the company product sales are made to a network of independently owned and operated contract furniture dealerships doing business in many countries around the world. These dealers purchase the company's products and distribute them to end customers. The company recognizes revenue on product sales through this channel once products are shipped and title passes to the dealer. Many of these dealers also offer furniture-related services, including product installation.

Owned Contract Furniture Dealers - At June 2, 2012, the company owned 6 contract furniture dealerships, some of which have operations in multiple locations. The financial results of these owned dealers are included in our Consolidated Financial Statements. Product sales to these dealerships are eliminated as inter-company transactions from our consolidated financial results. The company recognizes revenue on these sales once products are shipped to the end customer and installation is substantially complete. The company believes independent ownership of contract furniture dealers is generally the best model for a financially strong distribution network. With this in mind, the company's strategy is to continue to pursue opportunities to transition the remaining owned dealerships to independent owners. Where possible, the goal is to involve local managers in these ownership transitions.

Direct Customer Sales - The company sometimes sells products and services directly to end customers without an intermediary (e.g. sales to the U.S. federal government). In most of these instances, the company contracts separately with a dealership or third-party installation company to provide sales-related services. The company recognizes revenue on these sales once products are shipped and installation is substantially complete.

Independent Retailers - Certain products are sold to end customers through independent retail operations. Revenue is recognized on these sales once products are shipped and title passes to the independent retailer.

E-Commerce - The company sells products through its online store, in which products are available for sale via the company's website, hermanmiller.com. This site complements our existing methods of distribution and exemplifies the company's brand to new customers. The company recognizes revenue on these sales upon shipment of the product.

Challenges Ahead

Like all businesses, the company is faced with a host of challenges and risks. The company believes its core strengths and values, which provide the foundation for its strategic direction, have us well prepared to respond to the inevitable challenges the company will face in the future. While the company is confident in its direction, the company acknowledges the risks specific to the business and industry. Refer to Item 1A for discussion of certain of these risk factors.

Future Avenues of Growth

The company believes it's well positioned to successfully pursue its mission in spite of the risks and challenges it faces. That is, the company will design and develop furniture and related services and technologies that reflect sustainable business practices that improve environments and help to create a better world. In pursuing our mission, the company has identified the following as key avenues for future growth.

• **Primary Markets** — Capture additional market share within our primary markets by offering superior solutions and ever expanding product categories, to customers who value space as a strategic tool.

• **Adjacent Markets** — Further apply the company's core skills in space environments such as small business, higher education and residential.

• **Developing Economies** — Expand the company's geographic reach in areas of the world with significant growth potential.

• **New Markets** — Develop or acquire new products and technologies that serve new markets.

Industry Analysis

The Business and Institutional Furniture Manufacturer's Association (BIFMA) is the trade association for the U.S. domestic office furniture industry. The company monitors the trade statistics reported by BIFMA and considers them an indicator of industry-wide sales and order performance. BIFMA publishes statistical data for the contract segment and the office supply segment within the U.S. furniture market. The U.S. contract segment relates primarily to large to mid-size corporations installed via a network of dealers. The office supply segment primarily to smaller customers via wholesalers and retailers. The company primarily participates, and is a leader in, the contract segment. It is important to note that the company's diversification strategy lessens our dependence on the U.S. office furniture market.

The company also analyzes BIFMA statistical information as a benchmark comparison against the performance of the domestic U.S. business and also to that of competitors. The timing of large project-based business may affect comparisons to this data in any one period. Finally, BIFMA regularly provides its members with industry forecast information, which the company uses internally as one of several considerations in its short and long-range planning process.

Discussion of Business Conditions

Fiscal years ended June 2, 2012 and May 28, 2011 contained 53 and 52 weeks of operations, respectively.

The company closed fiscal 2012 with net sales of over \$1.7 billion, driving a 22 percent increase in earnings per share relative to last fiscal year. While delivering solid financial results, the company also made meaningful progress on a number of important initiatives. These include significantly decreasing long-term pension obligations during the year by contributing approximately \$65 million in cash to the company's pension plans. During fiscal 2012 the company also acquired Sun Hing POSH Holdings Limited (POSH), a Hong Kong-based designer, and distributor of office furniture systems, freestanding furniture, seating, filing and storage with distribution in Hong Kong and China. With POSH, the company gains immediate access to the Chinese market through the POSH dealer network. As the demand for high quality seating and furniture continues to grow in the region, the company anticipates a significant increase in the sales of Herman Miller products through the POSH dealer network. With an expanded product offering through POSH, the company expects to look beyond China to other markets and customers not presently being served.

The development of new products has remained a critical element of the company's business strategy as the company continues to deliver superior products and services to customers. During fiscal 2012 the company gained market traction with a number of recently introduced products - including SAYL® chairs, Canvas Office Landscape™ and the Thrive ergonomic solutions portfolio. Importantly, throughout the year the company has aggressively pursued the next generation of new products that, taken together, represent one of the broadest product development agendas in Herman Miller's history. The company reached an important strategic milestone earlier this fiscal year with the introduction of the Herman Miller Collection - a dynamic product portfolio aimed at further articulating the company's unique heritage and contemporary value to architects, designers, and consumers. The Collection offers both classic and newly commissioned Herman Miller designs, along with broad offerings from both Magis and Mattiazzi - our Italian alliance partners. The combination of these products significantly expands the company's breadth of offer in the workplace. At this year's NeoCon furniture industry trade show the company earned a total of seven Best of NeoCon awards - the most of any manufacturer - across a range of product categories.

Looking forward, the general economic outlook for our industry in the U.S. is expected to be positive. BIFMA issued its most recent report in May 2012 expecting that the growth rate of office furniture orders and shipments in the U.S. for calendar 2012 will be 4.2 percent and 3.4 percent, respectively. This forecasted growth is based on an improvement in the U.S. economy, primarily driven by an improvement in employment.

Financial Results

The following is a comparison of our annual results of operations and year-over-year percentage changes for the periods indicated.

(Dollars In millions)	Fiscal 2012	% Chg from 2011	Fiscal 2011	% Chg from 2010	Fiscal 2010
Net sales	\$1,724.1	4.5	% \$1,649.2	25.1	% \$1,318.8

Net earnings	4.4	4.3	2.1

Net Sales, Orders, and Backlog - Fiscal 2012 Compared to Fiscal 2011

For the fiscal year ended June 2, 2012, consolidated net sales increased 4.5 percent to \$1,724.1 million from \$1,649.2 million for the fiscal year ended May 28, 2011. Net sales increased approximately \$4.9 million in fiscal 2012 from the acquisition of Sun Hing POSH Holdings Limited (POSH). The overall impact of foreign currency changes for the fiscal year was to increase net sales by approximately \$4.9 million. The impact of net changes in pricing is estimated to have had a \$35.0 million increase on net sales during fiscal 2012 over the prior year. The divestiture of the three dealers sold during fiscal 2012 lead to approximately a \$53 million decrease in both net sales and orders for fiscal 2012. The extra week of operations contributed approximately \$32 million towards the increase. The remainder of the fiscal 2012 increase was driven by increased unit volumes.

Consolidated net trade orders for fiscal 2012 totaled \$1,725.7 million compared to \$1,672.3 million in fiscal 2011, an increase of 3.2 percent. Order rates began the year at a steady pace with orders averaging approximately \$34 million per week through the second quarter. The third quarter weekly order rates averaged approximately \$28 million per week, which is consistent with the company's typical seasonal slowdown. The fourth quarter finished the year with average weekly order rates increasing to approximately \$34 million. The overall impact of foreign currency changes

for the fiscal year increased net orders by approximately \$5.7 million.

Our backlog of unfilled orders at the end of fiscal 2012 totaled \$278.0 million, a 0.8 percent increase from the \$275.8 million backlog at the end of fiscal 2011.

-19-

BIFMA reported an estimated year-over-year increase in U.S. office furniture shipments of approximately 4.1 percent for the twelve-month period ended May 2012. By comparison, the net sales increase for the company's domestic U.S. business was approximately 6.9 percent. The company believes that while comparisons to BIFMA are important, the company continues to pursue a strategy of revenue diversification that makes us less reliant on the drivers that impact BIFMA.

Net Sales, Orders, and Backlog - Fiscal 2011 Compared to Fiscal 2010

For the fiscal year ended May 28, 2011, consolidated net sales increased 25.1 percent to \$1,649.2 million from \$1,318.8 million for the fiscal year ended May 29, 2010. Net sales increased approximately \$33 million in fiscal 2011 from the acquisitions of Colebrook Bosson Saunders, and a contract and retail furniture dealership in Australia, which were both acquired in the fourth quarter of fiscal 2010. The overall impact of foreign currency changes was to increase fiscal 2011 net sales by approximately \$10 million. The impact of deeper discounting is estimated to have had a \$34.5 million decrease on net sales during fiscal 2011 over the prior year. The remainder of the fiscal 2011 increase was driven by increased unit volumes due to a more robust global economic environment and was experienced across nearly all operating segments and geographies.

Consolidated net trade orders for fiscal 2011 totaled \$1,672.3 million compared to \$1,322.4 million in fiscal 2010, an increase of 26.5 percent. Order rates began the year at a steady pace with orders averaging approximately \$30 million per week through the first quarter. The second and third quarter weekly order rates averaged approximately \$36 million and \$28 million, respectively, with the third quarter experiencing our typical seasonal slowdown. The fourth quarter finished the year with average weekly order rates increasing to approximately \$35 million. The overall impact of foreign currency changes for the fiscal year increased net orders by approximately \$8 million.

Our backlog of unfilled orders at the end of fiscal 2011 totaled \$275.8 million, a 13.2 percent increase from the \$243.6 million backlog at the end of fiscal 2010.

BIFMA reported an estimated year-over-year increase in U.S. office furniture shipments of approximately 17.6 percent for the twelve-month period ended May 2011. By comparison, the net sales increase for the company's domestic U.S. business was approximately 24.8 percent for the same period.

Gross Margin - Fiscal 2012 Compared to Fiscal 2011

Fiscal 2012 gross margin as a percentage of sales was 34.3 percent which is an increase of 170 basis points from the fiscal 2011 level. Approximately 130 basis points of the increase was driven by the benefit captured from recent price increases net of incremental discounting. This benefit drove an increase in net sales of approximately \$35 million during fiscal 2012 relative to the prior year period. An improvement in pricing net of incremental discounting increases net sales relative to prior periods. This has the effect of decreasing the components of the Condensed Consolidated Statement of Operations as a percentage of net sales.

Direct material costs as a percentage of sales in the current year remained consistent with fiscal 2011 levels.

Direct labor costs remained substantially the same as a percentage of sales compared to fiscal 2011 levels. The reduction in net sales due to the dealer divestitures during fiscal 2012 had the effect of increasing the direct labor percent as the incremental dealer sales had a lower direct labor component, however, this was offset by the net increase in pricing and favorable product labor content.

Overhead costs as a percent of net sales were lower by 170 basis points. The decrease in manufacturing overhead percent was due to both a \$16.2 million reduction in overhead costs and a reduction in net sales due to the divested

dealers. The additional decrease in manufacturing overhead percent was due to a decrease in employee incentive costs of approximately \$6.8 million, and the net increase in pricing. The remainder of the decrease is due to increased absorption of overhead costs.

Freight expenses, as a percentage of sales, were modestly higher by 20 basis points compared to fiscal 2011 levels. In dollars these costs were higher by \$5.5 million due to increased volume. The largest contributing factor to the increase in freight expense was increased fuel costs.

Gross Margin - Fiscal 2011 Compared to Fiscal 2010

Fiscal 2011 gross margin as a percentage of sales was 32.6 percent which is an increase of 10 basis points from the fiscal 2010 level. This modest increase was driven primarily by cost leverage on higher production, which was partially offset by deeper discounting, higher employee benefit and incentive costs, and higher costs of key direct materials, most notably steel and steel components. Deeper discounting reduced net sales relative to prior periods. This has the effect of increasing the components of the Condensed Consolidated Statement of Operations as a percentage of net sales.

Direct material costs as a percentage of sales in fiscal year 2011 increased 150 basis points from fiscal 2010. This was primarily driven by an increase in the cost of commodities and the increase in discounting, which has the effect of reducing net sales.

Direct labor costs were lower by 20 basis points as a percentage of sales, although higher in dollars by \$19.5 million driven by an increase in volume from fiscal 2010 levels. This percentage decrease was driven primarily by improved efficiencies and product mix, which was partially offset by deeper discounting and increased employee incentives and benefit costs.

Overhead costs as a percent of net sales were lower by 170 basis points but increased by \$20.7 million driven by higher volumes from fiscal 2010. The percentage decrease resulted from increased leverage from higher volumes, which was partially offset by deeper discounting and increased employee incentives and benefit costs.

Freight expenses, as a percentage of sales, were modestly higher by 30 basis points compared to fiscal 2010 levels. In dollars these costs were higher by \$17.4 million due to increased volume. The largest contributing factor to the percentage of sales increase was the increase in fuel costs during the year.

Restructuring - Fiscal 2012 and Fiscal 2011

During fiscal 2012, the company took action to decrease its cost structure. In the fourth quarter the company announced a plan ("The 2012 Plan") to consolidate the Nemschoff manufacturing operations in Sheboygan, Wisconsin with the closure of the Sioux City, Iowa seating plant. The 2012 Plan also includes the consolidation of the Nemschoff Sheboygan manufacturing sites into one location. This plan will reduce fixed costs and operating expenses in order to improve operating performance, profitability and further enhance productivity. The 2012 Plan will reduce our workforce by approximately 70 employees. The company anticipates it will incur an additional \$1.5 million in restructuring expense in future periods for the 2012 Plan.

Under the 2012 Plan, the company incurred restructuring expense of \$1.6 million of which consisted of \$0.2 million related to severance and the \$1.4 million related to impairment of building and equipment. In addition, the company recorded impairment of \$3.8 million for the indefinite-lived intangible assets related to two healthcare trade names that were terminated during the fourth quarter of fiscal 2012. The impairment was the result of the company's strategy to reduce its portfolio of healthcare brands and begin marketing the related products under the Nemschoff trade name. During fiscal 2011 the company incurred \$3.0 million of restructuring expense. The restructuring accrual balances of \$0.2 million and \$1.0 million for fiscal years 2012 and 2011, respectively are included in, "Accrued liabilities" within the Consolidated Balance Sheet.

See Note 15 of the Consolidated Financial Statements for additional information on restructuring.

Operating Expense - Fiscal 2012 Compared to Fiscal 2011

Operating expenses in fiscal 2012 were \$453.0 million, or 26.3 percent of net sales, which compares to \$414.8 million, or 25.2 percent of net sales in fiscal 2011. The company experienced a year-over-year increase in operating expense dollars of \$38.2 million, and a 110 basis point increase to operating expenses as a percentage of net sales. The fiscal 2012 increase in operating expenses was partially driven by the fiscal 2011 positive impact of \$15.1 million, resulting from the settlement of the liability related to contingent payments associated with the Nemschoff acquisition. Restructuring and impairment expenses increased by \$2.4 million, in fiscal 2012 compared to fiscal 2011 (see the discussion on restructuring expense above for additional detail). The company also incurred approximately \$8 million and \$1.6 million in additional operating expenses due to the extra week of operations and the acquisition of POSH, respectively, during fiscal 2012. Warranty expenses were higher by \$10.9 million for fiscal 2012 due to increased

spend and changes in estimates. The company recorded approximately \$7 million less employee incentive expense during fiscal 2012 compared to the prior year period.

Year-over-year changes in currency exchange rates, associated with the company's international operations, increased operating expenses by an estimated \$1 million.

Design and research costs included in total operating expenses for fiscal 2012 was \$52.7 million, or 3.1 percent of net sales, compared to fiscal 2011 expenses of \$45.8 million, or 2.8 percent of net sales. This increase was primarily driven by the company's increased investment in various projects. The remaining increase of \$1.3 million was due to an increase in royalty payments to designers due to increases in net sales. Royalty payments for the company products, which are included within design and research costs, totaled \$11.7 million and \$10.4 million in fiscal years 2012 and 2011, respectively.

Operating Expense - Fiscal 2011 Compared to Fiscal 2010

Operating expenses in fiscal 2011 were \$414.8 million, or 25.2 percent of net sales, which compares to \$374.9 million, or 28.4 percent of net sales in fiscal 2010. The company experienced a year-over-year increase in operating expense dollars of \$39.9 million, and a 320 basis point decrease to operating expenses as a percentage of net sales. The increase in operating expenses was primarily driven by the increase in net sales during the year. In addition, the company incurred \$3.8 million and \$16.6 million of additional operating expenses during fiscal 2011 due to the reinstatement of all employee benefits and employee incentive expenses, respectively. Restructuring expenses were \$3.0 million, compared to restructuring and impairment expenses of \$16.7 million in fiscal 2010, which included an impairment of \$2.5 million for Convia assets. Operating expense increases were partially offset during fiscal 2011 by the positive impact resulting from the settlement of the liability related to contingent payments associated with the Nemschoff acquisition of \$15.1 million.

Year-over-year changes in currency exchange rates, associated with international operations, increased operating expenses by an estimated \$2 million in fiscal 2011.

Design and research costs included in total operating expenses for fiscal 2011 was \$45.8 million, or 2.8 percent of net sales, compared to fiscal 2010 expenses of \$40.5 million, or 3.1 percent of net sales. This increase in dollars of \$5.3 million resulted in a decrease of 30 basis points as a percent of sales. This increase in dollars was primarily driven by royalty payments to designers and the reinstatement of employee benefits. Royalty payments to designers for company products totaled \$10.4 million and \$7.3 million in fiscal years 2011 and 2010, respectively.

Operating Earnings

In fiscal 2012 operating earnings were \$137.6 million, an 11.6 percent increase from fiscal 2011 operating earnings of \$123.3 million. The fiscal 2011 earnings represented a 130.0 percent increase from fiscal 2010 operating earnings of \$53.6 million. Operating earnings as a percentage of sales for fiscal years 2012, 2011 and 2010 were 8.0 percent, 7.5 percent and 4.1 percent, respectively.

Other Expenses and Income

Net other expenses totaled \$18.1 million in fiscal 2012 compared to \$20.8 million in fiscal 2011 and \$18.8 million in fiscal 2010. Approximately \$2.4 million of the decrease in fiscal 2012 expense compared to fiscal 2011 was a result of lower interest expense due to the net reduction in the company's long-term debt levels in the fourth quarter of fiscal 2011. Lower foreign currency transaction losses in fiscal 2012 contributed to the remainder of the decrease in expense compared to fiscal 2011.

The increase in fiscal 2011 expense compared to fiscal 2010 was primarily the result of higher foreign currency transaction losses and lower interest and investment income, which were partially offset by lower interest expense compared to the prior year.

Income Taxes

The company's effective tax rate was 37.1 percent in fiscal 2012 versus 30.9 percent in fiscal 2011 and 18.8 percent in fiscal 2010. The effective tax rate in fiscal 2012 was above the statutory rate of 35 percent, primarily due to a lower than anticipated manufacturing deduction, non-deductible expenses associated with contingent purchase consideration, and other adjustments required to reconcile income tax expense with the tax return of a foreign subsidiary. The effective tax rate in fiscal 2011 was below the statutory rate of 35 percent, primarily due to the domestic U.S. manufacturing deduction and realization of foreign tax credits. The effective rate in fiscal 2010 was

below the statutory rate of 35 percent, primarily due to the release of tax reserves that were no longer needed due to the closure of an IRS audit of the company's tax returns through fiscal 2009 and the domestic U.S. manufacturing tax incentive.

The company expects the effective tax rate for fiscal 2013 to be between 31 and 33 percent. For further information regarding income taxes, refer to Note 10 of the Consolidated Financial Statements.

Net Earnings; Earnings per Share

In fiscal 2012 and fiscal 2011 we generated \$75.2 million and \$70.8 million of net earnings, respectively. This compares to net earnings in fiscal 2010 of \$28.3 million. In fiscal 2012 diluted earnings per share were \$1.29 while diluted earnings per share in fiscal 2011 were \$1.06 and \$0.43 in fiscal 2010.

Discussion of Segments - Fiscal 2012 Compared to Fiscal 2011

North America

Net sales within the North American Furniture Solutions (North America) reportable segment were \$1,218.5 million in fiscal 2012, a 0.5 percent decrease from fiscal 2011 net sales of \$1,224.8 million. The divestiture of the three dealers sold during fiscal 2012 lead to approximately a \$53.0 million decrease in net sales for fiscal 2012. The impact of net changes in pricing is estimated to have had a \$31.0 million increase on net sales during fiscal 2012 over the prior year. The extra week of operations contributed approximately \$23.0 million to the fiscal 2012 net sales increase. The impact of foreign currency changes was to increase fiscal 2012 net sales for North America by approximately \$0.7 million. The remaining change in net sales was due to a decrease in unit volumes during fiscal 2012.

Operating earnings for North America in fiscal 2012 were \$96.9 million, or 8.0 percent of net sales. This compares to operating earnings of \$99.4 million or 8.1 percent of net sales in fiscal 2011. The extra week of operations had the effect of increasing operating earnings in fiscal 2012 by approximately \$1.8 million. Warranty expenses were higher by \$9.2 million for fiscal 2012 due to increased spend and changes in estimates. North America also had approximately \$15.0 million less employee incentive expense during fiscal 2012 compared to the prior year. The impact of foreign currency changes increased fiscal 2012 operating earnings for North America by approximately \$0.7 million. In addition, the fiscal 2011 operating earnings included the positive impact resulting from the settlement of the liability related to contingent payments associated with the Nemschoff acquisition of \$15.1 million. The remaining change in operating earnings as a percent of net sales in the current fiscal year is primarily driven by the ability to spread fixed manufacturing, sales and other costs over increased net sales.

Non-North America

Net sales from the Non-North American Furniture Solutions (Non-North America) reportable segment were \$347.3 million in fiscal 2012, a \$56.9 million or a 19.6 percent increase from fiscal 2011 net sales of \$290.4 million. The extra week of operations contributed approximately \$6.3 million towards the increase. Additionally, net sales increased approximately \$4.9 million in fiscal 2012 from the acquisition of POSH, which was acquired in the fourth quarter of fiscal 2012. The impact of foreign currency changes was to increase fiscal 2012 net sales for Non-North America by approximately \$4.2 million. The remaining year-over-year sales growth was driven primarily from increased unit volumes during fiscal 2012.

Operating earnings within Non-North America totaled \$32.1 million and \$18.8 million for fiscal year 2012 and 2011, respectively and represents 9.2 percent and 6.4 percent of net sales for fiscal year 2012 and 2011, respectively. The extra week of operations had the effect of increasing operating earnings in fiscal 2012 by approximately \$0.6 million. The acquisition of POSH contributed an additional \$0.4 million of operating earnings to fiscal 2012. The impact of foreign currency changes increased fiscal 2012 operating earnings for Non-North America by approximately \$0.4 million. The remaining increase in operating earnings was driven by the ability to spread fixed manufacturing, sales and other costs over increased unit volumes.

Specialty and Consumer

Net sales within the Specialty and Consumer reportable segment (Specialty and Consumer) were \$158.3 million in fiscal 2012, a \$24.1 million or a 18.0 percent increase from fiscal 2011 net sales of \$134.0 million. The impact of net changes in pricing is estimated to have had a \$4.0 million increase on net sales during fiscal 2012 over the prior year. The extra week of operations contributed approximately \$3.0 million towards the increase. The remaining increase in net sales was driven primarily from increased unit volumes during fiscal 2012.

Operating earnings within Specialty and Consumer totaled \$15.1 million for the year or 9.5 percent of net sales. This compares to operating earnings of \$10.7 million or 8.0 percent of net sales in fiscal 2011, an increase of 150 basis points. The extra week of operations had the effect of increasing operating earnings in fiscal 2012 by approximately

\$0.3 million. Specialty and Consumer also had approximately \$1.0 million less employee incentive expense during fiscal 2012 compared to the prior year. Warranty expenses increased \$2.2 million for fiscal 2012 due to increased spend and changes in estimates. The remaining increase in operating earnings was driven by the ability to spread fixed manufacturing, sales and other costs over increased unit volumes.

Discussion of Segments - Fiscal 2011 Compared to Fiscal 2010

North America

Net sales within the North American Furniture Solutions (North America) reportable segment were \$1,224.8 million in fiscal 2011, a 23.7 percent increase from fiscal 2010 net sales of \$989.7 million. The impact of foreign currency changes was to increase fiscal 2011 net sales for North America by approximately \$5 million. The remaining increase in net sales was due to an increase in unit volumes during fiscal 2011.

Operating earnings for North America in fiscal 2011 were \$99.4 million, or 8.1 percent of net sales. This compares to reportable segment earnings of \$75.8 million or 7.7 percent of net sales in fiscal 2010. Operating earnings in fiscal 2011 were reduced \$20.4 million, \$3.4 million, and \$3.3 million due to additional operating expenses during fiscal 2011 related to the reinstatement of all of our employee benefits, employee incentive costs, and warranty costs, respectively. These increased operating expenses were partially offset during fiscal 2011 by the \$15.1 million settlement of the liability related to contingent payments associated with the Nemschoff acquisition. The impact of foreign currency changes increased fiscal 2011 operating earnings for North America by approximately \$4 million. The remaining increase in operating earnings as a percent of net

sales in the current fiscal year is primarily driven by the ability to spread fixed manufacturing, sales and other costs over increased unit volumes.

Non-North America

Net sales from the Non-North American Furniture Solutions (Non-North America) reportable segment were \$290.4 million in fiscal 2011, a \$67.7 million or a 30.4 percent increase from fiscal 2010 net sales of \$222.7 million. The impact of foreign currency changes was to increase fiscal 2011 net sales for Non-North America by approximately \$5 million. Additionally, net sales increased approximately \$33 million in fiscal 2011 from the acquisitions of Colebrook Bosson Saunders, and a contract and retail furniture dealership in Australia, which were both acquired in the fourth quarter of fiscal 2010. The remaining year-over-year sales growth was driven primarily from increased unit volumes during fiscal 2011.

Operating earnings within Non-North America totaled \$18.8 million for the year or 6.4 percent of net sales. This compares to an operating loss of \$0.2 million or a negative 0.1 percent of net sales in fiscal 2010, an increase of 650 basis points. The operating loss in fiscal 2010 was affected by an independent dealer in Australia that went into receivership and resulted in bad debt expense of approximately \$5 million. Operating earnings in fiscal 2011 were reduced \$1.9 million due to additional operating expenses related to employee incentive costs and benefits. Additionally, operating earnings increased \$1.5 million in fiscal 2011 from the above referenced fiscal 2010 fourth quarter acquisitions. The impact of foreign currency changes increased fiscal 2011 operating earnings for Non-North America by approximately \$2.0 million. The remainder of the increased operating profitability was driven by the ability to spread fixed manufacturing, sales and other costs over increased unit volumes.

Specialty and Consumer

Net sales within the Specialty and Consumer reportable segment (Specialty and Consumer) were \$134.0 million in fiscal 2011, a \$28.1 million or a 26.5 percent increase from fiscal 2010 net sales of \$105.9 million. The increase in net sales was driven primarily from increased unit volumes during fiscal 2011.

Operating earnings within Specialty and Consumer totaled \$10.7 million for fiscal 2011 or 8.0 percent of net sales, an increase of 280 basis points. This compares to operating earnings of \$5.5 million or 5.2 percent of net sales in fiscal 2010. This increase was offset by \$2.2 million in additional operating expenses related to the reinstatement of all of the company's employee benefits and employee incentive plans. The remainder of the increased operating profitability was driven by the ability to spread fixed manufacturing, sales and other costs over increased unit volumes.

Liquidity and Capital Resources

The table below presents certain key cash flow and capital highlights for the fiscal years indicated.

(In millions)	Fiscal Year Ended		
	2012	2011	2010
Cash and cash equivalents, end of period	\$172.2	\$142.2	\$130.5
Marketable securities, end of period	\$9.6	\$11.0	\$12.1
Cash generated from operating activities	\$90.1	\$89.0	\$98.7
Cash used for investing activities	\$(58.4)	\$(31.4)	\$(77.6)
Cash used for financing activities	\$(1.6)	\$(50.2)	\$(78.9)
Pension and post-retirement benefit plan contributions ⁽⁴⁾	\$(64.9)	\$(52.8)	\$(19.3)
Capital expenditures	\$(28.5)	\$(30.5)	\$(22.3)
Stock repurchased and retired	\$(2.7)	\$(1.0)	\$(0.8)
Interest-bearing debt, end of period ^{(1) (3)}	\$250.0	\$250.0	\$301.2
Available unsecured credit facility, end of period ^{(2) (3)}	\$140.3	\$140.6	\$138.8

- (1) Amounts shown include the fair value of the company's interest rate swap arrangement. The net fair value of this arrangement was \$1.2 million at May 29, 2010.
- (2) Amounts shown are net of outstanding letters of credit, which are applied against the company's unsecured credit facility.
- (3) During the second quarter of fiscal 2012 and the first quarter of fiscal 2010 we renegotiated the unsecured revolving credit facility. Refer to Note 5 of the Consolidated Financial Statements for additional information.
- (4) Amount shown for fiscal 2011 and fiscal 2010 includes a \$14.6 million and \$16.7 million contribution made in the company's common stock, respectively.

Cash Flow — Operating Activities

Cash generated from operating activities in fiscal 2012 totaled \$90.1 million compared to \$89.0 million generated in the prior year. This represents an increase of \$1.1 million compared to fiscal 2011. Changes in working capital balances resulted in a \$8.8 million source of cash in the current fiscal year compared to a \$15.6 million use of cash in the prior year.

The source of cash related to working capital balances in fiscal 2012 consist primarily of decreases in trade receivables of \$17.5 million, prepaids of \$2.7 million, an increase in trade payables of \$4.8 million and an increase in accrued warranty of \$5.3 million. These amounts were partially offset by decreases in accrued compensation and other accruals of \$20.1 million and \$1.4 million, respectively.

The use of cash related to working capital balances in fiscal 2011 consist primarily of increases in trade receivables of \$48.5 million, inventory of \$8.3 million and prepaids of \$14.5 million. These changes were partially offset by increases in trade payables of \$14.3 million, and regular and incentive based compensation of \$34.8 million during fiscal 2011.

The source of cash related to working capital balances in fiscal 2010 consisted primarily of decreases in trade receivables of \$9.0 million, prepaids of \$23.6 million and an increase in trade payables of \$13.5 million, offset by increased inventory of \$7.1 million and a decrease in other accruals. The other accruals decreased primarily due to restructuring payments of \$15.5 million during fiscal 2010.

Collections of accounts receivable remained strong throughout fiscal 2012, and the company's recorded accounts receivable valuation allowances at the end of the year are believed to be adequate to cover the risk of potential bad debts. Allowances for non-collectible accounts receivable, as a percent of gross accounts receivable, totaled 2.7 percent, 2.3 percent, and 3.0 percent at the end of fiscal years 2012, 2011, and 2010, respectively.

During fiscal 2012 \$64.9 million in cash contributions were made to the company's employee pension and post-retirement benefit plans. Cash contributions during fiscal years 2011 and 2010 made to the company's employee pension and post-retirement benefit plans totaled \$38.2 million and \$2.6 million, respectively. For further information regarding the company's pension and post-retirement benefit plans, including information relative to the funded status of these plans, refer to Note 7 of the Consolidated Financial Statements.

Cash Flow — Investing Activities

Capital expenditures totaled \$28.5 million, \$30.5 million and \$22.3 million in fiscal 2012, 2011 and 2010, respectively. Outstanding commitments for future capital purchases at the end of fiscal 2012 were approximately \$8 million. The company expects capital spending in fiscal 2013 to be between \$50 million and \$60 million primarily due to planned investments in the company's facilities.

Included in the fiscal 2012 investing activities, is a net cash outflow of \$47.1 million related to the acquisition of Sun Hing POSH Holdings Limited. During fiscal 2012 the company also received proceeds of \$13.8 million and \$3.6 million from the sale of three furniture dealerships and a warehousing facility, respectively.

Included in the fiscal 2010 investing activities, is a net cash outflow of \$46.1 million related to our acquisitions of Nemschoff, CBS, and two furniture dealerships. Also included within fiscal 2010 investing activities is a note receivable for \$6.9 million related to our acquisition of Nemschoff. In fiscal 2010 we repaid loans held against the value of company owned life insurance policies for \$2.9 million.

Our net marketable securities transactions for fiscal 2012 yielded a \$1.4 million source of cash. This compares to a \$1.3 million source of cash in fiscal 2011 and a \$0.1 million source of cash in fiscal 2010.

Cash Flow — Financing Activities

(In millions, except share and per share data)	Fiscal Year Ended		
	2012	2011	2010
Shares acquired	115,012	49,694	44,654
Cost of shares acquired	\$2.7	\$1.0	\$0.8
Shares issued ⁽¹⁾	442,085	1,095,819	3,221,326
Average price per share issued	\$19.2	\$22.59	\$14.9
Cash dividends paid	\$5.2	\$5.0	\$4.9

(1) Includes 2,041,666 shares issued in connection with the Nemschoff acquisition during fiscal 2010. Includes 582,000 shares and 967,000 shares issued as a contribution to the company's pension plans during fiscal 2011 and fiscal 2010, respectively.

During the second quarter of fiscal 2012, the company entered into an amendment and restatement of the syndicated revolving line of credit, which provides the company with up to \$150 million in revolving variable interest borrowing capacity and includes an "accordion feature" allowing the company to increase, at its option and subject to the approval of the participating banks, the aggregate borrowing capacity of the facility by \$75 million. The facility expires in November 2016 and outstanding borrowings bear interest at rates based on the prime rate, federal funds rate, LIBOR, or negotiated rates as outlined in the agreement. Interest is payable periodically throughout the period a borrowing is outstanding.

During the first quarter of fiscal 2010, the company also completed the repurchase of \$75 million of registered debt securities.

In the fourth quarter of fiscal 2009 we announced a reduction in the cash dividend effective for the first quarter of fiscal 2010 payment. This change reduced the cash dividend to \$0.088 per share annually versus a total quarterly cash dividend of \$0.088 per share that was paid through the third quarter of fiscal 2009. As part of our decision to conserve cash we suspended significant share repurchases beginning in fiscal 2009. The amount remaining under our share repurchase authorization at the end of fiscal 2012 totaled \$166.6 million. Subsequent to the end of fiscal 2012 the company announced an increase in its quarterly cash dividend to \$0.088 per share or \$0.35 per share annually.

Interest-bearing debt at the end of fiscal 2012 and fiscal 2011 was \$250 million compared to \$301.2 million at the end of fiscal 2010. The decrease in fiscal 2011 is a result of the repayment of the remaining \$100 million in principal due under the 2001 public bond issue. The payment was made using a combination of existing cash and proceeds from newly-issued senior unsecured private placement notes of \$50 million maturing in March 2021.

The only usage against the company's unsecured revolving credit facility at the end of fiscal years 2012 and 2011 represented outstanding standby letters of credit totaling \$9.7 million and \$9.4 million, respectively. The provisions of the company's private placement notes and unsecured credit facility require the company to adhere to certain covenants and maintain certain performance ratios. The company was in compliance with all such covenants and performance ratios during fiscal 2012.

In fiscal 2012, we received \$6.4 million related to the issuance of shares in connection with stock-based compensation plans. This compares to receiving \$8.6 million and \$2.5 million in fiscal 2011 and fiscal 2010, respectively.

At the end of the fourth quarter fiscal 2012, the company had cash of \$172.2 million including foreign cash of \$47.7 million. In addition, the company had foreign marketable securities of \$9.6 million. The foreign subsidiary holding the company's marketable securities is taxed as a U.S. taxpayer at the company's election; consequently, for tax purposes

all U.S tax impacts for this subsidiary have been recorded. The company currently plans to repatriate approximately \$3.6 million within fiscal 2013 from foreign subsidiaries, for which all U.S taxes have been recorded. The company's intent is to permanently reinvest the remainder of the foreign cash amounts outside the U.S. The company's plans do not demonstrate a need to repatriate these balances to fund U.S. operations. During fiscal 2011 the company repatriated \$18.8 million of undistributed foreign earnings. During fiscal 2010 the company did not repatriate any undistributed foreign earnings.

We believe cash on hand, cash generated from operations, and our borrowing capacity will provide adequate liquidity to fund near term and future business operations and capital needs, subject to financing availability in the marketplace.

Contingencies

The company leases a facility in the United Kingdom under an agreement that expired in June 2011, and the company is currently leasing the facility on a month to month basis. Under the terms of the lease, the company is required to perform the maintenance and repairs necessary to address the general dilapidation of the facility over the lease term. The ultimate cost of this provision to the company is dependent on a number of factors including, but not limited to, the future use of the facility by the lessor and whether the company chooses and is permitted to renew the lease term. The company has estimated the cost of these maintenance and repairs to be between \$0 and \$3 million, depending on the outcome of future plans and negotiations. Based on existing circumstances, it is estimated that these costs will be approximately \$1.2 million. As a result, this amount has been recorded as a liability reflected under the caption "Other Liabilities" in the Consolidated Balance Sheets as of June 2, 2012. Based on circumstances existing in fiscal 2010, the amount recorded in the Consolidated Balance Sheets as of May 28, 2011 was \$1.3 million.

The company has a lease obligation in the U.K. until May 2014 for a facility that it has exited. Current market rates for comparable office space are lower than the rental payments owed under the lease agreement, as such, the company would remain liable to pay the difference if it were subleased. As of June 2, 2012 and May 28, 2011 the future cost of this arrangement was estimated to be \$1.1 million and \$1.7 million, respectively. Accordingly this amount is reflected within "Other Liabilities" on the Consolidated Balance Sheets as of these dates.

The company is involved in legal proceedings and litigation arising in the ordinary course of business. It is the company's opinion that the outcome of such proceedings and litigation currently pending will not materially affect the company's operations, cash flows, and financial condition.

Basis of Presentation

The company's fiscal year ends on the Saturday closest to May 31. Fiscal year ending June 2, 2012 contained 53 weeks of operations. Fiscal years ended May 28, 2011 and May 29, 2010 each included 52 weeks of operations. This is the basis upon which weekly-average data is presented.

Contractual Obligations

Contractual obligations associated with our ongoing business and financing activities will result in cash payments in future periods. The following table summarizes the amounts and estimated timing of these future cash payments. Further information regarding debt obligations can be found in Note 5 of the Consolidated Financial Statements. Likewise, further information related to operating leases can be found in Note 6 of the Consolidated Financial Statements.

(In millions)	Payments due by fiscal year				
	Total	2013	2014-2015	2016-2017	Thereafter
Long-term debt	\$250.0	\$—	\$50.0	\$—	\$200.0
Estimated interest on debt obligations ⁽¹⁾	87.9	15.6	30.0	25.3	17.0
Operating leases	68.2	18.0	24.2	12.4	13.6
Purchase obligations ⁽²⁾	49.3	43.8	5.5	—	—
Pension plan funding ⁽³⁾	4.5	3.7	0.2	0.2	0.4
Stockholder dividends ⁽⁴⁾	1.3	1.3	—	—	—
Other ⁽⁵⁾	16.9	1.8	3.4	3.2	8.5
Total	\$478.1	\$84.2	\$113.3	\$41.1	\$239.5

(1) Estimated future interest payments on our outstanding debt obligations are based on interest rates as of June 2, 2012. Actual cash outflows may differ significantly due to changes in underlying interest rates and timing of

principal payments.

(2) Purchase obligations consist of non-cancelable purchase orders and commitments for goods, services, and capital assets.

(3) Pension plan funding commitments are known for a 12-month period for those plans that are funded; unfunded pension and post-retirement plan funding amounts are equal to the estimated benefit payments. As of June 2, 2012, the total projected benefit obligation for our domestic and international employee pension benefit plans was \$418.8 million.

(4) Represents the recorded dividend payable as of June 2, 2012. Future dividend payments are not considered contractual obligations until declared.

(5) Other contractual obligations primarily represent long-term commitments related to deferred and supplemental employee compensation benefits, and other post-employment benefits.

-27-

Off-Balance Sheet Arrangements

Guarantees

We provide certain guarantees to third parties under various arrangements in the form of product warranties, loan guarantees, standby letters of credit, lease guarantees, performance bonds, and indemnification provisions. These arrangements are accounted for and disclosed in accordance with Accounting Standards Codification (ASC) Topic 460, "Guarantees" as described in Note 13 of the Consolidated Financial Statements.

Critical Accounting Policies and Estimates

Our goal is to report financial results clearly and understandably. We follow accounting principles generally accepted in the United States of America in preparing our Consolidated Financial Statements, which require us to make certain estimates and apply judgments that affect our financial position and results of operations. We continually review our accounting policies and financial information disclosures. These policies and disclosures are reviewed at least annually with the Audit Committee of the Board of Directors. Following is a summary of our more significant accounting policies that require the use of estimates and judgments in preparing the financial statements.

Revenue Recognition

As described in the "Executive Overview," the majority of our products and services are sold through one of four channels: Independent contract furniture dealers and licensees, owned contract furniture dealers, direct to end customers, and independent retailers. We recognize revenue on sales to independent dealers, licensees, and retailers once the product is shipped and title passes to the buyer. When we sell product directly to the end customer or through owned dealers, we recognize revenue once the product and services are delivered and installation thereof is substantially complete.

Amounts recorded as net sales generally include any freight charged to customers, with the related freight expenses recognized within cost of sales. Items such as discounts off list price, rebates, and other sale-related marketing program expenses are recorded as reductions to net sales. We record accruals for rebates and other marketing programs, which require us to make estimates about future customer buying patterns and market conditions. Customer sales that reach (or fail to reach) certain levels can affect the amount of such estimates, and actual results could differ from our estimates

Receivable Allowances

We base our allowances for receivables on known customer exposures, historical credit experience, and the specific identification of other potential problems, including the current economic climate. These methods are applied to all major receivables, including trade, lease, and notes receivable. In addition, we follow a policy that consistently applies reserve rates based on the age of outstanding accounts receivable. Actual collections can differ from our historical experience, and if economic or business conditions deteriorate significantly, adjustments to these reserves may be required.

The accounts receivable allowance totaled \$4.4 million and \$4.5 million at June 2, 2012 and May 28, 2011, respectively. As a percentage of gross accounts receivable, these allowances totaled 2.7 percent and 2.3 percent for fiscal 2012 and fiscal 2011, respectively. The year-over-year decrease in the allowance is primarily due to the stabilization of economic conditions and continued financial health of our customers.

Goodwill and Indefinite-lived Intangibles

The carrying value of goodwill and indefinite-lived intangible assets as of June 2, 2012 and May 28, 2011, were \$184.0 million and \$133.6 million, respectively. The company is required to perform an annual test of goodwill and indefinite-lived intangible assets to determine if the asset values are impaired.

The company has early-adopted the provisions of ASU 2011-08, which permits the company to perform a qualitative assessment to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying value to assess goodwill for impairment. The quantitative impairment test, when necessary, is based on the present value of projected cash flows and the resulting residual value and includes a reconciliation to market capitalization. In completing the test under this approach, the company assumes that one of the drivers of the value of a business today is the cash flows it will generate in the future. The company also assumes that such future cash flows can be reasonably estimated. While these projected cash flows reflect the best estimate of future reporting unit performance, actual cash flows could differ significantly.

The company completed the required annual goodwill impairment test in the fourth quarter of fiscal 2012 and concluded through a qualitative assessment that it is more likely than not that the goodwill of the reporting units are not impaired and thus the two-step quantitative impairment test was unnecessary. The company employs a market-based approach in selecting the discount rates used in our analysis. The discount rates

-28-

selected represent market rates of return equal to what the company believes is what a reasonable investor would expect to achieve on investments of similar size to the company's reporting units. The company believes the discount rates selected in the qualitative assessment are appropriate in that, in all cases, they exceed the estimated weighted average cost of capital for our business as a whole. The results of the impairment test are sensitive to changes in discount rates, though the testing performed in fiscal 2012 indicates that even a significant increase in the discount rate would not have changed the conclusion.

The company employs the relief from royalty method to determine the fair value of the indefinite-lived intangible assets which is a both a market-based approach and an income-based approach. The relief from royalty method focuses on the level of royalty payments that the user of an intangible asset would have to pay a third party for the use of the asset if it were not owned by the user. This method involves estimating theoretical future after tax royalty payments based on the company's forecasted revenues attributable to the trade names. These payments are then discounted to present value utilizing a discount rate that considers the after-corporate tax required rate of return applicable to the asset.

The projected revenues reflect the best estimate of management for the trade names, however, actual revenues could differ significantly.

The company completed the required annual indefinite-lived intangible asset impairment tests in the fourth quarter of fiscal 2012 and concluded that two healthcare trade names were impaired during fiscal 2012, resulting in an impairment of \$3.8 million. The impairment was the result of the company's strategy change during the fourth quarter of fiscal 2012 to reduce its portfolio of healthcare brands and begin marketing the related products under the Nemschoff trade name. The remaining indefinite-lived intangible assets tested were not impaired. The discount rates selected represent market rates of return equal to what the company believes is what a reasonable investor would expect to achieve on investments of similar size to the company's reporting units. The company believes the discount rates selected are appropriate in that, in all cases, they exceed the estimated weighted average cost of capital for our business as a whole. The results of the impairment test are sensitive to changes in the discount rates and changes in the discount rate may result in future impairment.

Long-lived Assets

The company evaluates other long-lived assets and acquired business units for indicators of impairment when events or circumstances indicate that an impairment risk may be present. The judgments regarding the existence of impairment are based on market conditions, operational performance, and estimated future cash flows. If the carrying value of a long-lived asset is considered impaired, an impairment charge is recorded to adjust the asset to its estimated fair value. During the fourth quarter of fiscal 2010 the company recorded an impairment charge of \$2.5 million that was related to our Convia line of business. These assets related to products that we determined had no future revenue stream to the company. The impairment charge was comprised of \$1.4 million of expense related to an intangible asset and \$1.1 million of expense in relation to fixed assets, respectively.

During the fourth quarter of fiscal 2012 the company recorded a fixed asset impairment charge of \$1.4 million. This asset impairment relates to the Nemschoff plant closure and consolidation. See note 15 to the Consolidated Financial Statements for additional information on the restructuring action which included this fixed asset impairment.

Warranty Reserve

The company stands behind company products and the promises it makes to customers. From time to time, quality issues arise resulting in the need to incur costs to correct problems with products or services. The company has established warranty reserves for the various costs associated with these obligations. General warranty reserves are based on historical claims experience and periodically adjusted for business levels. Specific reserves are established once an issue is identified. The valuation of such reserves is based on the estimated costs to correct the problem.

Actual costs may vary and may result in an adjustment to these reserves.

Inventory Reserves

Inventories are valued at the lower of cost or market. The inventories at the majority of our manufacturing operations are valued using the last-in, first-out (LIFO) method, whereas inventories of certain other subsidiaries are valued using the first-in, first-out (FIFO) method. The company establishes reserves for excess and obsolete inventory, based on prevailing circumstances and judgment for consideration of current events, such as economic conditions, that may affect inventory. The reserve required to record inventory at lower of cost or market may be adjusted in response to changing conditions.

Income Taxes

Deferred tax assets and liabilities are recognized for the expected future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities, and their respective tax bases. Deferred tax assets and liabilities are measured using the enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to reverse.

See Note 10 of the Consolidated Financial Statements for information regarding the company's uncertain tax positions.

The company has net operating loss (NOL) carryforwards available in certain jurisdictions to reduce future taxable income. The company also has foreign tax credits available in certain jurisdictions to reduce future tax due. Future tax benefits for NOL carryforwards and foreign tax credits are recognized to the extent that realization of these benefits is considered more likely than not. This determination is based on the expectation that related operations will be sufficiently profitable or various tax planning strategies available to us will enable us to utilize the NOL carryforwards and/or foreign tax credits. When information becomes available that raises doubts about the realization of a deferred income tax asset, a valuation allowance is established.

Self-Insurance Reserves

With the assistance of independent actuaries, reserves are established for workers' compensation and general liability exposures. The reserves are established based on expected future claims for incurred losses. The company also establishes reserves for health, prescription drugs, and dental benefit exposures based on historical claims information along with certain assumptions about future trends. The methods and assumptions used to determine the liabilities are applied consistently, although actual claims experience can vary. The company also maintains insurance coverage for certain risk exposures through traditional premium-based insurance policies. The company's health benefits retention level does not include an aggregate stop loss policy. The company's retention levels designated within significant insurance arrangements as of June 2, 2012, are as follows.

	Retention Level
General liability and auto liability/physical damage	\$1.00 million per occurrence
Workers' compensation and property	\$0.75 million per occurrence
Health benefits	\$1.00 million per employee

Pension and other Post-Retirement Benefits

The determination of the obligation and expense for pension and other post-retirement benefits depends on certain actuarial assumptions. Among the most significant of these assumptions are the discount rate, interest-crediting rate, and expected long-term rate of return on plan assets. We determine these assumptions as follows.

Discount Rate — This assumption is established at the end of the fiscal year based on high-quality corporate bond yields. The company utilizes the services of an independent actuarial firm to assist in determining the rate. For the domestic pension and other post-retirement benefit plans, the actuary uses a “cash flow matching” technique, which compares the estimated future cash flows of the plan to a published discount curve showing the relationship between interest rates and duration for hypothetical zero-coupon fixed income investments. The discount rate is set for the international pension plan based on the yield level of a commonly used corporate bond index in that jurisdiction. Because the average duration of the bonds underlying this index is less than that of our international pension plan liabilities, the index yield is used as a reference point. The final discount rate takes into consideration the index yield and the difference in comparative durations.

Interest Crediting Rate — The company uses this assumption in accounting for our primary domestic pension plan, which is a cash balance-type plan. The rate, which represents the annual rate of interest applied to each plan participant's account balance, is established at an assumed level, or spread, below the discount rate. The company bases this methodology on the historical spread between the 30-year U.S. Treasury and high-quality corporate bond yields. This relationship is examined annually to determine whether the methodology is still appropriate.

Expected Long-Term Rate of Return — The company bases this assumption on our long-term assumed rates of return for equities and fixed income securities, weighted by the allocation of the invested assets of the pension plan. The company considers likely returns and risk factors specific to the various classes of investments and advice from independent actuaries in establishing this rate. Changes in the investment allocation of plan assets would impact this

assumption. A shift to a higher relative percentage of fixed income securities, for example, would result in a lower assumed rate.

While this assumption represents the long-term market return expectation, actual asset returns can and do differ from year-to-year. Such differences give rise to actuarial gains and losses. In years where actual market returns are lower than the assumed rate, an actuarial loss is generated. Conversely, an actuarial gain results when actual market returns exceed the assumed rate in a given year. As of June 2, 2012, and May 28, 2011, the net actuarial loss associated with the employee pension and post-retirement benefit plans totaled approximately \$195.7 million and \$158.2 million, respectively. The majority of this unrecognized loss was associated with lower than expected return on assets for fiscal 2011 and fiscal 2010. Changes in the discount rate and return on assets can have a

-30-

significant effect on the expense and obligations related to our pension plans. The company cannot accurately predict these changes in discount rates or investment returns and, therefore, cannot reasonably estimate whether adjustments to the expense or obligation in subsequent years will be significant. Both the June 2, 2012 pension funded status and 2013 expense are affected by year-end 2012 discount rate and expected return on assets assumptions. Any change to these assumptions will be specific to the time periods noted and may not be additive, so the impact of changing multiple factors simultaneously cannot be calculated by combining the individual sensitivities shown. The effect of the indicated increase/(decrease) in discount rates and expected return on assets is shown below:

(In millions)

Assumption	1 Percent Change	2013 Expense		June 2, 2012 Obligation	
		U.S.	International	U.S.	International
Discount rate	+/- 1.0	\$ 1.5 / (1.5)	\$ (1.1) / 1.3	\$ (15.0) / 18.7	\$ (16.0) / 20.8
Expected return on assets	+/- 1.0	\$(3.1) / 3.1	\$ (0.8) / 0.8	—	—

For purposes of determining annual net pension expense, the company uses a calculated method for determining the market-related value of plan assets. Under this method, the company recognizes the change in fair value of plan assets systematically over a five-year period. Accordingly, a portion of the net actuarial loss is deferred. The remaining portion of the net actuarial loss is subject to amortization expense each year. The amortization period used in determining this expense is the estimated remaining working life of active pension plan participants. The company currently estimates this period to be approximately 13 years. As of June 2, 2012, the deferred net actuarial loss (i.e. the portion of the total net actuarial loss not subject to amortization) was approximately \$8.7 million.

Refer to Note 7 of the Consolidated Financial Statements for more information regarding costs and assumptions used for employee benefit plans.

Stock-Based Compensation

The company views stock-based compensation as a key component of total compensation for certain employees, non-employee directors and officers. The stock-based compensation programs include grants of restricted stock, restricted stock units, performance share units, employee stock purchases, and stock options. The company recognizes expense related to each of these share-based arrangements. The Black-Scholes option pricing model is used in estimating the fair value of stock options issued in connection with compensation programs. This pricing model requires the use of several input assumptions. Among the most significant of these assumptions are the expected volatility of the common stock price, and the expected timing of future stock option exercises.

Expected Volatility — This represents a measure, expressed as a percentage, of the expected fluctuation in the market price of the company's common stock. As a point of reference, a high volatility percentage would assume a wider expected range of market returns for a particular security. All other assumptions held constant, this would yield a higher stock option valuation than a calculation using a lower measure of volatility. In measuring the fair value of stock options issued during fiscal year 2012, we utilized an expected volatility of 42 percent.

Expected Term of Options — This assumption represents the expected length of time between the grant date of a stock option and the date at which it is exercised (option life). The company assumed an average expected term of 5.5 years in calculating the fair values of the majority of stock options issued during fiscal 2012.

Refer to Note 9 of the Consolidated Financial Statements for further discussion on our stock-based compensation plans.

Contingencies

In the ordinary course of business, the company encounters matters that raise the potential for contingent liabilities. In evaluating these matters for accounting treatment and disclosure, the company is required to apply judgment in order to determine the probability that a liability has been incurred. The company is also required to measure, if possible, the dollar value of such liabilities in determining whether or not recognition in our financial statements is required. This process involves the use of estimates which may differ from actual outcomes. Refer to Note 13 of the Consolidated Financial Statements for more information relating to contingencies.

New Accounting Standards

Refer to Note 1 of the Consolidated Financial Statements for information related to new accounting standards.

Forward Looking Statements

Certain statements in this filing are not historical facts but are “forward-looking statements” as defined under Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act, as amended. Such statements are based on management’s belief, assumptions, current expectations, estimates and projections about the office furniture industry, the economy and the company itself. Words like “anticipates,” “believes,” “confident,” “estimates,” “expects,” “forecast,” “likely,” “plans,” “projects,” and “should,” and variations of such words and similar expressions identify forward-looking statements. These statements do not guarantee future performance and involve certain risks, uncertainties, and assumptions that are difficult to predict with regard to timing, expense, likelihood, and degree of occurrence. These risks include, without limitation, employment and general economic conditions in the U.S. and in our international markets, the increase in white collar employment, the willingness of customers to undertake capital expenditures, the types of products purchased by customers, the possibility of order cancellations or deferrals by customers, competitive pricing pressures, the availability and pricing of direct materials, our reliance on a limited number of suppliers, currency fluctuations, the ability to increase prices to absorb the additional costs of direct materials, the financial strength of our dealers, the financial strength of our customers, the mix of our products purchased by customers, our ability to attract and retain key executives and other qualified employees, our ability to continue to make product innovations, the strength of the intellectual property relating to our products, the success of newly introduced products, our ability to serve all of our markets, possible acquisitions, divestitures or alliances, the outcome of pending litigation or governmental audits or investigations, and other risks identified in this Form 10-K and our other filings with the Securities and Exchange Commission. Therefore, actual results and outcomes may materially differ from what we express or forecast. Furthermore, Herman Miller, Inc., takes no obligation to update, amend, or clarify forward-looking statements.

Item 7A QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The company manufactures, markets, and sells its products throughout the world and, as a result, is subject to changing economic conditions, which could reduce the demand for its products.

Direct Material Costs

The company is exposed to risks arising from price changes for certain direct materials and assembly components used in its operations. The largest such costs incurred by the company are for steel, plastics, textiles, wood particleboard, and aluminum components. The impact from changes in commodity prices increased the company's costs by approximately \$1 million during fiscal 2012 compared to the prior year. The net impact of changes in pricing of increased net sales by \$35 million, which had the effect of decreasing the company's costs as a percent of net sales compared to fiscal 2011.

The net impact of changes in pricing in fiscal 2011 decreased net sales by \$12 million, which had the effect of increasing the company's costs as a percent of net sales compared to fiscal 2010. The net impact of changes in pricing in fiscal 2010 increased net sales by approximately \$24 million, which had the effect of decreasing the company's costs as a percent of net sales compared to fiscal 2009.

The company believes market prices for commodities in the near term may move higher and acknowledges that over time increases on its key direct materials and assembly components are likely. Consequently, it views the prospect of such increases as an outlook risk to the business.

Foreign Exchange Risk

The company primarily manufactures its products in the United States, United Kingdom, and China. It also sources completed products and product components from outside the United States. The company's completed products are sold in numerous countries around the world. Sales in foreign countries as well as certain expenses related to those

sales are transacted in currencies other than the company's reporting currency, the U.S. dollar. Accordingly, production costs and profit margins related to these sales are affected by the currency exchange relationship between the countries where the sales take place and the countries where the products are sourced or manufactured. These currency exchange relationships can also affect the company's competitive positions within these markets.

In the normal course of business, the company enters into contracts denominated in foreign currencies. The principal foreign currencies in which the company conducts its business are the British pound sterling, euro, Canadian dollar, Japanese yen, Mexican peso, and Chinese renminbi. As of June 2, 2012, the company had outstanding, ten forward currency instruments designed to offset either net asset or net liability exposure that is denominated in non-functional currencies. Two forward contracts were placed to offset a 3.9 million euro-denominated net asset exposure and two forward contracts were placed to offset a 0.6 million U.S. dollar-denominated net asset exposure. One forward contract was placed to offset 0.3 million Australian dollar-denominated net asset exposure. Five forward contracts were placed to offset a 4.2 million U.S.dollar-denominated net liability exposure.

As of May 28, 2011, the company had outstanding, sixteen forward currency instruments designed to offset either net asset or net liability exposure that is denominated in non-functional currencies. Two forward contracts were placed to offset a 3.1 million euro-denominated net asset exposure and five forward contracts were placed to offset a 7.6 million U.S. dollar-denominated net asset exposure. One forward contract was placed to offset 0.4 million Australian dollar-denominated net asset exposure. Eight forward contracts were placed to offset a 2.4 million U.S. dollar-denominated net liability exposure.

A net loss of \$1.3 million and \$2.0 million related to remeasuring all foreign currency transactions into the appropriate functional currency was included in net earnings for fiscal 2012 and fiscal 2011, respectively. For fiscal year 2010, a net gain of \$0.4 million impacted net earnings. Additionally, the cumulative effect of translating the balance sheet and income statement accounts from the functional currency into the United States dollar increased the accumulated comprehensive loss component of total stockholders' equity by \$7.1 million as of the end of fiscal 2012. Conversely, the effect decreased the accumulated comprehensive loss component of total stockholders' equity by \$6.4 million as of the end of fiscal 2011. For fiscal 2010 the cumulative effect increased the accumulated comprehensive loss component of total stockholders' equity by \$2.9 million.

Interest Rate Risk

The company maintains fixed-rate debt for which changes in interest rates generally affect fair market value but not earnings or cash flows. During the fourth quarter of fiscal 2011 the company's interest rate swap agreement expired as planned on March 15, 2011. At the end of fiscal 2010 the company held one interest rate swap agreement that effectively converted \$50.0 million of fixed-rate debt securities to a variable rate.

The combined fair market value and net asset amount of the effective interest rate swap instruments was \$1.2 million at May 29, 2010. The swap arrangement effectively reduced interest expense by \$1.5 million and \$1.9 million in fiscal 2011 and fiscal 2010, respectively. All cash flows related to the company's interest rate swap instruments are denominated in U.S. dollars.

Expected cash flows (notional amounts) over the next five years and thereafter related to debt instruments are as follows.

(In millions)	2013	2014	2015	2016	2017	Thereafter	Total
Long-Term Debt:							
Fixed rate	\$—	\$—	\$50.0	\$—	\$—	\$200.0	\$250.0
Wtd. average interest rate = 6.2%							

Item 8 FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

Consolidated Statements of Operations

(In millions, except per share data)	Fiscal Years Ended			
	June 2, 2012	May 28, 2011	May 29, 2010	
Net sales	\$1,724.1	\$1,649.2	\$1,318.8	
Cost of sales	1,133.5	1,111.1	890.3	
Gross margin	590.6	538.1	428.5	
Operating expenses:				
Selling, general, and administrative	394.9	366.0	317.7	
Restructuring and impairment expenses	5.4	3.0	16.7	
Design and research	52.7	45.8	40.5

Notes to the Consolidated Financial Statements

1. Significant Accounting and Reporting Policies

The following is a summary of significant accounting and reporting policies not reflected elsewhere in the accompanying financial statements.

Principles of Consolidation

The Consolidated Financial Statements include the accounts of Herman Miller, Inc., and its majority-owned domestic and foreign subsidiaries. The consolidated entities are collectively referred to as “the company.” All intercompany accounts and transactions, including any involving Variable Interest Entities (VIEs), have been eliminated in the Consolidated Financial Statements.

Description of Business

The company researches, designs, manufactures and distributes interior furnishings, for use in various environments including office, healthcare, educational, and residential settings, and provides related services that support companies all over the world. The company's products are sold primarily through independent contract office furniture dealers. Accordingly, accounts and notes receivable in the accompanying balance sheets are principally amounts due from the dealers.

Fiscal Year

The company's fiscal year ends on the Saturday closest to May 31. The fiscal year ended June 2, 2012 contains 53 weeks. The fiscal years ended May 28, 2011 and May 29, 2010, each contain 52 weeks. An extra week in the company's fiscal year is required approximately every six years in order to realign its fiscal calendar-end dates with the actual calendar months.

Foreign Currency Translation

The functional currency for foreign subsidiaries is their local currency. The cumulative effects of translating the balance sheet accounts from the functional currency into the United States dollar using fiscal year-end exchange rates and translating revenue and expense accounts using average exchange rates for the period is reflected as a component of “Accumulated Other Comprehensive Income (Loss)” in the Consolidated Balance Sheets. The financial statement impact of remeasuring all foreign currency transactions into the appropriate functional currency resulted in a net loss of \$1.3 million and \$2.0 million for the fiscal years ended June 2, 2012 and May 28, 2011, respectively. The financial statement impact of remeasuring all foreign currency transactions into the appropriate functional currency resulted in a net gain of and \$0.4 million for the fiscal year ended May 29, 2010. These amounts are included in “Other Expenses (Income)” in the Consolidated Statements of Operations.

Cash Equivalents

The company holds cash equivalents as part of its cash management function. Cash equivalents include money market funds, time deposit investments, and treasury bills with original maturities of less than three months. The carrying value of cash equivalents, which approximates fair value, totaled \$4.5 million and \$9.7 million as of June 2, 2012 and May 28, 2011, respectively. All cash and cash equivalents are high-credit quality financial instruments, and the amount of credit exposure to any one financial institution or instrument is limited.

Marketable Securities

The company maintains a portfolio of marketable securities primarily comprised of investment-grade, fixed-income securities. These investments are held by the company's wholly owned insurance captive and are considered “available-for-sale” securities. Accordingly, they have been recorded at fair value based on quoted market prices, with the resulting net unrealized holding gains or losses reflected net of tax as a component of “Accumulated Other Comprehensive Income (Loss)” in the Consolidated Balance Sheets.

All marketable security transactions are recognized on the trade date. Realized gains and losses on disposal of available-for-sale investments are included in "Interest and other investment income" in the Consolidated Statements of Operations. See Note 11 of the Consolidated Financial Statements for additional disclosures of marketable securities.

Accounts Receivable Allowances

Reserves for uncollectible accounts receivable balances are based on known customer exposures, historical credit experience, and the specific identification of other potentially uncollectible accounts. Balances are written off against the reserve once the company determines the probability of collection to be remote. The company generally does not require collateral or other security on trade accounts receivable.

Concentrations of Credit Risk

Our trade receivables are primarily due from independent dealers who, in turn, carry receivables from their customers. We monitor and manage the credit risk associated with individual dealers and direct customers where applicable. Dealers are responsible for assessing and assuming credit risk of their customers and may require their customers to provide deposits, letters of credit or other credit enhancement measures. Some sales contracts are structured such that the customer payment or obligation is direct to us. In those cases, we may assume the credit risk. Whether from dealers or customers, our trade credit exposures are not concentrated with any particular entity.

Inventories

Inventories are valued at the lower of cost or market and include material, labor, and overhead. Inventory cost is determined using the last-in, first-out (LIFO) method at the manufacturing sites in Michigan, whereas inventories of the company's other subsidiaries are valued using the first-in, first-out (FIFO) method. The company establishes reserves for excess and obsolete inventory, based on prevailing circumstances and judgment for consideration of current events, such as economic conditions, that may affect inventory. The reserve required to record inventory at lower of cost or market may be adjusted in response to changing conditions. Once elected, the company has applied these inventory cost valuation methods consistently from year to year. Further information on the company's recorded inventory balances can be found in Note 3 of the Consolidated Financial Statements.

Property, Equipment, and Depreciation

Property and equipment are stated at cost. The cost is depreciated over the estimated useful lives of the assets, using the straight-line method. Estimated useful lives range from 3 to 10 years for machinery and equipment and do not exceed 40 years for buildings. Leasehold improvements are depreciated over the lesser of the lease term or the useful life of the asset, not to exceed 10 years. We capitalize certain external and internal costs incurred in connection with the development, testing, and installation of software for internal use. Software for internal use is included in property and equipment and is depreciated over an estimated useful life not exceeding 5 years. Depreciation and amortization expense is included in the statement of operations in the cost of sales, operating expenses; selling, general and administrative, and design and research line items.

As of the end of fiscal 2012, outstanding commitments for future capital purchases approximated \$8.0 million.

Goodwill and Indefinite-lived Intangible Assets

The company performs an annual impairment test, by reporting unit, to determine whether the asset values are impaired. A reporting unit is defined as an operating segment or one level below an operating segment. The goodwill and indefinite-lived assets are primarily within the North American reportable segment, which includes two reporting units, and the Non-North American operating segment. The company has early-adopted the provisions of ASU 2011-08, which permits the company to perform a qualitative assessment to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying value. If the company determines it is not more likely than not that the fair value of a reporting unit is less than its carrying amount, then performing the two-step impairment test is unnecessary. However, if a company concludes otherwise, then it is required to perform the first step of the two-step impairment test by calculating the fair value of the reporting unit and comparing the fair value with the carrying amount of the reporting unit. Goodwill is considered impaired if the fair value of the tangible and intangible assets exceeds the fair value of the reporting unit.

The company also evaluates its acquired intangible assets at acquisition to determine whether any have "indefinite useful lives." Intangible assets with indefinite useful lives, are not subject to amortization. The company's indefinite-lived intangible assets consist of certain trade names valued at approximately \$39.3 million and \$23.2 million as of fiscal year 2012 and 2011, respectively. These assets have indefinite useful lives and are evaluated annually for impairment using the relief from royalty method. The company measures and records an impairment loss for the excess of the carrying value of the asset over its fair value.

The company recorded impairment of \$3.8 million for the indefinite-lived intangible assets related to two healthcare trade names during the fiscal year 2012. The impairment was the result of the company's strategy to reduce its portfolio of healthcare brands and begin marketing the related products under the Nemschoff trade name. The impairment is recorded in the restructuring and impairment expense line in the Consolidated Statements of Operations and is included in the "Corporate" category within the segment reporting and represents a level 3 fair value measurement.

Goodwill and other indefinite-lived assets included in the Consolidated Balance Sheet consist of the following:

(in millions)	Goodwill	Indefinite-lived Intangible Assets	Total Goodwill and Indefinite-lived Assets
Balance, May 28, 2011	\$ 110.4	\$ 23.2	\$ 133.6
Sale of dealers allocation	(0.6) —	(0.6
Impairment	—	(3.8) (3.8
Acquisition	32.8	19.9	52.7
Currency-related adjustments	2.1	—	2.1
Balance, June 2, 2012	\$ 144.7	\$ 39.3	\$ 184.0

Long-Lived Assets

The company reviews other long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset or an asset group may not be recoverable. Each impairment test is based on a comparison of the carrying amount of the asset or asset group to the future undiscounted net cash flows expected to be generated by the asset or asset group or in some cases by prices for similar assets. If such assets are considered to be impaired, the impairment amount to be recognized is the amount by which the carrying value of the assets exceeds their fair value. During fiscal 2010 the company recorded an impairment charge composed of \$1.4 million related to an amortizable intangible asset and \$1.1 million related to fixed assets, respectively. These assets related to products that we determined had no future revenue stream to the company. During fiscal 2012 the company recorded an impairment expense of \$1.4 million related to fixed assets in connection with the 2012 restructuring plan. These impairment charges was recorded in "Restructuring and impairment expenses" within the "Corporate" category within the segment reporting.

Amortizable intangible assets within "Other amortizable intangibles, net" consists primarily of patents, trademarks and customer relationships. The combined gross carrying value and accumulated amortization for these amortizable intangibles was as follows:

(in millions)	June 2, 2012	
	Patent and Trademarks	Customer Relationships
Gross carrying value	\$22.7	\$24.0
Accumulated amortization	12.4	3.2
Net	\$10.3	\$20.8
	May 28, 2011	
	Patent and Trademarks	Customer Relationships
Gross carrying value	\$22.1	\$15.1
Accumulated amortization	10.7	2.2
Net	\$11.4	\$12.9

The company amortizes these assets over their remaining useful lives using the straight-line method over periods ranging from 5 to 20 years. It is estimated that the average remaining life of such patents and trademarks is approximately 5 years and 8 years, respectively. The estimated average remaining life of the customer relationships is 15 years.

Estimated amortization expense on existing amortizable intangible assets as of June 2, 2012, for each of the succeeding five fiscal years is as follows.

(in millions)	
2013	\$3.0

Edgar Filing: MILLER HERMAN INC - Form 10-K

2014	\$2.8
2015	\$2.6
2016	\$2.5
2017	\$2.4

-42-

Self-Insurance

The company is partially self-insured for general liability, workers' compensation, and certain employee health and dental benefits under insurance arrangements that provide for third-party coverage of claims exceeding the company's loss retention levels. The company's health benefits retention level does not include an aggregate stop loss policy. The company's retention levels designated within significant insurance arrangements as of June 2, 2012, are as follows:

(in millions)	Retention Level (per occurrence)
General liability and auto liability/physical damage	\$ 1.00
Workers' compensation and property	\$0.75
Health benefits	\$ 1.00

The company's policy is to accrue amounts equal to the actuarially-determined liabilities for loss and loss adjustment expenses, which are included in "Other liabilities" in the Consolidated Balance Sheets. The actuarial valuations are based on historical information along with certain assumptions about future events. Changes in assumptions for such matters as legal actions, medical costs, and changes in actual experience could cause these estimates to change. The general and workers' compensation liabilities are managed through the company's wholly-owned insurance captive.

Research, Development, and Other Related Costs

Research, development, pre-production, and start-up costs are expensed as incurred. Research and development (R&D) costs consist of expenditures incurred during the course of planned research and investigation aimed at discovery of new knowledge useful in developing new products or processes. R&D costs also include the significant enhancement of existing products or production processes and the implementation of such through design, testing of product alternatives, or construction of prototypes. Research and development costs included in "Design and Research" expense in the accompanying Consolidated Statements of Operations of \$41.0 million, 35.4 million, and \$33.2 million, in fiscal 2012, 2011, and 2010, respectively.

Royalty payments made to designers of the company's products as the products are sold are a variable cost based on product sales. These expenses totaled \$11.7 million, \$10.4 million, and \$7.3 million in fiscal years 2012, 2011, and 2010 respectively. They are included in "Design and Research" expense in the accompanying Consolidated Statements of Operations.

Advertising Costs

Advertising costs are expensed as incurred and are included in "Selling, general, and administrative" expense in the accompanying Consolidated Statements of Operations. Advertising costs were \$4.4 million, \$2.3 million, and \$2.4 million, in fiscal 2012, 2011, and 2010, respectively.

Customer Payments and Incentives

We offer various sales incentive programs to our customers, such as rebates, discounts, buy-downs and cooperative advertising programs. Programs such as rebates, discounts and buy-downs are adjustments to the selling price and are therefore characterized as a reduction to net sales. The cooperative advertising program, whereby customers are reimbursed for company approved advertising expenditures, provides us with an identifiable benefit from the advertisement at a verifiable market rate. Therefore, the cost of the cooperative advertising program is recognized as an operating expense and is included in the "Selling, general and administrative" line in the Consolidated Statement of Operations. We recognized operating expense related to our cooperative advertising program of \$2.0 million, \$1.5 million and \$1.8 million in fiscal 2012, 2011, and 2010, respectively.

Revenue Recognition

The company recognizes revenue on sales through its network of independent contract furniture dealers and independent retailers once the related product is shipped and title passes. In situations where products are sold through subsidiary dealers or directly to the end customer, revenue is recognized once the related product is shipped to the end customer and installation is substantially complete. Offers such as rebates and discounts are recorded as reductions to net sales. Unearned revenue occurs during the normal course of business due to advance payments from customers for future delivery of products and services.

Shipping and Handling Expenses

The company records shipping and handling related expenses under the caption "Cost of Sales" in the Consolidated Statements of Operations.

Cost of Sales

We include material, labor and overhead in cost of sales. Included within these categories are such items as inbound freight charges, warehousing costs, internal transfer costs, and other costs of our distribution network.

Selling, General, and Administrative

We include costs not directly related to the manufacturing of our products in selling, general, and administrative. Included in these expenses are items such as compensation expense, rental expense, royalty expense, warranty expense, and travel and entertainment expense.

Income Taxes

Deferred tax assets and liabilities are recognized for the expected future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities, and their respective tax bases. Deferred tax assets and liabilities are measured using the enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to reverse.

The company's annual effective tax rate is based on income, statutory tax rates and tax planning strategies available in the various jurisdictions the company operates in. Complex tax laws can be subject to different interpretations by the company and the respective government authorities. Significant judgment is required in evaluating tax positions and determining our tax expense. Tax positions are reviewed quarterly and tax liabilities are adjusted as new information becomes available.

In evaluating the company's ability to recover deferred tax assets within the jurisdiction from which they arise, the company considers all positive and negative evidence. These assumptions require significant judgment about forecasts of future taxable income.

Stock-Based Compensation

The company has several stock-based compensation plans, which are described in Note 9 of the Consolidated Financial Statements. Our policy is to expense stock-based compensation using the fair-value based method of accounting for all awards granted.

Earnings per Share

Basic earnings per share (EPS) excludes the dilutive effect of common shares that could potentially be issued, due to the exercise of stock options or the vesting of restricted shares, and is computed by dividing net earnings by the weighted-average number of common shares outstanding for the period. Diluted EPS for fiscal years 2012, 2011, and 2010, was computed by dividing net earnings by the sum of the weighted-average number of shares outstanding, plus all dilutive shares that could potentially be issued. During fiscal 2011 and fiscal 2010 the numerator for diluted earnings per share excluded the earnings impact from the Nemschoff contingent consideration from the Consolidated Statement of Operations. Previously, this contingent consideration could be settled in cash or stock at the discretion of the company and, therefore, any income or loss associated with adjustments to these liabilities is excluded from the numerator when computing diluted earnings per share. Refer to Note 8 of the Consolidated Financial Statements, for further information regarding the computation of EPS.

Comprehensive Income (Loss)

Comprehensive income consists of net earnings, foreign currency translation adjustments, and unrealized holding gain (loss) on "available-for-sale" securities and pension liability adjustments. The following table presents comprehensive income for the periods indicated:

	Fiscal Year Ending		
(in millions)	June 2, 2012	May 28, 2011	May 29, 2010

Edgar Filing: MILLER HERMAN INC - Form 10-K

Net earnings	\$75.2	\$70.8	\$28.3

Use of Estimates in the Preparation of Financial Statements

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Fair Value

The Company follows ASC Topic 820, Fair Value Measurements and Disclosures, which provides a consistent definition of fair value, focuses on exit price, prioritizes the use of market-based inputs over entity-specific inputs for measuring fair value and establishes a three-tier hierarchy for fair value measurements. This topic requires fair value measurements to be classified and disclosed in one of the following three categories:

- Level 1 — Financial instruments with unadjusted, quoted prices listed on active market exchanges.
- Level 2 — Financial instruments lacking unadjusted, quoted prices from active market exchanges, including over-the-counter traded financial instruments. Financial instrument values are determined using prices for recently traded financial instruments with similar underlying terms and direct or indirect observational inputs, such as interest rates and yield curves at commonly quoted intervals.
- Level 3 — Financial instruments not actively traded on a market exchange and there is little, if any, market activity. Values are determined using significant unobservable inputs or valuation techniques.

See Note 11 of the Consolidated Financial Statements for the required fair value disclosures.

Foreign Currency Forward Contracts Not Designated as Hedges

The company transacts business in various foreign currencies and has established a program that primarily utilizes foreign currency forward contracts to offset the risks associated with the effects of certain foreign currency exposures. Under this program, the company's strategy is to have increases or decreases in our foreign currency exposures offset by gains or losses on the foreign currency forward contracts to mitigate the risks and volatility associated with foreign currency transaction gains or losses. These foreign currency exposures typically arise from net liability or asset exposures in non-local currencies on the balance sheets of our foreign subsidiaries. These foreign currency forward contracts generally settle within 90 days and are not used for trading purposes. These forward contracts are not designated as hedging instruments. Accordingly, we record the fair value of these contracts as of the end of the reporting period in the consolidated balance sheet with changes in fair value recorded in the Consolidated Statement of Operations. The balance sheet classification for the fair values of these forward contracts is to "Prepaid expenses and other" for unrealized gains and to "Accrued liabilities" for unrealized losses. The Consolidated Statement of Operations classification for the fair values of these forward contracts is to "Other expenses (income): Other, net", for both realized and unrealized gains and losses.

As of June 2, 2012, the notional amounts of the forward contracts held to purchase and sell U.S. dollars in exchange for other major international currencies were \$4.8 million and the notional amounts of the foreign currency forward contracts held to sell British pound sterling in exchange for other major international currencies were 3.3 million GBP.

The effects of derivative instruments on the condensed consolidated financial statements were as follows for the fiscal years ended 2012 and 2011 (amounts presented exclude any income tax effects) are shown below.

Fair Value of Derivative Instruments in Condensed Consolidated Balance Sheet

(in millions)	Balance Sheet Location	June 2, 2012	May 28, 2011
Foreign currency forward contracts not designated as hedges	Other current assets	\$0.1	\$0.7

New Accounting Standards

In September 2011, Financial Accounting Standards Board (FASB) issued Accounting Standard Update (ASU) No. 2011-08, "Intangibles-Goodwill and Other (Topic 350): Testing Goodwill for Impairment." ASU 2011-08 gives the option to first assess qualitative factors to determine if it is more likely than not that the fair value of a reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step goodwill impairment test. This ASU is effective for fiscal years, and interim periods within those fiscal years, beginning on or after December 15, 2011, although early adoption is permitted. The company adopted the applicable requirements of this ASU in the fourth quarter of fiscal 2012. The provisions of ASU 2011-08 did not have a material effect on the company's financial position, results of operations or cash flows.

In May 2011, the FASB issued ASU No. 2011-04, "Fair Value Measurements and Disclosures (Topic 820): Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRS." ASU 2011-04 provides common requirements for measuring fair value and disclosing information about fair value measurements in accordance with U.S. GAAP and IFRS. This ASU is effective for reporting periods beginning on or after December 15, 2011, applied prospectively. The company plans to adopt the provisions of ASU 2011-04 during the first quarter of fiscal 2013 and does not expect the provisions of ASU 2011-04 to have a material effect on its financial position, results of operations or cash flows.

In June 2011, the FASB issued ASU No. 2011-05, "Comprehensive Income (Topic 220): Presentation of Comprehensive Income." ASU 2011-05 improves the comparability, consistency, and transparency of financial reporting and increases the prominence of items reported in other comprehensive income. This ASU is effective for fiscal years, and interim periods within those years, beginning on or after December 15, 2011, although early adoption is permitted. In December 2011, the FASB issued ASU No. 2011-12, "Comprehensive Income (Topic 220): Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in Accounting Standards Update 2011-05," which defers certain aspects of ASU 2011-05 related to the presentation of reclassification adjustments. The company plans to adopt the revised guidance during the first quarter of fiscal 2013 and does not expect the provisions of ASU 2011-12 to have a material effect on its financial position, results of operations or cash flows.

2. Acquisitions and Divestitures

Acquisitions

On April 3, 2012, the company acquired Sun Hing POSH Holdings Limited (POSH). POSH is a Hong Kong-based designer, and distributor of office furniture systems, freestanding furniture, seating, and filing and storage with distribution in Hong Kong and China. POSH had net sales of approximately \$50 million during their last fiscal year. Total purchase price to acquire POSH was approximately \$59 million, which included \$47.1 million in net cash and contingent consideration valued at \$4.4 million. The contingent consideration will be in the form of a cash payment, which the company currently estimates to be within the range of zero and \$5.2 million. Any change in value due to change in estimates will be reflected within "Total operating expenses" in the Condensed Consolidated Statements of Operations. The company acquired assets valued at \$16.5 million, consisting primarily of cash, accounts receivable, inventory and property plant and equipment, and acquired liabilities valued at \$14.4 million. The company also established a deferred tax liability of \$4.9 million. Resulting goodwill, indefinite-lived intangibles, and amortizable intangibles of were \$32.8 million, \$19.9 million, and \$8.9 million, respectively. The allocation of the purchase price is considered preliminary and was based upon valuation information, estimates and assumptions available at June 2, 2012. Management is still in the process of verifying data and finalizing information related to the valuation and recording of identifiable intangible assets, deferred income taxes, working capital adjustments and the resulting effects on the value of goodwill. The company expects to finalize these matters within the measurement period, which will end as soon as information becomes available to finalize valuations, not exceeding twelve months from the acquisition date. POSH is reported within the Non-North American Furniture Solutions reportable operating segment.

Divestitures

During the first quarter of fiscal 2012 the company completed the sale of two wholly-owned contract furniture dealerships in Texas and Colorado. During the second quarter of fiscal 2012 the company completed the sale of one wholly-owned contract furniture dealership in California. The effect of these transactions on the company's consolidated financial statements was not material.

3. Inventories

(In millions)	June 2, 2012	May 28, 2011
Finished goods and work in process	\$40.4	\$46.2
Raw materials	18.9	20.0
Total	\$59.3	\$66.2

The inventories of the manufacturing sites in Michigan are valued using the last-in, first-out method (LIFO). The inventories of all other subsidiaries are valued using the first-in, first-out method. Inventories valued using LIFO amounted to \$18.0 million and \$24.1 million as of June 2, 2012 and May 28, 2011, respectively. During 2012, a reduction in inventory quantities resulted in a liquidation of applicable LIFO inventory quantities carried at lower costs in prior years. This LIFO liquidation decreased cost of goods sold by an negligible amount in 2012. If all inventories had been valued using the first-in first-out method, inventories would have been \$70.7 million and \$77.8 million at June 2, 2012 and May 28, 2011, respectively.

4. Accrued Liabilities

(In millions)	June 2, 2012	May 28, 2011
Compensation and employee benefits	\$53.3	\$75.9
Income taxes	2.4	2.5
Other taxes	5.8	6.8
Deferred revenue	17.4	13.5
Warranty reserves	22.2	17.0
Interest payable	5.4	6.1
Restructuring	0.2	1.0
Pension and post-retirement benefits	1.2	1.2
Contingent consideration	—	1.6
Other	28.3	27.5
Total	\$136.2	\$153.1

5. Long-Term Debt

Long-term debt consisted of the following obligations:

(In millions)	June 2, 2012	May 28, 2011
Series A senior notes, 5.94%, due January 3, 2015	\$50.0	\$50.0
Series B senior notes, 6.42%, due January 3, 2018	150.0	150.0
Debt securities, 6.0%, due March 1, 2021	50.0	50.0
Total	\$250.0	\$250.0

During the second quarter of fiscal 2012, the company entered into an amendment and restatement of the syndicated revolving line of credit, which provides the company with up to \$150 million in revolving variable interest borrowing capacity and includes an "accordion feature" allowing the company to increase, at its option and subject to the approval of the participating banks, the aggregate borrowing capacity of the facility by \$75 million. The facility expires in November 2016 and outstanding borrowings bear interest at rates based on the prime rate, federal funds rate, LIBOR, or negotiated rates as outlined in the agreement. Interest is payable periodically throughout the period a borrowing is outstanding.

As of June 2, 2012 and May 28, 2011, total usage against this facility was \$9.7 million and \$9.4 million respectively, all of which related to outstanding letters of credit.

Our senior notes and the unsecured senior revolving credit facility restrict, without prior consent, our borrowings, capital leases, and the sale of certain assets. In addition, we have agreed to maintain certain financial performance ratios, which include a maximum leverage ratio covenant, which is measured by the ratio of debt to trailing four quarter adjusted EBITDA (as defined in the credit agreement) and is required to be less than 3.5:1, with a minimum interest coverage ratio, which is measured by the ratio of trailing four quarter EBITDA to trailing four quarter interest expense (as defined in the credit agreement) and is required to be greater than 4:1. Adjusted EBITDA is generally defined in the credit agreement as EBITDA adjusted by certain items which include non-cash, share-based

compensation, non-recurring restructuring costs and extraordinary items. At June 2, 2012 and May 28, 2011, the company was in compliance with all of these restrictions and performance ratios.

Annual maturities of long-term debt for the five fiscal years subsequent to June 2, 2012, are as follows:

(In millions)	
2013	\$—
2014	\$—
2015	\$50.0
2016	\$—
2017	\$—
Thereafter	\$200.0

6. Operating Leases

The company leases real property and equipment under agreements that expire on various dates. Certain leases contain renewal provisions and generally require the company to pay utilities, insurance, taxes, and other operating expenses.

Future minimum rental payments required under operating leases that have non-cancelable lease terms as of June 2, 2012, are as follows:

(In millions)	
2013	\$18.0
2014	\$14.1
2015	\$10.1
2016	\$7.6
2017	\$4.8
Thereafter	\$13.6

Total rental expense charged to operations was \$20.7 million, \$22.8 million, and \$22.4 million, in fiscal 2012, 2011, and 2010, respectively. Substantially all such rental expense represented the minimum rental payments under operating leases.

7. Employee Benefit Plans

The company maintains retirement benefit plans for substantially all of its employees.

Pension Plans and Post-Retirement Medical Insurance

The principal domestic retirement plan is a defined-benefit plan with benefits determined by a cash balance calculation. Benefits under this plan are based upon an employee's years of service and earnings. The company also offers certain employees retirement benefits under other domestic defined benefit plans. The company provides healthcare benefits to employees who retired from service on or before a qualifying date in 1998. As of the qualifying date, the company discontinued offering post-retirement medical to future retirees. Benefits to qualifying retirees under this plan are based on the employee's years of service and age at the date of retirement.

In addition to the domestic pension and retiree healthcare plan, one of the company's wholly owned foreign subsidiaries has a defined-benefit pension plan based upon an average final pay benefit calculation.

The measurement date for the company's principal domestic and international pension plans, as well as its post-retirement medical, is the last day of the fiscal year.

During the fourth quarter of fiscal 2012, the company announced its intent to change its employee retirement programs from a defined benefit-based model to a defined contribution structure. The company approved a plan to freeze future benefit accruals of its primary domestic defined benefit plan as of September 1, 2012. At this time, the company will begin to transition employees to a new defined contribution program and subsequently terminate its domestic defined benefit plans. The termination process is expected to take 12 to 24 months from the time that the benefit accruals are frozen.

Benefit Obligations and Funded Status

The following table presents, for the fiscal years noted, a summary of the changes in the projected benefit obligation, plan assets and funded status of the company's domestic and international pension plans and post-retirement plan.

-48-

(In millions)	Pension Benefits				Post-Retirement Benefits		
	2012 Domestic	International	2011 Domestic	International	2012	2011	
Change in benefit obligation:							
Benefit obligation at beginning of year	\$309.9	\$75.0	\$296.0	\$71.6	\$10.3	\$11.1	
Service cost	7.0	1.3	6.9	1.9	—	—	
Interest cost	14.4	3.9	15.1	4.3	0.4	0.5	
Curtailments	(4.3) —	—	—	—	—	
Foreign exchange impact	—	(5.5) —	9.2	—	—	
Actuarial (gain)/loss	22.4	12.8	9.0	(10.5) —	(0.4)
Employee contributions	—	0.3	—	0.3	—	—	
Benefits paid	(16.7) (1.7) (17.1) (1.8) (0.9) (0.9)
Benefit obligation at end of year	\$332.7	\$86.1	\$309.9	\$75.0	\$9.8	\$10.3	
Change in plan assets:							
Fair value of plan assets at beginning of year	\$273.4	\$69.0	\$200.1	\$53.2	\$—	\$—	
Actual return on plan assets	10.0	(3.9) 40.2	8.2	—	—	
Foreign exchange impact	—	(4.9) —	7.4	—	—	
Employer contributions	50.2	13.8	50.2	1.7	0.9	0.9	
Employee contributions	—	0.3	—	0.3	—	—	
Benefits paid	(16.7) (1.7) (17.1) (1.8) (0.9) (0.9)
Fair value of plan assets at end of year	\$316.9	\$72.6	\$273.4	\$69.0	\$—	\$—	
Funded status:							
Under funded status at end of year	\$(15.8) \$(13.5) \$(36.5) \$(6.0) \$(9.8) \$(10.3)

The components of the amounts recognized in the Consolidated Balance Sheets are as follows.

Current liabilities	\$(0.1) \$—	\$(0.1) \$—	\$(1.1) \$(1.1)
Non-current liabilities	\$(15.7) \$(13.5) \$(36.4) \$(6.0) \$(8.7) \$(9.2)

The components of the amounts recognized in accumulated other comprehensive loss before the effect of income taxes are as follows.

Unrecognized net actuarial loss	\$162.8	\$31.3	\$144.9	\$11.6	\$1.6	\$1.7
Unrecognized prior service cost (credit)	\$—	\$—	\$(3.9) \$—	\$0.1	\$0.1
Accumulated other comprehensive loss (income)	\$162.8	\$31.3	\$141.0	\$11.6	\$1.7	\$1.8

The accumulated benefit obligation for the company's domestic pension benefit plans totaled \$332.7 million and \$307.2 million as of the end of fiscal years 2012 and 2011, respectively. For its international plans, these amounts totaled \$83.3 million and \$72.8 million as of the same dates, respectively.

The following table is a summary of the annual cost of the company's pension and post-retirement plans.

Components of Net Periodic Benefit Costs and Other Changes Recognized in Other Comprehensive Income

(In millions)	Pension Benefits			Post-Retirement Benefits		
	2012	2011	2010	2012	2011	2010
Domestic:						
Service cost	\$7.0	\$6.9	\$8.1	\$—	\$—	\$—
Interest cost	14.4	15.1	17.9	0.4	0.5	0.6
Expected return on plan assets	(19.3)	(18.7)	(18.9)	—	—	—
Net amortization	7.2	6.0	3.1	0.1	0.1	0.1
Curtailment (gain)	(1.7)	—	—	—	—	—
Net periodic benefit cost	\$7.6	\$9.3	\$10.2	\$0.5	\$0.6	\$0.7

Components of Net Periodic Benefit Costs and Other Changes Recognized in Other Comprehensive Income

International:						
Service cost	\$1.3	\$1.9	\$—			
Interest cost	3.9	4.3	4.2			
Expected return on plan assets	(4.8)	(4.2)	(4.4)			
Net amortization	0.3	1.2	1.3			
Net periodic benefit cost	\$0.7	\$3.2	\$1.1			

Other Changes in Plan Assets and Benefit Obligations Recognized in Other Comprehensive (Income) Loss

(In millions)	Pension Benefits		Post-Retirement Benefits	
	2012	2011	2012	2011
Domestic:				
Net actuarial (gain) loss	\$27.4	\$(12.5)	\$—	\$(0.3)
Net amortization and curtailment	(5.5)	(6.0)	(0.1)	(0.1)
Total recognized in other comprehensive (income) loss	\$21.9	\$(18.5)	\$(0.1)	\$(0.4)
International:				
Net actuarial (gain) loss	\$21.5	\$(14.5)		
Effect of exchange rates on amounts included in accumulated other comprehensive income	\$(1.5)	\$2.6		
Net amortization	\$(0.3)	\$(1.2)		
Total recognized in other comprehensive (income) loss	\$19.7	\$(13.1)		

The net actuarial loss included in accumulated other comprehensive income (pretax) expected to be recognized in net periodic benefit cost during fiscal 2013 is \$12.9 million.

Actuarial Assumptions

The weighted-average actuarial assumptions used to determine the benefit obligation amounts and the net periodic benefit cost for the company's pension and post-retirement plans are as follows.

The weighted-average used in the determination of net periodic benefit cost:

(Percentages)	2012		2011		2010	
	U.S.	International	U.S.	International	U.S.	International
Discount rate	4.75	5.40	4.75	5.40	5.25	5.50
Compensation increase rate	3.00	3.50	3.00	3.50	4.50	4.90

The weighted-average used in the determination of the projected benefit obligations:

Discount rate	3.57	4.20	5.25	5.50	6.75	6.50
Compensation increase rate	3.00	3.00	4.50	4.90	4.50	4.80
Expected return on plan assets	7.00	7.00	7.75	6.80	7.75	7.25

In calculating post-retirement benefit obligations for fiscal 2012, a 7.5 percent annual rate of increase in the per capita cost of covered healthcare benefits was assumed for 2013, decreasing gradually to 4.5 percent by 2029 and remaining at that level thereafter. For purposes of calculating post-retirement benefit costs, a 7.6 percent annual rate of increase in the per capita cost of covered healthcare benefits was assumed for 2012, decreasing gradually to 4.5 percent by 2029 and remaining at that level thereafter.

Assumed health care cost-trend rates have a significant effect on the amounts reported for retiree health care costs. A one-percentage-point change in the assumed health care cost-trend rates would have the following effects:

(In millions)	1 Percent Increase	1 Percent Decrease
Effect on total fiscal 2012 service and interest cost components	\$—	\$—
Effect on post-retirement benefit obligation at June 2, 2012	\$0.4	\$(0.4)

Plan Assets and Investment Strategies

The company's primary domestic and international employee benefit plans' assets consist mainly of listed common stocks, mutual funds, fixed income obligations and cash. The company's primary objective for invested pension plan assets is to provide for sufficient long-term growth and liquidity to satisfy all of its benefit obligations over time. Accordingly, the company has developed an investment strategy that it believes maximizes the probability of meeting this overall objective. This strategy includes the development of a target investment allocation by asset category in order to provide guidelines for making investment decisions. This target allocation emphasizes the long-term characteristics of individual asset classes as well as the diversification among multiple asset classes. In developing its strategy, the company considered the need to balance the varying risks associated with each asset class with the long-term nature of its benefit obligations. The company's strategy moving forward will be to increase the level of fixed income investments as the funding status improves, thereby more closely matching the return on assets with the liabilities of the plans.

The company utilizes independent investment managers to assist with investment decisions within the overall guidelines of the investment strategy.

The company has assumed an average long-term expected return on defined benefit plan assets of 7.00 percent for both its primary domestic plan and international plan as of June 2, 2012. The expected return is determined by

applying the target allocation in each asset category of plan investments to the anticipated return for each asset category based on historical and projected returns.

-51-

The asset allocation for fiscal 2012 and asset categories for the company's primary pension plans at the end of fiscal 2012 and 2011 are as follows:

Primary Domestic Plan

Asset Category	Targeted Asset Allocation Percentage	Percentage of Plan Assets at Year End	
		2012	2011
Equities	18-22	19	57
Fixed Income	78-82	80	43
Other	0 - 5	1	—
Total		100	100

International Plan

-52-

Cash Flows

Subsequent to the end of fiscal 2012 the company contributed \$3.7 million to its pension plans. The company is reviewing whether any additional voluntary pension plan contributions will be made in the next year. Actual contributions will be dependent upon investment returns, changes in pension obligations, and other economic and regulatory factors. In fiscal 2012 the company made cash contributions totaling \$64.9 million to its benefit plans.

The following represents a summary of the benefits expected to be paid by the plans in future fiscal years. These expected benefits were estimated based on the same actuarial valuation assumptions used to determine benefit obligations at June 2, 2012.

(In millions)	Pension Benefits Domestic	Pension Benefits International	Post-Retirement Benefits
2013	\$28.0	\$1.4	\$1.1
2014	\$28.2	\$1.5	\$1.0
2015	\$27.8	\$1.7	\$1.0
2016	\$27.9	\$1.8	\$0.9
2017	\$21.9	\$1.9	\$0.9
2018 - 2022	\$110.7	\$12.4	\$3.6

Profit Sharing and 401(k) Plan

Herman Miller, Inc. has a trustee profit sharing plan that includes substantially all domestic employees. These employees are eligible to begin participating on their date of hire. The plan provides for discretionary contributions, payable in the company's common stock, of not more than 6 percent of employees' wages based on the company's financial performance. The cost of the profit sharing contribution during fiscal 2012 and fiscal 2011 was \$3.4 million and \$7.7 million, respectively. The company made no profit sharing contribution in fiscal year 2010.

The company has traditionally matched 50.0 percent of employee contributions to their 401(k) accounts up to 6 percent of their pay. The company indefinitely suspended the 401(k) matching program in the fourth quarter of fiscal 2009 and the suspension remained in effect until the second half of fiscal 2011. The company, therefore, did not incur any costs for this program in fiscal 2010. The cost of the company's matching contributions charged against operations was approximately \$6.4 million and \$2.0 million in fiscal years 2012 and 2011, respectively.

8. Common Stock and Per Share Information

The following table reconciles the numerators and denominators used in the calculations of basic and diluted EPS for each of the last three fiscal years.

(In millions, except shares)	2012	2011	2010
Numerators:			
Numerators for basic EPS, net earnings	\$75.2	\$70.8	\$28.3
Income from adjustments to contingent consideration that can be settled in common stock at the company's option, net of tax	—	(9.5) (3.6
Numerator for diluted EPS	\$75.2	\$61.3	\$24.7
Denominators:			
Denominators for basic EPS, weighted-average common shares outstanding	58,171,472	57,118,777	55,997,781

Edgar Filing: MILLER HERMAN INC - Form 10-K

Potentially dilutive shares resulting from stock plans	285,404	556,343	1,492,587
Denominator for diluted EPS	58,456,876	57,675,120	57,490,368

Options to purchase 1,917,060 shares, 2,290,471 shares and 2,777,406 shares of common stock have not been included in the denominator for the computation of diluted earnings per share for the fiscal years ended June 2, 2012, May 28, 2011, and May 29, 2010, respectively, because they were anti-dilutive. The company has certain share-based payment awards that meet the definition of participating securities. The company has evaluated the impact on EPS of all participating securities under the two-class method, noting no impact on EPS.

-53-

9. Stock-Based Compensation

The company utilizes equity-based compensation incentives as a component of its employee and non-employee director and officer compensation philosophy. Currently, these incentives consist principally of stock options, restricted stock, restricted stock units and performance share units. The company also offers a discounted stock purchase plan for its domestic and international employees. The company issues shares in connection with its share-based compensation plans from authorized, but unissued, shares.

Valuation and Expense Information

The company measures the cost of employee services received in exchange for an award of equity instruments based on their grant-date fair market value and to recognize this cost over the requisite service period.

Certain of the company's equity-based compensation awards contain provisions that allow for continued vesting into retirement. Stock-based awards are considered fully vested for expense attribution purposes when the employee's retention of the award is no longer contingent on providing subsequent service.

The company classifies pre-tax stock-based compensation expense primarily within "Operating Expenses" in the Consolidated Statements of Operations. Related expenses charged to "Cost of Sales" are not material. Pre-tax compensation expense and the related income tax benefit for all types of stock-based programs was as follows for the periods indicated:

(in millions)	June 2, 2012	May 28, 2011	May 29, 2010
Employee stock purchase program	\$0.3	\$0.3	\$0.3
Stock option plans	2.8	2.5	2.5
Restricted stock grants	0.5	0.5	0.4
Restricted stock units	2.4	1.5	1.2
Total	\$6.0	\$4.8	\$4.4
Tax benefit	\$2.1	\$1.6	\$1.5

As of June 2, 2012, total pre-tax stock-based compensation cost not yet recognized related to non-vested awards was approximately \$7.1 million. The weighted-average period over which this amount is expected to be recognized is 1.56 years.

The company estimated the fair value of employee stock options on the date of grant using the Black-Scholes model. In determining these values, the following weighted-average assumptions were used for the options granted during the fiscal years indicated.

	2012		2011		2010	
Risk-free interest rates ⁽¹⁾	1.75	%	2.00-2.25%		2.71-2.84%	
Expected term of options ⁽²⁾	5.5	years	5.5	years	5.5	years
Expected volatility ⁽³⁾	42	%	42	%	41	%
Dividend yield ⁽⁴⁾	0.34	%	0.49	%	0.56	%
Weighted-average grant-date fair value of stock options:						
Granted with exercise prices equal to the fair market value of the stock on the date of grant	\$10.15		\$7.01		\$6.24	

(1) Represents the U.S. Treasury yield over the same period as the expected option term.

(2) Represents the period of time that options granted are expected to be outstanding. Based on analysis of historical option exercise activity, the company has determined that all employee groups exhibit similar exercise and post-vesting termination behavior.

(3) Amount is determined based on analysis of historical price volatility of the company's common stock over a period equal to the expected term of the options. The company also utilizes a market-based or "implied volatility" measure, on exchange-traded options in the company's common stock, as a reference in determining this assumption.

(4) Represents the company's estimated cash dividend yield over the expected term of options.

Stock-based compensation expense recognized in the Consolidated Statements of Operations, has been reduced for estimated forfeitures, as it is based on awards ultimately expected to vest. Forfeitures are estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates. Forfeitures were estimated based on historical experience.

Employee Stock Purchase Program

Under the terms of the company's Employee Stock Purchase Plan, 4 million shares of authorized common stock were reserved for purchase by plan participants at 85 percent of the market price.

Stock Option Plans

The company has stock option plans under which options to purchase the company's stock are granted to employees and non-employee directors and officers at a price not less than the market price of the company's common stock on the date of grant. Under the current award program, all options become exercisable between one year and three years from date of grant and expire two to ten years from date of grant. Most options are subject to graded vesting with the related compensation expense recognized on a straight-line basis over the requisite service period. At June 2, 2012, there were 3.0 million shares available for option awards.

The following is a summary of the transactions under the company's stock option plans:

	Shares Under Option	Weighted-Average Exercise Prices	Weighted-Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value (In millions)
Outstanding at May 30, 2009	2,824,212	\$ 26.83	4.9	\$0.2
Granted at market	337,253	\$ 15.76		
Exercised	(10,000)	\$ 20.06		
Forfeited or expired	(372,829)	\$ 25.72		
Outstanding at May 29, 2010	2,778,636	\$ 25.66	4.8	\$ 1.8
Granted at market	463,238	\$ 18.04		
Exercised	(309,251)	\$ 21.28		
Forfeited or expired	(354,033)	\$ 27.09		
Outstanding at May 28, 2011	2,578,590	\$ 24.62	5.5	\$6.6
Granted at market	365,141	\$ 25.75		
Exercised	(215,524)	\$ 19.74		
Forfeited or expired	(398,958)	\$ 25.76		
Outstanding at June 2, 2012	2,329,249	\$ 25.06	5.7	\$0.9
Ending vested + expected to vest	2,305,582	\$ 25.08	5.7	\$0.9
Exercisable at end of period	1,604,406	\$ 26.68	4.5	\$0.6

The total pre-tax intrinsic value of options exercised during fiscal 2012, 2011 and 2010 was \$1.1 million, \$1.6 million, and zero respectively. The aggregate intrinsic value in the preceding table represents the total pre-tax intrinsic value, based on the company's closing stock price as of the end of the period presented, which would have been received by the option holders had all option holders exercised in-the-money options as of that date.

The following is a summary of stock options outstanding at June 2, 2012.

Range of Exercise Price	Outstanding Stock Options			Exercisable Stock Options	
	Shares	Weighted-Average Remaining Contractual Term (Years)	Weighted-Average Exercise Prices	Shares	Weighted-Average Exercise Prices
\$12.33-22.63	783,026	6.2	\$ 17.80	414,294	\$ 18.20
\$23.87-27.99	792,444	7.0	\$ 25.73	436,333	\$ 25.72
\$28.57-38.13	753,779	3.8	\$ 31.89	753,779	\$ 31.89
	2,329,249	5.7	\$ 25.06	1,604,406	\$ 26.68

Restricted Stock Grants

The company periodically grants restricted common stock to certain key employees. Shares are granted in the name of the employee, who has all the rights of a shareholder, subject to certain restrictions on transferability and risk of forfeiture. The grants are subject to either cliff-based or graded vesting over a period not exceeding five years, and are subject to forfeiture if the employee ceases to be employed by the company for certain reasons. After the vesting period, the risk of forfeiture and restrictions on transferability lapse. The company recognizes the related compensation expense on a straight-line basis over the requisite service period. A summary of shares subject to restrictions are as follows:

	2012		2011		2010	
	Shares	Weighted Average Grant-Date Fair Value	Shares	Weighted Average Grant-Date Fair Value	Shares	Weighted Average Grant-Date Fair Value
Outstanding, at beginning of year	70,595	\$18.44	54,729	\$19.48	116,860	\$26.25
Granted	24,323	\$21.46	33,000	\$20.63	42,481	\$15.96
Vested	(7,787)) \$17.56	(15,041)) \$26.79	(104,112)) \$25.69
Forfeited or expired	(3,800)) \$16.44	(2,093)) \$20.26	(500)) \$10.78
Outstanding, at end of year	83,331	\$19.49	70,595	\$18.44	54,729	\$19.48

The weighted-average remaining recognition period of the outstanding restricted shares at June 2, 2012, was 2.45 years. The fair value on the dates of vesting for shares that vested during the twelve months ended June 2, 2012, was \$0.2 million.

Restricted Stock Units

The company grants restricted stock units to certain key employees. This program provides that the actual number of restricted stock units awarded is based on the value of a portion of the participant's long-term incentive compensation divided by the fair value of the company's stock on the date of grant. In some years the awards have been partially tied to the company's financial performance for the year in which the grant was based. The awards generally cliff-vest after a three-year service period, with prorated vesting under certain circumstances and full or partial accelerated vesting upon retirement. Each restricted stock unit represents one equivalent share of the company's common stock to be awarded, free of restrictions, after the vesting period. Compensation expense related to these awards is recognized over the requisite service period, which includes any applicable performance period. Dividend equivalent awards are credited quarterly. The units do not entitle participants the rights of shareholders of common stock, such as voting rights until shares are issued after the vesting period. The following is a summary of restricted stock unit transactions for the fiscal years indicated.

	2012			2011			2010		
	Share Units	Aggregate Intrinsic Value in Millions	Weighted-Average Remaining Contractual Term (Years)	Share Units	Aggregate Intrinsic Value in Millions	Weighted-Average Remaining Contractual Term (Years)	Share Units	Aggregate Intrinsic Value in Millions	Weighted-Average Remaining Contractual Term (Years)
Outstanding, at beginning of year	285,101	\$6.9	1.5	214,406	\$4.0	1.2	147,811	\$2.0	1.7
Granted	125,589			140,357			83,780		
Forfeited	(10,483)			(4,704)			(8,289)		
Released	(78,484)			(64,958)			(8,896)		
Outstanding, at end of year	321,723	\$5.7	1.4	285,101	\$6.9	1.5	214,406	\$4.0	1.2
Ending vested + expected to vest	308,645	\$5.4	1.4	269,679	\$6.6	1.5	201,266	\$3.9	1.2

Performance Share Units

The company has previously granted performance share units to certain key employees, none of which were granted prior to fiscal 2008. The number of units initially awarded was based on the value of a portion of the participant's long-term incentive compensation, divided by the fair value of the company's common stock on the date of grant. Each unit represents one equivalent share of the company's common stock. The number of common shares ultimately issued in connection with these performance share units is determined based on the company's financial performance over the related three-year service period. Compensation expense is determined based on the grant-date fair value and the number of common shares projected to be issued, and is recognized over the requisite service period. The following is a summary of performance share unit transactions for the fiscal years indicated.

	2012			2011			2010		
	Share Units	Aggregate Intrinsic Value in Millions	Weighted-Average Remaining Contractual Term (Years)	Share Units	Aggregate Intrinsic Value in Millions	Weighted-Average Remaining Contractual Term (Years)	Share Units	Aggregate Intrinsic Value in Millions	Weighted-Average Remaining Contractual Term (Years)

Deferred Compensation Plans

In 2008 the company discontinued use of the existing Non-qualified Deferred Compensation Plan for new contributions and established the Herman Miller, Inc. Executive Equalization Retirement Plan.

The Non-qualified Deferred Compensation Plan allowed selected employees to defer part or all of their executive incentive cash bonus payment each year. The company could make a matching contribution of 30 percent of the executive's contribution up to 50 percent of the deferred cash incentive bonus. The company's matching contribution vested at the rate of 33 1/3 percent annually. In accordance with the terms of the plan, the executive deferral and company matching contribution were placed in a "Rabbi" trust, which invested solely in the company's common stock. Rabbi trust arrangements offer the executive a degree of assurance for ultimate payment of benefits without causing constructive receipt for income tax purposes. Distributions to the executive from the Rabbi trust can only be made in the form of the company's common stock. The assets in the Rabbi trust remain subject to the claims of creditors of the company and are not the property of the executive and are, therefore, included as a separate component of stockholders' equity under the caption Key Executive Deferred Compensation. Shares associated with the Non-qualified Deferred Compensation Plan are included in the denominator for both basic and diluted EPS.

The Herman Miller, Inc. Executive Equalization Retirement Plan is a supplemental deferred compensation plan and was made available for salary deferrals and company contributions beginning in January 2008. The plan is available to a select group of management or highly compensated employees who are selected for participation by the Executive Compensation Committee of the Board of Directors. The plan allows participants to defer up to 50 percent of their base salary and up to 100 percent of their incentive cash bonus. Company contributions to the plan "mirror" the amounts the company would have contributed to the various qualified retirement plans had the employee's compensation not been above the IRS statutory ceiling (\$250,000 in 2012). The company does not guarantee a rate of return for these funds. Instead, participants make investment elections for their deferrals and company contributions. Investment options are the same as those available under the Herman Miller Profit Sharing and 401(k) Plan except for company stock which is not an investment option under this plan.

In accordance with the terms of the Executive Equalization Plan, the salary and bonus deferrals and company contributions have been placed in a Rabbi trust. The assets in the Rabbi trust remain subject to the claims of creditors of the company and are not the property of the participant and are, therefore, included as an asset on the company's balance sheet within the other assets line item. A liability of the same amount is recorded on the consolidated balance sheet within the other liabilities line item. Investment assets are classified as trading, and accordingly, realized and unrealized gains and losses are recognized within the company's consolidated statement of operations in the interest and other investment income line item. The associated changes to the liability are recorded as compensation expense within the selling, general and administrative line item within the company's consolidated statement of operations. The net effect of any change to the asset and corresponding liability is offset and has no impact on the statement of operations.

Director Fees

Company directors may elect to receive their director fees in one or more of the following forms: cash, deferred compensation in the form of shares or other selected investment funds, unrestricted company stock at the market value at the date of election, or stock options that vest in one year and expire in ten years. The exercise price of the stock options granted may not be less than the market price of the company's common stock on the date of grant. Under the plan, the Board members received the following shares or options in the fiscal years indicated.

	2012	2011	2010
Options	—	—	8,957
Shares of common stock	18,119	7,464	18,735
Shares through the deferred compensation program	3,301	—	7,148

10. Income Taxes

The components of earnings before income taxes are as follows.

(In millions)	2012	2011	2010
Domestic	\$107.6	\$93.4	\$38.4
Foreign	11.9	9.1	(3.6)
Total	\$119.5	\$102.5	\$34.8

The provision (benefit) for income taxes consists of the following.

(In millions)	2012	2011	2010
Current: Domestic - Federal	\$21.8	\$1.4	\$8.6
Domestic - State	2.0	0.8	0.8
Foreign	6.0	5.7	(0.2)
	29.8	7.9	9.2
Deferred: Domestic - Federal	11.2	26.4	(2.6)
Domestic - State	1.4	1.4	(0.2)
Foreign	1.9	(4.0)	0.1
	14.5	23.8	(2.7)
Total income tax provision	\$44.3	\$31.7	\$6.5

The following table represents a reconciliation of income taxes at the United States statutory rate with the effective tax rate as follows.

(In millions)	2012	2011	2010
Income taxes computed at the United States Statutory rate of 35%	\$41.8	\$35.8	\$12.2
Increase (decrease) in taxes resulting from:			
Change in unrecognized tax benefits	(0.2)	(0.3)	(4.9)
Foreign statutory rate differences	(1.2)	(1.6)	0.4
Manufacturing deduction under the American Jobs Creation Act of 2004	(2.9)	(2.4)	(1.2)
State taxes	3.0	1.8	0.5
Repatriated earnings and related foreign tax credits	(0.2)	(1.3)	—
Other, net	4.0	(0.3)	(0.5)
Income tax expense	\$44.3	\$31.7	\$6.5
Effective tax rate	37.1 %	30.9 %	18.8 %

The company was granted a tax holiday from the Ningbo Economic and Technological Development Commission in China. This agreement provides, starting with the first year of cumulative profits, for the company to be taxed at a reduced rate for five years. The company's Ningbo, China operations started the first year of the tax holiday as of January 1, 2008.

The tax effects and types of temporary differences that give rise to significant components of the deferred tax assets and liabilities at June 2, 2012 and May 28, 2011, are as follows:

(In millions)	2012	2011
Deferred tax assets:		
Compensation-related accruals	\$14.6	\$14.7
Accrued pension and post-retirement benefit obligations	19.1	19.9
Accrued health claims	0.1	—
Reserves for inventory	2.9	2.7
Reserves for uncollectible accounts and notes receivable	1.5	1.6
Other reserves and accruals	3.0	4.0
Warranty	7.4	5.5
State and local tax net operating loss carryforwards	3.7	4.0
Federal net operating loss carryforward	0.2	0.3
State credits	0.7	1.1
Foreign tax net operating loss carryforwards	7.1	8.1
Foreign tax credits	0.1	0.1
Other	4.4	5.8
Subtotal	64.8	67.8
Valuation allowance	(10.3)	(11.6)
Total	\$54.5	\$56.2
Deferred tax liabilities:		
Book basis in property in excess of tax basis	\$(17.3)	\$(19.4)
Intangible assets	(21.0)	(12.8)
Other	(2.1)	(1.1)
Total	\$(40.4)	\$(33.3)

The future tax benefits of net operating loss (NOL) carry-forwards and foreign tax credits are recognized to the extent that realization of these benefits is considered more likely than not. The company bases this determination on the expectation that related operations will be sufficiently profitable or various tax planning strategies will enable the company to utilize the NOL carry-forwards and/or foreign tax credits. To the extent that available evidence about the future raises doubt about the realization of these tax benefits, a valuation allowance is established.

At June 2, 2012, the company had state and local tax NOL carry-forwards of \$58.8 million, the tax benefit of which is \$3.7 million, which have various expiration periods from one to twenty-one years. The company also had state credits with a tax benefit of \$0.7 million that expire in one to four years. For financial statement purposes, the NOL carry-forwards and state tax credits have been recognized as deferred tax assets, subject to a valuation allowance of \$3.2 million.

At June 2, 2012, the company had a federal NOL carry-forward of \$0.6 million, the tax benefit of which is \$0.2 million, which expires in 16 years. For financial statement purposes, the NOL carry-forward has been recognized as a deferred tax asset.

At June 2, 2012, the company had foreign net operating loss carry-forwards of \$26.4 million, the tax benefit of which is \$7.1 million, which have expiration periods from one year to an unlimited term. The company also had foreign tax credits with a tax benefit of \$0.1 million which expire in four to eight years. For financial statement purposes, NOL carry-forwards and foreign tax credits have been recognized as deferred tax assets, subject to a valuation allowance of \$6.0 million.

At June 2, 2012, the company had a foreign deferred asset related to financing costs of \$4.4 million, the tax benefit of which is \$1.1 million. For financial statement purposes, the asset has been recognized as a deferred tax asset, subject to a valuation allowance of \$1.1 million.

The company has not provided for United States income taxes on undistributed earnings of foreign subsidiaries totaling approximately \$46.7 million. Recording deferred income taxes on these undistributed earnings is not required, because these earnings have been deemed to be permanently reinvested. these amounts would be subject to possible U.S. taxation only if remitted as dividends. The determination of the hypothetical amount of unrecognized deferred U.S. taxes on undistributed earnings of foreign entities is not practicable.

-60-

The components of the company's unrecognized tax benefits are as follows:

(In millions)	
Balance at May 29, 2010	\$2.1
Increases related to current year income tax positions	0.2
Increases related to prior year income tax positions	0.2
Decreases related to prior year income tax positions	(0.6)
Decreases related to settlements	(0.3)
Balance at May 28, 2011	1.6
Increases related to current year income tax positions	0.2
Increases related to prior year income tax positions	—
Decreases related to prior year income tax positions	(0.3)
Decreases related to settlements	(0.2)
Balance at June 2, 2012	\$1.3

The company's effective tax rate would have been affected by the unrecognized tax benefits had this amount been recognized as a reduction to income tax expense.

The company recognizes interest and penalties related to unrecognized tax benefits through income tax expense in its Consolidated Statement of Operations. Interest and penalties and the related liability were as follows for the periods indicated:

(In millions)	June 2, 2012	May 28, 2011	May 29, 2010
Interest and penalty expense (income)	\$—	\$(0.2)	\$(0.3)
Liability for Interest and penalties	\$0.5	\$0.5	

The company is subject to periodic audits by domestic and foreign tax authorities. Currently, the company is undergoing routine periodic audits in both domestic and foreign tax jurisdictions. It is reasonably possible that the amounts of unrecognized tax benefits could change in the next 12 months as a result of new positions that may be taken on income tax returns, settlement of tax positions and the closing of statutes of limitation. It is not expected that any of the changes will be material to the company's Consolidated Statement of Operations.

During the year, the company has closed the audit of fiscal year 2011 with the Internal Revenue Service under the Compliance Assurance Process (CAP). For the majority of the remaining tax jurisdictions, the company is no longer subject to state and local, or non-U.S. income tax examinations by tax authorities for fiscal years before 2009.

11. Fair Value of Financial Instruments

The company's financial instruments consist of cash equivalents, marketable securities, accounts and notes receivable, deferred compensation plan, accounts payable, debt and foreign currency exchange contracts. The company's estimates of fair value for financial instruments, other than marketable securities, approximate their carrying amounts as of June 2, 2012 and May 28, 2011. The carrying value and fair value of the company's long-term debt, including current maturities, was as follows for the periods indicated:

(In millions)	June 2, 2012	May 28, 2011
Carrying value	\$250.0	\$250.0
Fair value	\$278.5	\$270.5

The following describes the methods the company uses to estimate the fair value of financial assets and liabilities, of which there have been no significant changes in the current period:

Available-for-sale securities — The company's available-for-sale marketable securities primarily include asset-backed debt securities and corporate debt securities and are valued using quoted prices for similar securities.

-61-

Foreign currency exchange contracts — The company's foreign currency exchange contracts are valued using an approach based on foreign currency exchange rates obtained from active markets. The estimated fair value of forward currency exchange contracts is based on month-end spot rates as adjusted by market-based current activity.

Deferred compensation plan assets — The company's deferred compensation plan assets primarily include domestic equity large cap and lifestyle mutual funds and are valued using quoted prices for similar securities.

The following tables set forth financial assets and liabilities measured at fair value in the Condensed Consolidated Balance Sheets and the respective pricing levels to which the fair value measurements are classified within the fair value hierarchy as of June 2, 2012 and May 28, 2011:

(In millions)	Fair Value Measurements	
	June 2, 2012	May 28, 2011
	Quoted Prices With Other Observable Inputs (Level 2)	Quoted Prices With Other Observable Inputs (Level 2)
Financial Assets		
Available-for-sale marketable securities:		
Asset-backed securities	\$0.2	\$2.3
Corporate debt securities	2.7	3.6
Government obligations	3.2	1.1
Mortgage-backed securities	3.5	4.0
Foreign currency forward contracts	0.1	0.7
Deferred compensation plan	3.5	2.6
Total	\$13.2	\$14.3
Financial Liabilities		
Foreign currency forward contracts	\$—	\$0.3
Total	\$—	\$0.3

The following is a summary of the carrying and market values of the company's marketable securities as of the dates indicated.

(In millions)	June 2, 2012			
	Cost	Unrealized Gain	Unrealized Loss	Market Value
Asset-backed securities	\$0.2	\$—	\$—	\$0.2
Corporate debt securities	2.7	—	—	2.7
Government obligations	3.4	0.1	—	3.5
Mortgage-backed securities	3.2	—	—	3.2
Total	\$9.5	\$0.1	\$—	\$9.6
(In millions)	May 28, 2011			
	Cost	Unrealized Gain	Unrealized Loss	Market Value
Asset-backed securities	\$2.3	\$—	\$—	\$2.3
Corporate debt securities	3.6	—	—	3.6
Government obligations	1.1	—	—	1.1
Mortgage-backed securities	3.9	0.1	—	4.0
Total	\$10.9	\$0.1	\$—	\$11.0

The company does not hold any Level 3 financial instruments.

-62-

Maturities of debt securities included in marketable securities as of June 2, 2012, are as follows:

(In millions)	Cost	Market Value
Due within one year	\$1.5	\$1.5
Due after one year through five years	8.0	8.1
Due after five years through ten years	—	—
Total	\$9.5	\$9.6

There were no investments in unrealized loss positions as of June 2, 2012.

12. Supplemental Disclosures of Cash Flow Information

The following table presents the adjustments to reconcile net earnings to net cash provided by operating activities.

(In millions)	2012	2011	2010
Depreciation expense	\$34.4	\$36.2	\$39.7
Amortization expense	2.8	2.9	2.9
Provision for losses on accounts receivable and notes receivable	1.6	0.1	5.5
Provision for (gain) loss on financial guarantees	—	—	0.2

13. Warranties, Guarantees, and Contingencies

Product Warranties

The company provides warranty coverage to the end-user for parts and labor on products sold. The standard length of warranty is 12 years, however, this varies depending on the product classification. The company does not sell or

otherwise issue warranties or warranty extensions as stand-alone products. Reserves have been established for various costs associated with the company's warranty program. General warranty reserves are based on historical claims experience and other currently available information and are periodically adjusted for business levels

-63-

and other factors. Specific reserves are established once an issue is identified with the amounts for such reserves based on the estimated cost of correction. Changes in the warranty reserve for the stated periods were as follows:

(In millions)	2012	2011
Accrual balance, beginning	\$17.0	\$16.0
Accrual for warranty matters	27.8	14.5
Settlements and adjustments	(22.6) (13.5
Accrual balance, ending	\$22.2	\$17.0

Other Guarantees

The company is periodically required to provide performance bonds in order to conduct business with certain customers. These arrangements are common and generally have terms ranging between one and three years. The bonds are required to provide assurances to customers that the products and services they have purchased will be installed and/or provided properly and without damage to their facilities. The performance bonds are provided by various bonding agencies and the company is ultimately liable for claims that may occur against them. As of June 2, 2012, the company had a maximum financial exposure related to performance bonds of approximately \$12.1 million. The company has no history of claims, nor is it aware of circumstances that would require it to perform under any of these arrangements and believes that the resolution of any claims that might arise in the future, either individually or in the aggregate, would not materially affect the company's financial statements. Accordingly, no liability has been recorded as of June 2, 2012 and May 28, 2011.

The company periodically enters into agreements in the normal course of business that may include indemnification clauses regarding patent/trademark infringement and service losses. Service losses represent all direct or consequential loss, liability, damages, costs and expenses incurred by the customer or others resulting from services rendered by the company, the dealer, or certain sub-contractors due to a proven negligent act. The company has no history of claims, nor is it aware of circumstances that would require it to perform under these arrangements and believes that the resolution of any claims that might arise in the future, either individually or in the aggregate, would not materially affect the company's financial statements. Accordingly, no liability has been recorded as of June 2, 2012 and May 28, 2011.

The company has entered into standby letter of credit arrangements for the purpose of protecting various insurance companies against default on the payment of certain premiums and claims. A majority of these arrangements are related to the company's wholly-owned captive insurance company. As of June 2, 2012, the company had a maximum financial exposure from these insurance-related standby letters of credit of approximately \$9.7 million. The company has no history of claims, nor is it aware of circumstances that would require it to perform under any of these arrangements and believes that the resolution of any claims that might arise in the future, either individually or in the aggregate, would not materially affect the company's financial statements. Accordingly, no liability has been recorded as of June 2, 2012 and May 28, 2011.

Contingencies

The company leases a facility in the United Kingdom under an agreement that expired in June 2011, and the company is currently leasing the facility on a month to month basis. Under the terms of the lease, the company is required to perform the maintenance and repairs necessary to address the general dilapidation of the facility over the lease term. The ultimate cost of this provision to the company is dependent on a number of factors including, but not limited to, the future use of the facility by the lessor and whether the company chooses and is permitted to renew the lease term. The company has estimated the cost of these maintenance and repairs to be between \$0 and \$3 million, depending on the outcome of future plans and negotiations. Based on existing circumstances, it is estimated that these costs will most likely approximate \$1.2 million, as of June 2, 2012, and was estimated to be \$1.3 million as of May 28, 2011. As a result, these amounts have been recorded as a liability reflected under the caption "Accrued Liabilities" and "Other

Liabilities" for fiscal 2012 and fiscal 2011, respectively in the Consolidated Balance Sheets.

The company has a lease obligation in the U.K. until May 2014 for a facility that it has exited. Current market rates for comparable office space are lower than the rental payments owed under the lease agreement, as such, the company would remain liable to pay the difference if it were subleased. As a result, the estimated liability of \$1.1 million and \$1.7 million is reflected under the caption "Other Liabilities" in the Condensed Consolidated Balance Sheets at June 2, 2012 and May 28, 2011, respectively.

The company is also involved in legal proceedings and litigation arising in the ordinary course of business. In the opinion of management, the outcome of such proceedings and litigation currently pending will not materially affect the company's Consolidated Financial Statements.

14. Operating Segments

During the first quarter of fiscal 2012, the company undertook an organizational realignment whereby products sold related to the consumer retail business, the Herman Miller Collection, and Geiger became the responsibility of one segment manager reporting to the chief operating decision maker. The realignment of these businesses has resulted in a new Specialty and Consumer segment. As a result, the reportable segments now consist of North American Furniture Solutions, Non-North American Furniture Solutions, and Specialty and Consumer. Prior year results have been revised to reflect this change.

The North American Furniture Solutions reportable segment includes the operations associated with the design, manufacture, and sale of furniture products for work-related settings, including office, education, and healthcare environments, throughout the United States and Canada. The North American Furniture Solutions reportable segment is the aggregation of two operating segments in accordance with ASC 280-10-50-10 through 11. In addition, the company has determined that both operating segments within the North American Furniture Solutions reportable segment each represent reporting units.

The Non-North American Furniture Solutions reportable segment includes the operations associated with the design, manufacture, and sale of furniture products, primarily for work-related settings for Mexico and outside of North America.

The Specialty and Consumer reportable segment includes the operations associated with the design, manufacture, and sale of high-end furniture products including Geiger wood products, Herman Miller Collection products and the North American consumer retail business.

The company also reports a "Corporate" category consisting primarily of startup business and unallocated corporate expenses including restructuring and impairment expenses.

The performance of the operating segments is evaluated by the company's management using various financial measures. The following is a summary of certain key financial measures for the respective fiscal years indicated:

Edgar Filing: MILLER HERMAN INC - Form 10-K

(In millions)	2012	2011	2010
Net Sales:			
North American Furniture Solutions	\$1,218.5	\$1,224.8	\$989.7
Non-North American Furniture Solutions	347.3	290.4	222.7
Specialty and Consumer	158.3	134.0	105.9
Corporate	—	—	0.5
Total	\$1,724.1	\$1,649.2	\$1,318.8
Depreciation and Amortization:			
North American Furniture Solutions	\$31.7	\$34.2	\$36.2
Non-North American Furniture Solutions	3.7	3.1	2.8
Specialty and Consumer	1.8	1.8	2.1
Corporate	—	—	1.5
Total	\$37.2	\$39.1	\$42.6
Operating Earnings (Losses):			
North American Furniture Solutions	\$96.9	\$99.4	\$75.8
Non-North American Furniture Solutions	32.1	18.8	(0.2)
Specialty and Consumer	15.1	10.7	5.5
Corporate	(6.5)	(5.6)	(27.5)
Total	\$137.6	\$123.3	\$53.6
Capital Expenditures:			
North American Furniture Solutions	\$20.3	\$25.9	\$20.6
Non-North American Furniture Solutions	3.3	4.4	0.8
Specialty and Consumer	4.9	0.2	0.9
Corporate	—	—	—
Total	\$28.5	\$30.5	\$22.3
Total Assets:			
North American Furniture Solutions	\$578.5	\$612.5	\$602.5
Non-North American Furniture Solutions	202.4	142.5	125.6
Specialty and Consumer	56.5	53.0	41.9
Corporate	—	—	0.6
Total	\$837.4	\$808.0	\$770.6
Goodwill:			
North American Furniture Solutions	\$104.9	\$104.3	\$104.4
Non-North American Furniture Solutions	38.8	6.1	5.0
Specialty and Consumer ⁽¹⁾	1.0	—	—
Corporate	—	—	—
Total	\$144.7	\$110.4	\$109.4

(1) In the first quarter of fiscal 2012, the company changed its reportable segments as noted above. As a result of the 2012 change in reportable segments, goodwill was reclassified from North America to Specialty and Consumer based on a relative fair value analysis.

The accounting policies of the reportable operating segments are the same as those of the company. Additionally, the company employs a methodology for allocating corporate costs and assets with the underlying objective of this

methodology being to allocate corporate costs according to the relative usage of the underlying resources and to allocate corporate assets according to the relative expected benefit. The company has determined that allocation based on relative net sales is most appropriate for all expenses. The majority of corporate costs are allocated to the operating segments; however, certain costs generally considered the result of isolated business decisions are not subject to allocation and are evaluated separately from the rest of the regular ongoing business operations. For example, restructuring and impairment expenses that are reflected in operating earnings are allocated to the "Corporate" category.

The restructuring and asset impairment charges of \$5.4 million, \$3.0 million, and \$16.7 million in fiscal 2012, fiscal 2011 and fiscal 2010, respectively are discussed in Note 15 of the Consolidated Financial Statements and were allocated to the "Corporate" category.

-66-

The company's product offerings consist primarily of office furniture systems, seating, freestanding furniture, storage and casegoods. These product offerings are marketed, distributed, and managed primarily as a group of similar products on an overall portfolio basis. The following is a summary of net sales by product category for the respective fiscal years indicated. Given that formal product line information is not available for the company as a whole, this summary is intended to represent a reasonable estimate of net sales by product category based on the best information available.

(In millions)	2012	2011	2010
Net Sales:			
Systems	\$474.4	\$482.0	\$384.1
Seating	630.5	454.0	381.5
Freestanding and storage	395.2	461.5	367.8
Other ⁽¹⁾	224.0	251.7	185.4
Total	\$1,724.1	\$1,649.2	\$1,318.8

(1) "Other" primarily consists of miscellaneous or otherwise uncategorized product sales and service sales.

Sales by geographic area are based on the location of the customer. Long-lived assets consist of long-term assets of the company, excluding financial instruments, deferred tax assets, and long-term intangibles. The following is a summary of geographic information for the respective fiscal years indicated. Individual foreign country information is not provided as none of the individual foreign countries in which the company operates are considered material for separate disclosure based on quantitative and qualitative considerations.

(In millions)	2012	2011	2010
Net Sales:			
United States	\$1,271.9	\$1,265.9	\$1,028.7
International	452.2	383.3	290.1
Total	\$1,724.1	\$1,649.2	\$1,318.8

(In millions)	2012	2011	2010
Long-lived assets:			
United States	\$146.4	\$151.6	\$159.7
International	18.1	24.0	21.6
Total	\$164.5	\$175.6	\$181.3

It is estimated that no single dealer accounted for more than 4 percent of the company's net sales in the fiscal year ended June 2, 2012. It is also estimated that the largest single end-user customer, the U.S. federal government, accounted for approximately \$164 million or 9.5 percent of the company's fiscal 2012 net sales within the North American Furniture Solutions reportable segment. The 10 largest customers accounted for approximately 22 percent of net sales.

Approximately 8 percent of the company's employees are covered by collective bargaining agreements, most of whom are employees of its Nemschoff, and Herman Miller Limited (U.K.) subsidiaries.

15. Restructuring Charges

Manufacturing Consolidation Plan

In May and June 2009, the company announced a plan ("the Manufacturing Consolidation Plan") to consolidate manufacturing operations with the closure of its Integrated Metal Technologies (IMT) subsidiary in Spring Lake, Michigan and Brandrud facility in Auburn, Washington. Under this plan for the IMT closure, the company retained existing West Michigan production capacity and enhanced operational efficiency, with the majority of work and equipment move to other newer, larger facilities in the area. Relocation began during the first quarter of fiscal 2010, with final closure completed in the fourth quarter of fiscal 2010. For the Brandrud closure, the company further consolidated manufacturing operations with the transfer of substantially all of the manufacturing capabilities of Brandrud to its Nemschoff manufacturing plants. The Plan was completed during fiscal 2012.

2010 Plan

During the fourth quarter of fiscal 2010, the company executed a restructuring plan ("the 2010 Plan") that reduced operating expenses in order to improve operating performance, profitability and further enhance productivity. This Plan reduced our salaried workforce, primarily in North America, by approximately 70 employees. The Plan was completed during fiscal 2012.

2012 Plan

In May 2012, the company announced a plan ("The 2012 Plan") to consolidate the Nemschoff manufacturing operations in Sheboygan, Wisconsin with the closure of the Sioux City, Iowa seating plant. The 2012 plan also includes the consolidation of the Sheboygan manufacturing sites into one location. This plan will reduce fixed costs and operating expenses in order to improve operating performance, profitability and further enhance productivity. This Plan will reduce our workforce in North America, by approximately 70 employees. The company anticipates it will incur an additional \$1.5 million in restructuring expense during future periods for the 2012 Plan.

The following is a summary of changes in restructuring accruals during fiscal 2010, fiscal 2011 and fiscal 2012 for the Manufacturing Consolidation Plan, the 2010 Plan and the 2012 Plan.

Manufacturing Consolidation Plan

(In millions)	Total Plan Costs	Severance and Outplacement Costs	Leased Building Exit Costs
Balance as of May 30, 2009	\$—	\$—	\$—

Balance as of May 28, 2011	\$—	\$—	\$—
Restructuring and impairment expenses	1.6	0.2	1.4
Cash payments	(0.1) —	(0.1
Adjustments	(1.3) —	(1.3
Balance as of June 2, 2012	\$0.2	\$0.2	\$—

In addition to the restructuring expenses noted above, the company recorded an impairment of certain assets for fiscal 2010 and fiscal 2012 totaling \$2.5 million and \$3.8 million, respectively. These assets were related to products and trade names that we determined had no future revenue stream to the company.

These charges have been reflected separately as restructuring expenses in the Consolidated Statements of Operations. Refer to Note 14 of the Consolidated Financial Statements for a discussion of the Plan's impact on the company's reportable operating segments.

16. Quarterly Financial Data (Unaudited)

Set forth below is a summary of the quarterly operating results on a consolidated basis for the years ended June 2, 2012, May 28, 2011, and May 29, 2010.

(In millions, except per share data)		First Quarter	Second Quarter	Third Quarter	Fourth Quarter

(1) The sum of the quarters does not equal the annual balance reflected in the Consolidated Statements of Operations due to rounding associated with the calculations on an individual quarter basis.

Management's Report on Internal Control over Financial Reporting

To the Board of Directors and Stockholders of Herman Miller, Inc.

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as defined in Exchange Act Rule 13a-15(f). The internal control over financial reporting at Herman Miller, Inc., is designed to provide reasonable assurance to our stakeholders that the financial statements of the company fairly represent its financial condition and results of operations.

Under the supervision and with the participation of management, including our Chief Executive Officer and Chief Financial Officer, we conducted an assessment of the effectiveness of our internal control over financial reporting as of June 2, 2012, based on the framework in Internal Control — Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this assessment, our management believes the company's internal control over financial reporting was effective as of June 2, 2012.

Ernst & Young LLP has issued an attestation report on the effectiveness of our internal control over financial reporting, which appears on page 72.

Report of Independent Registered Public Accounting Firm on Internal Control over Financial Reporting

To the Board of Directors and Stockholders of Herman Miller, Inc.

We have audited Herman Miller Inc.'s internal control over financial reporting as of June 2, 2012, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). Herman Miller, Inc.'s management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Herman Miller, Inc. maintained, in all material respects, effective internal control over financial reporting as of June 2, 2012, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the fiscal 2012 consolidated financial statements of Herman Miller, Inc., and our report dated July 31, 2012 expressed an unqualified opinion thereon.

/s/ Ernst & Young LLP
Grand Rapids, Michigan
July 31, 2012

Report of Independent Registered Public Accounting Firm on Financial Statements

To the Board of Directors and Stockholders of Herman Miller, Inc.

We have audited the accompanying consolidated balance sheets of Herman Miller, Inc. as of June 2, 2012 and May 28, 2011, and the related consolidated statements of operations, stockholders' equity and cash flows for each of the three fiscal years in the period ended June 2, 2012. These financial statements are the responsibility of the company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Herman Miller, Inc. at June 2, 2012 and May 28, 2011, and the consolidated results of their operations and their cash flows for each of the three fiscal years in the period ended June 2, 2012, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Herman Miller, Inc.'s internal control over financial reporting as of June 2, 2012, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated July 31, 2012 expressed an unqualified opinion thereon.

Item 9 CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURES

As defined in Item 304 of Regulation S-K, there have been no changes in, or disagreements with, accountants during the 24-month period ended June 2, 2012.

Item 9A CONTROLS AND PROCEDURES

(a) Disclosure Controls and Procedures. Under the supervision and with the participation of management, the company's Chief Executive Officer and Chief Financial Officer have evaluated the effectiveness of the company's disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) as of June 2, 2012, and have concluded that as of that date, the company's disclosure controls and procedures were effective.

(b) Management's Annual Report on Internal Control Over Financial Reporting and Attestation Report of the Independent Registered Public Accounting Firm. Refer to Item 8 for "Management's Report on Internal Control Over Financial Reporting." The effectiveness of the company's internal control over financial reporting has been audited by Ernst and Young LLP, and independent registered accounting firm, as stated in its report included in Item 8.

(c) Changes in Internal Control Over Financial Reporting. There were no changes in the company's internal control over financial reporting during the fourth quarter ended June 2, 2012, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Item 9B OTHER INFORMATION - None

PART III

Item 10 DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

Directors, Executive Officers, Promoters and Control Persons

Information relating to directors and director nominees of the registrant is contained under the caption “Director and Executive Officer Information” in the company's definitive Proxy Statement, relating to the company's 2012 Annual Meeting of Stockholders, and the information within that section is incorporated by reference. Information relating to Executive Officers of the company is included in Part I hereof entitled “Executive Officers of the Registrant.”

Compliance with Section 16(a) of the Exchange Act

Information relating to compliance with Section 16(a) of the Exchange Act is contained under the caption “Section 16(a) Beneficial Ownership Reporting Compliance” in the company's definitive Proxy Statement, relating to the company's 2012 Annual Meeting of Stockholders, and the information within that section is incorporated by reference.

Code of Ethics

The company has adopted a Code of Conduct that serves as the code of ethics for the executive officers and senior financial officers and as the code of business conduct for all directors and employees of the registrant. This code is made available free of charge through the “Investors” section of the company's internet website at www.hermanmiller.com. Any amendments to, or waivers from, a provision of this code also will be posted to the company's internet website.

Corporate Governance

Information relating to the identification of the audit committee, audit committee financial expert, and director nomination procedures of the registrant is contained under the captions “Board Committees” and “Corporate Governance and Board Matters — Director Nominations” in the company's definitive Proxy Statement, relating to the company's 2012 Annual Meeting of Stockholders, and the information within these sections is incorporated by reference.

Item 11 EXECUTIVE COMPENSATION

Information relating to management remuneration is contained under the captions “Compensation Discussion and Analysis,” “Summary Compensation Table,” “Grants of Plan-Based Awards,” “Outstanding Equity Awards at Fiscal Year-End,” “Option Exercises and Stock Vested,” “Pension Benefits,” “Nonqualified Deferred Compensation,” “Potential Payments Upon Termination, Death, Disability, Retirement or Change in Control,” “Director Compensation,” “Director Compensation Table,” and “Compensation Committee Interlocks and Insider Participation” in the company's definitive Proxy Statement, relating to the company's 2012 Annual Meeting of Stockholders, and the information within these sections is incorporated by reference. The information under the caption “Compensation Committee Report” is incorporated by reference, however, such information is not deemed filed with the Commission.

Item 12 SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

The sections entitled “Voting Securities and Principal Stockholders,” “Director and Executive Officer Information,” and “Equity Compensation Plan Information” in the definitive Proxy Statement, relating to the company's 2012 Annual

Meeting of Stockholders, and the information within these sections is incorporated by reference.

Item 13 CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

Information concerning certain relationships and related transactions contained under the captions “Related Person Transactions,” and “Corporate Governance and Board Matters — Determination of Independence of Board Members” in the definitive Proxy Statement, relating to the company's 2012 Annual Meeting of Stockholders and the information within these sections is incorporated by reference.

Report of Independent Registered Public Accounting Firm on Financial Statement Schedule

To the Board of Directors and Stockholders of Herman Miller, Inc.

We have audited the consolidated financial statements of Herman Miller, Inc. and subsidiaries as of June 2, 2012 and May 28, 2011, and for each of the three fiscal years in the period ended June 2, 2012, and have issued our report thereon dated July 31, 2012 (included elsewhere in this Form 10-K). Our audits also included the financial statement schedule listed in Item 15(a) of this Form 10-K. This schedule is the responsibility of the company's management. Our responsibility is to express an opinion based on our audits.

In our opinion, the financial statement schedule referred to above, when considered in relation to the basic financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

/s/ Ernst & Young LLP

Grand Rapids, Michigan
