BHP BILLITON PRODUCTION REPORT FOR THE NINE MONTHS ENDED 31 MARCH 2008

Number 14/08

BHP Billiton today released its production report for the nine months ended 31 March 2008. Throughout this report, unless otherwise stated, production volumes refer to BHP Billiton share and exclude suspended and sold operations.

- Year to date production increased for 12 commodities reflecting our strong track record of consistent growth on the back of projects delivered from our deep inventory of projects. First product was delivered from eight projects into commodity markets that remain strong.
- Significant increase in petroleum production with continuing ramp up of recently commissioned projects and strong facility and reservoir performance offsetting natural field decline. On track to deliver 10% volume growth for the 2008 financial year.
- Western Australia iron ore operations (Australia) achieved record quarterly and year to date production and shipments during a seasonally challenging quarter.
- Record year to date manganese ore and alloy production delivered in a strong price environment. Manganese ore also achieved quarterly production record. This was set despite restrictions on power consumption in South Africa.
- Record year to date copper production achieved as newly commissioned projects continue to ramp up in a period of strong pricing.
- The Yabulu Expansion Project (Australia) achieved first production during the guarter.

- Record year to date production of natural gas and alumina.
- Year to date production records achieved at the Worsley, Western Australia Iron Ore, GEMCO, TEMCO, Illawarra Coal, and Hunter Valley Coal (all Australia), Escondida (Chile), Paranam (Suriname), Alumar and Samarco (both Brazil), Samancor (South Africa) and Cerrejon Coal (Colombia) operations.
- Metallurgical coal production in Queensland (Australia) and nickel production at Cerro Matoso (Colombia) has resumed following extreme weather conditions and industrial action respectively. Ramp up to normal operating levels continuing.
- Southern Africa aluminium production was impacted by a mandatory 10 per cent reduction. in power consumption.

	MAR	MAR	MAR YTD 08	MAR Q08	MAR Q08
	2008	2008	VS	vs	vs
PETROLEUM	YTD	QTR	MAR YTD 07	MAR Q07	DEC Q07
Crude Oil, Condensate and Natural Gas Liquids ('000 bbl) (a)	47,837	18,441	13%	39%	23%
Natural Gas (bcf) (a)	272.65	85.75	6%	1%	-6%
Total Petroleum Products (million boe) (a)	93.27	32.73	10%	19%	8%

Total Petroleum Products -

Significant growth in production was mainly driven by the continued ramp up of Stybarrow (Australia), Genghis Khan and Atlantis (both USA) and excellent operated facility performance.

Crude Oil, Condensate and Natural Gas Liquids -

Production was higher than all comparative periods due to significant growth in high margin crude production. Continued ramp up of new projects and successful development drilling had a very positive impact. Partially offsetting this was the impact of natural field decline, unplanned interruption at North West Shelf (Australia) and the impact of cyclone activities in Western Australia.

Natural Gas -

Production was lower than the December 2007 quarter due to expected lower seasonal gas demand in southeast Australia and unplanned interruption at North West Shelf.

MAR	MAR	MAR YTD 08	MAR Q08	MAR Q08
WIAK	MAK	11000	Quo	Quo

Edgar Filing: BHP BILLITON LTD - Form 6-K

	2008	2008	vs	VS	vs
ALUMINIUM	YTD	QTR	MAR YTD 07	MAR Q07	DEC Q07
Alumina ('000 tonnes)	3,405	1,095	3%	1%	-5%
Aluminium ('000 tonnes)	993	318	-1%	-4%	-6%

Alumina -

Production and sales for the nine months ended March 2008 were all time records due to record performance from all operations.

Production was marginally lower than the December 2007 quarter. This primarily reflects reduced production at Worsley due to gas supply curtailments.

Aluminium

- Production was impacted by the mandatory 10 per cent reduction in power consumption across the Southern Africa smelters. This was in part offset by equalled quarterly and year to date record production from Alumar.

	MAR	MAR	MAR YTD 08	MAR Q08	MAR Q08
	2008	2008	VS	vs	vs
BASE METALS	YTD	QTR	MAR YTD 07	MAR Q07	DEC Q07
Copper ('000 tonnes)	984.8	328.9	8%	-8%	-6%
Lead (tonnes)	199,950	67,885	34%	7%	-4%
Zinc (tonnes)	101,036	35,970	27%	1%	29%
Silver ('000 ounces)	34,251	11,221	37%	2%	-6%
Uranium Oxide Concentrate (Uranium) (tonnes)	3,117	993	25%	12%	-17%

Copper -

Year to date production record was set with the continued ramp up of Escondida Sulphide Leach and Spence (both Chile) and Pinto Valley (USA). In aggregate, these projects contributed 166,000 tonnes during the nine months ended March 2008. This was achieved despite the impact of two earthquakes in Chile in the December 2007 quarter, and lower production from Antamina (Peru) and Olympic Dam (Australia).

Production was lower than the March 2007 and December 2007 quarters mainly due to lower grade and recovery from Escondida and unplanned interruptions at Olympic Dam.

Lead -

Year to date production increased due to the completion of the Cannington (Australia) rehabilitation project.

Zinc -

Production was higher than the nine months ended March 2007 and the December 2007 quarter due to higher grade and an increased proportion of zinc containing ore being processed at Antamina. The completion of the Cannington rehabilitation project also had a positive impact on the production for the nine months ended March 2008.

Silver -

Production for the nine months ended March 2008 improved significantly due to the successful completion of the Cannington rehabilitation project and record performance from Escondida and Antamina.

Uranium -

Production was higher than the nine months and quarter ended March 2007 due to ongoing progress at improving recovery and leach circuit performance at Olympic Dam.

Production was lower than the December 2007 quarter mainly due to decline in grade and scheduled maintenance.

	MAR	MAR	MAR YTD 08	MAR Q08	MAR Q08
	2008	2008	VS	vs	vs
DIAMONDS & SPECIALTY PRODUCTS	YTD	QTR	MAR YTD 07	MAR Q07	DEC Q07
Diamonds ('000 carats)	2,485	620	7%	-30%	-26%

Diamonds -

Production decreased versus the March 2007 and December 2007 quarters mainly due to lower grades. Although production was lower, it included an increased proportion of higher value carats. As Ekati (Canada) transitions from open pit mining to underground mining the mix of ore processed will change from time to time.

	MAR	MAR	MAR YTD 08	MAR Q08	MAR Q08
	2008	2008	VS	vs	vs
STAINLESS STEEL MATERIALS	YTD	QTR	MAR YTD 07	MAR Q07	DEC Q07
	125.3	43.0	-10%	-6%	-2%

Nickel

- Production in the nine months ended March 2008 was impacted by the industrial stoppage at Cerro Matoso, wet weather interruptions at Yabulu (Australia) and scheduled maintenance across all operations. This was partially offset by continued strong production from the Kwinana Nickel Refinery (Australia), which performed at near record levels.

The Yabulu Expansion Project delivered first production during the quarter, and the Ravensthorpe Nickel Operation (Australia) ramp up continues to progress in line with schedule.

	MAR	MAR	MAR YTD 08	MAR Q08	MAR Q08
	2008	2008	VS	vs	vs
IRON ORE	YTD	QTR	MAR YTD 07	MAR Q07	DEC Q07
Iron ore ('000 tonnes) (c)	81,646	28,033	13%	22%	1%

Iron Ore -

Record production and shipments were achieved for the nine months and quarter ended March 2008. Western Australia Iron Ore continued to perform strongly and set new year to date and quarterly production records. Samarco also set a year to date production record.

	MAR	MAR	MAR YTD 08	MAR Q08	MAR Q08
	2008	2008	VS	vs	vs
MANGANESE	YTD	QTR	MAR YTD 07	MAR Q07	DEC Q07
Manganese Ore ('000 tonnes)	4,724	1,666	5%	15%	3%
Manganese Alloy ('000 tonnes)	585	192	7%	-2%	-8%

Manganese Ore -

Record year to date and quarterly production achieved due to record or near record performance from all operations. This was achieved despite a mandatory 10% reduction in power consumption for the South African sinter plant and weather related interruptions at GEMCO.

Manganese Alloy -

Year to date production increased due to improved facility availability and utilisation at Samancor achieved in the December 2007 quarter and record performance from TEMCO.

Production for the March 2008 quarter was impacted by the mandatory 10% reduction in power consumption in South Africa.

	MAR	MAR	MAR YTD 08	MAR Q08	MAR Q08
	2008	2008	VS	vs	vs
			1445		
METALLURGICAL COAL	YTD	QTR	MAR YTD 07	MAR Q07	DEC Q07

Metallurgical Coal -

Production and shipments were significantly impacted by extreme wet weather experienced at Queensland Coal (Australia). Coal production has resumed but continues to be constrained as the recovery process proceeds and mines are brought back to full operational capacity. This was partially offset by record year to date performance at Illawarra Coal (Australia).

	MAR	MAR	MAR YTD 08	MAR Q08	MAR Q08
	2008	2008	VS	vs	vs
ENERGY COAL	YTD	QTR	MAR YTD 07	MAR Q07	DEC Q07
Energy Coal ('000 tonnes) (d)	59,496	19,264	-2%	-2%	-7%

Energy Coal -

Production for the March 2008 quarter was mainly impacted by scheduled longwall move at San Juan (USA). This was offset by continued strong production at Hunter Valley Coal which achieved its' third consecutive quarterly record.

- (a) Excluding Moranbah Coal Bed Methane (sold September 2006 quarter) and Typhoon / Boris (sold December 2006 quarter).
- (b) Earnings before interest and tax.
- (c) Excluding Goldsworthy operations which were suspended mid calendar year 2006.
- (d) Excluding Koornfontein operation which was sold effective 1 July 2007.

This report together with the Exploration and Development Report represent the Interim Management Statement for the purposes of the UK Listing Authority's Disclosure and Transparency Rules. There have been no significant changes in the financial position of the Group in the quarter ended 31 March 2008.
