Sidebar text: WE THINK THAT MUNICIPAL BOND INVESTMENTS LIKE YOUR NUVEEN FUND CAN BE IMPORTANT BUILDING BLOCKS IN A WELL-BALANCED PORTFOLIO.

Dear
SHAREHOLDER

I am very pleased to report that for the period ended April 30, 2004, your Nuveen Fund continued to provide you with attractive monthly tax-free income.

While tax-free income is always welcome, we know that many shareholders are beginning to wonder whether interest rates will rise significantly, and whether that possibility should cause them to adjust that portion of their investment portfolios allocated to tax-free municipal bonds. We believe this is a question you should consider carefully with the help of a trusted financial advisor. In many cases, it may be more appropriate to focus on long-term goals and

Edgar Filing: NUVEEN MUNICIPAL VALUE FUND INC - Form N-CSRS

objectives rather than shorter-term market movements, and this is where a professional advisor may be able to help keep you focused on the larger objectives of your investment program.

As you read through this report, please review the inside front cover and consider receiving future Fund reports and other Fund information by e-mail and the Internet. Not only will you be able to receive the information faster, but this also may help lower your Fund's expenses. Sign up is quick and easy.

Since 1898, Nuveen Investments has offered financial products and solutions that incorporate careful research, diversification and the application of conservative risk-management principles. We are grateful that you have chosen us as a partner as you pursue your financial goals. We look forward to continuing to earn your trust in the months and years ahead.

Nuveen National Municipal Closed-End Exchange-Traded Funds
(NUV, NMI)

Portfolio Managers'
COMMENTS

Portfolio managers Tom Spalding and John Miller review the market environment, key investment strategies and the reporting period performance of NUV and NMI. With 27 years of investment experience at Nuveen, Tom has managed NUV since its inception in 1987. John, who has 11 years of municipal market experience, assumed portfolio management responsibility for NMI in 2001.

WHAT FACTORS AFFECTED THE U.S. ECONOMY AND MUNICIPAL MARKET DURING THE SIX-MONTH REPORTING PERIOD ENDED APRIL 30, 2004?

During this reporting period, the greatest influences on the national economy and the municipal market continued to be historically low interest rates, growing evidence of economic improvement, and a generally modest rate of inflation. Since its last credit easing in June 2003, the Federal Reserve has maintained the fed funds rate at 1.0%, the lowest level since 1958. This accommodative monetary policy helped to spur GDP (gross domestic product) growth of 4.4% annualized in the first quarter of 2004, following a 3.1% rise in 2003. Over the six-month reporting period, the year-over-year rate of inflation, as measured by the core Consumer Price Index, averaged 1.3%.

This generally favorable environment helped many municipal bonds perform well during most of the six-month period ended April 30, 2004. However, in early April, a sharply improved jobs report, along with subsequent indications of growing momentum in the U.S. economy, served as catalysts for increased expectations of a Fed rate hike. This all contributed to heightened volatility in the fixed-income markets. During April, the yield on the Bond Buyer 25

Edgar Filing: NUVEEN MUNICIPAL VALUE FUND INC - Form N-CSRS

Revenue Bond Index, a widely-followed municipal bond index, rose almost 40 basis points. This rise in the index yield and the corresponding decline in bond price, effectively offset the yield declines and price gains of the previous five months. As of April 30, 2004, the index stood at approximately the same level as at the beginning of the six-month reporting period.

In general, municipal supply remained strong over the past six months, although the pace of issuance slowed. The first four months of 2004 saw \$110 billion in new municipal supply, down 9% from January-April 2003. Over the entire six-month reporting period ended April 2004, the supply of new bonds decreased 13% compared with the preceding six months.

IN THIS ENVIRONMENT, WHAT KEY STRATEGIES WERE USED TO MANAGE NUV AND NMI DURING THE SIX MONTHS ENDED APRIL 30, 2004?

With the market continuing to anticipate an increase in interest rates, a major focus during this reporting period remained careful management of the Funds' durations¹ as a way of controlling the interest rate risk inherent in each Fund's portfolio. Interest rate risk is the risk that the value of a Fund's portfolio will decline if market interest rates rise (since bond prices move in the opposite

1 Duration is a measure of a fund's net asset value (NAV) volatility in reaction to interest rate movements.

2

direction of interest rates). The longer the duration of a Fund's portfolio, the greater the Fund's interest rate risk. Our use of such a duration management strategy is designed to position the Funds to potentially produce more consistent returns over time as interest rates inevitably rise and fall.

Our purchase activity in both Funds over this reporting period focused primarily on identifying attractive securities in the long-intermediate part of the yield curve (i.e., bonds that mature in 15 to 25 years). In many cases, bonds in this part of the curve offered yields similar to those of longer-term bonds with less inherent interest rate risk and greater total return potential. We looked for bonds that would help us keep the Funds well diversified in terms of industry sector, maturity, and geographic region. Based on the recent implementation of economic reforms in California, we believed this state had demonstrated signs of progress, and we took advantage of selected opportunities to add California bonds in both Funds. (On May 21, 2004, following the end of this reporting period, Moody's upgraded California general obligation bonds to A3 with a positive outlook from Baal with a stable outlook.)

In NMI, enhancing diversification and credit quality remained a major theme as we worked to reposition the Fund's portfolio following the resolution of several credit issues. One example was the purchase of bonds backed by Steel Dynamics, a steel manufacturing company based in Fort Wayne, Indiana. As market prices for steel rose over the six-month reporting period, Steel Dynamics' revenues and earnings rose, and the company's credit was upgraded. Several of NMI's purchases used proceeds from the sales of higher-coupon pre-refunded bonds, which generally underperformed the market during this reporting period.

For the six months ended April 30, 2004, the cumulative returns of both NUV and NMI outperformed the returns of both the Lehman Brothers index and their Lipper peer group. We believe that sector allocation and specific

3

security selection were the primary drivers of Fund performance over this period.

For example, healthcare and tobacco bonds made strong contributions to both Funds' cumulative returns during this reporting period. Healthcare, which ranked second in terms of returns among the Lehman municipal revenue sectors for the six months ended April 30, 2004, continued to perform well due to improvements in cost containment and reimbursement practices which helped their long-term outlook. As of April 30, 2004, NUV had 20% of its portfolio invested in the healthcare sector, while NMI had 19%. NUV's largest healthcare issuer was a 2% weighting (par value) in bonds rated Ba3 issued by the Michigan State Hospital Finance Authority for the Detroit Medical Center, the largest healthcare provider in southeastern Michigan. As the center's financial situation stabilized following implementation of cost-cutting initiatives and improved

Edgar Filing: NUVEEN MUNICIPAL VALUE FUND INC - Form N-CSRS

operating efficiencies, the performance of these bonds rebounded. Another strong healthcare performer over this period was the B rated West Penn Allegheny Health System, which represented just over 2% (par value) of NMI's portfolio.

Over this reporting period, NUV and NMI maintained positions in bonds backed by revenues from the 1998 master tobacco settlement agreement. In general, these bonds made positive contributions to the performances of both Funds over this reporting period. On April 21, 2004, based on an adverse ruling in a tobacco-related court case, Moody's downgraded all tobacco bonds that were not enhanced or additionally secured. As a result, the majority of unenhanced municipal-issued tobacco securities were rated Baa by Moody's, while insured tobacco bonds continued to be rated Aaa. The other major credit rating agencies--S&P and Fitch--did not change their tobacco bond ratings. As of April 30, 2004, we believed that the prices of tobacco bonds accurately reflected the risks involved and that, when maintained at appropriate levels in the Funds, these bonds would continue to represent good value.

NMI's performance during this period also benefited from the successful reduction of the Fund's overall credit risk. As discussed in past shareholder reports, this Fund had held a small number of distressed credits that had negatively impacted performance in prior periods. These

4

credits either have been sold out of the portfolio or, in certain cases where we decided to hold onto a credit, performance rebounded over the past six months as the economy improved. Two examples were the Boulder County (Colorado) Peak to Peak Charter School project and the Stillwater Mining Company project in Montana. The state of Colorado continued to provide strong financial support to the charter school movement, and the bonds issued for Peak to Peak were recently pre-refunded and upgraded in quality. The pollution control revenue bonds issued for Stillwater, the only producer of platinum group metals outside South Africa and Russia, also performed well due to higher market prices for platinum and palladium during this period and the announced takeover of the company by Norilsk Nickel, the world's largest producer of nickel and palladium.

Additional factors that impacted the performances of NUM and NMI over this semiannual reporting period included:

- o Modest weightings in both single family and multifamily housing bonds, which were generally poor performers over this reporting period, as measured by the Lehman Brothers index.
- o The advance refunding of several holdings, which enhanced their prices and contributed to returns.

HOW ABOUT THE FUNDS' DIVIDENDS AND SHARE PRICES?

During this reporting period, NUV maintained a steady dividend. As noted, NMI was in the process of diversifying and upgrading its portfolio, and this necessitated the purchase of bonds in the current, relatively low yield environment. Overall, this had the effect of reducing NMI's income stream and led to a monthly dividend reduction in this Fund in March 2004.

Both NUV and NMI seek to pay stable dividends at rates that reflect each Fund's past results and projected future performance. During certain periods, each Fund may pay dividends at a rate that may be more or less than the amount of net investment income actually earned by the Fund during the period. If a Fund has cumulatively earned more than it has paid in dividends, it holds the excess in

Edgar Filing: NUVEEN MUNICIPAL VALUE FUND INC - Form N-CSRS

reserve as undistributed net investment income (UNII) as part of the Fund's NAV. Conversely, if a Fund has cumulatively paid

5

dividends in excess of its earnings, the excess constitutes negative UNII that is likewise reflected in the Fund's NAV. Each Fund will, over time, pay all of its net investment income as dividends to shareholders. As of April 30, 2004, both NUV and NMI had negative UNII balances.

As of April 30, 2004, NUV was trading at a -9.89% discount to its common share net asset value, compared with an average discount of -7.04% for the six-month reporting period. NMI was trading at a discount of -6.89%, compared with an average discount of -5.68% for the period.

HOW WERE THE FUNDS POSITIONED IN TERMS OF CREDIT QUALITY AND BOND CALLS AS OF APRIL 30, 2004?

Given the current geopolitical and economic climate, we continued to believe that maintaining strong overall credit quality was important. As of the end of April 2004, NUV had 64% of its portfolio in securities rated AAA/U.S. Guaranteed or AA. In NMI, which is allowed to invest up to 25% of its portfolio in bonds rated BB or lower (below investment grade), the Fund's 9% allocation to BB or lower bonds and 12% allocation to non-rated bonds were balanced by a 26% weighting in bonds rated AAA/U.S. Guaranteed or AA.

As of April 30, 2004, potential call exposure for these Funds during 2004-2005 was 17% of the portfolio for both NUV and NMI. The number of actual bond calls in each Fund will depend largely on market interest rates.

Notes to FINANCIAL STATEMENTS (Unaudited)

1. GENERAL INFORMATION AND SIGNIFICANT ACCOUNTING POLICIES

The National Funds (the "Funds") covered in this report and their corresponding Common share New York Stock Exchange symbols are Nuveen Municipal Value Fund, Inc. (NUV) and Nuveen Municipal Income Fund, Inc. (NMI). The Funds are registered under the Investment Company Act of 1940, as amended, as closed-end, diversified management investment companies.

Each Fund seeks to provide current income exempt from regular federal income tax by investing primarily in a diversified portfolio of municipal obligations issued by state and local government authorities.

The following is a summary of significant accounting policies followed by the Funds in the preparation of their financial statements in accordance with accounting principles generally accepted in the United States.

Securities Valuation

The prices of municipal bonds in each Fund's investment portfolio are provided by a pricing service approved by the Fund's Board of Directors. When price quotes are not readily available (which is usually the case for municipal securities), the pricing service establishes fair market value based on yields or prices of municipal bonds of comparable quality, type of issue, coupon, maturity and rating, indications of value from securities dealers, evaluations of anticipated cash flows or collateral and general market conditions. If it is determined that market prices for a security are unavailable or inappropriate, the Board of Directors of the Funds, or its designee, may establish a fair value for the security. Temporary investments in securities that have variable rate and demand features qualifying them as short-term securities are valued at amortized cost, which approximates market value.

Securities Transactions

Securities transactions are recorded on a trade date basis. Realized gains and losses from such transactions are determined on the specific identification method. Securities purchased or sold on a when-issued or delayed delivery basis may have extended settlement periods. The securities so purchased are subject to market fluctuation during this period. The Funds have instructed the custodian to segregate assets with a current value at least equal to the amount of the when-issued and delayed delivery purchase commitments. At April 30, 2004, Municipal Value (NUV) had an outstanding when-issued purchase commitment of \$8,500,000. There were no such outstanding purchase commitments in Municipal Income (NMI).

Edgar Filing: NUVEEN MUNICIPAL VALUE FUND INC - Form N-CSRS

Investment Income

Interest income, which includes the amortization of premiums and accretion of discounts for financial reporting purposes, is recorded on an accrual basis.

Professional Fees

Professional fees presented in the Statement of Operations consist of legal fees incurred in the normal course of operations, audit fees, tax consulting fees and, in some cases, workout expenditures. Workout expenditures are incurred in an attempt to protect or enhance an investment, or to pursue other claims or legal actions on behalf of the Fund's shareholders.

Federal Income Taxes

Each Fund is a separate taxpayer for federal income tax purposes. Each Fund intends to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its net investment income to its shareholders. Therefore, no federal income tax provision is required. Furthermore, each Fund intends to satisfy conditions which will enable interest from municipal securities, which is exempt from regular federal income tax, to retain such tax-exempt status when distributed to shareholders of the Funds.

28

Dividends and Distributions to Shareholders

Dividends from tax-exempt net investment income are declared monthly. Net realized capital gains and/or market discount from investment transactions, if any, are distributed to shareholders not less frequently than annually. Furthermore, capital gains are distributed only to the extent they exceed available capital loss carryforwards.

Distributions to shareholders of tax-exempt net investment income, net realized capital gains and/or market discount, if any, are recorded on the ex-dividend date. The amount and timing of distributions are determined in accordance with federal income tax regulations, which may differ from accounting principles generally accepted in the United States.

Derivative Financial Instruments

The Funds may invest in certain derivative financial instruments including futures, forward, swap and option contracts, and other financial instruments with similar characteristics. Although the Funds are authorized to invest in such financial instruments, and may do so in the future, they did not make any such investments during the six months ended April 30, 2004.

Custodian Fee Credit

Each Fund has an arrangement with the custodian bank whereby certain custodian fees and expenses are reduced by credits earned on each Fund's cash on deposit with the bank. Such deposit arrangements are an alternative to overnight investments.

Indemnifications

Under the Funds' organizational documents, its Officers and Directors/Trustees

Edgar Filing: NUVEEN MUNICIPAL VALUE FUND INC - Form N-CSRS

are indemnified against certain liabilities arising out of the performance of their duties to the Funds. In addition, in the normal course of business, the Funds enter into contracts that provide general indemnifications to other parties. The Funds' maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Funds that have not yet occurred.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results may differ from those estimates.

losses on security transactions.

At April 30, 2004, the cost of investments were as follows:

* Net ordinary income consists of taxable market discount income and net short-term capital gains, if any.

Distributions from net ordinary income *	175,464	142,072

At October 31, 2003, the Funds' last fiscal year end, Municipal Income (NMI) has an unused capital loss carryforward of \$7,121,501, available to be applied against future capital gains, if any. If not applied, \$116,138 and \$7,005,363 of the carryforward will expire in the years 2008 and 2011, respectively.

Edgar Filing: NUVEEN MUNICIPAL VALUE FUND INC - Form N-CSRS

5. MANAGEMENT FEES AND OTHER TRANSACTIONS WITH AFFILIATES

Under Municipal Value's (NUV) investment management agreement with Nuveen Advisory Corp. (the "Adviser"), a wholly owned subsidiary of Nuveen Investments, Inc., the Fund pays an annual management fee, payable monthly, at the rates set forth below, which are based upon the average daily net assets of the Fund as follows:

For the first \$500 million	.3500%
For the next \$500 million	.3250
For net assets over \$1 billion	.3000

In addition, Municipal Value (NUV) pays an annual management fee, payable monthly, based on gross interest income as follows:

For gross income over \$100 million	3.875

31

Notes to
FINANCIAL STATEMENTS (Unaudited) (continued)

Under Municipal Income's (NMI) investment management agreement with the Adviser, the Fund pays an annual management fee, payable monthly, at the rates set forth below, which are based upon the average daily net assets of the Fund as follows:

AVERAGE DAILY NET ASSETS	MUNICIPAL INCOME (NMI)
For the first \$125 million	.6500%
For the next \$125 million	.6375
For the next \$250 million	.6250
For the next \$500 million	.6125
For the next \$1 billion	.6000
For the next \$3 billion	.5875
For net assets over \$5 billion	.5750

The management fee compensates the Adviser for overall investment advisory and administrative services and general office facilities. The Funds pay no compensation directly to those of its Directors who are affiliated with the Adviser or to their officers, all of whom receive remuneration for their services to the Funds from the Adviser or its affiliates.

As approved by the Board of Directors, a complex-wide fee schedule for all Funds managed by the Adviser and its affiliates will go into effect on August 1, 2004. This complex-wide fee schedule is expected to marginally decrease the rate at which management fees are to be paid by the Funds. Under no circumstances will

Edgar Filing: NUVEEN MUNICIPAL VALUE FUND INC - Form N-CSRS

the complex-wide fee schedule result in an increase in the rate at which management fees would be paid by the Funds if the complex-wide fee schedule were not implemented.

6. INVESTMENT COMPOSITION

At April 30, 2004, the revenue sources by municipal purpose, expressed as a percent of total investments, were as follows:

Housing/Multifamily	1	1

	100%	100%

Certain investments owned by the Funds are either covered by insurance issued by several private insurers or are backed by an escrow or trust containing U.S. Government or U.S. Government agency securities, both of which ensure the timely payment of principal and interest in the event of default (46% for Municipal Value (NUV) and 14% for Municipal Income (NMI)). Such insurance or escrow, however, does not guarantee the market value of the municipal securities or the value of the Funds' shares.

For additional information regarding each investment security, refer to the Portfolio of Investments of each Fund.

32

7. SUBSEQUENT EVENT - DISTRIBUTIONS TO SHAREHOLDERS

The Funds declared dividend distributions from their tax-exempt net investment income which were paid on June 1, 2004, to shareholders of record on May 15, 2004, as follows:

NUVEEN CLOSED-END EXCHANGE-TRADED FUNDS DIVIDEND REINVESTMENT PLAN

Your Nuveen Closed-End Exchange-Traded Fund allows you to conveniently reinvest dividends and/or capital gains distributions in additional fund shares.

Edgar Filing: NUVEEN MUNICIPAL VALUE FUND INC - Form N-CSRS

By choosing to reinvest, you'll be able to invest money regularly and automatically, and watch your investment grow through the power of tax-free compounding. Just like dividends or distributions in cash, there may be times when income or capital gains taxes may be payable on dividends or distributions that are reinvested.

It is important to note that an automatic reinvestment plan does not ensure a profit, nor does it protect you against loss in a declining market.

EASY AND CONVENIENT

To make recordkeeping easy and convenient, each month you'll receive a statement showing your total dividends and distributions, the date of investment, the shares acquired and the price per share, and the total number of shares you own.

HOW SHARES ARE PURCHASED

The shares you acquire by reinvesting will either be purchased on the open market or newly issued by the Fund. If the shares are trading at or above net asset value at the time of valuation, the Fund will issue new shares at the then-current market price. If the shares are trading at less than net asset value, shares for your account will be purchased on the open market. Dividends and distributions received to purchase shares in the open market will normally be invested shortly after the dividend payment date. No interest will be paid on dividends and distributions awaiting reinvestment. Because the market price of shares may increase before purchases are completed, the average purchase price per share may exceed the market price at the time of valuation, resulting in the acquisition of fewer shares than if the dividend or distribution had been paid in shares issued by the Fund. A pro rata portion of any applicable brokerage commissions on open market purchases will be paid by Plan participants. These commissions usually will be lower than those charged on individual transactions.

FLEXIBILITY

You may change your distribution option or withdraw from the Plan at any time, should your needs or situation change. Should you withdraw, you can receive a certificate for all whole shares credited to your reinvestment account and cash payment for fractional shares, or cash payment for all reinvestment account shares, less brokerage commissions and a \$2.50 service fee.

You can reinvest whether your shares are registered in your name, or in the name of a brokerage firm, bank, or other nominee. Ask your investment advisor if his or her firm will participate on your behalf. Participants whose shares are registered in the name of one firm may not be able to transfer the shares to another firm and continue to participate in the Plan.

The Fund reserves the right to amend or terminate the Plan at any time. Although the Fund reserves the right to amend the Plan to include a service charge payable by the participants, there is no direct service charge to participants in the Plan at this time.

For more information on the Nuveen Automatic Reinvestment Plan or to enroll in or withdraw from the Plan, speak with your financial advisor or call us at (800) 257-8787.

PROXY VOTING POLICIES AND PROCEDURES

A description of the policies and procedures that the Funds use to determine how to vote proxies relating to portfolio securities is available (i) without charge, upon request, by calling Nuveen Investments at (800) 257-8787; and (ii) on the Commission's website at <http://www.sec.gov>.

GLOSSARY OF TERMS USED IN THIS REPORT

AVERAGE ANNUAL TOTAL RETURN: This is a commonly used method to express an investment's performance over a particular, usually multi-year time period. It expresses the return (including change in NAV and reinvested dividends) that would have been necessary on an annual basis to equal the investment's actual performance over the time period being considered.

AVERAGE DURATION: Duration is a measure of a bond or bond fund's sensitivity to changes in interest rates. Generally, the longer a bond or fund's duration, the more the price of the bond or fund will change as interest rates change.

AVERAGE EFFECTIVE MATURITY: The average of all the maturities of the bonds in a fund's portfolio, computed by weighting each maturity date (the date the

Edgar Filing: NUVEEN MUNICIPAL VALUE FUND INC - Form N-CSRS

security comes due) by the market value of the security. This figure does not account for the likelihood of prepayments or the exercise of call provisions.

LEVERAGE-ADJUSTED DURATION: Duration is a measure of a bond or bond fund's sensitivity to changes in interest rates. Generally, the longer a bond or fund's duration, the more the price of the bond or fund will change as interest rates change. Leverage-adjusted duration takes into account the leveraging process for a Fund and therefore is generally longer than the duration of the actual portfolio of individual bonds that make up the Fund.

MARKET YIELD (ALSO KNOWN AS DIVIDEND YIELD OR CURRENT YIELD): An investment's current annualized dividend divided by its current market price.

NET ASSET VALUE (NAV): A fund's NAV is calculated by subtracting the liabilities of the fund from its total assets and then dividing the remainder by the number of shares outstanding. Fund NAVs are calculated at the end of each business day.

TAXABLE-EQUIVALENT YIELD: The yield necessary from a fully taxable investment to equal, on an after-tax basis, the yield of a municipal bond investment.

*Director will be retiring on June 30, 2004.

Each Fund intends to repurchase shares of its own common or preferred stock, where applicable, in the future at such times and in such amounts as is deemed advisable. No shares were purchased during the six-months ended April 30, 2004. Any future repurchases will be reported to shareholders in the next annual or semiannual report.
