LETTER TO SHAREHOLDERS

Once again, I am pleased to report that over the most recent reporting period your Fund continued to provide you with monthly tax-free income and an attractive total return. For more specific information about the performance of your investment, please see the Portfolio Managers' Comments and Performance Overview sections of this report.

With longer-term interest rates still near historic lows, many investors have begun to wonder whether these rates will soon begin to rise, and whether that makes this the time to adjust their holdings of fixed-income investments. No one knows what the future will bring, which is why we think a well-balanced portfolio that is structured and carefully monitored with the help of an investment professional is an important component in achieving your long-term financial goals. A well-diversified portfolio

Portfolio Managers'  
PERSPECTIVE

Portfolio managers Tom Spalding, Scott Romans and Paul Brennan discuss the market environment, key investment strategies and the performance of the Funds. With 29 years of investment experience, Tom has managed the three national Funds since 1999. Scott, who joined Nuveen in 2000, and Paul, who has 13 years of investment experience, have managed NXC and NXN, respectively, since January 2003.

WHAT FACTORS AFFECTED THE U.S. ECONOMY AND MUNICIPAL MARKET DURING THE SEMIANNUAL REPORTING PERIOD ENDED SEPTEMBER 30, 2004?

During this six-month period, the U.S. economy demonstrated improvement in a number of key areas, although the pace of recovery slowed compared with that of the previous six months. After posting GDP (gross domestic product) annualized growth above 4% in the previous two quarters, economic growth in the second quarter of 2004 moderated to 3.3% annualized. Slower job growth and higher oil prices held GDP growth to an annualized rate of 3.7% in the third quarter of 2004.

Higher energy costs also were partially responsible for some increased speculation about a rise in the rate of inflation. The Consumer Price Index rose at a 4.8% annualized rate in the second quarter of 2004, before slowing to a 0.6% annual growth rate in the third quarter. These inflation concerns, along with the pace of economic recovery and continued geopolitical uncertainty, acted as catalysts for heightened volatility in the fixed-income markets during this reporting period.

As one example, the yield on the Bond Buyer 25 Revenue Bond Index (BB25), a widely followed municipal bond index, stood at 4.91% when this reporting period began on April 1, 2004. As a series of improved employment reports sparked increased anticipation that the Federal Reserve might move to raise short-term interest rates, the index yield began to climb, rising to 5.45% by May 13, 2004. By the end of September 2004, more bond-friendly news--including indications of slower economic growth and relatively benign inflation--had prompted a retreat to 5.02%.

While intermediate and long-term rates were moving up and then down, short-term rates rose. The Federal Reserve introduced three one-quarter-point increases in the fed funds rate between June and September 2004, raising the target rate by a total of 75 basis points to 1.75%. As a result, we saw some flattening of the yield curve. The Fed continued to note that it anticipated taking a "measured" approach to further tightening as a way to promote a sustainable recovery without increasing inflationary pressures.

During this six-month period, municipal bond supply nationwide remained relatively strong despite a decline in year-to-year issuance. More than \$180 billion in new bonds came to market in the second and third quarters of 2004, a decrease of 10% when compared with April-September 2003. In contrast to 2003, when many states were issuing bonds to bridge budget gaps and fund operations, an improving economy and higher tax revenues have, in general, lessened the states' need to borrow. In September 2004 alone, national volume was down 24% from one year earlier.

HOW ABOUT ECONOMIC AND MARKET CONDITIONS IN CALIFORNIA AND NEW YORK?

The biggest financial market story in California during this six-month reporting period was the state's issuance of \$11 billion of economic recovery bonds (ERBs) in May and June 2004, which essentially resolved the state's short-term cash flow crisis. The ERBs improved the state's balance sheet and, combined with California's steadily recovering economy, led all three major credit rating agencies to upgrade the state's outstanding general obligation debt (GOs). In May 2004, Moody's revised its rating of California GOs to A3 from Baal, followed by Standard & Poor's upgrade to A from BBB in August. S&P also removed California from its credit watchlist. In September, Fitch moved its rating for California to A- from BBB. During this reporting period, California issuers marketed \$35.8 billion in new municipal bonds, up 69% from the previous six-month period, with the ERBs accounting for most of the increase. From an economic standpoint, California continued to recover as it benefited from the stability provided by a diverse economy. The jobless rate in California stood at 5.9% in September 2004, compared with the national average of 5.4%.

Over the past six months, New York continued to recover from the general economic downturn that affected the entire nation as well as from the direct impact of the terrorist attacks on September 11, 2001. The jobless rate in the state dropped significantly over the past six months, from 6.2% in April 2004 to 5.5% in September 2004, the lowest since August 2001. Overall, strong job growth in the construction, tourism, and business services sectors more than offset continued losses in the manufacturing sector. While New York, along with many other states, grappled with budgetary pressures over the past few years, the state ended fiscal 2004 on March 31 with a general fund surplus.

During April-September 2004, New York issuers brought \$13.7 billion in new municipal bonds to market, down 40% from the previous six months, but still ranking the state behind California as the second largest municipal issuer. Over this period, Moody's maintained its A2 rating for New York and, in September 2004, placed the state on its watchlist for a possible upgrade based on improving liquidity. Also in September, S&P reconfirmed its AA rating of New York and revised its outlook to stable from negative, citing improvements in the state's economy.

IN THIS ENVIRONMENT, WHAT KEY STRATEGIES WERE USED TO MANAGE THE FUNDS DURING THE SIX MONTHS ENDED SEPTEMBER 30, 2004?

As the market continued to anticipate interest rate increases, our focus during this reporting period remained on looking for bonds that we believed had the

## Edgar Filing: NUVEEN SELECT TAX FREE INCOME PORTFOLIO - Form N-CSRS

potential to add value and perform well under a variety of market scenarios. While our purchase activity for all of the Funds emphasized attractive securities, the specifics of our strategies varied somewhat between the national Funds and the California and New York Funds.

In our opinion, the national Funds--NXP, NXQ, and NXR--were relatively well positioned coming into this reporting period, and we did not make major changes during this six months. When we did make purchases, we generally sought bonds with 20 to 25-year maturities and attractive coupon rates that could help to support the Funds' dividends. While we continued to keep the Funds well diversified geographically, we often looked to the states with greater overall issuance--such as California, Texas, Florida and Illinois--to find these opportunities.

In NXC and NXN, on the other hand, we were actively seeking lower-rated bonds to continue the transition of these two Funds from their previous 100% insured status to more balanced holdings of investment-grade quality bonds. Our main goal was to capture additional yield for NXC and NXN to help support their dividends, while also continuing to diversify the Funds and enhance their longer-term total return potential.

For additional information, see the individual Performance Overview for your Fund in this report.

For the six months ended September 30, 2004, the cumulative returns on net asset value (NAV) for all five Funds were greater than the returns on their respective Lehman Brothers indexes. NXP also outperformed the average return for the Lipper General and Insured Unleveraged peer group for this period, while NXQ and NXR trailed this measure. NXC performed in line with its Lipper California peer group, and NXN modestly outperformed the Lipper New York peer group average.

One of the factors benefiting the six-month performances of the Funds was their duration<sup>3</sup> positioning. Among the national Funds, NXP had a slightly longer duration than

- 1 The Lehman Brothers Municipal Bond Index is an unleveraged, unmanaged national index containing a broad range of investment-grade municipal bonds. The Lehman Tax-Exempt Bond Indexes for California and New York are also unleveraged and unmanaged and comprise a broad range of municipal bonds issued in California and New York, respectively. Results for the Lehman Brothers indexes do not reflect any expenses.
- 2 Each of the Lipper Municipal Debt Funds averages shown in this report are calculated using the returns of all closed-end exchange-traded funds in their respective categories for each period as follows: Lipper General and Insured Unleveraged category, 6 months, 9 funds; 1 year, 9 funds; 5 years, 8 funds; and 10 years, 8 funds; Lipper California category, 6 months, 30 funds; 1 year, 30 funds; 5 years, 19 funds; and 10 years, 17 funds; and Lipper New York category, 6 months, 23 funds; 1 year, 23 funds; 5 years, 12 funds; and 10 years, 10 funds. Fund and Lipper returns assume reinvestment of dividends.
- 3 Duration is a measure of a bond's or a Fund's net asset value (NAV) sensitivity to changes in interest rates. In this report, duration refers to the Fund's modified duration.

## Edgar Filing: NUVEEN SELECT TAX FREE INCOME PORTFOLIO - Form N-CSRS

NXQ and NXR, which helped the Fund's performance as longer-term rates generally fell during the last half of this six-month period.

In addition, all of the Funds benefited from their holdings of lower quality bonds, which generally outperformed higher-rated bonds as the economy improved. Allocations of bonds rated BBB or lower and nonrated bonds ranged from 9% in NXQ, NXR, and NXC and 8% in NXP to 4% in NXN, reflecting the relative scarcity of BBB rated issues in New York.

Among the lower-rated credits making positive contributions to the Funds' total returns during this period were bonds backed by the 1998 master tobacco settlement agreement. At the end of this period, the three national Funds maintained exposures between 2.9% and 6.8% to tobacco bonds, while NXC allocated 3.6% and NXN 4.9% to these credits.

In NXC, other strong performers over the period included California GOs and several issues that were upgraded during these six months, including Association of Bay Area Governments Finance Authority bonds for Odd Fellows Home of California, and bonds issued by California Statewide Community Development Authority for Mission Community Hospital.

Among the bonds that did not perform as well during this period were NXN's holding of hospital bonds issued for Staten Island University Hospital, which were downgraded in May 2004 by both Moody's (Ba3 from Baa3) and Fitch (BB- from BB+) due to legal problems related to the hospital's financial statements for fiscal 2002 and 2003. The subsequent decline in valuation for these bonds detracted from the otherwise good performance of NXN's healthcare holdings.

### HOW ABOUT THE FUNDS' DIVIDENDS AND SHARE PRICES?

Interest rates remained at or near historically low levels throughout this reporting period. This meant that proceeds from bond calls had to be reinvested in the current lower interest rate environment. While we were able to maintain the stability of NXN's dividend throughout the period, the other Funds faced a greater number of calls on higher-yielding bonds, and this led to a dividend cut in NXP, NXQ, NXR and NXC in June 2004.

8

All of these Funds seek to pay stable dividends at rates that reflect each Fund's past results and projected future performance. During certain periods, each Fund may pay dividends at a rate that may be more or less than the amount of net investment income actually earned by the Fund during the period. If a Fund has cumulatively earned more than it has paid in dividends, it holds the excess in reserve as undistributed net investment income (UNII) as part of the Fund's NAV. Conversely, if a Fund has cumulatively paid dividends in excess of its earnings, the excess constitutes negative UNII that is likewise reflected in the Fund's NAV. Each Fund will, over time, pay all of its net investment income as dividends to shareholders. As of September 30, 2004, all of the Funds had negative UNII balances, for the purposes of their financial statements.

As of September 30, 2004, all five of the Funds were trading at discounts to their NAVs. These discounts were generally in line with the Funds' average discounts over the entire six-month reporting period.

### HOW WERE THE FUNDS POSITIONED IN TERMS OF CREDIT QUALITY AND BOND CALLS AS OF SEPTEMBER 30, 2004?

## Edgar Filing: NUVEEN SELECT TAX FREE INCOME PORTFOLIO - Form N-CSRS

Given the current geopolitical and economic climate, we continued to believe that maintaining strong credit quality was an important requirement. As of the end of September 2004, these five Funds continued to offer excellent credit quality, with allocations of bonds rated AAA/U.S. guaranteed and AA ranging from 65% in NXC and 69% in NXR to 76% in NXP, 81% in NXQ, and 94% in NXN.

At the end of September 2004, potential call exposure for these Funds during 2004-2005 ranged from 9% in NXN and 10% in NXP to 13% in NXR, 14% in NXC, and 16% in NXQ. The number of actual bond calls in all of these Funds depends largely on market interest rates.

\* Optional Call Provisions: Dates (month and year) and prices of the earliest optional call or redemption. There may be other call provisions at varying prices at later dates.

\*\* Ratings: Using the higher of Standard & Poor's or Moody's rating.

\*\*\* Securities are backed by an escrow or trust containing sufficient U.S. Government or U.S. Government agency securities which ensures the timely payment of principal and interest. Such securities are normally considered to be equivalent to AAA rated securities.

# On December 9, 2002, UAL Corporation, the holding company of United Air Lines, Inc. filed for federal bankruptcy protection. The Adviser determined that it was likely United would not remain current on their interest payment obligations with respect to these bonds and thus has stopped accruing interest.

N/R Investment is not rated.

\* Optional Call Provisions: Dates (month and year) and prices of the earliest optional call or redemption. There may be other call provisions at varying prices at later dates.

\*\* Ratings: Using the higher of Standard & Poor's or Moody's rating.

\*\*\* Securities are backed by an escrow or trust containing sufficient U.S. Government or U.S. Government agency securities which ensures the timely payment of principal and interest. Such securities are normally considered to be equivalent to AAA rated securities.

# On December 9, 2002, UAL Corporation, the holding company of United Air Lines, Inc. filed for federal bankruptcy protection. The Adviser determined that it was likely United would not remain current on their interest payment obligations with respect to these bonds and thus has stopped accruing interest.

N/R Investment is not rated.

\* Optional Call Provisions: Dates (month and year) and prices of the earliest optional call or redemption. There may be other call provisions at varying prices at later dates.

\*\* Ratings: Using the higher of Standard & Poor's or Moody's rating.

\*\*\* Securities are backed by an escrow or trust containing sufficient U.S. Government or U.S. Government agency securities which ensures the timely payment of principal and interest. Such securities are normally considered to be equivalent to AAA rated securities.

# On December 9, 2002, UAL Corporation, the holding company of United Air Lines, Inc. filed for federal bankruptcy protection. The Adviser determined that it was likely United would not remain current on their interest payment obligations with respect to these bonds and thus has stopped accruing interest.

#### 1. GENERAL INFORMATION AND SIGNIFICANT ACCOUNTING POLICIES

The Funds covered in this report and their corresponding Common share New York Stock Exchange symbols are Nuveen Select Tax-Free Income Portfolio (NXP), Nuveen Select Tax-Free Income Portfolio 2 (NXQ), Nuveen Select Tax-Free Income Portfolio 3 (NXR), Nuveen California Select Tax-Free Income Portfolio (NXC) and Nuveen New York Select Tax-Free Income Portfolio (NXN). The Funds are registered under the Investment Company Act of 1940, as amended, as closed-end, diversified management investment companies.

Each Fund seeks to provide stable dividends consistent with the preservation of capital, exempt from regular federal and designated state income taxes, where applicable, by investing primarily in a diversified portfolio of municipal obligations.

The following is a summary of significant accounting policies followed by the Funds in the preparation of their financial statements in accordance with U.S. generally accepted accounting principles.

#### Securities Valuation

The prices of municipal bonds in each Fund's investment portfolio are provided by a pricing service approved by the Fund's Board of Trustees. When price quotes are not readily available (which is usually the case for municipal securities), the pricing service establishes fair market value based on yields or prices of municipal bonds of comparable quality, type of issue, coupon, maturity and rating, indications of value from securities dealers, evaluations of anticipated cash flows or collateral and general market conditions. If it is determined that market prices for a security are unavailable or inappropriate, the Board of Trustees of the Funds, or its designee, may establish a fair value for the security. Temporary investments in securities that have variable rate and demand features qualifying them as short-term securities are valued at amortized cost, which approximates market value.

#### Securities Transactions

## Edgar Filing: NUVEEN SELECT TAX FREE INCOME PORTFOLIO - Form N-CSRS

Securities transactions are recorded on a trade date basis. Realized gains and losses from such transactions are determined on the specific identification method. Securities purchased or sold on a when-issued or delayed delivery basis may have extended settlement periods. The securities so purchased are subject to market fluctuation during this period. The Funds have instructed the custodian to segregate assets with a current value at least equal to the amount of the when-issued and delayed delivery purchase commitments. At September 30, 2004, there were no such outstanding purchase commitments in any of the Funds.

40

### Investment Income

Interest income, which includes the amortization of premiums and accretion of discounts for financial reporting purposes, is recorded on an accrual basis.

### Income Taxes

Each Fund is a separate taxpayer for federal income tax purposes. Each Fund intends to distribute all net investment income and net capital gains to shareholders and to otherwise comply with the requirements of subchapter M of the Internal Revenue Code applicable to regulated investment companies. Therefore, no federal income tax provision is required. Furthermore, each Fund intends to satisfy conditions which will enable interest from municipal securities, which is exempt from regular federal and designated state income taxes, where applicable, to retain such tax-exempt status when distributed to shareholders of the Funds. Net realized capital gains and ordinary income distributions made by the Funds are subject to federal taxation.

### Dividends and Distributions to Shareholders

Dividends from tax-exempt net investment income are declared monthly. Net realized capital gains and/or market discount from investment transactions, if any, are distributed to shareholders not less frequently than annually. Furthermore, capital gains are distributed only to the extent they exceed available capital loss carryforwards.

Distributions to shareholders of tax-exempt net investment income, net realized capital gains and/or market discount, if any, are recorded on the ex-dividend date. The amount and timing of distributions are determined in accordance with federal income tax regulations, which may differ from U.S. generally accepted accounting principles.

### Derivative Financial Instruments

The Funds are not authorized to invest in derivative financial instruments.

### Custodian Fee Credit

Each Fund has an arrangement with the custodian bank whereby certain custodian fees and expenses are reduced by credits earned on each Fund's cash on deposit with the bank. Such deposit arrangements are an alternative to overnight investments.

### Indemnifications

Under the Funds' organizational documents, their Officers and Trustees are indemnified against certain liabilities arising out of the performance of their duties to the Funds. In addition, in the normal course of business, the Funds

## Edgar Filing: NUVEEN SELECT TAX FREE INCOME PORTFOLIO - Form N-CSRS

enter into contracts that provide general indemnifications to other parties. The Funds' maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Funds that have not yet occurred. However, the Funds have not had prior claims or losses pursuant to these contracts and expect the risk of loss to be remote.

### Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results may differ from those estimates.

#### 2. FUND SHARES

None of the Funds engaged in transactions in their own shares during the six months ended September 30, 2004, nor during the fiscal year ended March 31, 2004, with the exception of New York Select-Tax Free (NXN) which issued 1,154 shares to shareholders due to reinvestment of distributions during the fiscal year ended March 31, 2004.

#### 3. SECURITIES TRANSACTIONS

Purchases and sales (including maturities) of investments in long-term municipal securities during the six months ended September 30, 2004, were as follows:

#### 4. INCOME TAX INFORMATION

The following information is presented on an income tax basis. Differences between amounts for financial statement and federal income tax purposes are primarily due to timing differences in recognizing income on taxable market discount securities and timing differences in recognizing certain gains and losses on security transactions.

At September 30, 2004, the cost of investments were as follows:

Notes to FINANCIAL STATEMENTS (Unaudited) (continued)

5. MANAGEMENT FEE AND OTHER TRANSACTIONS WITH AFFILIATES

As approved by the Board of Trustees, effective August 1, 2004, a complex-wide management fee structure was adopted for all funds sponsored by Nuveen Institutional Advisory Corp. (the "Adviser"), a wholly owned subsidiary of Nuveen Investments, Inc. and its affiliates. This fee structure separates each fund's management fee into two components - a complex-level component, based on the aggregate amount of all funds assets managed by the Adviser and its affiliates, and a specific fund-level component, based only on the amount of assets within each individual fund. This pricing structure enables Nuveen fund shareholders to benefit from growth in the assets within each individual fund as well as from growth in the amount of complex-wide assets managed by the Adviser and its affiliates. Under no circumstances will this pricing structure result in a fund paying management fees at a rate higher than would otherwise have been applicable had the complex-wide management fee structure not been implemented. As a consequence of this new management fee structure, the funds' effective management fees were reduced by approximately .007% as of October 31, 2004.

Effective August 1, 2004, the annual fund-level fee, payable monthly, for each of the Funds is based upon the average daily net assets of each Fund as follows:

AVERAGE DAILY NET ASSETS	SELECT TAX-FREE (NXP) FUND-LEVEL FEE RATE	SELECT TAX-FREE SELECT TAX-FREE CALIFORNIA SELECT TAX-FR NEW YORK SELECT TAX-FR FUND-LEVEL
For the first \$125 million	.0500%	
For the next \$125 million	.0375	
For the next \$250 million	.0250	
For the next \$500 million	.0125	

## Edgar Filing: NUVEEN SELECT TAX FREE INCOME PORTFOLIO - Form N-CSRS

Effective August 1, 2004, the annual complex-level fee, payable monthly, which is additive to the fund-level fee, for all Nuveen sponsored funds in the U.S., is based on the aggregate amount of total fund assets managed as follows:

COMPLEX-LEVEL ASSETS (1)	COMPLEX-LEVEL FEE RATE
For the first \$55 billion	.2000%
For the next \$1 billion	.1800
For the next \$1 billion	.1600
For the next \$3 billion	.1425
For the next \$3 billion	.1325
For the next \$3 billion	.1250
For the next \$5 billion	.1200
For the next \$5 billion	.1175
For the next \$15 billion	.1150
For Managed Assets over \$91 billion (2)	.1400

(1) The complex-level fee component of the management fee for the funds is calculated based upon the aggregate Managed Assets ("Managed Assets" means the average daily net assets of each fund including assets attributable to all types of leverage used by the Nuveen funds) of Nuveen-sponsored funds in the U.S.

(2) With respect to the complex-wide Managed Assets over \$91 billion, the fee rate or rates that will apply to such assets will be determined at a later date. In the unlikely event that complex-wide Managed Assets reach \$91 billion prior to a determination of the complex-level fee rate or rates to be applied to Managed Assets in excess of \$91 billion, the complex-level fee rate for such complex-wide Managed Assets shall be .1400% until such time as a different rate or rates is determined.

Each Fund paid through July 31, 2004, an annual management fee, payable monthly, at the rates set forth below, which were based upon the average daily net assets (including net assets attributable to Preferred shares) of each Fund as follows:

AVERAGE DAILY NET ASSETS	SELECT TAX-FREE (NXP)	SELECT TAX-FREE CALIFORNIA SELECT TAX-FR NEW YORK SELECT TAX-FR
For the first \$125 million	.2500%	
For the next \$125 million	.2375	
For the next \$250 million	.2250	
For the next \$500 million	.2125	
For the next \$1 billion	.2000	
For net assets over \$2 billion	.1875	

The management fee compensates the Adviser for overall investment advisory and administrative services and general office facilities. The Funds pay no compensation directly to those of its Trustees who are affiliated with the Adviser or to their officers, all of whom receive remuneration for their services to the Funds from the Adviser or its affiliates. The Board of Trustees has adopted a deferred compensation plan for independent Trustees that enables Trustees to elect to defer receipt of all or a portion of the annual compensation they are entitled to receive from certain Nuveen advised Funds.

# Edgar Filing: NUVEEN SELECT TAX FREE INCOME PORTFOLIO - Form N-CSRS

Under the plan, deferred amounts are treated as though equal dollar amounts had been invested in shares of select Nuveen advised Funds.

Reinvest Automatically  
EASILY AND CONVENIENTLY

SIDEBAR TEXT: NUVEEN MAKES REINVESTING EASY. A PHONE CALL IS ALL IT TAKES TO SET UP YOUR REINVESTMENT ACCOUNT.

### NUVEEN CLOSED-END EXCHANGE-TRADED FUNDS DIVIDEND REINVESTMENT PLAN

Your Nuveen Closed-End Exchange-Traded Fund allows you to conveniently reinvest dividends and/or capital gains distributions in additional fund shares.

By choosing to reinvest, you'll be able to invest money regularly and automatically, and watch your investment grow through the power of tax-free compounding. Just like dividends or distributions in cash, there may be times when income or capital gains taxes may be payable on dividends or distributions that are reinvested.

It is important to note that an automatic reinvestment plan does not ensure a profit, nor does it protect you against loss in a declining market.

### EASY AND CONVENIENT

To make recordkeeping easy and convenient, each month you'll receive a statement showing your total dividends and distributions, the date of investment, the shares acquired and the price per share, and the total number of shares you own.

### HOW SHARES ARE PURCHASED

The shares you acquire by reinvesting will either be purchased on the open market or newly issued by the Fund. If the shares are trading at or above net asset value at the time of valuation, the Fund will issue new shares at the then-current market price. If the shares are trading at less than net asset value, shares for your account will be purchased on the open market. Dividends and distributions received to purchase shares in the open market will normally be invested shortly after the dividend payment date. No interest will be paid on dividends and distributions awaiting reinvestment. Because the market price of the shares may increase before purchases are completed, the average purchase price per share may exceed the market price at the time of valuation, resulting in the acquisition of fewer shares than if the dividend or distribution had been paid in shares issued by the Fund. A pro rata portion of any applicable brokerage commissions on open market purchases will be paid by Plan participants. These commissions usually will be lower than those charged on individual transactions.

### FLEXIBLE

You may change your distribution option or withdraw from the Plan at any time, should your needs or situation change. Should you withdraw, you can receive a certificate for all whole shares credited to your reinvestment account and cash

## Edgar Filing: NUVEEN SELECT TAX FREE INCOME PORTFOLIO - Form N-CSRS

payment for fractional shares, or cash payment for all reinvestment account shares, less brokerage commissions and a \$2.50 service fee.

You can reinvest whether your shares are registered in your name, or in the name of a brokerage firm, bank, or other nominee. Ask your investment advisor if his or her firm will participate on your behalf. Participants whose shares are registered in the name of one firm may not be able to transfer the shares to another firm and continue to participate in the Plan.

The Fund reserves the right to amend or terminate the Plan at any time. Although the Fund reserves the right to amend the Plan to include a service charge payable by the participants, there is no direct service charge to participants in the Plan at this time.

### GLOSSARY OF TERMS USED IN THIS REPORT

**AVERAGE ANNUAL TOTAL RETURN:** This is a commonly used method to express an investment's performance over a particular, usually multi-year time period. It expresses the return that would have been necessary each year to equal the investment's actual cumulative performance (including change in NAV or market price and reinvested dividends and capital gains distributions, if any) over the time period being considered.

**AVERAGE EFFECTIVE MATURITY:** The average of all the maturities of the bonds in a fund's portfolio, computed by weighting each maturity date (the date the security comes due) by the market value of the security. This figure does not account for the likelihood of prepayments or the exercise of call provisions.

**MODIFIED DURATION:** Duration is a measure of the sensitivity of a bond or bond fund's value to changes when interest rates change. Generally, the longer a bond

## Edgar Filing: NUVEEN SELECT TAX FREE INCOME PORTFOLIO - Form N-CSRS

or fund's duration, the more the price of the bond or fund will change as interest rates change.

**MARKET YIELD (ALSO KNOWN AS DIVIDEND YIELD OR CURRENT YIELD):** An investment's current annualized dividend divided by its current market price.

**NET ASSET VALUE (NAV):** A Fund's common share NAV per share is calculated by subtracting the liabilities of the Fund (including any MuniPreferred shares issued in order to leverage the Fund) from its total assets and then dividing the remainder by the number of shares outstanding. Fund NAVs are calculated at the end of each business day.

**TAXABLE-EQUIVALENT YIELD:** The yield necessary from a fully taxable investment to equal, on an after-tax basis, the yield of a municipal bond investment.
