**Item 7.01 Regulation FD Disclosure**

On November 20, 2012 CyberOptics Corporation initiated a plan to reduce its global workforce by approximately 30 employees. Expenses for contract workers will also be reduced. Anticipated severance and restructuring expense in the fourth quarter of 2013 associated with the workforce reduction is expected to total approximately \$700,000.

The workforce reduction was undertaken in response to soft sales, particularly SMT inspection systems. Since a material near term recovery in sales is not anticipated, CyberOptics is strengthening its commitment to cost control to minimize losses and cash consumption and focus on market support of its product lines. Annual expense savings starting in the first quarter of 2014 associated with the global workforce reduction and other cost containment actions is anticipated to total approximately \$2.0 million. Some portion of the anticipated savings may be used to fund new growth initiatives in future periods.

Statements regarding the Company's anticipated performance are forward-looking and therefore involve risks and uncertainties, including but not limited to: market conditions in the global SMT and semiconductor capital equipment industries; increasing price competition and price pressure on our product sales, particularly our SMT systems; the level of orders from our OEM customers; the availability of parts required for meeting customer orders; the effect of world events on our sales, the majority of which are from foreign customers; product introductions and pricing by our competitors; the level of revenue and loss we achieve in 2013; the level of revenue and profit or loss we achieve in 2014; success of anticipated new OEM and end-user opportunities; and other factors set forth in the Company's filings with the Securities and Exchange Commission.
