A Letter to Shareholders

Dear Shareholder

Over the past several months, financial markets have been buffeted by the housing recession, the credit market unraveling and related liquidity freeze and steadily rising commodity prices. Counterbalancing these difficulties were booming export activity, a robust non-financial corporate sector and, notably, aggressive and timely monetary and fiscal policy actions.

Amid the market tumult, the Federal Reserve Board (the Fed) intervened with a series of moves to bolster liquidity and ensure financial market stability. Since September 2007, the central bank slashed the target federal funds rate 325 basis points (3.25%), bringing the rate to 2.0% as of period-end. Of greater magnitude, however, were the Fed's other policy decisions, which included opening the discount window directly to broker dealers and investment banks and backstopping the unprecedented rescue of Bear Stearns.

The Fed's response to the financial crisis helped to improve credit conditions and investor mood. After hitting a low point on March 17 (coinciding with the collapse of Bear Stearns), equity markets found a welcome respite in April, when the S&P 500 Index of U.S. stocks posted positive monthly performance for the first time since October 2007. International markets, which outpaced those of the U.S. for much of 2007, saw a reversal in that trend, as effects of the credit crisis and downward pressures on growth were far-reaching.

In contrast to equity markets, Treasury securities rallied (yields fell as prices correspondingly rose), as a broad flight-to quality theme persisted. The yield on 10-year Treasury issues, which touched 5.30% in June 2007 (its highest level in five years), fell to 4.04% by year-end and to 3.77% by April 30. Treasury issues relinquished some of their gains in April, however, as investor appetite for risk returned and other high-quality fixed income sectors outperformed.

Problems within the monoline insurance industry and the failure of auctions for auction rate securities plagued the municipal bond market, driving yields higher and prices lower across the curve. However, in conjunction with the more recent shift in sentiment, the sector delivered strong performance in the final month of the reporting period.

Overall, the major benchmark indexes generated results that generally reflected heightened investor risk aversion:

Total Returns as of April 30, 2008	6-month	12-month
U.S. equities (S&P 500 Index)	-9.64%	-4.68%
Small cap U.S. equities (Russell 2000 Index)	-12.92	-10.96
International equities (MSCI Europe, Australasia, Far East Index)	-9.21	-1.78
Fixed income (Lehman Brothers U.S. Aggregate Index)	+4.08	+6.87
Tax-exempt fixed income (Lehman Brothers Municipal Bond Index)	+1.47	+2.79
High yield bonds (Lehman Brothers U.S. Corporate High Yield 2% Issuer Capped Index)	-0.73	-0.80

Past performance is no guarantee of future results. Index performance shown for illustrative purposes only.

You cannot invest directly in an index.

As you navigate today's volatile markets, we encourage you to review your investment goals with your financial professional and to make portfolio changes, as needed. For more up-to-date commentary on the economy and financial markets, we invite you to visit www.blackrock.com/funds. As always, we thank you for entrusting BlackRock with your investment assets, and we look forward to continuing to serve you in the months and years ahead.

Sincerely,

Rob Kapito
President, BlackRock Advisors, LLC

Trust Summary as of April 30, 2008

BlackRock Investment Quality Municipal Trust

Investment Objective

BlackRock Investment Quality Municipal Trust (BKN) (the Trust) seeks to provide high current income which, in the opinion of bond counsel to the issuer, is exempt from regular federal income tax consistent with the preservation of capital.

Performance

For the six months ended April 30, 2008, the Trust returned -0.03% based on market price, with dividends reinvested. The Trust's return based on net asset value (NAV) was -3.85%, with dividends reinvested. For the same period, the closed-end Lipper General Municipal Debt Funds (Leveraged) category posted an average return of -2.54% on a NAV basis. Detracting from results for the period were the Trust's holdings in longer-dated issues, which proved more volatile as risk spreads increased and the municipal yield curve steepened. Positive contributors to performance included the Trust's greater-than-average distribution rate and its largely neutral duration positioning during a period of municipal bond relative underperformance and increasing rates.

Trust Information

Symbol on New York Stock Exchange	BKN
Initial Offering Date	February 19, 1993
Yield on Closing Market Price as of April 30, 2008 (\$15.81) ¹	6.07%
Tax Equivalent Yield ²	9.34%
Current Monthly Distribution per Common Share ³	\$0.08
Current Annualized Distribution per Common Share ³	\$0.96
Leverage as of April 30, 2008 ⁴	39%

1 Yield on closing market price is calculated by dividing the current annualized distribution per share by the closing market price. Past performance does not guarantee future results.

2 Tax equivalent yield assumes the maximum federal tax rate of 35%.

3 A change in the distribution rate was declared on June 2, 2008. The Monthly Distribution per Common Share was decreased to \$0.063. The Yield on Closing Market Price, Current Monthly Distribution and Current Annualized Distribution do not reflect the new distribution rate. The new distribution rate is not constant and is subject to further change in the future.

4 As a percentage of managed assets, which is the total assets of the Trust (including any assets attributable to Auction Market Preferred Shares (Preferred Shares)) minus the sum of accrued liabilities (other than debt representing financial leverage).

The table below summarizes the changes in the Trust's market price and net asset value per share:

	4/30/08	10/31/07	Change	High	Low
Market Price	\$ 15.81	\$ 16.35	(3.30%)	\$ 17.20	\$ 14.09
Net Asset Value	\$ 13.70	\$ 14.73	(6.99%)	\$ 14.76	\$ 12.86

As of April 30, 2008 and October 31, 2007, the market value of these securities was \$16,453,046 representing 5% and \$6,340,657 representing 2%, respectively, of the Trust's long-term investments.

Trust Summary as of April 30, 2008

BlackRock Municipal Income Trust

Investment Objective

BlackRock Municipal Income Trust (BFK) (the Trust) seeks to provide current income which, in the opinion of bond counsel to the issuer, is exempt from regular federal income tax.

Performance

For the six months ended April 30, 2008, the Trust returned -2.40% based on market price, with dividends reinvested. The Trust's return based on NAV was -4.94%, with dividends reinvested. For the same period, the closed-end Lipper General Municipal Debt Funds (Leveraged) category posted an average return of -2.54% on a NAV basis. Detracting from the Trust's performance was its effectively neutral duration positioning during a period of rising municipal bond yields. A greater exposure to lower-rated issues also hindered results, although the incremental income generated by these issues enabled the Trust to maintain a distribution yield above that of its Lipper peer average.

Trust Summary as of April 30, 2008

BlackRock Long-Term Municipal Advantage Trust

Investment Objective

BlackRock Long-Term Municipal Advantage Trust (BTA) (the Trust) seeks to provide current income which, in the opinion of bond counsel to the issuer, is exempt from regular federal income tax.

Performance

For the six months ended April 30, 2008, the Trust returned -1.49% based on market price, with dividends reinvested. The Trust's return based on NAV was -7.21%, with dividends reinvested. For the same period, the closed-end Lipper General & Insured Municipal Funds (Unleveraged) category posted an average return of -0.70% on a NAV basis. Notably, the Lipper category contains a mix of both insured and uninsured funds that do not employ leverage. This stands in sharp contrast to the Trust, which utilizes a high degree of leverage. An emphasis on non-investment grade credits and long duration positioning further differentiates the Trust from its Lipper peers. Accordingly, the Trust's relative performance will pale in times of rising interest rates and wider credit spreads, which we saw during this period.

As of April 30, 2008 and October 31, 2007, the market value of these securities was \$2,618,490 representing 1% and \$6,660,850 representing 2%, respectively, of the Trust's long-term investments.

Trust Summary as of April 30, 2008

BlackRock California Investment Quality Municipal Trust

Investment Objective

BlackRock California Investment Quality Municipal Trust (RAA) (the Trust) seeks to provide high current income which, in the opinion of bond counsel to the issuer, is exempt from regular federal and California income tax consistent with preservation of capital.

Performance

For the six months ended April 30, 2008, the Trust returned +4.16% based on market price, with dividends reinvested. The Trust's return based on NAV was -1.77%, with dividends reinvested. For the same period, the closed-end Lipper California Municipal Debt Funds category posted an average return of -1.42% on a NAV basis. Widening credit spreads for lower-rated bonds and those insured by the monoline insurance companies contributed to the decline in the Trust's NAV. Management's effort to moderate the contribution of current yield to the total return was partially negated by higher short-term borrowing costs. The Trust's duration remained neutral.

Trust Information

Trust Summary as of April 30, 2008

BlackRock California Municipal Income Trust

Investment Objective

BlackRock California Municipal Income Trust (BFZ) (the Trust) seeks to provide high current income which, in the opinion of bond counsel to the issuer, is exempt from regular federal income tax and California income taxes.

Performance

For the six months ended April 30, 2008, the Trust returned +3.87% based on market price, with dividends reinvested. The Trust's return based on NAV was -0.72%, with dividends reinvested. For the same period, the closed-end Lipper California Municipal Debt Funds category posted an average return of -1.42% on a NAV basis. A slightly defensive duration stance and a higher cash equivalent reserve position versus its Lipper peers provided the Trust's NAV some cushion against volatility from widening credit spreads and rising long-term investment rates. Management's strategy is to balance total return by opportunistically improving current yield, while maintaining a neutral duration.

Trust Information

Trust Summary as of April 30, 2008

BlackRock Florida Investment Quality Municipal Trust

Investment Objective

BlackRock Florida Investment Quality Municipal Trust (RFA) (the Trust) seeks to provide high current income which, in the opinion of bond counsel to the issuer, is exempt from regular federal income tax and to provide an exemption from Florida intangible personal property taxes consistent with preservation of capital.

Performance

For the six months ended April 30, 2008, the Trust returned -2.62% based on market price, with dividends reinvested. The Trust's return based on NAV was -3.41%, with dividends reinvested. For the same period, the closed-end Lipper Florida Municipal Debt Funds category posted an average return of -1.18% on a NAV basis. Problems within the monoline insurance industry had a negative impact on the entire insured municipal market, detracting from the Trust's performance for the period. Healthcare, tax increment financing, housing and corporate-backed bonds were the weakest performers. Conversely, an overweight in pre-refunded bonds benefited results, as the yield curve steepened and shorter-maturity issues outperformed.

Trust Information

2 The investment advisor has deemed certain of these non-rated securities to be of investment grade quality. As of April 30, 2008 and October 31, 2007, the market value of these securities was \$14,853,000 representing 10% and \$1,562,493 representing 1%, respectively, of the Trust's long-term investments.

Trust Summary as of April 30, 2008

BlackRock New Jersey Investment Quality Municipal Trust

Investment Objective

BlackRock New Jersey Investment Quality Municipal Trust (RNJ) (the Trust) seeks to provide high current income which, in the opinion of bond counsel to the issuer, is exempt from regular federal income tax and New Jersey gross income tax consistent with preservation of capital.

Performance

For the six months ended April 30, 2008, the Trust returned +6.91% based on market price, with dividends reinvested. The Trust's return based on NAV was -4.56%, with dividends reinvested. For the same period, the closed-end Lipper New Jersey Municipal Debt Funds category posted an average return of -1.91% on a NAV basis. The Trust's relatively long duration posture and holdings in lower-rated issues hindered comparative performance for the period. The Trust's BMA (a short-term municipal market benchmark rate) hedges also detracted as cash positions underperformed swap rates. Management has been unable to restructure the portfolio, as new issuance of New Jersey securities has declined significantly.

Trust Summary as of April 30, 2008

BlackRock New Jersey Municipal Income Trust

Investment Objective

BlackRock New Jersey Municipal Income Trust (BNJ) (the Trust) seeks to provide high current income which, in the opinion of bond counsel to the issuer, is exempt from regular federal income tax and New Jersey gross income tax.

Performance

For the six months ended April 30, 2008, the Trust returned +1.87% based on market price, with dividends reinvested. The Trust's return based on NAV was -2.14%, with dividends reinvested. For the same period, the closed-end Lipper New Jersey Municipal Debt Funds category posted an average return of -1.91% on a NAV basis. The Trust's overweight in lower-rated issues was the primary detractor from comparative performance, as these securities underperformed amid continued widening in credit spreads. However, the incremental income these holdings generated continued to enhance the Trust's above-average dividend yield. A relatively neutral duration posture during a period of rising interest rates in the municipal market also contributed positively.

Trust Summary as of April 30, 2008

BlackRock New York Investment Quality Municipal Trust

Investment Objective

BlackRock New York Investment Quality Municipal Trust (RNY) (the Trust) seeks to provide high current income which, in the opinion of bond counsel to the issuer, is exempt from regular federal, New York State and New York City income tax consistent with preservation of capital.

Performance

For the six months ended April 30, 2008, the Trust returned -3.85% based on market price, with dividends reinvested. The Trust's return based on NAV was -1.12%, with dividends reinvested. For the same period, the closed-end Lipper New York Municipal Debt Funds category posted an average return of -0.95% on a NAV basis. The relative return was hampered by the Trust's longer-dated holdings, which proved more volatile as risk spreads increased and the municipal yield curve steepened. Conversely, the Trust's above-average distribution yield and neutral duration position during a period of rising interest rates in the municipal market benefited comparative performance.

The Benefits and Risks of Leveraging

The Trusts utilize leverage to seek to enhance the yield and NAV of their Common Shares. However, these objectives cannot be achieved in all interest rate environments.

To leverage, the Trusts may issue Preferred Shares, which pay dividends at prevailing short-term interest rates, and invest the proceeds in long-term municipal bonds. The interest earned on these investments is paid to Common Shareholders in the form of dividends, and the value of these Portfolios' holdings is reflected in the per share NAV of the Trusts' Common Shares. However, in order to benefit Common Shareholders, the yield curve must be positively sloped; that is, short-term interest rates must be lower than long-term interest rates. At the same time, a period of generally declining interest rates will benefit Common Shareholders. **If either of these conditions change, then the risks of leveraging will begin to outweigh the benefits.**

To illustrate these concepts, assume a fund's Common Share capitalization of \$100 million and the issuance of Preferred Shares for an additional \$50 million, creating a total value of \$150 million available for investment in long-term municipal bonds. If prevailing short-term interest rates are approximately 3% and long-term interest rates are approximately 6%, then the yield curve has a strongly positive slope. The fund pays dividends on the \$50 million of Preferred Shares based on the lower short-term interest rates. At the same time, the fund's total portfolio of \$150 million earns the income based on long-term interest rates.

In this case, the dividends paid to Preferred Shareholders are significantly lower than the income earned on the fund's long-term investments, and therefore the Common Shareholders are the beneficiaries of the incremental yield. However, if short-term interest rates rise, narrowing the differential between short-term and long-term interest rates, **the incremental yield pickup on the Common Shares will be reduced or eliminated completely.** At the same time, the market value on the fund's Common Shares (that is, its price as listed on the New York Stock Exchange or American Stock Exchange) may, as a result, decline. Furthermore, **if long-term interest rates rise, the Common Shares' NAV will reflect the full decline in the price of the portfolio's investments, since the value of the fund's Preferred Shares does not fluctuate.** In addition to the decline in NAV, the market value of the fund's Common Shares may also decline.

In addition, the Trusts may from time to time leverage their assets through the use of tender option bond (TOB) programs. In a typical TOB program, the Trust transfers one or more municipal bonds to a TOB trust, which issues short-term variable rate securities to third-party investors and a residual interest to the Trust. The cash received by the TOB trust from the issuance of the short-term securities (less transaction expenses) is paid to the Trust, which invests the cash in additional portfolio securities. The distribution rate on the short-term securities is reset periodically (typically every seven days) through a remarketing of the short-term securities. Any income earned on the bonds in the TOB trust, net of expenses incurred by the TOB trust, that is not paid to the holders of the short-term securities is paid to the Trust. In connection with managing the Trusts' assets, the Trusts investment advisor may at any time retrieve the bonds out of the TOB trust typically within seven days. **TOB investments generally will provide the Trust with economic benefits in periods of declining short-term interest rates, but expose the Trust to risks during periods of rising short-term interest rates similar to those associated with Preferred Shares issued by the Trust, as described above. Additionally, fluctuations in the market value of municipal securities deposited into the TOB trust may adversely affect the Funds' NAVs per share.** (See Note 1 of the Notes to Financial Statements for details of municipal bonds transferred to TOB trusts.)

Under the Investment Company Act of 1940, the Trusts are permitted to issue Preferred Shares in an amount of up to 50% of their managed assets at the time of issuance. Each Trust also anticipates that its total economic leverage will not exceed 50% of its total managed assets. Economic leverage includes Preferred Shares and TOBs. As of April 30, 2008, the Trusts had economic leverage amounts of managed assets as follows:

	Percent of Leverage
Investment Quality Municipal	39%
Municipal Income	39%
Long-Term Municipal	47%

Edgar Filing: BlackRock Long-Term Municipal Advantage Trust - Form N-CSRS

California Investment Quality	36%

Florida Investment Quality	37%
Florida Income	37%
New Jersey Investment Quality	37%
New Jersey Income	37%
New York Income	35%
New York Investment Quality	38%

Swap Agreements

The Trusts may invest in swap agreements, which are over-the-counter contracts in which one party agrees to make periodic payments based on the change in market value of a specified bond, basket of bonds, or index in return for periodic payments based on a fixed or variable interest rate or the change in market value of a different bond, basket of bonds or index. Swap agreements may be used to obtain exposure to a bond or market without owning or taking physical custody of securities. Swap agreements involve the risk that the party with whom each Trust has entered into a swap will default on its obligation to pay the Trusts and the risk that the Trusts will not be able to meet its obligation to pay the other party to the agreement.
