

UROPLASTY INC  
Form 424B3  
November 03, 2005

**PROSPECTUS SUPPLEMENT NO. 6  
(To Prospectus dated July 29, 2005)**

Filed pursuant to Rule 424(b)(3)  
Registration No. 333-126737

**UROPLASTY, INC.  
2,147,142 Shares of Common Stock  
and  
1,180,928 Shares of Common Stock  
Issuable Upon Exercise of Warrants**

This prospectus supplement relates to shares of our common stock that may be sold at various times by certain selling shareholders. You should read this prospectus supplement no. 6 together with the prior prospectus supplements and prospectus dated July 29, 2005, which are to be delivered with this prospectus supplement.

This prospectus supplement contains our Current Report on Form 8-K relating to CE Mark Authorization of the Urgent® PC Neuromodulation System. This report was filed with the Securities and Exchange Commission on November 3, 2005. The attached information supplements and supersedes, in part, the information contained in the prospectus.

Our common stock is traded on the American Stock Exchange under the symbol UPI. On November 2, 2005, the closing price of our common stock on the American Stock Exchange was \$3.19 per share.

*This investment is speculative and involves a high degree of risk. See Risk Factors on page 6 of the prospectus to read about factors you should consider before buying shares of the common stock.*

**Neither the SEC nor any state securities commission has approved or disapproved these securities or passed upon the accuracy or adequacy of this prospectus. Any representation to the contrary is a criminal offense.**

**Item 8.01 Other Events**

The following forward-looking statements are subject to risks and uncertainties. We may not meet our expectations set out below for business and financial reasons. In addition to the specific risks described below, we recommend that you carefully consider the risk factors described in our other SEC filings in evaluating us.

Uroplasty announces the receipt of CE Mark Authorization for the Urgent® PC Neuromodulation System from our European Notified Body. The CE Mark Authorization will allow us to market the Urgent PC Neuromodulation System throughout the European Union for the treatment of overactive bladder symptoms of urinary urgency, urinary frequency, and urge incontinence and for treatment of fecal incontinence.

Sam B. Humphries

President and Chief Executive Officer

**UROPLASTY, INC. ANNOUNCES  
CE MARK AUTHORIZATION FOR URGENT® PC UROLOGICAL & COLON-RECTAL  
NEUROSTIMULATION DEVICE**

**MINNEAPOLIS, MN, November 2, 2005** Uroplasty, Inc. (AMEX: UPI), a medical device company based in Minneapolis with worldwide sales offices in The Netherlands and the United Kingdom, today announced that the company received CE Mark Authorization for the Urgent® PC Neuromodulation System from its European Notified Body. The CE Mark Authorization will allow Uroplasty to market the Urgent PC Neuromodulation System throughout the European Union for the treatment of overactive bladder symptoms of urinary urgency, urinary frequency, and urge incontinence, and for treatment of fecal incontinence.

Sam B. Humphries, President and Chief Executive Officer, stated, "We are pleased to receive Urgent PC marketing clearance in Europe where the company already has a strong sales and distribution network. With marketing clearances in the United States, Canada, and now the European Union, the company seeks to establish this out-patient, non-surgical treatment as a standard of care throughout the world."

**About Uroplasty, Inc.**

In addition to Urgent PC, Uroplasty offers other minimally invasive products for the treatment of voiding dysfunctions, including a mid-urethral sling and proprietary soft tissue bulking products.

The **I-STOP Mid-Urethral Sling** is a biocompatible tension-free sling for the treatment of stress urinary incontinence. Stress urinary incontinence may result from urethral hypermobility, a condition in which the urethra is not properly supported by surrounding tissues and/or may result from intrinsic sphincter deficiency, a condition resulting from weakened muscles surrounding the urethra and bladder neck. The I-STOP sling provides a hammock-like support for the urethra to prevent urine leakage associated with activities such as coughing, laughing, lifting or jumping.

**Macroplastique® Implants** is a proprietary, implantable soft tissue bulking material sold outside the U.S. since 1991 for the treatment of both male and female urinary incontinence. When Macroplastique is injected into tissue around the urethra, it stabilizes and bulks tissues close to the urethra, thereby providing the surrounding muscles with increased capability to control the release of urine. Macroplastique is also used to treat vesicoureteral reflux, a predominately pediatric condition, in which the urine flows backward from the bladder to the kidney. Other proprietary, implantable soft tissue bulking agents sold by Uroplasty outside the U.S. include PTQ Implants for fecal incontinence, VOX® Implants for vocal cord rehabilitation and Bioplastique® Implants for dermal augmentation. The Private Securities Litigation Reform Act of 1995 provides a safe harbor for certain forward-looking statements. This press release contains forward-looking statements relating to regulatory activities, which reflect and affect our views regarding future events and financial performance. These forward-looking statements are subject to certain risks and uncertainties, including those identified below, which could cause actual results to differ materially from historical results or those anticipated. The words aim, believe, expect, anticipate, intend, estimate, and other expressions which indicate future events and trends, identify forward-looking statements. Actual future results and trends may differ materially from historical results or those anticipated depending upon a variety of factors, including, but not limited to: the effect of government regulation, including when and if we receive approval for marketing of our products in the United States; the impact of international currency fluctuations on our cash flows and operating results; the impact of technological innovation and competition; acceptance of our products by physicians and patients; our historical reliance on a single product for most of our current sales; our ability to commercialize our recently licensed product lines; our intellectual property and the ability to prevent competitors from infringing our rights; the ability to receive third party reimbursement for our products; the results of clinical trials; our continued losses and the possible need to raise additional capital in the future; our ability to manage our international operations; our ability to hire and retain key technical and sales personnel; our dependence on key suppliers; future changes in applicable accounting rules; and volatility in our stock price.
