Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****Note 1 Accounting Policies, Management Judgments and Accounting Estimates**

Consolidation: Irwin Financial Corporation and its subsidiaries (the Corporation) provide financial services throughout the United States and Canada. We are engaged in the mortgage banking, commercial banking, home equity lending, and commercial finance lines of business. Our direct and indirect subsidiaries include Irwin Mortgage Corporation, Irwin Union Bank and Trust Company, Irwin Union Bank, F.S.B., Irwin Home Equity Corporation, and Irwin Commercial Finance Corporation. Intercompany balances and transactions have been eliminated in consolidation. In the opinion of management, the financial statements reflect all material adjustments necessary for a fair presentation. The Corporation does not meet the criteria as primary beneficiary for our wholly-owned trusts holding our company-obligated mandatorily redeemable preferred securities established by Financial Accounting Standards Board (FASB) Interpretation No. 46 (FIN 46), Consolidation of Variable Interest Entities. As a result, these trusts are not consolidated.

Use of Estimates: Accounting estimates are an integral part of our financial statements and are based upon our current judgments. Certain accounting estimates are particularly sensitive because of their significance to the financial statements and because of the possibility that future events affecting them may differ from our current judgments or that our use of different assumptions could result in materially different estimates.

Cash and Cash Equivalents Defined: For purposes of the statement of cash flows, we consider cash and due from banks and federal funds sold to be cash equivalents.

Residual Interests: Residual interests are stated at fair value. Unrealized gains and losses are included in earnings. To obtain fair value of residual interests, quoted market prices are used if available. However, quotes are generally not available for residual interests, so we generally estimate fair value based on the present value of expected cash flows using estimates of the key assumptions—prepayment speeds, credit losses, forward yield curves, and discount rates commensurate with the risks involved—that management believes market participants would use to value similar assets. Adjustments to carrying values are recorded as trading gains or losses.

Allowance for Loan and Lease Losses: The allowance for loan and lease losses is an estimate based on management's judgment applying the principles of Statement of Financial Accounting Standards No. 5 (SFAS 5), Accounting for Contingencies, SFAS 114, Accounting by Creditors for Impairment of a Loan, and SFAS 118, Accounting by Creditors for Impairment of a Loan—Income Recognition and Disclosures. The allowance is maintained at a level we believe is adequate to absorb probable losses inherent in the loan and lease portfolio. We perform an assessment of the adequacy of the allowance on a quarterly basis.

Within the allowance, there are specific and expected loss components. The specific loss component is assessed for loans we believe to be impaired in accordance with SFAS 114. We have defined impairment as nonaccrual loans. For loans determined to be impaired, we measure the level of impairment by comparing the loan's carrying value to fair value using one of the following fair value measurement techniques: present value of expected future cash flows, observable market price, or fair value of the associated collateral. An allowance is established when the fair value implies a value that is lower than the carrying value of that loan. In addition to establishing allowance levels for specifically identified higher risk graded loans, management determines an allowance for all other loans in the portfolio for which historical experience indicates that certain losses exist. These loans are segregated by major product type, and in some instances, by aging, with an estimated loss ratio applied against each product type and aging category. The loss ratio is generally based upon historic loss experience for each loan type as adjusted for certain environmental factors management believes to be relevant.

Servicing Assets: When we securitize or sell loans, we generally retain the right to service the underlying loans sold. A portion of the cost basis of loans sold is allocated to this servicing asset based on its fair value relative to the loans sold and the servicing asset combined. We use the market prices under comparable servicing sale contracts, when available, or alternatively use valuation models that calculate the present value of future cash flows to determine the original fair value of the servicing assets. In using this valuation method, we incorporate assumptions that we believe market participants would use in estimating future net servicing income, which include estimates of the cost of servicing per loan, the discount rate, float value, an inflation rate, ancillary income per loan, prepayment speeds, and default rates. Servicing assets are amortized over the estimated lives of the related loans in proportion to estimated net

servicing income.

Table of Contents

In determining servicing value impairment, the servicing portfolio is stratified into its predominant risk characteristics, principally by interest rate and product type. Each stratum is valued using market prices under comparable servicing sale contracts when available, or alternatively, using the same model as was used originally to determine the fair value at origination using current market assumptions. The calculated value is then compared with the book value of each stratum to determine the required reserve for impairment. The impairment reserve fluctuates as interest rates change and, therefore, no reasonable estimate can be made as to future increases or declines in impaired reserve levels. In addition, we periodically have independent valuations performed on the portfolio. Other than temporary impairment is recorded to reflect our view that the originally recorded value of certain servicing rights and subsequent impairment associated with those rights is unlikely to be recovered in market value. There is no related direct impact on net income as this other than temporary impairment affects only balance sheet accounts. However, other than temporary impairment will result in a reduction of amortization expense and potentially reduced recovery of impairment in future periods.

Incentive Servicing Fees: For whole loan sales of certain home equity loans, we have the right to an incentive servicing fee (ISF) that will provide cash payments to us if a pre-established return for the certificate holders and certain structure-specific loan credit and servicing performance metrics are met. These ISF contracts are treated as derivatives under SFAS 133, Accounting for Derivative Instruments and Hedging Activities, and classified in other assets. In the first quarter of 2004, our accounting policy reflected the lack of history for these cash flows and among other factors, required projections of expected cash flows to occur within one year before recognizing any value. In the first quarter of 2005 we concluded our actual servicing experience and the performance of the loan pools subject to these ISFs had demonstrated a level of predictability that has allowed us to refine our accounting policy in accordance with FAS 133 to eliminate the one year to cash flow requirement and recognize derivative value for cash flows expected over time, including ones anticipated to occur beyond one year. Our policy requires discounting these derivatives at rates between 20% and 40%, depending on a variety of factors, including volatility of anticipated cash flows, credit quality, loan-to-value ratio, and anticipated prepayment speeds. ISFs are carried at fair value with the changes to fair value recognized in derivative gains or losses.

Stock-Based Employee Compensation: We have three stock-based employee compensation plans. We use the intrinsic value method to account for our plans under the recognition and measurement principles of APB Opinion No. 25, Accounting for Stock Issued to Employees, and related interpretations. No stock-based employee compensation cost related to stock options is reflected in net income for any of the periods presented, as all options granted under these plans had an exercise price equal to the market value of the underlying common stock on the date of grant. The following table illustrates the effect on net income and earnings per share if we had applied the fair value recognition provisions of SFAS 123, Accounting for Stock-Based Compensation, to stock-based employee compensation:

Income Taxes: A consolidated tax return is filed for all eligible entities. In accordance with SFAS 109, deferred income taxes are computed using the liability method, which establishes a deferred tax asset or liability based on temporary differences between the tax basis of an asset or liability and the basis recorded in the financial statements.

Recent Accounting Developments: In December 2004 the FASB issued a revised Statement 123 (123R), Accounting for Stock-Based Compensation requiring public entities to measure the cost of employee services received in exchange for an award of equity instruments based on grant date fair value. The cost will be recognized over the period during which an employee is required to

Table of Contents

provide service in exchange for the award-usually the vesting period. This statement will be effective for the Company beginning January 1, 2006. We are evaluating the impact of this new pronouncement and expect it to be comparable to the pro forma effects of applying the original SFAS 123 as detailed above.

Reclassifications: Certain amounts in the 2004 consolidated financial statements have been reclassified to conform to the 2005 presentation. These changes had no impact on previously reported net income or shareholders' equity.

Note 2 Loans and Leases

Loans and leases are summarized as follows:

	June 30, 2005	December 31, 2004
	(Dollars in thousands)	
Commercial, financial and agricultural	\$ 1,848,143	\$ 1,697,651
Real estate-construction	364,926	287,496
Real estate-mortgage	1,130,037	808,875
Consumer	39,505	31,166
Commercial finance		
Franchise finance	373,737	330,496
Domestic leasing	197,585	174,035
Canadian leasing	281,930	265,780
Unearned income		
Franchise finance	(96,538)	(86,638)
Domestic leasing	(27,329)	(23,924)
Canadian leasing	(35,485)	(34,497)
Total loans and leases, net of unearned income	\$ 4,076,511	\$ 3,450,440

Note 3 Allowance for Loan and Lease Losses

Changes in the allowance for loan and lease losses are summarized below:

	As of and For the Six Months Ended June 30, 2005	As of and For the Year Ended December 31, 2004
	(Dollars in thousands)	
Balance at beginning of period	\$ 44,443	\$ 64,285
Provision for loan and lease losses	12,163	14,195
Charge-offs	(9,440)	(28,180)
Recoveries	4,044	5,335
Reduction due to reclassification of loans		(10,808)
Reduction due to sale of loans and leases and other	(217)	(627)
Foreign currency adjustment	(58)	243
Balance at end of period	\$ 50,935	\$ 44,443

Table of Contents**Note 4 Servicing Assets**

Included in the consolidated balance sheet at June 30, 2005 and December 31, 2004 are \$287 million and \$367 million, respectively, of capitalized servicing assets. These amounts relate to the principal balances of mortgage and home equity loans serviced by us for investors. Changes in our capitalized servicing assets, net of valuation allowance, are shown below:

	As of and For the Six Months Ended June 30, 2005	As of and For the Year Ended December 31, 2004
	(Dollars in thousands)	
Beginning balance	\$ 367,032	\$ 380,123
Additions	44,696	142,689
Amortization	(53,696)	(117,143)
Impairment	(17,874)	(2,474)
Reduction for servicing sales	(52,768)	(36,163)
	\$ 287,390	\$ 367,032

We have established a valuation allowance to record servicing assets at their fair market value. Changes in the allowance are summarized below:

	June 30, 2005	December 31, 2004
	(Dollars in thousands)	
Balance at beginning of year	\$ 54,134	\$ 76,869
Impairment	17,874	2,474
Reclass for sales of servicing		(18,210)
Other than temporary impairment ⁽¹⁾	(7,111)	(6,999)
Balance at end of period	\$ 64,897	\$ 54,134

⁽¹⁾ Other than temporary impairment was recorded to reflect our view that the originally recorded value of certain servicing rights and subsequent impairment associated with those rights is unlikely to be recovered in market value. There was no related direct impact on net income as this other than temporary impairment affected only balance sheet accounts. However, the write-down will result in a reduction of amortization expense and potentially reduced recovery of impairment in future periods.

Note 5 Short-Term Borrowings

Short-term borrowings are summarized as follows:

	June 30, 2005	December 31, 2004
	(Dollars in thousands)	

Edgar Filing: IRWIN FINANCIAL CORP - Form 10-Q

Federal Home Loan Bank borrowings	\$ 146,793	\$ 71,826
Drafts payable related to mortgage loan closings	124,739	53,254
Lines of credit and other	2,359	2,197
Federal funds	128,600	110,000
Total	\$ 402,491	\$ 237,277
Weighted average interest rate	2.15%	1.64%

12

Table of Contents

Federal Home Loan Bank borrowings are collateralized by loans and loans held for sale.

Drafts payable related to mortgage loan closings are related to mortgage closings that have not been presented to the banks for payment. When presented for payment, these borrowings will be funded internally or by borrowing from the lines of credit.

We also have lines of credit available to fund loan originations and operations with variable rates ranging from 3.6% to 4.5% at June 30, 2005. We have two lines of credit subject to compliance with certain financial covenants set forth in these facilities including, but not limited to, net income, consolidated tangible net worth, return on average assets, nonperforming loans, loan loss reserve, Tier 1 leverage ratio, and risk-based capital ratio. Due to our low level of net income in the first half of 2005, we requested and obtained waivers with respect to these covenants. As a result of these waivers, we are in compliance with all applicable covenants as of June 30, 2005.

Note 6 Collateralized Debt

We pledge or sell loans structured as secured financings at our home equity and commercial finance lines of business. Sale treatment is precluded on these transactions because we fail the true-sale requirements of SFAS 140 as we maintain effective control over the loans and leases securitized. This type of structure results in cash being received, debt being recorded, and the establishment of an allowance for credit losses. The notes associated with these transactions are collateralized by \$0.8 billion in home equity loans, home equity lines of credit, and leases. The principal and interest on these debt securities are paid using the cash flows from the underlying loans and leases. Accordingly, the timing of the principal payments on these debt securities is dependent on the payments received on the underlying collateral. The interest rates on the bonds are generally at a floating rate. In certain cases, we enter into swaps to address inherent interest rate risk against fixed rate loans and leases.

Collateralized debt is summarized as follows:

		Weighted Average Interest Rate at		
	Maturity	June 30, 2005	June 30, 2005	December 31, 2004
			(Dollars in thousands)	
Commercial finance line of business				
2003 domestic asset backed note	7/2010	4.52	\$ 20,182	\$ 29,050
Canadian asset backed note	4/2010	3.36	117,909	95,288
Canadian asset backed note	10/2009	4.50	17,798	21,713
Canadian asset backed note	revolving	3.73	50,236	48,801
Home equity line of business				
2004-1 asset backed notes:				
Combined variable rate senior notes	12/2024-12/2034	3.44	228,013	327,850
Combined variable rate subordinate notes	12/2034	4.29	24,775	24,775
2005-1 asset backed notes:				
Combined variable rate senior notes	6/2025-6/2035	3.50	193,894	
Combined fixed rate senior notes	6/2035	5.01	94,129	
Combined variable rate subordinate notes	6/2035	5.09	10,785	
Combined fixed rate subordinate notes	6/2035	5.63	52,127	
Unamortized premium/discount			(175)	

Total	\$ 809,673	\$ 547,477
-------	------------	------------

For one of the Canadian asset backed notes, we are subject to compliance with certain financial covenants set forth in this facility including, but not limited to consolidated tangible net worth, return on average assets, nonperforming loans, loan loss reserve, Tier 1 leverage ratio, and risk-based capital ratio. Due to our low level of net income in the first half of 2005, we requested and obtained

Table of Contents

waiver with respect to the return on average assets ratio covenant. As a result of this waiver, we are in compliance with all applicable covenants as of June 30, 2005.

Note 7 Employee Retirement Plans

Components of net periodic cost of pension benefit:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2005	2004	2005	2004
	(Dollars in thousands)		(Dollars in thousands)	
Service cost	\$ 747	\$ 494	\$ 1,428	\$ 988
Interest cost	455	456	871	911
Expected return on plan assets	(510)	(404)	(956)	(809)
Amortization of transition obligation		2		5
Amortization of prior service cost	10	9	19	19
Amortization of actuarial loss	179	176	343	351
Net periodic benefit cost	\$ 881	\$ 733	\$ 1,705	\$ 1,465

As of June 30, 2005, we have not made any contributions to our pension plan and do not expect to contribute to this plan in 2005.

Note 8 Earnings Per Share

Earnings per share calculations are summarized as follows:

	Basic Earnings Per Share	Effect of Stock Options	Effect of Convertible Shares *	Diluted Earnings Per Share
	(Dollars in thousands, except per share data)			
Three months ended June 30, 2005				
Net income (loss) available to common shareholders	\$ (1,144)	\$	\$	\$ (1,144)
Shares	28,506	240		28,746
Per-Share amount	\$ (0.04)	\$	\$	\$ (0.04)
Three months ended June 30, 2004				
Net income available to common shareholders	\$ 17,944	\$	\$ 678	\$ 18,622
Shares	28,244	334	2,607	31,185
Per-Share amount	\$ 0.64	\$ (0.01)	\$ (0.03)	\$ 0.60
Six Months ended June 30, 2005				
Net income available to common shareholders	\$ 2,480	\$	\$	\$ 2,480
Shares	28,482	288		28,770
Per-Share amount	\$ 0.09	\$	\$	\$ 0.09

Six Months ended June 30, 2004

Net income available to common shareholders	\$ 38,286	\$	\$ 1,356	\$ 39,642
Shares	28,218	422	2,607	31,247
Per-Share amount	\$ 1.36	\$ (0.02)	\$ (0.07)	\$ 1.27

* The effect of convertible shares was not included in this calculation for 2005 because they were antidilutive.

Table of Contents

At June 30, 2005 and 2004, 1,234,735 and 94,086 shares, respectively, related to stock options, were not included in the dilutive earnings per share calculation because they had exercise prices below the stock price as of the respective dates.

Note 9 Industry Segment Information

We have four principal segments that provide a broad range of financial services. The mortgage banking line of business originates, sells, and services residential first mortgage loans. The commercial banking line of business provides commercial banking services. The home equity lending line of business originates, purchases, sells and services home equity loans and lines of credit. The commercial finance line of business originates leases and loans against commercial equipment and real estate. Our other segment primarily includes the parent company, our private equity portfolio, and eliminations.

The accounting policies of each segment are the same as those described in Note 1 Accounting Policies, Management Judgments and Accounting Estimates. Below is a summary of each segment's revenues, net income, and assets for three months and six months ended June 30, 2005, and 2004:

Table of Contents

	Mortgage Banking	Commercial Banking	Home Equity Lending (Dollars in thousands)	Commercial Finance	Other	Consolidated
Three Months Ended June 30, 2005

Table of Contents**Note 10 Commitments and Contingencies***Culpepper v. Inland Mortgage Corporation*

Our indirect subsidiary, Irwin Mortgage Corporation (formerly Inland Mortgage Corporation), is a defendant in a class action lawsuit in the United States District Court for the Northern District of Alabama, filed in April 1996, alleging that Irwin Mortgage violated the federal Real Estate Settlement Procedures Act (RESPA) relating to Irwin Mortgage's payment of broker fees to mortgage brokers. In June 2001, the Court of Appeals for the 11th Circuit upheld the district court's certification of a plaintiff class and the case was remanded for further proceedings in the federal district court.

In November 2001, by order of the district court, the parties filed supplemental briefs analyzing the impact of an October 18, 2001 policy statement issued by the Department of Housing and Urban Development (HUD) that explicitly disagreed with the judicial interpretation of RESPA by the Court of Appeals for the 11th Circuit in its ruling upholding class certification in this case. In response to a motion from Irwin Mortgage, in March 2002, the district court granted Irwin Mortgage's motion to stay proceedings in this case until the 11th Circuit decided the three other RESPA cases originally argued before it with this case.

The 11th Circuit subsequently decided all of the RESPA cases pending in that court. In one of those cases, the 11th Circuit concluded that the trial court had abused its discretion in certifying a class action under RESPA. Further, in that decision, the 11th Circuit expressly recognized it was, in effect, overruling its previous decision upholding class certification in our case. In March 2003, Irwin Mortgage filed a motion to decertify the class and the plaintiffs filed a renewed motion for summary judgment. On October 2, 2003 the case was reassigned to another U.S. district court judge. In response to an order from the court, the parties met and submitted a joint status report at the end of October 2003. On June 14, 2004, at the court's request, the parties engaged in mediation, which was unsuccessful. The court then reassigned this case to a new judge. Pursuant to the court's order on March 17, 2005, Irwin Mortgage filed a motion for summary judgment and updated its motion to decertify the class; the plaintiffs updated their motion for summary judgment.

If the class is not decertified and the district court finds that Irwin Mortgage violated RESPA, Irwin Mortgage could be liable for damages equal to three times the amount of that portion of payments made to the mortgage brokers that is ruled unlawful. Based on notices sent by the plaintiffs to date to potential class members and additional notices that might be sent in this case, we believe the class is not likely to exceed 32,000 borrowers who meet the class specifications.

Irwin Mortgage intends to defend this lawsuit vigorously and believes it has numerous defenses to the alleged violations. Irwin Mortgage further believes that the 11th Circuit's RESPA rulings in the cases argued before it with this one provide grounds for reversal of the class certification in this case. We have no assurance, however, that Irwin Mortgage will be successful in defeating class certification or will ultimately prevail on the merits. We expect that an adverse outcome in this case could result in substantial monetary damages that could be material to our financial position. We have not established any reserves for this case and are unable at this stage of the litigation to form a reasonable estimate of potential loss that we could suffer.

United States ex rel. Paranich v. Sorgnard et al.

In January 2001, we and Irwin Leasing Corporation (formerly Affiliated Capital Corp.), our indirect subsidiary, and Irwin Equipment Finance Corporation, our direct subsidiary (together, the Irwin companies), were served as defendants in an action filed in the United States District Court for the Middle District of Pennsylvania. The suit alleged that a manufacturer/importer of certain medical devices made misrepresentations to health care professionals and to government officials to improperly obtain Medicare reimbursement for treatments using the devices, and that the Irwin companies, through Affiliated Capital's financing activities, aided in making the alleged misrepresentations. On August 10, 2001, the court dismissed Irwin Financial and Irwin Equipment Finance as defendants in the suit. The Irwin companies prevailed on a motion for summary judgment in the district court on October 8, 2003, and the plaintiff appealed. The Court of Appeals for the 3rd Circuit heard oral argument on plaintiff's appeal on September 27, 2004. On January 28, 2005, the court of appeals affirmed the district court's dismissal of plaintiff's action. The period during which the plaintiff could have petitioned the United States Supreme Court for a writ of certiorari expired on April 28, 2005, and no petition was filed.

Table of Contents*Stamper v. A Home of Your Own*

Our indirect subsidiary, Irwin Mortgage Corporation, is a defendant in a case filed in August 1998 in the Baltimore, Maryland, City Circuit Court. On January 25, 2002, a jury in this case awarded the plaintiffs damages of \$1.434 million jointly and severally against defendants, including Irwin Mortgage. The nine plaintiff borrowers alleged that a home rehabilitation company defrauded the plaintiffs by selling them defective homes at inflated prices and that Irwin Mortgage, which provided the plaintiff borrowers mortgage loans on the home purchases, participated in the fraud. Irwin Mortgage filed an appeal with the Maryland Court of Special Appeals and oral argument was held on January 7, 2003. On February 27, 2004, the Court of Special Appeals ruled against Irwin Mortgage and remanded the case to the trial court for a partial retrial on whether the plaintiffs are entitled to punitive damages. Irwin Mortgage petitioned the Maryland Court of Appeals for a writ of certiorari on April 12, 2004. The Court of Appeals granted Irwin Mortgage's petition and heard oral argument on November 4, 2004. On February 4, 2005, the Court of Appeals affirmed in part and reversed in part the judgment of the Court of Special Appeals, remanding the case as follows: to modify the judgment for all plaintiffs by striking the award of \$145,000 per plaintiff for non-economic damages; for further proceedings concerning one plaintiff as to non-economic damages; and for a new trial as to punitive damages. We have reserved for this case based upon SFAS 5 guidance and the advice of legal counsel.

Silke v. Irwin Mortgage Corporation

In April 2003, our indirect subsidiary, Irwin Mortgage Corporation, was named as a defendant in a class action lawsuit filed in the Marion County, Indiana, Superior Court. The complaint alleges that Irwin Mortgage charged a document preparation fee in violation of Indiana law for services performed by clerical personnel in completing legal documents related to mortgage loans. Irwin Mortgage filed an answer on June 11, 2003 and a motion for summary judgment on October 27, 2003. On June 18, 2004, the court certified a plaintiff class consisting of Indiana borrowers who were allegedly charged the fee by Irwin Mortgage any time after April 17, 1997. This date was later clarified by stipulation of the parties to be April 14, 1997. In November 2004, the court heard arguments on Irwin Mortgage's motion for summary judgment and plaintiffs' motion seeking to send out class notice. We are unable at this time to form a reasonable estimate of the amount of potential loss, if any, that Irwin Mortgage could suffer. We have not established any reserves for this case.

Cohens v. Inland Mortgage Corporation

In October 2003, our indirect subsidiary, Irwin Mortgage Corporation (formerly Inland Mortgage Corporation), was named as a defendant, along with others, in an action filed in the Supreme Court of New York, County of Kings. The plaintiffs, a mother and two children, allege they were injured from lead contamination while living in premises allegedly owned by the defendants. The suit seeks approximately \$41 million in damages and alleges negligence, breach of implied warranty of habitability and fitness for intended use, loss of services and the cost of medical treatment. On June 15, 2005, Irwin Mortgage filed an answer and cross-claims seeking dismissal of the complaint. We are unable at this time to form a reasonable estimate of the amount of potential loss, if any, that Irwin Mortgage could suffer. We have not established any reserves for this case.

Litigation in Connection with Loans Purchased from Community Bank of Northern Virginia

Our subsidiary, Irwin Union Bank and Trust Company, is a defendant in several actions in connection with loans Irwin Union Bank purchased from Community Bank of Northern Virginia (Community).

Hobson v. Irwin Union Bank and Trust Company was filed on July 30, 2004 in the United States District Court for the Northern District of Alabama. As amended on August 30, 2004, the *Hobson* complaint, seeks certification of both a plaintiffs' and a defendants' class, the plaintiffs' class to consist of all persons who obtained loans from Community and whose loans were purchased by Irwin Union Bank. *Hobson* alleges that defendants violated the Truth-in-Lending Act (TILA), the Home Ownership and Equity Protection Act (HOEPA), the Real Estate Settlement Procedures Act (RESPA) and the Racketeer Influenced and Corrupt Organizations Act (RICO). On October 12, 2004, Irwin filed a motion to dismiss the *Hobson* claims as untimely filed and substantively defective. On March 4, 2005, the court held a hearing on Irwin's motion to dismiss.

Kossler v. Community Bank of Northern Virginia was originally filed in July 2002 in the United States District Court for the Western District of Pennsylvania. Irwin Union Bank and Trust was added as a defendant in December 2004. The *Kossler* complaint seeks certification of a plaintiffs' class and seeks to void the mortgage loans as

illegal contracts. Plaintiffs also seek recovery against Irwin for alleged RESPA violations and for conversion. On June 23, 2005, Irwin filed a motion to dismiss the *Kossler* action.

The plaintiffs in *Hobson* and *Kossler* claim that Community was allegedly engaged in a lending arrangement involving the use of its charter by certain third parties who charged high fees that were not representative of the services rendered and not properly disclosed as to the amount or recipient of the fees. The loans in question are allegedly high cost/high interest loans under Section 32 of

Table of Contents

HOEPA. Plaintiffs also allege illegal kickbacks and fee splitting. In *Hobson*, the plaintiffs allege that Irwin was aware of Community's alleged arrangement when Irwin purchased the loans and that Irwin participated in a RICO enterprise and conspiracy related to the loans. Because Irwin bought the loans from Community, the *Hobson* plaintiffs are alleging that Irwin has assignee liability under HOEPA.

If the *Hobson* and *Kossler* plaintiffs are successful in establishing a class and prevailing at trial, possible RESPA remedies could include treble damages for each service for which there was an unearned fee, kickback or overvalued service. Other possible damages in *Hobson* could include TILA remedies, such as rescission, actual damages, statutory damages not to exceed the lesser of \$500,000 or 1% of the net worth of the creditor, and attorneys' fees and costs; possible HOEPA remedies could include the refunding of all closing costs, finance charges and fees paid by the borrower; RICO remedies could include treble plaintiffs' actually proved damages. In addition, the *Hobson* plaintiffs are seeking unspecified punitive damages. Under TILA, HOEPA, RESPA and RICO, statutory remedies include recovery of attorneys' fees and costs. Other possible damages in *Kossler* could include the refunding of all origination fees paid by the plaintiffs.

Irwin Union Bank and Trust Company is also a defendant, along with Community, in two individual actions (*Chatfield v. Irwin Union Bank and Trust Company, et al.* and *Ransom v. Irwin Union Bank and Trust Company, et al.*) filed on June 9, 2004 in the Circuit Court of Frederick County, Maryland, involving mortgage loans Irwin Union Bank purchased from Community. On July 16, 2004, both of these lawsuits were removed to the United States District Court for the District of Maryland. The complaints allege that the plaintiffs did not receive disclosures required under HOEPA and TILA. The lawsuits also allege violations of Maryland law because the plaintiffs were allegedly charged or contracted for a prepayment penalty fee. Irwin believes the plaintiffs received the required disclosures and that Community, a Virginia-chartered bank, was permitted to charge prepayment fees to Maryland borrowers. Under the loan purchase agreements between Irwin and Community, Irwin has the right to demand repurchase of the mortgage loans and to seek indemnification from Community for the claims in these lawsuits. On September 17, 2004, Irwin made a demand for indemnification and a defense to *Hobson, Chatfield and Ransom*. Community denied this request as premature.

On December 22, 2004, Irwin filed a motion with the Judicial Panel On Multidistrict Litigation requesting a transfer of *Hobson, Chatfield and Ransom* to the United States District Court for the Western District of Pennsylvania for coordinated or consolidated proceedings with the *Kossler* action. On April 28, 2005, the Judicial Panel On Multidistrict Litigation granted Irwin's motion and consolidated the four cases in the Western District of Pennsylvania for all pretrial proceedings.

At this early stage, we are unable to form a reasonable estimate of the amount of potential loss, if any, that Irwin could suffer. We have established a reserve for the Community litigation based upon SFAS 5 guidance and the advice of legal counsel.

Litigation Related to NorVergence, Inc.

Irwin Business Finance, our indirect subsidiary, is involved on a national basis in equipment leasing finance and maintains a diverse portfolio of leases, including leases in the telecommunications field. A portion of Irwin's telecommunications portfolio involves leases of equipment acquired from NorVergence, Inc., a New Jersey-based telecommunications company. After assigning leases to Irwin and other lenders, NorVergence became a debtor in a Chapter 7 bankruptcy, which is currently pending in the United States Bankruptcy Court in New Jersey. The sudden failure of NorVergence left many of its customers without telecommunications service. These customers became very angry when commitments made to them by NorVergence went unfulfilled.

Complaints by former NorVergence customers have led to investigations by the attorneys general of several states. Irwin Business Finance has been named as a defendant in several lawsuits connected with NorVergence. *Exquisite Caterers, LLC et al. v. Popular Leasing et al.* is a lawsuit filed in the Superior Court of New Jersey, Monmouth County, and was amended to include Irwin Business Finance and others on September 1, 2004. The *Exquisite Caterers* plaintiffs seek certification of a class of persons who leased network computer equipment from NorVergence, whose leases were assigned to defendants. The complaint alleges that NorVergence misrepresented the services and equipment provided, that the lessees were defrauded and the lease agreements should not be enforced. The action alleges violations of, among other things, the New Jersey Consumer Fraud Act; the New Jersey

Truth-in-Consumer Contract, Warranty, and Notice Act; the FTC Holder Rule; the FTC Act; and breach of contract and implied warranties. The plaintiffs seek compensatory, statutory and punitive damages, and injunctive relief, including rescission of the leases and cessation of collections. On June 16, 2005, the judge in the *Exquisite Caterers* lawsuit denied Plaintiffs' alternative motions for certification of either a nationwide class or a class of New Jersey residents only. Plaintiffs have filed a motion for reconsideration of the order denying certification of a class limited to New Jersey residents. A hearing on the motion for reconsideration is scheduled for early August 2005.

Table of Contents

Irwin Business Finance was also named as a defendant, along with other lenders, in *Delanco Board of Education et al. v. IFC Credit Corporation*, a lawsuit filed in the Superior Court of New Jersey, Essex County, Chancery Division, in October 2004 in connection with leases assigned to the lenders by NorVergence. (IFC Credit Corporation is not affiliated with Irwin Financial Corporation or Irwin Business Finance.) The suit involved more than one thousand plaintiffs and alleged fraud, misrepresentation and violations of the New Jersey Consumer Fraud law based on alleged conduct similar to that in *Exquisite Caterers*, with the addition of a count under the New Jersey RICO statute. Plaintiffs also alleged unjust enrichment and conversion and sought rescission of the leases plus punitive and other damages. After failing in an attempt to obtain a temporary injunction, the plaintiffs agreed to withdraw the complaint filed in the Superior Court and have now commenced adversary actions in the NorVergence bankruptcy proceeding, seeking similar relief. Irwin Business Finance has filed a motion to dismiss it from the adversary proceeding and is awaiting the court's ruling on the motion.

Irwin Business Finance was also named as a defendant, along with other lenders, in *Sterling Asset & Equity Corp. et al. v. Preferred Capital, Inc. et al.*, an action filed in the United States District Court for the Southern District of Florida in October 2004, which was voluntarily dismissed in January 2005. The plaintiffs then filed a similar complaint in the Circuit Court of the 11th Judicial Circuit, Miami-Dade County, Florida on January 14, 2005 seeking class certification on behalf of Florida persons or entities who leased equipment from NorVergence and whose agreement was assigned to one of the named lenders. The plaintiffs alleged that NorVergence engaged in false, misleading and deceptive sales and billing practices. The complaint alleges violations of the Florida Deceptive and Unfair Trade Practices Act, the FTC Holder Rule, and breach of contract and warranties. Plaintiffs sought, among other relief, compensatory and punitive damages, injunctive and/or declaratory relief prohibiting enforcement of the leases, rescission, return of payments, interest, attorneys' fees and costs. Plaintiffs voluntarily dismissed this action in June of 2005 after Irwin Business Finance had filed its motion to dismiss the complaint.

In connection with investigations by various state attorneys general, Irwin Business Finance and other lenders were asked to produce information about their relationships with NorVergence and to refrain from enforcing NorVergence leases. Irwin Business Finance is pursuing discussions with all states in which it has customers who executed agreements with NorVergence and has discontinued collection activities while discussions are in progress. Irwin has now reached agreements with: the Attorney General of California, providing for recovery of 15% of outstanding balances on California leases as of July 15, 2004, and with the Attorney General of Florida, entitling Irwin to lease payments through January 31, 2005. Irwin also is participating in negotiations with a multi-state group of attorneys general, which appears to be progressing towards an agreement that would require NorVergence lessees in their states to pay all amounts due through July 15, 2004, with the lenders, including Irwin, entitled to 15% of the then-outstanding balance.

On October 21, 2004, the Attorney General of Florida filed suit against twelve lenders, including Irwin Business Finance, in the Circuit Court of the Second Judicial Circuit, Leon County, Florida (*State of Florida v. Commerce Commercial Leasing, LLC et al.*). This suit was stayed by agreement of the parties while they discussed resolution of the concerns expressed by the Florida Attorney General. The complaint alleged that the agreements assigned by NorVergence to the lenders were unconscionable under the Florida Deceptive and Unfair Trade Practices Act. The suit also sought to prohibit collection activities by the lenders and asked for repayment of revenues, rescission of the agreements, restitution, recovery of actual damages, and civil money penalties. On April 29, 2005, acting on defendants' motion to dismiss, the judge in the *Commerce Commercial Leasing* action dismissed the action in its entirety. The Attorney General of Florida appealed the order of dismissal. Irwin Business Finance has now been dismissed from the appeal as a result of its settlement with the state of Florida.

The individual lawsuit filed against Irwin Business Finance in September 2004 in the Superior Court of Massachusetts has been put on hold pending discussions with the multi-state group of attorneys general, of which the Attorney General of Massachusetts is a participant.

On April 5, 2005, Irwin Business Finance received an informal request for information and documents from the Federal Trade Commission. Irwin has fully responded to this request.

We are unable to form a reasonable estimate of potential loss, if any, that Irwin Business Finance could suffer as a result of ongoing NorVergence-related litigation. Agreements with the various state attorneys general and recent

favorable court rulings have significantly reduced the risk that damages might be awarded against Irwin Business Finance in NorVergence-related class actions and other lawsuits. We have not established reserves in connection with NorVergence-related litigation.

We and our subsidiaries are from time to time engaged in various matters of litigation, including the matters described above, other assertions of improper or fraudulent loan practices or lending violations, and other matters, and we have a number of unresolved claims pending. In addition, as part of the ordinary course of business, we and our subsidiaries are parties to litigation involving claims

Table of Contents

to the ownership of funds in particular accounts, the collection of delinquent accounts, challenges to security interests in collateral, and foreclosure interests, that are incidental to our regular business activities. While the ultimate liability with respect to these other litigation matters and claims cannot be determined at this time, we believe that damages, if any, and other amounts relating to pending matters are not likely to be material to our consolidated financial position or results of operations, except as described above. Reserves are established for these various matters of litigation, when appropriate under SFAS 5, based in part upon the advice of legal counsel.

**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.
About Forward-looking Statements**

You should read the following discussion in conjunction with our consolidated financial statements, footnotes, and tables. This discussion and other sections of this report contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. We intend such forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995 and are including this statement for purposes of invoking these safe harbor provisions.

Forward-looking statements are based on management's expectations, estimates, projections, and assumptions. These statements involve inherent risks and uncertainties that are difficult to predict and are not guarantees of future performance. In addition, our past results of operations do not necessarily indicate our future results. Words that convey our beliefs, views, expectations, assumptions, estimates, forecasts, outlook and projections or similar language, or that indicate events we believe could, would, should, may or will occur (or might not occur) or are likely (or unlikely) to occur, and similar expressions, are intended to identify forward-looking statements. These may include, among other things, statements and assumptions about:

- our projected revenues, earnings or earnings per share, as well as management's short-term and long-term performance goals;

- projected trends or potential changes in our asset quality, loan delinquencies, asset valuations, capital ratios or financial performance measures;

- our plans and strategies, including the expected results or impact of implementing such plans and strategies;

- potential litigation developments and the anticipated impact of potential outcomes of pending legal matters;

- the anticipated effects on results of operations or financial condition from recent developments or events; and

- any other projections or expressions that are not historical facts.

Actual future results may differ materially from what is projected due to a variety of factors, including, but not limited to:

- potential changes in and volatility of interest rates, which may affect consumer demand for our products and the management and success of our interest rate risk management strategies;

- staffing fluctuations in response to product demand;

- the relative profitability of our lending operations;

- the valuation and management of our residual, servicing and derivative portfolios, including assumptions we embed in the valuation and short-term swings in valuation of such portfolios due to quarter-end movements in secondary market interest rates, which are inherently volatile;

- borrowers' refinancing opportunities, which may affect the prepayment assumptions used in our valuation estimates and which may affect loan demand;

- unanticipated deterioration in the credit quality of our loan and lease assets;

unanticipated deterioration in or changes in estimates of the carrying value of our other assets, including securities;

difficulties in delivering products to the secondary market as planned;

difficulties in expanding our businesses and obtaining funding as needed;

competition from other financial service providers for experienced managers as well as for customers;

changes in the value of companies in which we invest;

changes in variable compensation plans related to the performance and valuation of lines of business where we tie compensation systems to line-of-business performance;

unanticipated outcomes in litigation;

legislative or regulatory changes, including changes in tax laws or regulations, changes in the interpretation of regulatory capital rules, changes in consumer or commercial lending rules, disclosure rules, or rules affecting corporate governance, and the availability of resources to address these rules;

changes in applicable accounting policies or principles or their application to our business or final audit adjustments; and

governmental changes in monetary or fiscal policies.

We undertake no obligation to update publicly any of these statements in light of future events, except as required in subsequent periodic reports we file with the Securities and Exchange Commission.

Table of Contents

Strategy

Our strategy is to maintain a diverse and balanced revenue stream by focusing on niches in financial services where we believe we can optimize the productivity of our capital and where our experience and expertise can provide a competitive advantage. Our operational objectives are premised on simultaneously achieving three goals: creditworthiness, profitability and growth. We believe we must continually balance these goals in order to deliver long-term value to all of our stakeholders. We have developed a four-part strategy to meet these goals:

Identify underserved niches. We focus on product or market *niches in financial services* that we believe are *underserved* and where we believe customers are willing to pay a premium for value-added services. We do not believe it is necessary to be the largest or leading market share company in any of our product lines, but we do believe it is important that we are viewed as a preferred provider in niche segments of those product offerings.

Hire exceptional management with niche expertise. We enter niches only when we have attracted *senior managers* who have proven track records in the niche for which they are responsible. Each of our four lines of business has a separate management team that operates as an independent business unit responsible for performance goals specific to that particular line of business. Our structure allows the senior managers of each line of business to focus their efforts on understanding their customers and meeting the needs of the markets they serve. This structure also promotes accountability among managers of each enterprise. The senior managers at each of our lines of business and at the parent company have significant industry experience. We attempt to create a mix of short-term and long-term incentives that provide these managers with the incentive to achieve *creditworthy, profitable growth* over the long term.

Diversify capital and earnings risk. We *diversify* our *revenues* and allocate our *capital* across complementary lines of business as a key part of our risk management. Our lines of business are cyclical, but when combined in an appropriate mix, we believe they provide sources of diversification and opportunities for growth in a variety of economic conditions.

Reinvest in new opportunities. We *reinvest* on an ongoing basis in the development of new and existing opportunities. As a result of our attention to long-term value creation, we believe it is important at times to dampen short-term earnings growth by investing for future return. We are biased toward seeking new growth through organic expansion of existing lines of business. At times we will initiate a new line through a start-up, with highly qualified managers we select to focus on a single line of business. Over the past ten years, we have made only a few acquisitions. Those have typically not been in competitive bidding situations.

We believe our historical growth and profitability is the result of our endeavors to pursue complementary consumer and commercial lending niches through our bank holding company structure, our experienced management, our diverse product and geographic markets, and our willingness and ability to align the compensation structure of each of our lines of business with the interests of our stakeholders. Although net income has been below targets in recent quarters, over the long term, through various economic environments and cycles, we have had a relatively stable revenue and earnings stream on a consolidated basis generated primarily through internal growth rather than acquisitions.

Critical Accounting Policies/Management Judgments and Accounting Estimates

Accounting estimates are an integral part of our financial statements and are based upon our current judgments. Certain accounting estimates are particularly sensitive because of their significance to the financial statements and because of the possibility that future events affecting them may differ from our current judgments or that our use of different assumptions could result in materially different estimates. The following is a description of the critical accounting policies we apply to material financial statement items, all of which require the use of accounting estimates and/or judgment. In addition, below is our policy for incentive servicing fees. We have added this policy to our list of critical accounting policies due to the nature of the policy (requires accounting estimates and/or judgment) and the financial statement impact.

Incentive Servicing Fees: For whole loan sales of certain home equity loans, we have the right to an incentive servicing fee (ISF) that will provide cash payments to us if a pre-established return for the certificate holders and certain structure-specific loan credit and servicing performance metrics are met. These ISF contracts are treated as derivatives under SFAS 133, Accounting for Derivative Instruments and Hedging Activities, and classified in other assets. In the first quarter of 2004 our accounting policy reflected the lack of history for these cash flows and among other factors, required projections of expected cash flows to occur within one year

Table of Contents

before recognizing any value. In the first quarter of 2005 we concluded our actual servicing experience and the performance of the loan pools subject to these ISFs had demonstrated a level of predictability that has allowed us to refine our accounting policy in accordance to SFAS 133 to eliminate the one-year-to-cash-flow requirement and recognize derivative value for cash flows expected over time, including ones anticipated to occur beyond one year. Our policy requires discounting these derivatives at rates between 20% and 40%, depending on a variety of factors, including volatility of anticipated cash flows, credit quality, loan-to-value ratio, and anticipated prepayment speeds. ISFs are carried at fair value with the changes to fair value recognized in derivative gains/losses.

Consolidated Overview

	For the three months ended June 30,		For the six months ended June 30,	
	2005	2004	2005	2004
Net income (loss) (in millions)	\$ (1.1)	\$ 17.9	\$ 2.5	\$ 38.3
Basic earnings per share	(0.04)	0.64	0.09	1.36
Diluted earnings per share	(0.04)	0.60	0.09	1.27
Return on average equity	(0.9)%	15.4%	1.0%	15.8%
Return on average assets	(0.1)	1.4	0.1	1.5

Consolidated Income Statement Analysis*Net Income*

We recorded a net loss of \$1.1 million for the three months ended June 30, 2005, down from net income of \$17.9 million for the three months ended June 30, 2004. Net income per share (diluted) was \$(0.04) for the quarter ended June 30, 2005, down from \$0.60 per share for the second quarter of 2004. Return on equity was negative (0.9)% for the three months ended June 30, 2005 and 15.4% for the same period in 2004. For the year to date, we recorded net income of \$2.5 million or \$0.09 per diluted share. This represents a decrease of 93% compared to the same periods in 2004. Return on equity for the six-month period ended June 30, 2005 was 1.0% compared with 15.8% during the same period a year earlier.

The decline in 2005 earnings is attributable to results in our first mortgage segment. We continue to experience low origination margins and the effectiveness of our management of our servicing asset has declined over the past few quarters, leading to net impairment charges. We are actively addressing both issues through new product introductions, cost control initiatives, and changes to our servicing asset hedging strategies. See the discussion on Mortgage Banking line of business for more details.

Net Interest Income

Net interest income for the six months ended June 30, 2005 totaled \$125 million, up 1% from the first half of 2004 net interest income of \$123 million. Net interest margin for the six months ended June 30, 2005 was 5.17% compared to 5.60% for the same period in 2004. The decline in margin from 2004 to 2005 was primarily due to product mix changes and pricing pressures. The following table shows our daily average consolidated balance sheet, interest rates and yield at the dates indicated:

Table of Contents

	For the Six Months Ended June 30,

Net interest income		\$ 125,058	\$ 123,459
Net interest income to average interest earning assets		5.17%	5.60%

(1) We do not show interest income on a tax equivalent basis because it is immaterial.

(2) For purposes of these computations, nonaccrual loans are included in daily average loan amounts outstanding.

Provision for Loan and Lease Losses

The consolidated provision for loan and lease losses for the three months ended June 30, 2005 was \$9 million, compared to \$2 million for the same period in 2004. Year to date, the provision for 2005 was \$12 million, compared to \$10 million in 2004. More information on this subject is contained in the section on credit risk.

Noninterest Income

Noninterest income during the three months ended June 30, 2005 totaled \$22 million, compared to \$76 million for the same period of 2004. Noninterest income of \$69 million was recorded for the six months ended June 30, 2005 and \$159 million for the same

Table of Contents

period in 2004. The decrease in 2005 versus 2004 related primarily to the mortgage banking line of business. Contributing to the year-to-date decrease were \$18 million of servicing asset impairment, \$24 million of losses on derivative instruments used to hedge our servicing assets, and lower gains from sales of loans. Details related to these fluctuations are discussed later in the *Mortgage Banking* section of this document.

Noninterest Expense

Noninterest expenses for the three and six months ended June 30, 2005 totaled \$80 million and \$178 million, respectively, compared to \$108 million and \$208 million for the same periods in 2004. The decrease in consolidated noninterest expense in 2005 is primarily related to personnel cost reductions associated with our mortgage banking line of business.

Income Tax Provision

Income tax provision for the three and six months ended June 30, 2005 totaled \$(0.6) million and \$0.8 million, respectively, compared to \$12.8 million and \$25.5 million during the same periods in 2004. Our effective tax rate decreased to 24.6% during the first half of 2005 due primarily to the release of \$0.8 million in tax reserves to align our tax liability to a level commensurate with our currently identified tax exposures.

Consolidated Balance Sheet Analysis

Total assets at June 30, 2005 were \$6.1 billion, up 16% from December 31, 2004. Average assets for the first six months of 2005 were \$5.6 billion, up 5% from the average assets for the year ended December 31, 2004. The growth in the consolidated balance sheet primarily relates to increases in loans at the commercial banking and home equity lending lines of business.

Investment Securities

The following table shows the composition of our investment securities at the dates indicated:

	June 30, 2005	December 31, 2004
	(Dollars in thousands)	
U.S. Treasury and government obligations	\$ 159	\$ 3,556
Obligations of states and political subdivisions	5,819	3,746
Mortgage-backed securities	31,875	31,556
Federal Reserve stock, Federal Home Loan Bank stock and other	69,860	69,364
Total	\$107,713	\$108,222

Loans Held For Sale

Loans held for sale totaled \$1.0 billion at June 30, 2005, an increase from a balance of \$0.9 billion at December 31, 2004. The increase occurred primarily at our home equity lending line of business where loans held for sale increased from \$0.2 billion at December 31, 2004 to \$0.3 billion at June 30, 2005.

Loans and Leases

Our commercial loans and leases are originated throughout the United States and Canada. At June 30, 2005, 94% of our loan and lease portfolio was associated with our U.S. operations. We also extend credit to consumers throughout the United States through mortgages, installment loans and revolving credit arrangements. Loans by major category for the periods presented were as follows:

Canadian leasing	281,930	265,780
Unearned income		
Franchise finance	(96,538)	(86,638)
Domestic leasing	(27,329)	(23,924)
Canadian leasing	(35,485)	(34,497)
Total loans and leases, net of unearned income	\$4,076,511	\$3,450,440

Allowance for Loan and Lease Losses

Changes in the allowance for loan and lease losses are summarized below:

	As of and For the Six Months Ended June 30, 2005	As of and For the Year Ended December 31, 2004
	(Dollars in thousands)	
Balance at beginning of period	\$44,443	\$ 64,285
Provision for loan and lease losses	12,163	14,195
Charge-offs	(9,440)	(28,180)
Recoveries	4,044	5,335
Reduction due to reclassification of loans		(10,808)
Reduction due to sale of loans and leases and other	(217)	(627)
Foreign currency adjustment	(58)	243
Balance at end of period	\$50,935	\$ 44,443

The 2004 roll forward of allowance for loan and leases losses above includes the effect of the transfer and sale of portfolio loans at our home equity lending line of business. We transferred \$355 million in loans to loans held for sale when the decisions were made to sell these loans from the portfolio. These loans had an associated allowance of \$21 million. The loans were transferred with an allowance of \$11 million to reduce their carrying value to fair market value. After the transfers, the remaining \$10 million of excess allowance was reversed through the provision for loan and lease losses.

Deposits

Total deposits for the first half of 2005 averaged \$3.7 billion compared to deposits for the year 2004 that averaged \$3.4 billion. Demand deposits for the first half of 2005 averaged \$1.0 billion, a 1% decrease over the average balance for the year 2004. A significant portion of demand deposits is related to deposits at Irwin Union Bank and Trust Company that are associated with escrow accounts held on loans in the servicing portfolio at the mortgage banking line of business. During the first six months of 2005, these escrow accounts decreased from \$746 million at December 31, 2004 to \$706 million at June 30, 2005.

We utilize institutional broker-sourced deposits as funding to supplement deposits solicited through branches and other wholesale funding sources. At June 30, 2005, institutional broker-sourced deposits totaled \$347 million compared to a balance of \$279 million at December 31, 2004.

Table of Contents*Short-Term Borrowings*

Short-term borrowings increased to \$402 million at June 30, 2005, compared to \$308 million at December 31, 2004. The increase in short-term borrowings at the end of the second quarter relative to year-end reflects the loan growth at the home equity line of business.

Federal Home Loan Bank borrowings averaged \$155 million during the six months ended June 30, 2005, with an average rate of 2.89%. The balance at June 30, 2005 was \$147 million at an interest rate of 3.38%. The maximum outstanding during any month end was \$372 million. At December 31, 2004, Federal Home Loan Bank borrowings averaged \$186 million, with an average rate of 1.69%. The ending balance was \$72 million at an interest rate of 3.15%. The maximum outstanding at any month end during 2004 was \$536 million.

Collateralized Debt

Collateralized debt totaled \$810 million at June 30, 2005, compared to \$547 million at December 31, 2004. The increased debt relates to the securitization of portfolio loans at the home equity lending line of business during the second quarter, which is discussed in more detail in the Home Equity Lending section of this document. The securitization debt represents match-term funding for these loans and leases.

Other Long-Term Debt

Other long-term debt totaled \$270 million at June 30, 2005, unchanged from December 31, 2004. We had obligations represented by subordinated debentures at June 30, 2005 totaling \$240 million with our wholly-owned trusts that were created for the purpose of issuing trust preferred securities. The subordinated debentures were the sole assets of the trusts at June 30, 2005. In accordance with FASB Interpretation No. 46 (FIN 46), Consolidation of Variable Interest Entities (revised December 2003), we do not consolidate the wholly-owned trusts that issued the trust preferred securities. Instead, the subordinated debentures held by the trusts are disclosed on the balance sheet as other long-term debt. We have committed to issuing \$52 million of trust preferred securities in early August. Although no call notice has been issued at this point, it is our intention to use the proceeds from this issuance to call the trust preferred securities issued by IFC Capital Trust II, which become callable (under certain conditions) at par in September 2005.

Capital

Shareholders' equity averaged \$502 million during the first six months of 2005, up 6% compared to the average for the year 2004. Shareholders' equity balance of \$501 million at June 30, 2005 represented \$17.53 per common share, compared to \$17.67 per common share at December 31, 2004. We paid \$2.9 million and \$5.7 million in dividends for the three and six months ended June 30, 2005, respectively, reflecting an increase of \$0.02 and \$0.04 per share, respectively, compared to a year ago.

The following table sets forth our capital and regulatory capital ratios at the dates indicated:

	June 30, 2005	December 31, 2004
	(Dollars in thousands)	
Tier 1 capital	\$ 643,829	\$ 641,079
Tier 2 capital	151,461	141,866
Total risk-based capital	\$ 795,290	\$ 782,945
Risk-weighted assets	\$5,746,402	\$4,930,684
Risk-based ratios:		
Tier 1 capital	11.2%	13.0%
Total capital	13.8	15.9
Tier 1 leverage ratio	11.3	11.6
Ending shareholders' equity to assets	8.2	9.6
Average shareholders' equity to assets	9.0	9.0

Edgar Filing: IRWIN FINANCIAL CORP - Form 10-Q

At June 30, 2005, our total risk-adjusted capital ratio was 13.8% exceeding our internal minimum target of 11.0%. At December 31, 2004, our total risk-adjusted capital ratio was 15.9%. Our ending equity to assets ratio at June 30, 2005 was 8.2% compared to 9.6% at December 31, 2004. Our Tier 1 capital totaled \$644 million as of June 30, 2005, or 11.2% of risk-weighted assets.

Table of Contents**Cash Flow Analysis**

Our cash and cash equivalents increased \$76.3 million during the first six months of 2005, compared to \$8.4 million during the same period in 2004. Cash flows from operating activities resulted in a use of \$138 million in cash and cash equivalents in the six months ended June 30, 2005 compared to the same period in 2004 when our operations used \$281 million in cash and cash equivalents. Changes in loans held for sale impact cash flows from operations and are a normal and ordinary characteristic of our business. In a period in which loan production exceeds sales such as we had in the first half of 2005, operating cash flows will decrease reflecting our investment in cash generating assets. In the first half of 2005, our loans held for sale increased \$157 million, thus increasing the cash used by operating activities.

Earnings Outlook

We do not provide quantitative earnings guidance, as we do not believe it to be in the best interest of our long-term stakeholders. However, as discussed before, our strategy is to seek opportunities for credit-worthy, profitable growth by serving niche markets and balancing the impact of changes in interest rates and economic conditions on our mortgage banking production with investments in mortgage servicing and in our credit retained portfolios. These investments will typically respond in an opposite and complementary manner, although this has not been the case for the last few quarters. Currently, market conditions for our mortgage banking segment are very difficult. Origination margins are significantly below our long-term expectations and the value of our servicing portfolio, net of derivative hedging, is not increasing as we would typically expect when mortgage origination revenues are declining. As noted elsewhere in this report, the effect of interest rate movements on the valuation of servicing portfolio and the derivatives we use to hedge the portfolio have had a materially negative impact on earnings in the first half of 2005.

Our results in the first half of 2005 were well below our long-term expectations. Our current expectation is that earnings in the second half of 2005 will return to amounts more consistent with the second half of 2004. Although we incurred derivative premium expense to do so, we have modified our hedging practices and structures to provide additional protection against falling rates in the third quarter. As compared to the second quarter, the net hedge position currently in place would provide meaningfully improved protection.

However, given results in the first half of the year, we expect net income for the full year of 2005 to be well below those recorded in 2004. These estimates are based on various factors and current assumptions management believes are reasonable, including current industry forecasts of a variety of economic and competitive factors. However, projections are inherently uncertain, and our actual earnings may differ significantly from this estimate due to uncertainties and risks related to our business such as fluctuations in interest rates and other factors mentioned above in the [About Forward-Looking Statements](#) section. Over periods of normal economic cycles we strive to meet or exceed our long-term targets of double-digit growth in earnings per share and a return on equity above our cost of capital, although we do not expect to hit these targets in 2005.

A meaningful amount of our earnings comes from activities and mark-to-market accounting requirements tied directly or indirectly to capital market activities and include estimates of future cash flows. As such, earnings are more difficult for us to predict over short periods of time. For example, the valuation of our residual interests and incentive servicing fees are affected by a variety of factors including current and future credit quality, prepayment speeds, and discounts rates, and our mortgage servicing portfolio is impacted most directly by movements in the bond market. The impact of short-term movements in interest rates on the valuation of our mortgage servicing rights is mitigated by a combination of financial derivatives and changes in income from production of new mortgages likely to be driven by those same movements in interest rates. However, the correlation within short periods of time (such as a single quarter) between interest rate movements that impact the reported value of our mortgage servicing rights at quarter end and the production effects of those interest rate movements which may not be reflected until subsequent quarters can be low. In addition, accounting principles generally accepted in the U.S. (GAAP) impose a lower-of-cost-or-market (LOCOM) valuation cap on the value of our servicing asset, while we know of no financial derivatives available in the secondary market with similarly asymmetric value change characteristics. This anomaly in accounting for mortgage servicing assets makes it difficult at times to construct hedges with the desired GAAP accounting outcome, although the economic balance may still exist.

Finally, while the use of derivatives is intended to reduce risk by providing countervailing effects to the value at risk of the assets or liabilities being hedged, the use and management of such derivatives themselves introduces additional risks. One such risk is basis risk. We are subject to basis risk in the derivatives used in the management of our servicing portfolio. While basis risk exhibits stability over longer periods of time, over shorter periods there can be separation in the relative spreads of interest rates or indices used to value mortgage servicing rights and the financial derivatives we use to hedge the change in value in mortgage servicing rights. At times this basis risk benefits us and at other times it does not. It is generally not possible to eliminate this basis risk. It is possible,

Table of Contents

therefore, that our balanced revenue strategy may be successful as measured over several quarters or years, but may have market-based variances if measured over short periods such as quarters.

Earnings by Line of Business

Irwin Financial Corporation is composed of four principal lines of business:

Mortgage Banking

Commercial Banking

Home Equity Lending

Commercial Finance

The following table summarizes our net income (loss) by line of business for the periods indicated:

	Three Months Ended June		Six Months Ended June 30,	
	2005	30, 2004	2005	2004
	(Dollars in thousands)

Overview

In our mortgage banking line of business, we originate, purchase, sell and service conventional and government agency-backed residential mortgage loans throughout the United States. We also engage in the business of mortgage reinsurance. We are able to remove substantially all of the credit risk associated with these mortgage loans from our balance sheet because the majority of our mortgage originations in the case of conventional mortgages meet requirements for sale either to the Federal National Mortgage Association (FNMA), the Federal Home Loan Mortgage Corporation (FHLMC) or the Federal Home Loan Bank (FHLB), are insured by an agency of the federal government, such as the Federal Housing Administration (FHA) or the Veterans Administration (VA), or are sold to private investors. While we securitize and sell mortgage loans to institutional and private investors, we may choose to retain the servicing rights. Loan origination demand and servicing values normally react in opposite directions to changes in

interest rates, as explained below. We believe this balance between mortgage loan originations and mortgage loan servicing values assists in managing the risk from interest rate changes, which has helped stabilize our revenue stream over the long term.

Our channels for originating loans consist primarily of retail, wholesale, and correspondent lending. We fund our mortgage loan originations using internal funding sources and through credit facilities provided by third parties. Generally within a 30-day period after funding, we sell our mortgage loan originations into the secondary mortgage market by either direct loan sales or by securitization.

Table of Contents

We believe there is normally a balance between mortgage loan originations and mortgage loan servicing that assists in managing the risk from interest rate changes and the impact of rate changes on each part of the business. In rising interest rate environments, originations typically decline, while the value of our mortgage servicing portfolio generally increases as prepayment expectations decline. In declining interest rate environments, servicing values typically decrease as prepayment expectations increase, while the economic value of our mortgage production franchise generally increases due to the potential for greater mortgage loan originations. However, the offsetting impact of changes in production income and servicing values may not always be recognized in the same quarter under generally accepted accounting principles. This timing difference is due to the application of lower-of-cost-or-market treatment under generally accepted accounting principles to the mortgage servicing asset with no accounting equivalent for the production franchise. As a result, we sometimes experience greater volatility in short-term (quarterly) results than is apparent in longer-term measurements such as annual income.

With respect to the material net impairment we have recorded in managing the servicing asset over the past three quarters, our strategy of balancing exposure to mortgage originations and mortgage servicing is challenged in periods when intra-quarter rate movement is substantial, but without a discernable trend which would favor either the loan origination or the servicing halves of our revenue streams. Managing valuation exposure on the servicing asset with derivatives is further complicated by interest rates modestly above or below the aggregate LOCOM cap on the valuation of our servicing portfolio. These conditions have existed since the summer of 2004. Mortgage interest rates are little changed over the past year, thereby not changing overall industry production in a meaningful manner. However, the intra-quarter rate volatility has caused significant hedge costs for us. We believe our mortgage segment results are likely to continue to be depressed until these conditions change. In the meantime, we are focusing on improving our production margins through product enhancements and cost reductions as well as reducing our risk to servicing impairment by selling servicing rights.

We sell servicing rights periodically for many reasons, including income recognition, cash flow, capital management and servicing portfolio management. Servicing rights sales occur at the time the underlying loans are sold to an investor (in flow sales) or in pools from our seasoned servicing portfolio (in bulk sales). In the first half of 2005, we chose to sell the servicing asset associated with nearly all of our current originations. We made this decision due to a desire to lower our interest rate risk from the servicing portfolio, as well as to decrease servicing assets as a percentage of our consolidated balance sheet. This differs from our actions over the past several years of adding to the portfolio as rates reached historic lows.

While a substantial portion of mortgage banking revenues are derived from loan origination activities, we have taken steps over the past year to reduce the number of branches in our system that are not achieving our desired return targets and no longer fit into our growth strategy. This, by definition, lowers our revenues and in many cases, lowers the contribution to fixed or semi-fixed costs, but we believe it is the appropriate action over the long-term as a response to the post-refinance boom environment in which we now operate.

In addition, during the first half of 2005, we divested a substantial portion of our retail origination operations. These divested operations represented less than 20% of our total 2004 originations. Going forward, we will concentrate on the growth of our most profitable channels in wholesale, correspondent, and consumer direct lending while sharpening our focus in traditional retail lending to serve low- to moderate-income homebuyers and emerging market customers. Exit costs associated with these sales totaled approximately \$1.3 million. We anticipate that we will recognize some incremental revenue over the next three years as part of an earn-out based remuneration for these branches. In the second quarter, earn-out based revenues totaled \$0.3 million.

Table of Contents*Originations*

The following table shows the composition of our originations by loan categories for the periods indicated:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2005	2004	2005	2004
	(Dollars in thousands)			
Total originations	\$2,643,669	\$3,727,591	\$5,456,081	\$6,658,307
Percent retail loans	9%	20%	13%	22%
Percent wholesale loans	52	33	44	37
Percent correspondent	37	36	37	31
Percent brokered ⁽¹⁾	2	11	6	10
Percent refinances	44	54	49	57

(1) Brokered loans are loans we originate for which we receive loan origination fees, but which are funded, closed and owned by unrelated third parties.

Net Income

Our mortgage banking line of business recorded a net loss for the three and six months ended June 30, 2005 of \$(9.1) million and \$(18.8) million, respectively, compared to net income of \$5.5 million and \$15.2 million for the same periods in 2004. This change from a profit to a loss in 2005 reflects a significant mortgage servicing impairment as well as declines in loan origination revenues from secondary market sales of loans. We currently anticipate that the mortgage segment will return to profitability in the third quarter.

Net Revenue

Mortgage banking net revenue for the quarter ended June 30, 2005 totaled \$12 million compared to \$66 million for the same period last year. Year to date, net revenues totaled \$38 million compared to \$135 million last year. The following table sets forth certain information regarding net revenue for the periods indicated:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2005	2004	2005	2004
	(Dollars in thousands)			
Selected Income Statement Data:				
Net interest income	\$ 9,026	\$ 11,781	\$ 16,749	\$ 20,443
Recovery of loan losses	94	284	283	390
Gain on sales of loans	17,002	34,870	41,976	77,652
Servicing fees	23,784	25,683	49,410	51,582
Amortization expense	(18,269)	(24,199)	(39,479)	(51,509)
(Impairment) recovery of servicing assets	(50,630)	71,320	(18,142)	23,136
Gain (loss) on derivatives	23,687	(57,808)	(23,698)	544
Gain on sales of servicing assets	5,471	1,928	6,656	8,418

Edgar Filing: IRWIN FINANCIAL CORP - Form 10-Q

Other income	1,699	2,052	3,883	3,891
Total net revenue	\$ 11,864	\$ 65,911	\$ 37,638	\$ 134,547

Net interest income is generated from the interest earned on mortgage loans before they are sold to investors, less the interest expense incurred on borrowings to fund the loans. Net interest income for the second quarter in 2005 totaled \$9 million compared to \$12 million for the second quarter of 2004. Net interest income year to date decreased 18% to \$17 million. The decrease in net interest income in 2005 is a result of decreased production resulting in a lower average balance of mortgage loans held for sale on our balance sheet during the quarter.

Gain on sale of loans includes net revenues from three principal sources:

the valuation of newly-created mortgage servicing rights;

net loan origination fees which are recognized when loans are sold into the secondary mortgage market; and

changes in fair value of forward contracts and interest rate lock commitments.

Table of Contents

Gain on sale of loans for the three months ended June 30, 2005 totaled \$17 million, compared to \$35 million for the same period in 2004, a decline of 51%. Gain on sale of loans for the six months ended June 30, 2005 totaled \$42 million, compared to \$78 million for the same period in 2004, a decrease of 46%. This decrease is attributable to the sale of most of our retail branches, reduced secondary market margins, and reduced pricing power on the part of originators.

Servicing fee income is recognized by collecting fees, which normally range between 25 and 44 basis points annually on the principal amount of the underlying mortgages. Servicing fee income totaled \$24 million and \$49 million for the three and six months ended June 30, 2005, a decrease of 7% and 4% from the same periods in 2004, primarily reflecting the decline in the size of the servicing portfolio.

Amortization expense relates to mortgage servicing rights and is based on the proportion of current net servicing income to the total expected for the estimated lives of the underlying loans. Amortization expense totaled \$18 million for the three months ended June 30, 2005, compared to \$24 million during the second quarter of 2004. Year-to-date amortization expense totaled \$39 million and \$52 million for 2005 and 2004, respectively. The decrease in amortization expense in 2005 relates primarily to the decrease in the servicing portfolio and reduced prepayment speeds.

Impairment expense is recorded when the book value of the mortgage servicing rights exceeds the fair value on a strata by strata basis. We determined fair value at June 30, 2005, through the use of internal models, valuation comparisons to actual servicing sale proceeds, and independent valuations. Impairment expense totaled \$51 million and \$18 million for three and six months ended June 30, 2005, compared to impairment recovery of \$71 million and \$23 million during the same periods of 2004. The fluctuations in impairment are attributable to changes in actual or expected prepayments speeds due to interest rate changes. The current risk management activities of the mortgage bank related to servicing assets do not satisfy the criteria for hedge accounting under SFAS 133. As a result, these derivatives are accounted for as other assets and other liabilities, and changes in fair value are adjusted through earnings as derivative gains (losses), while the underlying servicing asset is accounted for on a strata-by-strata basis at the lower of cost or market. The \$51 million of impairment expense in the second quarter was partially offset by derivative gains of \$24 million. As a result, mortgage servicing impairment exceeded hedge gains by \$27 million during the second quarter.

The following table shows a comparison of impairment and related derivative results for the periods indicated.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2005	2004	2005	2004
	(Dollars in thousands)			
(Impairment) recovery of servicing	\$ (50,630)	\$ 71,320	\$ (18,142)	\$ 23,136
Gain (loss) on derivatives	23,687	(57,808)	(23,698)	544
Net (impairment) recovery	\$ (26,943)	\$ 13,512	\$ (41,840)	\$ 23,680

Our mortgage banking business maintains the flexibility either to sell servicing for current cash flow through bulk sales or to retain servicing for future cash flow through the retention of ongoing servicing fees. Total servicing sales represented 183% and 145% of loan originations during the three and six months ended June 30, 2005, compared to 65% and 58% for the three and six months ended June 30, 2004. The decision to sell or retain servicing is based on current market conditions for servicing assets, loan origination levels and production expenses, servicing portfolio management considerations, consolidated capital constraints and the general level of risk tolerance of the mortgage banking line of business and the Corporation. We sold \$3.1 billion of bulk servicing during the second quarter and \$4.4 billion year to date in 2005, generating a \$5.5 million and \$6.7 million pre-tax gain, respectively. We sold \$0.9 billion of bulk servicing during the second quarter and \$2.0 billion year to date in 2004, generating a \$1.9 million and \$8.4 million pre-tax gain, respectively. During the period, 2001-2003, we have built our servicing portfolio in anticipation of rising interest rates that would result in lower mortgage loan production. We sold servicing this quarter

to reduce the size of our investment in mortgage servicing assets. To reduce our risk of future servicing asset impairment, we intend to make additional servicing sales later in the year.

Operating Expenses

The following table sets forth operating expenses for our mortgage banking line of business for the periods indicated:

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2005	2004	2005	2004
	(Dollars in thousands)			
Salaries and employee benefits	\$13,709	\$20,259	\$30,890	\$ 39,999
Incentive and comission pay	2,334	11,395	9,021	21,183
Other expenses	11,667	25,062	29,209	48,003
Total operating expenses	\$27,710	\$56,716	\$69,120	\$109,185
Number of employees at period end ⁽¹⁾			854	2,063

⁽¹⁾ On a full time equivalent basis

Table of Contents

Operating expenses for the three and six months ended June 30, 2005 totaled \$27.7 million and \$69.1 million, a 51% and 37% decrease over the same periods in 2004. Salaries and employee benefits including incentive and commission pay declined 35% year to date compared to the same period in 2004. These fluctuations reflect continuing efforts to reduce the size of our mortgage operation since the refinance boom of 2001-2003 to align our costs with the reduced margins we are experiencing.

Mortgage Servicing

The following table shows information about our managed mortgage servicing portfolio, including mortgage loans held for sale, for the periods indicated:

	Six Months Ended June 30, 2005	Year Ended December 31, 2004
	(Portfolio in billions)	
Beginning servicing portfolio	\$ 26.2	\$ 29.6
Mortgage loan closings ⁽¹⁾	5.1	11.7
Bulk sales of servicing rights ⁽¹⁾	(4.4)	(4.0)
Flow sales of servicing rights ⁽¹⁾	(3.1)	(4.3)
Run-off ⁽²⁾	(3.0)	(6.8)
Ending servicing portfolio	\$ 20.8	\$ 26.2
Number of loans (end of period)	159,914	205,463
Average loan size	\$ 129,785	\$ 127,500
Weighted average coupon rate	5.66%	5.75%
Percent Government National Mortgage Association (GNMA) and state housing programs	22	30
Percent conventional and other	78	70
Delinquency ratio	3.9	4.6
Mortgage servicing assets to related servicing portfolio ⁽³⁾	1.13	1.20

(1) Excludes brokered loans that are closed, funded and owned by unrelated third parties.

(2) Run-off is primarily the reduction in principal balance of the servicing portfolio due to regular principal payments made by mortgagees

and early
repayments of
entire loans.

- (3) For this
calculation,
deferred service
release
premiums on
warehouse loans
are excluded
from mortgage
servicing assets,
and loans held
for sale (i.e.
warehouse
loans) are
excluded from
the servicing
portfolio.

We record originated mortgage servicing assets at allocated cost basis when the loans are sold and record purchased servicing assets at fair value. Thereafter, servicing rights are accounted for at the lower of their cost or fair value. We record a valuation allowance for any impairment on a disaggregated basis. We determine fair value on a monthly basis based on a discounted cash flow analysis. These cash flows are projected over the life of the servicing using prepayment, default, discount rate and cost to service assumptions that we believe market participants would use to value similar assets. We then assess these modeled assumptions for reasonableness through independent third-party valuations, periodic servicing asset sales and through the use of industry surveys. At June 30, 2005, we estimated the fair value of these assets to be \$241 million in the aggregate, or \$2 million greater than the carrying value on the balance sheet. The difference between carrying value and market value is the result of a cap under generally accepted accounting principles at the lower of cost or market for these assets. At December 31, 2004, we estimated the fair value of these assets to be \$321 million in the aggregate, also \$2 million greater than the carrying value on the balance sheet.

Table of Contents*Overview*

Our commercial banking line of business focuses on providing credit, cash management and personal banking products to small businesses and business owners. We offer commercial banking services through our banking subsidiaries, Irwin Union Bank and Trust Company, an Indiana state-chartered commercial bank, and Irwin Union Bank, F.S.B., a federal savings bank.

Net Income

Commercial banking net income of \$5.6 million during the second quarter of 2005 compared to \$5.8 million for the same period in 2004. Year-to-date net income totaled \$11.1 million in 2005 compared to net income of \$11.2 million in 2004. The decrease in 2005 net income is attributable to portfolio growth related expenses.

Net Interest Income

The following table shows information about net interest income for our commercial banking line of business:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2005	2004	2005	2004
	(Dollars in thousands)			
Net interest income	\$ 26,977	\$ 21,191	\$ 51,537	\$ 41,737
Average interest earning assets	2,844,542	2,341,317	2,751,839	2,259,486
Net interest margin	3.80%	3.64%	3.78%	3.71%

Net interest income was \$27 million for the second quarter of 2005, an increase of 27% over second quarter of 2004. Net interest income year to date in 2005 also improved 23% over the same period in 2004. The 2005 improvement in net interest income resulted primarily from an increase in our commercial banking loan portfolio as a result of growth and expansion efforts. Net interest margin, the ratio of net interest income divided by average interest earning assets, for the three months ended June 30, 2005 was 3.80%, compared to 3.64% for the same period in 2004. Year-to-date net interest margin for 2005 was 3.78%, compared to 3.71% for 2004. The increase in 2005 margin is due to portfolio growth and improved pricing.

Provision for Loan and Lease Losses

Provision for loan and lease losses increased to \$2.6 million during the first half of 2005, compared to a provision of \$2.0 million during the same period in 2004. The increased provision relates primarily to portfolio growth. See further discussion in the *Credit Quality* section below.

Noninterest Income

The following table shows the components of noninterest income for our commercial banking line of business:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2005	2004	2005	2004
	(Dollars in thousands)			
Trust fees	\$ 475	\$ 477	\$ 1,008	\$ 995
Service charges on deposit accounts	1,009	1,289	2,005	2,749
Insurance commissions, fees and premiums	427	421	960	1,086
Gain from sales of loans	615	845	1,424	1,706
Loan servicing fees	367	339	722	668
Amortization of servicing assets	(308)	(481)	(627)	(882)
(Impairment) Recovery of servicing assets	(311)	727	(97)	588
Brokerage fees	303	419	604	849
Derivative gains	231		72	
Other	998	1,025	2,116	2,078
Total noninterest income	\$3,806	\$5,061	\$8,187	\$9,837

Table of Contents

Noninterest income during the three and six months ended June 30, 2005 decreased 25% and 17% over the same periods in 2004, respectively. This decrease was in part due to lower service charges on deposit accounts. The lower charges resulted from higher earnings credits on commercial customer accounts due to increasing interest rates. Also contributing to the decrease in non-interest income was impairment of mortgage servicing, net of hedge gains of \$0.1 million in the first half of 2005 compared to net impairment recovery of \$0.6 million in the same period for 2004. The commercial banking line of business has a first mortgage servicing portfolio totaling \$459 million at June 30, 2005, principally a result of mortgage loan production in its south-central Indiana markets. Servicing rights related to this portfolio are carried on the balance sheet at the lower of cost or market, estimated at June 30, 2005 to be \$4 million.

Operating Expenses

The following table shows the components of operating expenses for our commercial banking line of business:

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2005	2004	2005	2004
	(Dollars in thousands)			
Salaries and employee benefits	\$12,363	\$ 9,665	\$24,310	\$18,987
Other expenses	7,481	6,201	14,289	11,961
Total operating expenses	\$19,844	\$15,866	\$38,599	\$30,948
Efficiency ratio	64.5%	60.4%	64.6%	60.0%
Number of employees at period end ⁽¹⁾			553	492

⁽¹⁾ On a full time equivalent basis.

Operating expenses for the three and six months ended June 30, 2005 totaled \$19.8 million and \$38.6 million, an increase of 25% over the same periods in 2004, respectively. The increase in operating expenses is primarily due to higher personnel costs related to recent office expansions, the latest of which is a new branch of Irwin Union Bank, F.S.B. in Costa Mesa, California.

Balance Sheet

Total assets at June 30, 2005 were \$3.0 billion compared to \$2.4 billion at December 31, 2004. Year to date earning assets as of June 30, 2005 averaged \$2.8 billion compared to \$2.4 billion for the year 2004. The most significant components of the increase in 2005 were loan growth and inter-company investments that are eliminated in consolidation. These investments are the result of excess liquidity at the commercial banking line of business related to deposit growth in excess of its loan deployment needs. The funds have been redeployed in earning assets at our other lines of business. Average core deposits for the second quarter of 2005 totaled \$2.4 billion, an annualized increase of 22% over average core deposits in the first quarter 2005.

Credit Quality

Nonperforming assets to total assets and the allowance for loan losses to total loans both decreased at June 30, 2005, compared to December 31, 2004. The decline in nonperforming loans in the first half of 2005 related primarily to one commercial customer whose loan was transferred to other real estate owned. Nonperforming loans are not significantly concentrated in any industry category. The following table shows information about our nonperforming assets in this line of business and our allowance for loan losses:

Table of Contents

	June 30, 2005	December 31, 2004		
	(Dollars in thousands)

- (2) Nonaccrual loans are included in the delinquency ratio.

Overview

Our home equity lending line of business originates, purchases, sells and services a variety of home equity lines of credit and fixed-rate home equity loan products nationwide. We market our home equity products (generally using second mortgage liens) through a combination of direct mail, brokers, the Internet, and correspondent channels. We seek creditworthy homeowners who are active credit users.

We offer home equity loans with combined loan-to-value (CLTV) ratios of up to 125% of their collateral value. Home equity loans are priced using a proprietary model, taking into account, among other factors, the credit history of our customer and the relative loan-to-value (LTV) ratio of the loan at origination. For example, all else being equal, those loans with loan-to-value ratios greater

Table of Contents

than 100% (high LTV, or HLTVs) are priced with higher coupons than home equity loans with loan-to-value ratios less than 100% to compensate for increased expected losses through default. For the six-month period ended June 30, 2005, HLTV home equity loans constituted 33% of our loan originations and 42% of our managed portfolio for this line of business. In an effort to manage portfolio concentration risk and to comply with existing banking regulations, we have policies in place governing the size of our investment in loans secured by real estate where the LTV is greater than 90%.

For most of our home equity product offerings, we offer customers the choice to accept an early repayment fee in exchange for a lower interest rate. A typical early repayment option provides for a fee equal to up to six months interest that is payable if the borrower chooses to repay the loan during the first three to five years of its term. Approximately 72%, or \$1.0 billion, of our home equity managed portfolio at June 30, 2005 were originated with early repayment provisions, reflecting such customer choice.

Generally we either sell loans through whole loan sales or we fund these loans on balance sheet through warehouse lines or secured, term financings. In addition to loan sales, we will continue to consider the sale of certain assets such as residual assets and mortgage servicing rights. We balance our loan portfolio growth objectives with cash flow and profit targets, as well as a desire to manage our capital accounts. In addition, regulated banks are prohibited from holding more than their total regulatory capital in certain mortgage exposures where the underlying loan to value exceeds 90 percent. This limitation also factors into our sale decisions. Our long-term expectations for whole loan sales are in the 60% range. We generally retain the servicing rights for the loans we sell.

Portfolio Mix

Our home equity lending line of business blends aspects of the credit card and mortgage banking industries. The home equity products are designed to appeal to homeowners who have high levels of unsecured (credit card) debt, who through the use of a debt consolidating mortgage loan can meaningfully reduce their after-tax monthly cash outflows. We underwrite our loans using unsecured debt criteria, while adjusting for relative riskiness by LTV level and credit profile through our pricing. We believe that the mortgage lien associated with the loan has a meaningful, positive influence on the payment priority of our customers. We lend nationally in our home equity lending line of business to avoid concentrations that may be subject to local real estate market inflation. The following table provides a breakdown of our home equity lending managed portfolio by product type, outstanding principal balance and weighted average coupon as of June 30, 2005 :

	Amount	% of Total (In thousands)	Weighted Average Coupon
Home equity loans <= 100% CLTV	\$ 376,970	26.29%	7.94%

Net Income

Our home equity lending business recorded net income of \$1.7 million during the three months ended June 30, 2005, compared to net income for the same period in 2004 of \$8.9 million. Year to date income of \$8.7 million was recorded through June 30, 2005, compared to net income of \$15.5 million during the same period a year earlier. The 2005 decline in net income was primarily attributable to lower net interest margin from the origination of higher credit quality loans as well as lower gains on sales of loans and an associated increase in loss provision. The lower level of loan sales reflects our interest in growing our home equity portfolio. We believe the portfolio growth of the second quarter will provide immediate benefit to this segment as a more stable and predictable earnings stream.

Table of Contents*Net Revenue*

Net revenue for the three and six months ended June 30, 2005 totaled \$29 million and \$72 million, respectively, compared to net revenue for the same periods in 2004 of \$42 million and \$78 million. The decrease in revenues is primarily a result of higher provision for loan losses as the home equity segment increases its loan portfolio. Also, higher servicing asset amortization reduced net revenues in 2005 compared to 2004 as a result of the growth in the servicing portfolio. In addition, net interest income declined in 2005 due to shrinking net interest margins.

During the second quarter of 2005, our home equity lending business produced \$500 million of home equity loans, compared to \$404 million during the same period in 2004. Our home equity lending business had \$1.2 billion of net loans and loans held for sale at June 30, 2005, compared to \$0.8 billion at December 31, 2004. Included in the loan balance at June 30, 2005 were \$0.6 billion of loans pledged as collateral for secured financings.

The following table sets forth certain information regarding net revenue for the periods indicated:

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2005	2004	2005	2004
	(Dollars in thousands)			
Net interest income	\$21,193	\$26,159	\$ 41,625	\$50,853
Recovery of (provision for) loan losses	(6,181)	706	(6,551)	(5,193)
Gain on sales of loans	3,861	3,035	12,129	11,725
Loan servicing fees	9,525	7,385	18,036	13,486
Amortization of servicing assets	(7,800)	(4,976)	(13,590)	(8,952)
Recovery (impairment) of servicing assets	667	(96)	364	843
Trading gains	2,316	6,688	2,796	11,329
Derivative gains	4,442	2,414	15,522	3,625
Other income	828	383	1,285	434
Total net revenue	\$28,851	\$41,698	\$ 71,616	\$78,150

Net interest income decreased to \$21 million for the three months ended June 30, 2005, compared to \$26 million for the same period in 2004. Year-to-date net interest income for 2005 was \$42 million, compared to \$51 million for 2004. This line of business earns interest income on loans held on the balance sheet and the accretion of the discount applied to its residual interests. Accretion totaled \$2 million and \$4 million during the three and six months ended June 30, 2005, versus \$3 million and \$7 million for the same periods in 2004. The reduced accretion relates to the 48% reduction in our residual interests at June 30, 2005 compared to the prior year. The decrease in the non-accretion net interest income from \$44 million in the first half of 2004 to \$37 million in the first half of 2005 is primarily due to shrinking net interest margins.

Provision for loan losses increased to \$7 million the first half of 2005, compared to \$5 million during the same period in 2004. The increased provision relates to the buildup of the home equity on-balance sheet loan portfolio.

Gains on sales of loans for the three months ended June 30, 2005 totaled \$4 million, compared to \$3 million during the same period in 2004. Gains on sales of loans for the six months ended June 30, 2005 totaled \$12 million, relatively unchanged from the same period in 2004. The increase in gains in the second quarter of 2005 relates to a shift in whole loan sales product mix. We completed whole loan sales during the second quarter of 2005 of \$111 million resulting in a gain on sale of loans of \$4 million, compared to \$3 million in gain on the sale of \$224 million of loans during the same period in 2004. The gain on sales of loans relative to the principal balance of loans sold increased during 2005 compared to 2004 due to product mix and related loan yields.

We do not record a residual interest as a result of whole loan sales as we do not retain a credit loss interest after the sale. These are cash sales for which we receive a premium, generally record a servicing asset, and recognize any points and fees at the time of sale. For certain sales, we have the right to an incentive servicing fee (ISF), a derivative instrument, that will provide cash payments to us once a pre-established return for the certificate holders and certain

structure-specific loan credit and servicing performance metrics are met. These ISF contracts are treated as derivatives under SFAS 133, Accounting for Derivative Instruments and Hedging Activities, and classified in other assets. Our policy requires discounting these derivatives at rates between 20% and 40%, depending on a variety of factors, including volatility of anticipated cash flows, credit quality, loan-to-value ratio, and anticipated prepayment speeds. At June 30, 2005, we were receiving incentive fees for two transactions that had met these performance metrics. Included in derivative gains or losses during the first half of 2005 was \$15 million related to these ISFs. The valuation is based upon actual and projected performance of the underlying pools of loans and represents the discounted projected value of future cash flow.

Table of Contents

Loan servicing fees totaled \$10 million during the second quarter of 2005, compared to \$7 million during the same period in 2004. Year to date, loan servicing fees totaled \$18 million, compared to \$13 million during the same period in 2004. The increase in loan servicing fees in 2005 relates to higher prepayment penalty income and increased servicing income on our servicing portfolio. The servicing portfolio underlying the mortgage servicing asset increased to \$2.4 billion at June 30, 2005 from \$1.6 billion at June 30, 2004.

Amortization and impairment of servicing assets includes amortization expenses and valuation adjustments relating to the carrying value of servicing assets. Our home equity lending business determines fair value of its servicing asset using discounted cash flows and assumptions as to estimated future servicing income and cost that we believe market participants would use to value similar assets. In addition, we periodically assess these modeled assumptions for reasonableness through independent third-party valuations. At June 30, 2005, net servicing assets totaled \$45 million, compared to a balance of \$44 million at December 31, 2004. Servicing asset amortization net of impairment recovery totaled \$13 million during the first half of 2005, compared to \$8 million for the six months ended June 30, 2004. Increased amortization resulted from the growth in the servicing portfolio underlying the mortgage servicing asset.

Trading gains (losses) represent unrealized gains (losses) as a result of adjustments to the carrying values of our residual interests. Trading gains totaled \$2 million in the second quarter of 2005, compared to gains of \$7 million for the same period in 2004. Year-to-date trading gains totaled \$3 million for 2005, compared to gains of \$11 million for the same period in 2004. The \$38 million valuation at June 30, 2005 reflects \$42 million of anticipated undiscounted cash flows of which \$35 million represents existing securitization overcollateralization and reserve funds, and the remaining \$7 million represents expected future net spread and prepayment penalties. Included in the valuation are assumptions for estimated prepayments, expected losses, and discount rates we believe market participants would use to value similar assets. To the extent our expectations of future loss rates, prepayment speeds and other factors change as we gather additional data over time, these residual valuations may be subject to additional adjustments in the future. These adjustments could have a material effect on our earnings. Our forward loss assumptions are reevaluated monthly and, as such, our residual asset valuations will be adjusted monthly to reflect changes in actual and expected loss rates in our portfolio.

Operating Expenses

The following table shows operating expenses for our home equity lending line of business for the periods indicated:

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2005	2004	2005	2004
	(Dollars in thousands)			
Salaries and employee benefits	\$ 15,514	\$ 17,865	\$ 36,583	\$ 33,991
Other	10,436	8,990	20,588	18,250
Total operating expenses	\$ 25,950	\$ 26,855	\$ 57,171	\$ 52,241
Number of employees at period end ⁽¹⁾			662	620

(1) On a full time equivalent basis

Operating expenses were \$26 million and \$57 million for the three and six months ended June 30, 2005, compared to \$27 million and \$52 million for the same periods in 2004. Operating expenses during the first half of 2005 and 2004 included \$4 million and \$6 million of compensation expense related to long term compensation plans at the home equity lending line of business. During the first quarter of 2005, we completed our repurchase of the minority ownership interests in this line of business and as such, the segment is now a wholly-owned subsidiary of the Corporation and its subsidiary Bank.

Home Equity Servicing

Our home equity lending business continues to service a majority of the loans it has securitized and sold. We earn a servicing fee of approximately 50 to 100 basis points of the outstanding principal balance of the loans securitized. Generally accepted accounting principles require us to book a servicing asset under both SFAS 140 and the secured financing structures. The total servicing portfolio was \$3.1 billion at June 30, 2005 and \$2.8 billion at December 31, 2004. For whole loans sold with servicing retained totaling \$1.4 billion at both June 30, 2005 and December 31, 2004, we capitalize servicing fees including rights to future early repayment fees. The servicing asset at June 30, 2005 was \$45 million, up from \$44 million at December 31, 2004 reflecting additional secondary market sales and financings, net of amortization and run-off.

Table of Contents

Our secured financings and securitizations have triggers that, when exceeded, provide trustees and/or bond insurers with the ability, but not the obligation, of removing us as servicer. Trigger levels are typically in the form of cumulative or periodic losses and/or delinquencies for a pool of loans over a stated period of time. At June 30, 2005, we serviced \$22 million in loans for which certain triggers had been exceeded. The mortgage servicing rights related to these loans totaled \$1.2 million at June 30, 2005. Based on our evaluation of industry practice by trustees and bond insurers and our estimation of the steps the independent trustees would take, we believe it is unlikely that the trustees will remove servicing from us given current performance of our securitizations. As a result, we have not provided for an allowance for this contingency.

Our managed portfolio, representing that portion of the servicing portfolio on which we have retained credit risk, is separated into two categories: \$1.2 billion of loans originated, generally since 2002, and held on balance sheet either as loans held for investment or loans held for sale, and \$0.2 billion of loans and lines of credit securitized for which we retained a residual interest. Generally, these loans categorized as owned residual were originated prior to 2002 and treated as sold under SFAS 140 and have a reserve methodology that reflects life of account loss expectations; whereas our policy for on-balance sheet loans requires that we hold at a minimum, sufficient reserves for potential losses inherent in the portfolio at the balance sheet date. Such losses for on-balance sheet loans manifest themselves over a period which management believes approximates twelve months. In both cases, we retain credit and interest rate risk.

In addition, where applicable, we have the opportunity to earn additional future servicing incentive fees. Included below in the category Credit Risk Sold, Potential Incentive Servicing Fee Retained Portfolio are \$1.3 billion of loans at June 30, 2005 and \$1.0 billion of loans at December 31, 2004 for which we have the opportunity to earn an incentive servicing fee. While the credit performance of these loans we have sold effects the valuation of the incentive servicing fee, we do not have direct credit risk in these pools. The following table sets forth certain information for each of these portfolios.

	June 30, 2005	December 31, 2004
	(Dollars in thousands)	
Managed Portfolio		
Total Loans	\$1,434,108	\$1,147,137

Overview

We established this line of business in 1999. In this segment, we provide small ticket, full payout lease financing on a variety of small business equipment in the United States and Canada as well as equipment and leasehold improvement financing for franchisees (mainly in the quick service and casual dining restaurant sector) in the United States.

We provide cost-competitive, service-oriented financing alternatives to small businesses generally and to franchisees. We utilize direct and indirect sales forces to distribute our products. In the small ticket lease channel our sales efforts focus on providing lease solutions for vendors and manufacturers. The majority of our leases are full payout (no residual), small-ticket assets secured by commercial equipment. We finance a variety of commercial, light industrial and office equipment types and try to limit the concentrations in our loan and lease portfolios. Within the franchise channel, the majority of our contracts are full payout loans with higher transaction sizes than in our small-ticket channel. The franchise channel may also finance real estate for select franchise systems.

Net Income

During the three months ended June 30, 2005, the commercial finance line of business recorded net income of \$1.4 million, compared to \$1.3 million for the same period in the prior year. Year to date, the commercial finance line of business earned \$2.1 million compared to \$1.0 million for the same period in the prior year. The 2005 improvement in net income is attributable primarily to a lower effective tax rate. Net income in 2004 was negatively affected by a one-time income tax charge of \$1.7 million.

Table of Contents*Net Interest Income*

The following table shows information about net interest income for our commercial finance line of business:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2005	2004	2005	2004
	(Dollars in thousands)			
Net interest income	\$ 7,928	\$ 6,881	\$ 15,541	\$ 13,635
Average interest earning assets	667,300	492,259	651,735	482,571
Net interest margin	4.77%	5.62%	4.81%	5.68%

Net interest income was \$8 million for the quarter ended June 30, 2005, an increase of 15% over 2004. Year to date net interest income was \$16 million, compared to \$14 million in 2004. The improvement in net interest income resulted primarily from an increase in our commercial finance portfolio. The total loan and lease portfolio has increased to \$694 million at June 30, 2005, an increase of 11% over year-end 2004 and an increase of 36% over June 30, 2004. This line of business originated \$110 million and \$194 million in loans and leases during the second quarter and year-to-date 2005, compared to \$89 million and \$160 million during the same periods of 2004.

Net interest margin is computed by dividing net interest income by average interest earning assets. Net interest margin for the second quarter of 2005 was 4.77%, compared to 5.62% in 2004 for the same period. The decrease in 2005 margin is due primarily to changes in product mix and changes in yields.

Provision for Loan and Lease Losses

The provision for loan and lease losses increased to \$3.3 million during the first six months in 2005 compared to \$3.2 million for the same period in 2004. The increased provisioning levels relate primarily to year-over-year growth in the commercial finance portfolio. However, during the second quarter of 2005, our provision in this segment totaled \$1.2 million, down from the \$2.1 million in the first quarter, reflecting improved credit quality, particularly reflected in lower delinquency rates in our domestic lease portfolio.

Noninterest Income

The following table shows the components of noninterest income for our commercial finance line of business:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2005	2004	2005	2004
	(Dollars in thousands)		(Dollars in thousands)	
Gain from sales of loans	\$ 104	\$ 792	\$ 783	\$1,179
Derivative gains (losses), net	(159)	597	(306)	(349)
Other	1,406	1,233	2,782	2,240
Total noninterest income	\$ 1,351	\$ 2,622	\$ 3,259	\$ 3,070

Noninterest income during the three months ended June 30, 2005 decreased 48% over the same period in 2004. Year to date, noninterest income was \$3 million, relatively unchanged from same period of 2004. The majority of the decrease in the second quarter of 2005 relates to reduced loan sales compared to the same period in 2004.

Table of Contents*Operating Expenses*

The following table shows the components of operating expenses for our commercial finance line of business:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2005	2004	2005	2004
	(Dollars in thousands)			
Salaries and employee benefits	\$4,409	\$3,477	\$ 8,357	\$6,839
Other	1,237	1,588	3,475	2,424
Total operating expenses	\$5,646	\$5,065	\$11,832	\$9,263
Number of employees at period end ⁽¹⁾			180	146

(1) On a full time equivalent basis.

Operating expenses during the second quarter and first half of 2005 totaled \$5.6 million and \$11.8 million, respectively, an increase of 11% and 28% over the same periods in 2004. The increased operating expenses relate to the continued growth in this business since its inception in 1999, including compensation costs related to higher production levels, infrastructure and staffing development, as well as incentive compensation cost related to the achievement of profitability. The increase in year-to-date other operating expenses is partly attributable to the resolution of a contract dispute involving our franchise channel during the first quarter of 2005.

Credit Quality

The commercial finance line of business had nonperforming loans and leases at June 30, 2005 of \$3.6 million, compared to \$3.9 million as of December 31, 2004. Net charge-offs recorded by this line of business totaled \$1.4 million for the second quarter of 2005, compared to \$1.1 million for the second quarter of 2004. Net charge-offs year to date were \$2.8 million, up from the \$2.3 million net charge-offs recorded in the first half of 2004. Our allowance for loan and lease losses at June 30, 2005 totaled \$9.9 million, representing 1.42% of loans and leases, compared to a balance at December 31, 2004 of \$9.6 million, representing 1.54% of loans and leases.

The following table shows information about our nonperforming loans and leases in this line of business and our allowance for loan and lease losses:

	June 30, 2005	December 31, 2004
	(Dollars in thousands)	
Nonperforming loans and leases	\$3,572	\$ 3,936
Allowance for loan and lease losses	9,885	9,624
Allowance for loan and lease losses to total loans and leases	1.42%	1.54%

	Three Months Ended June 30,		Six Months Ended June 30,	
	2005	2004	2005	2004
	(Dollars in thousands)

Weighted average yield	9.08%	9.77%
Delinquency ratio	0.61	0.82

⁽¹⁾ In U.S. dollars.

Parent and Other

Results at the parent company and other businesses totaled a net loss of \$0.8 million and \$0.6 million for the three and six months ended June 30, 2005, compared to a loss of \$3.6 million and \$4.7 million during the same periods in 2004. The losses at the parent company primarily relate to operating and interest expenses in excess of management fees charged to the lines of business and interest income earned on intercompany loans. Parent company operating results also include allocations to our subsidiaries of interest expense related to our interest-bearing capital obligations. During the six month period ended June 30, 2005, we allocated \$8.8 million of these expenses to our subsidiaries, compared to \$6.6 million during the first half of 2004. Other results include oversight expenses for and mark-to-market adjustments to our \$3.6 million (carrying value) private equity portfolio. We recorded a write-up of \$0.6 million in the value of this portfolio in the second quarter of 2005, compared with a write-down of \$0.4 million in the year earlier period.

Each subsidiary pays taxes to us at the statutory rate. Subsidiaries also pay fees to us to cover direct and indirect services. In addition, certain services are provided from one subsidiary to another. Intercompany income and expenses are calculated on an arm's-length, external market basis and are eliminated in consolidation. During the first quarter of 2005, we released \$0.8 million in tax reserves at the parent company to align our tax liability to a level commensurate with our currently identified tax exposures.

Risk Management

We are engaged in businesses that involve the assumption of financial risks including:

Credit risk

Liquidity risk

Interest rate risk

Operational risk

Each line of business that assumes financial risk uses a formal process to manage this risk. In all cases, the objectives are to ensure that risk is contained within prudent levels and that we are adequately compensated for the level of risk assumed.

Our Chairman, Executive Vice President, Senior Vice Presidents (including the Chief Financial Officer), and Chief Risk Officer meet on a regularly-scheduled basis (or more frequently as appropriate) as an Enterprise-wide Risk Management Committee (ERMC), reporting to the Board of Directors' Audit and Risk Management Committee.

Each of our principal risks is managed at the line of business level, with oversight and, when appropriate, standardization provided by the ERMC and its subcommittees. The ERMC and its subcommittees oversee all aspects of our financial, credit, and operational risks. The ERMC provides senior-level review and enhancement of line manager risk processes and oversight of our risk reporting, surveillance and model parameter changes.

Table of Contents*Credit Risk*

The assumption of credit risk is a key source of earnings for the home equity lending, commercial banking and commercial finance lines of business. The mortgage banking line of business assumes limited credit risk as its mortgages typically are insured and are sold within a short period of time after origination.

The credit risk in the loan portfolios of the home equity lending, commercial finance and commercial banking lines of business has the most potential for a significant effect on our consolidated financial performance. These lines of business each have a Chief Credit Officer with expertise specific to the product line and manage credit risk through various combinations of the use of lending policies, credit analysis and approval procedures, periodic loan reviews, servicing activities, and/or personal contact with borrowers. Commercial loans over a certain size, depending on the loan type and structure, are reviewed by a loan committee prior to approval. We perform independent loan review across the Corporation through a function that reports directly to the Audit and Risk Management Committee.

The allowance for loan and lease losses is an estimate based on our judgment applying the principles of SFAS 5, Accounting for Contingencies, SFAS 114, Accounting by Creditors for Impairment of a Loan, and SFAS 118, Accounting by Creditors for Impairment of a Loan – Income Recognition and Disclosures. The allowance is maintained at a level we believe is adequate to absorb probable losses inherent in the loan and lease portfolio. We perform an assessment of the adequacy of the allowance at the segment level no less frequently than on a quarterly basis and through review by a subcommittee of the ERMC.

Within the allowance, there are specific and expected loss components. The specific loss component is based on a regular analysis of all loans over a fixed-dollar amount where the internal credit rating is at or below a predetermined classification. From this analysis we determine the loans that we believe to be impaired in accordance with SFAS 114. Management has defined impaired as nonaccrual loans. For loans determined to be impaired, we measure the level of impairment by comparing the loan's carrying value using one of the following fair value measurement techniques: present value of expected future cash flows, observable market price, or fair value of the associated collateral. An allowance is established when the collateral value of the loan implies a value that is lower than carrying value. In addition to establishing allowance levels for specifically identified higher risk graded or high delinquency loans, management determines an allowance for all other loans in the portfolio for which historical or projected experience indicates that certain losses will occur. These loans are segregated by major product type, and in some instances, by aging, with an estimated loss ratio or migration pattern applied against each product type and aging category. For portfolios that are too new to have adequate historical experience on which to base a loss estimate, we use estimates derived from industry experience and management's judgment. The loss ratio or migration patterns are generally based upon historic loss experience or historic rate migration behaviors, respectively, for each loan type adjusted for certain environmental factors management believes to be relevant.

Net charge-offs for the three months ended June 30, 2005 were \$3 million, or 0.4% of average loans, compared to \$5 million, or 0.6% of average loans during the same period in 2004. Year-to-date net charge-offs were \$5 million, compared to \$13 million during the same period in 2004. The decrease in charge-offs is a result of improvements in credit quality associated with tighter underwriting guidelines in our home equity business and an improving economy. At June 30, 2005, the allowance for loan and lease losses was 1.3% of outstanding loans and leases, unchanged from 1.3% at December 31, 2004.

Total nonperforming loans and leases at June 30, 2005, were \$33 million, compared to \$34 million at December 31, 2004. Nonperforming loans and leases as a percent of total loans and leases at June 30, 2005 were 0.8%, compared to 1.0% at December 31, 2004. Other real estate we owned totaled \$13 million at June 30, 2005, up from \$9 million at December 31, 2004. Total nonperforming assets at June 30, 2005 were \$47 million, or 0.8% of total assets compared to nonperforming assets at December 31, 2004, of \$45 million, or 0.9% of total assets.

Table of Contents

The following table shows information about our nonperforming assets at the dates shown:

	June 30, 2005	December 31, 2004
	(Dollars in thousands)	
Accruing loans past due 90 days or more:		
Commercial, financial and agricultural loans	\$ 1	\$
Real estate mortgages		219
Consumer loans	77	426
Commercial financing:		
Franchise financing		
Domestic leasing		
Canadian leasing	178	12
	256	657
Nonaccrual loans and leases:		
Commercial, financial and agricultural loans	17,391	20,394
Real estate mortgages	10,745	8,590
Consumer loans	1,228	128
Commercial financing:		
Franchise financing	862	1,193
Domestic leasing	1,063	1,029
Canadian leasing	1,468	1,702
	32,757	33,036
Total nonperforming loans and leases	33,013	33,693
Nonperforming Loans held for Sale not guaranteed	885	2,066
Other real estate owned	12,877	9,427
Total nonperforming assets	\$46,775	\$ 45,186
Nonperforming loans and leases to total loans and leases	0.8%	1.0%
Nonperforming assets to total assets	0.8%	0.9%

For the periods presented, the balances of any restructured loans are reflected in the table above either in the amounts shown for accruing loans past due 90 days or more or in the amounts shown for nonaccrual loans and leases.

Loans that are past due 90 days or more are placed on nonaccrual status unless, in management's opinion, there is sufficient collateral value to offset both principal and accrued interest. The nonperforming assets at June 30, 2005 and December 31, 2004 were held at our lines of business as follows:

June 30, 2005	December 31, 2004
--------------------------	----------------------------------

	(In millions)	
Mortgage banking	\$ 5.9	\$ 8.5
Commercial banking	23.6	22.8
Home equity lending	13.8	10.0
Commercial finance	3.6	3.9

Generally, the accrual of income is discontinued when the full collection of principal or interest is in doubt, or when the payment of principal or interest has become contractually 90 days past due unless the obligation is both well secured and in the process of collection.

Liquidity Risk

Liquidity is the availability of funds to meet the daily requirements of our business. For financial institutions, demand for funds results principally from extensions of credit and withdrawal of deposits. Liquidity is provided through deposits and short-term and long-term borrowings, by asset maturities or sales, and through equity capital.

The objectives of liquidity management are to ensure that funds will be available to meet current and future demands and that funds are available at a reasonable cost. We manage liquidity centrally via daily interaction with the lines of business and periodic liquidity planning sessions. Since loans are less marketable than securities, the ratio of total loans to total deposits is a traditional measure of liquidity for banks and bank holding companies. At June 30, 2005, the ratio of loans and loans held for sale to total deposits was

Table of Contents

133%. We are comfortable with this relatively high level due to our position in first mortgage loans held for sale (\$0.7 billion) and second mortgage loans and leases financed through matched-term secured financing (\$0.8 billion). The mortgage loans carry an interest rate at or near current market rates and are generally sold within a short period after origination. Excluding these items, our loans to deposit ratio at June 30, 2005 was 92%.

The mortgage banking line of business sells virtually all of its mortgage loan originations within 30 days of funding, taking them off our balance sheet. Therefore, the on-balance sheet funding of first mortgage loans is for the brief period of time from origination to sale/securitization.

Since 2002, home equity loan securitizations have been retained on-balance sheet. As a result, both the securitized assets and the funding from the securitization are now reflected on the balance sheet. From a liquidity perspective, the securitizations provide matched-term funding for the life of the loans making up the securitizations unless we choose to utilize a clean-up call provision to terminate the securitization funding early. A clean-up call typically is optional at our discretion. It can typically be made once outstanding loan balances in the securitization fall below 10% of the original loan balance in the securitization. Bond principal payments are dependent upon principal collections on the underlying loans. Prepayment speeds can affect the timing and amount of loan principal payments.

Deposits consist of three primary types: non-maturity transaction account deposits, certificates of deposit (CDs), and escrow account deposits. Core deposits include deposits less jumbo CDs, brokered CDs, public funds and mortgage escrow deposits, although the escrow deposits exhibit core-like maturity characteristics. Core deposits totaled \$2.4 billion at June 30, 2005, compared to \$2.2 billion at December 31, 2004.

Non-maturity transaction account deposits are generated by our commercial banking line of business and include deposits placed into checking, savings, money market and other types of deposit accounts by our customers. These types of deposits have no contractual maturity date and may be withdrawn at any time. While these balances fluctuate daily, a large percentage typically remains for much longer. At June 30, 2005, these deposit types totaled \$2.1 billion, an increase of \$0.2 billion from December 31, 2004. We monitor overall deposit balances daily with particular attention given to larger accounts that have the potential for larger daily fluctuations and which are at greater risk to be withdrawn should there be an industry-wide or bank-specific event that might cause uninsured depositors to be concerned about the safety of their deposits. On a monthly basis, we model the expected impact on liquidity from moderate and severe liquidity stress scenarios as one of our tools to ensure that our liquidity is sufficient.

CDs differ from non-contractual maturity accounts in that they do have contractual maturity dates. We issue CDs both directly to customers and through brokers. CDs issued directly to customers totaled \$0.3 billion at June 30, 2005, no change from December 31, 2004. Brokered CDs are typically considered to have higher liquidity (renewal) risk than CDs issued directly to customers, since brokered CDs are often done in large blocks and since a direct relationship does not exist with the depositor. In recognition of this, we manage the size and maturity structure of brokered CDs closely. For example, the maturities of brokered CDs are laddered to mitigate liquidity risk. CDs issued through brokers totaled \$0.3 billion at June 30, 2005, both figures unchanged from December 31, 2004.

Escrow account deposits are related to the servicing of our first mortgage loans. When a first mortgage borrower makes a monthly mortgage payment, consisting of interest and principal due on the loan and often a real estate tax and insurance portion, we hold the payment on a non-interest earning basis, except where otherwise required by law, until the payment is remitted to the current owner of the loan or the proper tax authority and insurance carrier. Escrow deposits may also include proceeds from the payoff of loans in our servicing portfolio prior to the transmission of those proceeds to investors. At June 30, 2005 these escrow balances totaled \$0.7 billion, unchanged from December 31, 2004.

Short-term borrowings consist of borrowings from several sources. One of our largest borrowing source is the Federal Home Loan Bank of Indianapolis (FHLBI). We utilize their collateralized borrowing programs to help fund qualifying first mortgage, home equity and commercial real estate loans. As of June 30, 2005, FHLBI borrowings outstanding totaled \$0.1 billion, no change from December 31, 2004. We had sufficient collateral pledged to FHLBI at June 30, 2005 to borrow an additional \$0.7 billion, if needed.

In addition to borrowings from the FHLBI, we use other lines of credit as needed. At June 30, 2005, the amount of short-term borrowings outstanding on our major credit lines and the total amount of the borrowing lines were as follows:

Warehouse lines of credit to fund first mortgages and home equity loans: none outstanding on a \$300 million borrowing facility, of which \$150 million is committed

Warehouse borrowing facilities to fund first mortgage loans: none outstanding on a \$150 million committed borrowing facility

Table of Contents

Lines of credit with correspondent banks, including fed funds lines: \$129 million outstanding out of \$215 million available but not committed

Line of credit with a correspondent bank collateralized by mortgage servicing rights: none outstanding out of \$50 million committed borrowing facility

Warehouse lines of credit to fund Canadian sourced small ticket leases: \$186 million outstanding on \$279 million of borrowing facilities

We have three lines of credit subject to compliance with certain financial covenants set forth in these facilities including, but not limited to, net income, consolidated tangible net worth, return on average assets, nonperforming loans, loan loss reserve, tier 1 leverage ratio, and risk-based capital ratio. Due to our low level of net income in the first half of 2005, we requested and obtained waivers with respect to these covenants. As a result of these waivers, we are in compliance with all applicable covenants as of June 30, 2005.

In addition to short-term borrowings from the aforementioned credit lines, sale facilities are used to effect sale of Government Sponsored Enterprise (GSE) conforming first mortgage loans before scheduled GSE settlement dates. The first two of these sale facilities listed below have specific dollar limits as noted. The size of the third facility is limited only by the amount of mortgage-backed securities we can package for purchase by the facility provider. At June 30, 2005, the amount unsettled by the GSE on these facilities and the total facility amount were as follows:

Committed warehouse sale facility: \$75 million unsettled on a \$600 million facility

Uncommitted warehouse sale facility: \$37 million unsettled on a \$150 million facility

Investor warehouse sale facility: \$121 million unsettled

Interest Rate Risk

Because all of our assets are not perfectly match-funded with like-term liabilities, our earnings are affected by interest rate changes. Interest rate risk is measured by the sensitivity of both net interest income and fair market value of net interest sensitive assets to changes in interest rates.

An asset/liability management committee (ALMC) at each of our lines of business that has interest rate risk, monitors the repricing structure of assets, liabilities and off-balance sheet items and uses a financial simulation model to measure the potential change in market value of all interest-sensitive assets and liabilities and also the potential change in earnings resulting from changes in interest rates. Our corporate-level ALMC oversees the interest rate risk profile of all of our lines of business as a whole and is represented at each of the line of business ALMCs. We incorporate many factors into the financial model, including prepayment speeds, deposit rate forecasts for non-maturity transaction accounts, caps and floors that exist on some variable rate instruments, fee income and a comprehensive mark-to-market valuation process. We reevaluate risk measures and assumptions regularly and enhance modeling tools as needed.

Our commercial banking, home equity lending, and commercial finance lines of business assume interest rate risk in the form of repricing structure mismatches between their loans and leases and funding sources. We manage this risk by adjusting the duration of their interest sensitive liabilities and through the use of hedging via financial derivatives.

Our mortgage banking line of business assumes interest rate risk by entering into commitments to extend loans to borrowers at a fixed rate for a limited period of time. We hold closed loans only temporarily until a pool is formed and sold in a securitization or under a flow sale arrangement. To mitigate the risk that interest rates will rise between loan origination and sale, the mortgage bank buys commitments to deliver loans at a fixed price. Interest rate risk also exists for the mortgage pipeline period, which is the period starting when a rate lock commitment is made and ending at the time a loan originates or the rate lock expires. To mitigate this risk, the mortgage bank also buys commitments to deliver loans at a fixed rate for a portion of our pipeline.

Our mortgage, commercial banking and home equity lines of business all assume interest rate risk by holding mortgage servicing rights (MSRs). These assets are recorded at lower of cost or fair market value. Among other items, a key determinant to the value of

Table of Contents

MSRs is the prevailing level of interest rates. We purchase derivative securities to mitigate the expected volatility in the value of these assets.

Our mortgage, commercial banking and home equity lending lines of business also are exposed to the risk that interest rates will decline, possibly increasing prepayment speeds on loans and decreasing the value of servicing assets and residual interests. Some offsets to these exposures exist in the form of strong production operations, selective sales of servicing rights, match-funded asset-backed securities sales and the use of financial instruments to manage the economic performance of the assets. Since there are accounting timing differences between the recognition of gains or losses on financial derivatives and the realization of economic gains or losses on certain offsetting exposures (e.g., strong production operations), our decisions on the degree to which we manage risk with derivative instruments to insulate against short-term price volatility depends on a variety of factors, including:

the type of risk we are trying to mitigate;

offsetting factors elsewhere in the Corporation;

the level of current capital above our target minimums;

time remaining in the quarter (i.e., days until quarter end);

current level of derivative gain or loss relative to accounting and economic basis;

basis risk: the degree to which the interest rates underlying our derivative instruments might not move parallel to the interest rate driving our asset valuation;

convexity: the degree to which asset values, or risk management derivative instrument values, do not change in a linear fashion as interest rates change; and

volatility: the level of volatility in market interest rates and the related impact on our asset values and derivatives instrument values.

When considering hedging strategies for first mortgage MSRs, we attempt to optimize the following mix of competing goals:

1. Provide adequate hedge coverage for falling rates;
2. minimize premium costs to establish hedge positions;
3. provide a moderate amount of net impairment recapture if interest rates rise;
4. when near or above the MSR LOCOM cap, maintain an acceptable range over which interest rates may rise without causing hedge losses to significantly exceed accounting gains.

Pursuit of the last goal may result in the economic value of MSR increasing without offsetting hedge losses. However, in order to capture this economic value in earnings, MSR sales must occur.

Our typical strategy is to establish a corridor of interest rates within which we are initially hedged. This hedge position is dynamically adjusted throughout the quarter. As interest rates move, we adjust our corridor accordingly. Significant fluctuations in interest rates or in the spread between our hedging instruments and mortgage rates can cause the need to reposition our hedges multiple times. This repositioning may, at times, result in variability in inter-quarter results that are not reflective of underlying trends for the Corporation.

The following tables reflect our estimate of the present value of interest sensitive assets, liabilities, and off-balance sheet items at June 30, 2005. In addition to showing the estimated fair market value at current rates, they also provide estimates of the fair market values of interest sensitive items based upon a hypothetical instantaneous and permanent move both up and down 100 and 200 basis points in the entire yield curve.

The first table is an economic analysis showing the present value impact of changes in interest rates, assuming a comprehensive mark-to-market environment. The second table is an accounting analysis showing the same net present value impact, adjusted for expected GAAP treatment. Neither analysis takes into account the book values of the noninterest sensitive assets and liabilities (such as cash, accounts receivable, and fixed assets), the values of which are not directly determined by interest rates.

Table of Contents

The analyses are based on discounted cash flows over the remaining estimated lives of the financial instruments. The interest rate sensitivities apply only to transactions booked as of June 30, 2005, although certain accounts are normalized whereby the three- or six-month average balance is included rather than the quarter-end balance in order to avoid having the analysis skewed by a significant increase or decrease to an account balance at quarter end.

The tables that follow should be used with caution.

The net asset value sensitivities do not necessarily represent the changes in the lines of business net asset value that would actually occur under the given interest rate scenarios, as sensitivities do not reflect changes in value of the companies as a going concern, nor consider potential rebalancing or other management actions that might be taken in the future under asset/liability management as interest rates change.

Specifically, the volume of derivative contracts entered into to manage the risk of MSR's fluctuates from quarter to quarter and within a given quarter, depending upon market conditions, the size of our MSR portfolio and various additional factors. We monitor derivative positions frequently and rebalance them as needed. Therefore, our derivative positions, shown in the table below as of June 30, 2005, may or may not be representative of our risk position during the succeeding quarter. Additionally, it is unlikely that the volume of derivative positions would remain constant over large fluctuations in interest rates, although the tables below assume they do. MSR risk management derivative contracts appear under the category Interest Sensitive Financial Derivatives in the tables below.

The tables below show modeled changes in interest rates for individual asset classes. Asset classes in our portfolio have interest rate sensitivity tied to different underlying indices or instruments. While the rate sensitivity of individual asset classes presented below is our best estimate of changes in value due to interest rate changes, the total potential change figures are subject to basis risk between value changes of individual assets and liabilities which has not been included in the model.

Few of the asset classes shown react to interest rate changes in a linear fashion. That is, the point estimates we have made at Current and +/- 2% and +/- 1% are good estimates at those amounts of rate change, but it may not be accurate to interpolate linearly between those points. This is most evident in products that contain optionality in payment timing or pricing such as mortgage servicing or nonmaturity transaction deposits.

Finally, the tables show theoretical outcomes for dramatic changes in interest rates which do not consider potential rebalancing or repositioning of hedges.

Table of Contents*Operational risk*

Operational risk is the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events. Irwin Financial, like other financial services organizations, is exposed to a variety of operational risks. These risks include regulatory, reputational and legal risks, as well as the potential for processing errors, internal or external fraud, failure of computer systems, and external events that are beyond the control of the Corporation, such as natural disasters.

Our Board of Directors has ultimate accountability for the level of operational risk assumed by us. The Board guides management by approving our business strategy and significant policies. Our management and Board have also established and continue to improve a control environment that encourages a high degree of awareness and proactivity in alerting senior management and the Board to potential control issues on a timely basis.

The Board has directed that primary responsibility for the management of operational risk rests with the managers of our business units, who are responsible for establishing and maintaining internal control procedures that are appropriate for their operations. In 2002, we started implementing a multi-year program to provide a more integrated firm-wide approach for the identification, measurement, monitoring and mitigation of operational risk. The enterprise-wide operational risk oversight function reports to the Chief Risk Officer, who in turn reports to the Audit and Risk Management Committee of our Board of Directors and who chairs our Enterprise-Wide Risk Management Committee. We have an enterprise-wide compliance oversight function. The compliance oversight function reports to our Chief Risk Officer. We have developed risk and control summaries (risk summaries) for our key business processes. Line of business and corporate-level managers use the risk summaries to assist in identifying operational and other risks for the purpose of monitoring and strengthening internal and disclosure controls. Our Chief Executive Officer, Chief Financial Officer and Board of Directors, as well as the Boards of our subsidiaries, use the risk summaries to assist in overseeing and assessing the adequacy of our internal and disclosure controls, including the adequacy of our controls over financial reporting as required by section 404 of the Sarbanes Oxley Act and FDICIA.

The financial services business is highly regulated. Failure to comply with these regulations could result in substantial monetary or other damages that could be material to our financial position. Statutes and regulations may change in the future. We cannot predict what effect these changes, if made, will have on our operations. It should be noted that the supervision, regulation and examination of banks, thrifts and mortgage companies by regulatory agencies are intended primarily for the protection of depositors and other customers rather than shareholders of these institutions.

We are registered as a bank holding company with the Board of Governors of the Federal Reserve System under the Bank Holding Company Act of 1956, as amended, and the related regulations. We are subject to regulation, supervision and examination by the Federal Reserve, and as part of this process we must file reports and additional information with the Federal Reserve. The regulation, supervision and examinations occur at the local, state and federal levels and involve, but are not limited to, minimum capital requirements, consumer protection, community reinvestment, and deposit insurance.

Off-Balance Sheet Instruments

In the normal course of our business as a provider of financial services, we are party to certain financial instruments with off-balance sheet risk to meet the financial needs of our customers. These financial instruments include loan commitments and standby letters of credit. Those instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amounts recognized on the consolidated balance sheet. We follow the same credit policies in making commitments and contractual obligations as we do for our on-balance sheet instruments.

Our exposure to credit loss, in the form of nonperformance by the counterparty on commitments to extend credit and standby letters of credit, is represented by the contractual amount of those instruments. Collateral pledged for standby letters of credit and commitments varies but may include accounts receivable; inventory; property, plant, and equipment; and residential real estate. Total outstanding commitments to extend credit at June 30, 2005 and December 31, 2004, respectively, were \$756 million and \$720 million. We had \$21 million and \$25 million in irrevocable standby letters of credit outstanding at June 30, 2005 and December 31, 2004, respectively.

Derivative Financial Instruments

Financial derivatives are used as part of the overall asset/liability risk management process. We use certain derivative instruments that do not qualify for hedge accounting treatment under SFAS 133. These derivatives are classified as other assets and other liabilities and marked to market on the income statement. While we do not seek GAAP hedge accounting treatment for the assets that these instruments are hedging, the economic purpose of these instruments is to manage the risk inherent in existing exposures to either interest rate risk or foreign currency risk.

Table of Contents

We entered into an interest rate swap that has a notional amount (which does not represent the amount at risk) of \$25 million as of June 30, 2005. Under the terms of the swap agreement, we receive a fixed rate of interest and pay a floating rate of interest based upon one-month LIBOR. We recognized a loss of \$22 thousand included in derivative gains or losses for the year-to-date period ending June 30, 2005 related to this swap. By receiving a fixed rate of interest and paying a floating rate on the swap, we are converting the economics of a \$25 million fixed rate-funding source into a floating rate funding source. Additionally, we entered into interest rate swaps that met the criteria for the application of SFAS 133 fair value hedge treatment accounting. These swaps have a notional amount (which does not represent the amount of risk) of \$145 million to hedge a fixed rate certificate of deposits. We recognized a loss of \$0.1 million included in interest expense year to date ending June 30, 2005 related to these swaps. Under the terms of these swap agreements, we receive a fixed rate of interest and pay a floating rate of interest based upon three-month LIBOR.

We own foreign currency forward contracts to protect the U.S. dollar value of intercompany loans made to Irwin Commercial Finance Canada Corporation (formerly Onset Capital Corporation) that are denominated in Canadian dollars. We had a notional amount of \$46 million in forward contracts outstanding as of June 30, 2005. So far in 2005 we recognized gains on these contracts of \$0.2 million. These contracts are marked-to-market with gains and losses included in Derivative gains or losses on the consolidated income statements. The foreign currency transaction loss on the intercompany loans was \$0.2 million year to date ending June 30, 2005.

We enter into forward contracts to protect against interest rate fluctuations from the date of mortgage loan commitment until the loans are sold. The notional amount of our forward contracts (which does not represent the amount at risk) totaled \$1.5 billion at June 30, 2005. The closed mortgage loans hedged by forward contracts qualify for fair value hedge accounting treatment under SFAS 133. The basis of the hedged closed loans is adjusted for change in value associated with the risk being hedged. We value closed loan contracts at period end based upon the current secondary market value of securities with similar characteristics. The unrealized loss on our forward contracts at June 30, 2005 was \$4.2 million and the hedge ineffectiveness year to date in 2005 resulted in a loss of \$1.3 million. The effect of these hedging activities was recorded through earnings as a component of Gain from sale of loans.

We enter into commitments to originate mortgage loans whereby the interest rate on the loan is determined prior to funding (rate lock commitments). Rate lock commitments on loans intended to be sold are considered to be derivatives. We record changes in the fair value of these commitments based upon the current secondary market value of securities with similar characteristics. Year to date, a net increase in fair value of these derivatives totaling \$4.1 million was recorded in Gain from sale of loans. At June 30, 2005, we had a notional amount of rate lock commitments outstanding totaling \$1.5 billion with a fair value of \$3.6 million. Notional amounts do not represent the amount of risk.

Our commercial finance line of business delivered fixed rate leases into conduits that fund them with floating rate commercial paper, which creates an interest rate risk mismatch.

In two instances, this funding mismatch is partially mitigated by a combination of amortizing interest rate caps and Eurodollar futures contracts. The interest rate caps have a strike price of 5% and provide protection against a large increase in short-term interest rates. As of June 30, 2005, the notional value and 2005 loss on the interest rate caps were \$16 million and \$4 thousand, respectively. As of June 30, 2005, the total notional amount and year-to-date loss on the Eurodollar futures were \$45 million and \$9 thousand, respectively.

We deliver fixed rate leases into a second commercial paper conduit. Although the leases and funding were in Canadian dollars (CAD), the interest rate mismatch is similar in nature to that described above. To lessen the repricing mismatch between fixed rate CAD-denominated leases and floating rate CAD commercial paper, a series of amortizing CAD interest rate swaps have been executed. As of June 30, 2005, the commercial paper conduit was providing \$118 million of variable rate funding. In total, our interest rate swaps were effectively converting \$108 million of this funding to a fixed interest rate. The year-to-date losses on these swaps at June 30, 2005 were \$0.3 million.

Certain of our home equity fixed rate residual interests are funded with floating rate liabilities. We enter into Eurodollar futures contracts to manage such mismatches. The original positions taken are typically rebalanced

quarterly. The current notional value outstanding is \$276 million (which does not represent the amount at risk). As of June 30, 2005, the fair value and year-to-date gain recorded on these contracts were \$0.4 million and \$0.3 million, respectively.

During the second quarter of 2005, we entered into a \$120 million amortizing interest rate swap in which we pay a fixed rate of interest and receive floating rate. The purpose of the swap is to manage interest rate risk exposure created by the 2005-1 securitization in which approximately \$125 million floating rate notes are funding fixed rate loans. The notional value of the swap amortizes at a pace that is consistent with the expected paydown speed of the floating rate notes (including prepayment speed estimates), although

Table of Contents

the actual note paydowns will vary depending upon actual prepayment speeds. This swap is accounted for as a cashflow hedge in accordance with FAS 133, with the changes in the fair value reported as a component of equity and amortized through interest expense during the matching periods.

In connection with certain of our whole loan servicing retained second mortgage sales we have the opportunity to earn an additional incentive servicing fee (ISF) in the future. The whole loan sales have been to firms, (the buyers) who securitize the loans and contract with us to service the loans. We recognize a mortgage servicing asset for these servicing contracts. As a part of the buyers' securitizations, the buyers issue a separate Incentive Servicing Agreement to us as Master Servicer. Once a pre-established return for the certificate holders has been met, the ISF provides cash payments to us in the event certain structure-specific loan credit and servicing performance metrics are met. These ISF contracts are treated as derivatives under SFAS 133, Accounting for Derivative Instruments and Hedging Activities, and classified in other assets. Our policy requires discounting these derivatives (currently at rates between 20% and 40%), depending on a variety of factors, including volatility of anticipated cash flow, credit quality, loan-to-value ratio, and anticipated prepayment speeds. At June 30, 2005, we were receiving incentive fees for two transactions that had met these performance metrics. Included in Derivative gains or losses in the first half of 2005 was a \$15 million gain related to these ISFs. The ISF valuation is based upon actual and projected performance of the underlying pools of loans and represents the discounted projected value of future cash flow.

We manage the interest rate risk associated with our mortgage servicing rights at our mortgage banking and commercial banking lines of business through the use of swaptions and Eurodollar futures contracts. Both the options and futures contracts are marked-to-market and included in Other assets with changes in value recorded in the consolidated income statements as Derivative gains or losses. At June 30, 2005, we held open swaption positions with a notional value (which does not represent the amount at risk) totaling \$6 billion. As of June 30, 2005, we recorded year-to-date losses on swaptions, including premiums paid, totaling \$24 million. We held no Eurodollar futures contracts at June 30, 2005, but we recorded losses of \$44 thousand on contracts held during the year. The size and mix of these positions change during the year, so period-end positions may not be indicative of our net risk exposure throughout the year.

At June 30, 2005, we had approximately \$1.3 million of mortgage servicing rights at risk to each one basis point change in interest rates. This amount decreases to approximately \$1.2 million as interest rates decline by approximately 35 basis points from current rates at the end of the quarter and declines thereafter as rates fall to approximately \$1 million over the next 25 basis points. As interest rates rise, our exposure declines to approximately \$0.4 million within approximately 20 basis from then current rates at the end of June. Reflecting the \$6 billion (notional) swaption positions we had as of June 30, 2005, we had constructed a corridor of relative rate neutrality for the net position of derivatives and mortgage servicing assets (MSRs) in a range of 30 basis points down and 25 up from June 30 spot rates. To create this corridor, we structured derivative coverage which will limit our GAAP impairment recovery should rates rise as compared to the June 30, 2005, levels. Interest rates have in fact risen from the end of June to the time of this filing. Therefore, our declining rate protection, absent material basis risk, now extends for over 50 points from current spot rates. However, as rates have risen in the third quarter of 2005, the economic value of the MSR has, for most GAAP-based risk stratum, exceeded the amortized cost basis of the asset. As noted above, in order to record meaningful revenues due to this increase in economic value, we will need to sell servicing as our ability to recognize increased value is capped under GAAP to the lower of cost or market. In addition, it should be noted that the foregoing is a description of our net MSR/derivative profile at the time of this filing and is not necessarily predictive of conditions at the end of the third quarter 2005.

Finally, while basis risk exhibits stability over longer periods of time, over shorter periods there can be separation in the relative spreads of interest rates and indices used to value mortgage servicing rights and the financial derivatives we use to hedge the change in value in mortgage servicing rights. At times this basis risk benefits us and at other times it does not. It is generally not possible for us to eliminate this basis risk. It is possible, therefore, that our balanced revenue strategy may be successful as measured over several quarters or years, but may have market-based variances if measured over short periods such as quarters.

Table of Contents

The following table illustrates the changes in net impairment and hedge gain/losses by quarter for the mortgage lending line of business:

	Ending GNMA Rate	Change in GNMA Rate (in bps)	(Impairment) recovery		Hedge	Net Impairment
					(Dollars in millions)	
Q1 02	6.66%	21	\$ 10.7	\$ (8.1)	\$ 2.6

Item 3. Quantitative and Qualitative Disclosures about Market Risk.

The quantitative and qualitative disclosures about market risk are reported in the Interest Rate Risk section of Item 2, Management's Discussion and Analysis of Financial Condition and Results of Operations found on pages 54 through 57.

Item 4. Controls and Procedures.

In the ordinary course of internal process and control review by management and internal and external audit, we will periodically identify processes and controls that need improvement. When these are identified, we have procedures in place to bring the matter to the attention of the appropriate management and Board committees and to put into place project plans to address the improvement opportunity.

As of June 30, 2005, we performed an evaluation under the supervision and with the participation of our management, including the Chief Executive Officer and the Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e)). Based on that evaluation, and subject to the possibility of deficiencies in effectiveness of our disclosure controls and procedures that may be discovered in our ongoing investigation of the circumstances and operation of relevant controls of the fraud described below, our management, including the CEO and CFO, concluded that our disclosure controls and

procedures were effective as of June 30, 2005, to provide that the material information relating to the Corporation would be made known to them by others within the Corporation in a timely manner sufficient for filing or furnishing reports to the SEC.

There has been no change in the Corporation's internal control over financial reporting, (as defined in the Securities Exchange Act of 1934 Rules 13a-15(f) and 15d-15(f)) that occurred during the Corporation's fiscal quarter ended June 30, 2005 that has materially affected or is reasonably likely to materially affect the Corporation's internal control over financial reporting.

Table of Contents

Toward the end of the second quarter we discovered what we believe is a fraud perpetrated by an employee at one of our subsidiaries. We have identified a potential loss of approximately \$300,000 as a result of the incident and terminated the employee. We have reserved the full amount for this potential loss. Because the suspected fraud was discovered late in the quarter and we are still conducting a review of the circumstances, we have not yet reached a conclusion as to whether changes in our internal control over financial reporting are necessary in connection with this matter and, if so, whether any changes, if made, would materially affect or are reasonably likely to materially affect our internal control over financial reporting.

Table of Contents**PART II. Other Information.****Item 1. Legal Proceedings.**

Since the time we filed our Report on Form 10-Q for the period ended March 31, 2005, we experienced developments as noted in the litigation described below. For a full description of the litigation, see Note 10, Commitments and Contingencies, in the Notes to Consolidated Financial Statements, Part I, Item 1, of this Report.

United States ex rel. Paranich v. Sorgnard et al. (action filed in January 2001 in the United States District Court for the Middle District of Pennsylvania alleging that a manufacturer/importer of certain medical devices made misrepresentations to health care professionals and to government officials to improperly obtain Medicare reimbursement for treatments using the devices, and that Irwin aided in making the alleged misrepresentations through the financing activities of Affiliated Capital Corp., our indirect subsidiary).

Developments: The Court of Appeals' dismissal of the plaintiff's case against Irwin is final. The period during which the plaintiff could have petitioned the United States Supreme Court for a writ of certiorari expired on April 28, 2005, and no petition was filed.

Cohens v. Inland Mortgage Corporation (lawsuit filed against Irwin Mortgage Corporation, our indirect subsidiary, and others in October 2003 in the Supreme Court of New York, County of Kings for plaintiffs' alleged injuries from lead contamination while living in premises allegedly owned by defendants).

Developments: On June 15, 2005, Irwin Mortgage filed an answer and cross-claims seeking dismissal of the complaint.

Litigation in Connection with Loans Purchased from Community Bank of Northern Virginia (Community) (lawsuits, including those seeking class action status, alleging various violations under the Truth-in-Lending Act, the Home Ownership and Equity Protection Act, the Real Estate Settlement Procedures Act, the Racketeer Influenced and Corrupt Organizations Act, other state law violations, and/or conversion in connection with loans Irwin Union Bank and Trust Company, our subsidiary, purchased from Community).

Developments: On April 28, 2005, the Judicial Panel On Multidistrict Litigation granted Irwin's motion to transfer *Hobson v. Irwin Union Bank and Trust Company* and two individual lawsuits (*Chatfield v. Irwin Union Bank and Trust Company* and *Ransom v. Irwin Union Bank and Trust Company*) to the United States District Court for the Western District of Pennsylvania for coordination or consolidation with *Kossler v. Community Bank of Northern Virginia*. *Kossler* is an action seeking class certification originally filed in July 2002 in the United States District Court for the Western District of Pennsylvania and amended to add Irwin Union Bank and Trust as a defendant in December 2004. *Hobson*, *Chatfield*, *Ransom* and *Kossler* have been consolidated in the Western District of Pennsylvania for all pretrial proceedings. On June 23, 2005, Irwin filed a motion to dismiss the *Kossler* action.

Litigation Related to NorVergence, Inc. (complaints, lawsuits and investigations in various jurisdictions in connection with the failure of NorVergence, Inc., a telecommunications company that assigned its leases to Irwin Business Finance, our indirect subsidiary, and other lenders; the actions against the lenders, including Irwin Business Finance, seek to void the lease contracts and stop collection efforts).

Developments: Irwin Business Finance is pursuing discussions with all states in which it has customers who executed agreements with NorVergence and has discontinued collection activities while discussions are in progress. Irwin has reached agreements in principle with: the Attorney General of California, providing for recovery of 15% of outstanding balances on California leases as of July 15, 2004, and with the Attorney General of Florida, entitling Irwin to lease payments through January 31, 2005. Irwin is in continuing negotiations with a multi-state group of attorneys general, which appears to be progressing towards an agreement that would require NorVergence lessees in their states to pay all amounts due through July 15, 2004, with the lenders, including Irwin, entitled to 15% of the then-outstanding balance.

On April 29, 2005, acting on defendants' motion to dismiss, the judge in the lawsuit commenced by the Attorney General of Florida dismissed the action in its entirety. The Attorney General of Florida appealed the order of dismissal. Irwin Business Finance has now been dismissed from the appeal as a result of its settlement with the state of Florida.

Plaintiffs in the *Sterling Asset & Equity Corp. et al. v. Preferred Capital, Inc. et al.* lawsuit voluntarily dismissed the action in June of 2005 after Irwin Business Finance had filed its motion to dismiss the complaint.

Table of Contents

On June 16, 2005, the judge in the *Exquisite Caterers* lawsuit denied Plaintiffs' alternative motions for certification of either a nationwide class or a class of New Jersey residents only.

Irwin Business Finance has fully responded to the April 5, 2005 informal request for information and documents from the Federal Trade Commission.

We and our subsidiaries are from time to time engaged in various matters of litigation, including the matters described above, other assertions of improper or fraudulent loan practices or lending violations, and other matters, and we have a number of unresolved claims pending. In addition, as part of the ordinary course of business, we and our subsidiaries are parties to litigation involving claims to the ownership of funds in particular accounts, the collection of delinquent accounts, challenges to security interests in collateral, and foreclosure interests, that is incidental to our regular business activities. While the ultimate liability with respect to these other litigation matters and claims cannot be determined at this time, we believe that damages, if any, and other amounts relating to pending matters are not likely to be material to our consolidated financial position or results of operations, except as described above. Reserves are established for these various matters of litigation, when appropriate under SFAS 5, based in part upon the advice of legal counsel.

Item 4. Submission of Matters to a Vote of Security Holders.

(a) We held our Annual Meeting of Shareholders on April 7, 2005.

(b) The following Director Nominees were elected to serve on the Board until the 2008 Annual Meeting, by the votes set forth below:

Nominee	For	Withheld
R. David Hoover	25,136,002	1,034,966
William I. Miller	25,148,015	1,022,953
Theodore M. Solso	20,376,194	5,794,774

(c) In addition to the election of directors, the shareholders voted on and approved the following proposals:

MATTER	FOR	AGAINST	ABSTAIN
Proposal to amend the Restated Articles of Incorporation regarding the indemnification of directors, officers and employees, by moving the current indemnification provisions of the Restated Articles to the By-laws and replacing the indemnification provisions in the Restated Articles with a general provision authorizing indemnification to the fullest extent of the law.	20,361,677	5,560,728	246,612

Item 6. Exhibits.

Exhibit Number	Description of Exhibit
3.1	Restated Articles of Incorporation of Irwin Financial Corporation, as amended April 7, 2005. (Incorporated by reference to Exhibit 3.1 of Form 10-Q Report for the quarter ended March 31, 2005, File No. 001-16691.)
3.2	Code of By-laws of Irwin Financial Corporation, as amended, dated May 4, 2005.
4.1	Specimen Common Stock Certificate (Incorporated by reference to Exhibit 4(a) to Form 10-K report for year ended December 31, 1994, File No. 0-06835.).
4.2	Certain instruments defining the rights of the holders of long-term debt of Irwin Financial Corporation and certain of its subsidiaries, none of which authorize a total amount of indebtedness in excess of 10% of the total assets of the Corporation and its subsidiaries on a consolidated basis, have not been filed as Exhibits. The Corporation hereby agrees to furnish a copy of any of these agreements to the Commission upon request.
4.3	Rights Agreement, dated as of March 1, 2001, between Irwin Financial Corporation and Irwin Union Bank and Trust. (Incorporated by reference to Exhibit 4.1 to Form 8-A filed March 2, 2001, File No. 000-06835.)
4.4	Appointment of Successor Rights Agent dated as of May 11, 2001 between Irwin Financial Corporation and National City Bank. (Incorporated by reference to Exhibit 4.5 to Form S-8 filed on September 7, 2001, File No. 333-69156.)
10.1	*Irwin Financial Corporation 1992 Stock Option Plan. (Incorporated by reference to Exhibit 10(h) to Form 10-K Report for year ended December 31, 1992, File No. 000-06835.)
10.2	*Irwin Financial Corporation 1997 Stock Option Plan. (Incorporated by reference to Exhibit 10 to Form 10-Q Report for period ended June 30, 1994, File No. 000-06835.)
10.3	*Amendment to Irwin Financial Corporation 1997 Stock Option Plan. (Incorporated by reference to Exhibit 10(i) to Form 10-Q Report for period ended June 30, 1997, File No. 000-06835.)
10.4	*Irwin Financial Corporation Amended and Restated 2001 Stock Plan. (Incorporated by reference to Exhibit 1 to the Corporation's proxy statement for its 2004 Annual Meeting, filed with the Commission on March 18, 2004, File No. 001-16691.)
10.5	*Irwin Financial Corporation 1999 Outside Director Restricted Stock Compensation Plan. (Incorporated by reference to Exhibit 2 to the Corporation's proxy statement for its 2004 Annual Meeting, filed with the Commission on March 18, 2004, File No. 001-16691.)
10.6	*Employee Stock Purchase Plan III. (Incorporated by reference to Exhibit 10(a) to Form 10-Q Report for period ended June 30, 1999, File No. 000-06835.)
10.7	*Long-Term Management Performance Plan. (Incorporated by reference to Exhibit 10(a) to Form 10-K Report for year ended December 31, 1986, File No. 000-06835.)

- 10.8 *Long-Term Incentive Plan-Summary of Terms. (Incorporated by reference to Exhibit 10(a) to Form 10-K Report for year ended December 31, 1986, File No. 000-06835.)
- 10.9 *Inland Mortgage Corporation Long-Term Incentive Plan. (Incorporated by reference to Exhibit 10(j) to Form 10-K Report for year ended December 31, 1995, File No. 000-06835.)
- 10.10 *Amended and Restated Management Bonus Plan. (Incorporated by reference to Exhibit 10(a) to Form 10-K Report for year ended December 31, 1986, File No. 000-06835.)
- 10.11 *Limited Liability Company Agreement of Irwin Ventures LLC. (Incorporated by reference to Exhibit 10(a) to Form 10-Q/A Report for period ended March 31, 2001, File No. 000-06835.)
- 10.12 *Limited Liability Company Agreement of Irwin Ventures Co-Investment Fund LLC, effective as of April 20, 2001. (Incorporated by reference to Exhibit 10.17 to Form S-1/A filed February 14, 2002, File No. 333-69586.)
- 10.13 *Promissory Note dated January 30, 2002 from Elena Delgado to Irwin Financial Corporation. (Incorporated by reference to Exhibit 10.19 to Form S-1/A filed February 14, 2002, File No. 333-69586.)
