Rule 424(b)(3)
File #333-151667

PROSPECTUS SUPPLEMENT
(to Prospectus dated June 23, 2009)

CEL-SCI CORPORATION
Common Stock

By means of this prospectus CEL-SCI Corporation is offering to sell up to 2,600,000 shares of its common stock to investors at a price of \$0.40 per share. For each 100 shares purchased an investor will also receive 67 Series A warrants. Each Series A warrant will entitle the holder to purchase one share of CEL-SCI's common stock. The Series A warrants may be exercised at any time on or after December 24, 2009 and on or prior to December 24, 2014 at a price of \$0.50 per share.

CEL-SCI has agreed to pay Neidiger/Tucker/Bruner Inc., the placement agent for a number of investors, a cash commission of \$11,500 in connection with the sale of 575,000 shares and 385,250 Series A warrants.

The securities offered by this prospectus are speculative and involve a high degree of risk and should be purchased only by persons who can afford to lose their entire investment. For a description of certain important factors that should be considered by prospective investors, see "Risk Factors" beginning on page 7 of the accompanying prospectus.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or has passed upon the accuracy or adequacy of this prospectus. Any representation to the contrary is a criminal offense.

CEL-SCI's common stock is traded on the NYSE AMEX under the symbol "CVM". On June 25, 2009 the closing price of CEL-SCI's common stock was \$0.41.

One-third of the market value of CEL-SCI's common stock owned by non-affiliates, based upon the highest price of CEL-SCI's common stock during the 60 days prior to the date of this prospectus, was approximately \$25,000,000. During the twelve months prior to the date of this prospectus CEL-SCI received \$5,750,000 from the sale of its securities offered by its current shelf registration statement.

The date of this prospectus supplement is June 25, 2009.

PROSPECTUS SUMMARY

THIS SUMMARY IS QUALIFIED BY THE MORE DETAILED INFORMATION APPEARING ELSEWHERE IN THIS PROSPECTUS SUPPLEMENT, AS WELL AS THE ACCOMPANYING PROSPECTUS DATED JUNE 23, 2009.

CEL-SCI

Edgar Filing: CEL SCI CORP - Form 424B3

CEL-SCI Corporation (CEL-SCI) was formed as a Colorado corporation in 1983. CEL-SCI's principal office is located at 8229 Boone Boulevard, Suite 802, Vienna, VA 22182. CEL-SCI's telephone number is 703-506-9460 and its web site is www.cel-sci.com. CEL-SCI makes its electronic filings with the Securities and Exchange Commission (SEC), including its annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to these reports available on its website free of charge as soon as practicable after they are filed or furnished to the SEC.

CEL-SCI's business consists of the following:

- 1) Multikine cancer therapy;
- 2) New "cold fill" manufacturing service to the pharmaceutical industry; and
- 3) LEAPS technology, with two products, CEL-1000 being tested for various diseases and CEL-2000, a rheumatoid arthritis vaccine.

MULTIKINE

CEL-SCI's lead product, Multikine(R), is being developed for the treatment of cancer. It is the first of a new class of cancer immunotherapy drugs called Immune SIMULATORS. It simulates the activities of a healthy person's immune system, which battles cancer every day. Multikine is multi-targeted; it is the only cancer immunotherapy that both kills cancer cells in a targeted fashion and activates the general immune system to destroy the cancer. We believe Multikine is the first immunotherapeutic agent being developed as a first-line standard of care treatment for cancer and it is cleared for a global Phase III clinical trial in advanced primary (previously untreated) head and neck cancer patients.

Multikine is a new type of immunotherapy in that it is a comprehensive immunotherapy, incorporating both active and passive immune activity. A comprehensive immunotherapy most closely resembles the workings of the natural immune system in the sense that it works on multiple fronts in the battle against cancer. A comprehensive immunotherapy causes a direct and targeted killing of the tumor cells and activates the immune system to produce a more robust and sustainable anti-tumor response.

Multikine is designed to target the tumor micro-metastases that are mostly responsible for treatment failure. The basic concept is to add Multikine to the current cancer treatments with the goal of making the overall cancer treatment more successful. Phase II data indicated that Multikine treatment resulted in a substantial increase in the survival of patients. The lead indication is advanced primary (previously untreated) head & neck cancer (about 600,000 new

2

cases per annum). Since Multikine is not tumor specific, it may also be applicable in many other solid tumors.

In January 2007, the US Food and Drug Administration (FDA) concurred with the initiation of a global Phase III clinical trial in head and neck cancer patients using Multikine. The Canadian regulatory agency, the Biologics and Genetic Therapies Directorate, had previously concurred with the initiation of a global Phase III clinical trial in head and neck cancer patients using Multikine.

The protocol is designed to develop conclusive evidence of the efficacy of Multikine in the treatment of advanced primary (previously untreated) squamous cell carcinoma of the oral cavity (head and neck cancer). A successful outcome

Edgar Filing: CEL SCI CORP - Form 424B3

from this trial should enable CEL-SCI to apply for a Biologics License to market Multikine for the treatment of this patient population.

The trial will test the hypothesis that Multikine treatment administered prior to the current standard therapy for head and neck cancer patients (surgical resection of the tumor and involved lymph nodes followed by radiotherapy or radiotherapy and concurrent chemotherapy) will extend the overall survival, enhance the local/regional control of the disease and reduce the rate of disease progression in patients with advanced oral squamous cell carcinoma.

UNIQUE COLD FILL CONTRACT MANUFACTURING SERVICE TO BE OFFERED AT CEL-SCI'S NEW MANUFACTURING FACILITY

In October 2008, CEL-SCI took over its new, state-of-the-art manufacturing facility. This facility, leased from a third party, will be used to manufacture Multikine for CEL-SCI's Phase III clinical trial. Located near Baltimore, MD, it was designed over several years, and was built out to CEL-SCI's specifications during the past 18 months. In addition to using this facility to manufacture Multikine, CEL-SCI will offer the use of the facility as a service to pharmaceutical companies and others, particularly those that need to "fill and finish" their drugs in a cold environment (4 degrees Celsius, or approximately 39 degrees Fahrenheit). Fill and finish is the process of filling injectable drugs in a sterile manner and is a key part of the manufacturing process for many medicines.

The fastest area of growth in the biopharmaceutical and pharmaceutical markets is biologics, and most recently stem cell products. Biologics are usually very sensitive to heat and quickly lose their biological activity if exposed to room or elevated temperature. However, these products do not generally lose activity when kept at 4 degrees Celsius.

The FDA and other regulatory agencies require a drug developer to demonstrate the safety, purity and potency of a drug being produced for use in humans. When filling a product at 4 degrees Celsius, minimal to no biological losses occur and therefore the potency of the drug is maintained throughout the final critical step of the drug's manufacturing process. If the same temperature sensitive drug is instead aseptically filled at room temperature, expensive and time consuming validation studies must be conducted, first, to be able to obtain a complete understanding of the product's potency loss during the room

3

temperature fill process, and second, to create solutions to the drug's potency losses, which require further testing and validation.

CEL-SCI's unique, cold aseptic filling suite can be operated at temperatures between 2 degrees Celsius and room temperatures, and at various humidity levels. CEL-SCI's aseptic filling suites are maintained at FDA and EU ISO classifications of 5/6. CEL-SCI also has the capability to formulate, inspect, label and package biologic products at cold temperatures.

CEL-SCI does not know of any other facility in the United States which is able to provide cold 4 degrees Celsius finish and fill services on a contract basis.

L.E.A.P.S.

CEL-SCI's patented T-cell Modulation Process uses "heteroconjugates" to

Edgar Filing: CEL SCI CORP - Form 424B3

direct the body to choose a specific immune response. The heteroconjugate technology, referred to as L.E.A.P.S. (Ligand Epitope Antigen Presentation System), is intended to selectively stimulate the human immune system to more effectively fight bacterial, viral and parasitic infections as well as autoimmune, allergies, transplantation rejection and cancer, when it cannot do so on its own. Administered like vaccines, L.E.A.P.S. combines T-cell binding ligands with small, disease associated, peptide antigens and may provide a new method to treat and prevent certain diseases.

The ability to generate a specific immune response is important because many diseases are often not combated effectively due to the body's selection of the "inappropriate" immune response. The capability to specifically reprogram an immune response may offer a more effective approach than existing vaccines and drugs in attacking an underlying disease.

Using the LEAPS technology, CEL-SCI discovered a peptide, named CEL-1000, which is currently being tested in animals for the prevention/treatment of avian flu, herpes simplex, malaria, viral encephalitis, smallpox, vaccinia and a number of other indications.

With its LEAPS technology CEL-SCI also discovered a second peptide named CEL-2000, a potential rheumatoid arthritis vaccine. The data from animal studies of rheumatoid arthritis using the CEL-2000 treatment vaccine demonstrated that CEL-2000 is an effective treatment against arthritis with fewer administrations than those required by other anti-rheumatoid arthritis treatments, including Enbrel(R). CEL-2000 is also potentially a more disease type specific therapy, is calculated to be significantly less expensive and may be useful in patients unable to tolerate or who may not be responsive to existing anti-arthritis therapies.

General

CEL-SCI has funded the costs associated with the clinical trials relating to CEL-SCI's technologies, research expenditures and CEL-SCI's administrative expenses with the public and private sales of CEL-SCI's securities and borrowings from third parties, including affiliates of CEL-SCI.

4

All of CEL-SCI's products are in the development stage. As of June 24, 2009 CEL-SCI was not receiving any revenues from the sale of MULTIKINE or any other products which CEL-SCI was developing.

CEL-SCI does not expect to develop commercial products for several years, if at all. CEL-SCI has had operating losses since its inception, had an accumulated deficit of approximately \$(125,500,000) at March 31, 2009 and expects to incur substantial losses for the foreseeable future.

CEL-SCI's executive offices are located at 8229 Boone Blvd., #802, Vienna, Virginia 22182, and its telephone number is (703) 506-9460.

THE OFFERING

Securities Offered:

Up to 2,600,000 shares of common stock are being offered to investors at a price of \$0.40 per share. For each 100 shares purchased, an investor will receive 67 Series A warrants. Each Series A warrant will entitle the investor to purchase one share of CEL-SCI's common stock. The Series A warrants may be

Edgar Filing: CEL SCI CORP - Form 424B3

exercised at any time on or after December 24, 2009 and on or prior to December 24, 2014 at a price of \$0.50 per share.

Common Stock Outstanding: As of June 23, 2009 CEL-SCI had 130,009,882 outstanding shares of common stock. The number of outstanding shares does not give effect to shares which may be issued upon the exercise and/or conversion of options, warrants or other convertible securities, or the sale of the shares described in the following paragraph. If all outstanding warrants and convertible securities were exercised and converted (exclusive of the shares and warrants described below and those which are sold by means of this prospectus supplement), CEL-SCI would have 193,559,412 outstanding shares of common stock.

On June 24, 2009 CEL-SCI sold 12,500,000 shares of its common stock, at a price of \$0.40 per share to one investor. In connection with this sale the investor received 8,375,000 Series A warrants.

Risk Factors: The purchase of the securities offered by this prospectus involves a high degree of risk. Risk factors include the lack of revenues and history of loss, need for additional capital and need for FDA approval. See the "Risk Factors" section of the accompanying prospectus.

NYSE Amex trading
symbol: CVM

5

Use of Proceeds: The net proceeds from the sale of the securities offered, after deducting the placement agent's commission and the estimated expenses of this offering, will be approximately \$1,040,000 and will be used for CEL-SCI's general and administrative expenses.

Forward Looking Statements

This prospectus contains various forward-looking statements that are based on CEL-SCI's beliefs as well as assumptions made by and information currently available to CEL-SCI. When used in this prospectus, the words "believe", "expect", "anticipate", "estimate" and similar expressions are intended to identify forward-looking statements. Such statements may include statements regarding seeking business opportunities, payment of operating expenses, and the like, and are subject to certain risks, uncertainties and assumptions which could cause actual results to differ materially from projections or estimates. Factors which could cause actual results to differ materially are discussed at length under the heading "Risk Factors". Should one or more of the enumerated risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those anticipated, estimated or projected. Investors should not place undue reliance on forward-looking statements, all of which speak only as of the date made.

PLAN OF DISTRIBUTION

Except as described below, CEL-SCI will offer the shares and warrants

Edgar Filing: CEL SCI CORP - Form 424B3

directly to select investors.

CEL-SCI has agreed to grant to Neidiger/Tucker/Bruner, Inc. ("NTB") the right to place for sale 575,000 shares of CEL-SCI's common stock, as well as 385,250 Series A warrants.

NTB may solicit purchases of some or all of the shares and warrants directly from its customers at the public offering price set forth on the cover page of this prospectus supplement.

NTB will not acquire any shares or warrants for its own account.

It is expected that the closing of this offering will take place on June 29, 2009. If the sale to the three investors closes, NTB will receive from CEL-SCI a cash commission of \$11,500.

The following table shows the commission that CEL-SCI has agreed to pay to NTB in connection with this offering:

Per share	\$0.02
Total	\$11,500, (for the sale of 575,000 shares and 385,250 warrants)

NTB may, from time to time, engage in transactions with and perform services for CEL-SCI in the ordinary course of its business.

6

CEL-SCI estimates that its portion of the total expenses of this offering, exclusive of the commission to NTB, will be approximately \$1,020,000.

DESCRIPTION OF SECURITIES

By means of this prospectus CEL-SCI Corporation is offering to sell up to 2,600,000 shares of its common stock to private investors at a price of \$0.40 per share. For each 100 shares purchased the investor will receive 67 Series A warrants. Each Series A warrant will entitle the investor to purchase one share of CEL-SCI's common stock.

Common Stock

CEL-SCI is authorized to issue 300,000,000 shares of common stock, (the "common stock"). Holders of common stock are each entitled to cast one vote for each share held of record on all matters presented to shareholders. Cumulative voting is not allowed; hence, the holders of a majority of the outstanding common stock can elect all directors.

Holders of common stock are entitled to receive such dividends as may be declared by the Board of Directors out of funds legally available therefor and, in the event of liquidation, to share pro rata in any distribution of CEL-SCI's assets after payment of liabilities. The board is not obligated to declare a dividend. It is not anticipated that dividends will be paid in the foreseeable future.

Holders of common stock do not have preemptive rights to subscribe to additional shares if issued by CEL-SCI. There are no conversion, redemption, sinking fund or similar provisions regarding the common stock. All of the outstanding shares of common stock are fully paid and non-assessable and all of the shares of common stock offered as a component of the Units will be, upon

Edgar Filing: CEL SCI CORP - Form 424B3

issuance, fully paid and non-assessable.

Series A Warrants

The Series A warrants allow the holder to purchase one share of CEL-SCI's common stock at a price of \$0.50 per share at any time on or after December 24, 2009 and on or prior to December 24, 2014.

The exercise price of the warrants, as well as the shares issuable upon the exercise of the warrants, will also be proportionately adjusted in the event of any stock splits.

In case CEL-SCI reorganizes its capital, reclassifies its capital stock, consolidates or merges with or into another corporation (where CEL-SCI is not the surviving corporation or where there is a change in or distribution with respect to CEL-SCI's common stock), or sells, transfers or otherwise disposes of all or substantially all its property, assets or business to another corporation and, pursuant to the terms of such reorganization, reclassification, merger, consolidation or disposition of assets, shares of common stock of the successor or acquiring corporation, or any cash, shares of stock or other securities or property of any nature whatsoever (including warrants or other subscription or purchase rights) in addition to or in lieu of common stock of the successor or

7

acquiring corporation, are to be received by or distributed to the holders of CEL-SCI's common stock, then the holders of the Series A warrants will have the right to receive, upon the exercise of the Series A warrants, the shares of common stock or other securities of the successor or acquiring corporation or of CEL-SCI, if it is the surviving corporation, as well as any other property receivable upon or as a result of such reorganization, reclassification, merger, consolidation or disposition of assets as if holders of the Series A warrants had exercised their warrants immediately prior to such event. The foregoing also applies in the event there is a tender offer for CEL-SCI's shares by either a third person or CEL-SCI.

In certain cases, the holders of the Series A warrants (in the event of a reclassification of CEL-SCI's common stock, or a consolidation, merger, sale of assets, tender offer, or similar transaction), will have the right to sell their Series A warrants to CEL-SCI, or any successor to CEL-SCI, at a price which is equal to the value of the warrants as determined by the Black Scholes Option Pricing Model.

ADDITIONAL INFORMATION

CEL-SCI is subject to the requirements of the Securities Exchange Act of 1934 and is required to file reports, proxy statements and other information with the Securities and Exchange Commission. Copies of any such reports, proxy statements and other information filed by CEL-SCI can be read and copied at the Commission's Public Reference Room at 100 F. Street, N.E., Washington, D.C. 20549. The public may obtain information on the operation of the Public Reference Room by calling the Commission at 1-800-SEC-0330. The Commission maintains an Internet site that contains reports, proxy and information statements, and other information regarding CEL-SCI. The address of that site is <http://www.sec.gov>.

CEL-SCI will provide, without charge, to each person to whom a copy of this prospectus is delivered, including any beneficial owner, upon the written or oral request of such person, a copy of any or all of the documents

Edgar Filing: CEL SCI CORP - Form 424B3

incorporated by reference below (other than exhibits to these documents, unless the exhibits are specifically incorporated by reference into this prospectus). Requests should be directed to:

CEL-SCI Corporation
8229 Boone Blvd., #802
Vienna, Virginia 22182
(703) 506-9460

The following documents filed with the Commission by CEL-SCI (Commission File No. 0-11503) are incorporated by reference into this prospectus:

- (1) Annual Report on Form 10-K for the fiscal year ended September 30, 2008.
- (2) Proxy Statement relating to its March 3, 2008 shareholders' meeting.
- (3) Report on Form 8-K filed on December 9, 2008.

8

- (4) Report on Form 10-Q for the three months ended December 31, 2008.
- (5) Report on Form 8-K filed on January 6, 2009.
- (6) Report on Form 8-K filed on March 12, 2009.
- (7) Report on Form 8-K filed on April 1, 2009.
- (8) Report on Form 10-Q for the three months ended March 31, 2009.

All documents filed with the Commission by CEL-SCI pursuant to Sections 13(a), 13(c), 14 or 15(d) of the Exchange Act subsequent to the date of this prospectus and prior to the termination of this offering shall be deemed to be incorporated by reference into this prospectus and to be a part of this prospectus from the date of the filing of such documents. Any statement contained in a document incorporated or deemed to be incorporated by reference shall be deemed to be modified or superseded for the purposes of this prospectus to the extent that a statement contained in this prospectus or in any subsequently filed document which also is or is deemed to be incorporated by reference in this prospectus modifies or supersedes such statement. Such statement so modified or superseded shall not be deemed, except as so modified or superseded, to constitute a part of this prospectus.

CEL-SCI has filed with the Securities and Exchange Commission a Registration Statement under the Securities Act of 1933, as amended, with respect to the securities offered by this prospectus. This prospectus does not contain all of the information set forth in the Registration Statement. For further information with respect to CEL-SCI and such securities, reference is made to the Registration Statement and to the exhibits filed with the Registration Statement. Statements contained in this prospectus as to the contents of any contract or other documents are summaries which are not necessarily complete, and in each instance reference is made to the copy of such contract or other document filed as an exhibit to the Registration Statement, each such statement being qualified in all respects by such reference. The Registration Statement and related exhibits may also be examined at the Commission's internet site.

No dealer salesman or other person has been authorized to give any information or to make any representations, other than those contained in this

Edgar Filing: CEL SCI CORP - Form 424B3

prospectus. Any information or representation not contained in this prospectus must not be relied upon as having been authorized by CEL-SCI. This prospectus does not constitute an offer to sell, or a solicitation of an offer to buy, the securities offered hereby in any state or other jurisdiction to any person to whom it is unlawful to make such offer or solicitation. Neither the delivery of this prospectus nor any sale made hereunder shall, under any circumstances, create an implication that there has been no change in the affairs of CEL-SCI since the date of this prospectus.
