SERONO AND AMGEN CLOSE AGREEMENT FOR U.S.  
COMMERCIALIZATION OF NOVANTRONE

THOUSAND OAKS, CALIFORNIA, USA AND GENEVA, SWITZERLAND - DECEMBER 18, 2002

Amgen Inc. (NASDAQ:AMGN) and Serono S.A. (virt-x: SEO and NYSE: SRA) announced today that they have completed their license and commercialization agreement by which Serono will sell the marketed multiple sclerosis (MS) and chemotherapy drug Novantrone(R) (mitoxantrone for injection concentrate) in the United States.

The closing of this deal was completed after the U.S. Federal Trade Commission granted early termination of the waiting period required by the Hart-Scott-Rodino Act.

Novantrone is approved by the U.S. Food and Drug Administration (FDA) in the United States for secondary (chronic) progressive, progressive relapsing and worsening relapsing-remitting MS, as well as for certain forms of cancer. It is a topoisomerase II inhibitor which acts by inhibiting DNA replication in dividing cells.

Novantrone was acquired by Amgen in connection with Amgen's acquisition of Immunex Corporation in July, 2002. The drug was approved by the FDA for MS indications in October, 2000, and has also been approved for certain oncology indications since 1987.

Full prescribing information for Novantrone can be obtained by visiting [www.novantrone.com](http://www.novantrone.com).

Amgen is a global biotechnology company that discovers, develops, manufactures and markets important human therapeutics based on advances in cellular and molecular biology. Serono is a global biotechnology leader with six recombinant products on the market, Gonal-F(R), Luveris(R), Ovidrel(R)/Ovitrelle(R), Rebif(R), Serostim(R) and Saizen(R). (Luveris(R) is not approved in the USA).

-more-

This news release contains forward-looking statements that involve significant risks and uncertainties, including those discussed below and more fully described in the Securities and Exchange Commission reports filed by Amgen, including its most recent Form 10-Q. Amgen conducts research in the biotechnology/pharmaceutical field where movement from concept to product is uncertain; consequently, there can be no guarantee that any particular product candidate will be successful and become a commercial product. Furthermore, Amgen's research, testing, pricing, marketing and other operations are subject to extensive regulation by domestic and foreign government regulatory authorities. In addition, sales of Amgen's products are affected by reimbursement policies imposed by third party payors, including governments, private insurance plans and managed care providers. These government regulations and reimbursement policies may affect the development, usage and pricing of Amgen's products. In addition, while Amgen routinely obtains patents for its products and technology, the protection offered by Amgen's patents and patent applications may be challenged, invalidated or circumvented by its competitors. Because forward-looking statements involve risks and uncertainties, actual

results may differ materially from current results expected by Amgen. Amgen is providing this information as of December 18, 2002 and expressly disclaims any duty to update information contained in this press release.

Some of the statements in this press release are forward looking. Such statements are inherently subject to known and unknown risks, uncertainties and other factors that may cause actual results, performance or achievements of Serono S.A. and affiliates to be materially different from those expected or anticipated in the forward-looking statements. Forward-looking statements are based on Serono's current expectations and assumptions, which may be affected by a number of factors, including those discussed in this press release and more fully described in Serono's Annual Report on Form 20-F filed with the U.S. Securities and Exchange Commission on May 21 2002. These factors include any failure or delay in Serono's ability to develop new products, any failure to receive anticipated regulatory approvals, any problems in commercializing current products as a result of competition or other factors, our ability to obtain reimbursement coverage for our products, and government regulations limiting our ability to sell our products. Serono has no responsibility to update the forward-looking statements contained in this press release to reflect events or circumstances occurring after the date of this press release.
