Edgar Filing: ALL AMERICAN SEMICONDUCTOR INC - Form 10-Q

ALL AMERICAN SEMICONDUCTOR, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS (UNAUDITED)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

BASIS OF PRESENTATION

In the opinion of management, the accompanying unaudited Consolidated Condensed Financial Statements include all adjustments (consisting of normal recurring accruals or adjustments only) necessary to present fairly the financial position at March 31, 2001, and the results of operations and the cash flows for all periods presented. The results of operations for the interim periods are not necessarily indicative of the results to be obtained for the entire year.

For a summary of significant accounting policies (which have not changed from December 31, 2000) and additional financial information, see the Company's Annual Report on Form 10-K for the year ended December 31, 2000, including the consolidated financial statements and notes thereto which should be read in conjunction with these financial statements.

The accompanying unaudited interim financial statements have been prepared in accordance with instructions to Form 10-Q and, therefore, do not include all information and footnotes required to be in conformity with generally accepted accounting principles.

EARNINGS PER SHARE

The following average shares were used for the computation of basic and diluted earnings per share:

| QUARTERS ENDED MARCH 31 | 2001 | 2000 |
|-------------------------|-----------|-----------|
| Basic | 3,856,539 | 3,801,969 |
| Diluted..... | 4,051,693 | 3,995,056 |

2. LONG-TERM DEBT

The Company's agreement with its consortium of banks, providing for a \$150 million line of credit facility based on eligible accounts receivable and inventories as defined in the agreement (the "borrowing base"), was amended in May 2001, but effective prior to the balance sheet date. The amendments to the credit facility provided, among other things, for modifications of the borrowing base and certain financial covenants. Outstanding borrowings at March 31, 2001 under the Company's \$150 million line of credit facility aggregated \$122,332,000. Borrowings under this facility are collateralized by substantially all of the Company's assets.

3. OPTIONS

During the quarter ended March 31, 2001, no stock options were granted by the Company pursuant to its stock option plans. During the quarter ended March 31, 2001, a total of 530 stock options were exercised at exercise prices ranging from \$3.27 to \$4.49 per share and a total of 2,000 stock options were canceled at exercise prices ranging from \$3.27 to \$13.02 per share.

Edgar Filing: ALL AMERICAN SEMICONDUCTOR INC - Form 10-Q

ALL AMERICAN SEMICONDUCTOR, INC. AND SUBSIDIARIES

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

All American Semiconductor, Inc. and its subsidiaries (the "Company") is a national distributor of electronic components manufactured by others. The Company distributes a full range of semiconductors (active components), including transistors, diodes, memory devices, microprocessors, microcontrollers and other integrated circuits, as well as passive components, such as capacitors, resistors, inductors and electromechanical products, including cable, switches, connectors, filters and sockets. These products are sold primarily to original equipment manufacturers in a diverse and growing range of industries, including manufacturers of computers and computer-related products; home office and portable equipment; networking, satellite, wireless and other communications products; Internet infrastructure equipment and appliances; automobiles; consumer goods; robotics and industrial equipment; defense and aerospace equipment; and medical instrumentation. The Company also sells products to contract electronics manufacturers, or electronics manufacturing services, or EMS, providers who manufacture products for companies in all electronics industry segments. Through the Aved Memory Products and Aved Display Technologies divisions of its subsidiary, Aved Industries, Inc., the Company also designs and has manufactured under the label of its subsidiary's divisions, certain board level products including memory modules and flat panel display driver boards, both of which are sold to original equipment manufacturers.

RESULTS OF OPERATIONS

Net sales for the first quarter of 2001 were \$130.0 million, an increase of 21.2% from net sales of \$107.3 million for the same period of 2000. Our net sales increased as a result of growth in the overall market as well as the benefits of the strategies that we have been implementing over the past several years. This increase also reflects increased market share in most territories and the contribution of a new sales office which was opened during the second quarter of 2000. While we were able to increase our sales during the first quarter of 2001 over last year's first quarter, a broad-based industry slowdown, excess inventory at our customer base and overall economic weakness is expected to have an adverse impact on our net sales during 2001.

Gross profit increased to \$25.8 million for the first quarter of 2001 up over 20% from \$21.4 million for the 2000 period. This increase was attributable to the increase in net sales. Gross profit margins as a percentage of net sales were 19.8% for the first three months of 2001 compared to 20.0% for the same period of 2000. The slight decline in gross profit margins reflects greater availability of product and a general industry slowdown. In addition, we continue to develop long-term strategic relationships with accounts that have required aggressive pricing programs and we expect in future quarters a greater number of low margin, large volume transactions. Management therefore expects downward pressure on gross profit margins in the future.

Selling, general and administrative expenses ("SG&A") was \$21.8 million for the first quarter of 2001 compared to \$17.7 million for the first quarter of 2000. The increase was partially attributable to an increase in variable expenses associated with the increases in sales and gross profit. Furthermore, in an effort to drive expansion and internal growth, and in anticipation of the growth in sales we achieved during 2000 continuing through 2001, during the second half of 2000 we increased and enhanced our management team, expanded our sales force

Edgar Filing: ALL AMERICAN SEMICONDUCTOR INC - Form 10-Q

and increased our staff in almost every department. We also increased our infrastructure to support the changing needs and additional requirements of our customers. SG&A as a percentage of net sales increased slightly to 16.8% for the quarter ended March 31, 2001, from 16.5% for the same period of 2000. In response to the current industry slowdown, we began implementing certain expense reduction programs, including workforce reductions, during the second quarter of 2001.

5

ALL AMERICAN SEMICONDUCTOR, INC. AND SUBSIDIARIES

Income from operations was \$3.9 million for the first quarter of 2001, compared to \$3.8 million for the first quarter of 2000. The increase in income from operations was due to the increase in net sales which more than offset the increase in SG&A.

Interest expense was \$2.8 million for the first quarter of 2001 compared to \$1.7 million for the same period of 2000. The increase in interest expense resulted from an increase in average borrowings caused by increases in our infrastructure to support our sales growth, increases in accounts receivable levels as well as increases in our inventory. Inventory increased for two reasons. First, as a result of our success in 2000, we were able to attract many new suppliers which required significant investments in initial stocking packages. Second, we expanded our inventory in order to support the growth in sales that we achieved during 2000. The resulting increase in average borrowings was partially offset by a decrease in interest rates.

Net income was \$671,000 or \$.17 per share (diluted) for the quarter ended March 31, 2001, compared to \$1.2 million or \$.30 per share (diluted) for the same period of 2000. The decrease in net income reflects the increases in interest expense and SG&A which offset the increase in gross profit.

LIQUIDITY AND CAPITAL RESOURCES

Working capital at March 31, 2001 increased to \$162.4 million from working capital of \$159.6 million at December 31, 2000. The current ratio was 3.17:1 at March 31, 2001 compared to 2.93:1 at December 31, 2000. The increases in working capital and the current ratio were primarily due to a decrease in accounts payable and an increase in inventory. These changes more than offset the decrease in accounts receivable. Accounts receivable levels at March 31, 2001 were \$84.1 million, compared to accounts receivable of \$91.8 million at December 31, 2000. The decrease in accounts receivable reflects a reduction in the level of sales achieved during the first quarter of 2001 compared to the latter part of 2000. The decrease in sales levels more than offset the negative impact on receivables associated with the general economic weakness. Inventory levels were \$148.7 million at March 31, 2001, up from \$146.4 million at December 31, 2000. The slight increase in inventory reflects additional inventory relating to new suppliers added during 2000 as well as an adverse impact on sales associated with inventory corrections at our customer base and a general industry slowdown which began during the latter part of 2000. Accounts payable and accrued expenses decreased to \$73.3 million at March 31, 2001 compared to \$81.2 million at December 31, 2000 as a result of reduced purchases during the first quarter of 2001.

The Company's agreement with its consortium of banks, providing for a \$150 million line of credit facility based on eligible accounts receivable and inventories as defined in the agreement (the "borrowing base"), was amended in

Edgar Filing: ALL AMERICAN SEMICONDUCTOR INC - Form 10-Q

May 2001, but effective prior to the balance sheet date. The amendments to the credit facility provided, among other things, for modifications of the borrowing base and certain financial covenants. Outstanding borrowings at March 31, 2001 under the Company's \$150 million line of credit facility aggregated \$122.3 million. Borrowings under this facility are collateralized by substantially all of the Company's assets.

Although the Company currently expects that its cash flows from operations and additional borrowings available under its credit facility will be sufficient to meet the Company's current financial requirements over the next twelve months, as a result of the factors discussed in "Results of Operations" above (including the broad-based industry slowdown and overall economic weakness), as well as to position itself for future growth, the Company has commenced to explore possible debt and or equity financing arrangements. There can be no assurance that additional financing, if or to the extent required, will be available on terms acceptable to the Company, if at all. The terms of any such financing or its

6

ALL AMERICAN SEMICONDUCTOR, INC. AND SUBSIDIARIES

unavailability could have a material adverse effect on the Company's business, financial condition and results of operations.

FORWARD-LOOKING STATEMENTS; BUSINESS RISKS

This Form 10-Q contains forward-looking statements (within the meaning of Section 21E. of the Securities Exchange Act of 1934, as amended), representing the Company's current expectations and beliefs relating to the Company's future performance and operating results, its bookings, products, services, markets and industry, and/or future events relating to or effecting the Company and its business and operations. If and when used in this Form 10-Q, the words "believes," "estimates," "plans," "expects," "attempts," "intends," "anticipates," "could," "may," "explore" and similar expressions as they relate to the Company or its management are intended to identify forward-looking statements. The actual performance, results or achievements of the Company could differ materially from those indicated by the forward-looking statements because of various risks and uncertainties. Factors that could adversely affect the Company's future results, performance or achievements include, without limitation, the continuance of or increase in (i) the broad-based industry slowdown resulting in the decline or increasing decline (as the case may be) in demand for electronic components and further excess customer inventory and (ii) the overall economic weakness, the effectiveness of the Company's business and marketing strategies, the Company's development of new customers, existing customer demand as well as the level of demand for products of its customers, the maintenance of existing relationships with suppliers, price erosion in and price competition for products sold by the Company, management and control of expenses, the failure to achieve the expected impact from expense reduction programs, the ability of the Company to generate revenue commensurate with the level of personnel and size of its infrastructure, an increase in the allowance for doubtful accounts receivable and in bad debts as a result of the weakening financial condition of certain of the Company's customers, price decreases on inventory that is not price protected, gross profit margins, including decreasing margins resulting from the Company being required to have aggressive pricing programs, an increasing number of low-margin, large volume transactions and increased availability of the supply for certain products, increased competition from third party logistics companies, e-brokers and other Internet providers through the use of the Internet as well as from its traditional

Edgar Filing: ALL AMERICAN SEMICONDUCTOR INC - Form 10-Q

competitors, insufficient funds from operations, from the Company's credit facility and from other sources (debt and/or equity) to support the Company's operations, the continued enhancement of telecommunication, computer and information systems, the ability of the Company to open new sales offices in a timely and cost-effective manner and to expand its product offerings and continue to enhance its service capabilities and the timing and cost thereof, continued general technology growth, the failure to achieve acceptance or grow at the expected level of some of the new technologies being supported by the Company, the impact on certain of the Company's suppliers and customers of economic or financial turbulence in off-shore economies and/or financial markets, change in government tariffs or duties, currency fluctuations, a change in interest rates, and the other risks and factors detailed in this Form 10-Q and in the Company's Form 10-K for the fiscal year ended December 31, 2000 and other filings with the Securities and Exchange Commission and in its press releases. These risks and uncertainties are beyond the ability of the Company to control. In many cases, the Company cannot predict the risks and uncertainties that could cause actual results to differ materially from those indicated by the forward-looking statements.

QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Company's credit facility bears interest based on interest rates tied to the prime or LIBOR rate, either of which may fluctuate over time based on economic conditions. As a result, the Company is subject to market risk for changes in interest rates and could be subjected to increased or decreased interest payments if market interest rates fluctuate. If market interest rates increase, the impact may have a material adverse effect on the Company's financial results.
