- Written communications pursuant to Rule 425 under the Securities Act (17 CFR 230.425)
- Soliciting material pursuant to Rule 14a-12 under the Exchange Act (17 CFR 240.14a-12)
- Pre-commencement communications pursuant to Rule 14d-2(b) under the Exchange Act (17 CFR 240.14d-2(b))
- Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

Item 8.01 Other Events.

OGE Energy Corp. (the “Company”) is the parent company of Oklahoma Gas and Electric Company, a regulated electric utility with approximately 782,000 customers in Oklahoma and western Arkansas, and Enogex LLC and its subsidiaries (“Enogex”), a midstream natural gas pipeline business with principal operations in Oklahoma.

On December 8, 2010, there was a fire at Enogex’s Cox City natural gas processing plant. Currently recovery is underway, including the partial resumption of production at the plant. There were no injuries to personnel and there was no damage to the gas gathering system, but components of the largest of the Cox City plant’s four processing trains sustained significant damage in the fire. One processing train (30 million cubic feet per day (“MMcf/d”)) resumed production on December 10, 2010 and two other processing trains are expected to be back online within three to four weeks each at 15 MMcf/d. Enogex is in the process of assessing the incident to determine the full extent of the damage, the cause of the fire and the full business impact.

Normally rated at 180 MMcf/d, the Cox City plant has lost Unit 4 (120 MMcf/d) with the damage caused by the fire. Almost all of the impacted gathered volumes are now back online. The current estimate is mid-2011 before a return to full pre-fire processing capacity. The capital expenditures to replace the damaged processing train and related equipment are estimated to be \$10 million, net of proceeds under its replacement cost insurance coverage. In addition, the financial impact of the loss of processing capacity at the Cox City plant is estimated to be \$2 million per month of pre-tax gross margin until the plant returns to full capacity. The Company also currently estimates the write-down of the net book value of the damaged assets to be \$5 million on a pre-tax basis.

Despite the estimated \$5 million charge and slight reduction in December earnings from the reduced processing capacity, the Company’s ongoing earnings guidance remains unchanged and is between approximately \$292 million and \$302 million of net income, or \$2.95 to \$3.05 per average diluted share. The 2010 Enogex ongoing earnings guidance is also unchanged between approximately \$84 million and \$94 million of net income, or \$0.85 to \$0.95 per average diluted share. In addition, the Company’s previously disclosed ongoing growth rate of 5 percent to 7 percent is also unchanged.

Ongoing Earnings and Ongoing Earnings per Average Diluted Share (“EPS”), which exclude the one-time non-cash charge of \$11.4 million, or \$0.11 per average diluted share, associated with the elimination of the tax deduction for the Medicare Part D subsidy as a result of the health care law enacted in March 2010, are non-GAAP financial measures. OGE Energy’s management believes ongoing earnings and ongoing EPS provide a more meaningful comparison of earnings results and are more representative of OGE Energy’s fundamental earnings power. OGE Energy’s management uses ongoing earnings and ongoing EPS internally for financial planning and analysis, for reporting of results to the Board of Directors and when communicating its earnings outlook to analysts and investors. Reconciliations of ongoing earnings and ongoing EPS are shown below.

The Company undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

SIGNATURE

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
