Item 2.05 Costs Associated with Exit or Disposal Activities

On June 10, 2013, we announced we will discontinue operating our Energy Services segment through an accelerated wind down process, releasing non-affiliated, third-party natural gas transportation and storage contracts to interested parties. Our board of directors authorized this action on May 22, 2013.

Our energy services segment continues to face challenging industry conditions that show no signs of improving. Increased natural gas supply and infrastructure, coupled with lower natural gas price volatility, have narrowed seasonal and location natural gas price differentials, resulting in limited opportunities to generate revenues to cover our fixed costs on this contracted storage and transportation capacity.

As a result, we expect to incur a non-cash, after-tax write down of approximately \$75 million in the second quarter 2013 and additional non-cash, after-tax write downs of up to \$25 million between July 1, 2013, and April 1, 2014, with most occurring in 2013, subject to the release or assignment of the remaining natural gas transportation and storage contracts.

The wind down is expected to be substantially completed by April 2014; however, cash payments are expected to continue on certain natural gas transportation, storage and other contracts with terms expiring after April 2014. We expect future cash expenditures from the write downs to total approximately \$100 million on an after-tax basis with approximately \$15 million paid in 2013, \$35 million in 2014, \$25 million in 2015 and \$25 million over the period 2016 through 2023.

The energy services segment currently employs 49 people, substantially all of them in Tulsa. The affected employees were notified on June 10, 2013, that the company anticipates offering affected employees positions in other parts of the company and that those employees not offered positions will be entitled to receive severance benefits. We do not expect the total charge attributable to any severance benefits will be material.
