ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the Fiscal Year Ended June 30, 2014

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the Transition Period From _____ to _____
Commission File Number 001-13357

Royal Gold, Inc.

(Exact Name of Registrant as Specified in Its Charter)

Delaware
(State or Other Jurisdiction
of Incorporation or Organization)

84-0835164
(I.R.S. Employer
Identification No.)

1660 Wynkoop Street, Suite 1000
Denver, Colorado
(Address of Principal Executive Offices)

80202
(Zip Code)

(303) 573-1660

Registrant's telephone number, including area code:

Securities registered pursuant to Section 12(b) of the Act:

Title of Each Class
Common stock, \$0.01 par value

Name of Each Exchange on Which Registered
NASDAQ Global Select Market

Securities registered pursuant to Section 12(g) of the Act: **None**

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Edgar Filing: ROYAL GOLD INC - Form 10-K

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Exchange Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15 (d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definition of "accelerated filer", "large accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

(Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting company

(Do not check if a
smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Aggregate market value of the voting common stock held by non-affiliates of the registrant, based upon the closing sale price of Royal Gold common stock on December 31, 2013, as reported on the NASDAQ Global Select Market was \$2,891,571,031. There were 64,754,869 shares of the Company's common stock, par value \$0.01 per share, outstanding as of July 28, 2014. In addition, as of such date, there were 380,482 exchangeable shares of RG Exchangeco Inc., a subsidiary of registrant, outstanding which are exchangeable at any time into shares of the Company's common stock on a one-for-one basis and entitle their holders to dividends and other rights economically equivalent to those of the Company's common stock.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the Proxy Statement for the 2014 Annual Meeting of Stockholders scheduled to be held on November 14, 2014, and to be filed within 120 days after June 30, 2014, are incorporated by reference into Part III, Items 10, 11, 12, 13 and 14 of this Annual Report on Form 10-K.

Table of Contents

This document (including information incorporated herein by reference) contains "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934, which involve a degree of risk and uncertainty due to various factors affecting Royal Gold, Inc. and its subsidiaries. For a discussion of some of these factors, see the discussion in Item 1A, Risk Factors, of this report. In addition, please see our note about forward-looking statements included in Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A"), of this report.

PART I

ITEM 1. BUSINESS

Overview

Royal Gold, Inc. ("Royal Gold", the "Company", "we", "us", or "our"), together with its subsidiaries, is engaged in the business of acquiring and managing precious metals royalties, metal streams, and similar interests. Royalties are non-operating interests in mining projects that provide the right to revenue or metals produced from the project after deducting specified costs, if any. A metal stream is a purchase agreement that provides, in exchange for an upfront deposit payment, the right to purchase all or a portion of one or more metals produced from a mine, at a price determined for the life of the transaction by the purchase agreement. We may use the term "royalty interest" in this Annual Report on Form 10-K to refer to royalties, gold, silver or other metal stream interests, and other similar interests. We seek to acquire existing royalty interests or to finance projects that are in production or in the development stage in exchange for royalty interests. In the ordinary course of business, we engage in a continual review of opportunities to acquire existing royalty interests, to create new royalty interests through the financing of mine development or exploration, or to acquire companies that hold royalty interests. We currently, and generally at any time, have acquisition opportunities in various stages of active review, including, for example, our engagement of consultants and advisors to analyze particular opportunities, analysis of technical, financial and other confidential information, submission of indications of interest, participation in preliminary discussions and negotiations and involvement as a bidder in competitive processes.

As of June 30, 2014, the Company owned royalty interests on 37 producing properties, 23 development stage properties and 141 exploration stage properties, of which the Company considers 46 to be evaluation stage projects. The Company uses "evaluation stage" to describe exploration stage properties that contain mineralized material and on which operators are engaged in the search for reserves. We do not conduct mining operations nor are we required to contribute to capital costs, exploration costs, environmental costs or other mining, processing and operating costs on the properties in which we hold royalty interests. During the fiscal year ended June 30, 2014, we focused on the management of our existing royalty and streaming interests and the acquisition of royalty and streaming interests.

As discussed in further detail throughout this report, some significant developments to our business during fiscal year 2014 were as follows:

- (1) Production at Mt. Milligan began during the fourth quarter of calendar 2013, with commercial production reached during the first quarter of calendar 2014;
- (2) We acquired a gold stream on the Phoenix Gold Project in Ontario, Canada;
- (3) We acquired a 70% interest in a 2.0% net smelter return royalty ("NSR") on certain portions of the El Morro copper project in Chile;

Table of Contents

- (4) We increased our interest in a net value royalty covering certain portions of the Pipeline mining complex, and we acquired a royalty interest at the Goldrush deposit, both interests in Nevada, USA;
- (5) We expanded and extended our revolving credit facility from a \$350 million facility maturing in May 2017 to a \$450 million facility maturing in January 2019; and
- (6) We increased our calendar year dividend to \$0.84 per basic share, which is paid in quarterly installments throughout calendar year 2014. This represents a 5% increase compared with the dividend paid during calendar year 2013.

Certain Definitions

Gross Proceeds Royalty (GPR): A royalty in which payments are made on contained ounces rather than recovered ounces.

Gross Smelter Return (GSR) Royalty: A defined percentage of the gross revenue from a resource extraction operation, less, if applicable, certain contract-defined costs paid by or charged to the operator.

g/t: A unit representing grams per tonne.

Gold or Silver Stream: A gold or silver purchase agreement that provides, in exchange for an upfront deposit payment, the right to purchase all or a portion of gold or silver, as applicable, produced from a mine, at a price determined for the life of the transaction by the purchase agreement.

Mineralized Material: Mineralized material is mineralization that has been sufficiently sampled at close enough intervals to reasonably assume continuity and support an estimate of tonnage and an average grade of the selected metals or salable product. A deposit of this sort does not qualify as a reserve until a comprehensive evaluation, based upon unit costs, grade, recoveries and other factors, concludes economic and legal feasibility. Investors are cautioned not to assume that any part or all of the mineral deposits in these categories will ever be converted into reserves.

Net Profits Interest (NPI): A defined percentage of the gross revenue from a resource extraction operation, after recovery of certain contract-defined pre-production costs, and after deduction of certain contract-defined mining, milling, processing, transportation, administrative, marketing and other costs.

Net Smelter Return (NSR) Royalty: A defined percentage of the gross revenue from a resource extraction operation, less a proportionate share of incidental transportation, insurance, refining and smelting costs.

Net Value Royalty (NVR): A defined percentage of the gross revenue from a resource extraction operation, less certain contract-defined costs.

Proven (Measured) Reserves: Ore reserves for which (a) the quantity is computed from dimensions revealed in outcrops, trenches, workings or drill holes, and grade is computed from the results of detailed sampling, and (b) the sites for inspection, sampling and measurement are spaced so closely and the geologic character is so well defined that the size, shape, depth and mineral content of reserves are well established.

Probable (Indicated) Reserves: Ore reserves for which quantity and grade are computed from information similar to that used for proven (measured) reserves, but the sites for inspection, sampling and measurement are farther apart or are otherwise less adequately spaced. The degree of assurance, although lower than that for proven (measured) reserves, is high enough to assume geological continuity between points of observation.

Table of Contents

Payable Metal: Ounces or pounds of metal in concentrate after deduction of a percentage of metal in concentrate by a third-party smelter pursuant to smelting contracts.

Reserve: That part of a mineral deposit that can be economically and legally extracted or produced at the time of the reserve determination.

Royalty: The right to receive a percentage or other denomination of mineral production from a resource extraction operation.

Ton: A unit of weight equal to 2,000 pounds or 907.2 kilograms.

Tonne: A unit of weight equal to 2,204.6 pounds or 1,000 kilograms.

Recent Business Development

Tulsequah Chief Gold and Silver Stream Amendment

On July 4, 2014, the Company, through its wholly-owned subsidiary RGLD Gold AG ("RGLD Gold") entered into an Amended and Restated Gold and Silver Purchase and Sale Agreement (the "Amended Purchase Agreement") with Chieftain Metals Inc. ("Chieftain") whereby the parties amended and restated the terms of their December 22, 2011 Purchase and Sale Agreement in relation to Chieftain's Tulsequah Chief mining project in British Columbia, Canada. Among other things, the parties agreed to: (i) reduce the aggregate payment advances to Chieftain from \$60 million to \$55 million (of which \$10 million was paid in December 2011, with the remainder payable upon satisfaction of certain conditions set forth in the Amended Purchase Agreement); (ii) increase the gold stream percentage from 12.50% to 17.50% of payable gold until 65,000 ounces have been delivered to RGLD Gold, and 8.75% of payable gold thereafter, up from 7.50%; (iii) increase the silver stream percentage from 22.50% to 25% of payable silver until 3.0 million ounces have been delivered, and 12.50% of payable silver thereafter, up from 9.75%; (iv) revise the cash payments for each ounce of gold and silver delivered to a constant 30% and 25%, respectively, of the spot prices of gold and silver on the date of each delivery, instead of payments of \$450 to \$500 for each payable ounce of gold and \$5.00 to \$7.50 for each payable ounce of silver (or the prevailing market prices, if lower); and (v) increase the area subject to the gold and silver streams to include Chieftain's Big Bull property. RGLD Gold retains the right to terminate the Amended Purchase Agreement and receive repayment of its initial \$10 million payment advance if certain conditions set forth in the Amended Purchase Agreement are not satisfied before December 22, 2014.

Fiscal 2014 Business Developments

Please refer to Item 7, MD&A, for discussion on recent liquidity and capital resource developments.

Phoenix Gold Project Stream Acquisition

On February 11, 2014, the Company, through its wholly-owned subsidiary RGLD Gold, entered into a \$75 million Purchase and Sale Agreement (the "Agreement") for a gold stream transaction with Rubicon Minerals Corporation ("Rubicon"). Pursuant to the Agreement, the \$75 million payment deposit from RGLD Gold is to be used by Rubicon to help pay a significant portion of the construction costs of the Phoenix Gold Project located in Ontario, Canada, which is currently in the development stage.

Pursuant to the Agreement, the \$75 million payment deposit to Rubicon as prepayment of the purchase price for refined gold is payable in five installments. The first installment of \$10 million was made in conjunction with execution of definitive documents on February 11, 2014. The second

Table of Contents

installment of \$20 million was paid on March 20, 2014, while the third, fourth and fifth installments of \$15 million each are payable upon satisfaction of certain conditions precedent.

Upon commencement of production at the Phoenix Gold Project, RGLD Gold will purchase and Rubicon will sell 6.30% of any gold produced from the Phoenix Gold Project until 135,000 ounces have been delivered, and 3.15% thereafter. For each delivery of gold, RGLD Gold will pay a purchase price per ounce of 25% of the spot price of gold at the time of delivery. In the event that RGLD Gold's interests are subordinated to more than \$50 million of senior debt, RGLD Gold's per ounce purchase price will be reduced by 5.4% times the amount of the senior debt outstanding and drawn in excess of \$50 million, divided by \$50 million.

The Phoenix Gold Project is located in Red Lake, Ontario, Canada. The Red Lake greenstone belt is host to one of Canada's preeminent gold producing districts, the Red Lake District, which also hosts the Red Lake and Cochenour mines. The deposit extends 5,400 feet below surface, and remains open at depth and along strike. The Phoenix Gold Project is fully permitted for initial production at 1,250 tonnes per day. Construction has substantially advanced on the Phoenix Gold Project, with project construction and development remaining on budget and on schedule for projected production in mid-calendar 2015.

Goldrush Royalty Acquisition

On January 7, 2014, Royal Gold, acquired a 1.0% net revenue royalty on the southern end of Barrick Gold Corporation's ("Barrick") Goldrush deposit in Nevada from a private landowner for total consideration of \$8.0 million, of which \$1.0 million was paid at closing and the remaining \$7.0 million will be paid in seven annual installments. Goldrush is located approximately four miles from the Cortez mine and is currently in the exploration stage. As of December 31, 2013, Barrick reported 75.5 million tons of mineralized material with an average grade of 0.132 ounces of gold per ton. Investors are cautioned not to assume that any part or all of the mineralized material will ever be converted into reserves.

Barrick indicated that as the Goldrush project advances through prefeasibility, a number of development options are being considered, including open pit mining, underground mining, or a combination of both. Drilling currently is focused on establishing confidence in the continuity of high grade portions of the deposit in support of the underground development option.

NVR1 Royalty at Cortez

On January 2, 2014, Royal Gold, through a wholly-owned subsidiary, increased its ownership interest in the limited partnership that owns the 1.25% net value royalty ("NVR1") covering certain portions of the Pipeline Complex at Barrick's Cortez gold mine in Nevada. As a result of the transaction, the NVR1 royalty rate attributable to our interest increased from 0.39% to 1.014% on production from all of the lands covered by the NVR1 royalty excluding production from the mining claims comprising the Crossroad deposit (the "Crossroad Claims"), and from zero to 0.618% on production from the Crossroad Claims. Total consideration for the transaction was approximately \$11.5 million. Refer to Note 17 of the notes to the consolidated financial statements for a discussion of certain related party interests in this transaction.

El Morro Royalty Acquisition

In August 2013, Royal Gold, through a wholly-owned Chilean subsidiary, acquired a 70% interest in a 2.0% NSR royalty on certain portions of the El Morro copper gold project in Chile ("El Morro"), from Xstrata Copper Chile S.A., for \$35 million. Goldcorp Inc. ("Goldcorp") holds 70% ownership of the El Morro project and is the operator, with the remaining 30% held by New Gold Inc.

Table of Contents

Goldcorp has indicated that all El Morro project field construction activities have been suspended since April 27, 2012, pending the definition and implementation by the Chilean environmental permitting authority (the Servicio de Evaluación Ambiental or SEA) of a community consultation process which corrects certain deficiencies in that process as specifically identified by the Antofagasta Court of Appeals. The project continues with community engagement, optimization of project economics and evaluation of alternatives for a long-term power supply.

During the period of temporary suspension, El Morro worked with the Chilean authorities and local communities to address any perceived deficiencies in respect of the environmental permit. El Morro subsequently filed an addendum to its environmental permit and it was reinstated on October 22, 2013. Certain local communities and groups filed constitutional actions challenging the reinstated permit, and on November 22, 2013, the Copiapo Court of Appeals granted an injunction suspending development of the El Morro project. On April 28, 2014, the Copiapo Court of Appeals rejected the constitutional actions and consequently the injunction was lifted.

Our Operational Information*Operating Segments, Geographical and Financial Information*

The Company manages its business under a single operating segment, consisting of the acquisition and management of royalty interests. Our revenue and long-lived assets (royalty and stream interests, net) are geographically distributed as shown in the following table.

	Revenue Fiscal Year Ended June 30,			Royalty and Stream Interests, net Fiscal Year Ended June 30,		
	2014	2013	2012	2014	2013	2012
Canada	34%	24%	24%	53%	52%	43%
Chile	21%	29%	25%	31%	30%	35%
Mexico	18%	19%	20%	7%	7%	9%
United States	15%	17%	18%	3%	4%	5%
Australia	4%	4%	5%	3%	3%	3%
Africa	3%	3%	4%	1%	1%	1%
Other	5%	4%	4%	2%	3%	4%

Please see "*Operations in foreign jurisdictions are subject to many risks, which could decrease our revenues,*" under Part I, Item 1A, Risk Factors, of this report for a description of the risks attendant to foreign operations.

Our financial results are primarily tied to the price of gold and, to a lesser extent, the price of silver, copper and nickel, together with the amounts of production from our producing stage royalty interests. The prices of gold, silver, copper, nickel and other metals have fluctuated widely in recent years. The marketability and the price of metals are influenced by numerous factors beyond the control of the Company and declines in the price of gold, silver, copper or nickel could have a material and adverse effect on the Company's results of operations and financial condition. During the fiscal year ended June 30, 2014, we derived approximately 78% of our revenue from precious metals (including 72% from gold and 6% from silver), 8% from copper and 8% from nickel.

Competition

The mining industry in general and the royalty and streaming segment in particular are competitive. We compete with other royalty and streaming companies, mine operators, and financial buyers in efforts to acquire existing royalty interests, and with the lenders, investors, and royalty and

Table of Contents

streaming companies providing financing to operators of mineral properties in our efforts to create new royalty interests. Many of our competitors in the lending and mining business are larger than we are and have greater resources and access to capital than we have. Key competitive factors in the royalty and stream acquisition and financing business include the ability to identify and evaluate potential opportunities, transaction structure and consideration, and access to capital.

Regulation

Like all mining operations, the operators of the mines that are subject to our royalty interests must comply with environmental laws and regulations promulgated by federal, state and local governments including, but not limited to, the National Environmental Policy Act; the Comprehensive Environmental Response, Compensation and Liability Act; the Clean Air Act; the Clean Water Act; the Hazardous Materials Transportation Act; and the Toxic Substances Control Act. Mines located on public lands in the United States are subject to the General Mining Law of 1872 (the "General Mining Law") and are subject to comprehensive regulation by either the United States Bureau of Land Management (an agency of the United States Department of the Interior) or the United States Forest Service (an agency of the United States Department of Agriculture). The mines also are subject to regulations of the United States Environmental Protection Agency ("EPA"), the United States Mine Safety and Health Administration and similar state and local agencies. Operators of mines that are subject to our royalty interests in other countries are obligated to comply with similar laws and regulations in those jurisdictions. Although we are not responsible as a royalty interest owner for ensuring compliance with these laws and regulations, failure by the operators of the mines on which we have royalty interests to comply with applicable laws, regulations and permits can result in injunctive action, damages and civil and criminal penalties on the operators which could reduce or eliminate production from the mines and thereby reduce or eliminate the royalties we receive and negatively affect our financial condition.

Corporate Information

We were incorporated under the laws of the State of Delaware on January 5, 1981. Our executive offices are located at 1660 Wynkoop Street, Suite 1000, Denver, Colorado 80202; our telephone number is (303) 573-1660.

Available Information

Royal Gold maintains an internet website at www.royalgold.com. Royal Gold makes available, free of charge, through the Investor Relations section of its website, its Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, and all amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act, as soon as reasonably practicable after such material is electronically filed with, or furnished to, the Securities and Exchange Commission ("SEC"). Our SEC filings are available from the SEC's internet website at www.sec.gov which contains reports, proxy and information statements and other information regarding issuers that file electronically. These reports, proxy statements and other information may also be inspected and copied at the SEC's Public Reference Room at 100 F Street, NE, Washington, D.C. 20549. Please call the SEC at 1-800-SEC-0330 for further information on the operation of the Public Reference Room. The charters of Royal Gold's key committees of the Board of Directors and Royal Gold's Code of Business Conduct and Ethics are also available on the Company's website. Any of the foregoing information is available in print to any stockholder who requests it by contacting our Investor Relations Department at (303) 573-1660. The information on the Company's website is not, and shall not be deemed to be, a part hereof or incorporated into this or any of our other filings with the SEC.

Table of Contents

Company Personnel

We currently have 20 employees, 19 of whom are located in Denver, Colorado, and one who is located in Zug, Switzerland. Our employees are not subject to a labor contract or a collective bargaining agreement. We consider our employee relations to be good.

We also retain independent contractors to provide consulting services, relating primarily to geologic and geophysical interpretations and also relating to such metallurgical, engineering, environmental, and other technical matters as may be deemed useful in the operation of our business.

ITEM 1A. RISK FACTORS

You should carefully consider the risks described below before making an investment decision. Our business, financial condition, results of operations, and cash flows could be materially adversely affected by any of these risks. The market or trading price of our securities could decline due to any of these risks. In addition, please see our note about forward-looking statements included in Part II, Item 7, MD&A of this Annual Report on Form 10-K. Please note that additional risks not presently known to us or that we currently deem immaterial may also impair our business and operations.

Risks Related to Our Business

Volatility in gold, silver, copper, nickel and other metal prices may have an adverse impact on the value of our royalty interests and may reduce our revenues. Certain contracts governing our royalty interests have features that may amplify the negative effects of a drop in metals prices.

The profitability of our royalty interests is directly related to the market price of gold, silver, copper, nickel and other metals. Our revenue is particularly sensitive to changes in the price of gold, as gold royalty interests represent the majority of our royalty revenue. Market prices may fluctuate widely and are affected by numerous factors beyond the control of Royal Gold or any mining company, including metal supply, industrial and jewelry fabrication, investment demand, central banking economic policy, expectations with respect to the rate of inflation, the relative strength of the dollar and other currencies, interest rates, gold purchases, sales and loans by central banks, forward sales by metal producers, global or regional political, economic or banking conditions, and a number of other factors.

Declines in market prices for gold, silver, copper, nickel and certain other metals such as those experienced during our fiscal years 2013 and 2014, decreased our revenues. Severe declines in market prices could cause an operator to reduce, suspend or terminate production from an operating project or construction work at a development project, which may result in a temporary or permanent reduction or cessation of revenue from those projects, and we might not be able to recover the initial investment in our royalty interests. Our sliding-scale royalties, such as Cortez, Holt, Mulatos, Wolverine and other properties, amplify this effect, because when metal prices fall below certain thresholds in a sliding-scale royalty, a lower royalty rate will apply. Any such price decline may result in a material and adverse effect on our profitability, results of operations and financial condition.

In addition, the selection of a property for exploration or development, the determination to construct a mine and place it into production, and the dedication of funds necessary to achieve such purposes are decisions that must be made long before the first revenues from production will be received. Price fluctuations between the time that decisions about exploration, development and construction are made and the commencement of production can have a material adverse effect on the economics of a mine and can eliminate or have a material adverse impact on the value of royalty interests.

Moreover, certain agreements governing our royalty interests, such as those relating to our royalty interests in the Andacollo, Robinson, Peñasquito and Voisey's Bay properties, are based on the operator's concentrate sales to smelters, which include price adjustments between the operator and the

Table of Contents

smelter based on metals prices at a later date, typically three to five months after shipment to the smelter. In such cases, our payments from the operator include a component of these later price adjustments, which can result in decreased revenue in later periods if metals prices have fallen.

Volatility in gold, silver, copper and nickel prices is demonstrated by the annual high and low prices for those metals from selected calendar years during the past decade.

High and low gold prices per ounce, based on the London Bullion Market Association P.M. fix, have ranged from \$454 to \$375 in 2004, from \$725 to \$525 in 2006, from \$1,212 to \$810 in 2009, from \$1,895 to \$1,319 in 2011, from \$1,792 to \$1,540 in 2012, from \$1,694 to \$1,192 in 2013, and \$1,385 to \$1,221 year to date 2014.

High and low silver prices per ounce, based on the London Bullion Market Association fix, have ranged from \$8.29 to \$5.50 in 2004, from \$14.94 to \$8.83 in 2006, from \$19.18 to \$10.51 in 2009, from \$48.70 to \$26.68 in 2011, from \$37.23 to \$26.67 in 2012, from \$32.23 to \$18.61 year in 2013, and \$22.05 to \$18.76 year to date 2014.

High and low copper prices per pound, based on the London Metal Exchange cash settlement price for Grade A copper, have ranged from \$1.49 to \$1.06 in 2004, from \$3.99 to \$2.06 in 2006, from \$3.33 to \$1.38 in 2009, from \$4.60 to \$3.08 in 2011, from \$3.93 to \$3.29 in 2012, from \$3.75 to \$3.01 in 2013, and \$3.37 to \$2.92 year to date 2014.

High and low nickel prices per pound, based on the London Metal Exchange cash settlement price for nickel, have ranged from \$7.79 to \$4.81 in 2004, from \$16.16 to \$6.25 in 2006, from \$9.31 to \$4.25 in 2009, from \$13.17 to \$7.68 in 2011, from \$9.90 to \$6.89 in 2012, from \$8.46 to \$6.00 in 2013, and \$9.62 to \$6.06 year to date 2014.

We own passive interests in mining properties, and it is difficult or impossible for us to ensure properties are developed or operated in our best interest.

All of our current revenue is derived from royalty interests on properties operated by third parties. The holder of a royalty interest typically has no authority regarding the development or operation of a mineral property. Therefore, we typically are not in control of decisions regarding development or operation of any of the properties on which we hold a royalty interest, and we have limited legal rights to influence those decisions.

Our strategy of having others operate properties on which we retain a royalty interest puts us generally at risk to the decisions of others regarding all operating matters, including permitting, feasibility analysis, mine design and operation, processing, plant and equipment matters and temporary or permanent suspension of operations, among others. These decisions are likely to be motivated by the best interests of the operator rather than to maximize payments to us. Although we attempt to secure contractual rights when we create new royalty interests, such as audit or access rights, that will permit us to protect our interests to a degree, there can be no assurance that such rights will always be available or sufficient, or that our efforts will be successful in achieving timely or favorable results or in affecting the operation of the properties in which we have a royalty interest in ways that would be beneficial to our stockholders.

Our revenues are subject to operational and other risks faced by operators of our mining properties.

Although we are not required to pay capital costs (except for transactions where we finance mine development or actively fund or participate ourselves in exploration or development projects) or operating costs, our financial results are indirectly subject to hazards and risks normally associated with developing and operating mining properties where we hold royalty interests. Some of these risks include:

insufficient ore reserves;

Edgar Filing: ROYAL GOLD INC - Form 10-K

Table of Contents

increases in production or capital costs incurred by operators or third parties that may impact the amount of reserves available to be mined, cause an operator to delay or curtail mining development and operations or render mining of ore uneconomical and cause an operator to close operations;

declines in the price of gold, silver, copper, nickel and other metals;

mine operating and ore processing facility problems;

economic downturns and operators' insufficient financing;

insolvency or bankruptcy of the operator;

significant permitting, environmental and other regulatory requirements and restrictions and any changes in those regulations;

challenges by non-mining interests to existing permits and mining rights, and to applications for permits and mining rights;

opposition by local communities, indigenous populations and non-governmental organizations;

community or civil unrest;

labor shortages, increased labor costs, and labor disputes, strikes or work stoppages at mines;

unanticipated geological conditions or metallurgical characteristics;

unanticipated ground or water conditions;

pit wall or tailings dam failures or any underground stability issues;

fires, explosions and other industrial accidents;

environmental hazards and natural catastrophes such as floods, earthquakes or inclement or hazardous weather conditions;

injury to persons, property or the environment;

the ability of operators to maintain or increase production or to replace reserves as properties are mined; and

uncertain domestic and foreign political and economic environments.

Edgar Filing: ROYAL GOLD INC - Form 10-K

The occurrence of any of the above mentioned risks or hazards could result in an interruption, suspension or termination of operations or development work at any of the properties in which we hold a royalty interest and have a material adverse effect on our business, results of operations, cash flows and financial condition.

Acquired royalty interests, particularly on development stage properties, are subject to the risk that they may not produce anticipated revenues.

The royalty interests we acquire may not produce anticipated revenues. The success of our acquisitions of royalty interests is based on our ability to make accurate assumptions regarding the valuation, timing and amount of revenues to be derived from our royalty interests, particularly with respect to acquisitions of royalty interests on development stage properties. If an operator does not bring a property into production and operate in accordance with feasibility studies, technical or reserve reports or other plans due to lack of capital, inexperience, unexpected problems, delays, or otherwise, then the acquired royalty interest may not yield sufficient revenues to be profitable. Furthermore, operators of development stage properties must obtain and maintain all necessary environmental permits and access to water, power and other raw materials needed to begin production, and there can be no assurance that operators will be able to do so.

Table of Contents

The Pascua-Lama mining project in Chile and Argentina is among our principal development stage acquisitions. During the fourth calendar quarter of 2013, Barrick announced the suspension of construction at the Pascua-Lama project, except for those activities required for environmental and regulatory compliance. Barrick has indicated that a decision to restart development will depend on improved economics and reduced uncertainty related to legal and regulatory requirements. The failure of the Pascua-Lama project, or any of our other principal properties, to produce anticipated revenues on schedule or at all would have a material adverse effect on our business, results of operations, financial condition or the other benefits we expect to realize from the acquisition of royalty interests.

Further, as mines on which we have royalty interests mature, we can expect overall declines in production over the years unless operators are able to replace reserves that are mined through mine expansion or successful new exploration. There can be no assurance that the operators of properties where we hold royalty interests will be able to maintain or increase production or replace reserves as they are mined.

Several of our royalty interests are significant to us and any adverse development related to these properties could adversely affect our revenues.

Our investments in the Mt. Milligan, Andacollo, Voisey's Bay and Peñasquito properties, among others, are currently significant to us, as our interests in these properties generated approximately \$130.4 million in revenue in fiscal year 2014, which was nearly 55% of our revenue for the period. In addition, we anticipate that the portion of our revenue attributable to Mt. Milligan will increase significantly as it reaches full production and that the Pascua-Lama mining project will contribute meaningfully to our revenues if and when it begins producing revenue. Any adverse development affecting the operation of or production from these operations may have a material adverse effect on our business, results of operations, cash flows and financial condition. In addition, we typically have limited or no control over operational decisions made by third party operators of these projects. Any adverse decision made by the operators, such as changes to mine plans, production schedules or metallurgical processes, may impact the timing and amount of revenue that we receive.

Royalty interests are subject to title and other defects, and these risks may be hard to identify in acquisition transactions.

While we seek to confirm the existence, validity, enforceability, terms and geographic extent of the royalty interests we acquire, there can be no assurance that disputes over these and other matters will not arise. Confirming these matters, as well as the title to mining property on which we hold or seek to acquire a royalty interest, is a complex matter, and is subject to the application of the laws of each jurisdiction to the particular circumstances of each parcel of mining property and to the documents reflecting the royalty interest. Similarly, royalty interests in many jurisdictions are contractual in nature, rather than interests in land, and therefore may be subject to change of control, bankruptcy or insolvency of operators. We often do not have the protection of security interests over property that we could liquidate to recover all or part of our investment in a royalty interest. Even if we retain our royalty interests in a mining project after any change of control, bankruptcy or insolvency of the operator, the project may end up under the control of a new operator, who may or may not operate the project in a similar manner to the current operator, which may positively or negatively impact us. Unknown defects in or disputes relating to the royalty interests we hold or acquire may prevent us from realizing the anticipated benefits from the royalty interests, and could have a material adverse effect on our business, results of operations, cash flows and financial condition.

Table of Contents

Operators may interpret our royalty interests in a manner adverse to us or otherwise may not abide by their contractual obligations, and we could be forced to take legal action to enforce our contractual rights.

Our royalty interests generally are subject to uncertainties and complexities arising from the application of contract and property laws in the jurisdictions where the mining projects are located. Operators and other parties to the agreements governing our royalty interests may interpret our royalty interests in a manner adverse to us or otherwise may not abide by their contractual obligations, and we could be forced to take legal action to enforce our contractual rights. We may or may not be successful in enforcing our contractual rights, and our revenues relating to any challenged royalty interests may be delayed, curtailed or eliminated during the pendency of any such dispute or in the event our position is not upheld, which could have a material adverse effect on our business, results of operations, cash flows and financial condition. Disputes could arise challenging, among other things:

the existence or geographic extent of the royalty interest;

methods for calculating the royalty interest, including whether certain operator costs may properly be deducted from gross proceeds when calculating royalties determined on a net basis;

third party claims to the same royalty interest or to the property on which we have a royalty interest;

various rights of the operator or third parties in or to the royalty interest;

production and other thresholds and caps applicable to payments of royalty interests;

the obligation of an operator to make payments on royalty interests; and

various defects or ambiguities in the agreement governing a royalty interest.

For example, in October 2009, the Labrador Nickel Royalty Limited Partnership ("LNRLP"), of which the Company is the indirect majority owner, stated a claim in the Supreme Court of Newfoundland and Labrador Trial Division against certain subsidiaries of Vale, alleging that Vale has been incorrectly calculating LNRLP's 3% NSR royalty on the sale of nickel and copper concentrates from the Voisey's Bay mine. Vale is commissioning its new Long Harbour Processing Plant with nickel matte from its Indonesian operations and intends to begin introducing nickel concentrates from Voisey's Bay in coming quarters. In anticipation of the transition from processing Voisey's Bay nickel concentrates at Vale's Sudbury and Thompson smelters to processing at the Long Harbour hydrometallurgical plant, the Company is engaged in discussions with Vale concerning calculation of the royalty once Voisey's Bay nickel concentrates are processed at Long Harbour. Vale proposed a calculation of the royalty that the Company estimates could result in the substantial reduction of royalty payable to LNRLP on Voisey's Bay nickel concentrates processed at Long Harbour. While the Company may continue to engage in discussions concerning calculation of the royalty on nickel concentrates processed at Long Harbour, there is no guaranty that the Company and Vale will reach agreement on the proper calculation under the terms of the royalty agreement. If no agreement is reached, the Company intends to vigorously pursue all legal remedies to ensure the appropriate calculation of the royalty and to enforce LNRLP's royalty interests at Voisey's Bay.

Potential litigation affecting the properties that we have royalty interests in could have an adverse effect on us.

Potential litigation may arise between the operators of properties on which we have royalty interests and third parties. For example, Barrick's Pascua-Lama mining project has been the subject of litigation by local farmers and indigenous communities alleging that the project's water management system is not in compliance with environmental permits and that the project has damaged glaciers located in the Pascua-Lama project area. As holder of a royalty interest, we generally will not have any influence on the litigation and generally will not have access to non-public information concerning such litigation. Any such litigation that results in the reduction, cessation or termination of production from a property, whether temporary or permanent, could have a material adverse effect on our business, results of operations, cash flows and financial condition.

Table of Contents

We may enter into acquisitions or other material transactions at any time.

In the ordinary course of business, we engage in a continual review of opportunities to acquire existing royalty interests, to create new royalty interests through the financing of exploration, development or producing mining projects, and to acquire companies that hold royalty interests. We currently, and generally at any time, have acquisition opportunities in various stages of active review, including, for example, our engagement of consultants and advisors to analyze particular opportunities, technical, financial and other confidential information, submission of indications of interest and participation in discussions or negotiations for acquisitions. We also consider obtaining or providing debt commitments for acquisition financing. Any such acquisition could be material to us. We could issue common stock or incur additional indebtedness to fund our acquisitions. Issuances of common stock may dilute existing stockholders and reduce some or all of our financial measures on a per share basis. In addition, any such acquisition or other transaction may have other transaction specific risks associated with it, including risks related to the completion of the transaction, the project, its operators, or the jurisdictions in which the project is located.

In addition, we may consider opportunities to restructure our royalty interests where we believe such restructuring would provide a long-term benefit to the Company, though such restructuring may reduce near-term revenues or result in the incurrence of transaction related costs. We could enter into one or more acquisition or restructuring transactions at any time.

We may be unable to successfully acquire additional royalty interests at appropriate valuations.

Our future success largely depends upon our ability to acquire royalty interests at appropriate valuations, including through royalty interest and corporate acquisitions and other financing transactions. Most of our revenues are derived from royalty interests that we acquire or finance. There can be no assurance that we will be able to identify and complete the acquisition of such royalty interests or businesses that own desired interests, at reasonable prices or on favorable terms, or, if necessary, that we will have, or be able to obtain, sufficient financing on reasonable terms to complete such acquisitions. Continued economic volatility or a credit crisis, or severe declines in market prices for gold, silver, copper, nickel and certain other metals, could adversely affect our ability to obtain debt or equity financing for acquisitions of additional royalty interests. In addition, changes to tax rules, accounting policies, or the treatment of royalty interests by ratings agencies could make royalties, streams or other investments by the Company less attractive to counterparties. Such changes could adversely affect our ability to acquire new royalty interests.

We also face competition in the acquisition of royalty interests. We have competitors that are engaged in the acquisition of royalty interests, including companies with greater financial resources, and we may not be able to compete successfully against these companies in acquiring new royalty interests. If we are unable to successfully acquire additional royalty interests, the reserves subject to our royalty interests may decline as the producing properties on which we have such royalty interests are mined or payment or production caps on certain of our royalty interests are met. We also may experience negative reactions from the financial markets or operators of properties on which we seek royalty interests if we are unable to successfully complete acquisitions of royalty interests or businesses that own desired royalty interests. Each of these factors could have a material adverse effect on our business, results of operations, cash flows and financial condition.

We depend on our operators for the calculation of payments of our royalty interests. We may not be able to detect errors and later payment calculations may call for retroactive adjustments.

The payments of our royalty interests are calculated by the operators of the properties on which we have royalty interests based on their reported production. Each operator's calculation of our payments is subject to and dependent upon the adequacy and accuracy of its production and accounting

Table of Contents

functions, and, given the complex nature of mining and ownership of mining interests, errors may occur from time to time in the allocation of production and the various other calculations made by an operator. Any of these errors may render calculations of such payments inaccurate. Certain agreements governing our royalty interests require the operators to provide us with production and operating information that may, depending on the completeness and accuracy of such information, enable us to detect errors in the calculation of payments of royalty interests that we receive. We do not, however, have the contractual right to receive production information for all of our royalty interests. As a result, our ability to detect payment errors through our royalty interest monitoring program and its associated internal controls and procedures is limited, and the possibility exists that we will need to make retroactive revenue adjustments. Some contracts governing our royalty interests provide us the right to audit the operational calculations and production data for the associated payments of royalty interests; however, such audits may occur many months following our recognition of the revenue and may require us to adjust our revenue in later periods, which could require us to restate our financial statements.

Development and operation of mines is very capital intensive and any inability of the operators of properties where we hold royalty interests to meet liquidity needs, obtain financing or operate profitably could have material adverse effects on the value of and revenue from our royalty interests.

The development and operation of mines is very capital intensive, and if operators of properties where we hold royalty interests do not have the financial strength or sufficient credit or other financing capability to cover the costs of developing or operating a mine, the operator may curtail, delay or cease development or operations at a mine site. Operators' ability to raise and service sufficient capital may be affected by, among other things, macroeconomic conditions, future commodity prices of metals to be mined, or further economic volatility in the U.S. and global financial markets as has been experienced in recent years. If certain of the operators of the properties on which we have royalty interests suffer these material adverse effects, then our royalty interests and the value of and revenue from our royalty interests may be materially adversely affected. In addition, continued economic volatility or a credit crisis could adversely affect the ability of operators to obtain debt or equity financing for the exploration, development and operation of their properties.

Certain of our royalty interests are subject to payment or production caps or rights in favor of the operator or third parties that could reduce the revenues generated from the royalty interest.

Some of our principal royalty interests are subject to limitations, such that the royalty interest will extinguish or decrease after threshold production is achieved or payments at stated thresholds are made. For example:

the royalty rate at Andacollo decreases from 75% of payable gold to 50% of payable gold once 910,000 payable ounces of gold have been produced, of which approximately 217,000 cumulative payable ounces have been produced as of June 30, 2014;

our royalty at Mulatos is subject to a 2.0 million ounce cap on gold production, of which there has been approximately 1.27 million ounces of cumulative production as of June 30, 2014;

approximately 20% of our royalty at Pascua-Lama is limited to the first 14.0 million ounces of gold produced from the project, and another 24% of the royalty can be extended beyond 14.0 million ounces produced for a payment of \$4.4 million; and

our stream at the Phoenix Gold project decreases from 6.3% of gold production to 3.15% of gold production once 135,000 payable ounces of gold have been delivered.

Furthermore, certain other agreements governing our royalty interests contain rights that favor the operator or third parties. For example, Round Mountain, a joint venture between Kinross and Barrick, has the right, at any time, to purchase a portion of our Gold Hill royalty interest for \$10.0 million less

Table of Contents

any royalty payments paid prior to the purchase option being exercised. Also, certain individuals from whom we purchased portions of our royalties at Pascua-Lama are entitled to one-time payments if the price of gold exceeds certain thresholds. If any of these thresholds are met or similar rights are exercised or we fail to make the required payment, our future revenue could be reduced.

Estimates of reserves and mineralization by the operators of mines in which we have royalty interests are subject to significant revision.

There are numerous uncertainties inherent in estimating proven and probable reserves and mineralization, including many factors beyond our control and the control of the operators of properties in which we have royalty interests. Reserve estimates for our royalty interests are prepared by the operators of the mining properties. We do not participate in the preparation or verification of such reports and have not independently assessed or verified the accuracy of such information. The estimation of reserves and of other mineralized material is a subjective process, and the accuracy of any such estimates is a function of the quality of available data and of engineering and geological interpretation and judgment. Results of drilling, metallurgical testing and production, and the evaluation of mine plans subsequent to the date of any estimate, may cause a revision of such estimates. The volume and grade of reserves recovered and rates of production may be less than anticipated. Assumptions about gold and other precious metal prices are subject to great uncertainty, and such prices have fluctuated widely in the past. Declines in the market price of gold, silver, copper, nickel or other metals also may render reserves or mineralized material containing relatively lower ore grades uneconomical to exploit. Changes in operating costs and other factors including short-term operating factors, the processing of new or different ore grades, geotechnical characteristics and metallurgical recovery, may materially and adversely affect reserves. Finally, it is important to note that our royalty agreements generally give us interests in only a small portion of the production from the operators' aggregate reserves, and the size of those interests varies widely based on the individual documents governing them.

Estimates of production by the operators of mines in which we have royalty interests are subject to change, and actual production may vary materially from such estimates.

Production estimates are prepared by the operators of mining properties. There are numerous uncertainties inherent in estimating anticipated production attributable to our royalty interests, including many factors beyond our control and the control of the operators of the properties in which we have royalty interests. We do not participate in the preparation or verification of production estimates and have not independently assessed or verified the accuracy of such information. The estimation of anticipated production is a subjective process and the accuracy of any such estimates is a function of the quality of available data, reliability of production history, variability in grade encountered, mechanical or other problems encountered, engineering and geological interpretation and operator judgment. Rates of production may be less than expected. Results of drilling, metallurgical testing and production, changes in commodity prices, and the evaluation of mine plans subsequent to the date of any estimate may cause actual production to vary materially from such estimates.

If title to properties is not properly maintained by the operators, or is successfully challenged by third parties, our royalty interests could become invalid.

Our business includes the risk that operators of mining projects and holders of mining claims, tenements, concessions, mining licenses or other interests in land and mining rights may lose their exploration or mining rights, or have their rights to mining properties contested by private parties or the government. Internationally, mining tenures are subject to loss for many reasons, including expiration, failure of the holder to meet specific legal qualifications, failure to pay maintenance fees, reduction in geographic extent upon passage of time or upon conversion from an exploration tenure to

Table of Contents

a mining tenure, failure of title and similar risks. Unpatented mining claims, for example, which constitute a significant portion of the properties on which we hold royalty interests in the United States, and which are generally considered subject to greater title risk than real property interests held by absolute title, are often uncertain and subject to contest by third parties and the government. If title to unpatented mining claims or other mining tenures subject to our royalty interests has not been properly established or is not properly maintained, or is successfully contested, our royalty interests could be adversely affected.

Operations in foreign jurisdictions are subject to many risks, which could decrease our revenues.

We derived approximately 85% of our revenues from foreign sources during fiscal year 2014, compared to approximately 83% in fiscal year 2013 and 82% in fiscal year 2012. Our principal producing royalty interests on properties outside of the United States are located in Canada, Chile and Mexico. We currently have royalty interests in mines and projects in other countries, including Argentina, Australia, Bolivia, Brazil, Burkina Faso, Dominican Republic, Finland, Ghana, Guatemala, Honduras, Nicaragua, Peru, Russia, Spain and Tunisia. In addition, future acquisitions may expose us to new jurisdictions. Our foreign activities are subject to the risks normally associated with conducting business in foreign countries. These risks include, depending on the country, such things as:

expropriation or nationalization of property;

exchange and currency controls and fluctuations;

limitations on foreign exchange and repatriation of earnings;

increased foreign taxation or imposition of new or increased mining royalty interests;

restrictions on mineral production and price controls;

import and export regulations, including restrictions on the export of gold, silver, copper, nickel or other metals;

changes in legislation, including changes related to taxation, royalty interests, imports, exports, duties, currency, foreign ownership, foreign trade and foreign investment;

high rates of inflation;

labor practices and disputes;

enforcement of unfamiliar or uncertain foreign real estate, mineral tenure, contract, water use, mine safety and environmental laws and policies;

challenges to mining, processing and related permits and licenses, or to applications for permits and licenses, by or on behalf of regulatory authorities, indigenous populations, non-governmental organizations or other third parties;

renegotiation, nullification or forced modification of existing contracts, licenses, permits, approvals, concessions or the like;

Edgar Filing: ROYAL GOLD INC - Form 10-K

war, crime, terrorism, sabotage, civil unrest and uncertain political and economic environments;

corruption;

exposure to liabilities under anti-corruption and anti-money laundering laws, including the U.S. Foreign Corrupt Practices Act and similar laws and regulations in other jurisdictions to which we, but not necessarily our competitors, may be subject;

suspension of the enforcement of creditors' rights and stockholders' rights;

risk of loss due to disease and other potential endemic health issues; and

Table of Contents

loss of access to government controlled infrastructure, such as roads, bridges, rails, ports, power sources and water supply.

For example, in recent years Argentina, where a portion of the Pascua-Lama project is located, has experienced significant economic turmoil and its government has taken several actions that have troubled foreign investors, including the nationalization of YPF S.A., the largest oil and gas company in Argentina, from foreign owner Repsol S.A. and the enactment of a federal glacier protection law that restricts mining activities in areas on or near the nation's glaciers (as discussed below in "*The mining industry is subject to significant environmental risks*"). Our royalties in the Pascua-Lama project, which straddles the border between Chile and Argentina, are on the Chilean side of the project. These actions, or similar future actions, could have a material adverse effect on the feasibility of new mine development and the profitability of existing mining operations in Argentina. In addition, the Pascua-Lama and El Morro projects have been challenged by Chilean indigenous groups and other third parties. During the fourth calendar quarter of 2013, Barrick suspended construction activities at the Pascua-Lama project, except for those activities required for environmental and regulatory compliance, as discussed further in Part I, Item 2, Properties under the heading "Pascua-Lama Project (Region III, Chile)." Similarly, construction activities at the El Morro project were suspended during the same period.

As another example, in March 2012, the Australian federal government adopted new tax legislation that imposes a 30% tax on iron ore and coal mine profits. While the government repealed this tax in July 2014, similar legislation could be adopted in other foreign jurisdictions that could impose new or larger tax obligations or royalty interests on operators. Such legislation could have a material adverse effect on the feasibility of new mine development and the profitability of existing mining operations.

In addition, many of our operators are organized outside of the United States. Our royalty interests may be subject to the application of foreign laws to our operators, and their stockholders, including laws relating to foreign ownership structures, corporate transactions, creditors' rights, bankruptcy and liquidation. Foreign operations also could be adversely impacted by laws and policies of the United States affecting foreign trade, investment and taxation.

These risks may limit or disrupt operating mines or projects on which we hold royalty interests, restrict the movement of funds, or result in the deprivation of contract rights or the taking of property by nationalization or expropriation without fair compensation, and could have a material adverse effect on our business, results of operations, cash flows and financial condition. Certain of these risks may increase in an environment of relatively high metal prices.

Changes in mining taxes and royalty interests payable to governments could decrease our revenues.

Changes in mining and tax laws in any of the United States, Canada, Chile, Mexico or any other country in which we have royalty interests in mines or projects could affect mine development and expansion, significantly increase regulatory obligations and compliance costs with respect to mine development and mine operations, increase the cost of holding mining claims or impose additional taxes on mining operations, all of which could adversely affect our revenue from such properties. A number of properties where we hold royalty interests are located on U.S. public lands that are subject to federal mining and other public land laws. In recent years, the United States Congress has considered a number of proposed major revisions to the General Mining Law, which governs the creation, maintenance and possession of mining claims and related activities on public lands in the United States. Congress also has recently considered bills, which if enacted, would impose royalty interests payable to the government on hardrock production, increase land holding fees, impose federal reclamation fees, impose additional environmental operating standards and afford greater public involvement and regulatory discretion in the mine permitting process. Such legislation, if enacted, or similar legislation in other countries, could adversely affect the development of new mines and the

Table of Contents

expansion of existing mines, as well as increase the cost of all mining operations, and could materially and adversely affect mine operators and our revenue.

Changes in United States tax legislation regarding our foreign earnings could adversely impact our business.

We are subject to income taxes in the United States and various foreign jurisdictions. Currently, the majority of our revenue is generated from royalty interests located outside, and taxed in, the United States. United States income and foreign withholding taxes have not been provided for on specific foreign earnings which are intended to be indefinitely reinvested within a foreign subsidiary. The current Executive branch of government has proposed various international tax measures, some of which, if enacted into law, would substantially reduce our ability to defer United States taxes on such indefinitely reinvested non-United States earnings, eliminate certain tax deductions until foreign earnings are repatriated to the United States and/or otherwise cause the total tax cost of U.S. multinational corporations to increase. If these or similar proposals are enacted in the current or future years, they could have a negative impact on our financial position and results of operations.

The mining industry is subject to significant environmental risks.

Mining is subject to potential risks and liabilities associated with pollution of the environment and the disposal of waste products occurring as a result of mineral exploration and production. Laws and regulations in the United States and abroad intended to ensure the protection of the environment are constantly changing and evolving in a manner expected to result in stricter standards and enforcement, larger fines and liability, and potentially increased capital expenditures and operating costs. Furthermore, mining may be subject to significant environmental and other permitting requirements regarding the use of raw materials needed for operations, particularly water and power. Compliance with such laws and regulations can require significant expenditures and a breach may result in the imposition of fines and penalties, which may be material. If an operator is forced to incur significant costs to comply with environmental regulations or becomes subject to environmental restrictions that limit its ability to continue or expand operations, or if an operator were to lose its right to use or access water or other raw materials necessary to operate a mine, our revenues could be reduced, delayed or eliminated. These risks are most salient with regard to our development stage properties where permitting may not be complete and/or where new legislation and regulation can lead to delays, interruptions and significant unexpected cost burdens for mine operators. For example, Argentina passed a federal glacier protection law in 2010 that restricts mining activities in areas on or near the nation's glaciers. We have royalties on the Chilean side of the Pascua-Lama project, which straddles the border between Chile and Argentina, and the glacier law could affect aspects of the design, development and operation of the Pascua-Lama project. In July 2012, the National Supreme Court of Justice of Argentina overturned preliminary injunctions suspending the application of the glacier law in the San Juan Province, where a portion of the Pascua-Lama project is located, but the Supreme Court must still rule on the constitutionality of the glacier law. Further, to the extent that we become subject to environmental liabilities for any time period during which we operated properties, the satisfaction of any liabilities would reduce funds otherwise available to us and could have a material adverse effect on our business, results of operations, cash flows and financial condition.

Regulations and pending legislation governing issues involving climate change could result in increased operating costs to the operators of the properties on which we have royalty interests.

A number of governments or governmental bodies have introduced or are contemplating regulatory changes in response to the potential impacts of climate change. The December 1997 Kyoto Protocol, which has been extended to 2020, establishes a set of greenhouse gas emission targets for countries that have ratified the Protocol, which include Ghana, Australia and Peru. Canada ratified the Protocol but renounced its ratification in December 2011. Furthermore, the U.S. Congress and several

Table of Contents

states have initiated legislation regarding climate change that will affect energy prices and demand for carbon intensive products. Legislation and increased regulation regarding climate change could impose significant costs on the operators of properties where we hold royalty interests, including increased energy, capital equipment, environmental monitoring and reporting and other costs to comply with such regulations. If an operator of a property on which we have a royalty interest is forced to incur significant costs to comply with climate change regulation or becomes subject to environmental restrictions that limit its ability to continue or expand operations, our revenues from that property could be reduced, delayed or eliminated.

We depend on the services of our President and Chief Executive Officer and other key employees.

We believe that our success depends on the continued service of our key executive management personnel. Tony Jensen has served as our President and Chief Executive Officer since July 2006. Mr. Jensen's extensive commercial experience, mine operations background and industry contacts give us an important competitive advantage. The loss of the services of Mr. Jensen, other key members of management or other key employees could jeopardize our ability to maintain our competitive position in the industry. From time to time, we may also need to identify and retain additional skilled management and specialized technical personnel to efficiently operate our business. The number of persons skilled in the acquisition, exploration and development of royalty interests is limited and there is competition for such persons. Recruiting and retaining qualified personnel is critical to our success and there can be no assurance of such success. If we are not successful in attracting and retaining qualified personnel, our ability to execute our business model and growth strategy could be affected, which could have a material adverse effect on our business, results of operations, cash flows and financial condition. We currently do not have key person life insurance for any of our officers or directors.

Our disclosure controls and internal control over our financial reporting are subject to inherent limitations.

Management has concluded that as of June 30, 2014, our disclosure controls and procedures and our internal control over financial reporting were effective. Such controls and procedures, however, may not be adequate to prevent or identify existing or future internal control weaknesses due to inherent limitations therein, which may be beyond our control, including, but not limited to, our dependence on operators for the calculation of payments of royalty interests as discussed above in "*We depend on our operators for the calculation of payments of our royalty interests. We may not be able to detect errors and later payment calculations may call for retroactive adjustments*". Given our dependence on third party calculations, there is a risk that material misstatements in results of operations and financial condition may not be prevented or detected on a timely basis by our internal controls over financial reporting and may require us to restate our financial statements.

We have incurred indebtedness in connection with our business and may in the future incur additional indebtedness that could limit cash flow available for our operations, limit our ability to borrow additional funds and have a material adverse effect on our business, results of operations, cash flows and financial condition.

As of June 30, 2014, we had \$370 million aggregate principal amount of our 2.875% convertible senior notes due 2019 (the "2019 Notes") outstanding, which we incurred in June 2012. In addition, we may incur additional indebtedness in connection with financing acquisitions, strategic transactions or for other purposes. As of June 30, 2014, we had \$450 million available for borrowing under our revolving credit facility, which amount we may increase to \$600 million subject to the satisfaction of certain conditions. Our indebtedness increases the risk that we may be unable to generate enough cash to pay amounts due in respect of our indebtedness.

Table of Contents

Our indebtedness could have a material adverse effect on our business, results of operations, cash flows and financial condition. For example, it could:

make it more difficult for us to satisfy our debt obligations;

increase our vulnerability to general adverse economic and industry conditions;

require us to dedicate a substantial portion of our cash flow from operations to service our indebtedness, thereby reducing the availability of our cash flow to fund acquisitions of royalty interests, working capital, pay dividends and other general corporate purposes;

limit our flexibility in planning for, or reacting to, changes in our business and the industry in which we operate;

restrict us from exploiting business opportunities;

place us at a competitive disadvantage compared to our competitors that have less indebtedness;

dilute our existing stockholders if we elect to issue common stock instead of paying cash in the event the holders convert the 2019 Notes, or any other convertible securities issued in the future;

require the consent of our existing lenders to borrow additional funds, as was required in connection with the issuance of the 2019 Notes; and

limit our ability to borrow additional funds for working capital, capital expenditures, acquisitions, debt service requirements, execution of our business strategy or other general corporate purposes.

In addition, the agreement governing our revolving credit facility contains, and the agreements that may govern any future indebtedness that we may incur may contain, financial and other restrictive covenants that will limit our ability to engage in activities that may be in our long-term best interests. Among other restrictions, the agreement governing our revolving credit facility contains covenants limiting our ability to make certain investments, consummate certain mergers, incur certain debt or liens and dispose of assets.

We may be required to pay a significant amount of money or issue a significant amount of shares of our common stock or both upon the exercise of any put, redemption or call right and conversion of the 2019 Notes, which could dilute existing stockholders and have a material adverse effect on our business, results of operations, cash flows and financial condition.

Holders of the 2019 Notes may convert their 2019 Notes at their option prior to the close of business on the business day immediately preceding March 15, 2019, but only under the following circumstances: (1) during any fiscal quarter commencing after June 30, 2012 (and only during such fiscal quarter), if the last reported sale price of our common stock for at least 20 trading days (whether or not consecutive) during the period of 30 consecutive trading days ending on the last trading day of the immediately preceding fiscal quarter is greater than or equal to 130% of the applicable conversion price on each applicable trading day; (2) during the five consecutive business day period after any five consecutive trading day period (the "measurement period") in which the trading price per \$1,000 principal amount of notes for each trading day of such measurement period was less than 98% of the product of the last reported sale price of our common stock and the applicable conversion rate on each such trading day; (3) upon the occurrence of certain corporate events; or (4) if we call any 2019 Notes for redemption, at any time until the close of business on the business day preceding the redemption date. On or after March 15, 2019 until the close of business on the scheduled trading day immediately preceding the June 15, 2019 maturity date, holders may convert their 2019 Notes at any time, regardless of the foregoing circumstances.

Table of Contents

On or after June 15, 2015, if the last reported sale price of our common stock for at least 20 trading days (whether or not consecutive) during the period of 30 consecutive trading days ending within 10 trading days immediately prior to the date we provide the notice of redemption exceeds 130% of the applicable conversion price of the 2019 Notes on each applicable trading day, subject to certain limited exceptions, we may redeem any or all of the 2019 Notes. The redemption price for the 2019 Notes to be redeemed on any redemption date will equal 100% of the principal amount of the 2019 Notes being redeemed, plus accrued and unpaid interest, if any, to, but excluding, the redemption date, plus \$90 per each \$1,000 principal amount of 2019 Notes being redeemed. If we call any 2019 Notes for redemption, holders may convert their 2019 Notes at any time until the close of business on the business day preceding the redemption date.

Upon conversion of any of the 2019 Notes, whether upon maturity, the exercise of any put, call or redemption right, or otherwise, we will be required to pay or deliver, at our election, cash, shares of our common stock or a combination of cash and shares of our common stock. Any such payment or delivery of cash, shares or a combination of cash and shares upon conversion of the 2019 Notes could dilute existing stockholders and may have an adverse effect on our business, results of operations, cash flows and financial condition.

We may not be able to satisfy our debt obligations which could have a material adverse effect on our business, results of operations, cash flows and financial condition.

We are subject to the risks normally associated with debt financing, including the risk that our cash flows may be insufficient to meet required principal and interest payments and the risk that we will be unable to refinance our indebtedness when it becomes due, or that the terms of such refinancing will not be as favorable as the terms of our indebtedness. As of June 30, 2014, our annual debt service obligation on the 2019 Notes was approximately \$10.6 million. In addition, the 2019 Notes include provisions providing for the lump sum payment of significant amounts of principal, whether upon maturity, upon the exercise of any applicable put, redemption or call rights or otherwise and all amounts, if any, due under our revolving credit facility are due at maturity. Our ability to make these payments when due will depend upon several factors, which may not be in our control. These factors include our liquidity or our ability to liquidate assets owned by us on or prior to such put, redemption, call or maturity dates and the amount by which we have been able to reduce indebtedness prior to such date through exchanges, refinancing, extensions, collateralization or other similar transactions (any of which transactions may also have the effect of reducing liquidity or liquid assets).

If we are unable to maintain cash reserves or generate sufficient cash flow or otherwise obtain funds necessary to make required payments, or if we fail to comply with the various covenants and requirements of the 2019 Notes, our revolving credit facility or any indebtedness which we may incur in the future, this could result in an event of default that, if not cured or waived, could result in the acceleration of all of our debt. Any default under the 2019 Notes, our revolving credit facility or any indebtedness which we may incur in the future could have a material adverse effect on our business, results of operations, cash flows and financial condition.

The accounting method for convertible debt securities that may be settled in cash, such as the 2019 Notes, could have a material effect on our reported net income, net working capital or other financial results.

Under the Financial Accounting Standards Board Accounting Standards Codification Section 470-20, *Debt with Conversion and other Options* ("ASC 470-20"), an entity must separately account for the liability and equity components of convertible debt instruments (such as the 2019 Notes) that may be settled entirely or partially in cash upon conversion in a manner that reflects the issuer's economic interest cost. The effect of ASC 470-20 on the accounting for the 2019 Notes is that the equity component is required to be included in the additional paid-in capital section of stockholders' equity on our consolidated balance sheet and the value of the equity component is

Table of Contents

treated as original issue discount for purposes of accounting for the debt component of the 2019 Notes. As a result, we are required to record a greater amount of non-cash interest expense as a result of the amortization of the discounted carrying value of the 2019 Notes to their face amount over the term of the 2019 Notes. We report lower net income in our financial results because ASC 470-20 requires interest to include both the current period's amortization of the debt discount and the instrument's coupon interest, which could adversely affect our reported or future financial results, the market price of our common stock and the trading price of the 2019 Notes.

In addition, under certain circumstances, convertible debt instruments (such as the 2019 Notes) that may be settled entirely or partly in cash are currently accounted for utilizing the treasury stock method, the effect of which is that the shares issuable upon conversion of the 2019 Notes are not included in the calculation of diluted earnings per share except to the extent that the conversion value of the 2019 Notes exceeds their principal amount. Under the treasury stock method, for diluted earnings per share purposes, the transaction is accounted for as if the number of shares of common stock that would be necessary to settle such excess, if we elected to settle such excess in shares, are issued. We cannot be sure that the accounting standards in the future will continue to permit the use of the treasury stock method. If we are unable to use the treasury stock method in accounting for the shares issuable upon conversion of the 2019 Notes, then our diluted earnings per share would be adversely affected.

Risks Related to Our Common Stock

Our stock price may continue to be volatile and could decline.

The market price of our common stock has fluctuated and may decline in the future. The high and low sale prices of our common stock on the NASDAQ Global Select Market were \$83.87 and \$57.00 for the fiscal year ended June 30, 2012, \$100.84 and \$38.63 for the fiscal year ended June 30, 2013, and \$76.85 and \$40.45 for the fiscal year ending June 30, 2014. The fluctuation of the market price of our common stock has been affected by many factors that are beyond our control, including:

market prices of gold, silver, copper, nickel and other metals;

Central Bank interest rates;

expectations regarding inflation;

ability of operators to advance development projects, produce precious metals and develop new reserves;

currency values;

credit market conditions;

general stock market conditions; and

global and regional political and economic conditions.

Additional issuances of equity securities by us could dilute our existing stockholders, reduce some or all of our financial measures on a per share basis, reduce the trading price of our common stock or impede our ability to raise future capital. Substantial sales of shares may negatively impact the market price of our common stock.

We may issue equity in the future in connection with acquisitions, strategic transactions or for other purposes. To the extent we issue additional equity securities, our existing stockholders could be diluted and some or all of our financial measures on a per share basis could be reduced. In addition, the shares of common stock that we issue in connection with an acquisition may not be subject to resale restrictions. The market price of our common stock could decline if our stockholders sell

Table of Contents

substantial amounts of our common stock, including shares issued upon the conversion of the outstanding 2019 Notes or are perceived by the market as intending to sell these shares other than in an orderly manner. In addition, the existence of the 2019 Notes may encourage short selling by market participants because the conversion of the 2019 Notes could depress the price of our common stock. These sales also could impair our ability to raise capital through the sale of additional equity or equity related securities in the future at a time and price that we deem appropriate. We are unable to predict the effect that sales may have on the then-prevailing market price of our common stock.

Conversion of the 2019 Notes may dilute the ownership interest of existing stockholders.

At our election, we may settle the 2019 Notes tendered for conversion entirely or partly in shares of our common stock. An aggregate of approximately 3.5 million shares of our common stock are issuable upon conversion of the outstanding 2019 Notes at the initial conversion rate of 9.4955 shares of common stock per \$1,000 principal amount of notes (equivalent to an initial conversion price of approximately \$105.31 per share of common stock). In addition, the number of shares of common stock issuable upon conversion of the 2019 Notes, and therefore the dilution of existing common stockholders, could increase under certain circumstances described in the indenture under which the 2019 Notes are governed. We may issue all of these shares without any action or approval by our stockholders. As a result, the conversion of some or all of the 2019 Notes may dilute the ownership interests of existing stockholders. Any sales in the public market of the common stock issuable upon such conversion could adversely affect prevailing market prices of our common stock.

We may change our practice of paying dividends.

We have paid a cash dividend on our common stock for each fiscal year beginning in fiscal year 2000. Our board of directors has discretion in determining whether to declare a dividend based on a number of factors, including prevailing gold prices, economic market conditions, future earnings, cash flows, financial condition, and funding requirements for future opportunities or operations. In addition, there may be corporate law limitations or future contractual restrictions on our ability to pay dividends. If our board of directors declines or is unable to declare dividends in the future or reduces the current dividend level, our stock price could fall, and the success of an investment in our common stock would depend largely upon any future stock price appreciation. We have increased our dividends in prior years. There can be no assurance, however, that we will continue to do so or that we will pay any dividends at all.

Certain provisions of Delaware law, our organizational documents, our rights plan and the indenture governing the 2019 Notes could impede, delay or prevent an otherwise beneficial takeover or takeover attempt of us.

Certain provisions of Delaware law, our organizational documents, our rights plans and the indenture governing the 2019 Notes could make it more difficult or more expensive for a third party to acquire us, even if a change of control would be beneficial to our stockholders. Delaware law prohibits, subject to certain exceptions, a Delaware corporation from engaging in any business combination with any "interested stockholder," which is generally defined as a stockholder who becomes a beneficial owner of 15% or more of a Delaware corporation's voting stock, for a period of three years following the date that the stockholder became an interested stockholder. Additionally, our certificate of incorporation and bylaws contain provisions that could similarly delay, defer or discourage a change in control of us or management. These provisions could also discourage a proxy contest and make it more difficult for stockholders to elect directors and take other corporate actions. Such provisions provide for the following, among other things: (i) the ability of our board of directors to issue shares of common stock and preferred stock without stockholder approval, (ii) the ability of our board of directors to establish the rights and preferences of authorized and unissued preferred stock, (iii) a board of

Table of Contents

directors divided into three classes of directors serving staggered three year terms, (iv) permitting only the chairman of the board of directors, chief executive officer, president or board of directors to call a stockholders' meeting and (v) requiring advance notice of stockholder proposals and related information. Furthermore, we have a stockholder rights plan that may have the effect of discouraging unsolicited takeover proposals. The rights issued under the stockholder rights plan could cause significant dilution to a person or group that attempts to acquire us on terms not approved in advance by our board of directors. In addition, if an acquisition event constitutes a fundamental change, holders of the 2019 Notes will have the right to require us to purchase their 2019 Notes in cash. If an acquisition event constitutes a make-whole fundamental change, we may be required to increase the conversion rate for holders who convert their 2019 Notes in connection with such make-whole fundamental change. These provisions could increase the cost of acquiring us or otherwise discourage a third party from acquiring us or removing incumbent management, which may cause the market price of our common stock to decline.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

We do not own or operate the properties in which we have royalty or streaming interests and therefore much of the information disclosed in this Form 10-K regarding these properties is provided to us by the operators. For example, the operators of the various properties provide us information regarding metals production, estimates of mineral reserves and additional mineralized material and production estimates. A list of our producing and development stage royalties and streams, as well their respective reserves, are summarized below in Table 1 within this Item 2. More information is available to the public regarding certain properties in which we have royalties, including reports filed with the SEC or with the Canadian securities regulatory agencies available at www.sec.gov or www.sedar.com, respectively.

The description of our principal royalties and streams set forth below includes the location, operator, royalty rate, access and any material current developments at the property. For any reported production amounts discussed below, the Company considers reported production to relate to the amount of metal sales subject to our royalty interests. Please refer to Item 7, MD&A, for discussion on production estimates, historical production and revenue for our principal properties. The map below illustrates the location of our principal producing and development stage properties.

Principal Royalties on Producing Properties

The Company considers both historical and future potential revenues in determining which royalty interests in our portfolio are principal to our business. Estimated future potential revenues from both producing and development properties are based on a number of factors, including reserves subject to our royalty interests, production estimates, feasibility studies, metal price assumptions, mine life, legal status and other factors and assumptions, any of which could change and could cause the Company to conclude that one or more of such royalty interests are no longer principal to our business. Currently,

Table of Contents

the Company considers the properties discussed below (listed alphabetically) to be principal to our business.

Andacollo (Region IV, Chile)

We own a royalty on all gold produced from the sulfide portion of the Andacollo copper and gold deposit. The Andacollo royalty equals 75% of the gold produced from the sulfide portion of the deposit at the Andacollo mine until 910,000 payable ounces of gold have been sold, and 50% of the gold produced in excess of 910,000 payable ounces of gold. As of June 30, 2014, approximately 217,000 payable ounces of gold have been sold.

Andacollo is an open-pit copper mine and milling operation located in central Chile, Region IV in the Coquimbo Province and is operated by Compañía Minera Teck Carmen de Andacollo ("Teck"). Andacollo is located in the foothills of the Andes Mountains approximately 1.5 miles southwest of the town of Andacollo. The regional capital of La Serena and the coastal city of Coquimbo are approximately 34 miles northwest of the Andacollo project by road, and Santiago is approximately 215 miles south by air. Access to the mine is provided by Route 43 (R-43) south from La Serena to El Peñon. From El Peñon, D-51 is followed east and eventually curves to the south to Andacollo. Both R-43 and D-51 are paved roads.

Reported production at Andacollo decreased approximately 27% during our fiscal year ended June 30, 2014, when compared to the fiscal year ended June 30, 2013. The decrease in reported production is due to lower grades as expected in the mine plan. Teck continues to expect a lower calendar year 2014 grade profile, with gold production for the year at Andacollo anticipated to be weighted toward the second half of calendar 2014.

Table of Contents

Cortez (Nevada, USA)

Cortez is a large open-pit and underground mine, utilizing mill and heap leach processing. The operation is located approximately 60 air miles southwest of Elko, Nevada, in Lander County. The site is reached by driving west from Elko on Interstate 80 approximately 46 miles, and proceeding south on State Highway 306 approximately 23 miles. Our royalty interest at Cortez applies to the Pipeline, South Pipeline, part of the Gap pit and Crossroads deposits which are operated by subsidiaries of Barrick.

The royalty interests we hold at Cortez include:

- (a) *Reserve Claims ("GSR1").* This is a sliding-scale GSR royalty for all products from an area originally known as the "Reserve Claims," which includes the majority of the Pipeline and South Pipeline deposits. The GSR royalty rate on the Reserve Claims is tied to the gold price as shown in the table below and does not include indexing for inflation or deflation.
- (b) *GAS Claims ("GSR2").* This is a sliding-scale GSR royalty for all products from an area outside of the Reserve Claims, originally known as the "GAS Claims," which encompasses approximately 50% of the Gap deposit and all of the Crossroads deposit. The GSR royalty rate on the GAS Claims, as shown in the table below, is tied to the gold price, without indexing for inflation or deflation.
- (c) *Reserve and GAS Claims Fixed Royalty ("GSR3").* The GSR3 royalty is a fixed rate GSR royalty of 0.7125% and covers the same cumulative area as is covered by our two sliding-scale GSR royalties, GSR1 and GSR2, except mining claims that comprise the undeveloped Crossroads deposit.
- (d) *Net Value Royalty ("NVR1").* This is a fixed 1.25% NVR on production from the GAS Claims located on a portion of Cortez that excludes the Pipeline open pit. The Company owns 81.098% of the 1.25% NVR (or 1.014%) while limited partners in the partnership, which is consolidated in our financial statements, own the remaining portion of the 1.25% NVR. A 0.618% portion of our NVR1 royalty covers the mining claims that comprise the undeveloped Crossroads deposit.

We also own three other royalties in the Cortez area where there is currently no production and no reserves attributed to these royalty interests.

The following shows the current sliding-scale GSR1 and GSR2 royalty rates under our royalty agreement with Cortez:

London P.M. Quarterly Average Price of Gold Per Ounce (\$U.S.)	GSR1 and GSR2 Royalty Percentage
Below \$210.00	0.40%
\$210.00 - \$229.99	0.50%
\$230.00 - \$249.99	0.75%
\$250.00 - \$269.99	1.30%
\$270.00 - \$309.99	2.25%
\$310.00 - \$329.99	2.60%
\$330.00 - \$349.99	3.00%
\$350.00 - \$369.99	3.40%
\$370.00 - \$389.99	3.75%
\$390.00 - \$409.99	4.00%
\$410.00 - \$429.99	4.25%
\$430.00 - \$449.99	4.50%
\$450.00 - \$469.99	4.75%
\$470.00 - and above	5.00%

Table of Contents

Reported production at Cortez increased approximately 16% during our fiscal year ended June 30, 2014, when compared to the fiscal year ended June 30, 2013, as surface mining activity at the Pipeline and Gap pits increased during the current period. Additionally, after deferrals in the first half of our fiscal year ended June 30, 2014, Barrick resumed shipments of roaster ore stockpiled at Cortez to Goldstrike for processing, which occurred during the March 2014 quarter.

Holt (Ontario, Canada)

We own a sliding-scale NSR royalty on the Holt portion of the Holloway-Holt mining project located in Ontario, Canada and owned 100% by St Andrew Goldfields Ltd. ("St Andrew"). The Holloway-Holt project straddles Ontario Provincial Highway 101 for approximately 25 miles beginning east of Matheson, Ontario, Canada and extending to the Quebec, Canada border. The sliding-scale NSR royalty rate on gold produced from the Holt portion of the mining project is derived by multiplying 0.00013 by the quarterly average gold price. For example, at a quarterly average gold price of \$1,300 per ounce, the effective royalty rate payable would be 16.9%.

Reported production at Holt increased 12% during our fiscal year ended June 30, 2014, when compared to the fiscal year ended June 30, 2013. Although production at Holt increased, our royalty rate and corresponding revenue decreased due to the decrease in gold price. St Andrew credited additional mine infrastructure and mine development for the operational improvements.

Mt. Milligan (British Columbia, Canada)

RGLD Gold, a wholly-owned subsidiary of the Company, owns the right to purchase 52.25% of the payable gold produced from the Mt. Milligan copper-gold project in British Columbia, Canada, which is operated by Thompson Creek. The cash purchase price is equal to the lesser of \$435 per ounce, with no inflation adjustment, or the prevailing market price. The Mt. Milligan project is located within the Omenica Mining Division in North Central British Columbia, approximately 96 miles northwest of Prince George, 53 miles north of Fort St. James, and 59 miles west of Mackenzie. The Mt. Milligan project is accessible by commercial air carrier to Prince George, British Columbia, then by vehicle from the east via Mackenzie on the Finlay Philip Forest Service Road and the North Philip Forest Service Road, and from the west via Fort St. James on the North Road and Rainbow Forest Service Road. Road travel to the Mt. Milligan property site is 482 miles from Prince Rupert and 158 miles from Prince George.

Thompson Creek reported that the mine reached commercial production, defined as operating the mill at 60% of design capacity for 30 days, on February 18, 2014. The ramp-up at Mt. Milligan continues to progress well with mine pit grades and metal recoveries as expected, and mill throughput steadily improving. Thompson Creek expects mill throughput will achieve 75% to 85% of design capacity by the end of calendar year 2014. In August 2014, Thompson Creek announced that estimated calendar 2014 gold production will be between 185,000 and 195,000 ounces of gold compared to earlier guidance of 165,000 and 175,000 ounces of gold.

Deliveries of gold to RGLD Gold are a product of the gold ounces contained in concentrates from Mt. Milligan, a 97% payable factor, and our 52.25% stream interest; and, for the first 12 concentrate shipments from Mt. Milligan, are based on Thompson Creek's receipt of provisional payments under each of its concentrate sales agreements. For shipments 1-4, 75% of the gold is delivered based upon Thompson Creek's receipt of the provisional payment under each concentrate sales agreement and 25% of the gold ounces are delivered based upon final settlement under each agreement. For shipments 5-8, those percentages are 50% and 50%, respectively, and for shipments 9-12, the percentages are 25% and 75%, respectively. Thereafter, all deliveries to RGLD Gold will be based solely on final settlement timing and volumes under Thompson Creek's concentrate sales agreements.

Table of Contents

Gold deliveries to RGLD Gold can be affected by several factors that make it difficult to calculate our quarterly Mt. Milligan revenue based solely on Thompson Creek's reported quarterly production. These factors include the timing of Thompson Creek's concentrate shipments, and the provisional and final settlement terms applicable to each shipment, neither of which are known to RGLD Gold prior to the shipment date. RGLD Gold receives physical metal within two days after Thompson Creek records a sale, which in turn can take between five days and several weeks post-shipment. RGLD Gold currently sells most of the delivered gold within three weeks of receipt, and recognizes revenue on its streaming transactions when the metal received is sold.

During the fiscal year ended June 30, 2014, RGLD Gold purchased 25,750 ounces of physical gold, which came from a combination of provisional and final settlements associated with the first seven shipments of concentrate from Mt. Milligan. RGLD Gold sold approximately 21,100 ounces of gold during our fiscal year 2014 at an average price of \$1,292 per ounce, and had approximately 7,800 ounces of gold in inventory as of June 30, 2014. Of the approximately 7,800 ounces of gold in inventory as of June 30, 2014, approximately 3,100 ounces were received but not yet purchased from Thompson Creek per the stream agreement. The Company purchased these ounces on July 2, 2014.

Mulatos (Sonora, Mexico)

We own a 1.0% to 5.0% sliding-scale NSR royalty on the Mulatos open-pit mine and heap leach operation in southeastern Sonora, Mexico. The Mulatos mine is located approximately 137 miles east of the city of Hermosillo and 186 miles south of the border with the United States and is operated by a subsidiary of Alamos Gold, Inc. ("Alamos"). Access to the mine from the city of Hermosillo is available via private chartered flight or ground transportation on a paved and gravel road.

The sliding-scale NSR royalty is based on the gold price as shown in the following table:

London Bullion Market Association P.M. Monthly Average Price of Gold per Ounce (US\$)	NSR Royalty Percentage
\$0.00 - \$299.99	1.00%
\$300.00 - \$324.99	1.50%
\$325.00 - \$349.99	2.00%
\$350.00 - \$374.99	3.00%
\$375.00 - \$399.99	4.00%
\$400 or greater	5.00%

The Mulatos royalty is capped at 2.0 million gold ounces of production. As of June 30, 2014, approximately 1.27 million cumulative ounces of gold have been produced.

Reported production at Mulatos decreased approximately 31% during our fiscal year ended June 30, 2014, when compared to the fiscal year ended June 30, 2013. Alamos reported that the decrease in production was primarily attributable to lower than expected grades from the Escondida deposit. Alamos commenced underground mining at Escondida Deep during the March 2014 quarter and expects to transition to San Carlos in the second half of calendar 2014. Underground throughput rates at San Carlos are expected to gradually ramp-up to mill capacity of 800 tonnes per day in the second half of calendar 2014.

Peñasquito (Zacatecas, Mexico)

We own a production payment equivalent to a 2.0% NSR royalty on all metal production from the Peñasquito open-pit mine, located in the State of Zacatecas, Mexico, and operated by a subsidiary of Goldcorp. The Peñasquito project is located approximately 17 miles west of the town of Concepción del Oro, Zacatecas, Mexico. The project, composed of two main deposits called Peñasco and Chile

Table of Contents

Colorado, hosts large gold, silver, zinc and lead reserves. The deposits contain both oxide and sulfide material, resulting in heap leach and mill processing. There are two access routes to the site. The first is via a turnoff from Highway 54 onto the State La Pardita road, then onto the Mazapil to Cedros State road. The second access is via the Salaverna by-pass road from Highway 54 approximately 16 miles south of Concepción del Oro. There is a private airport on site and commercial airports in the cities of Saltillo, Zacatecas and Monterrey.

Reported production for gold at Peñasquito increased approximately 44% during our fiscal year ended June 30, 2014. Reported production for silver, lead and zinc also increased when compared to our fiscal year ended June 30, 2013. Goldcorp reported that it is mining in the higher grade portion of the pit, which it expects will continue throughout calendar 2014 at a projected throughput of 110,000 tonnes per day.

Robinson Mine (Nevada, USA)

We own a 3.0% NSR royalty on all mineral production from the Robinson open-pit mine operated by a subsidiary of KGHM International Ltd. ("KGHM"). Access to the property is via Nevada State Highway 50, 6.5 miles west of Ely, Nevada, in White Pine County.

Reported copper production at Robinson decreased approximately 52% during our fiscal year ended June 30, 2014, when compared to the fiscal year ended June 30, 2013, while reported gold production decreased approximately 44% when compared to the fiscal year ended June 30, 2013. The lower production was due to the planned mine sequence moving to the Kimbley pit, which has lower metal grades. It is expected that mining will return to the higher grade Ruth pit in the second half of calendar 2014.

Voisey's Bay (Labrador, Canada)

Labrador Nickel Royalty Limited Partnership ("LNRLP"), of which the Company is the indirect 90% owner, holds a 3.0% NSR royalty (or an effective 2.7% NSR royalty for the Company interest) on the Voisey's Bay nickel-copper-cobalt mine located in Newfoundland and Labrador, Canada and operated by Vale Newfoundland & Labrador Limited ("Vale"). A non-controlling interest owns the remainder of LNRLP. The Voisey's Bay project is located on the northeast coast of Labrador, on a peninsula bordered to the north by Anaktalak Bay and to the south by Voisey's Bay. The property is 560 miles north-northwest of St. John's, the capital of the Province. Access to the property is primarily by helicopter or small aircraft.

In October 2009, LNRLP stated a claim in the Supreme Court of Newfoundland and Labrador Trial Division against certain subsidiaries of Vale, alleging that Vale has been incorrectly calculating LNRLP's 3% NSR royalty on the sale of nickel and copper concentrates from the Voisey's Bay mine. Vale is commissioning its new Long Harbour Processing Plant with nickel matte from its Indonesian operations and intends to begin introducing nickel concentrates from Voisey's Bay in coming quarters. In anticipation of the transition from processing Voisey's Bay nickel concentrates at Vale's Sudbury and Thompson smelters to processing at the Long Harbour hydrometallurgical plant, the Company is engaged in discussions with Vale concerning calculation of the royalty once Voisey's Bay nickel concentrates are processed at Long Harbour. Vale proposed a calculation of the royalty that the Company estimates could result in the substantial reduction of royalty payable to LNRLP on Voisey's Bay nickel concentrates processed at Long Harbour. While the Company may continue to engage in discussions concerning calculation of the royalty on nickel concentrates processed at Long Harbour, there is no guaranty that the Company and Vale will reach agreement on the proper calculation under the terms of the royalty agreement. If no agreement is reached, the Company intends to vigorously pursue all legal remedies to ensure the appropriate calculation of the royalty and to enforce LNRLP's royalty interests at Voisey's Bay.

Table of Contents

Reported nickel production at Voisey's Bay decreased approximately 14% during our fiscal year ended June 30, 2014 and reported copper production decreased approximately 21% when compared to the fiscal year ended June 30, 2013.

Principal Royalties on Development Stage Properties

The following is a description of our principal royalty interest in the development stage. Reserves for our development stage properties are summarized below in Table 1 as part of this Item 2, Properties.

Pascua-Lama Project (Region III, Chile)

We own a 0.78% to 5.23% sliding-scale NSR royalty on the Pascua-Lama project, which straddles the border between Argentina and Chile, and is being developed by Barrick. The Company owns an additional royalty equivalent to 1.05% of proceeds from copper produced from the Chilean portion of the project, net of allowable deductions, sold on or after January 1, 2017. The Pascua-Lama project is located within 7 miles of Barrick's operating Veladero mine. Access to the project is from the city of Vallenar, Region III, Chile, via secondary roads C-485 to Alto del Carmen, Chile, and C-489 from Alto del Carmen to El Corral, Chile.

Our royalty interest is applicable to all gold production from the portion of the Pascua-Lama project lying on the Chilean side of the border. In addition, our interest at Pascua-Lama contains certain contingent rights and obligations. Specifically, (i) if gold prices exceed \$600 per ounce for any six month period during the first 36 months of commercial production from the project, the Company would make a one-time payment of \$8.4 million, (ii) approximately 20% of the royalty is limited to 14.0 million ounces of gold produced from the project, while 24% of the royalty can be extended beyond 14.0 million ounces of gold produced for a one-time payment of \$4.4 million; and (iii) we also increased our interest in two one-time payments from \$0.5 million to \$1.5 million, which are payable by Barrick upon the achievement of certain production thresholds at Pascua-Lama.

The sliding-scale NSR royalty is based upon the gold price as shown in the following table:

London Bullion Market Association P.M. Monthly Average Price of Gold per Ounce (US\$)	NSR Royalty Percentage
less than \$325	0.78%
\$400	1.57%
\$500	2.72%
\$600	3.56%
\$700	4.39%
\$800 or greater	5.23%

Note: Royalty rate is interpolated between the upper and lower endpoints.

Pascua-Lama is one of the world's largest gold and silver deposits with nearly 18 million ounces of proven and probable gold reserves, 676 million ounces of silver contained within the gold reserves, and an expected mine life of 25 years. It is expected to produce an average of 800,000-850,000 ounces of gold and 35 million ounces of silver annually during its first full five years of operation.

During the fourth quarter of calendar 2013, Barrick announced the temporary suspension of construction at Pascua-Lama, except for activities required for environmental and regulatory compliance. The ramp-down is on schedule for completion by mid-2014 and the majority of demobilization has already occurred. Barrick reports that it will incur costs of about \$300 million during calendar 2014 for the ramp-down and environmental and social obligations.

Table of Contents

According to Barrick, a decision to restart development will depend on improved economics and reduced uncertainty related to legal and regulatory requirements. Accordingly, the timing of any such decision to restart, permitting timelines, construction schedule and timing of first production are uncertain. Once a decision to restart is taken, remaining development will take place in distinct stages with specific work programs and budgets to facilitate more efficient execution and improved cost control.

Table of Contents**Reserve Information**

Table 1 below summarizes proven and probable reserves for gold, silver, copper, nickel, zinc, lead, cobalt and molybdenum that are subject to our royalty interests as of December 31, 2013, as reported to us by the operators of the mines. Properties are currently in production unless noted as development ("DEV") within the table. The exploration royalties we own do not contain proven and probable reserves as of December 31, 2013. Please refer to pages 33-35 for the footnotes to Table 1.

- (1) Reserves have been reported by the operators of record as of December 31, 2013, with the exception of the following properties: Red Dam February 28, 2014; Svetloye January 1, 2014; Gwalia Deeps, King of the Hills, Kundip, South Laverton June 30, 2013; Don Mario June 1, 2013; Schaft Creek and Williams December 31, 2012; Soledad September 6, 2012; Southern Cross June 30, 2012; Pinson May 18, 2012; Tulsequah Chief March 15, 2012; Don Nicolas, Gold Hill, Johnson Camp, Pascua-Lama, Robinson and Wolverine December 31, 2011; Mara Rosa October 28, 2011; Balcooma June 30, 2011; Kutcho Creek February 15, 2011; Pine Cove June 30, 2010; and Caber July 18, 2007.
- (2) Gold reserves were calculated by the operators at the following per ounce prices: \$1,500 Williams; \$1,450 Kundip; A\$1,400 Celtic/Wonder North, South Laverton and Southern Cross; \$1,366 Schaft Creek; \$1,350 El Limon, El Morro, El Toqui and Tulsequah Chief; \$1,310 Soledad; A\$1,310 Red Dam; \$1,300 Canadian Malartic, Dolores, Holt, Leeville, Peñasquito, Pinson, Svetloye, Twin Creeks and Wharf; A\$1,300 Meekatharra (Nannine, Paddy's Flat; Reedys and Yaloginda); \$1,250 Back River, Martha, Mulatos and Taparko; A\$1,250 Gwalia Deeps and King of the Hills; \$1,200 Gold Hill and Pascua-Lama; \$1,100 Andacollo, Bald Mountain, Cortez, Don Mario, Don Nicolas, Goldstrike, Mara Rosa and Ruby Hill; \$1,000 Robinson; \$950 Inata; \$983 Pine Cove; and \$690 Mt. Milligan. No gold price was reported for Balcooma, Caber, Kutcho Creek, Marigold or Wolverine.
- (3) Set forth below are the definitions of proven and probable reserves used by the U.S. Securities and Exchange Commission. "Reserve" is that part of a mineral deposit which could be economically and legally extracted or produced at the time of the reserve determination. "Proven (Measured) Reserves" are reserves for which (a) quantity is computed from dimensions revealed in outcrops, trenches, workings or drill holes, and the grade is computed from the results of detailed sampling, and (b) the sites for inspection, sampling and measurement are spaced so closely and the geologic character is so well defined that the size, shape, depth and mineral content of the reserves are well established.
- "Probable (Indicated) Reserves" are reserves for which the quantity and grade are computed from information similar to that used for proven (measured) reserves, but the sites for inspection, sampling and measurement are farther apart or are otherwise less adequately spaced. The degree of assurance of probable (indicated) reserves, although lower than that for proven (measured) reserves, is high enough to assume geological continuity between points of observation.
- (4) Royal Gold has disclosed a number of reserve estimates that are provided by operators that are foreign issuers and are not based on the U.S. Securities and Exchange Commission's definitions for proven and probable reserves. For Canadian issuers, definitions of "mineral reserve," "proven mineral reserve," and "probable mineral reserve" conform to the Canadian Institute of Mining, Metallurgy and Petroleum definitions of these terms as of the effective date of estimation as required by National Instrument 43-101 of the Canadian Securities Administrators. For Australian issuers, definitions of "mineral reserve," "proven mineral reserve," and "probable mineral reserve" conform with the Australasian Code for Reporting of Mineral Resources and Ore Reserves prepared by the Joint Ore Reserves Committee of the Australasian Institute of Mining and Metallurgy, Australian Institute of Geoscientists and Minerals Council of Australia, as amended ("JORC Code"). Royal Gold does not reconcile the reserve estimates provided by the operators with definitions of reserves used by the U.S. Securities and Exchange Commission.
- (5) The reserves reported are either estimates received from the various operators or are based on documentation provided to Royal Gold or which is derived from recent publicly-available information from the operators of the various properties or various recent National Instrument 43-101 or JORC Code reports filed by operators. Accordingly, Royal Gold is not able to reconcile the reserve estimates prepared in reliance on National Instrument 43-101 or JORC Code with definitions of the U.S. Securities and Exchange Commission.
- (6) "Contained ounces" or "contained pounds" do not take into account recovery losses in mining and processing the ore.
- (7) NSR sliding-scale schedule (price of gold per ounce royalty rate): Below \$375 1.75%; >\$375 to \$400 2.0%; >\$400 to \$425 2.25%; >\$425 2.5%. All price points are stated in 1986 dollars and are subject to adjustment in accordance with a blended index comprised of labor, diesel fuel, industrial commodities and mining machinery.
- (8) GSR sliding-scale schedule (price of gold per ounce royalty rate): Below \$210 0.40%; \$210 to \$229.99 0.50%; \$230 to \$249.99 0.75%; \$250 to \$269.99 1.30%; \$270 to \$309.99 2.25%; \$310 to \$329.99 2.60%; \$330 to \$349.99 3.00%; \$350 to \$369.99 3.40%; \$370 to \$389.99 3.75%; \$390 to

Edgar Filing: ROYAL GOLD INC - Form 10-K

\$409.99 4.0%; \$410 to \$429.99 4.25%; \$430 to \$449.99 4.50%; \$450 to \$469.99 4.75%; \$470 and higher 5.00%.

(9)

NVR1 and GSR3 reserves are subsets of the reserves covered by GSR1 and GSR2.

(10)

The royalty is capped at \$10 million. As of June 30, 2014, royalty payments of approximately \$1.7 million have been received.

(11)

The 1.0% to 2.0% sliding-scale NSR royalty will pay 2.0% when the price of gold is above \$350 per ounce and 1.0% when the price of gold falls to \$350 per ounce or below. The 0.6% to 0.9% NSR sliding-scale schedule (price of gold per ounce royalty rate): Below \$300 0.6%; \$300 to \$350 0.7%; > \$350 to \$400 0.8%; > \$400 0.9%. The silver royalty rate is based on the price of gold.

(12)

The 0.6% to 0.9% sliding-scale NSR applies to the M-ACE claims. The operator did not break out reserves or resources subject to the M-ACE claims royalty.

Edgar Filing: ROYAL GOLD INC - Form 10-K

Table of Contents

- (13) Royalty only applies to Section 29 which currently holds about 95% of the reserves reported for the property. An additional Cordilleran royalty applies to a portion of Section 28.
- (14) Royalty only applies to Section 29 which currently holds about 95% of the reserves reported for the property. Additional Rayrock royalties apply to Sections 28, 32 and 33; these royalty rates vary depending on pre-existing royalties. The Rayrock royalties take effect once 200,000 ounces of gold have been produced from open pit mines on the property. As of June 30, 2014, approximately 103,000 ounces have been produced.
- (15) Royalty is capped at \$300,000 plus simple interest.
- (16) NSR sliding-scale schedule (price of gold per ounce royalty rate): \$0.00 to under \$350 0.0%; \$350 to under \$400 0.5%; \$400 to under \$500 1.0%; \$500 or higher 2.0%.
- (17) George Lake royalty applies to production above 800,000 ounces.
- (18) Goose Lake royalty applies to production above 400,000 ounces.
- (19) NSR sliding-scale schedule (price of gold per ounce royalty rate): \$0.00 to \$350 1.0%; above \$350 1.5%.
- (20) This is a metal stream whereby the purchase price for gold ounces delivered is \$435 per ounce, or the prevailing market price of gold, if lower; no inflation.
- (21) This is a metal stream whereby Royal Gold is entitled to 12.5% of payable gold until 48,000 ounces of payable gold have been delivered; 7.5% thereafter, whereby the purchase price for gold ounces delivered is \$450 per ounce on the first 48,000 ounces of gold; \$500 per ounce thereafter, or the prevailing market price, if lower.
- (22) Gold royalty rate is based on the price of silver per ounce. NSR sliding-scale schedule (price of silver per ounce royalty rate): Below \$5.00 0.0%; \$5.00 to \$7.50 3.778%; >\$7.50 9.445%.
- (23) The Company's royalty is subject to a 2.0 million ounce cap on gold production. There have been approximately 1.27 million ounces of cumulative production as of June 30, 2014. NSR sliding-scale schedule (price of gold per ounce royalty rate): \$0.00 to \$299.99 1.0%; \$300 to \$324.99 1.50%; \$325 to \$349.99 2.0%; \$350 to \$374.99 3.0%; \$375 to \$399.99 4.0%; \$400 or higher 5.0%.
- (24) Operator reports reserves by material type. The sulfide material will be processed by milling. The oxide material will be processed by heap leaching.
- (25) The royalty rate is 75% until 910,000 payable ounces of gold have been produced; 50% thereafter. There have been approximately 217,000 cumulative payable ounces produced as of June 30, 2014. Gold is produced as a by-product of copper.
- (26) The royalty covers approximately 30% of the La Fortuna deposit. Reserves attributable to Royal Gold's royalty represent approximately ³/₇ of Goldcorp's reporting of 70% of the total reserve.
- (27) All metals are paid based on zinc prices. NSR sliding-scale schedule (price of zinc per pound royalty rate): Below \$0.50 0.0%; \$0.50 to below \$0.55 1.0%; \$0.55 to below \$0.60 2.0%; \$0.60 or higher 3.0%.
- (28) Royalty applies to all gold production from an area of interest in Chile. Only that portion of the reserves pertaining to our royalty interest in Chile is reflected here. Approximately 20% of the royalty is limited to the first 14.0 million ounces of gold produced from the project. Also, 24% of the royalty can be extended beyond 14.0 million ounces produced for \$4.4 million. In addition, a one-time payment totaling \$8.4 million will be made if gold prices exceed \$600 per ounce for any six-month period within the first 36 months of commercial production.
- (29) NSR sliding-scale schedule (price of gold per ounce royalty rate): less than or equal to \$325 0.78%; \$400 1.57%; \$500 2.72%; \$600 3.56%; \$700 4.39%; greater than or equal to \$800 5.23%. Royalty is interpolated between lower and upper endpoints.
- (30) Royalty pays 1.0% for the first 250,000 ounces of production and then 1.5% for production above 250,000 ounces.
- (31)

Edgar Filing: ROYAL GOLD INC - Form 10-K

The A\$10 per ounce royalty applies on production above 50,000 ounces.

(32) The 1.5% to 2.5% NSR sliding-scale royalty pays at a rate of 1.5% for the first 75,000 ounces produced in any 12 month period and at a rate of 2.5% on production above 75,000 ounces during that 12 month period. The 1.0% NSR royalty applies to the Rand area only.

(33) There is a 0.75% GSR milling royalty that applies to ore that is mined outside of the defined area of the Taparko-Bouroum project that is processed through the Taparko facilities up to a maximum of 1.1 million tons per year.

(34) Silver reserves were calculated by the operators at the following prices per ounce: \$30.00 Gold Hill; \$25.96 Schaft Creek; \$25.06 Troy; \$25.00 Don Nicolas; \$24.05 Soledad; \$24.00 Peñasquito; \$23.00 El Toqui; \$22.50 Svetloye; \$22.00 Dolores, Peñasquito and Tulsequah Chief; and \$20.00 Don Mario. No silver price was reported for Balcooma, Kutcho Creek or Wolverine.

(35) This is a metal stream whereby Royal Gold is entitled to 22.5% of payable silver until 2.78 million ounces of payable silver have been delivered; 9.75% thereafter, whereby the purchase price for silver ounces delivered is \$5.00 per ounce on the first 2.78 million ounces of silver; \$7.50 per ounce thereafter, or the prevailing market price of the metal, if lower.

(36) Copper reserves were calculated by the operators at the following prices per pound: \$3.64 Voisey's Bay; \$3.52 Schaft Creek; \$3.32 Troy; \$3.10 Tulsequah Chief; \$3.00 El Morro; \$2.75 Don Mario, Robinson and Las Cruces; \$2.50 Johnson Camp; \$2.00 Pascua-Lama; and \$1.60 Mt. Milligan. No copper reserve price was reported for Balcooma, Caber or Kutcho Creek.

(37) Royalty applies to all copper production from an area of interest in Chile. Only that portion of the reserves pertaining to our royalty interest in Chile is reflected here. This royalty will take effect after January 1, 2017.

Table of Contents

- (38) Lead reserve price was calculated by the operators at the following prices per pound: \$1.04 El Toqui; and \$0.90 Peñasquito. No lead reserve price was reported for Balcooma.
- (39) Zinc reserve price was calculated by the operators at the following prices per pound: \$1.13 El Toqui; and \$0.90 Peñasquito. No zinc reserve price was reported for Balcooma, Caber, or Kutcho Creek.
- (40) Nickel reserve price was calculated by the operator at the following price per pound: \$8.38 Voisey's Bay.
- (41) Cobalt reserve price was calculated by the operator at the following price per pound: \$13.75 Voisey's Bay.
- (42) Molybdenum reserve price was calculated by the operator at Schaft Creek at \$15.30 per pound.

ITEM 3. LEGAL PROCEEDINGS

Refer to Note 16 of the notes to consolidated financial statements for a discussion on litigation associated with our Voisey's Bay royalty.

ITEM 4. MINE SAFETY DISCLOSURE

Not applicable.

Table of Contents**PART II****ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES****Market Information and Current Stockholders**

Our common stock is traded on the NASDAQ Global Select Market ("NASDAQ") under the symbol "RGLD" and on the TSX under the symbol "RGL." The following table sets forth, for each of the quarterly periods indicated, the range of high and low sales prices, in U.S. dollars, for our common stock on NASDAQ for each quarter since July 1, 2012.

Fiscal Year:		Sales Prices	
		High	Low
2014	First Quarter (July, Aug., Sept. 2013)	\$ 67.25	\$ 40.45
	Second Quarter (Oct., Nov., Dec. 2013)	\$ 53.76	\$ 42.56
	Third Quarter (Jan., Feb., March 2014)	\$ 72.90	\$ 47.02
	Fourth Quarter (April, May, June 2014)	\$ 76.85	\$ 58.86
2013	First Quarter (July, Aug., Sept. 2012)	\$ 100.71	\$ 71.36
	Second Quarter (Oct., Nov., Dec. 2012)	\$ 100.84	\$ 76.17
	Third Quarter (Jan., Feb., March 2013)	\$ 83.44	\$ 62.67
	Fourth Quarter (April, May, June 2013)	\$ 71.33	\$ 38.63

As of July 28, 2014, there were 986 stockholders of record of our common stock.

Dividends

We have paid a cash dividend on our common stock for each year beginning in calendar year 2000. Our board of directors has discretion in determining whether to declare a dividend based on a number of factors including prevailing gold prices, economic market conditions and funding requirements for future opportunities or operations.

For calendar year 2014, our annual dividend is \$0.84 per share of common stock and exchangeable shares. We paid the first payment of \$0.21 per share on January 17, 2014, to common stockholders and the holders of exchangeable shares of record at the close of business on January 3, 2014. We paid the second payment of \$0.21 per share on April 18, 2014, to common stockholders and the holders of exchangeable shares of record at the close of business on April 4, 2014. We paid the third payment of \$0.21 per share on July 18, 2014 to common stockholders and holders of exchangeable shares of record at the close of business on July 3, 2014. Subject to board approval, we anticipate paying the fourth payment of \$0.21 per share on October 17, 2014, to common shareholders and holders of exchangeable shares of record at the close of business on October 3, 2014.

For calendar year 2013, our annual dividend was \$0.80 per share of common stock and exchangeable shares, paid on a quarterly basis of \$0.20 per share. For calendar year 2012, we paid an annual dividend of \$0.60 per share of common stock and exchangeable shares in four quarterly payments of \$0.15 each.

(1) Please refer to Item 7, MD&A, of this report for a discussion of recent developments that contributed to our 18% decrease in revenue during fiscal year 2014 when compared to fiscal year 2013 and the 10% increase in revenue during fiscal year 2013 when compared to fiscal year 2012.

(2) The 2014, 2013, 2012, 2011 and 2010 calendar year dividends were \$0.84, \$0.80, \$0.60, \$0.44 and \$0.36, respectively, as approved by our board of directors. Please refer to Item 5 of this report for further information on our dividends.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**Overview**

Royal Gold, Inc. ("Royal Gold", the "Company", "we", "us", or "our"), together with its subsidiaries, is engaged in the business of acquiring and managing precious metals royalties, metal streams, and similar interests. Royalties are non-operating interests in mining projects that provide the right to revenue or metals produced from the project after deducting specified costs, if any. A metal stream is a purchase agreement that provides, in exchange for an upfront deposit payment, the right to purchase all or a portion of one or more metals produced from a mine, at a price determined for the life of the transaction by the purchase agreement. We may use the term "royalty interest" in this Annual Report on Form 10-K to refer to royalties, gold, silver or other metal stream interests, and other similar interests. We seek to acquire existing royalty interests or to finance projects that are in production or in the development stage in exchange for royalty interests. In the ordinary course of business, we engage in a continual review of opportunities to acquire existing royalty interests, to create new royalty interests through the financing of mine development or exploration, or to acquire companies that hold royalty interests. We currently, and generally at any time, have acquisition opportunities in various stages of active review, including, for example, our engagement of consultants and advisors to analyze particular opportunities, analysis of technical, financial and other confidential

Table of Contents

information, submission of indications of interest, participation in preliminary discussions and negotiations and involvement as a bidder in competitive processes.

As of June 30, 2014, the Company owned royalty interests on 37 producing properties, 23 development stage properties and 141 exploration stage properties, of which the Company considers 46 to be evaluation stage projects. The Company uses "evaluation stage" to describe exploration stage properties that contain mineralized material and on which operators are engaged in the search for reserves. We do not conduct mining operations nor are we required to contribute to capital costs, exploration costs, environmental costs or other mining, processing and operating costs on the properties in which we hold royalty interests. During the fiscal year ended June 30, 2014, we focused on the management of our existing royalty interests and the acquisition of royalty interests.

Our financial results are primarily tied to the price of gold and, to a lesser extent, the price of silver, copper and nickel, together with the amounts of production from our producing stage royalty interests. The price of gold, silver, copper, nickel and other metals have fluctuated widely in recent years and most recently have experienced declines from highs experienced in the first half of our fiscal year 2013. The marketability and the price of metals are influenced by numerous factors beyond the control of the Company and significant declines in the price of gold, silver, copper or nickel could have a material and adverse effect on the Company's results of operations and financial condition.

For the fiscal years ended June 30, 2014, 2013 and 2012, gold, silver, copper and nickel price averages and percentage of revenue by metal were as follows:

Metal	Fiscal Year Ended					
	June 30, 2014		June 30, 2013		June 30, 2012	
	Average Price	Percentage of Revenue	Average Price	Percentage of Revenue	Average Price	Percentage of Revenue
Gold (\$/ounce)	\$ 1,296	72%	\$ 1,605	70%	\$ 1,673	68%
Silver (\$/ounce)	\$ 20.57	6%	\$ 28.97	7%	\$ 33.26	7%
Copper (\$/pound)	\$ 3.18	8%	\$ 3.48	11%	\$ 3.71	11%
Nickel (\$/pound)	\$ 6.89	8%	\$ 7.44	8%	\$ 8.77	11%

Operators' Production Estimates by Royalty for Calendar Year 2014

We received annual production estimates from many of the operators of our producing mines during the first calendar quarter of 2014. The following table shows such production estimates for our principal producing properties for calendar 2014 as well as the actual production reported to us by the various operators through June 30, 2014. The estimates and production reports are prepared by the operators of the mining properties. We do not participate in the preparation or calculation of the operators' estimates or production reports and have not independently assessed or verified the accuracy of such information. Please refer to Part I, Item 2, Properties, of this report for further discussion on any updates at our principal producing and development properties.

Table of Contents

**Operators' Production Estimate by Royalty for Calendar Year 2014 and Reported Production
Principal Producing Properties
For the period January 1, 2014 through June 30, 2014**

Royalty/Stream	Calendar 2014 Operator's Production Estimate ⁽¹⁾			Reported Production through June 30, 2014 ⁽²⁾		
	Gold (oz.)	Silver (oz.)	Base Metals (lbs.)	Gold (oz.)	Silver (oz.)	Base Metals (lbs.)
Andacollo ⁽³⁾	38,500			20,500		
Canadian Malartic	344,000			214,900		
Cortez GSR1	125,000			21,000		
Cortez GSR2	151,000			60,400		
Cortez GSR3	276,000			81,400		
Cortez NVR1	228,000			69,400		
Holt	66,000			33,200		
Las Cruces						
<i>Copper</i>			152 - 159 million			82.7million
	185,000 -					
Mt. Milligan ⁽³⁾	195,000			75,300		
	150,000 -					
Mulatos	170,000			68,000		
	530,000 -	22 -				
Peñasquito	560,000	25 million		286,900	14.9million	
			135 -			
<i>Lead</i> ⁽³⁾			145 million			88.6million
			315 -			
<i>Zinc</i> ⁽³⁾			325 million			167.1million
Robinson ⁽³⁾⁽⁴⁾	N/A	N/A		9,700		
<i>Copper</i>			N/A			29.8million
Voisey's Bay ⁽³⁾⁽⁴⁾						
<i>Copper</i>			N/A			19.4million
<i>Nickel</i> ⁽⁵⁾			N/A			66.8million

- (1) There can be no assurance that production estimates received from our operators will be achieved. Please refer to our cautionary language regarding forward-looking statements following this MD&A, as well as the Risk Factors identified in Part I, Item 1A, of this report for information regarding factors that could affect actual results.
- (2) Reported production relates to the amount of metal sales, subject to our royalty interests, for the period January 1, 2014 through June 30, 2014, as reported to us by the operators of the mines. For our streaming interest at Mt. Milligan, reported production represents payable gold shipped, subject to our stream interest, during the January 1, 2014 through June 30, 2014 period.
- (3) Payable metal and deliveries are subject to shipping and settlement schedules.
- (4) The operator did not release public production guidance for calendar 2014.
- (5) Vale is commissioning its new Long Harbour Processing Plant and intends to begin introducing nickel concentrates from Voisey's Bay in coming quarters. In anticipation of the transition from processing Voisey's Bay nickel concentrates at Vale's Sudbury and Thompson smelters to processing at the Long Harbour hydrometallurgical plant, the Company is engaged in discussions with Vale concerning calculation of the royalty once Voisey's Bay nickel concentrates are processed at Long Harbour. Vale proposed a calculation of the royalty that the Company estimates could result in the substantial reduction of royalty payable to LNRLP on Voisey's Bay nickel concentrates processed at Long Harbour. Please see "Principal Royalties on Producing Properties Voisey's Bay (Labrador, Canada)" in Part I, Item 2, for further information.

Table of Contents**Historical Production**

The following table discloses historical production for the past three fiscal years for the principal producing properties that are subject to our royalty interests, as reported to us by the operators of the mines:

**Historical Production⁽¹⁾ by Property
Principal Producing Properties
For the Fiscal Years Ended June 30, 2014, 2013 and 2012**

Property	Metal	2014	2013	2012
Andacollo	Gold	50,400 oz.	68,600 oz.	51,400 oz.
Canadian Malartic	Gold	417,800 oz.	347,000 oz.	297,500 oz.
Cortez GSR1	Gold	7,600 oz.	81,200 oz.	115,900 oz.
Cortez GSR2	Gold	87,800 oz.	900 oz.	800 oz.
Cortez GSR3	Gold	95,400 oz.	82,100 oz.	116,700 oz.
Cortez NVR1	Gold	84,400 oz.	60,400 oz.	82,000 oz.
Holt	Gold	63,100 oz.	56,400 oz.	41,200 oz.
Las Cruces	Copper	161.2 Mlbs.	153.4 Mlbs.	119.1 Mlbs.
Mt. Milligan	Gold	80,800 oz.	N/A	N/A
Mulatos	Gold	149,800 oz.	218,000 oz.	169,300 oz.
Peñasquito	Gold	534,200 oz.	371,100 oz.	294,500 oz.
	Silver	27.7 Moz.	21.1 Moz.	21.5 Moz.
	Lead	175.5 Mlbs.	126.3 Mlbs.	164.0 Mlbs.
	Zinc	310.9 Mlbs.	282.3 Mlbs.	312.6 Mlbs.
Robinson	Gold	27,600 oz.	49,100 oz.	31,000 oz.
	Copper	69.6 Mlbs.	146.2 Mlbs.	105.3 Mlbs.
Voisey's Bay	Nickel	123.7 Mlbs.	143.9 Mlbs.	131.6 Mlbs.
	Copper	80.5 Mlbs.	101.9 Mlbs.	107.2 Mlbs.

(1) Historical production relates to the amount of metal sales, subject to our royalty interests for each fiscal year presented, as reported to us by the operators of the mines.

Critical Accounting Policies

Listed below are the accounting policies that the Company believes are critical to its financial statements due to the degree of uncertainty regarding the estimates or assumptions involved and the magnitude of the asset, liability, revenue or expense being reported. Please refer to Note 2 of the notes to consolidated financial statements for a discussion on recently issued accounting pronouncements.

Use of Estimates

The preparation of our financial statements, in conformity with accounting principles generally accepted in the United States of America, requires management to make estimates and assumptions. These estimates and assumptions affect the reported amounts of assets and liabilities, at the date of the financial statements, as well as the reported amounts of revenues and expenses during the reporting period.

Our most critical accounting estimates relate to our assumptions regarding future gold, silver, nickel, copper and other metal prices and the estimates of reserves, production and recoveries of third-party mine operators. We rely on reserve estimates reported by the operators on the properties in which we have royalty interests. These estimates and the underlying assumptions affect the potential impairments of long-lived assets and the ability to realize income tax benefits associated with deferred

Table of Contents

tax assets. These estimates and assumptions also affect the rate at which we recognize revenue or charge depreciation, depletion and amortization to earnings. On an ongoing basis, management evaluates these estimates and assumptions; however, actual amounts could differ from these estimates and assumptions. Differences between estimates and actual amounts are adjusted and recorded in the period that the actual amounts are known.

Royalty and Stream Interests

Royalty and stream interests include acquired royalty and stream interests in production, development and exploration stage properties. The costs of acquired royalty and stream interests are capitalized as tangible assets as such interests do not meet the definition of a financial asset under the Accounting Standards Codification ("ASC") guidance.

Acquisition costs of production stage royalty and stream interests are depleted using the units of production method over the life of the mineral property (as royalty payments are recognized or sales occur under stream interests), which are estimated using proven and probable reserves as provided by the operator. Acquisition costs of royalty and stream interests on development stage mineral properties, which are not yet in production, are not amortized until the property begins production. Acquisition costs of royalty interests on exploration stage mineral properties, where there are no proven and probable reserves, are not amortized. At such time as the associated exploration stage mineral interests are converted to proven and probable reserves, the cost basis is amortized over the remaining life of the mineral property, using proven and probable reserves. The carrying values of exploration stage mineral interests are evaluated for impairment at such time as information becomes available indicating that the production will not occur in the future. Exploration costs are expensed when incurred.

Asset Impairment

We evaluate long-lived assets for impairment whenever events or changes in circumstances indicate that the related carrying amounts of an asset or group of assets may not be recoverable. The recoverability of the carrying value of royalty interests in production and development stage mineral properties is evaluated based upon estimated future undiscounted net cash flows from each royalty interest property using estimates of proven and probable reserves and other relevant information received from the operators. We evaluate the recoverability of the carrying value of royalty interests in exploration stage mineral properties in the event of significant decreases in the price of gold, silver, copper, nickel and other metals, and whenever new information regarding the mineral properties is obtained from the operator indicating that production will not likely occur or may be reduced in the future, thus affecting the future recoverability of our royalty interests. Impairments in the carrying value of each property are measured and recorded to the extent that the carrying value in each property exceeds its estimated fair value, which is generally calculated using estimated future discounted cash flows.

Our estimates of gold, silver, copper, nickel and other metal prices, operator's estimates of proven and probable reserves related to our royalty or streaming properties, and operator's estimates of operating, capital and reclamation costs are subject to certain risks and uncertainties which may affect the recoverability of our investment in these royalty interests in mineral properties. Although we have made our best assessment of these factors based on current market conditions, it is possible that changes could occur, which could adversely affect the net cash flows expected to be generated from these royalty interests.

Available-for-Sale Securities

Investments in securities that management does not have the intent to sell in the near term and that have readily determinable fair values are classified as available-for-sale securities. Unrealized gains

Table of Contents

and losses on these investments are recorded in accumulated other comprehensive income as a separate component of stockholders' equity, except that declines in market value judged to be other than temporary are recognized in determining net income. When investments are sold, the realized gains and losses on these investments, determined using the specific identification method, are included in determining net income.

The Company's policy for determining whether declines in fair value of available-for-sale securities are other than temporary includes a quarterly analysis of the investments and a review by management of all investments for which the cost exceeds the fair value. Any temporary declines in fair value are recorded as a charge to other comprehensive income. This evaluation considers a number of factors including, but not limited to, the length of time and extent to which the fair value has been less than cost, the financial condition and near term prospects of the issuer, and management's ability and intent to hold the securities until fair value recovers. If such impairment is determined by the Company to be other-than-temporary, the investment's cost basis is written down to fair value and recorded in net income during the period the Company determines such impairment to be other-than-temporary. The new cost basis is not changed for subsequent recoveries in fair value. Please refer to Note 5 of our notes to consolidated financial statements for further information on our available-for-sale securities.

Revenue

Revenue is recognized pursuant to guidance in ASC 605 and based upon amounts contractually due pursuant to the underlying royalty or streaming agreement. Specifically, revenue is recognized in accordance with the terms of the underlying royalty or stream agreements subject to (i) the pervasive evidence of the existence of the arrangements; (ii) the risks and rewards having been transferred; (iii) the royalty or stream being fixed or determinable; and (iv) the collectability being reasonably assured. For royalty payments received in-kind, revenue is recorded at the average spot price of gold for the period in which the royalty was earned. For our streaming agreements, we sell most of the delivered gold within three weeks of receipt and recognize revenue when the metal received is sold.

Gold Sales

Gold received under our metal streaming agreements is sold primarily in the spot market or using average rate gold forward contracts. For our gold sold in the spot market, the sales price is fixed at the delivery date based on the gold spot price, while the sales price for our gold sold in average rate gold forward contracts is determined by the average gold price under the term of the contract, typically 15 consecutive trading days shortly after the receipt and purchase of the gold. Revenue from gold sales is recognized on the date of the settlement, which is also the date that title to the gold passes to the purchaser.

Cost of Sales

Cost of sales is specific to our streaming agreement for Mt. Milligan and is the result of the Company's purchases of gold for a cash payment of the lesser of \$435 per ounce, or the prevailing market price of gold when purchased.

Income Taxes

The Company accounts for income taxes in accordance with the guidance of Accounting Standards Codification Topic 740. The Company's annual tax rate is based on income, statutory tax rates in effect and tax planning opportunities available to us in the various jurisdictions in which the Company operates. Significant judgment is required in determining the annual tax expense, current tax assets and liabilities, deferred tax assets and liabilities, and our future taxable income, both as a whole and in various tax jurisdictions, for purposes of assessing our ability to realize future benefit from our deferred

Table of Contents

tax assets. Actual income taxes could vary from these estimates due to future changes in income tax law, significant changes in the jurisdictions in which we operate or unpredicted results from the final determination of each year's liability by taxing authorities.

The Company's deferred income taxes reflect the impact of temporary differences between the reported amounts of assets and liabilities for financial reporting purposes and such amounts measured by tax laws and regulations. In evaluating the realizability of the deferred tax assets, management considers both positive and negative evidence that may exist, such as earnings history, reversal of taxable temporary differences, forecasted operating earnings and available tax planning strategies in each tax jurisdiction. A valuation allowance may be established to reduce our deferred tax assets to the amount that is considered more likely than not to be realized through the generation of future taxable income and other tax planning strategies.

The Company has asserted the indefinite reinvestment of certain foreign subsidiary earnings as determined by management's judgment about and intentions concerning the future operations of the Company. As a result, the Company does not record a U.S. deferred tax liability for the excess of the book basis over the tax basis of its investments in foreign corporations to the extent that the basis difference results from earnings that meet the indefinite reversal criteria. Refer to Note 12 of our notes to consolidated financial statements for further discussion on our assertion.

The Company's operations may involve dealing with uncertainties and judgments in the application of complex tax regulations in multiple jurisdictions. The final taxes paid are dependent upon many factors, including negotiations with taxing authorities in various jurisdictions and resolution of disputes arising from federal, state, and international tax audits. The Company recognizes potential liabilities and records tax liabilities for anticipated tax audit issues in the United States and other tax jurisdictions based on its estimate of whether, and the extent to which, additional taxes will be due. The Company adjusts these reserves in light of changing facts and circumstances, such as the progress of a tax audit; however, due to the complexity of some of these uncertainties, the ultimate resolution could result in a payment that is materially different from our current estimate of the tax liabilities. These differences will be reflected as increases or decreases to income tax expense in the period which they are determined. The Company recognizes interest and penalties, if any, related to unrecognized tax benefits in income tax expense.

Liquidity and Capital Resources

Overview

At June 30, 2014, we had current assets of \$736.0 million compared to current liabilities of \$22.5 million for a current ratio of 33 to 1. This compares to current assets of \$744.5 million and current liabilities of \$35.1 million at June 30, 2013, resulting in a current ratio of approximately 21 to 1. The increase in our current ratio was primarily attributable to a decrease in the amount of foreign withholding taxes payable on certain of our foreign royalty interests. This decrease in foreign withholding taxes was partially offset by a decrease in our cash and equivalents and royalty receivables during the period. Please refer to "Summary of Cash Flows" below for further discussion on changes to our cash and equivalents during the period.

During the fiscal year ended June 30, 2014, liquidity needs were met from \$237.2 million in revenue and our available cash resources. As of June 30, 2014, the Company had \$450 million available and no amounts outstanding under its revolving credit facility. The Company was in compliance with each financial covenant under its revolving credit facility as of June 30, 2014. Refer to Note 6 of our notes to consolidated financial statements and below ("Recent Liquidity and Capital Resource Developments") for further discussion on our long-term debt.

Table of Contents

We believe that our current financial resources and funds generated from operations will be adequate to cover anticipated expenditures for debt service, general and administrative expense costs and capital expenditures for the foreseeable future. Our current financial resources are also available to fund dividends and for acquisitions of royalty and stream interests, including the remaining commitments incurred in connection with the Phoenix Gold Project and Tulsequah Chief stream acquisitions. Our long-term capital requirements are primarily affected by our ongoing acquisition activities. The Company currently, and generally at any time, has acquisition opportunities in various stages of active review. In the event of one or more substantial royalty interest or other acquisitions, we may seek additional debt or equity financing as necessary.

Please refer to our risk factors included in Part I, Item 1A of this report for a discussion of certain risks that may impact the Company's liquidity and capital resources.

Recent Liquidity and Capital Resource Developments

Amendment to Revolving Credit Facility

On January 29, 2014, Royal Gold entered into a Sixth Amended and Restated Revolving Credit Agreement (the "revolving credit facility") among Royal Gold, as the borrower, certain subsidiaries of Royal Gold, as guarantors, HSBC Bank USA, National Association, as administrative agent and a lender, The Bank of Nova Scotia, Goldman Sachs Bank USA, Bank of America, N.A., and Canadian Imperial Bank of Commerce and such other banks and financial institutions from time to time party thereto, as lenders, HSBC Securities (USA) Inc., as the sole lead arranger and joint bookrunner, and Scotiabank, as syndication agent and joint bookrunner. The revolving credit facility replaces Royal Gold's \$350 million revolving credit facility under the Fifth Amended and Restated Revolving Credit Agreement, dated as of May 30, 2012.

Key modifications to the revolving credit facility include, among other items: (1) an increase in the maximum availability from \$350 million to \$450 million; (2) an extension of the final maturity from May 2017 to January 2019; (3) an increase of the accordion feature from \$50 million to \$150 million which allows the Company to increase availability under the revolving credit facility at its option, subject to satisfaction of certain conditions, to \$600 million; (4) a reduction in the commitment fee from 0.375% to 0.25%; (5) a reduction in the drawn interest rate from LIBOR + 1.75% to LIBOR + 1.25%; (6) removal of the secured debt ratio covenant, and (7) maintaining the leverage ratio (as defined therein) less than or equal to 3.5 to 1.0, with an increase to 4.0 to 1.0 for the two quarters following the completion of a material permitted acquisition, as defined in the revolving credit facility.

Dividend Increase

On November 20, 2013, we announced an increase in our annual dividend for calendar 2014 from \$0.80 to \$0.84, payable on a quarterly basis of \$0.21 per share. The newly declared dividend is 5% higher than the dividend paid during calendar 2013. Royal Gold has steadily increased its annual dividend since calendar 2001. The quarterly dividend of US\$0.21 is also payable to holders of exchangeable shares of RG Exchangeco Inc. ("RG Exchangeco").

Summary of Cash Flows

Operating Activities

Net cash provided by operating activities totaled \$147.2 million for the fiscal year ended June 30, 2014, compared to \$172.6 million for the fiscal year ended June 30, 2013. The decrease was primarily due to a decrease in proceeds received from our royalty interests, net of production taxes, of

Table of Contents

approximately \$58.1 million. This decrease was partially offset by a decrease in income and other foreign withholding tax payments of \$15.9 million.

Net cash provided by operating activities totaled \$172.6 million for the fiscal year ended June 30, 2013, compared to \$162.2 million for the fiscal year ended June 30, 2012. The increase was primarily due to an increase in proceeds received from our royalty interests, net of production taxes, of approximately \$14.8 million. The increase was partially offset by an increase in interest payments made of approximately \$5.9 million.

Investing Activities

Net cash used in investing activities totaled \$84.8 million for the fiscal year ended June 30, 2014, compared to \$309.4 million for the fiscal year ended June 30, 2013. The decrease in cash used in investing activities is primarily due to a decrease in funding for the Mt. Milligan streaming interest compared to the prior fiscal year. This decrease was offset by the Company's acquisition of the Phoenix Gold Project gold stream and El Morro royalty of approximately \$30.6 million and \$35 million, respectively, in the current fiscal year. The Company made its final commitment payment to Thompson Creek as part of the Mt. Milligan gold stream acquisition during the quarter ended September 30, 2013.

Net cash used in investing activities totaled \$309.4 million for the fiscal year ended June 30, 2013, compared to \$271.4 million for the fiscal year ended June 30, 2012. The increase in cash used in investing activities is primarily due to an increase in acquisitions of royalty interests in mineral properties (primarily Mt. Milligan funding) compared to our fiscal year 2012.

Financing Activities

Net cash used in financing activities totaled \$66.9 million for the fiscal year ended June 30, 2014, compared to cash provided by financing activities of \$425.4 million for the fiscal year ended June 30, 2013. The decrease in cash provided by financing activities is primarily due to the sale of 5,250,000 shares of our common stock, resulting in proceeds of \$472.5 million, during the prior fiscal year. This decrease is also due to an increase in the common stock dividend payment, which was the result of an increase in the dividend rate and an increase in the total number of common shares outstanding when compared to the prior fiscal year.

Net cash provided by financing activities totaled \$425.4 million for the fiscal year ended June 30, 2013, compared to cash provided by financing activities of \$370.5 million for the fiscal year ended June 30, 2012. The increase is primarily attributable to proceeds received (\$472.5 million) from our October 2012 equity offering compared to proceeds received (\$370.0 million) from our June 2012 offering of the 2019 Notes. During the fiscal year ended June 30, 2013 and 2012, the Company made debt repayments of \$0 and \$326.1 million, respectively, and paid common stock dividends of \$43.9 million and \$29.5 million, respectively.

Table of Contents**Contractual Obligations**

Our contractual obligations as of June 30, 2014, are as follows:

Contractual Obligations	Total	Payments Due by Period (in thousands)			More than 5 Years
		Less than 1 Year	1 - 3 Years	3 - 5 Years	
2019 Notes ⁽¹⁾	\$ 423,187	\$ 10,637	\$ 21,275	\$ 391,275	\$
Total	\$ 423,187	\$ 10,637	\$ 21,275	\$ 391,275	\$

(1) Amounts represent principal (\$370 million) and estimated interest payments (\$53.2 million) assuming no early extinguishment.

For information on our contractual obligations, see Note 6 of the notes to consolidated financial statements under Part II, Item 8, "Financial Statements and Supplementary Data" of this report. The above table does not include royalty or stream commitments as discussed in Note 16 of the notes to consolidated financial statements. The Company believes it will be able to fund all existing obligations from net cash provided by operating activities.

Off-Balance Sheet Arrangements

We do not have any off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that are material to investors.

Results of Operations*Fiscal Year Ended June 30, 2014, Compared with Fiscal Year Ended June 30, 2013*

For the fiscal year ended June 30, 2014, we recorded net income available to Royal Gold common stockholders of \$62.6 million, or \$0.96 per basic share and diluted share, compared to net income available to Royal Gold common stockholders of \$69.2 million, or \$1.09 per basic share and diluted share, for the fiscal year ended June 30, 2013. The decrease in our earnings per share was primarily attributable to a decrease in revenue and an increase in certain costs and expenses, as discussed further below.

For the fiscal year ended June 30, 2014, we recognized total revenue of \$237.2 million, at an average gold price of \$1,296 per ounce, an average silver price of \$20.57 per ounce, an average nickel price of \$6.89 per pound and an average copper price of \$3.18 per pound, compared to total revenue of \$289.2 million, at an average gold price of \$1,605 per ounce, an average silver price of \$28.97 per ounce, an average nickel price of \$7.44 per pound and an average copper price of \$3.48 per pound, for the fiscal year ended June 30, 2013. Revenue and the corresponding production, attributable to our

Table of Contents

royalty and stream interests, for the fiscal year ended June 30, 2014 compared to the fiscal year ended June 30, 2013 is as follows:

Revenue and Reported Production Subject to our Royalty and Stream Interests
Fiscal Years Ended June 30, 2014 and 2013
(In thousands, except reported production in ozs. and lbs.)

Royalty/Stream	Metal(s)	Fiscal Year Ended June 30, 2014		Fiscal Year Ended June 30, 2013	
		Revenue	Reported Production ⁽¹⁾	Revenue	Reported Production ⁽¹⁾
Royalty:					
Andacollo	Gold	\$ 48,777	50,400 oz.	\$ 82,272	68,600 oz.

Other ⁽²⁾	Various	\$ 53,518	N/A	\$ 69,327	N/A
Stream:					
Mt. Milligan ⁽³⁾	Gold	\$ 27,209	80,800 oz.	\$	N/A
Total Revenue		\$ 237,162		\$ 289,224	

(1) Reported production relates to the amount of metal sales, subject to our royalty interests, for the twelve months ended June 30, 2014 and June 30, 2013, as reported to us by the operators of the mines.

(2) Individually, no royalty included within the "Other" category contributed greater than 5% of our total revenue for either period.

(3) For our streaming interest at Mt. Milligan, our revenue is a product of the reported production, our 52.25% stream interest, an applicable provisional percentage (for the first 12 shipments only) and an average gold sale price of \$1,292 per ounce. During the fiscal year 2014, the Company sold approximately 21,100 ounces and had approximately 7,800 ounces of gold in inventory as of June 30, 2014.

The decrease in total revenue for the fiscal year ended June 30, 2014, compared with the fiscal year ended June 30, 2013, resulted primarily from a decrease in the average gold, silver, copper and nickel prices and decreases in production primarily at Andacollo, Voisey's Bay, Mulatos, and Robinson. These decreases during the current period were partially offset by new production at Mt. Milligan and

Edgar Filing: ROYAL GOLD INC - Form 10-K

Table of Contents

production increases at Peñasquito. Refer to Part I, Item 2, Properties, for discussion and any updates on our principal producing properties.

Cost of sales were approximately \$9.2 million for the fiscal year ended June 30, 2014, compared to zero for the fiscal year ended June 30, 2013. Cost of sales for our fiscal year 2014 is specific to our streaming agreement for Mt. Milligan, which began production during the current period, and is the result of the Company's purchases of gold for a cash payment of the lesser of \$435 per ounce, or the prevailing market price of gold when purchased.

General and administrative expenses decreased to \$21.2 million for the fiscal year ended June 30, 2014, from \$24.0 million for the fiscal year ended June 30, 2013. The decrease was primarily due to a decrease in non-cash stock based compensation expense of approximately \$3.1 million as a result of management's change in estimate for the number of performance shares that are expected to vest in future periods.

Production taxes decreased to \$6.8 million for the fiscal year ended June 30, 2014, from \$9.0 million for the fiscal year ended June 30, 2013. The decrease is primarily due to a decrease in the mining proceeds tax expense associated with our Voisey's Bay royalty, which was due to decreased revenue from the Voisey's Bay royalty during the current period.

Depreciation, depletion and amortization expense increased to \$91.3 million for the fiscal year ended June 30, 2014, from \$85.0 million for the fiscal year ended June 30, 2013. The increase was primarily attributable to new production at Mt. Milligan and a production increase at Peñasquito, which resulted in additional depletion expense of approximately \$9.8 million during the period. The increase was also attributable to an increase in depletion rates at certain of our non-principal properties, which resulted in additional depletion of approximately \$7.6 million. These increases were partially offset by decreases in production primarily at Andacollo, Voisey's Bay, Mulatos and Robinson, which resulted in a decrease in depletion expense of approximately \$10.8 million during the period.

During the fiscal years ended June 30, 2014 and 2013, the Company recognized losses of \$4.5 million and \$12.1 million on available-for-sale securities, respectively, related to other-than-temporary impairments on its investment in Seabridge common stock. The effect of the recognized loss, net of any tax, during the fiscal years ended June 30, 2014 and 2013, was \$0.07 and \$0.23 per basic share, respectively. Refer to Note 5 of the notes to consolidated financial statements in this Annual Report on Form 10-K for further discussion on the other-than-temporary impairment loss.

During the fiscal year ended June 30, 2014, we recognized income tax expense totaling \$19.5 million compared with \$63.8 million during the fiscal year ended June 30, 2013. This resulted in an effective tax rate of 23.5% during the current period, compared with 46.5% in the prior period. The decrease in the effective tax rate for the fiscal year ended June 30, 2014, is primarily attributable to (i) a favorable tax rate associated with certain operations in lower tax jurisdictions, (ii) a decrease in tax expense resulting from a reduction in uncertain tax positions, (iii) an increase in foreign tax credits claimed, and (iv) a reduction of the tax effect on the recognized loss on available-for-sale securities when compared to the prior period.

Fiscal Year Ended June 30, 2013, Compared with Fiscal Year Ended June 30, 2012

For the fiscal year ended June 30, 2013, we recorded net income available to Royal Gold common stockholders of \$69.2 million, or \$1.09 per basic share and diluted share, compared to net income available to Royal Gold common stockholders of \$92.5 million, or \$1.61 per basic share and diluted share, for the fiscal year ended June 30, 2012. The decrease in our net income available to Royal Gold common stockholders and earnings per share were primarily attributable to an other-than-temporary impairment loss recognized on our available-for-sale securities, an increase in general and administrative expense, an increase in depletion expense, and an increase in interest expense associated

Edgar Filing: ROYAL GOLD INC - Form 10-K

Table of Contents

with our 2019 Notes, each of which are discussed below. The decrease in our earnings per share was also attributable to the issuance of 5.25 million shares of common stock in October 2012 as part of a registered offering. The forgoing factors were partially offset by an increase in royalty revenue during the period, which is discussed below.

For the fiscal year ended June 30, 2013, we recognized total revenue of \$289.2 million, at an average gold price of \$1,605 per ounce, an average silver price of \$28.97 per ounce, an average nickel price of \$7.44 per pound and an average copper price of \$3.48 per pound, compared to total royalty revenue of \$263.1 million, at an average gold price of \$1,673 per ounce, an average silver price of \$33.26 per ounce, an average nickel price of \$8.77 per pound and an average copper price of \$3.71 per pound, for the fiscal year ended June 30, 2012. Revenue and the corresponding production, attributable to our royalty interests, for the fiscal year ended June 30, 2013 compared to the fiscal year ended June 30, 2012 is as follows:

Revenue and Reported Production Subject to our Royalty Interests

Las Cruces	Copper	\$ 8,012	153.4 Mlbs.	\$ 6,448	119.1 Mlbs.	
Other ⁽²⁾	Various	\$ 69,327	N/A	\$ 67,293	N/A	
Total Revenue		\$ 289,224		\$ 263,054		

(1) Reported production relates to the amount of metal sales, subject to our royalty interests, for the twelve months ended June 30, 2013 and June 30, 2012, as reported to us by the operators of the mines.

(2) Individually, no royalty included within the "Other" category contributed greater than 5% of our total royalty revenue for either period.

The increase in total revenue for the fiscal year ended June 30, 2013, compared with the fiscal year ended June 30, 2012, resulted primarily from reported production increases at Andacollo, Holt,

Table of Contents

Las Cruces, Mulatos and Robinson and the continued ramp-up at Canadian Malartic. These increases were partially offset by a decrease in the average gold, silver, copper and nickel prices and decreases in reported production at Voisey's Bay (copper) and Cortez. Refer to Part I, Item 2, Properties, for discussion and any updates on our principal producing properties.

General and administrative expenses increased to \$24.0 million for the fiscal year ended June 30, 2013, from \$20.4 million for the fiscal year ended June 30, 2012. The increase was primarily due to an increase in legal fees, tax consulting and general consulting fees associated with business development activities during the period.

Depreciation, depletion and amortization expense increased to \$85.0 million for the fiscal year ended June 30, 2013, from \$75.0 million for the fiscal year ended June 30, 2012. The increase was primarily attributable to production increases at Andacollo, Holt, Las Cruces, Mulatos and Robinson, which resulted in additional depletion expense of approximately \$6.9 million during the period. The increase was also attributable to the continued ramp-up at Canadian Malartic and Wolverine, which resulted in additional depletion expense of approximately \$5.0 million during the period. These increases were partially offset by production decreases at Leeville and certain of the Company's non-principal properties, which resulted in a decrease in depletion expense of \$1.9 million during the period.

During the fiscal year ended June 30, 2013, the Company recognized a \$12.1 million loss on available-for-sale securities related to an other-than-temporary impairment on its investment in Seabridge common stock. The effect of the recognized loss, net of tax, during the fiscal year ended June 30, 2013, was \$0.23 per basic share. Refer to Note 5 of the notes to consolidated financial statements in this Annual Report on Form 10-K for further discussion on the other-than-temporary impairment loss.

Interest and other expense increased to \$24.8 million for the fiscal year ended June 30, 2013, from \$7.7 million for the fiscal year ended June 30, 2012. The increase was primarily attributable to interest expense associated with our 2019 Notes issued in June 2012. Interest expense recognized on the 2019 Notes for the fiscal year ended June 30, 2013, was \$20.7 million and included the contractual coupon interest (\$10.6 million), the accretion of the debt discount (\$9.0 million) and amortization of the debt issuance costs (\$1.1 million). During the fiscal year ended June 30, 2013, the Company made \$10.5 million in interest payments on our 2019 Notes. The Company is required to make semi-annual interest payments on the outstanding principal balance of the 2019 Notes on June 15 and December 15 of each year.

During the fiscal year ended June 30, 2013, we recognized income tax expense totaling \$63.8 million compared with \$54.7 million during the fiscal year ended June 30, 2012. This resulted in an effective tax rate of 46.5% during the fiscal year ended June 30, 2013, compared with 35.8% in the prior period. The increase in the effective tax rate for the twelve months ended June 30, 2013 is primarily related to (i) no tax benefit on the recognized loss on available-for-sale securities, (ii) an increase in tax expense associated with the increase in foreign currency exchange gains, and (iii) an increase in tax expense related to changes in estimates for uncertain tax positions. Excluding the recognized loss on available-for-sale securities, the effective tax rate for the fiscal year ended June 30, 2013 would have been 40.9%.

Forward-Looking Statements

Cautionary "Safe Harbor" Statement under the Private Securities Litigation Reform Act of 1995: With the exception of historical matters, the matters discussed in this Annual Report on Form 10-K are forward-looking statements that involve risks and uncertainties that could cause actual results to differ materially from projections or estimates contained herein. Such forward-looking statements include, without limitation, statements regarding projected production estimates and estimates pertaining to

Edgar Filing: ROYAL GOLD INC - Form 10-K

Table of Contents

timing and commencement of production from the operators of properties where we hold royalty and stream interests; effective tax rate estimates; the adequacy of financial resources and funds to cover anticipated expenditures for general and administrative expenses as well as costs associated with exploration and business development and capital expenditures, and our expectation that substantially all our revenues will be derived from royalty interests. Words such as "may," "could," "should," "would," "believe," "estimate," "expect," "anticipate," "plan," "forecast," "potential," "intend," "continue," "project" and variations of these words, comparable words and similar expressions generally indicate forward-looking statements, which speak only as of the date the statement is made. Do not unduly rely on forward-looking statements. Actual results may differ materially from those expressed or implied by these forward-looking statements. Factors that could cause actual results to differ materially from these forward-looking statements include, among others:

changes in gold and other metals prices on which our royalty interests are paid or changes in prices of the primary metals mined at properties where we hold royalty interests;

the production at or performance of properties where we hold royalty interests;

the ability of operators to bring projects, particularly development stage properties, into production on schedule or operate in accordance with feasibility studies;

challenges to mining, processing and related permits and licenses, or to applications for permits and licenses, by or on behalf of indigenous populations, non-governmental organizations or other third parties;

decisions and activities of the operators of properties where we hold royalty interests;

liquidity or other problems our operators may encounter;

hazards and risks at the properties where we hold royalty interests that are normally associated with developing and mining properties, including unanticipated grade and geological, metallurgical, processing or other problems, mine operating and ore processing facility problems, pit wall or tailings dam failures, industrial accidents, environmental hazards and natural catastrophes such as floods or earthquakes and access to raw materials, water and power;

changes in project parameters as plans of the operators of properties where we hold royalty interests are refined;

changes in estimates of reserves and mineralization by the operators of properties where we hold royalty interests;

contests to our royalty interests and title and other defects to the properties where we hold royalty interests;

economic and market conditions;

future financial needs;

federal, state and foreign legislation governing us or the operators of properties where we hold royalty interests;

the availability of royalty interests for acquisition or other acquisition opportunities and the availability of debt or equity financing necessary to complete such acquisitions;

our ability to make accurate assumptions regarding the valuation, timing and amount of revenue to be derived from our royalty interests when evaluating acquisitions;

risks associated with conducting business in foreign countries, including application of foreign laws to contract and other disputes, environmental, real estate, contract and permitting laws, currency fluctuations, expropriation of property, repatriation of earnings, taxation, price controls,

Table of Contents

inflation, import and export regulations, community unrest and labor disputes, endemic health issues, corruption, enforcement and uncertain political and economic environments;

changes in laws governing us, the properties where we hold royalty interests or the operators of such properties;

risks associated with issuances of additional common stock or incurrence of indebtedness in connection with acquisitions or otherwise including risks associated with the issuance and conversion of convertible notes;

acquisition and maintenance of permits and authorizations, completion of construction and commencement and continuation of production at the properties where we hold royalty interests;

changes in management and key employees; and

failure to complete future acquisitions;

as well as other factors described elsewhere in this report and our other reports filed with the SEC. Most of these factors are beyond our ability to predict or control. Future events and actual results could differ materially from those set forth in, contemplated by or underlying the forward-looking statements. Forward-looking statements speak only as of the date on which they are made. We disclaim any obligation to update any forward-looking statements made herein, except as required by law. Readers are cautioned not to put undue reliance on forward-looking statements.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK

Our earnings and cash flows are significantly impacted by changes in the market price of gold and other metals. Gold, silver, copper, nickel and other metal prices can fluctuate significantly and are affected by numerous factors, such as demand, production levels, economic policies of central banks, producer hedging, world political and economic events and the strength of the U.S. dollar relative to other currencies. Please see *"Volatility in gold, silver, copper, nickel and other metal prices may have an adverse impact on the value of our royalty interests and reduce our revenues. Certain contracts governing our royalty interests have features that may amplify the negative effects of a drop in metal prices,"* under Part I, Item 1A, Risk Factors, of this report for more information on factors that can affect gold, silver, copper, nickel and other metal prices as well as historical gold, silver, copper and nickel prices.

During the fiscal year ended June 30, 2014, we reported revenue of \$237.2 million, with an average gold price for the period of \$1,296 per ounce, an average silver price for the period of \$20.57 per ounce, an average copper price of \$3.18 per pound and an average nickel price of \$6.89 per pound. Approximately 72% of our total recognized revenues for the fiscal year ended June 30, 2014 were attributable to gold sales from our gold producing interests, as shown within the MD&A. For the fiscal year ended June 30, 2014, if the price of gold had averaged 10% higher or lower per ounce, we would have recorded an increase or decrease in revenue of approximately \$19.2 million and \$18.9 million, respectively.

Approximately 6% of our total reported revenue for the fiscal year ended June 30, 2014 was attributable to silver sales from our silver producing interests. For the fiscal year ended June 30, 2014, if the price of silver had averaged 10% higher or lower per ounce, we would have recorded an increase or decrease in revenues of approximately \$1.8 million.

Approximately 8% of our total reported revenue for the fiscal year ended June 30, 2014 was attributable to copper sales from our copper producing interests. For the fiscal year ended June 30, 2014, if the price of copper had averaged 10% higher or lower per pound, we would have recorded an increase or decrease in revenues of approximately \$2.3 million.

Approximately 8% of our total reported revenue for the fiscal year ended June 30, 2014 was attributable to nickel sales from our nickel producing interests. For the fiscal year ended June 30, 2014, if the price of nickel had averaged 10% higher or lower per pound, we would have recorded an increase or decrease in revenues of approximately \$2.6 million.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Shareholders of Royal Gold, Inc.

We have audited the accompanying consolidated balance sheets of Royal Gold, Inc. as of June 30, 2014 and 2013, and the related consolidated statements of operations and comprehensive income, changes in equity and cash flows for each of the three years in the period ended June 30, 2014. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Royal Gold, Inc. at June 30, 2014 and 2013, and the consolidated results of its operations and its cash flows for each of the three years in the period ended June 30, 2014, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Royal Gold Inc.'s internal control over financial reporting as of June 30, 2014, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (1992 framework) and our report dated August 7, 2014 expressed an unqualified opinion thereon.

ROYAL GOLD, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. THE COMPANY

Royal Gold, Inc. ("Royal Gold", the "Company", "we", "us", or "our"), together with its subsidiaries, is engaged in the business of acquiring and managing precious metals royalties, metal streams, and similar interests. Royalties are non-operating interests in mining projects that provide the right to revenue or metals produced from the project after deducting specified costs, if any. A metal stream is a purchase agreement that provides, in exchange for an upfront deposit payment, the right to purchase all or a portion of one or more metals produced from a mine, at a price determined for the life of the transaction by the purchase agreement. We may use the term "royalty interest" in these notes to the consolidated financial statements to refer to royalties, gold, silver or other metal stream interests, and other similar interests.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS

Summary of Significant Accounting Policies

Use of Estimates

The preparation of our financial statements in conformity with accounting principles generally accepted in the United States of America requires the Company to make estimates and assumptions that affect the reported amounts of assets and liabilities, and disclosure of contingent assets and liabilities at the dates of the financial statements, and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ significantly from those estimates.

Our most critical accounting estimates relate to our assumptions regarding future gold, silver, nickel, copper and other metal prices and the estimates of reserves, production and recoveries of third-party mine operators. We rely on reserve estimates reported by the operators on the properties in which we have royalty interests. These estimates and the underlying assumptions affect the potential impairments of long-lived assets and the ability to realize income tax benefits associated with deferred tax assets. These estimates and assumptions also affect the rate at which we recognize revenue or charge depreciation, depletion and amortization to earnings. On an ongoing basis, management evaluates these estimates and assumptions; however, actual amounts could differ from these estimates and assumptions. Differences between estimates and actual amounts could differ significantly and are recorded in the period that the actual amounts are known.

Basis of Consolidation

The consolidated financial statements include the accounts of Royal Gold, Inc. and its wholly-owned subsidiaries. All intercompany accounts, transactions, income and expenses, and profits or losses have been eliminated on consolidation.

Cash and Equivalents

Cash and equivalents consist of all cash balances and highly liquid investments with an original maturity of three months or less. Cash and equivalents are primarily held in cash deposit accounts and United States treasury bills with maturities less than 90 days.

Table of Contents

ROYAL GOLD, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS (Continued)

Royalty and Stream Interests

Royalty and stream interests include acquired royalty and stream interests in production, development and exploration stage properties. The costs of acquired royalty and stream interests are capitalized as tangible assets as such interests do not meet the definition of a financial asset under Accounting Standards Codification ("ASC") guidance.

Acquisition costs of production stage royalty and stream interests are depleted using the units of production method over the life of the mineral property (as royalty payments are recognized or sales occur under stream interests), which is estimated using proven and probable reserves as provided by the operator. Acquisition costs of royalty and stream interests on development stage mineral properties, which are not yet in production, are not amortized until the property begins production. Acquisition costs of royalty interests on exploration stage mineral properties, where there are no proven and probable reserves, are not amortized. At such time as the associated exploration stage mineral interests are converted to proven and probable reserves, the cost basis is amortized over the remaining life of the mineral property, using proven and probable reserves. The carrying values of exploration stage mineral interests are evaluated for impairment at such time as information becomes available indicating that the costs may not be recoverable from future production. Exploration costs are charged to operations when incurred.

Available-for-Sale Securities

Investments in securities that management does not have the intent to sell in the near term and that have readily determinable fair values are classified as available-for-sale securities. Unrealized gains and losses on these investments are recorded in accumulated other comprehensive income as a separate component of stockholders' equity, except that declines in market value judged to be other than temporary are recognized in determining net income. When investments are sold, the realized gains and losses on these investments, determined using the specific identification method, are included in determining net income.

The Company's policy for determining whether declines in fair value of available-for-sale securities are other than temporary includes a quarterly analysis of the investments and a review by management of all investments for which the cost exceeds the fair value. Any temporary declines in fair value are recorded as a charge to other comprehensive income. This evaluation considers a number of factors including, but not limited to, the length of time and extent to which the fair value has been less than cost, the financial condition and near term prospects of the issuer, and management's ability and intent to hold the securities until fair value recovers. If such impairment is determined by the Company to be other-than-temporary, the investment's cost basis is written down to fair value and recorded in net income during the period the Company determines such impairment to be other-than-temporary. The new cost basis is not changed for subsequent recoveries in fair value. Refer to Note 5 for further discussion on our available-for-sale securities.

Asset Impairment

We evaluate long-lived assets for impairment whenever events or changes in circumstances indicate that the related carrying amounts of an asset or group of assets may not be recoverable. The recoverability of the carrying value of royalty interests in production and development stage mineral

Table of Contents

ROYAL GOLD, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS (Continued)

properties is evaluated based upon estimated future undiscounted net cash flows from each royalty interest property using estimates of proven and probable reserves and other relevant information received from the operator. We evaluate the recoverability of the carrying value of royalty interests in exploration stage mineral properties in the event of significant decreases in the price of gold, silver, copper, nickel and other metals, and whenever new information regarding the mineral properties is obtained from the operator indicating that production will not likely occur in the future, thus affecting the future recoverability of our royalty interests. Impairments in the carrying value of each property are measured and recorded to the extent that the carrying value in each property exceeds its estimated fair value, which is generally calculated using estimated future discounted cash flows.

Our estimates of gold, silver, copper, nickel and other metal prices, operator's estimates of proven and probable reserves related to our royalty interests, and operator's estimates of operating, capital and reclamation costs are subject to certain risks and uncertainties which may affect the recoverability of our investment in these royalty interests in mineral properties. Although we have made our best assessment of these factors based on current conditions, it is possible that changes could occur, which could adversely affect the net cash flows expected to be generated from these royalty interests.

Revenue

Revenue is recognized in accordance with the guidance of ASC 605 and based upon amounts contractually due pursuant to the underlying royalty or stream agreement. Specifically, revenue is recognized in accordance with the terms of the underlying royalty or stream agreements subject to (i) the pervasive evidence of the existence of the arrangements; (ii) the risks and rewards having been transferred; (iii) the royalty or stream being fixed or determinable; and (iv) the collectability being reasonably assured. For royalty payments received in-kind, revenue is recorded at the average spot price of gold for the period in which the royalty was earned. For our streaming agreements, we sell most of the delivered gold within three weeks of receipt and recognize revenue when the metal received is sold.

Gold Sales

Gold received under our metal streaming agreements is sold primarily in the spot market or under average rate gold forward contracts. For our gold sold in the spot market, the sales price is fixed at the delivery date based on the gold spot price, while the sales price for our gold sold under average rate gold forward contracts is determined by the average gold price under the term of the contract, typically 15 consecutive trading days shortly after the receipt and purchase of the gold. Revenue from gold sales is recognized on the date of the settlement, which is also the date that title to the gold passes to the purchaser.

Cost of Sales

Cost of sales is specific to our streaming agreement for Mt. Milligan and is the result of the Company's purchases of gold for a cash payment of the lesser of \$435 per ounce, or the prevailing market price of gold when purchased.

Table of Contents**ROYAL GOLD, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS (Continued)***Production taxes*

Certain royalty payments are subject to production taxes (or mining proceeds taxes), which are recognized at the time of revenue recognition. Production taxes are not income taxes and are included within the costs and expenses section in the Company's consolidated statements of operations and comprehensive income.

Stock-Based Compensation

The Company accounts for stock-based compensation in accordance with the guidance of ASC 718. The Company recognizes all share-based payments to employees, including grants of employee stock options, stock-settled stock appreciation rights ("SSARs"), restricted stock and performance stock, in its financial statements based upon their fair values.

Operating Segments and Geographical Information

The Company manages its business under a single operating segment, consisting of the acquisition and management of royalty and stream interests. Royal Gold's revenue and long-lived assets (royalty and stream interests, net) are geographically distributed as shown in the following table.

	Revenue Fiscal Year Ended June 30,			Royalty and Stream Interests, net Fiscal Year Ended June 30,		
	2014	2013	2012	2014	2013	2012
Canada	34%	24%	24%	53%	52%	43%
Chile	21%	29%	25%	31%	30%	35%
Mexico	18%	19%	20%	7%	7%	9%
United States	15%	17%	18%	3%	4%	5%
Australia	4%	4%	5%	3%	3%	3%
Africa	3%	3%	4%	1%	1%	1%
Other	5%	4%	4%	2%	3%	4%

Income Taxes

The Company accounts for income taxes in accordance with the guidance of Accounting Standards Codification Topic 740. The Company's annual tax rate is based on income, statutory tax rates in effect and tax planning opportunities available to us in the various jurisdictions in which the Company operates. Significant judgment is required in determining the annual tax expense, current tax assets and liabilities, deferred tax assets and liabilities, and our future taxable income, both as a whole and in various tax jurisdictions, for purposes of assessing our ability to realize future benefit from our deferred tax assets. Actual income taxes could vary from these estimates due to future changes in income tax law, significant changes in the jurisdictions in which we operate or unpredicted results from the final determination of each year's liability by taxing authorities.

The Company's deferred income taxes reflect the impact of temporary differences between the reported amounts of assets and liabilities for financial reporting purposes and such amounts measured

Table of Contents

ROYAL GOLD, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS (Continued)

by tax laws and regulations. In evaluating the realizability of the deferred tax assets, management considers both positive and negative evidence that may exist, such as earnings history, reversal of taxable temporary differences, forecasted operating earnings and available tax planning strategies in each tax jurisdiction. A valuation allowance may be established to reduce our deferred tax assets to the amount that is considered more likely than not to be realized through the generation of future taxable income and other tax planning strategies.

The Company has asserted the indefinite reinvestment of certain foreign subsidiary earnings as determined by management's judgment about and intentions concerning the future operations of the Company. As a result, the Company does not record a U.S. deferred tax liability for the excess of the book basis over the tax basis of its investments in foreign corporations to the extent that the basis difference results from earnings that meet the indefinite reversal criteria. Refer to Note 12 for further discussion on our assertion.

The Company's operations may involve dealing with uncertainties and judgments in the application of complex tax regulations in multiple jurisdictions. The final taxes paid are dependent upon many factors, including negotiations with taxing authorities in various jurisdictions and resolution of disputes arising from federal, state, and international tax audits. The Company recognizes potential liabilities and records tax liabilities for anticipated tax audit issues in the United States and other tax jurisdictions based on its estimate of whether, and the extent to which, additional taxes will be due. The Company adjusts these reserves in light of changing facts and circumstances, such as the progress of a tax audit; however, due to the complexity of some of these uncertainties, the ultimate resolution could result in a payment that is materially different from our current estimate of the tax liabilities. These differences will be reflected as increases or decreases to income tax expense in the period which they are determined. The Company recognizes interest and penalties, if any, related to unrecognized tax benefits in income tax expense.

Comprehensive Income

In addition to net income, comprehensive income includes changes in equity during a period associated with cumulative unrealized changes in the fair value of marketable securities held for sale, net of tax effects.

Earnings per Share

Basic earnings per share is computed by dividing net income available to Royal Gold common stockholders by the weighted average number of outstanding common shares for the period, considering the effect of participating securities, and include the outstanding exchangeable shares. Diluted earnings per share reflect the potential dilution that could occur if securities or other contracts that may require issuance of common shares were converted. Diluted earnings per share is computed by dividing net income available to common stockholders by the diluted weighted average number of common shares outstanding, including outstanding exchangeable shares, during each fiscal year.

Reclassification

Certain amounts in the prior period financial statements have been reclassified for comparative purposes to conform with the presentation in the current period financial statements.

ROYAL GOLD, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS (Continued)

Recently Issued Accounting Standards

In May 2014, the Financial Accounting Standards Board issued Accounting Standards Updated ("ASU") 2014-09, which establishes a comprehensive new revenue recognition model designed to depict the transfer of good or services to a customer in an amount that reflects the consideration the entity expects to receive in exchange for those goods and services. In doing so, companies may need to use more judgment and make more estimates than under current revenue recognition guidance. The ASU allows for the use of either the full or modified retrospective transition method, and the standard will be effective for us in the first quarter of our fiscal year 2018; early adoption is not permitted. We are currently evaluating the impact of this new standard on our consolidated financial statements, as well as which transition method we intend to use.

3. ACQUISITIONS

Phoenix Gold Project Stream Acquisition

On February 11, 2014, the Company, through its wholly-owned subsidiary RGLD Gold AG ("RGLD Gold"), entered into a \$75 million Purchase and Sale Agreement (the "Agreement") for a gold stream transaction with Rubicon Minerals Corporation ("Rubicon"). Pursuant to the Agreement, the \$75 million payment deposit from RGLD Gold is to be used by Rubicon to help pay a significant portion of the construction costs of the Phoenix Gold Project located in Ontario, Canada, which is currently in the development stage.

Pursuant to the Agreement, the \$75 million payment deposit to Rubicon is prepayment of the purchase price for refined gold and is payable in five installments. The first installment of \$10 million was made in conjunction with execution of definitive documents on February 11, 2014. The second installment of \$20 million was paid on March 20, 2014, while the third, fourth and fifth installments of \$15 million each are payable upon satisfaction of certain conditions precedent.

Upon commencement of production at the Phoenix Gold Project, RGLD Gold will purchase and Rubicon will sell 6.30% of any gold produced from the Phoenix Gold Project until 135,000 ounces have been delivered, and 3.15% thereafter. For each delivery of gold, RGLD Gold will pay a purchase price per ounce of 25% of the spot price of gold at the time of delivery. In the event that RGLD Gold's interests are subordinated to more than \$50 million of senior debt, RGLD Gold's per ounce purchase price will be reduced by 5.4% times the amount of the senior debt outstanding and drawn in excess of \$50 million, divided by \$50 million.

The Phoenix Gold Project gold stream acquisition has been accounted for as an asset acquisition. The \$30 million paid as part of the aggregate pre-production commitment of \$75 million, plus direct transaction costs, have been recorded as a development stage stream interest within *Royalty and stream interests, net* on our consolidated balance sheets.

Goldrush Royalty Acquisition

On January 7, 2014, Royal Gold acquired a 1.0% net revenue royalty on the southern end of Barrick Gold Corporation's ("Barrick") Goldrush deposit in Nevada from a private landowner for total consideration of \$8.0 million, of which \$1.0 million was paid at closing and the remaining \$7.0 million will be paid in seven annual installments. Goldrush is located approximately four miles from the Cortez

ROYAL GOLD, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

3. ACQUISITIONS (Continued)

mine. The acquisition has been recorded as an exploration stage royalty interest within *Royalty and stream interests, net* on our consolidated balance sheets.

NVR1 Royalty at Cortez

On January 2, 2014, Royal Gold, through a wholly-owned subsidiary, increased its ownership interest in the limited partnership that owns the 1.25% net value royalty ("NVR1") covering certain portions of the Pipeline Complex at Barrick's Cortez gold mine in Nevada. As a result of the transaction, the NVR1 royalty rate attributable to our interest increased from 0.39% to 1.014% on production from all of the lands covered by the NVR1 royalty excluding production from the mining claims comprising the Crossroad deposit (the "Crossroad Claims"), and from zero to 0.618% on production from the Crossroad Claims. Total consideration for the transaction was approximately \$11.5 million. Refer to Note 17 for a discussion of certain related party interests in this transaction.

El Morro Royalty Acquisition

In August 2013, Royal Gold, through a wholly-owned Chilean subsidiary, acquired a 70% interest in a 2.0% net smelter return ("NSR") royalty on certain portions of the El Morro copper gold project in Chile ("El Morro"), from Xstrata Copper Chile S.A., for \$35 million. Goldcorp Inc. holds 70% ownership of the El Morro project and is the operator, with the remaining 30% held by New Gold Inc.

The acquisition of the El Morro royalty interest has been accounted for as an asset acquisition. The total purchase price of \$35 million, plus direct transaction costs, has been recorded as a development stage royalty interest within *Royalty and stream interests, net* on our consolidated balance sheets.

Mt. Milligan II and III Gold Stream Acquisitions

On December 14, 2011, Royal Gold and one of its wholly-owned subsidiaries entered into an Amended and Restated Purchase and Sale Agreement with Thompson Creek Metals Company Inc. ("Thompson Creek") and one of its wholly-owned subsidiaries. Among other things, Royal Gold agreed to purchase an additional 15% of the payable ounces of gold from the Mt. Milligan copper-gold project in exchange for payment advances totaling \$270 million, of which \$112 million was paid on December 19, 2011, and, when production is reached, cash payments for each payable ounce of gold delivered to Royal Gold.

On August 8, 2012, Royal Gold entered into an amendment to its purchase and sale agreement with Thompson Creek whereby Royal Gold, among other things, agreed to purchase an additional 12.25% of the payable gold from the Mt. Milligan copper-gold project in exchange for a total of \$200 million, of which \$75 million was paid shortly after closing, and, when production is reached, cash payments for each payable ounce of gold delivered to Royal Gold (the "Milligan III Acquisition"). Under the Milligan III Acquisition, Royal Gold increased its aggregate pre-production commitment in the Mt. Milligan project from \$581.5 million to \$781.5 million and agreed to purchase a total of 52.25% of the payable ounces of gold produced from the Mt. Milligan project at a cash purchase price equal to the lesser of \$435, with no inflation adjustment, or the prevailing market price for each payable ounce of gold (regardless of the number of payable ounces delivered to Royal Gold). As of June 30, 2014, the Company has paid the entire aggregate pre-production commitment of \$781.5 million.

Table of Contents

ROYAL GOLD, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

3. ACQUISITIONS (Continued)

The Mt. Milligan acquisitions have been accounted for as an asset acquisition. The aggregate pre-production commitment of \$781.5 million, plus direct transaction costs, is recorded as a production stage stream interest within *Royalty and stream interests, net* on our consolidated balance sheets.

Acquisition of Royalty Options on the Kerr-Sulphurets-Mitchell Project and Investment in Seabridge Gold, Inc.

On June 16, 2011, the Company, through its wholly-owned subsidiary RG Exchangeco Inc., ("RG Exchangeco") entered into a Subscription Agreement and an Option Agreement with Seabridge Gold, Inc. ("Seabridge") to (i) make a \$30.7 million (C\$30 million) initial equity investment in the common shares of Seabridge, (ii) acquire an option to purchase a 1.25% net smelter return royalty (the "Initial Royalty") on all of the gold and silver production from the Kerr-Sulphurets-Mitchell project (the "Project") in northwest British Columbia, (iii) acquire an option to make a second equity investment in the common shares of Seabridge of up to C\$18 million and (iv) acquire a second option to increase the Initial Royalty to a 2.00% net smelter return royalty (the "Increased Royalty").

Pursuant to the Subscription Agreement, on June 29, 2011, the Company purchased 1,019,000 common shares of Seabridge (the "Initial Shares") in a private placement for \$30.7 million (C\$30 million) at a per share price equal to \$30.14 (C\$29.4), which represented a premium of 15% to the volume weighted average trading price of the Seabridge common shares on the Toronto Stock Exchange ("TSX") for the five trading day period that ended June 14, 2011.

Pursuant to the Option Agreement (as amended by the Amending Agreement dated October 28, 2011, the "Option Agreement"), by having held the Initial Shares for more than 270 days from the date they were acquired, the Company obtained the right to purchase the Initial Royalty for C\$100 million, payable in three installments over a 540 day period, subject to currency rate adjustments. As of June 30, 2014, the Company continues to hold the Initial Shares but has not exercised its option to acquire the Initial Royalty.

On December 13, 2012, RG Exchangeco exercised its option to make a second equity investment in the common shares of Seabridge and purchased 1,004,491 common shares of Seabridge (the "Additional Shares") at a 15% premium to the volume weighted-average trading price of the Seabridge common shares on the TSX for a five day trading period that ended December 11, 2012, for \$18.3 million (C\$18.0 million). Effective December 13, 2012, the Company entered into a Second Amending Agreement (the "Seabridge Amendment") to the Option Agreement to, among other things, remove the 270 day minimum holding period applicable to the Additional Shares.

Upon the Company's purchase of the Additional Shares, the Company obtained the right, under the Option Agreement, as amended by the Seabridge Amendment, to purchase the Increased Royalty for C\$60 million, payable in three installments over a 540 day period. Accordingly, the Company now holds the right to purchase either a 1.25% NSR royalty on all of the gold and silver production from the Project for C\$100 million, or a 2.0% NSR royalty for C\$160 million. Royal Gold sold the Additional Shares in a private transaction to an unrelated party for \$14.6 million (C\$14.4 million) on December 13, 2012.

The options to purchase the Initial Royalty and the Increased Royalty will remain exercisable by the Company for 60 days following the Company's satisfaction that, among other items, the Project has

Table of Contents

ROYAL GOLD, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

3. ACQUISITIONS (Continued)

received all material approvals and permits and that Seabridge has demonstrated that it has sufficient funding for construction of and commencement of commercial production from the Project.

The investment in Initial Shares was accounted for as a purchase of securities and the investment in the Project was accounted for as an asset purchase. As such, the Company has recorded the Initial Shares as an investment in *Available-for-sale securities* on the consolidated balance sheets; refer to Note 5 for further detail on our investment in available-for-sale securities. The 15% premium on the Initial Shares and Additional Shares, which represented the value of the option to acquire the Initial Royalty and Increased Royalty, plus direct acquisition costs, has been recorded within *Other assets* on the consolidated balance sheets. The purchase and same day sale of the Additional Shares resulted in a realized loss on trading securities of approximately \$1.3 million during our fiscal year ended June 30, 2013, which is recorded within *Interest and other expense* on our consolidated statements of operations and comprehensive income.

Table of Contents**ROYAL GOLD, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****5. AVAILABLE-FOR-SALE SECURITIES**

The Company's available-for-sale securities as of June 30, 2014 and 2013 consist of the following:

	As of June 30, 2014			
	(Amounts in thousands) Unrealized			
	Cost Basis	Gain	Loss	Fair Value
Non-current:				
Seabridge	\$ 9,565			\$ 9,565
Other	203		(160)	43
	\$ 9,768	\$	\$ (160)	\$ 9,608

	As of June 30, 2013			
	(Amounts in thousands) Unrealized			
	Cost Basis	Gain	Loss	Fair Value
Non-current:				
Seabridge	\$ 14,064		(4,509)	\$ 9,555
Other	203		(63)	140
	\$ 14,267	\$	\$ (4,572)	\$ 9,695

The most significant available-for-sale security is the investment in Seabridge common stock, acquired in June 2011 and discussed in greater detail within Note 3 of our notes to consolidated financial statements. Based on our quarterly impairment analysis, the Company determined that the impairment of its investment in Seabridge common stock is other-than-temporary. As a result of the impairment, the Company recognized a loss on available-for-sale securities of \$4.5 million during the fourth quarter of our fiscal year ended June 30, 2014. The Company also recognized a loss on available-for-sale securities related to our investment in Seabridge common stock of \$12.1 million during the third quarter of our fiscal year ended June 30, 2013. The recognized losses have been reclassified out of comprehensive income in the respective periods. The Company will continue to evaluate its investment in Seabridge common stock considering additional facts and circumstances as they arise, including, but not limited to, the progress of development of Seabridge's KSM project.

6. DEBT

The Company's debt as of June 30, 2014 and 2013 consists of the following:

Edgar Filing: ROYAL GOLD INC - Form 10-K

	As of June 30, 2014	As of June 30, 2013
	Non-current	Non-current
	(Amounts in thousands)	
Convertible notes due 2019, net	\$ 311,860	\$ 302,263
Total debt	\$ 311,860	\$ 302,263

Table of Contents**ROYAL GOLD, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****6. DEBT (Continued)***Convertible Senior Notes Due 2019*

In June 2012, the Company completed an offering of \$370 million aggregate principal amount of 2.875% convertible senior notes due 2019 ("2019 Notes"). The 2019 Notes bear interest at the rate of 2.875% per annum, and the Company is required to make semi-annual interest payments on the outstanding principal balance of the 2019 Notes on June 15 and December 15 of each year, beginning December 15, 2012. The 2019 Notes mature on June 15, 2019. Interest expense recognized on the 2019 Notes for the fiscal years ended June 30, 2014 and 2013 was approximately \$21.4 million and \$20.7 million, respectively, and included the contractual coupon interest, the accretion of the debt discount and amortization of the debt issuance costs. During the fiscal year ended June 30, 2014 and 2013, the Company made \$10.6 million and \$10.5 million, respectively, in interest payments on our 2019 Notes.

Revolving credit facility

The Company maintains a \$450 million revolving credit facility. Borrowings under the revolving credit facility bear interest at a floating rate of LIBOR plus a margin of 1.25% to 3.0%, based on Royal Gold's leverage ratio. As of June 30, 2014, the interest rate on borrowings under the revolving credit facility was LIBOR plus 1.25%. Royal Gold may repay any borrowings under the revolving credit facility at any time without premium or penalty. As of June 30, 2014, and during our fiscal year 2014, Royal Gold had no amounts outstanding under the revolving credit facility.

Royal Gold amended and restated its revolving credit facility on January 29, 2014. Key modifications to the revolving credit facility include, among other items: (1) an increase in the maximum availability from \$350 million to \$450 million; (2) an extension of the final maturity from May 2017 to January 2019; (3) an increase of the accordion feature from \$50 million to \$150 million which allows the Company to increase availability under the revolving credit facility at its option, subject to satisfaction of certain conditions, to \$600 million; (4) a reduction in the commitment fee from 0.375% to 0.25%; (5) a reduction in the drawn interest rate from LIBOR + 1.75% to LIBOR + 1.25%; (6) removal of the secured debt ratio, and (7) maintaining the leverage ratio (as defined therein) less than or equal to 3.5 to 1.0, with an increase to 4.0 to 1.0 for the two quarters following the completion of a material permitted acquisition, as defined. At June 30, 2014, the Company was in compliance with each financial covenant.

7. REVENUE

Revenue is comprised of the following:

	Fiscal Years Ended June 30,		
	2014	2013	2012
	(Amounts in thousands)		
Royalty interests	\$ 209,953	\$ 289,224	\$ 263,054
Stream interests	27,209		
Total revenue	\$ 237,162	\$ 289,224	\$ 263,054

Table of Contents**ROYAL GOLD, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****8. STOCK-BASED COMPENSATION**

In November 2004, the Company adopted the Omnibus Long-Term Incentive Plan ("2004 Plan"). Under the 2004 Plan, 2,600,000 shares of common stock have been authorized for future grants to officers, directors, key employees and other persons. The 2004 Plan provides for the grant of stock options, unrestricted stock, restricted stock, dividend equivalent rights, SSARs and cash awards. Any of these awards may, but need not, be made as performance incentives. Stock options granted under the 2004 Plan may be non-qualified stock options or incentive stock options.

The Company recognized stock-based compensation expense as follows:

	For the Fiscal Years Ended June 30,		
	2014	2013	2012
	(Amounts in thousands)		
Stock options	\$ 468	\$ 456	\$ 446
Stock appreciation rights	1,305	1,107	1,219
Restricted stock	3,110	3,240	2,757
Performance stock	(2,303)	898	2,085
Total stock-based compensation expense	\$ 2,580	\$ 5,701	\$ 6,507

Stock-based compensation expense is included within general and administrative expense in the consolidated statements of operations and comprehensive income.

Stock Options and Stock Appreciation Rights

Stock option and SSARs awards are granted with an exercise price equal to the closing market price of the Company's stock at the date of grant. Stock option and SSARs awards granted to officers, key employees and other persons vest based on one to three years of continuous service. Stock option and SSARs awards have 10 year contractual terms.

To determine stock-based compensation expense for stock options and SSARs, the fair value of each stock option and SSAR is estimated on the date of grant using the Black-Scholes-Merton ("Black-Scholes") option pricing model for all periods presented. The Black-Scholes model requires key assumptions in order to determine fair value. Those key assumptions during the fiscal year 2014, 2013 and 2012 grants are noted in the following table:

	Stock Options			SSARs		
	2014	2013	2012	2014	2013	2012
Weighted-average expected volatility	43.6%	43.1%	45.1%	41.3%	43.7%	45.3%
Weighted-average expected life in years	5.5	5.5	5.7	4.8	6.4	6.1
Weighted-average dividend yield	1.00%	0.86%	0.76%	1.00%	0.90%	0.76%
Weighted-average risk free interest rate	1.7%	0.8%	1.1%	1.5%	1.0%	1.2%

The Company's expected volatility is based on the historical volatility of the Company's stock over the expected option term. The Company's expected option term is determined by historical exercise patterns along with other known employee or company information at the time of grant. The risk free interest rate is based on the zero-coupon U.S. Treasury bond at the time of grant with a term approximate to the expected option term.

8. STOCK-BASED COMPENSATION (Continued)

Stock Options

A summary of stock option activity under the 2004 Plan for the fiscal year ended June 30, 2014, is presented below.

	Number of Shares	Weighted- Average Exercise Price	Weighted- Average Remaining Contractual Life (Years)	Aggregate Intrinsic Value (in thousands)
Outstanding at July 1, 2013	119,313	\$ 46.12		
Granted	24,775	\$ 59.99		
Exercised	(34,495)	\$ 32.48		
Forfeited	(8,200)	\$ 68.11		
Outstanding at June 30, 2014	101,393	\$ 52.37	6.4	\$ 2,410
Exercisable at June 30, 2014	63,531	\$ 45.16	5.1	\$ 1,967

The weighted-average grant date fair value of options granted during the fiscal years ended June 30, 2014, 2013 and 2012, was \$22.78, \$26.76 and \$27.23, respectively. The total intrinsic value of options exercised during the fiscal years ended June 30, 2014, 2013 and 2012, were \$1.1 million, \$4.1 million, and \$8.7 million, respectively.

As of June 30, 2014, there was approximately \$0.5 million of total unrecognized stock-based compensation expense related to non-vested stock options granted under the 2004 Plan, which is expected to be recognized over a weighted-average period of 1.8 years.

SSARs

A summary of SSARs activity under the 2004 Plan for the fiscal year ended June 30, 2014, is presented below.

	Number of Shares	Weighted- Average Exercise Price	Weighted- Average Remaining Contractual Life (Years)	Aggregate Intrinsic Value (in thousands)
Outstanding at July 1, 2013	162,284	\$ 58.28		
Granted	84,125	\$ 62.13		
Exercised	(1,614)	\$ 32.52		
Forfeited	(15,739)	\$ 61.28		
Outstanding at June 30, 2014	229,056	\$ 59.67	7.5	\$ 3,770

Edgar Filing: ROYAL GOLD INC - Form 10-K

Exercisable at June 30, 2014	108,586	\$	53.42	6.1	\$	2,466
------------------------------	---------	----	-------	-----	----	-------

The weighted-average grant date fair value of SSARs granted during the fiscal years ended June 30, 2014, 2013 and 2012 was \$21.15, \$29.78 and \$28.04, respectively. The total intrinsic value of SSARs exercised during the fiscal years ended June 30, 2014, 2013 and 2012, were \$0.1 million, \$3.5 million, and \$0, respectively.

Table of Contents**ROYAL GOLD, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****8. STOCK-BASED COMPENSATION (Continued)**

As of June 30, 2014, there was approximately \$1.6 million of total unrecognized stock-based compensation expense related to non-vested SSARs granted under the 2004 Plan, which is expected to be recognized over a weighted-average period of 1.8 years.

Other Stock-based Compensation*Performance Shares*

During fiscal 2014, officers and certain employees were granted 71,700 shares of restricted common stock that can be earned only if a single pre-defined performance goal is met within five years of the date of grant ("Performance Shares"). If the performance goal is not earned by the end of this five year period, the Performance Shares will be forfeited. Vesting of Performance Shares is subject to certain performance measures being met and can be based on an interim earn out of 25%, 50%, 75% or 100%. For Performance Shares granted during fiscal year 2014, there is a single pre-defined performance goal, which is growth of adjusted free cash flow on a per share, trailing twelve month basis.

The Company measures the fair value of the Performance Shares based upon the market price of our common stock as of the date of grant. In accordance with ASC 718, the measurement date for the Performance Shares will be determined at such time that the performance goals are attained or that it is probable they will be attained. At such time that it is probable that a performance condition will be achieved, compensation expense will be measured by the number of shares that will ultimately be earned based on the grant date market price of our common stock. For shares that were previously estimated to be probable of vesting and are no longer deemed to be probable of vesting, compensation expense is reversed during the period in which it is determined they are no longer probable of vesting. Interim recognition of compensation expense will be made at such time as management can reasonably estimate the number of shares that will be earned.

A summary of the status of the Company's non-vested Performance Shares for the fiscal year ended June 30, 2014, is presented below:

	Number of Shares	Weighted- Average Grant Date Fair Value
Non-vested at July 1, 2013	107,850	\$ 66.20
Granted	71,700	\$ 61.39
Vested		\$
Forfeited		\$
Non-vested at June 30, 2014	179,550	\$ 64.28

As of June 30, 2014, total unrecognized stock-based compensation expense related to Performance Shares was approximately \$0.7 million, which is expected to be recognized over the average remaining vesting period of 3.5 years.

Table of Contents**ROYAL GOLD, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****8. STOCK-BASED COMPENSATION (Continued)***Restricted Stock*

As defined in the 2004 Plan, officers, non-executive directors and certain employees may be granted shares of restricted stock that vest on continued service alone ("Restricted Stock"). During fiscal 2014, officers and certain employees were granted 46,200 shares of Restricted Stock. Restricted Stock awards granted to officers and certain employees vest over three years beginning after a two-year holding period from the date of grant with one-third of the shares vesting in years three, four and five, respectively. Also during fiscal year 2014, our non-executive directors were granted 19,950 shares of Restricted Stock. The non-executive directors' shares of Restricted Stock vest 50% immediately and 50% one year after the date of grant.

Shares of Restricted Stock represent issued and outstanding shares of common stock, with dividend and voting rights. The Company measures the fair value of the Restricted Stock based upon the market price of our common stock as of the date of grant. Restricted Stock is amortized over the applicable vesting period using the straight-line method. Unvested shares of Restricted Stock are subject to forfeiture upon termination of employment or service with the Company.

A summary of the status of the Company's non-vested Restricted Stock for the fiscal year ended June 30, 2014, is presented below:

	Number of Shares	Weighted- Average Grant Date Fair Value
Non-vested at July 1, 2013	194,706	\$ 52.15
Granted	66,150	\$ 61.32
Vested	(71,707)	\$ 44.95
Forfeited	(12,058)	\$ 58.63
Non-vested at June 30, 2014	177,091	\$ 58.06

As of June 30, 2014, total unrecognized stock-based compensation expense related to Restricted Stock was approximately \$5.3 million, which is expected to be recognized over the weighted-average vesting period of 3.2 years.

9. STOCKHOLDERS' EQUITY**Preferred Stock**

The Company has 10,000,000 authorized and unissued shares of \$.01 par value Preferred Stock as of June 30, 2014 and 2013.

Common Stock Issuances*Fiscal Year 2014*

During the fiscal year ended June 30, 2014, options to purchase 34,495 shares were exercised, resulting in proceeds of approximately \$1.1 million.

Table of Contents

ROYAL GOLD, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

9. STOCKHOLDERS' EQUITY (Continued)

Fiscal Year 2013

During the fiscal year ended June 30, 2013, options to purchase 65,341 shares were exercised, resulting in proceeds of approximately \$1.9 million.

On October 15, 2012, we sold 5,250,000 shares of our common stock, at a price of \$90.00 per share, resulting in proceeds of \$472.5 million before expenses.

Exchangeable Shares

In connection with the acquisition of International Royalty Corporation ("IRC") in February 2010, certain holders of IRC common stock received exchangeable shares of RG Exchangeco for each share of IRC common stock held. The exchangeable shares are convertible at any time, at the option of the holder, into shares of Royal Gold common stock on a one-for-one basis, and entitle holders to dividends and other rights economically equivalent to holders of Royal Gold common stock.

Stockholders' Rights Plan

On September 10, 2007, the Company entered into the First Amended and Restated Rights Agreement, dated September 10, 2007 (the "Rights Agreement"). The Rights Agreement expires on September 10, 2017. The Rights Agreement was approved by the Company's board of directors (the "Board").

The Rights Agreement is intended to deter coercive or abusive tender offers and market accumulations. The Rights Agreement is designed to encourage an acquirer to negotiate with the Board and to enhance the Board's ability to act in the best interests of all the Company's stockholders.

Under the Rights Agreement, each stockholder of the Company holds one preferred stock purchase right (a "Right") for each share of Company common stock held. The Rights generally become exercisable only in the event that an acquiring party accumulates 15 percent or more of the Company's outstanding shares of common stock. If this were to occur, subject to certain exceptions, each Right (except for the Rights held by the acquiring party) would allow its holders to purchase one one-thousandth of a newly issued share of Series A junior participating preferred stock of Royal Gold or the Company's common stock with a value equal to twice the exercise price of the Right, initially set at \$175 under the terms and conditions set forth in the Rights Agreement.

10. RESTRUCTURING ON ROYALTY AND STREAM INTERESTS

The Company owns an NSR royalty on the Relief Canyon property located in Nevada. From November 2010 to October 2011, the Company was involved in managing this interest in bankruptcy proceedings of the former owner of the Relief Canyon project. On August 24, 2011, the Company entered into an Amended and Restated Net Smelter Return Royalty Agreement with the former property owner, pursuant to which the royalty rate was reduced from 4% to 2%, and the ten mile area of interest was eliminated. The Company elected to amend the royalty agreement in order to enhance project economics and the probability of recognizing royalty revenue. As a result of the amendment to the Relief Canyon royalty agreement, the Company recorded a restructuring charge of approximately \$1.3 million during the fiscal year ended June 30, 2012, which was based on the Company's estimate of fair value. There were no additional impairments on our Relief Canyon royalty during the fiscal years

Table of Contents**ROYAL GOLD, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****10. RESTRUCTURING ON ROYALTY AND STREAM INTERESTS (Continued)**

ended June 30, 2014 and 2013. The Company's carrying value for the Relief Canyon royalty interest was approximately \$1.2 million as of June 30, 2014 and 2013.

11. EARNINGS PER SHARE ("EPS")

Basic earnings per common share were computed using the weighted average number of shares of common stock outstanding during the period, considering the effect of participating securities. Unvested stock-based compensation awards that contain non-forfeitable rights to dividends or dividend equivalents are considered participating securities and are included in the computation of earnings per share pursuant to the two-class method. The Company's unvested restricted stock awards contain non-forfeitable dividend rights and participate equally with common stock with respect to dividends issued or declared. The Company's unexercised stock options, unexercised SSARs and unvested performance stock do not contain rights to dividends. Under the two-class method, the earnings used to determine basic earnings per common share are reduced by an amount allocated to participating securities. Use of the two-class method has an immaterial impact on the calculation of basic and diluted earnings per common share.

The following table summarizes the effects of dilutive securities on diluted EPS for the period:

	Fiscal Years Ended June 30,		
	2014	2013	2012
	(in thousands, except per share data)		
Net income available to Royal Gold common stockholders	\$ 62,641	\$ 69,153	\$ 92,476
Weighted-average shares for basic EPS	64,909,149	63,250,247	57,220,040
Effect of other dilutive securities	117,107	179,575	243,810
Weighted-average shares for diluted EPS	65,026,256	63,429,822	57,463,850
Basic earnings per share	\$ 0.96	\$ 1.09	\$ 1.61
Diluted earnings per share	\$ 0.96	\$ 1.09	\$ 1.61

The calculation of weighted average shares includes all of the Company's outstanding stock: common stock and exchangeable shares. Exchangeable shares are the equivalent of common shares in that they have the same dividend rights and share equitably in undistributed earnings and are exchangeable on a one-for-one basis for shares of our common stock. With respect to the 2019 Notes as discussed in Note 6, the Company intends to settle the principal amount of 2019 Notes in cash. As a result, there will be no impact to diluted earnings per share unless the share price of the Company's common stock exceeds the conversion price of \$105.31.

Table of Contents**ROYAL GOLD, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****12. INCOME TAXES**

For financial reporting purposes, income before income taxes includes the following components:

	Fiscal Years Ended June 30,		
	2014	2013	2012
	(Amounts in thousands)		
United States	\$ 17,033	\$ 65,851	\$ 110,189
Foreign	65,894	71,317	42,830
	\$ 82,927	\$ 137,168	\$ 153,019

The Company's *Income tax expense* consisted of:

	Fiscal Years Ended June 30,		
	2014	2013	2012
	(Amounts in thousands)		
Current:			
Federal	\$ (3,663)	\$ 30,061	\$ 35,556
State	334	368	310
Foreign	30,950	44,749	17,273
	\$ 27,621	\$ 75,178	\$ 53,139
Deferred and others:			
Federal	\$ (4,122)	\$ (4,341)	\$ 77
State	(26)	(27)	
Foreign	(4,018)	(7,051)	1,494
	\$ (8,166)	\$ (11,419)	\$ 1,571
Total income tax expense	\$ 19,455	\$ 63,759	\$ 54,710

The provision for income taxes for the fiscal years ended June 30, 2014, 2013 and 2012, differs from the amount of income tax determined by applying the applicable United States statutory federal

Table of Contents**ROYAL GOLD, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****12. INCOME TAXES (Continued)**

income tax rate to pre-tax income (net of non-controlling interest in income of consolidated subsidiary and loss from equity investment) from operations as a result of the following differences:

	Fiscal Years Ended June 30,		
	2014	2013	2012
	(Amounts in thousands)		
Total expense computed by applying federal rates	\$ 29,024	\$ 48,009	\$ 53,557
State and provincial income taxes, net of federal benefit	334	368	310
Adjustments of valuation allowance			(1,007)
Excess depletion	(1,114)	(1,395)	(1,416)
Estimates for uncertain tax positions	(7,386)	1,868	551
Statutory tax attributable to non-controlling interest	(293)	(1,236)	(2,042)
Effect of foreign earnings	1,141	4,223	511
Effect of foreign earnings indefinitely reinvested	(1,700)		
Effect of recognized loss on available-for-sale securities	562	4,239	
Unrealized foreign exchange gains	(367)	1,146	(546)
Changes in estimates and corrected errors of prior year tax	(594)	4,979	1,075
Other	(152)	1,558	3,717
	\$ 19,455	\$ 63,759	\$ 54,710

The effective tax rate includes the impact of certain undistributed foreign subsidiary earnings for which we have not provided U.S. taxes because we plan to reinvest such earnings indefinitely outside the United States. The Company has the ability and intent to indefinitely reinvest these foreign earnings based on revenue and cash projections of our other investments, current cash on hand, and availability under our revolving credit facility. At June 30, 2014, the relevant foreign subsidiary had an accumulated earnings deficit due to costs incurred prior to earning income in fiscal 2014. No deferred tax has been provided on the difference between the tax basis in the stock of the consolidated subsidiary and the amount of the subsidiary's net equity determined for financial reporting purposes.

During the quarter ended September 30, 2013 as a result of continued review of the June 30, 2012 tax return and financial statement impacts of the return results, the Company recorded a \$1.7 million income tax benefit resulting from an identified error. Additionally, during the quarter ended June 30, 2014, the Company recorded a \$2.6 million income tax expense as a result of continued review of prior year's tax accounts. In accordance with applicable U.S. GAAP, management quantitatively and qualitatively evaluated the materiality of these errors and determined them to be immaterial to the fiscal year 2014 or prior year consolidated financial statements.

Table of Contents**ROYAL GOLD, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****12. INCOME TAXES (Continued)**

The tax effects of temporary differences and carryforwards, which give rise to our deferred tax assets and liabilities at June 30, 2014 and 2013, are as follows:

	2014		2013
	(Amounts in thousands)		
Deferred tax assets:			
Stock-based compensation	\$ 3,511	\$	3,853
Net operating losses	19,322		25,943
Other	7,068		4,460
Total deferred tax assets	29,901		34,256
Valuation allowance	(4,933)		(4,606)
Net deferred tax assets	\$ 24,968	\$	29,650
Deferred tax liabilities:			
Mineral property basis	\$ (158,301)	\$	(165,936)
Unrealized foreign exchange gains	(3,072)		(3,684)
2019 Notes	(20,002)		(23,281)
Other	(2,239)		(3,561)
Total deferred tax liabilities	(183,614)		(196,462)
Total net deferred taxes	\$ (158,646)	\$	(166,812)

The Company reviews the measurement of its deferred tax assets at each balance sheet date. All available evidence, both positive and negative, is considered in determining whether, based upon the weight of the evidence, it is more likely than not that some portion or all of the deferred tax asset will not be realized. As of June 30, 2014 and 2013, the Company had \$4.9 million and \$4.6 million of valuation allowances recorded, respectively. The valuation allowance remaining at June 30, 2014 is primarily attributable to deferred tax asset generated by the recognized loss on available-for-sale securities and the tax basis difference as a result of unrealized losses on foreign exchange.

At June 30, 2014 and 2013, the Company had \$77 million and \$108 million of net operating loss carry forwards, respectively. The decrease in the net operating loss carry forwards is attributable to utilization of net operating losses in non-U.S. subsidiaries. The majority of the tax loss carry forwards are in jurisdictions that allow a twenty year carry forward period. As a result, these losses do not begin to expire until the 2025 tax year, and the Company anticipates the losses will be fully utilized.

As of June 30, 2014 and 2013, the Company had \$13.7 million and \$21.2 million of total gross unrecognized tax benefits, respectively. If recognized, these unrecognized tax benefits would positively

Table of Contents**ROYAL GOLD, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****12. INCOME TAXES (Continued)**

impact the Company's effective income tax rate. A reconciliation of the beginning and ending amount of gross unrecognized tax benefits is as follows:

	2014	2013	2012
	(Amounts in thousands)		
Total gross unrecognized tax benefits at beginning of year	\$ 21,166	\$ 19,469	\$ 18,836
Additions / Reductions for tax positions of current year	(1,052)	2,638	2,051
Reductions due to settlements with taxing authorities	(296)	(941)	
Reductions due to lapse of statute of limitations	(6,093)		(1,418)
Total amount of gross unrecognized tax benefits at end of year	\$ 13,725	\$ 21,166	\$ 19,469

The Company or one of its subsidiaries files income tax returns in the U.S. federal jurisdiction, and various state and foreign jurisdictions. With few exceptions, the Company is no longer subject to U.S. Federal, state and local, and non-U.S. income tax examinations by tax authorities for fiscal years before 2009. As a result of (i) statute of limitations that will begin to expire within the next 12 months in various jurisdictions, (ii) possible settlements of audit-related issues with taxing authorities in various jurisdictions with respect to which none of the issues are individually significant, and (iii) and additional accrual of exposure and interest on existing items the Company believes that it is reasonably possible that the total amount of its net unrecognized income tax benefits will not decrease in the next 12 months.

The Company's continuing practice is to recognize interest and/or penalties related to unrecognized tax benefits as part of its income tax expense. At June 30, 2014 and 2013, the amount of accrued income-tax-related interest and penalties was \$5.4 million and \$4.3 million, respectively.

13. SUPPLEMENTAL CASH FLOW INFORMATION

The Company's supplemental cash flow information for the fiscal years ending June 30, 2014, 2013 and 2012 is as follows:

	2014	2013	2012
	(Amounts in thousands)		
Cash paid during the period for:			
Interest	\$ 10,638	\$ 10,490	\$ 4,590
Income taxes, net of refunds	\$ 27,322	\$ 48,809	\$ 58,520
Non-cash investing and financing activities:			
Dividends declared	\$ 54,049	\$ 47,997	\$ 32,357

14. FAIR VALUE MEASUREMENTS

ASC 820 establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to

Table of Contents**ROYAL GOLD, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****14. FAIR VALUE MEASUREMENTS (Continued)**

unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under ASC 820 are described below:

Level 1: Quoted prices for identical instruments in active markets;

Level 2: Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations in which all significant inputs and significant value drivers are observable in active markets; and

Level 3: Prices or valuation techniques requiring inputs that are both significant to the fair value measurement and unobservable (supported by little or no market activity).

The following table sets forth the Company's financial assets measured at fair value on a recurring basis (at least annually) by level within the fair value hierarchy.

At June 30, 2014

	Carrying Amount	Total	Fair Value		
			Level 1	Level 2	Level 3
Assets (In thousands):					
United States treasury bills ⁽¹⁾	\$ 499,992	\$ 499,992	\$ 499,992	\$	\$
Marketable equity securities ⁽²⁾	\$ 9,608	\$ 9,608	\$ 9,608	\$	\$
Total assets		\$ 509,600	\$ 509,600	\$	\$
Liabilities (In thousands):					
Debt ⁽³⁾	\$ 388,860	\$ 394,050	\$ 394,050	\$	\$
Total liabilities		\$ 394,050	\$ 394,050	\$	\$

(1) Included in *Cash and equivalents* in the Company's consolidated balance sheets.

(2) Included in *Available for sale securities* in the Company's consolidated balance sheets.

(3) Included in the carrying amount is the equity component of our 2019 Notes in the amount of \$77 million, which is included within

Edgar Filing: ROYAL GOLD INC - Form 10-K

Additional paid-in capital in the Company's consolidated balance sheets.

The Company invests primarily in United States treasury bills with maturities of 90 days or less, which are classified within Level 1 of the fair value hierarchy. The Company's marketable equity securities classified within Level 1 of the fair value hierarchy are valued using quoted market prices in active markets. The fair value of the Level 1 marketable equity securities is calculated as the quoted market price of the marketable equity security multiplied by the quantity of shares held by the Company. The Company's debt classified within Level 1 of the fair value hierarchy is valued using quoted prices in an active market.

As of June 30, 2014, the Company also had assets that, under certain conditions, are subject to measurement at fair value on a non-recurring basis like those associated with royalty interests in mineral properties, intangible assets and other long-lived assets. For these assets, measurement at fair value in periods subsequent to their initial recognition is applicable if any of these assets are determined to be impaired. None of these assets were written down to fair value during the fiscal year

Table of Contents**ROYAL GOLD, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****14. FAIR VALUE MEASUREMENTS (Continued)**

ended June 30, 2014. If recognition of these assets at their fair value becomes necessary, such measurements will be determined utilizing Level 3 inputs.

15. MAJOR SOURCES OF REVENUE

Operators that contributed greater than 10% of the Company's total revenue for any of fiscal years 2014, 2013 or 2012 were as follows (revenue amounts in thousands):

Operator	Fiscal Year 2014		Fiscal Year 2013		Fiscal Year 2012	
	Revenue	Percentage of total revenue	Revenue	Percentage of total revenue	Revenue	Percentage of total revenue
Teck	\$ 48,777	20.6%	\$ 82,272	28.4%	\$ 64,075	24.4%
Goldcorp, Inc.	32,339	13.6%	32,461	11.2%	31,407	11.9%
Thompson Creek	27,209	11.5%	N/A	N/A	N/A	N/A
Vale Newfoundland & Labrador Limited	25,128	10.6%	32,517	11.2%	36,030	13.7%

16. COMMITMENTS AND CONTINGENCIES*Phoenix Gold Project Stream Acquisition*

As of June 30, 2014, the Company has a remaining commitment of \$45 million as part of its Phoenix Gold Project stream acquisition in February 2014 (Note 3).

Mt. Milligan Gold Stream Acquisition

The Company's final commitment payment of \$12.9 million to Thompson Creek as part of the Mt. Milligan gold stream acquisition was made in September 2013. The Company has no remaining commitment payments to Thompson Creek as part of the Mt. Milligan gold stream.

Tulsequah Chief Gold and Silver Stream Acquisition

As of June 30, 2014, the Company has a remaining commitment of \$45 million as part of its Tulsequah Chief gold and silver stream acquisition in December 2011, as amended in July 2014, payment of which is subject to satisfaction of certain conditions precedent.

Voisey's Bay

The Company owns a royalty on the Voisey's Bay mine in Newfoundland and Labrador owned by Vale Newfoundland & Labrador Limited ("VNL"). The royalty is owned by the Labrador Nickel Royalty Limited Partnership ("LNRLP"), in which the Company's wholly-owned indirect subsidiary, Canadian Minerals Partnership, is the general partner and 89.99% owner. The remaining interests in LNRLP are owned by Altius Investments Ltd. (10%), a company unrelated to Royal Gold, and the Company's wholly-owned indirect subsidiary, Voisey's Bay Holding Corporation (0.01%).

On October 16, 2009, LNRLP filed a claim in the Supreme Court of Newfoundland and Labrador Trial Division against Vale Inco Limited, now known as Vale Canada Limited ("Vale Canada") and its wholly-owned subsidiaries, Vale Inco Atlantic Sales Limited and VNL, related to the calculation of the

ROYAL GOLD, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

16. COMMITMENTS AND CONTINGENCIES (Continued)

NSR on the sale of concentrates, including nickel concentrates, from the Voisey's Bay mine to Vale Canada. The claim asserts that Vale Canada is incorrectly calculating the NSR and requests an order in respect of the correct calculation of future payments. The claim also requests specific damages for underpayment of past royalties to the date of the claim in an amount not less than \$29 million, together with additional damages until the date of trial, interest, costs and other damages. The litigation is in the discovery phase.

17. RELATED PARTY

Crescent Valley Partners, L.P. ("CVP") was formed as a limited partnership in April 1992. CVP owns the NVR1 royalty on production of minerals from a portion of Cortez. Denver Mining Finance Company ("DMFC"), our wholly-owned subsidiary, is the general partner and held an aggregate 31.633% limited partner interest as of December 31, 2013.

On January 2, 2014, Royal Gold, through its wholly-owned subsidiary, DMFC, increased its ownership interest in the NVR1 royalty by acquiring all or a portion of the limited partnership interests of nine limited partners in CVP, aggregating 49.465% of the outstanding limited partnership interests, for approximately \$11.5 million. The limited partners from whom DMFC acquired limited partnership interests included our former Chairman of the Board of Directors, who sold 3.0% out of his total 3.063% interest; one former member of our Board of Directors, who sold his entire 24.5% interest; and another former member of our Board of Directors, who sold his entire 8.0% interest. As a result of the transaction, DMFC now holds 81.098% of the outstanding limited partnership interests in CVP, equating to a 1.014% net value royalty on production from all of the lands covered by the NVR1 Royalty excluding production from the mining claims comprising the Crossroad Claims at Cortez, and a 0.618% net value royalty on production from the Crossroad Claims. The Crossroad Claims are part of the Pipeline Complex.

CVP receives its royalty from the Cortez Joint Venture in-kind. The Company, as well as certain other limited partners, sell their pro-rata shares of such gold immediately and receive distributions in cash, while CVP holds gold for certain other limited partners. Such gold inventories, which totaled 7,708 and 9,742 ounces of gold as of June 30, 2014 and June 30, 2013, respectively, are held by a third party refinery in Utah for the account of the limited partners of CVP. The inventories are carried at historical cost and are classified within *Other assets* on the Company's consolidated balance sheets. The carrying value of the gold in inventory was approximately \$5.0 million and \$6.1 million as of June 30, 2014 and June 30, 2013, respectively, while the fair value of such ounces was approximately \$10.1 million and \$11.6 million as of June 30, 2014 and June 30, 2013, respectively. None of the gold currently held in inventory as of June 30, 2014 and 2013, is attributed to Royal Gold, as the gold allocated to Royal Gold's CVP partnership interest is typically sold within five days of receipt.

Table of Contents**ROYAL GOLD, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****18. QUARTERLY RESULTS OF OPERATIONS (UNAUDITED)**

The following is a summary of selected quarterly financial information (unaudited). Some amounts in the below table may not sum-up in total as a result of rounding.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

(a) Evaluation of Disclosure Controls and Procedures

As of June 30, 2014, the Company's management, with the participation of the President and Chief Executive Officer (the principal executive officer) and Chief Financial Officer and Treasurer (the principal financial and accounting officer) of the Company, carried out an evaluation of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended (the "Exchange Act")). Based on such evaluation, the Company's President and Chief Executive Officer and its Chief Financial Officer and Treasurer have concluded that, as of June 30, 2014, the Company's disclosure controls and procedures were effective to provide reasonable assurance that information required to be disclosed by the Company in reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the required time periods and that such information is accumulated and communicated to the Company's management, including the President and Chief Executive Officer and its Chief Financial Officer and Treasurer, as appropriate to allow timely decisions regarding required disclosure.

Disclosure controls and procedures involve human diligence and compliance and are subject to lapses in judgment and breakdowns resulting from human failures. As a result, a control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected.

(b) Management's Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act. Our internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles.

Management assessed the effectiveness of our internal control over financial reporting as of June 30, 2014. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in *Internal Control Integrated Framework* (1992 Framework). Based on management's assessment and those criteria, management concluded that, as of June 30, 2014, our internal control over financial reporting is effective.

Our management, including our President and Chief Executive Office (the principal executive officer) and Chief Financial Officer and Treasurer (the principal financial and accounting officer), does not expect that our disclosure controls and procedures or our internal controls will prevent all error and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control

Table of Contents

systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected.

Our independent registered public accounting firm, Ernst & Young LLP, has issued an attestation report on our internal control over financial reporting as of June 30, 2014.

(c) Changes in Internal Control over Financial Reporting

There was no change in the Company's internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act during our fourth fiscal quarter ended June 30, 2014, that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

(d) Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders of Royal Gold, Inc.

We have audited Royal Gold Inc.'s internal control over financial reporting as of June 30, 2014, based on criteria established in Internal Control Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (1992 framework) (the COSO criteria). Royal Gold, Inc.'s management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Royal Gold, Inc. maintained, in all material respects, effective internal control over financial reporting as of June 30, 2014, based on the COSO criteria.

Table of Contents

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Royal Gold, Inc. as of June 30, 2014 and 2013, and the related consolidated statements of operations and comprehensive income, changes in equity and cash flows for each of the three years in the period ended June 30, 2014 of Royal Gold, Inc. and our report dated August 7, 2014 expressed an unqualified opinion thereon.
