	=====	=====

Funds From Operations ("FFO") is a non-GAAP financial measurement used by real estate investment trusts to measure and compare operating performance. As defined by NAREIT, FFO represents net income (loss) before minority interest of unit holders (computed in accordance with GAAP, accounting principles generally accepted in the United States of America), excluding gains (or losses) from debt restructuring and sales of property, plus real estate related depreciation and amortization (excluding amortization of deferred financing costs, amortization of commission and depreciation of non-real estate assets) and after adjustments for unconsolidated partnerships and joint ventures. Management considers FFO an appropriate measure of performance of an equity REIT because, along with cash flows from operating activities, financing activities and investing activities, it provides investors with an understanding of our ability to incur and service debt, and make capital expenditures. FFO should not be considered as an alternative for net income as a measure of profitability or is it comparable to cash flows provided by operating activities determined in accordance with GAAP. FFO is not comparable to similarly entitled items reported by other REITs that do not define them exactly as we define FFO.

- (1) Includes approximately \$912 in amortization expense for the three months ended March 31, 2004 for the amortization of the origination value and fair market value of acquired leases of the San Tomas Technology Park acquisition pursuant to Statement of Financial Accounting Standard ("SFAS") No. 141, "Business Combinations."
- (2) Calculated on a fully diluted basis. Assumes conversion of O.P. units outstanding into the Company's common stock.
- (3) The minority interest for third parties has been deducted from total minority interest in calculating FFO.
- (4) Average monthly rental revenue per square foot has been determined by taking the cash base rent for the period divided by the number of months in the period, and then divided by the average occupied square feet in the period.
