ITEM 2. ACQUISITION OR DISPOSITION OF ASSETS.

On June 1, 2004, Boston Scientific Corporation (the "Registrant") and Advanced Bionics Corporation, a privately held company located in Valencia, CA,

Edgar Filing: BOSTON SCIENTIFIC CORP - Form 8-K

announced the execution of a definitive merger agreement under which the Registrant will acquire 100 percent of the fully diluted equity of Advanced Bionics for an initial payment of approximately \$740 million in cash, plus earn out payments tied to future performance milestones. The acquisition will expand the Registrant's technology portfolio into the rapidly growing implantable microelectronic device market. Advanced Bionics has developed implantable microelectronics for treating numerous neurological disorders. Its neuromodulation technology includes a range of neurostimulators (or implantable pulse generators), programmable drug pumps and cochlear implants.

The acquisition has been structured to include a substantial earnout mechanism. Performance milestones are primarily based on the achievement of net sales, with certain milestone payments also tied to profitability. The milestones are segmented by the four principal technology platforms (cochlear implants, implantable pulse generators, drug pumps and bion microstimulators), each with a 72-month earnout horizon.

There are also bonus earnout payments available based on the attainment of certain aggregate sales performance targets and a certain gross margin level. The transaction is expected to close within days of the announcement. The Registrant expects the acquisition to be modestly dilutive to earnings per share (approximately \$0.04 and \$0.06 in 2004 and 2005, respectively).

ITEM 9. REGULATION FD DISCLOSURE.
