

UMPQUA HOLDINGS CORP
Form 10-Q
May 07, 2015

United States
Securities and Exchange Commission
Washington, D.C. 20549

FORM 10-Q

Quarterly Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934
for the quarterly period ended: March 31, 2015

or

Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934
for the transition period from _____ to _____.

Commission File Number: 001-34624

Umpqua Holdings Corporation

(Exact Name of Registrant as Specified in Its Charter)

OREGON

(State or Other Jurisdiction
of Incorporation or Organization)

93-1261319

(I.R.S. Employer Identification Number)

One SW Columbia Street, Suite 1200
Portland, Oregon 97258

(Address of Principal Executive Offices)(Zip Code)

(503) 727-4100

(Registrant's Telephone Number, Including Area Code)

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, non-accelerated filer, or a smaller reporting company. See definitions of "large accelerated filer," "accelerated filer," and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

Indicate the number of shares outstanding for each of the issuer's classes of common stock, as of the latest practical date:

Common stock, no par value: 220,557,889 shares outstanding as of April 30, 2015

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

Note 1 – Summary of Significant Accounting Policies

The accounting and financial reporting policies of Umpqua Holdings Corporation conform to accounting principles generally accepted in the United States of America. The accompanying interim condensed consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries. All material inter-company balances and transactions have been eliminated. The condensed consolidated financial statements have not been audited. A more detailed description of our accounting policies is included in the 2014 Annual Report filed on Form 10-K. These interim condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and related notes contained in the 2014 Annual Report filed on Form 10-K. All references in this report to "Umpqua," "we," "our," "us," the "Company" or similar references mean Umpqua Holdings Corporation, and include our consolidated subsidiaries where the context so requires. References to "Bank" refer to our subsidiary Umpqua Bank, an Oregon state-chartered commercial bank, and references to "Umpqua Investments" refer to our subsidiary Umpqua Investments, Inc., a registered broker-dealer and investment adviser. The Bank also has a wholly-owned subsidiary, Financial Pacific Leasing Inc., a commercial equipment leasing company.

In preparing these condensed consolidated financial statements, the Company has evaluated events and transactions subsequent to March 31, 2015 for potential recognition or disclosure. In management's opinion, all accounting adjustments necessary to accurately reflect the financial position and results of operations on the accompanying financial statements have been made. These adjustments include normal and recurring accruals considered necessary for a fair and accurate presentation. The results for interim periods are not necessarily indicative of results for the full year or any other interim period. Certain reclassifications of prior period amounts have been made to conform to current classifications.

Application of new accounting guidance

As of January 1, 2015, Umpqua adopted the Financial Accounting Standards Board's ("FASB") Accounting Standard Update ("ASU") No. 2014-01, Investments - Equity Method and Joint Ventures (Topic 323): Accounting for Investments in Qualified Affordable Housing Projects. Application of ASU No. 2014-01 provides for a consistent accounting method for our investments in qualified affordable housing projects using a proportional amortization method. As required by ASU No. 2014-01, the new accounting methodology has been retrospectively applied resulting in changes to other non-interest income, tax expense, and net income, deferred tax asset, other assets, and retained earnings in the prior periods presented. The effect of this change was a decrease in net income of \$109,000 for the quarter ended March 31, 2015. The effect of this change on the revised March 31, 2014 was a decrease in net income of \$113,000. Retained earnings as of January 1, 2014, has been adjusted down by \$3.5 million for the effect of the retroactive application of the new standard.

As of January 1, 2015, Umpqua applied FASB ASU No. 2014-04, Receivables -Troubled Debt Restructurings by Creditors (Subtopic 310-40): Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans upon Foreclosure. ASU 2014-04 clarifies when a repossession or foreclosure has occurred. Additionally, the amendments require interim and annual disclosure of both (1) the amount of foreclosed residential real estate property held by the creditor and (2) the recorded investment in consumer mortgage loans collateralized by residential real estate property that are in the process of foreclosure according to local requirements of the applicable jurisdiction. As of March 31, 2015, Umpqua had \$3.4 million of foreclosed residential real estate property held as other real estate owned. Umpqua's recorded investment in consumer mortgage loans collateralized by residential real estate property in process of foreclosure was \$6.9 million as of March 31, 2015.

Note 2 – Business Combinations

Sterling Financial Corporation

As of the close of business on April 18, 2014, the Company completed its merger with Sterling Financial Corporation, a Washington corporation ("Sterling"). The results of Sterling's operations are included in the Company's financial results beginning April 19, 2014 and the combined company's banking operations are operating under the Umpqua Bank name and brand.

The structure of the transaction was as follows:

• Sterling merged with and into the Company (the "Merger" or the "Sterling Merger") with the Company as the surviving corporation in the Merger;

• Immediately following the Merger, Sterling's wholly owned banking subsidiary, Sterling Savings Bank, merged with and into the Bank (the "Bank Merger"), with the Bank as the surviving bank in the Bank Merger;

• Holders of shares of common stock of Sterling had the right to receive 1.671 shares of the Company's common stock and \$2.18 in cash for each share of Sterling common stock;

Table of Contents

Each outstanding warrant issued by Sterling converted into a warrant exercisable for 1.671 shares of the Company's common stock and \$2.18 in cash for each warrant when exercised;

Each outstanding option to purchase a share of Sterling common stock converted into an option to purchase 1.7896 shares of the Company's common stock, subject to vesting conditions; and

Each outstanding restricted stock unit in respect of Sterling common stock converted into a restricted stock unit in respect of 1.7896 shares of the Company common stock, subject to vesting conditions.

A summary of the consideration paid, the assets acquired and liabilities assumed in the Merger are presented below: (in thousands)

	Sterling April 18, 2014
Fair value of consideration to Sterling shareholders:	
Cash paid	\$ 136,200
Liability recorded for warrants' cash payment per share	6,453
Fair value of common shares issued	1,939,497
Fair value of warrants, common stock options, and restricted stock exchanged	50,317
Total consideration	2,132,467
Fair value of assets acquired:	
Cash and cash equivalents	\$253,067
Investment securities	1,378,300
Loans held for sale	214,911
Loans and leases	7,123,168
Premises and equipment	116,576
Residential mortgage servicing rights	62,770
Other intangible assets	54,562
Other real estate owned	8,666
Bank owned life insurance	193,246
Deferred tax asset	300,015
Accrued interest receivable	23,553
Other assets	148,906
Total assets acquired	9,877,740
Fair value of liabilities assumed:	
Deposits	7,086,052
Securities sold under agreements to repurchase	584,746
Term debt	854,737
Junior subordinated debentures	156,171
Other liabilities	87,902
Total liabilities assumed	\$8,769,608
Net assets acquired	1,108,132
Goodwill	\$1,024,335

The primary reason for the Merger was to continue the Company's growth strategy, including expanding our geographic footprint in markets throughout the West Coast. All of the goodwill recorded has been attributed to the Community Banking segment and reporting unit. None of the goodwill will be deductible for income tax purposes.

Subsequent to acquisition, the Company repaid securities sold under agreements to repurchase acquired of \$500.0 million, funded through the sale of acquired investment securities in the second quarter of 2014. On June 20, 2014, the Company completed the required divestiture of six stores acquired in the Merger to another financial institution. The divestiture of the six stores included \$211.5 million of deposits and \$88.3 million of loans. The assets were sold at a

discount of \$7.0 million, which was recorded by Sterling prior to the Merger.

11

Table of Contents

As of April 18, 2014, the unpaid principal balance on purchased non-impaired loans was \$7.0 billion. The fair value of the purchased non-impaired loans was \$6.7 billion, resulting in a discount of \$230.5 million being recorded on these loans.

The following table presents the acquired purchased impaired loans as of the acquisition date:

(in thousands)	Purchased impaired	
Contractually required principal payments	\$604,136	
Nonaccretable difference	(95,614)
Cash flows expected to be collected	508,522	
Accretable yield	(110,757)
Fair value of purchased impaired loans	\$397,765	

The operations of Sterling are included in our operating results beginning on April 19, 2014, and contributed an estimated net interest income of \$114.0 million and net income of \$33.9 million for the three months ended March 31, 2015.

The following table provides a breakout of Merger related expense for the three months ended March 31, 2015.

(in thousands)	Three Months Ended
	March 31, 2015
Personnel	\$4,367
Legal and professional	3,913
Premises and Equipment	3,017
Communication	434
Other	2,351
Total Merger related expense	\$14,082

Table of Contents

The following table presents unaudited pro forma results of operations for the three months ended March 31, 2014, as if the Sterling Merger had occurred on January 1, 2013. The pro forma results have been prepared for comparative purposes only and are not necessarily indicative of the results that would have been obtained had the acquisition actually occurred on January 1, 2013. The pro forma results include the impact of certain purchase accounting adjustments including accretion of loan discount, intangible assets amortization and deposit and borrowing premium accretion. These purchase accounting adjustments increased pro forma net income by \$16.1 million for the three months ended March 31, 2014.

(in thousands, except per share data)	Pro Forma Three Months Ended March 31, 2014	
Net interest income	\$222,766	(1), (2), (3)
Provision for loan and lease losses	5,971	
Non-interest income	45,018	(4), (5), (6)
Non-interest expense	188,488	(7)
Income before provision for income taxes	73,325	
Provision for income taxes	26,073	
Net income	47,252	
Dividends and undistributed earnings allocated to participating securities	113	
Net earnings available to common shareholders	\$47,139	
Earnings per share:		
Basic	\$0.22	
Diluted	\$0.22	
Average shares outstanding:		
Basic	216,438	
Diluted	217,523	

(1) Includes \$26.7 million of incremental loan discount accretion for the three months ended March 31, 2014.

(2) Includes a reduction of interest income of \$1.5 million related to investment securities premiums amortization for the three months ended March 31, 2014.

(3) Includes a reduction of interest expense of \$4.9 million related to deposit and borrowing premiums amortization for the three months ended March 31, 2014.

(4) Includes a reduction of service charges on deposits of \$1.4 million as a result of passing the \$10 billion asset threshold for the three months ended March 31, 2014.

(5) Includes a loss on junior subordinated debentures carried at fair value of \$952,000 for the three months ended March 31, 2014.

(6) Includes the reversal of the \$7.0 million loss on the required divestiture of six Sterling stores in connection with the merger for the three months ended March 31, 2014.

(7) Includes a net increase of \$5.4 million of merger expenses and \$1.7 million of incremental core deposit intangible amortization for the three months ended March 31, 2014.

Note 3 – Investment Securities

The following table presents the amortized costs, unrealized gains, unrealized losses and approximate fair values of investment securities at March 31, 2015 and December 31, 2014:

(in thousands)	March 31, 2015			
	Amortized Cost	Unrealized Gains	Unrealized Losses	Fair Value
AVAILABLE FOR SALE:				
U.S. Treasury and agencies	\$213	\$16	\$—	\$229
Obligations of states and political subdivisions	321,744	16,398	(540)	337,602
Residential mortgage-backed securities and collateralized mortgage obligations	2,179,212	23,398	(7,409)	2,195,201
Investments in mutual funds and other equity securities	2,016	73	—	2,089
	\$2,503,185	\$39,885	\$(7,949)	\$2,535,121
HELD TO MATURITY:				
Residential mortgage-backed securities and collateralized mortgage obligations	\$4,953	\$478	\$(2)	\$5,429
	\$4,953	\$478	\$(2)	\$5,429
(in thousands)	December 31, 2014			
	Amortized Cost	Unrealized Gains	Unrealized Losses	Fair Value
AVAILABLE FOR SALE:				
U.S. Treasury and agencies	\$213	\$16	\$—	\$229
Obligations of states and political subdivisions	325,189	14,056	(841)	338,404
Residential mortgage-backed securities and collateralized mortgage obligations	1,951,514	17,398	(11,060)	1,957,852
Investments in mutual funds and other equity securities	2,016	54	—	2,070
	\$2,278,932	\$31,524	\$(11,901)	\$2,298,555
HELD TO MATURITY:				
Residential mortgage-backed securities and collateralized mortgage obligations	\$5,088	\$358	\$(15)	\$5,431
Other investment securities	123	—	—	123
	\$5,211	\$358	\$(15)	\$5,554

Investment securities that were in an unrealized loss position as of March 31, 2015 and December 31, 2014 are presented in the following tables, based on the length of time individual securities have been in an unrealized loss position. In the opinion of management, these securities are considered only temporarily impaired due to changes in market interest rates or the widening of market spreads subsequent to the initial purchase of the securities, and not due to concerns regarding the underlying credit of the issuers or the underlying collateral.

Table of Contents

March 31, 2015

(in thousands)

December 31, 2014

(in thousands)

	Less than 12 Months		12 Months or Longer		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
AVAILABLE FOR SALE:						
Obligations of states and political subdivisions	\$11,100	\$547	\$8,550	\$294	\$19,650	\$841
Residential mortgage-backed securities and collateralized mortgage obligations	220,577	815	495,096	10,245	715,673	11,060
Total temporarily impaired securities	\$231,677	\$1,362	\$503,646	\$10,539	\$735,323	\$11,901
HELD TO MATURITY:						
Residential mortgage-backed securities and collateralized mortgage obligations	\$224	\$15	\$—	\$—	\$224	\$15
Total temporarily impaired securities	\$224	\$15	\$—	\$—	\$224	\$15

The unrealized losses on obligations of political subdivisions were caused by changes in market interest rates or the widening of market spreads subsequent to the initial purchase of these securities. Management monitors published credit ratings of these securities and no adverse ratings changes have occurred since the date of purchase of obligations of political subdivisions which are in an unrealized loss position as of March 31, 2015. Because the decline in fair value is attributable to changes in interest rates or widening market spreads and not credit quality, and because the Bank does not intend to sell the securities in this class and it is not likely that the Bank will be required to sell these securities before recovery of their amortized cost basis, which may include holding each security until maturity, the unrealized losses on these investments are not considered other-than-temporarily impaired.

All of the available for sale residential mortgage-backed securities and collateralized mortgage obligations portfolio in an unrealized loss position at March 31, 2015 are issued or guaranteed by governmental agencies. The unrealized losses on residential mortgage-backed securities and collateralized mortgage obligations were caused by changes in market interest rates or the widening of market spreads subsequent to the initial purchase of these securities, and not concerns regarding the underlying credit of the issuers or the underlying collateral. It is expected that these securities will not be settled at a price less than the amortized cost of each investment. Because the decline in fair value is attributable to changes in interest rates or widening market spreads and not credit quality, and because the Bank does not intend to sell the securities in this class and it is not likely that the Bank will be required to sell these securities before recovery of their amortized cost basis, which may include holding each security until contractual maturity, these investments are not considered other-than-temporarily impaired.

Table of Contents

The following table presents the maturities of investment securities at March 31, 2015:

(in thousands)	Available For Sale		Held To Maturity	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
AMOUNTS MATURING IN:				
Three months or less	\$9,860	\$9,888	\$—	\$—
Over three months through twelve months	56,364	57,003	—	—
After one year through five years	1,486,535	1,513,798	29	30
After five years through ten years	758,471	759,196	24	25
After ten years	189,939	193,147	4,900	5,374
Other investment securities	2,016	2,089	—	—
	\$2,503,185	\$2,535,121	\$4,953	\$5,429

The amortized cost and fair value of collateralized mortgage obligations and mortgage-backed securities are presented by expected average life, rather than contractual maturity, in the preceding table. Expected maturities may differ from contractual maturities because borrowers have the right to prepay underlying loans without prepayment penalties. The following table presents the gross realized gains and gross realized losses on the sale of securities available for sale for the three months ended March 31, 2015 and 2014:

(in thousands)	Three Months Ended March 31, 2015		March 31, 2014	
	Gains	Losses	Gains	Losses
Residential mortgage-backed securities and collateralized mortgage obligations	\$316	\$200	\$—	\$—
	\$316	\$200	\$—	\$—

The following table presents, as of March 31, 2015, investment securities which were pledged to secure borrowings, public deposits, and repurchase agreements as permitted or required by law:

(in thousands)	Amortized Cost	Fair Value
To Federal Home Loan Bank to secure borrowings	\$2,044	\$2,130
To state and local governments to secure public deposits	1,608,409	1,633,048
Other securities pledged principally to secure repurchase agreements	449,994	453,419
Total pledged securities	\$2,060,447	\$2,088,597

Table of Contents

Note 4 – Loans and Leases

The following table presents the major types of loans and leases, net of deferred fees and costs, as of March 31, 2015 and December 31, 2014:

(in thousands)	March 31, 2015	December 31, 2014
Commercial real estate		
Non-owner occupied term, net	\$3,303,629	\$3,290,610

Total loans and leases, net of deferred fees and costs	\$15,548,957	\$15,327,732

The loan balances are net of deferred fees and costs of \$31.7 million and \$26.3 million as of March 31, 2015 and December 31, 2014, respectively. Net loans include discounts on acquired loans of \$198.1 million and \$236.6 million as of March 31, 2015 and December 31, 2014, respectively. As of March 31, 2015, loans totaling \$8.4 billion were pledged to secure borrowings and available lines of credit.

The outstanding contractual unpaid principal balance of purchased impaired loans, excluding acquisition accounting adjustments, was \$711.2 million and \$770.9 million at March 31, 2015 and December 31, 2014, respectively. The carrying balance of purchased impaired loans was \$521.1 million and \$562.9 million at March 31, 2015 and December 31, 2014, respectively.

Table of Contents

The following table presents the changes in the accretable yield for purchased impaired loans for the three months ended March 31, 2015 and 2014:

(in thousands)	Three Months Ended March 31, 2015					
	Evergreen	Rainier	Nevada Security	Circle	Sterling	Total

Change in FDIC indemnification asset	(1,286)	(4,840)
Transfers to due from FDIC and other	(1,270)	28
Balance, end of period	\$1,861	\$18,362

Note 5 – Allowance for Loan and Lease Loss and Credit Quality

The Bank's methodology for assessing the appropriateness of the Allowance for Loan and Lease Loss ("ALLL") consists of three key elements: 1) the formula allowance; 2) the specific allowance; and 3) the unallocated allowance. By incorporating these factors into a single allowance requirement analysis, we believe all risk-based activities within the loan and lease portfolios are simultaneously considered.

Formula Allowance

When loans and leases are originated or acquired, they are assigned a risk rating that is reassessed periodically during the term of the loan or lease through the credit review process. The Bank's risk rating methodology assigns risk

ratings ranging from 1 to 10, where a higher rating represents higher risk. The 10 risk rating categories are a primary factor in determining an appropriate amount for the formula allowance.

Table of Contents

The formula allowance is calculated by applying risk factors to various segments of pools of outstanding loans and leases. Risk factors are assigned to each portfolio segment based on management's evaluation of the losses inherent within each segment. Segments or regions with greater risk of loss will therefore be assigned a higher risk factor.

Base risk – The portfolio is segmented into loan categories, and these categories are assigned a Base risk factor based on an evaluation of the loss inherent within each segment.

Extra risk – Additional risk factors provide for an additional allocation of ALLL based on the loan and lease risk rating system and loan delinquency, and reflect the increased level of inherent losses associated with more adversely classified loans and leases.

Risk factors may be changed periodically based on management's evaluation of the following factors: loss experience; changes in the level of non-performing loans and leases; regulatory exam results; changes in the level of adversely classified loans and leases; improvement or deterioration in local economic conditions; and any other factors deemed relevant.

Specific Allowance

Regular credit reviews of the portfolio identify loans that are considered potentially impaired. Potentially impaired loans are referred to the ALLL Committee which reviews and approves designated loans as impaired. A loan is considered impaired when, based on current information and events, we determine that we will probably not be able to collect all amounts due according to the loan contract, including scheduled interest payments. When we identify a loan as impaired, we measure the impairment using discounted cash flows or estimated note sale price, except when the sole remaining source of the repayment for the loan is the liquidation of the collateral. In these cases, we use the current fair value of the collateral, less selling costs, instead of discounted cash flows. If we determine that the value of the impaired loan is less than the recorded investment in the loan, we either recognize an impairment reserve as a specific allowance to be provided for in the allowance for loan and lease losses or charge-off the impaired balance on collateral-dependent loans if it is determined that such amount represents a confirmed loss. Loans determined to be impaired are excluded from the formula allowance so as not to double-count the loss exposure. The non-accrual impaired loans as of period-end have already been partially charged-off to their estimated net realizable value, and are expected to be resolved over the coming quarters with no additional material loss, absent further decline in market prices.

The combination of the formula allowance component and the specific allowance component represents the allocated allowance for loan and lease losses.

Management believes that the ALLL was adequate as of March 31, 2015. There is, however, no assurance that future loan and lease losses will not exceed the levels provided for in the ALLL and could possibly result in additional charges to the provision for loan and lease losses.

The reserve for unfunded commitments ("RUC") is established to absorb inherent losses associated with our commitment to lend funds, such as with a letter or line of credit. The adequacy of the ALLL and RUC are monitored on a regular basis and are based on management's evaluation of numerous factors. These factors include the quality of the current loan portfolio; the trend in the loan portfolio's risk ratings; current economic conditions; loan concentrations; loan growth rates; past-due and non-performing trends; evaluation of specific loss estimates for all significant problem loans; historical charge-off and recovery experience; and other pertinent information.

There have been no significant changes to the Bank's ALLL methodology or policies in the periods presented.

Table of Contents

Activity in the Allowance for Loan and Lease Losses

The following table summarizes activity related to the allowance for loan and lease losses by loan and lease portfolio segment for the three months ended March 31, 2015 and 2014:

(in thousands)	Three Months Ended March 31, 2015				
	Commercial Real Estate	Commercial	Residential	Consumer & Other	Total
Balance, beginning of period	\$55,184	\$41,216	\$15,922	\$3,845	\$116,167

Residential development	—	605
Commercial		
Term	2,340	15,996
Residential		
Mortgage	66,753	331
Total	\$72,847	\$22,272

Asset Quality and Non-Performing Loans and Leases

We manage asset quality and control credit risk through diversification of the loan and lease portfolio and the application of policies designed to promote sound underwriting and loan and lease monitoring practices. The Bank's Credit Quality Administration is charged with monitoring asset quality, establishing credit policies and procedures and enforcing the consistent application of these policies and procedures across the Bank. Reviews of non-performing, past due loans and leases and larger credits, designed to identify potential charges to the allowance for loan and lease losses, and to determine the adequacy of the allowance, are conducted on an ongoing basis. These reviews consider such factors as the financial strength of borrowers, the value of the applicable collateral, loan and lease loss experience, estimated loan and lease losses, growth in the loan and lease portfolio, prevailing economic conditions and other factors.

Impaired Loans

Loans with no related allowance reported generally represent non-accrual loans. The Bank recognizes the charge-off on impaired loans in the period it arises for collateral-dependent loans. Therefore, the non-accrual loans as of March 31, 2015 have already been written down to their estimated net realizable value and are expected to be resolved with no additional material loss, absent further decline in market prices. The valuation allowance on impaired loans primarily represents the impairment reserves on performing restructured loans, and is measured by comparing the present value of expected future cash flows on the restructured loans discounted at the interest rate of the original loan agreement to the loan's carrying value.

The impaired loans for which these interest income amounts were recognized primarily relate to accruing restructured loans.

Credit Quality Indicators

As previously noted, the Bank's risk rating methodology assigns risk ratings ranging from 1 to 10, where a higher rating represents higher risk. The Bank differentiates its lending portfolios into homogeneous loans and leases and non-homogeneous loans and leases. The 10 risk rating categories can be generally described by the following groupings for non-homogeneous loans and leases:

Minimal Risk—A minimal risk loan or lease, risk rated 1, is to a borrower of the highest quality. The borrower has an unquestioned ability to produce consistent profits and service all obligations and can absorb severe market disturbances with little or no difficulty.

Low Risk—A low risk loan or lease, risk rated 2, is similar in characteristics to a minimal risk loan. Margins may be smaller or protective elements may be subject to greater fluctuation. The borrower will have a strong demonstrated ability to produce profits, provide ample debt service coverage and to absorb market disturbances.

Modest Risk—A modest risk loan or lease, risk rated 3, is a desirable loan or lease with excellent sources of repayment and no currently identifiable risk associated with collection. The borrower exhibits a very strong capacity to repay the credit in accordance with the repayment agreement. The borrower may be susceptible to economic cycles, but will have reserves to weather these cycles.

Average Risk—An average risk loan or lease, risk rated 4, is an attractive loan or lease with sound sources of repayment and no material collection or repayment weakness evident. The borrower has an acceptable capacity to pay in accordance with the agreement. The borrower is susceptible to economic cycles and more efficient competition, but should have modest reserves sufficient to survive all but the most severe downturns or major setbacks.

Acceptable Risk—An acceptable risk loan or lease, risk rated 5, is a loan or lease with lower than average, but still acceptable credit risk. These borrowers may have higher leverage, less certain but viable repayment sources, have limited financial reserves and may possess weaknesses that can be adequately mitigated through collateral, structural or credit enhancement. The

26

Table of Contents

borrower is susceptible to economic cycles and is less resilient to negative market forces or financial events. Reserves may be insufficient to survive a modest downturn.

Watch—A watch loan or lease, risk rated 6, is still pass-rated, but represents the lowest level of acceptable risk due to an emerging risk element or declining performance trend. Watch ratings are expected to be temporary, with issues resolved or manifested to the extent that a higher or lower rating would be appropriate. The borrower should have a plausible plan, with reasonable certainty of success, to correct the problems in a short period of time.

Special Mention—A special mention loan or lease, risk rated 7, has potential weaknesses that deserve management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the asset or the institution's credit position at some future date. They contain unfavorable characteristics and are generally undesirable. Loans and leases in this category are currently protected but are potentially weak and constitute an undue and unwarranted credit risk, but not to the point of a substandard classification. A special mention loan or lease has potential weaknesses, which if not checked or corrected, weaken the asset or inadequately protect the Bank's position at some future date.

Substandard—A substandard asset, risk rated 8, is inadequately protected by the current sound worth and paying capacity of the obligor or of the collateral pledged, if any. Assets so classified must have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the Bank will sustain some loss if the deficiencies are not corrected. Loss potential, while existing in the aggregate amount of substandard assets, does not have to exist in individual assets classified substandard. Loans and leases are classified as substandard when they have unsatisfactory characteristics causing unacceptable levels of risk. A substandard loan or lease normally has one or more well-defined weaknesses that could jeopardize repayment of the debt. The likely need to liquidate assets to correct the problem, rather than repayment from successful operations is the key distinction between special mention and substandard.

Doubtful—Loans or leases classified as doubtful, risk rated 9, have all the weaknesses inherent in one classified substandard with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions and values, highly questionable and improbable. The possibility of loss is extremely high, but because of certain important and reasonably specific pending factors, which may work towards strengthening of the asset, classification as a loss (and immediate charge-off) is deferred until more exact status may be determined. Pending factors include proposed merger, acquisition, liquidation procedures, capital injection, and perfection of liens on additional collateral and refinancing plans. In certain circumstances, a doubtful rating will be temporary, while the Bank is awaiting an updated collateral valuation. In these cases, once the collateral is valued and appropriate margin applied, the remaining un-collateralized portion will be charged-off. The remaining balance, properly margined, may then be upgraded to substandard, however must remain on non-accrual.

Loss—Loans or leases classified as loss, risk rated 10, are considered un-collectible and of such little value that the continuance as an active Bank asset is not warranted. This rating does not mean that the loan or lease has no recovery or salvage value, but rather that the loan or lease should be charged-off now, even though partial or full recovery may be possible in the future.

Impaired—Loans are classified as impaired when, based on current information and events, it is probable that the Bank will be unable to collect the scheduled payments of principal and interest when due, in accordance with the terms of the original loan agreement, without unreasonable delay. This generally includes all loans classified as non-accrual and troubled debt restructurings. Impaired loans are risk rated for internal and regulatory rating purposes, but presented separately for clarification.

Homogeneous loans and leases are not risk rated until they are greater than 30 days past due, and risk rating is based on the past due status of the loan or lease. The risk rating categories can be generally described by the following groupings for commercial and commercial real estate homogeneous loans and leases:

Special Mention—A homogeneous special mention loan or lease, risk rated 7, is greater than 30 to 59 days past due from the required payment date at month-end.

Substandard—A homogeneous substandard loan or lease, risk rated 8, is 60 to 89 days past due from the required payment date at month-end.

Doubtful—A homogeneous doubtful loan or lease, risk rated 9, is 90 to 179 days past due from the required payment date at month-end.

Table of Contents

Loss—A homogeneous loss loan or lease, risk rated 10, is 180 days and more past due from the required payment date. These loans are generally charged-off in the month in which the 180 day time period elapses.

The risk rating categories can be generally described by the following groupings for residential and consumer and other homogeneous loans:

Special Mention—A homogeneous retail special mention loan, risk rated 7, is greater than 30 to 89 days past due from the required payment date at month-end.

Substandard—A homogeneous retail substandard loan, risk rated 8, is an open-end loan 90 to 180 days past due from the required payment date at month-end or a closed-end loan 90 to 120 days past due from the required payment date at month-end.

Loss—A homogeneous retail loss loan, risk rated 10, is a closed-end loan that becomes past due 120 cumulative days or an open-end retail loan that becomes past due 180 cumulative days from the contractual due date. These loans are generally charged-off in the month in which the 120 or 180 day period elapses.

The following table summarizes our internal risk rating by loan and lease class for the loan and lease portfolio as of March 31, 2015 and December 31, 2014:

(1) The percentage of impaired loans classified as pass/watch, special mention, substandard, doubtful, and loss was 5.6%, 15.1%, 77.9%, 0.1% and 1.3% respectively, as of December 31, 2014.

Troubled Debt Restructurings

At March 31, 2015 and December 31, 2014, impaired loans of \$60.9 million and \$54.8 million, respectively, were classified as accruing restructured loans. The restructurings were granted in response to borrower financial difficulty, and generally provide for a temporary modification of loan repayment terms. The restructured loans on accrual status represent the only impaired loans accruing interest. In order for a restructured loan to be considered for accrual status, the loan's collateral coverage generally will be greater than or equal to 100% of the loan balance, the loan is current on payments, and the borrower must either prefund an interest reserve or demonstrate the ability to make payments from a verified source of cash flow. Impaired restructured loans carry a specific allowance and the allowance on impaired restructured loans is calculated consistently across the portfolios.

There were \$3.8 million available commitments for troubled debt restructurings outstanding as of March 31, 2015 and \$1.0 million as of December 31, 2014.

The following tables present troubled debt restructurings by accrual versus non-accrual status and by loan class as of March 31, 2015 and December 31, 2014:

(in thousands)	March 31, 2015		
	Accrual Status	Non-Accrual Status	Total Modifications
Commercial real estate, net	\$48,593	\$677	\$49,270

Edgar Filing: UMPQUA HOLDINGS CORP - Form 10-Q

Commercial, net	8,718	3,333	12,051
Residential, net	3,585	—	3,585
Total, net of deferred fees and costs	\$60,896	\$4,010	\$64,906

29

Table of Contents

(in thousands)	December 31, 2014		
	Accrual Status	Non-Accrual Status	Total Modifications
Commercial real estate, net	\$48,817	\$2,319	\$51,136
Commercial, net	5,404	9,541	14,945
Residential, net	615	—	615
Total, net of deferred fees and costs	\$54,836	\$11,860	\$66,696

The Bank's policy is that loans placed on non-accrual will typically remain on non-accrual status until all principal and interest payments are brought current and the prospect for future payment in accordance with the loan agreement appears relatively certain. The Bank's policy generally refers to six months of payment performance as sufficient to warrant a return to accrual status.

There were no new restructured loans during the three months ended March 31, 2014. The following table presents newly restructured loans that occurred during the three months ended March 31, 2015:

(in thousands)	Three Months Ended March 31, 2015					
	Rate Modifications	Term Modifications	Interest Only Modifications	Payment Modifications	Combination Modifications	Total Modifications
Commercial, net	\$—	\$—	\$—	\$—	\$3,349	\$3,349
Residential, net	—	74	—	—	2,944	3,018
Total, net of deferred fees and costs	\$—	\$74	\$—	\$—	\$6,293	\$6,367

For the periods presented in the tables above, the outstanding recorded investment was the same pre and post modification.

There were no financing receivables modified as troubled debt restructurings within the previous 12 months for which there was a payment default during the three months ended March 31, 2015 and 2014.

Note 6—Goodwill and Other Intangible Assets

The following tables summarize the changes in the Company's goodwill and other intangible assets for the year ended December 31, 2014, and the three months ended March 31, 2015. Goodwill and all other intangible assets are related to the Community Banking segment.

(in thousands)	Goodwill		
	Gross	Accumulated Impairment	Total
Balance, December 31, 2013	\$877,239	\$(112,934)	\$764,305
Net additions	1,021,920	—	1,021,920
Balance, December 31, 2014	1,899,159	(112,934)	1,786,225
Net additions	2,415	—	2,415
Balance, March 31, 2015	\$1,901,574	\$(112,934)	\$1,788,640

Goodwill represents the excess of the total acquisition price paid over the fair value of the assets acquired, net of the fair values of liabilities assumed. Additional information on the acquisitions and acquisition price allocations is

provided in Note 2. The additions to goodwill in 2015 of \$2.4 million relate to acquisition accounting adjustments.

Table of Contents

(in thousands)	Other Intangible Assets		
	Gross	Accumulated Amortization	Net
Balance, December 31, 2013	\$58,909	\$(46,531))\$12,378
Net additions	54,562	—	54,562
Amortization	—	(10,207))(10,207)
Balance, December 31, 2014	113,471	(56,738))56,733
Net additions	—	—	—
Amortization	—	(2,806))(2,806)
Balance, March 31, 2015	\$113,471	\$(59,544))\$53,927

Intangible additions in 2014 relate to the Merger and represent the value of the core deposits, which includes all deposits except certificates of deposit. The value of the core deposit intangible assets were determined by an analysis of the cost differential between the core deposits inclusive of estimated servicing costs and alternative funding sources. The core deposit intangible recorded in connection with the Merger will be amortized on an accelerated basis over a period of 10 years.

The Company conducts its annual evaluation of goodwill for impairment as of its year end of December 31. Goodwill and other intangibles are required to be analyzed for impairment if certain triggering events occur. During the three months ended March 31, 2015, management determined that no triggering events occurred that required an impairment analysis. The table below presents the forecasted amortization expense for other intangible assets acquired in all mergers:

(in thousands)	Expected Amortization
Year	
Remainder of 2015	\$8,419
2016	8,622
2017	6,756
2018	6,166
2019	5,618
Thereafter	18,346
	\$53,927

Note 7 – Residential Mortgage Servicing Rights

The following table presents the changes in the Company's residential mortgage servicing rights ("MSR") for the three months ended March 31, 2015 and 2014:

(in thousands)	Three Months Ended March 31,	
	2015	2014
Balance, beginning of period	\$117,259	\$47,765
Additions for new MSR capitalized	8,837	2,408
Changes in fair value:		
Due to changes in model inputs or assumptions(1)	(4,143))(1,087)
Other(2)	(5,588))134
Balance, end of period	\$116,365	\$49,220

(1) Principally reflects changes in discount rates and prepayment speed assumptions, which are primarily affected by changes in interest rates.

31

Table of Contents

(2) Represents changes due to collection/realization of expected cash flows over time.

Information related to our residential mortgage serviced loan portfolio as of March 31, 2015 and December 31, 2014 is as follows:

(dollars in thousands)	March 31, 2015	December 31, 2014	
Balance of residential mortgage loans serviced for others	\$11,874,910	\$11,590,310	
MSR as a percentage of serviced loans	0.98	% 1.01	%

The amount of contractually specified servicing fees, late fees and ancillary fees earned, recorded in residential mortgage banking revenue, was \$6.5 million for the three months ended March 31, 2015, as compared to \$3.0 million for the three months ended March 31, 2014.

Key assumptions used in measuring the fair value of MSR as of March 31, 2015 and December 31, 2014 are as follows:

	March 31, 2015	December 31, 2014	
Constant prepayment rate	13.44	% 12.39	%
Discount rate	9.17	% 9.17	%
Weighted average life (years)	6.0	6.4	

A sensitivity analysis of the current fair value to changes in discount and prepayment speed assumptions as of March 31, 2015 and December 31, 2014 is as follows:

(in thousands)	March 31, 2015	December 31, 2014	
Constant prepayment rate			
Effect on fair value of a 10% adverse change	\$(5,095)) \$(4,965)
Effect on fair value of a 20% adverse change	\$(9,787)) \$(9,547)
Discount rate			
Effect on fair value of a 100 basis point adverse change	\$(4,293)) \$(4,539)
Effect on fair value of a 200 basis point adverse change	\$(8,271)) \$(8,771)

The sensitivity analysis presents the hypothetical effect on fair value of the MSR. The effect of such hypothetical change in assumptions generally cannot be extrapolated because the relationship of the change in an assumption to the change in fair value is not linear. Additionally, in the analysis, the impact of an adverse change in one assumption is calculated independent of any impact on other assumptions. In reality, changes in one assumption may change another assumption.

Note 8 – Junior Subordinated Debentures

Following is information about the Company's wholly-owned trusts ("Trusts") as of March 31, 2015:
(dollars in thousands)

Trust Name	Issue Date	Issued Amount	Carrying Value (1)	Rate (2)	Effective Rate (3)	Maturity Date
AT FAIR VALUE:						
Umpqua Statutory Trust II	October 2002	\$20,619	\$15,182	Floating rate, LIBOR plus 3.35%, adjusted quarterly	4.92%	October 2032
Umpqua Statutory Trust III	October 2002	30,928	22,961	Floating rate, LIBOR plus 3.45%, adjusted quarterly	5.01%	November 2032
Umpqua Statutory Trust IV	December 2003	10,310	7,188	Floating rate, LIBOR plus 2.85%, adjusted quarterly	4.48%	January 2034
Umpqua Statutory Trust V	December 2003	10,310	7,166	Floating rate, LIBOR plus 2.85%, adjusted quarterly	4.49%	March 2034
Umpqua Master Trust I	August 2007	41,238	23,670	Floating rate, LIBOR plus 1.35%, adjusted quarterly	2.81%	September 2037
Umpqua Master Trust IB	September 2007	20,619	13,834	Floating rate, LIBOR plus 2.75%, adjusted quarterly	4.50%	December 2037
Sterling Capital Trust III	April 2003	14,433	11,165	Floating rate, LIBOR plus 3.25%, adjusted quarterly	4.55%	April 2033
Sterling Capital Trust IV	May 2003	10,310	7,889	Floating rate, LIBOR plus 3.15%, adjusted quarterly	4.46%	May 2033
Sterling Capital Statutory Trust V	May 2003	20,619	15,841	Floating rate, LIBOR plus 3.25%, adjusted quarterly	4.57%	June 2033
Sterling Capital Trust VI	June 2003	10,310	7,867	Floating rate, LIBOR plus 3.20%, adjusted quarterly	4.54%	September 2033
Sterling Capital Trust VII	June 2006	56,702	33,710	Floating rate, LIBOR plus 1.53%, adjusted quarterly	3.00%	June 2036
Sterling Capital Trust VIII	September 2006	51,547	30,983	Floating rate, LIBOR plus 1.63%, adjusted quarterly	3.15%	December 2036
Sterling Capital Trust IX	July 2007	46,392	26,768	Floating rate, LIBOR plus 1.40%, adjusted quarterly	2.88%	October 2037
Lynnwood Financial Statutory Trust I	March 2003	9,279	7,050	Floating rate, LIBOR plus 3.15%, adjusted quarterly	4.50%	March 2033
	June 2005	10,310	6,453		3.30%	June 2035

Table of Contents

- Includes purchase accounting adjustments, net of accumulated amortization, for junior subordinated
- (1) debentures assumed in connection with previous mergers as well as fair value adjustments related to trusts recorded at fair value.
 - (2) Contractual interest rate of junior subordinated debentures.
 - (3) Effective interest rate based upon the carrying value as of March 31, 2015.

The Trusts are reflected as junior subordinated debentures in the Condensed Consolidated Balance Sheets. The common stock issued by the Trusts is recorded in other assets in the Condensed Consolidated Balance Sheets, and totaled \$14.3 million at March 31, 2015 and December 31, 2014. As of March 31, 2015, all of the junior subordinated debentures were redeemable at par, at their applicable quarterly or semiannual interest payment dates.

The Company selected the fair value measurement option for junior subordinated debentures originally issued by the Company (the Umpqua Statutory Trusts) and for junior subordinated debentures acquired from Sterling. Refer to Note 15 for discussion of the rationale for election of fair value and the approach used to fair value the selected junior subordinated debentures.

Absent changes to the significant inputs utilized in the discounted cash flow model used to measure the fair value of these instruments, the discounts will reverse over time in a manner similar to the effective interest rate method as if these instruments were accounted for under the amortized cost method. Losses recorded resulting from the change in the fair value of these instruments were \$1.6 million and \$542,000 for the three months ended March 31, 2015 and 2014, respectively.

Note 9 – Commitments and Contingencies

Lease Commitments — As of March 31, 2015, the Bank leased 281 sites under non-cancelable operating leases. The leases contain various provisions for increases in rental rates, based either on changes in the published Consumer Price Index or a predetermined escalation schedule. Substantially all of the leases provide the Company with the option to extend the lease term one or more times following expiration of the initial term.

Rent expense for the three months ended March 31, 2015 was \$9.3 million and for the three months ended March 31, 2014 was \$5.0 million. Rent expense was partially offset by rent income for the three months ended March 31, 2015 of \$118,000 and for the three months ended March 31, 2014 of \$177,000.

Financial Instruments with Off-Balance-Sheet Risk — The Company's financial statements do not reflect various commitments and contingent liabilities that arise in the normal course of the Bank's business and involve elements of credit, liquidity, and interest rate risk.

The following table presents a summary of the Bank's commitments and contingent liabilities:

(in thousands)	As of March 31, 2015
Commitments to extend credit	\$2,996,411
Commitments to extend overdrafts	\$940,366
Forward sales commitments	\$692,900
Commitments to originate residential mortgage loans held for sale	\$458,378
Standby letters of credit	\$56,622

The Bank is a party to financial instruments with off-balance-sheet credit risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit, standby

letters of credit and financial guarantees. Those instruments involve elements of credit and interest-rate risk similar to the risk involved in on-balance sheet items recognized in the Condensed Consolidated Balance Sheets. The contract or notional amounts of those instruments reflect the extent of the Bank's involvement in particular classes of financial instruments.

The Bank's exposure to credit loss in the event of nonperformance by the other party to the financial instrument for commitments to extend credit and standby letters of credit, and financial guarantees written, is represented by the contractual notional amount of those instruments. The Bank uses the same credit policies in making commitments and conditional obligations as it does for on-balance-sheet instruments.

Table of Contents

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any covenant or condition established in the applicable contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. While most standby letters of credit are not utilized, a significant portion of such utilization is on an immediate payment basis. The Bank evaluates each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained, if it is deemed necessary by the Bank upon extension of credit, is based on management's credit evaluation of the counterparty. Collateral varies but may include cash, accounts receivable, inventory, premises and equipment and income-producing commercial properties.

Standby letters of credit and financial guarantees written are conditional commitments issued by the Bank to guarantee the performance of a customer to a third party. These guarantees are primarily issued to support public and private borrowing arrangements, including international trade finance, commercial paper, bond financing and similar transactions. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. The Bank holds cash, marketable securities, or real estate as collateral supporting those commitments for which collateral is deemed necessary. The Bank was not required to perform on any financial guarantees during the three months ended March 31, 2015 and March 31, 2014. At March 31, 2015, approximately \$47.8 million of standby letters of credit expire within one year, and \$8.8 million expire thereafter. Upon issuance, the Bank recognizes a liability equivalent to the amount of fees received from the customer for these standby letter of credit commitments. Fees are recognized ratably over the term of the standby letter of credit. The estimated fair value of guarantees associated with standby letters of credit was \$1.1 million as of March 31, 2015.

Residential mortgage loans sold into the secondary market are sold with limited recourse against the Company, meaning that the Company may be obligated to repurchase or otherwise reimburse the investor for incurred losses on any loans that suffer an early payment default, are not underwritten in accordance with investor guidelines or are determined to have pre-closing borrower misrepresentations. As of March 31, 2015, the Company had a residential mortgage loan repurchase reserve liability of \$3.3 million.

Legal Proceedings—The Bank owns 483,806 shares of Class B common stock of Visa Inc. which are convertible into Class A common stock at a conversion ratio of 1.6483 per Class A share. As of March 31, 2015, the closing value of the Class A shares was \$65.48 per share. Utilizing the conversion ratio, the value of unredeemed Class A equivalent shares owned by the Bank was \$52.2 million as of March 31, 2015, and has not been reflected in the accompanying financial statements. The shares of Visa Inc. Class B common stock are restricted and may not be transferred. Visa member banks are required to fund an escrow account to cover settlements, resolution of pending litigation and related claims. If the funds in the escrow account are insufficient to settle all the covered litigation, Visa Inc. may sell additional Class A shares and use the proceeds to settle litigation, thereby reducing the conversion ratio. If funds remain in the escrow account after all litigation is settled, the Class B conversion ratio will be increased to reflect that surplus.

On July 13, 2012, Visa Inc. announced that it had entered into a memorandum of understanding obligating it to enter into a settlement agreement to resolve the multi-district interchange litigation brought by the class plaintiffs in the matter styled *In re Payment Card Interchange Fee and Merchant Discount Antitrust Litigation*, Case No. 5-MD-1720 (JG) (JO) pending in the U.S. District Court for the Eastern District of New York. The claims originally were brought by a class of U.S. retailers in 2005. The settlement was approved by the court on December 13, 2013, but that decision is currently being appealed. Visa's share of the previously agreed settlement amount was approximately \$4.4 billion. However, because of the pending appeal, the ultimate effect of this settlement on the value of the Bank's Class B common stock is unknown at this time.

In the ordinary course of business, various claims and lawsuits are brought by and against the Company and its subsidiaries, including the Bank and Umpqua Investments. In the opinion of management, there is no pending or threatened proceeding in which an adverse decision could result in a material adverse change in the Company's consolidated financial condition or results of operations.

Concentrations of Credit Risk— The Bank grants real estate mortgage, real estate construction, commercial, agricultural and installment loans and leases to customers throughout Oregon, Washington, California, Idaho, and Nevada. In management's judgment, a concentration exists in real estate-related loans, which represented approximately 80% of the Bank's loan and lease portfolio at March 31, 2015 and December 31, 2014. Commercial real estate concentrations are managed to assure wide geographic and business diversity. Although management believes such concentrations have no more than the normal risk of collectability, a substantial decline in the economy in general, material increases in interest rates, changes in tax policies, tightening credit or refinancing markets, or a decline in real estate values in the Bank's primary market areas in particular, could have an adverse impact on the repayment of these loans. Personal and business incomes, proceeds from the sale of real property, or proceeds from refinancing, represent the primary sources of repayment for a majority of these loans.

Table of Contents

The Bank recognizes the credit risks inherent in dealing with other depository institutions. Accordingly, to prevent excessive exposure to any single correspondent, the Bank has established general standards for selecting correspondent banks as well as internal limits for allowable exposure to any single correspondent. In addition, the Bank has an investment policy that sets forth limitations that apply to all investments with respect to credit rating and concentrations with an issuer.

Note 10 – Derivatives

The Bank may use derivatives to hedge the risk of changes in the fair values of interest rate lock commitments, residential mortgage loans held for sale, and residential mortgage servicing rights. None of the Company's derivatives are designated as hedging instruments. Rather, they are accounted for as free-standing derivatives, or economic hedges, with changes in the fair value of the derivatives reported in income. The Company primarily utilizes forward interest rate contracts in its derivative risk management strategy.

The Bank enters into forward delivery contracts to sell residential mortgage loans or mortgage-backed securities to broker/dealers at specific prices and dates in order to hedge the interest rate risk in its portfolio of mortgage loans held for sale and its residential mortgage loan commitments. Credit risk associated with forward contracts is limited to the replacement cost of those forward contracts in a gain position. There were no counterparty default losses on forward contracts in the three months ended March 31, 2015 and 2014. Market risk with respect to forward contracts arises principally from changes in the value of contractual positions due to changes in interest rates. The Bank limits its exposure to market risk by monitoring differences between commitments to customers and forward contracts with broker/dealers. In the event the Company has forward delivery contract commitments in excess of available mortgage loans, the Company completes the transaction by either paying or receiving a fee to or from the broker/dealer equal to the increase or decrease in the market value of the forward contract. At March 31, 2015, the Bank had commitments to originate mortgage loans held for sale totaling \$458.4 million and forward sales commitments of \$692.9 million, which are used to hedge both on-balance sheet and off-balance sheet exposures.

The Bank's mortgage banking derivative instruments do not have specific credit risk-related contingent features. The forward sales commitments do have contingent features that may require transferring collateral to the broker/dealers upon their request. However, this amount would be limited to the net unsecured loss exposure at such point in time and would not materially affect the Company's liquidity or results of operations.

The Bank executes interest rate swaps with commercial banking customers to facilitate their respective risk management strategies. Those interest rate swaps are simultaneously hedged by offsetting the interest rate swaps that the Bank executes with a third party, such that the Bank minimizes its net risk exposure. As of March 31, 2015, the Bank had 325 interest rate swaps with an aggregate notional amount of \$1.5 billion related to this program.

In connection with the interest rate swap program with commercial customers, the Bank has agreements with its derivative counterparties that contain a provision where if the Bank defaults on any of its indebtedness, including default where repayment of the indebtedness has not been accelerated by the lender, then the Bank could also be declared in default on its derivative obligations. The Bank also has agreements with its derivative counterparties that contain a provision where if the Bank fails to maintain its status as a well/adequately capitalized institution, then the counterparty could terminate the derivative positions and the Bank would be required to settle its obligations under the agreements. Similarly, the Bank could be required to settle its obligations under certain of its agreements if specific regulatory events occur, such as if the Bank were issued a prompt corrective action directive or a cease and desist order, or if certain regulatory ratios fall below specified levels. If the Bank had breached any of these provisions at March 31, 2015, it could have been required to settle its obligations under the agreements at the termination value.

As of March 31, 2015, the termination value of derivatives in a net liability position, which includes accrued interest but excludes any adjustment for nonperformance risk, related to these agreements was \$41.0 million. The Bank has collateral posting requirements for initial or variation margins with its clearing members and clearing houses and has been required to post collateral against its obligations under these agreements of \$59.5 million and \$43.5 million as of March 31, 2015 and December 31, 2014, respectively.

The Bank incorporates credit valuation adjustments ("CVA") to appropriately reflect nonperformance risk in the fair value measurement of its derivatives. As of March 31, 2015, the net CVA decreased the settlement values of the Bank's net derivative assets by \$2.7 million. Various factors impact changes in the CVA over time, including changes in the credit spreads of the parties to the contracts, as well as changes in market rates and volatilities, which affect the total expected exposure of the derivative instruments.

Table of Contents

The following tables summarize the types of derivatives, separately by assets and liabilities, and the fair values of such derivatives as of March 31, 2015 and December 31, 2014:

(in thousands)	Asset Derivatives		Liability Derivatives	
	March 31, 2015	December 31, 2014	March 31, 2015	December 31, 2014
Derivatives not designated as hedging instrument				
Interest rate lock commitments	\$7,025	\$2,867	\$—	\$—
Interest rate forward sales commitments	264	16	4,243	2,627
Interest rate swaps	37,487	26,327	40,101	28,158
Total	\$44,776	\$29,210	\$44,344	\$30,785

The fair values of the derivatives are recorded in other assets and other liabilities. The following table summarizes the types of derivatives and the gains (losses) recorded during the three months ended March 31, 2015 and 2014:

(in thousands)	Three months ended March 31,	
	2015	2014
Derivatives not designated as hedging instrument		
Interest rate lock commitments	\$4,157	\$688
Interest rate forward sales commitments	(5,104)	(2,648)
Interest rate swaps	(781)	(1,214)
Total	\$(1,728)	\$(3,174)

The gains and losses on the Company's mortgage banking derivatives are included in mortgage banking revenue. The gains and losses on the Company's interest rate swaps are included in other income.

The following table summarizes the derivatives that have a right of offset as of March 31, 2015 and December 31, 2014:

(in thousands)	Gross Amounts of Recognized Assets/Liabilities	Gross Amounts Offset in the Statement of Financial Position	Net Amounts of Assets/Liabilities presented in the Statement of Financial Position	Gross Amounts Not Offset in the Statement of Financial Position		
				Financial Instruments	Collateral Posted	Net Amount
March 31, 2015						
Derivative Assets						
Interest rate swaps	\$ 37,487	\$—	\$ 37,487	\$—	\$—	\$37,487
Derivative Liabilities						
Interest rate swaps	\$ 40,101	\$—	\$ 40,101	\$—	\$(40,101)	\$—
December 31, 2014						
Derivative Assets						
Interest rate swaps	\$ 26,327	\$—	\$ 26,327	\$(131)	\$—	\$26,196
Derivative Liabilities						
Interest rate swaps	\$ 28,158	\$—	\$ 28,158	\$(131)	\$(28,027)	\$—

Table of Contents

Note 11 – Shareholders' Equity and Stock Compensation

On April 18, 2014, the Company completed the Merger with Sterling. The details of the conversion of Sterling common stock, stock options, and restricted stock units are included in Note 2. The conversion resulted in the issuance of 104,385,087 shares of common stock, 994,214 restricted stock units, and 439,921 stock options granted. Additionally, the 2,960,238 outstanding Sterling warrants were converted into warrants exercisable to receive 1.671 shares of Umpqua stock per warrant, with an exercise price of \$12.88 as of the merger date. In November 2014, the warrants were net exercised in full for 2,889,896 shares and \$6.6 million, and are no longer outstanding.

At a special meeting on February 25, 2014, the Company's shareholders approved an amendment to the Company's articles of incorporation, effective on April 18, 2014, increasing the number of authorized shares of common stock to 400,000,000.

Stock-Based Compensation

The compensation cost related to stock options, restricted stock and restricted stock units (included in salaries and employee benefits) was \$3.2 million for the three months ended March 31, 2015, as compared to \$1.5 million for the three months ended March 31, 2014. The total income tax benefit recognized related to stock-based compensation was \$1.2 million for the three months ended March 31, 2015 as compared to \$614,000 for the three months ended March 31, 2014.

The following table summarizes information about stock option activity for the three months ended March 31, 2015: (in thousands, except per share data)

	Three Months Ended March 31, 2015			
	Options Outstanding	Weighted-Avg Exercise Price	Weighted-Avg Remaining Contractual Term (Years)	Aggregate Intrinsic Value
Balance, beginning of period	807	\$ 16.80		
Granted/Assumed	—	\$ —		
Exercised	(18) \$ 7.88		
Forfeited/expired	(188) \$ 23.99		
Balance, end of period	601	\$ 14.81	4.75	\$ 2,392
Options exercisable, end of period	509	\$ 15.28	4.19	\$ 1,930

The total intrinsic value (which is the amount by which the stock price exceeded the exercise price on the date of exercise) of options exercised during the three months ended March 31, 2015 was \$1.9 million, as compared to the three months ended March 31, 2014 of \$1.4 million.

During the three months ended March 31, 2015, the amount of cash received from the exercise of stock options was \$89,000, as compared to the three months ended March 31, 2014 of \$897,000. Total consideration was \$144,000 for the three months ended March 31, 2015, as compared to the three months ended March 31, 2014 of \$2.6 million.

The fair value of each option grant is estimated as of the grant date using the Black-Scholes option-pricing model. There were no stock options granted in the three months ended March 31, 2015 and March 31, 2014.

Table of Contents

The Company grants restricted stock periodically for the benefit of employees and directors. Restricted shares issued prior to 2011 generally vest on an annual basis over five years. Restricted shares issued since 2011 generally vest over a three year period, subject to time or time plus performance vesting conditions. The following table summarizes information about nonvested restricted share activity for the three months ended March 31, 2015:

(in thousands, except per share data)	Three Months Ended March 31, 2015	
	Restricted Shares Outstanding	Weighted Average Grant Date Fair Value
Balance, beginning of period	1,386	\$ 15.39
Granted/Assumed	552	\$ 16.04
Released	(321) \$ 13.26
Forfeited/expired	(13) \$ 11.63
Balance, end of period	1,604	\$ 16.29

The total fair value of restricted shares vested and released during the three months ended March 31, 2015 was \$5.1 million as compared to the three months ended March 31, 2014 of \$5.5 million.

The Company granted restricted stock units as a part of the 2007 Long Term Incentive Plan for the benefit of certain executive officers. In addition, the Company granted restricted stock units in connection with the acquisition of Sterling as replacement awards. Restricted stock unit grants may be subject to performance-based vesting as well as other approved vesting conditions. The total number of restricted stock units granted represents the maximum number of restricted stock units eligible to vest based upon the performance and service conditions set forth in the grant agreements.

(in thousands, except per share data)	Three Months Ended March 31, 2015	
	Restricted Stock Units Outstanding	Weighted Average Grant Date Fair Value
Balance, beginning of period	675	\$ 18.03
Granted/Assumed	—	\$—
Released	(85) \$ 16.83
Forfeited/expired	(13) \$ 17.20
Balance, end of period	577	\$ 18.58

The total fair value of restricted stock units vested and released during the three months ended March 31, 2015 was \$1.4 million as compared to the three months ended March 31, 2014 of \$1.3 million.

As of March 31, 2015, there was \$240,000 of total unrecognized compensation cost related to nonvested stock options which is expected to be recognized over a weighted-average period of 2.02 years. As of March 31, 2015, there was \$15.4 million of total unrecognized compensation cost related to nonvested restricted stock awards which is expected to be recognized over a weighted-average period of 1.76 years. As of March 31, 2015, there was \$7.2 million of total unrecognized compensation cost related to nonvested restricted stock units which is expected to be recognized over a weighted-average period of 2.29 years, assuming expected performance conditions are met.

For the three months ended March 31, 2015, the Company received income tax benefits of \$2.7 million, as compared to the three months ended March 31, 2014 of \$3.3 million, related to the exercise of non-qualified employee stock options, disqualifying dispositions on the exercise of incentive stock options, the vesting of restricted shares and the vesting of restricted stock units. In the three months ended March 31, 2015, the Company had net excess tax benefit

(tax benefit resulting from tax deductions greater than the compensation cost recognized) of \$528,000, as compared to \$1.1 million of net excess tax benefit for the three months ended March 31, 2014.

Table of Contents

Note 12 – Income Taxes

The Company and its subsidiaries file income tax returns in the U.S. federal jurisdiction, as well as in the majority of states and in Canada. The Company acquired a \$276.8 million net deferred tax asset before purchase accounting adjustments in the Merger, including \$238.4 million of federal and state net operating loss ("NOL") and tax credit carry-forwards. The Merger triggered an "ownership change" as defined in Section 382 of the Internal Revenue Service Code ("Section 382"). As a result of being subject to Section 382, the Company will be limited in the amount of federal NOL carry-forwards that can be used annually to offset future taxable income. The Company believes it is more likely than not that it will be able to fully realize the benefit of its federal NOL carry-forwards. The Company also believes that it is more likely than not that the benefit from certain state and foreign NOL and tax credit carry-forwards will not be realized and therefore has provided a valuation allowance of \$2.6 million against the deferred tax assets relating to these NOL and tax credit carry-forwards.

The Company had gross unrecognized tax benefits of \$2.8 million as of March 31, 2015. If recognized, the unrecognized tax benefit would reduce the 2015 annual effective tax rate by 0.6%. During the three months ended March 31, 2015, the Company reversed \$13,000 of interest relating to its liability for unrecognized tax benefits. Interest on unrecognized tax benefits is reported by the Company as a component of tax expense. As of March 31, 2015, the accrued interest related to unrecognized tax benefits was \$385,000.

Note 13 – Earnings Per Common Share

Nonvested share-based payment awards that contain nonforfeitable rights to dividends or dividend equivalents are participating securities and are included in the computation of earnings per share pursuant to the two-class method. The two-class method is an earnings allocation formula that determines earnings per share for each class of common stock and participating security according to dividends declared (or accumulated) and participation rights in undistributed earnings. Certain of the Company's nonvested restricted stock awards qualify as participating securities.

Net earnings is allocated between the common stock and participating securities pursuant to the two-class method. Basic earnings per common share is computed by dividing net earnings available to common shareholders by the weighted average number of common shares outstanding during the period, excluding participating nonvested restricted shares.

Diluted earnings per common share is computed in a similar manner, except that first the denominator is increased to include the number of additional common shares that would have been outstanding if potentially dilutive common shares, excluding the participating securities, were issued using the treasury stock method. For all periods presented, stock options, certain restricted stock awards and restricted stock units are the only potentially dilutive non-participating instruments issued by the Company. Next, we determine and include in diluted earnings per common share calculation the more dilutive effect of the participating securities using the treasury stock method or the two-class method. Undistributed losses are not allocated to the nonvested share-based payment awards (the participating securities) under the two-class method as the holders are not contractually obligated to share in the losses of the Company.

Table of Contents

The following is a computation of basic and diluted earnings per common share for the three months ended March 31, 2015 and 2014:

(in thousands, except per share data)	Three Months Ended March 31,	
	2015	2014
NUMERATORS:		
Net income	\$47,129	\$18,651
Less:		
Dividends and undistributed earnings allocated to participating securities (1)	84	113
Net earnings available to common shareholders	\$47,045	\$18,538
DENOMINATORS:		
Weighted average number of common shares outstanding - basic	220,349	112,170
Effect of potentially dilutive common shares (2)	702	197
Weighted average number of common shares outstanding - diluted	221,051	112,367
EARNINGS PER COMMON SHARE:		
Basic	\$0.21	\$0.17
Diluted	\$0.21	\$0.16

(1) Represents dividends paid and undistributed earnings allocated to nonvested restricted stock awards.

(2) Represents the effect of the assumed exercise of stock options, vesting of non-participating restricted shares, and vesting of restricted stock units, based on the treasury stock method.

The following table presents the weighted average outstanding securities that were not included in the computation of diluted earnings per common share because their effect would be anti-dilutive for the three months ended March 31, 2015 and 2014.

(in thousands)	Three Months Ended March 31,	
	2015	2014
Stock options	—	336

Note 14 – Segment Information

The Company operates two primary segments: Community Banking and Home Lending. The Community Banking segment's principal business focus is the offering of loan and deposit products to business and retail customers in its primary market areas. As of March 31, 2015, the Community Banking segment operated 385 locations throughout Oregon, Washington, California, Idaho, and Nevada.

The Home Lending segment, which operates as a division of the Bank, originates, sells and services residential mortgage loans.

In the second quarter of 2014, the Company combined its Wealth Management segment into the Community Banking segment as Wealth Management no longer met the definition of an operating segment. The segment results for comparable periods have been modified to reflect the current period presentation.

Table of Contents

Summarized financial information concerning the Company's reportable segments and the reconciliation to the consolidated financial results is shown in the following tables:

(in thousands)	Three Months Ended March 31, 2015		
	Community	Home	Consolidated
	Banking	Lending	
Interest income	\$207,628	\$22,232	\$229,860
Interest expense	12,019	1,933	13,952
Net interest income	195,609	20,299	215,908
Provision for loan and lease losses	12,637	—	12,637

(1) Principally represents U.S. Treasury and agencies or residential mortgage-backed securities issued or guaranteed by governmental agencies.

The following methods were used to estimate the fair value of each class of financial instrument above:

Cash and Cash Equivalents— For short-term instruments, including cash and due from banks, and interest bearing deposits with banks, the carrying amount is a reasonable estimate of fair value.

Securities— Fair values for investment securities are based on quoted market prices when available or through the use of alternative approaches, such as matrix or model pricing, or broker indicative bids, when market quotes are not readily accessible or available. Management periodically reviews the pricing information received from the third-party pricing service and compares it to a secondary pricing service, evaluating significant price variances between services to determine an appropriate estimate of fair value to report.

Loans Held for Sale— Fair value for residential mortgage loans held for sale is determined based on quoted secondary market prices for similar loans, including the implicit fair value of embedded servicing rights.

Loans and Leases— Fair values are estimated for portfolios of loans with similar financial characteristics. Loans are segregated by type, including commercial, real estate and consumer loans. Each loan category is further segregated by fixed and adjustable rate loans. The fair value of loans is calculated by discounting expected cash flows at rates which similar loans are currently being made. These amounts are discounted further by embedded probable losses expected to be realized in the portfolio.

Restricted Equity Securities— The carrying value of restricted equity securities approximates fair value as the shares can only be redeemed by the issuing institution at par.

45

Table of Contents

Residential Mortgage Servicing Rights— The fair value of mortgage servicing rights is estimated using a discounted cash flow model. Assumptions used include market discount rates, anticipated prepayment speeds, delinquency and foreclosure rates, and ancillary fee income net of servicing costs. This model is periodically validated by an independent external model validation group. The model assumptions and the MSR fair value estimates are also compared to observable trades of similar portfolios as well as to MSR broker valuations and industry surveys, as available. Management believes the significant inputs utilized are indicative of those that would be used by market participants.

Bank Owned Life Insurance Assets— Fair values of insurance policies owned are based on the insurance contract's cash surrender value.

FDIC Indemnification Asset— The FDIC indemnification asset is calculated as the expected future cash flows under the loss-share agreement discounted by a rate reflective of the creditworthiness of the FDIC as would be required from the market.

Visa Inc. Class B Common Stock— The fair value of Visa Class B common stock is estimated by applying a 5% discount to the value of the unredeemed Class A equivalent shares. The discount primarily represents the risk related to the further potential reduction of the conversion ratio between Class B and Class A shares and a liquidity risk premium.

Deposits— The fair value of deposits with no stated maturity, such as non-interest bearing deposits, savings and interest checking accounts, and money market accounts, is equal to the amount payable on demand. The fair value of certificates of deposit is based on the discounted value of contractual cash flows. The discount rate is estimated using the rates currently offered for deposits of similar remaining maturities.

Securities Sold under Agreements to Repurchase— For short-term instruments, including securities sold under agreements to repurchase and federal funds purchased, the carrying amount is a reasonable estimate of fair value.

Term Debt— The fair value of medium term notes is calculated based on the discounted value of the contractual cash flows using current rates at which such borrowings can currently be obtained.

Junior Subordinated Debentures— The fair value of junior subordinated debentures is estimated using an income approach valuation technique. The significant inputs utilized in the estimation of fair value of these instruments are the credit risk adjusted spread and three month LIBOR. The credit risk adjusted spread represents the nonperformance risk of the liability, contemplating the inherent risk of the obligation. The Company periodically utilizes an external valuation firm to determine or validate the reasonableness of inputs and factors that are used to determine the fair value. The ending carrying (fair) value of the junior subordinated debentures measured at fair value represents the estimated amount that would be paid to transfer these liabilities in an orderly transaction amongst market participants. Due to credit concerns in the capital markets and inactivity in the trust preferred markets that have limited the observability of market spreads, we have classified this as a Level 3 fair value measure.

Derivative Instruments— The fair value of the interest rate lock commitments and forward sales commitments are estimated using quoted or published market prices for similar instruments, adjusted for factors such as pull-through rate assumptions based on historical information, where appropriate. The pull-through rate assumptions are considered Level 3 valuation inputs and are significant to the interest rate lock commitment valuation; as such, the interest rate lock commitment derivatives are classified as Level 3. The fair value of the interest rate swaps is determined using a discounted cash flow technique incorporating credit valuation adjustments to reflect nonperformance risk in the measurement of fair value. Although the Bank has determined that the majority of the inputs used to value its interest rate swap derivatives fall within Level 2 of the fair value hierarchy, the CVA

associated with its derivatives utilize Level 3 inputs, such as estimates of current credit spreads to evaluate the likelihood of default by itself and its counterparties. However, as of March 31, 2015, the Bank has assessed the significance of the impact of the CVA on the overall valuation of its interest rate swap positions and has determined that the CVA are not significant to the overall valuation of its interest rate swap derivatives. As a result, the Bank has classified its interest rate swap derivative valuations in Level 2 of the fair value hierarchy.

Table of Contents

Assets and Liabilities Measured at Fair Value Using Significant Unobservable Inputs (Level 3)

The following table provides a description of the valuation technique, significant unobservable inputs, and qualitative information about the unobservable inputs for the Company's assets and liabilities classified as Level 3 and measured at fair value on a recurring basis at March 31, 2015:

Financial Instrument	Valuation Technique	Unobservable Input	Weighted Average (Range)
Residential mortgage servicing rights	Discounted cash flow	Constant Prepayment Rate	13.44%
		Discount Rate	9.17%
Interest rate lock commitment	Internal Pricing Model	Pull-through rate	81.90%
Junior subordinated debentures	Discounted cash flow	Credit Spread	6.04%

Generally, any significant increases in the constant prepayment rate and discount rate utilized in the fair value measurement of the residential mortgage servicing rights will result in negative fair value adjustments (and a decrease in the fair value measurement). Conversely, a decrease in the constant prepayment rate and discount rate will result in a positive fair value adjustment (and increase in the fair value measurement).

An increase in the pull-through rate utilized in the fair value measurement of the interest rate lock commitment derivative will result in positive fair value adjustments (and an increase in the fair value measurement.) Conversely, a decrease in the pull-through rate will result in a negative fair value adjustment (and a decrease in the fair value measurement.)

Management believes that the credit risk adjusted spread utilized in the fair value measurement of the junior subordinated debentures carried at fair value is indicative of the nonperformance risk premium a willing market participant would require under current market conditions, that is, the inactive market. Management attributes the change in fair value of the junior subordinated debentures during the period to market changes in the nonperformance expectations and pricing of this type of debt, and not as a result of changes to our entity-specific credit risk. The widening of the credit risk adjusted spread above the Company's contractual spreads has primarily contributed to the positive fair value adjustments. Future contractions in the credit risk adjusted spread relative to the spread currently utilized to measure the Company's junior subordinated debentures at fair value as of March 31, 2015, or the passage of time, will result in negative fair value adjustments. Generally, an increase in the credit risk adjusted spread and/or a decrease in the three month LIBOR swap curve will result in positive fair value adjustments (and decrease the fair value measurement). Conversely, a decrease in the credit risk adjusted spread and/or an increase in the three month LIBOR swap curve will result in negative fair value adjustments (and increase the fair value measurement).

Table of Contents

The following table provides a reconciliation of assets and liabilities measured at fair value using significant unobservable inputs (Level 3) on a recurring basis during the three months ended March 31, 2015 and 2014.

(in thousands)

Three Months Ended March 31,	Beginning Balance	Change included in earnings	Purchases and issuances	Sales and settlements	Ending Balance	Net change in unrealized gains or (losses) relating to items held at end of period
2015						
Residential mortgage servicing rights	\$117,259	\$(9,731)) \$8,837	\$—	\$116,365	\$(7,771)
Interest rate lock commitment, net	2,867	(2,868)) 19,061	(12,036)	7,025	7,025
Junior subordinated debentures, at fair value	249,294	3,878	—	(2,520)	250,652	3,878
2014						
Residential mortgage servicing rights	\$47,765	\$(953)) \$2,408	\$—	\$49,220	\$(394)
Interest rate lock commitment, net	706	(706)) 4,634	(3,240)	1,394	1,394
Junior subordinated debentures, at fair value	87,274	1,490	—	(964)	87,800	1,490

Losses on residential mortgage servicing rights carried at fair value are recorded in residential mortgage banking revenue within non-interest income. Gains (losses) on interest rate lock commitments carried at fair value are recorded in residential mortgage banking revenue within non-interest income. Gains (losses) on junior subordinated debentures carried at fair value are recorded in non-interest income. The contractual interest expense on the junior subordinated debentures is recorded on an accrual basis as interest on junior subordinated debentures within interest expense. Settlements related to the junior subordinated debentures represent the payment of accrued interest that is embedded in the fair value of these liabilities.

Additionally, from time to time, certain assets are measured at fair value on a nonrecurring basis. These adjustments to fair value generally result from the application of lower-of-cost-or-market accounting or write-downs of individual assets due to impairment.

Table of Contents

Fair Value of Assets and Liabilities Measured at Fair Value on a Nonrecurring Basis

The following table presents information about the Company's assets and liabilities measured at fair value on a nonrecurring basis for which a nonrecurring change in fair value has been recorded during the reporting period. The amounts disclosed below represent the fair values at the time the nonrecurring fair value measurements were made, and not necessarily the fair value as of the dates reported upon.

(in thousands)	March 31, 2015			
	Total	Level 1	Level 2	Level 3
Loans and leases	\$26,946	\$—	\$—	\$26,946
Other real estate owned	6,521	—	—	6,521
	\$33,467	\$—	\$—	\$33,467

(in thousands)	December 31, 2014			
	Total	Level 1	Level 2	Level 3
Loans and leases	\$14,720	\$—	\$—	\$14,720
Other real estate owned	12,741	—	—	12,741
	\$27,461	\$—	\$—	\$27,461

The following table presents the losses resulting from nonrecurring fair value adjustments for the three months ended March 31, 2015 and 2014:

(in thousands)	Three Months Ended	
	March 31, 2015	2014
Loans and leases	\$10,483	\$2,585
Other real estate owned	2,392	99
Total loss from nonrecurring measurements	\$12,875	\$2,684

The following provides a description of the valuation technique and inputs for the Company's assets and liabilities classified as Level 3 and measured at fair value on a nonrecurring basis. Unobservable inputs and qualitative information about the unobservable inputs are not presented as the fair value is determined by third-party information. The loans and leases amount above represents impaired, collateral dependent loans that have been adjusted to fair value. When we identify a collateral dependent loan as impaired, we measure the impairment using the current fair value of the collateral, less selling costs. Depending on the characteristics of a loan, the fair value of collateral is generally estimated by obtaining external appraisals. If we determine that the value of the impaired loan is less than the recorded investment in the loan, we recognize this impairment and adjust the carrying value of the loan to fair value through the allowance for loan and lease losses. The loss represents charge-offs or impairments on collateral dependent loans for fair value adjustments based on the fair value of collateral.

The other real estate owned amount above represents impaired real estate that has been adjusted to fair value. Other real estate owned represents real estate which the Bank has taken control of in partial or full satisfaction of loans. At the time of foreclosure, other real estate owned is recorded at the lower of the carrying amount of the loan or fair value less costs to sell, which becomes the property's new basis. Any write-downs based on the asset's fair value at the date of acquisition are charged to the allowance for loan and lease losses. After foreclosure, management periodically performs valuations such that the real estate is carried at the lower of its new cost basis or fair value, net of estimated costs to sell. Fair value adjustments on other real estate owned are recognized within net loss on real estate owned. The loss represents impairments on other real estate owned for fair value adjustments based on the fair value of the real estate.

Table of Contents

Fair Value Option

The following table presents the difference between the aggregate fair value and the aggregate unpaid principal balance of loans held for sale accounted for under the fair value option as of March 31, 2015 and December 31, 2014:

(in thousands)	March 31, 2015			December 31, 2014		
	Fair Value	Aggregate Unpaid Principal Balance	Fair Value Less Aggregate Unpaid Principal Balance	Fair Value	Aggregate Unpaid Principal Balance	Fair Value Less Aggregate Unpaid Principal Balance
Loans held for sale	\$406,487	\$389,056	\$17,431	\$286,802	\$274,245	\$12,557

Residential mortgage loans held for sale accounted for under the fair value option are measured initially at fair value with subsequent changes in fair value recognized in earnings. Gains and losses from such changes in fair value are reported as a component of residential mortgage banking revenue, net in the Consolidated Statements of Income. For the three months ended March 31, 2015, the Company recorded a net increase of \$4.9 million. For the three months ended March 31, 2014, the Company recorded a net increase of \$324,000, representing the change in fair value reflected in earnings.

There were no nonaccrual residential mortgage loans held for sale or residential mortgage loans held for sale 90 days or more past due and still accruing interest as of March 31, 2015 and December 31, 2014, respectively.

The Company selected the fair value measurement option for existing junior subordinated debentures (the Umpqua Statutory Trusts) and for junior subordinated debentures acquired from Sterling. The remaining junior subordinated debentures were acquired through previous business combinations and were measured at fair value at the time of acquisition and subsequently measured at amortized cost.

Accounting for the selected junior subordinated debentures at fair value enables us to more closely align our financial performance with the economic value of those liabilities. Additionally, we believe it improves our ability to manage the market and interest rate risks associated with the junior subordinated debentures. The junior subordinated debentures measured at fair value and amortized cost are presented as separate line items on the balance sheet. The ending carrying (fair) value of the junior subordinated debentures measured at fair value represents the estimated amount that would be paid to transfer these liabilities in an orderly transaction amongst market participants under current market conditions as of the measurement date.

Due to inactivity in the junior subordinated debenture market and the lack of observable quotes of our, or similar, junior subordinated debenture liabilities or the related trust preferred securities when traded as assets, we utilize an income approach valuation technique to determine the fair value of these liabilities using our estimation of market discount rate assumptions. The Company monitors activity in the trust preferred and related markets, to the extent available, changes related to the current and anticipated future interest rate environment, and considers our entity-specific creditworthiness, to validate the reasonableness of the credit risk adjusted spread and effective yield utilized in our discounted cash flow model. Regarding the activity in and condition of the junior subordinated debt market, we noted no observable changes in the current period as it relates to companies comparable to our size and condition, in either the primary or secondary markets. Relating to the interest rate environment, we considered the change in slope and shape of the forward LIBOR swap curve in the current period, the effects of which did not result in a significant change in the fair value of these liabilities.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward-Looking Statements

This Report contains certain forward-looking statements, within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934, which are intended to be covered by the safe harbor for "forward-looking statements" provided by the Private Securities Litigation Reform Act of 1995. These statements may include statements that expressly or implicitly predict future results, performance or events. Statements other than statements of historical fact are forward-looking statements. You can find many of these statements by looking for words such as "anticipates," "expects," "believes," "estimates" and "intends" and words or phrases of similar meaning. We make forward-looking statements regarding our liquidity and projected sources of funds and use of proceeds; availability of acquisition and growth opportunities; dividends; adequacy of our allowance for loan and lease losses and reserve for unfunded commitments; provision for loan and lease losses; performance of troubled debt restructurings; our commercial real estate portfolio, stress testing results and subsequent charge-offs; the FDIC indemnification asset; the benefits of the Sterling and FinPac acquisitions; cost of interest bearing deposits and pricing strategy; valuation and the potential redemption of junior subordinated debentures; the impact of Basel III on our capital ratios; tax rates; the impact, and mitigation of, LIBOR changes with respect to junior subordinated debentures; and the impact of accounting pronouncements. Forward-looking statements involve substantial risks and uncertainties, many of which are difficult to predict and are generally beyond our control. There are many factors that could cause actual results to differ materially from those contemplated by these forward-looking statements. Risks and uncertainties include those set forth in our filings with the Securities and Exchange Commission (the "SEC") and the following factors that might cause actual results to differ materially from those presented:

- our ability to attract new deposits and loans and leases;
- demand for financial services in our market areas;
- competitive market pricing factors;
- deterioration in economic conditions that could result in increased loan and lease losses;
- risks associated with concentrations in real estate related loans;
- market interest rate volatility;
- compression of our net interest margin;
- stability of funding sources and continued availability of borrowings;
- changes in legal or regulatory requirements or the results of regulatory examinations that could restrict growth;
- our ability to recruit and retain key management and staff;
- availability of, and competition for, acquisition opportunities;
- risks associated with merger and acquisition integration;
- significant decline in the market value of the Company that could result in an impairment of goodwill;
- our ability to raise capital or incur debt on reasonable terms;
- regulatory limits on the Bank's ability to pay dividends to the Company;
- the impact of the Dodd-Frank Wall Street Reform and Consumer Protection Act ("Dodd-Frank Act") and related rules and regulations on the Company's business operations and competitiveness, including our ability to retain and recruit executives, the Company's interest expense, FDIC deposit insurance assessments, regulatory compliance expenses, and interchange fee revenue.
- Sterling's business may not be integrated into Umpqua's successfully, or such integration may take longer to accomplish than expected;
- the anticipated benefits, growth opportunities and cost savings from the Merger may not be fully realized or may take longer to realize than expected;
- operating costs, customer losses and business disruption following the Merger, including adverse developments in relationships with employees, may be greater than expected; and
- management's time and effort will be diverted to the resolution of Merger-related issues.

Table of Contents

There are many factors that could cause actual results to differ materially from those contemplated by these forward-looking statements. Forward-looking statements are made as of the date of this Form 10-Q. We do not intend to update these forward-looking statements. Readers should consider any forward-looking statements in light of this explanation, and we caution readers about relying on forward-looking statements.

General

Umpqua Holdings Corporation (referred to in this report as "we," "our," "Umpqua," and "the Company"), an Oregon corporation, is a financial holding company with two principal operating subsidiaries, Umpqua Bank (the "Bank") and Umpqua Investments, Inc. ("Umpqua Investments").

With headquarters located in Roseburg, Oregon, the Bank is considered one of the most innovative community banks in the United States and has implemented a variety of retail marketing strategies to increase revenue and differentiate itself from its competition. The Bank combines a high touch customer experience with the sophisticated products and expertise of a commercial bank. The Bank provides a wide range of banking, wealth management, mortgage and other financial services to corporate, institutional and individual customers. The Bank also has a wholly-owned subsidiary, Financial Pacific Leasing, Inc., a commercial equipment leasing company.

Umpqua Investments is a registered broker-dealer and registered investment advisor with offices in Portland, Lake Oswego, and Medford, Oregon, and Santa Rosa, California, and also offers products and services through Umpqua Bank stores. The firm is one of the oldest investment companies in the Northwest and is actively engaged in the communities it serves. Umpqua Investments offers a full range of investment products and services including: stocks, fixed income securities (municipal, corporate, and government bonds, CDs, and money market instruments), mutual funds, annuities, options, retirement planning, money management services and life insurance.

Along with its subsidiaries, the Company is subject to the regulations of state and federal agencies and undergoes periodic examinations by these regulatory agencies.

Executive Overview

Significant items for the three months ended March 31, 2015 were as follows:

Financial Performance

Net earnings available to common shareholders per diluted common share were \$0.21 for the three months ended March 31, 2015, as compared to \$0.16 for the three months ended March 31, 2014. Operating income per diluted common share, defined as earnings available to common shareholders before net gains or losses on junior subordinated debentures carried at fair value, net of tax and merger related expenses, net of tax, divided by the same diluted share total used in determining diluted earnings per common share, were \$0.26 for the three months ended March 31, 2015, as compared to operating income per diluted common share of \$0.21 for the three months ended March 31, 2014. Operating income per diluted share is considered a "non-GAAP" financial measure. More information regarding this measurement and reconciliation to the comparable GAAP measurement is provided under the heading Results of Operations - Overview below.

Net interest margin, on a tax equivalent basis, was 4.53% for the three months ended March 31, 2015, as compared to 4.28% for the three months ended March 31, 2014. The increase in net interest margin for the three months ended March 31, 2015 was primarily attributable to the acquisition of Sterling and the related loan discount accretion and deposit premium amortization.

Residential mortgage banking revenue was \$28.2 million for the three months ended March 31, 2015 compared to \$10.4 million for the three months ended March 31, 2014. The increase from the same period of the prior year was primarily driven by an increase in closed for sale mortgage volume, which increased by 321.9% in the three months ended March 31, 2015, compared to the prior year same period, primarily due to the Sterling Merger. This increase in closed for sale mortgage volume was partially offset by a lower gain on sale margin.

Table of Contents

Total gross loans and leases were \$15.5 billion as of March 31, 2015, an increase of \$221.2 million, as compared to December 31, 2014. The increase is due to loan growth in both the commercial and consumer loan portfolios, partially offset by portfolio loan sales of \$72.8 million.

Total deposits were \$17.2 billion as of March 31, 2015, an increase of \$330.5 million, as compared to December 31, 2014. This increase was primarily driven by an increase in non-interest bearing demand, savings and money market accounts, partially offset by a decrease in time deposits.

Total consolidated assets were \$23.0 billion as of March 31, 2015, compared to \$22.6 billion at December 31, 2014.

Credit Quality

- Non-performing assets decreased to \$82.7 million, or 0.36% of total assets, as of March 31, 2015, as compared to \$97.5 million, or 0.43% of total assets, as of December 31, 2014. Non-performing loans were \$50.7 million, or 0.33% of total loans, as of March 31, 2015, as compared to \$59.6 million, or 0.39% of total loans, as of December 31, 2014.

- The provision for loan and lease losses was \$12.6 million for the three months ended March 31, 2015, as compared to the \$6.0 million recognized for the three months ended March 31, 2014. This increase was primarily driven by an increase in net charge-offs and a higher level of loan growth, as compared to the prior year quarter. Net charge-offs on loans were \$8.7 million for the three months ended March 31, 2015, or 0.23% of average loans and leases (annualized), as compared to net charge-offs of \$4.0 million, or 0.21% of average loans and leases (annualized), for the three months ended March 31, 2014.

Capital and Growth Initiatives

Based on Basel III rules, the Company's total risk based capital was 14.7% and its Tier 1 common to risk weighted assets ratio was 11.1% as of March 31, 2015. As of December 31, 2014, which is based on Basel I rules, the Company's total risk based capital ratio was 15.2% and its Tier 1 common to risk weighted assets ratio was 11.5%.

Cash dividends declared in the first quarter of 2015 were \$0.15 per common share, comparable to the same period of the prior year.

Table of Contents

Summary of Critical Accounting Policies

Our significant accounting policies are described in Note 1 to the Consolidated Financial Statements for the year ended December 31, 2014 included in the Form 10-K filed with the SEC on February 23, 2015. Not all of these critical accounting policies require management to make difficult, subjective or complex judgments or estimates. Management believes that the following policies would be considered critical under the SEC's definition.

Allowance for Loan and Lease Losses and Reserve for Unfunded Commitments

The Bank performs regular credit reviews of the loan and lease portfolio to determine credit quality and adherence to underwriting standards. When loans and leases are originated, they are assigned a risk rating that is reassessed periodically during the term of the loan through the credit review process. The Bank's risk rating methodology assigns risk ratings ranging from 1 to 10, where a higher rating represents higher risk. The 10 risk rating categories are a primary factor in determining an appropriate amount for the allowance for loan and lease losses. The Bank has a management Allowance for Loan and Lease Losses ("ALLL") Committee, which is responsible for, among other things, regularly reviewing the ALLL methodology, including loss factors, and ensuring that it is designed and applied in accordance with generally accepted accounting principles. The ALLL Committee reviews and approves loans and leases recommended for impaired status. The ALLL Committee also approves removing loans and leases from impaired status. The Bank's Audit and Compliance Committee provides board oversight of the ALLL process and reviews and approves the ALLL methodology on a quarterly basis.

Each risk rating is assessed an inherent credit loss factor that determines the amount of the allowance for loan and lease losses provided for that group of loans and leases with similar risk rating. Credit loss factors may vary by region based on management's belief that there may ultimately be different credit loss rates experienced in each region.

Regular credit reviews of the portfolio also identify loans that are considered potentially impaired. Potentially impaired loans are referred to the ALLL Committee which reviews and approves designated loans as impaired. A loan is considered impaired when based on current information and events, we determine that we will probably not be able to collect all amounts due according to the loan contract, including scheduled interest payments. When we identify a loan as impaired, we measure the impairment using discounted cash flows, except when the sole remaining source of the repayment for the loan is the liquidation of the collateral. In these cases, we use the current fair value of the collateral, less selling costs, instead of discounted cash flows. If we determine that the value of the impaired loan is less than the recorded investment in the loan, we either recognize an impairment reserve as a specific component to be provided for in the allowance for loan and lease losses or charge-off the impaired balance on collateral dependent loans if it is determined that such amount represents a confirmed loss. The combination of the risk rating-based allowance component and the impairment reserve allowance component lead to an allocated allowance for loan and lease losses.

The Bank may also maintain an unallocated allowance amount to provide for other credit losses inherent in a loan and lease portfolio that may not have been contemplated in the credit loss factors. This unallocated amount generally comprises less than 5% of the allowance, but may be maintained at higher levels during times of economic conditions characterized by falling real estate values. The unallocated amount is reviewed periodically based on trends in credit losses, the results of credit reviews and overall economic trends.

The reserve for unfunded commitments ("RUC") is established to absorb inherent losses associated with our commitment to lend funds, such as with a letter or line of credit. The adequacy of the ALLL and RUC are monitored on a regular basis and are based on management's evaluation of numerous factors. These factors include the quality of the current loan portfolio; the trend in the loan portfolio's risk ratings; current economic conditions; loan concentrations; loan growth rates; past-due and non-performing trends; evaluation of specific loss estimates for all

significant problem loans; historical charge-off and recovery experience; and other pertinent information.

Management believes that the ALLL was adequate as of March 31, 2015. There is, however, no assurance that future loan losses will not exceed the levels provided for in the ALLL and could possibly result in additional charges to the provision for loan and lease losses. In addition, bank regulatory authorities, as part of their periodic examination of the Bank, may require additional charges to the provision for loan and lease losses in future periods if warranted as a result of their review. Approximately 80% of our loan portfolio is secured by real estate, and a significant decline in real estate market values may require an increase in the allowance for loan and lease losses.

Table of Contents

Acquired Loans including Covered Loans and FDIC Indemnification Asset

Acquired loans and leases are recorded at their fair value at the acquisition date. For purchased non-impaired loans, the difference between the fair value and unpaid principal balance of the loan at the acquisition date is amortized or accreted to interest income over the estimated life of the loans.

The acquired loans and purchased impaired loans are aggregated into pools based on individually evaluated common risk characteristics and aggregate expected cash flows were estimated for each pool. A pool is accounted for as a single asset with a single interest rate, cumulative loss rate and cash flow expectation. The cash flows expected to be received over the life of the pool were estimated by management with the assistance of a third party valuation specialist. These cash flows were input into an accounting loan system which calculates the carrying values of the pools and underlying loans, book yields, effective interest income and impairment, if any, based on actual and projected events. Default rates, loss severity, and prepayment speeds assumptions are periodically reassessed and updated within the accounting model to update our expectation of future cash flows. The excess of the cash flows expected to be collected over a pool's carrying value is considered to be the accretable yield and is recognized as interest income over the estimated life of the loan or pool using the effective yield method. The accretable yield may change due to changes in the timing and amounts of expected cash flows. Changes in the accretable yield are disclosed quarterly.

Loans acquired in a FDIC-assisted acquisition that are subject to a loss-share agreement are referred to as "covered loans." The Company has elected to account for amounts receivable under the loss-share agreement as an indemnification asset. The FDIC indemnification asset is initially recorded at fair value, based on the discounted value of expected future cash flows under the loss-share agreement. The difference between the carrying value and the undiscounted cash flows the Company expects to collect from the FDIC will be accreted or amortized into non-interest income over the life of the FDIC indemnification asset, which is maintained at the loan pool level.

Residential Mortgage Servicing Rights ("MSR")

The Company determines its classes of servicing assets based on the asset type being serviced along with the methods used to manage the risk inherent in the servicing assets, which includes the market inputs used to value the servicing assets. The Company measures its residential mortgage servicing assets at fair value and reports changes in fair value through earnings. Fair value adjustments encompass market-driven valuation changes and the runoff in value that occurs from the passage of time, which are separately reported. Under the fair value method, the MSR is carried in the balance sheet at fair value and the changes in fair value are reported in earnings under the caption residential mortgage banking revenue in the period in which the change occurs.

Retained mortgage servicing rights are measured at fair values as of the date of sale. We use quoted market prices when available. Subsequent fair value measurements are determined using a discounted cash flow model. In order to determine the fair value of the MSR, the present value of expected net future cash flows is estimated. Assumptions used include market discount rates, anticipated prepayment speeds, delinquency and foreclosure rates, and ancillary fee income net of servicing costs. This model is periodically validated by an independent external model validation group. The model assumptions and the MSR fair value estimates are also compared to observable trades of similar portfolios as well as to MSR broker valuations and industry surveys, as available.

Valuation of Goodwill and Intangible Assets

Goodwill and other intangible assets with indefinite lives are not amortized but instead are periodically tested for impairment. Management performs an impairment analysis for the intangible assets with indefinite lives on an annual basis as of December 31. Additionally, goodwill and other intangible assets with indefinite lives are evaluated on an interim basis when events or circumstances indicate impairment potentially exists. The impairment analysis requires

management to make subjective judgments. Events and factors that may significantly affect the estimates include, among others, competitive forces, customer behaviors and attrition, changes in revenue growth trends, cost structures, technology, changes in discount rates and specific industry and market conditions. There can be no assurance that changes in circumstances, estimates or assumption may result in additional impairment of all, or some portion of, goodwill.

The Company performed its annual goodwill impairment analysis of the Community Banking reporting segment as of December 31, 2014. In the first step of the goodwill impairment test, the Company assessed qualitative factors to determine whether the existence of events and circumstances indicated that it is more likely than not that the indefinite-lived intangible asset is impaired, and determined no factors indicated an impairment. Based on this analysis, no further testing was determined to be necessary.

Table of Contents

Stock-based Compensation

We recognize expense in the income statement for the grant-date fair value of stock options and other equity-based forms of compensation issued to employees over the employees' requisite service period (generally the vesting period). The requisite service period may be subject to performance conditions. The fair value of each grant is estimated as of the grant date using the Black-Scholes option-pricing model or a Monte Carlo simulation pricing model, as required by the features of the grants. Management assumptions utilized at the time of grant impact the fair value of the option calculated under the pricing model, and ultimately, the expense that will be recognized over the expected service period related to each option.

Fair Value

A hierarchical disclosure framework associated with the level of pricing observability is utilized in measuring financial instruments at fair value. The degree of judgment utilized in measuring the fair value of financial instruments generally correlates to the level of pricing observability. Financial instruments with readily available active quoted prices or for which fair value can be measured from actively quoted prices generally will have a higher degree of pricing observability and a lesser degree of judgment utilized in measuring fair value. Conversely, financial instruments rarely traded or not quoted will generally have little or no pricing observability and a higher degree of judgment utilized in measuring fair value. Pricing observability is impacted by a number of factors, including the type of financial instrument, whether the financial instrument is new to the market and not yet established and the characteristics specific to the transaction.

Recent Accounting Pronouncements

In May 2014, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2014-09, Revenue from Contracts with Customers (Topic 606), which creates Topic 606 and supersedes Topic 605, Revenue Recognition. The core principle of Topic 606 is that an entity recognizes revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. In general, the new guidance requires companies to use more judgment and make more estimates than under current guidance, including identifying performance obligations in the contract, estimating the amount of variable consideration to include in the transaction price and allocating the transaction price to each separate performance obligation. The standard is effective for public entities for interim and annual periods beginning after December 15, 2016; early adoption is not permitted. For financial reporting purposes, the standard allows for either full retrospective adoption, meaning the standard is applied to all of the periods presented, or modified retrospective adoption, meaning the standard is applied only to the most current period presented in the financial statements with the cumulative effect of initially applying the standard recognized at the date of initial application. The Company is currently evaluating the provisions of ASU No. 2014-09 to determine the potential impact the new standard will have on the Company's consolidated financial statements.

In June 2014, the FASB issued ASU No. 2014-12, Compensation - Stock Compensation (Topic 718): Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved after the Requisite Service Period. The ASU requires that a performance target that affects vesting and that could be achieved after the requisite service period be treated as a performance condition. A reporting entity should apply existing guidance in Topic 718, Compensation – Stock Compensation, as it relates to awards with performance conditions that affect vesting to account for such awards. The performance target should not be reflected in estimating the grant-date fair value of the award. Compensation cost should be recognized in the period in which it becomes probable that the performance target will be achieved and should represent the compensation cost attributable to the period(s) for which the requisite service has already been rendered. The amendments in this ASU can be applied prospectively or retrospectively and are effective for annual periods and interim periods within those annual periods beginning after

December 15, 2015 with early adoption permitted. The Company is currently reviewing the requirements of ASU No. 2014-12, but does not expect the ASU to have a material impact on the Company's consolidated financial statements.

In November 2014, the FASB issued ASU No. 2014-16, Derivatives and Hedging (Topic 815): Determining Whether the Host Contract in a Hybrid Financial Instrument Issued in the Form of a Share is More Akin to Debt or to Equity. The ASU clarifies how current guidance should be interpreted in evaluating the characteristics and risks of a host contract in a hybrid financial instrument issued in the form of a share. One criterion requires evaluating whether the nature of the host contract is more akin to debt or to equity and whether the economic characteristics and risks of the embedded derivative feature are "clearly and closely related" to the host contract. In making that evaluation, an issuer or investor must consider all terms and features in a hybrid financial instrument including the embedded derivative feature that is being evaluated for separate accounting or may consider all terms and features in the hybrid financial instrument except for the embedded derivative feature that is being evaluated for separate accounting. This ASU is effective for annual periods and interim periods within those annual periods

Table of Contents

beginning after December 15, 2015 with early adoption permitted. The Company is currently reviewing the requirements of ASU No. 2014-16.

In January 2015, the FASB issued ASU No. 2015-1, Income Statement —Extraordinary and Unusual Items (Subtopic 225-20). The objective of this ASU is to simplify the income statement presentation requirements in Subtopic 225-20 by eliminating the concept of extraordinary items. Extraordinary items are events and transactions that are distinguished by their unusual nature and by the infrequency of their occurrence. Eliminating the extraordinary classification simplifies income statement presentation by altogether removing the concept of extraordinary items from consideration. This ASU is effective for annual periods and interim periods within those annual periods beginning after December 15, 2015 with early adoption permitted. The Company does not expect this ASU to have a material impact on the Company's consolidated financial statements.

In February 2015, the FASB issued ASU No. 2015-02, Consolidation (Topic 810): Amendments to the Consolidation Analysis, which is intended to improve targeted areas of consolidation guidance for legal entities such as limited partnerships, limited liability corporations, and securitization structures (collateralized debt obligations, collateralized loan obligations, and mortgage-backed security transactions). The ASU focuses on simplifying the consolidation evaluation for reporting organizations that are required to evaluate whether they should consolidate certain legal entities by reducing the number of consolidation model from four to two, among other changes. The ASU will be effective for periods beginning after December 31, 2015, while early adoption is permitted. The Company does not expect this ASU to have a material impact on the Company's consolidated financial statements.

In April 2015, the FASB issued ASU No. 2015-03, Interest - Imputation of Interest (Subtopic 835-30): Simplifying the Presentation of Debt Issuance Costs. The amendments in this ASU require that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. The recognition and measurement guidance for debt issuance costs are not affected. ASU No 2015-03 is effective for financial statements issued for fiscal years beginning after December 15, 2015, and interim periods within those fiscal years. ASU No. 2015-03 should be applied on a retrospective basis. The Company is currently evaluating the impacts of this ASU on the Company's consolidated financial statements.

Results of Operations

Overview

For the three months ended March 31, 2015, net earnings available to common shareholders were \$47.0 million, or \$0.21 per diluted common share, as compared to net earnings available to common shareholders of \$18.5 million, or \$0.16 per diluted common share for the three months ended March 31, 2014. The increase in net earnings for the three months ended March 31, 2015 compared to the same period of the prior year was principally attributable to net income contribution from the operations acquired from Sterling and increased residential mortgage banking revenue resulting from the current mortgage interest rate environment.

Umpqua recognizes gains or losses on our junior subordinated debentures carried at fair value resulting from the estimated market credit risk adjusted spread and changes in interest rates that do not directly correlate with the Company's operating performance. Also, Umpqua incurs significant expenses related to the completion and integration of mergers and acquisitions. Additionally, we may recognize goodwill impairment losses that have no direct effect on the Company's or the Bank's cash balances, liquidity, or regulatory capital ratios. Lastly, Umpqua may recognize one-time bargain purchase gains on certain acquisitions that are not reflective of Umpqua's on-going earnings power. Accordingly, management believes that our operating results are best measured on a comparative basis excluding the impact of gains or losses on junior subordinated debentures measured at fair value, net of tax, merger related expenses, net of tax, and other charges related to business combinations such as goodwill impairment

charges or bargain purchase gains, net of tax. We define operating earnings as earnings available to common shareholders before gains or losses on junior subordinated debentures carried at fair value, net of tax, bargain purchase gains on acquisitions, net of tax, merger related expenses, net of tax, and goodwill impairment, and we calculate operating earnings per diluted share by dividing operating earnings by the same diluted share total used in determining diluted earnings per common share. Operating earnings and operating earnings per diluted share are considered "non-GAAP" financial measures. Although we believe the presentation of non-GAAP financial measures provides a better indication of our operating performance, readers of this report are urged to review the GAAP results as presented in the Financial Statements and Supplementary Data in Item 1 above.

Table of Contents

The following table provides the reconciliation of earnings available to common shareholders (GAAP) to operating earnings (non-GAAP), and earnings per diluted common share (GAAP) to operating earnings per diluted share (non-GAAP) for the three months ended March 31, 2015 and 2014:

Reconciliation of Net Earnings Available to Common Shareholders to Operating Earnings (in thousands, except per share data)	Three Months Ended March 31,	
	2015	2014
Net earnings available to common shareholders	\$47,045	\$18,538
Adjustments:		
Net loss on junior subordinated debentures carried at fair value, net of tax	933	325
Merger related expenses, net of tax	8,449	5,073
Operating earnings	\$56,427	\$23,936
Per diluted share:		
Net earnings available to common shareholders	\$0.21	\$0.16
Adjustments:		
Net loss on junior subordinated debentures carried at fair value, net of tax	0.01	—
Merger related expenses, net of tax	0.04	0.05
Operating earnings	\$0.26	\$0.21

The following table presents the returns on average assets, average common shareholders' equity and average tangible common shareholders' equity for the three months ended March 31, 2015 and 2014. For each of the periods presented, the table includes the calculated ratios based on reported net earnings available to common shareholders and operating income as shown in the table above. Our return on average common shareholders' equity is negatively impacted as the result of capital required to support goodwill. To the extent this performance metric is used to compare our performance with other financial institutions that do not have merger and acquisition-related intangible assets, we believe it beneficial to also consider the return on average tangible common shareholders' equity. The return on average tangible common shareholders' equity is calculated by dividing net earnings available to common shareholders by average shareholders' common equity less average goodwill and intangible assets, net (excluding MSRs). The return on average tangible common shareholders' equity is considered a non-GAAP financial measure and should be viewed in conjunction with the return on average common shareholders' equity.

Return on Average Assets, Common Shareholders' Equity and Tangible Common Shareholders' Equity

(dollars in thousands)	Three Months Ended March 31,			
	2015	2014		
Returns on average assets:				
Net earnings available to common shareholders	0.84	% 0.65		%
Operating earnings	1.01	% 0.83		%
Returns on average common shareholders' equity:				
Net earnings available to common shareholders	5.02	% 4.32		%
Operating earnings	6.03	% 5.58		%
Returns on average tangible common shareholders' equity:				
Net earnings available to common shareholders	9.76	% 7.81		%
Operating earnings	11.71	% 10.08		%
Calculation of average common tangible shareholders' equity:				
Average common shareholders' equity	\$3,797,108	\$1,738,680		

Edgar Filing: UMPQUA HOLDINGS CORP - Form 10-Q

Less: average goodwill and other intangible assets, net	(1,842,390)	(776,006)
Average tangible common shareholders' equity	\$1,954,718		\$962,674	

58

Table of Contents

Additionally, management believes tangible common equity and the tangible common equity ratio are meaningful measures of capital adequacy. Umpqua believes the exclusion of certain intangible assets in the computation of tangible common equity and tangible common equity ratio provides a meaningful base for period-to-period and company-to-company comparisons, which management believes will assist investors in analyzing the operating results and capital of the Company. Tangible common equity is calculated as total shareholders' equity less preferred stock and less goodwill and other intangible assets, net (excluding MSRs). In addition, tangible assets are total assets less goodwill and other intangible assets, net (excluding MSRs). The tangible common equity ratio is calculated as tangible common shareholders' equity divided by tangible assets. The tangible common equity and tangible common equity ratio is considered a non-GAAP financial measure and should be viewed in conjunction with the total shareholders' equity and the total shareholders' equity ratio.

The following table provides a reconciliation of ending shareholders' equity (GAAP) to ending tangible common equity (non-GAAP), and ending assets (GAAP) to ending tangible assets (non-GAAP) as of March 31, 2015 and December 31, 2014:

Reconciliations of Total Shareholders' Equity to Tangible Common Shareholders' Equity and Total Assets to Tangible Assets

(dollars in thousands)	March 31, 2015	December 31, 2014	
Total shareholders' equity	\$3,800,970	\$3,777,626	
Subtract:			
Goodwill and other intangible assets, net	1,842,567	1,842,958	
Tangible common shareholders' equity	\$1,958,403	\$1,934,668	
Total assets	\$22,953,158	\$22,609,903	
Subtract:			
Goodwill and other intangible assets, net	1,842,567	1,842,958	
Tangible assets	\$21,110,591	\$20,766,945	
Tangible common equity ratio	9.28	% 9.32	%

Non-GAAP financial measures have inherent limitations, are not required to be uniformly applied, and are not reviewed or audited. Although we believe these non-GAAP financial measures are frequently used by stakeholders in the evaluation of a company, they have limitations as analytical tools, and should not be considered in isolation or as a substitute for analyses of results as reported under GAAP.

Net Interest Income

Net interest income is the largest source of our operating income. Net interest income for the three months ended March 31, 2015 was \$215.9 million, an increase of \$108.1 million, compared to the same period in 2014. The increase in net interest income for the three months ended March 31, 2015 as compared to the same period in 2014 is primarily attributable to an increase in average interest-earning assets and an increase in net interest margin, partially offset by an increase in average deposits and other average interest-bearing liabilities. The increase in average interest-earning assets was primarily in loans and investment securities, largely from the Sterling Merger.

The net interest margin (net interest income as a percentage of average interest-earning assets) on a fully tax equivalent basis was 4.53% for the three months ended March 31, 2015, an increase of 25 basis points as compared to the same period in 2014. The increase in net interest margin primarily resulted from the increase in loan yields as a result of the Sterling Merger and the related loan discount accretion.

Adding to the increase in net interest margin in the current quarter as compared to the same period of the prior year was the reduction of the cost of interest-bearing liabilities, which decreased 3 basis points to 0.41% for the current quarter. The decrease in the cost of interest-bearing liabilities was due to a decrease in the cost of term debt and junior subordinated debentures, while the total cost of interest-bearing deposits was within 1 basis point for the current quarter as compared to the same period of the prior year.

Our net interest income is affected by changes in the amount and mix of interest-earning assets and interest-bearing liabilities, as well as changes in the yields earned on interest-earning assets and rates paid on deposits and borrowed funds.

Table of Contents

The following table presents condensed average balance sheet information, together with interest income and yields on average interest-earning assets, and interest expense and rates paid on average interest-bearing liabilities for the three months ended March 31, 2015 and 2014:

Average Rates and Balances

(dollars in thousands)	Three Months Ended March 31, 2015			Three Months Ended March 31, 2014

(1) Non-accrual loans and leases are included in the average balance.

(2) Tax-exempt income has been adjusted to a tax equivalent basis at a 35% tax rate. The amount of such adjustment was an addition to recorded income of approximately \$1.4 million and \$1.1 million for the three months ended

March 31, 2015 and 2014, respectively.

60

Table of Contents

The following table sets forth a summary of the changes in tax equivalent net interest income due to changes in average asset and liability balances (volume) and changes in average rates (rate) for the three months ended March 31, 2015 as compared to the same periods in 2014. Changes in tax equivalent interest income and expense, which are not attributable specifically to either volume or rate, are allocated proportionately between both variances.

Net increase in net interest income (1)	\$103,821	\$4,565	\$108,386

(1) Tax exempt income has been adjusted to a tax equivalent basis at a 35% tax rate.

Provision for Loan and Lease Losses

The provision for loan and lease losses was \$12.6 million for the three months ended March 31, 2015, as compared to \$6.0 million for the same period in 2014. As an annualized percentage of average outstanding loans and leases, the provision for loan and lease losses recorded for the three months ended March 31, 2015 was 0.33%, respectively, as compared to 0.31% in the same periods in 2014.

The increase in the provision for loan and lease losses for the three months ended March 31, 2015 as compared to the same period in 2014 was principally attributable to a higher level of loan growth, as well as an increase in net charge-offs.

The Company recognizes the charge-off of impairment reserves on impaired loans in the period they arise for collateral-dependent loans. Therefore, the non-accrual loans of \$40.2 million as of March 31, 2015 have already been written-down to their estimated fair value, less estimated costs to sell, and are expected to be resolved with no additional material loss, absent further decline in market prices.

Table of Contents

Non-Interest Income

Non-interest income for the three months ended March 31, 2015 was \$63.6 million, an increase of \$40.4 million, or 173.7%, as compared to the same period in 2014. The following table presents the key components of non-interest income for the three months ended March 31, 2015 and 2014:

Non-Interest Income

(in thousands)

	Three Months Ended March 31,		Change Amount	Change Percent	
	2015	2014			
Service charges on deposit accounts	\$14,296	\$7,767	\$6,529	84	%
Brokerage commissions and fees	4,769	3,725	1,044	28	%
Residential mortgage banking revenue, net	28,227	10,439	17,788	170	%
Gain on investment securities, net	116	—	116	nm	
Gain on loan sales	6,728	517	6,211	nm	
Loss on junior subordinated debentures carried at fair value	(1,555)	(542)	(1,013)	187	%
Change in FDIC indemnification asset	(1,286)	(4,840)	3,554	(73)	%
BOLI income	2,781	736	2,045	278	%
Other income	9,519	5,436	4,083	75	%
Total	\$63,595	\$23,238	\$40,357	174	%

nm = Not Meaningful

The increase in deposit service charges in the three months ended March 31, 2015 compared to the same period in 2014 was primarily the result of Sterling Merger. Non-maturity deposits of \$5.4 billion were acquired from Sterling.

Residential mortgage banking revenue increased for the three months ended March 31, 2015 due to an increase in production contributed by legacy Sterling operations and the lower mortgage interest rate environment between the two periods. Closed for sale mortgage volume for the three months ended March 31, 2015 was \$862.2 million, compared to \$204.4 million for the three months ended March 31, 2014.

For the three months ended March 31, 2015, we recorded an increase in losses on junior subordinated debentures carried at fair value of \$1.0 million over the same period in 2014, which related to the liabilities assumed in the Sterling Merger.

The change in FDIC indemnification asset represents a change in cash flows expected to be recoverable under the loss-share agreements entered into with the FDIC in connection with FDIC-assisted acquisitions.

The gain on loan sales for the three months ended March 31, 2015 increased by \$6.2 million due to the sale of a pool of portfolio residential mortgage loans during the current quarter. Other income increased during the three months ended March 31, 2015 to \$9.5 million as a result of additional activity as the result of the Sterling Merger.

Table of Contents

Non-Interest Expense

Non-interest expense for the three months ended March 31, 2015 was \$193.1 million, an increase of \$96.6 million, or 100.1%, as compared to the same period in 2014. The following table presents the key elements of non-interest expense for the three months ended March 31, 2015 and 2014:

Non-Interest Expense

(in thousands)	Three Months Ended March 31,		Change Amount	Change Percent	
	2015	2014			
Salaries and employee benefits	\$ 107,923	\$ 53,218	\$ 54,705	103	%
Net occupancy and equipment	32,150	16,501	15,649	95	%
Communications	4,794	2,902	1,892	65	%
Marketing	3,027	1,005	2,022	201	%
Services	13,988	5,990	7,998	134	%
FDIC assessments	3,214	1,863	1,351	73	%
Net loss (gain) on other real estate owned	1,814	(64)	1,878	nm	
Intangible amortization	2,806	1,194	1,612	135	%
Merger related expenses	14,082	5,983	8,099	135	%
Other expenses	9,300	7,926	1,374	17	%
Total	\$ 193,098	\$ 96,518	\$ 96,580	100	%

nm = Not Meaningful

Salaries and employee benefits costs increased by \$54.7 million in the three months ended March 31, 2015, as compared to the same period prior year. The increase is primarily related to the increase in operations and personnel related to the Sterling Merger, as well as increased variable compensation expense associated with mortgage banking operations.

Net occupancy and equipment expense increased by \$15.6 million for the three months ended March 31, 2015, as compared to the same period in the prior year primarily as a result of operations and facilities acquired in the Sterling Merger.

FDIC assessments increased for the three months ended March 31, 2015 as compared to the same periods in the prior year, primarily as a result of the Sterling Merger due to an increase in the assessment base.

We incur significant expenses in connection with the completion and integration of bank acquisitions that are not capitalizable. The merger related expenses incurred in 2014 and 2015 relate to the Sterling Merger. A detail of merger related expenses by type is included in Note 2 of the Notes to Condensed Consolidated Financial Statements.

The Sterling Merger was also the primary driver for the increases over the prior year periods for services, communications, marketing, intangible amortization and other expenses.

Income Taxes

The Company's consolidated effective tax rate as a percentage of pre-tax income for the three months ended March 31, 2015 was 36.1%, as compared to 34.8% for the three months ended March 31, 2014. The effective tax rates differed from the federal statutory rate of 35% and the apportioned state rate of 4.9% (net of the federal tax benefit)

principally because of the relative amount of income earned in each state jurisdiction, non-taxable income arising from bank-owned life insurance, income on tax-exempt investment securities and tax credits arising from low income housing investments.

Table of Contents

FINANCIAL CONDITION

Investment Securities

Trading securities were \$10.5 million at March 31, 2015, as compared to \$10.0 million at December 31, 2014. This increase is primarily attributable to an increase in the assets held in connection with Rabbi Trusts.

Investment securities available for sale were \$2.5 billion as of March 31, 2015, as compared to \$2.3 billion at December 31, 2014. The increase was due to \$394.9 million of purchases, partially offset by sales and paydowns of \$165.1 million.

Investment securities held to maturity were \$5.0 million as of March 31, 2015, as compared to holdings of \$5.2 million at December 31, 2014. The change primarily related to paydowns and maturities of investment securities held to maturity of \$164,000.

The following table presents the available for sale and held to maturity investment securities portfolio by major type as of March 31, 2015 and December 31, 2014:

Investment Securities Composition

(dollars in thousands)	Investment Securities Available for Sale					
	March 31, 2015		December 31, 2014			
	Fair Value	%	Fair Value	%		%
U.S. Treasury and agencies	\$229	—	% \$229	—		%
Obligations of states and political subdivisions	337,602	13	% 338,404	15		%
Residential mortgage-backed securities and collateralized mortgage obligations	2,195,201	87	% 1,957,852	85		%
Investments in mutual funds and other equity securities	2,089	—	% 2,070	—		%
Total	\$2,535,121	100	% \$2,298,555	100		%
(dollars in thousands)	Investment Securities Held to Maturity					
	March 31, 2015		December 31, 2014			
	Amortized Cost	%	Amortized Cost	%		%
Residential mortgage-backed securities and collateralized mortgage obligations	\$4,953	100	% \$5,088	98		%
Other investment securities	—	—	% 123	2		%
Total	\$4,953	100	% \$5,211	100		%

We review investment securities on an ongoing basis for the presence of other-than-temporary impairment ("OTTI") or permanent impairment, taking into consideration current market conditions, fair value in relationship to cost, extent and nature of the change in fair value, issuer rating changes and trends, whether we intend to sell a security or if it is likely that we will be required to sell the security before recovery of our amortized cost basis of the investment, which may be maturity, and other factors.

Gross unrealized losses in the available for sale investment portfolio was \$7.9 million at March 31, 2015. This consisted primarily of unrealized losses on residential mortgage-backed securities and collateralized mortgage obligations of \$7.4 million. The unrealized losses were primarily caused by interest rate increases subsequent to the

purchase of the securities, and not credit quality. In the opinion of management, these securities are considered only temporarily impaired due to changes in market interest rates or the widening of market spreads subsequent to the initial purchase of the securities, and not due to concerns regarding the underlying credit of the issuers or the underlying collateral.

Table of Contents

Restricted Equity Securities

Restricted equity securities were \$117.2 million at March 31, 2015 and \$119.3 million at December 31, 2014 with the decrease attributable to redemptions of FHLB stock during the three months ended March 31, 2015. Of the \$117.2 million at March 31, 2015, \$115.8 million represented the Bank's investment in the FHLBs of Seattle and San Francisco. FHLB stock is carried at par and does not have a readily determinable fair value. Ownership of FHLB stock is restricted to the FHLB and member institutions, and can only be purchased and redeemed at par.

Loans and Leases

Loans and Leases, net

Total loans and leases outstanding at March 31, 2015 were \$15.5 billion, an increase of \$221.2 million as compared to year-end 2014. The increase included net new loan and lease originations of \$303.6 million, partially offset by loans sold of \$72.8 million, charge-offs of \$12.5 million, and transfers to other real estate owned of \$1.5 million during the period.

The following table presents the concentration distribution of the loan and lease portfolio, net of deferred fees and costs, as of March 31, 2015 and December 31, 2014.

Total	\$50,662	\$59,553

Table of Contents

The Company has performed, and will continue to perform, extensive reviews of our permanent commercial real estate portfolio, including stress testing. We performed reviews on both our non-owner and owner occupied credits to verify leasing status, to ensure the accuracy of risk ratings, and to develop proactive action plans with borrowers on projects where debt service coverage has dropped below the Bank's benchmark. There can be no assurance that any further declines in economic conditions, such as potential increases in retail or office vacancy rates, will exceed the projected assumptions utilized in the stress testing and may result in additional non-performing loans in the future.

Restructured Loans

At March 31, 2015 and December 31, 2014, impaired loans of \$60.9 million and \$54.8 million, respectively, were classified as performing restructured loans. The restructurings were granted in response to borrower financial difficulty, and generally provide for a temporary modification of loan repayment terms. The performing restructured loans on accrual status represent principally the only impaired loans accruing interest at March 31, 2015. In order for a restructured loan to be considered performing and on accrual status, the loan's collateral coverage generally will be greater than or equal to 100% of the loan balance, the loan must be current on payments, and the borrower must either prefund an interest reserve or demonstrate the ability to make payments from a verified source of cash flow.

A further decline in the economic conditions in our general market areas or other factors could adversely impact individual borrowers or the loan portfolio in general. Accordingly, there can be no assurance that loans will not become 90 days or more past due, become impaired or placed on non-accrual status, restructured or transferred to other real estate owned in the future.

Allowance for Loan and Lease Losses and Reserve for Unfunded Commitments

The ALLL totaled \$120.1 million at March 31, 2015, an increase of \$3.9 million from \$116.2 million at December 31, 2014. The following table shows the activity in the ALLL for the three months ended March 31, 2015 and 2014:

Allowance for Loan and Lease Losses

(in thousands)	Three months ended	
	March 31, 2015	2014
Balance, beginning of period	\$ 116,167	\$ 95,085
Charge-offs	(12,545)	(6,234)
Recoveries	3,845	2,207
Net charge-offs	(8,700)	(4,027)
Provision charged to operations	12,637	5,971
Balance, end of period	\$ 120,104	\$ 97,029
As a percentage of average loans and leases (annualized):		
Net charge-offs	0.23	% 0.21
Provision for loan and lease losses	0.33	% 0.31
Recoveries as a percentage of charge-offs	30.65	% 35.40

The increase in allowance for loan and lease losses as of March 31, 2015 compared to the same period of the prior year was primarily the result of growth in our loan and lease portfolios, partially offset by continued stabilizing credit quality characteristics of the portfolio. Additional discussion on the change in provision for loan and lease losses is provided under the heading Provision for Loan and Lease Losses above.

Table of Contents

The following table sets forth the allocation of the allowance for loan and lease losses and percent of loans in each category to total loans and leases (excluding deferred loan fees) as of March 31, 2015 and December 31, 2014:

(dollars in thousands)	March 31, 2015		December 31, 2014		
	Amount	%	Amount	%	
Commercial real estate	\$55,182	57.5	% \$55,184	58.1	%
Commercial	44,200	19.2	% 41,216	19.2	%
Residential	16,221	20.6	% 15,922	20.2	%
Consumer & other	4,501	2.7	% 3,845	2.5	%
Allowance for loan and lease losses	\$ 120,104		\$ 116,167		

At March 31, 2015, the recorded investment in loans classified as impaired totaled \$94.3 million, with a corresponding valuation allowance (included in the allowance for loan and lease losses) of \$1.4 million. The valuation allowance on impaired loans represents the impairment reserves on performing current and former restructured loans and nonaccrual loans. At December 31, 2014, the total recorded investment in impaired loans was \$102.6 million, with a corresponding valuation allowance (included in the allowance for loan and lease losses) of \$1.4 million.

The following table presents a summary of activity in the reserve for unfunded commitments ("RUC"):

Summary of Reserve for Unfunded Commitments Activity

	March 31, 2015	2014
Balance, beginning of period	\$3,539	\$1,436
Net change to other expense	(345) (19
Balance, end of period	\$3,194	\$1,417

We believe that the ALLL and RUC at March 31, 2015 are sufficient to absorb losses inherent in the loan and lease portfolio and credit commitments outstanding as of that date based on the best information available. This assessment, based in part on historical levels of net charge-offs, loan and lease growth, and a detailed review of the quality of the loan and lease portfolio, involves uncertainty and judgment. Therefore, the adequacy of the ALLL and RUC cannot be determined with precision and may be subject to change in future periods. In addition, bank regulatory authorities, as part of their periodic examination of the Bank, may require additional charges to the provision for loan and lease losses in future periods if warranted as a result of their review.

Residential Mortgage Servicing Rights

The following table presents the key elements of our residential mortgage servicing rights portfolio for the three months ended March 31, 2015 and 2014:

Summary of Residential Mortgage Servicing Rights

(in thousands)	Three Months Ended	
	March 31, 2015	2014
Balance, beginning of period	\$117,259	\$47,765
Additions for new MSR capitalized	8,837	2,408
Changes in fair value:		
Due to changes in model inputs or assumptions(1)	(4,143) (1,087

Other(2)	(5,588) 134
Balance, end of period	\$116,365	\$49,220

Table of Contents

- (1) Principally reflects changes in discount rates and prepayment speed assumptions, which are primarily affected by changes in interest rates.
- (2) Represents changes due to collection/realization of expected cash flows over time.

Information related to our residential serviced loan portfolio as of March 31, 2015 and December 31, 2014 was as follows:

(dollars in thousands)	March 31, 2015	December 31, 2014
Balance of residential loans serviced for others	\$11,874,910	\$11,590,310
MSR as a percentage of serviced loans	0.98	% 1.01

Mortgage servicing rights are adjusted to fair value quarterly with the change recorded in mortgage banking revenue.

Goodwill and Other Intangibles Assets

At March 31, 2015 and December 31, 2014, we had goodwill of \$1.8 billion. Goodwill of \$1.0 billion was recorded during 2014 in connection with the Sterling Merger. No goodwill impairment losses have been recognized in the periods presented.

At March 31, 2015, we had other intangible assets of \$53.9 million, as compared to \$56.7 million at December 31, 2014. Other intangibles of \$54.6 million were recorded in connection with the Sterling Merger.

Deposits

Total deposits were \$17.2 billion at March 31, 2015, an increase of \$330.5 million, as compared to December 31, 2014. The increase is attributable to increases in non-maturity deposit types, offset by a decrease in total time deposits.

The following table presents the deposit balances by major category as of March 31, 2015 and December 31, 2014:

(dollars in thousands)	March 31, 2015		December 31, 2014		
	Amount	Percentage	Amount	Percentage	
Non-interest bearing	\$4,930,642	29	% \$4,744,804	28	%
Interest bearing demand	2,085,368	12	% 2,054,994	12	%
Money market	6,287,165	36	% 6,113,138	36	%
Savings	1,022,829	6	% 971,185	6	%
Time, \$100,000 or greater	1,918,565	11	% 1,765,721	10	%
Time, less than \$100,000	977,997	6	% 1,242,257	8	%
Total	\$17,222,566	100	% \$16,892,099	100	%

At March 31, 2015 and December 31, 2014, the Company's brokered deposits totaled \$871.7 million and \$866.2 million, respectively.

Borrowings

At March 31, 2015, the Bank had outstanding \$321.2 million of securities sold under agreements to repurchase and no outstanding federal funds purchased balances. The Bank had outstanding term debt of \$965.7 million at March 31, 2015. Term debt outstanding as of March 31, 2015 decreased \$40.7 million since December 31, 2014. Advances from the FHLB amounted to \$965.2 million of the total term debt and are secured by investment securities and loans secured by real estate. The FHLB advances have fixed interest rates ranging from 0.41% to 7.10% and mature in 2015 through 2030.

Junior Subordinated Debentures

We had junior subordinated debentures with carrying values of \$352.1 million and \$350.9 million at March 31, 2015 and December 31, 2014, respectively. The increase is due to the change in fair value for the junior subordinated debentures selected to be carried at fair value. As of March 31, 2015, the majority of the junior subordinated debentures had interest rates that are adjustable on a quarterly basis based on a spread over three month LIBOR. Interest expense for junior subordinated

Table of Contents

debentures increased for the three months ended March 31, 2015, compared to the same period in 2014, primarily resulting from junior subordinated debentures assumed in the Sterling Merger.

Liquidity and Cash Flow

The principal objective of our liquidity management program is to maintain the Bank's ability to meet the day-to-day cash flow requirements of our customers who either wish to withdraw funds or to draw upon credit facilities to meet their cash needs.

We monitor the sources and uses of funds on a daily basis to maintain an acceptable liquidity position. One source of funds includes public deposits. Individual state laws require banks to collateralize public deposits, typically as a percentage of their public deposit balance in excess of FDIC insurance. Public deposits represented 11.0% of total deposits at March 31, 2015 and 11.7% of total deposits at December 31, 2014. The amount of collateral required varies by state and may also vary by institution within each state, depending on the individual state's risk assessment of depository institutions. Changes in the pledging requirements for uninsured public deposits may require pledging additional collateral to secure these deposits, drawing on other sources of funds to finance the purchase of assets that would be available to be pledged to satisfy a pledging requirement, or could lead to the withdrawal of certain public deposits from the Bank. In addition to liquidity from core deposits and the repayments and maturities of loans and investment securities, the Bank can utilize established uncommitted federal funds lines of credit, sell securities under agreements to repurchase, borrow on a secured basis from the FHLB or issue brokered certificates of deposit.

The Bank had available lines of credit with the FHLB totaling \$4.6 billion at March 31, 2015, subject to certain collateral requirements, namely the amount of pledged loans and investment securities. The Bank had available lines of credit with the Federal Reserve totaling \$667.0 million, subject to certain collateral requirements, namely the amount of certain pledged loans. The Bank had uncommitted federal funds line of credit agreements with additional financial institutions totaling \$455.0 million at March 31, 2015. Availability of lines is subject to federal funds balances available for loan and continued borrower eligibility. These lines are intended to support short-term liquidity needs, and the agreements may restrict consecutive day usage.

The Company is a separate entity from the Bank and must provide for its own liquidity. Substantially all of the Company's revenues are obtained from dividends declared and paid by the Bank. There were \$36.5 million of dividends paid by the Bank to the Company in the three months ended March 31, 2015. There are statutory and regulatory provisions that could limit the ability of the Bank to pay dividends to the Company. We believe that such restrictions will not have an adverse impact on the ability of the Company to fund its quarterly cash dividend distributions to common shareholders and meet its ongoing cash obligations, which consist principally of debt service on the outstanding junior subordinated debentures. As of March 31, 2015, the Company did not have any borrowing arrangements of its own.

As disclosed in the Consolidated Statements of Cash Flows, net cash used in operating activities was \$24.3 million during the three months ended March 31, 2015, with the difference between cash provided by operating activities and net income largely consisting of originations of loans held for sale of \$862.2 million, offset by proceeds from the sale of loans held for sale of \$775.3 million. This compares to net cash provided by operating activities of \$70.6 million during the three months ended March 31, 2014, with the difference between cash provided by operating activities and net income largely consisting of originations of loans held for sale of \$204.4 million, offset by proceeds from the sale of loans held for sale of \$245.4 million.

Net cash of \$465.1 million used by investing activities during the three months ended March 31, 2015 consisted principally of purchases of investment securities available for sale of \$394.9 million, net loan originations of \$303.6

million, offset by proceeds from investment securities available for sale of \$165.1 million and proceeds from sale of loans and leases of \$79.6 million. This compares to net cash of \$48.0 million provided by investing activities during the three months ended March 31, 2014, which consisted principally of proceeds from investment securities available for sale of \$93.2 million and proceeds from the sale of loans and leases of \$22.3 million, partially offset by net loan originations of \$61.3 million, and purchases of premises and equipment of \$8.2 million.

Net cash of \$265.1 million provided by financing activities during the three months ended March 31, 2015 primarily consisted of \$332.0 million increase in net deposits, offset by the dividends paid on common stock of \$33.1 million, and the \$40.0 million repayment of term debt. This compares to net cash of \$176.1 million provided by financing activities during the three months ended March 31, 2014, which consisted primarily of \$156.0 million increase in net deposits and an increase in securities sold under agreements to repurchase of \$37.6 million, offset by \$16.9 million in dividends paid on common stock.

Table of Contents

Although we expect the Bank's and the Company's liquidity positions to remain satisfactory during 2015, it is possible that our deposit balance for 2015 may not be maintained at previous levels due to pricing pressure or, in order to generate deposit growth, our pricing may need to be adjusted in a manner that results in increased interest expense on deposits.

Off-balance-Sheet Arrangements

Information regarding Off-Balance-Sheet Arrangements is included in Note 9 of the Notes to Condensed Consolidated Financial Statements.

Concentrations of Credit Risk

Information regarding Concentrations of Credit Risk is included in Note 9 of the Notes to Condensed Consolidated Financial Statements.

Table of Contents

Capital Resources

Shareholders' equity at March 31, 2015 was \$3.8 billion, an increase of \$23.3 million from December 31, 2014. The increase in shareholders' equity during the three months ended March 31, 2015 was principally due to net income for the quarter offset by the quarterly dividend.

The following table shows the Company's consolidated and the Bank's capital adequacy ratios compared to the regulatory minimum capital ratio and the regulatory minimum capital ratio needed to qualify as a "well-capitalized" institution, as calculated under regulatory guidelines of BASEL III at March 31, 2015 and as calculated under regulatory guidelines of BASEL I at December 31, 2014:

(dollars in thousands)	Actual		For Capital Adequacy purposes		To be Well Capitalized

The phase-in period for the final rules that revise the regulatory capital rules to incorporate certain revisions by the Basel Committee on Banking Supervision to the Basel capital framework ("Basel III") began for the Company on January 1, 2015, with full compliance with the final rules in their entirety required to be phased in on January 1, 2019.

Table of Contents

The final rules, among other things, include a new common equity Tier 1 capital ("CET1") to risk-weighted assets ratio, including a capital conservation buffer, which will gradually increase from 4.5% on January 1, 2015 to 7.0% on January 1, 2019. The final rules also raise the minimum ratio of Tier 1 capital to risk-weighted assets from 4.0% to 6.0% on January 1, 2015 to 8.5% on January 1, 2019, as well as require a minimum leverage ratio of 4.0%.

Under the final rules, as Umpqua grew above \$15.0 billion in assets as a result of an acquisition, the combined trust preferred security debt issuances are required to be phased out of Tier 1 and into Tier 2 capital (75% starting in the first quarter of 2015 and 100% starting in the first quarter of 2016). The final rules also provide for a number of adjustments to and deductions from the new CET1. Under Basel III, the effects of certain accumulated other comprehensive items are not excluded; however, the Company and the Bank have made a one-time permanent election to continue to exclude these items in order to avoid significant variations in the level of capital depending on the impact of interest rate fluctuations on the fair value of the Company's securities portfolio. In addition, deductions include, for example, the requirement that mortgage servicing rights, certain deferred tax assets not dependent upon future taxable income and significant investments in non-consolidated financial entities be deducted from CET1 to the extent that any one such category exceeds 10% of CET1 or all such categories in the aggregate exceed 15% of CET1.

The Company's dividend policy considers, among other things, earnings, regulatory capital levels, the overall payout ratio and expected asset growth to determine the amount of dividends declared, if any, on a quarterly basis. There is no assurance that future cash dividends on common shares will be declared or increased. The following table presents cash dividends declared and dividend payout ratios (dividends declared per common share divided by basic earnings per common share) for the three months ended March 31, 2015 and 2014:

Cash Dividends and Payout Ratios per Common Share

	Three months ended March 31,		
	2015	2014	
Dividend declared per common share	\$0.15	\$0.15	
Dividend payout ratio	71	% 88	%

As of March 31, 2015, a total of 12.0 million shares are available for repurchase under the Company's current share repurchase plan. The timing and amount of future repurchases will depend upon the market price for our common stock, securities laws restricting repurchases, asset growth, earnings, and our capital plan. In addition, our stock plans provide that option and award holders may pay for the exercise price and tax withholdings in part or whole by tendering previously held shares.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Our assessment of market risk as of March 31, 2015 indicates there are no material changes in the quantitative and qualitative disclosures from those in our Annual Report on Form 10-K for the year ended December 31, 2014.

Item 4. Controls and Procedures

Our management, including our Chief Executive Officer, Chief Financial Officer and Principal Accounting Officer, has concluded that our disclosure controls and procedures are effective in timely alerting them to information relating to us that is required to be included in our periodic filings with the SEC. The disclosure controls and procedures were last evaluated by management as of March 31, 2015.

No change in our internal controls occurred during the first quarter of 2015 that has materially affected, or is reasonably likely to materially affect, our internal controls over financial reporting.

Part II. OTHER INFORMATION

Item 1. Legal Proceedings

Due to the nature of our business, we are involved in legal proceedings that arise in the ordinary course of our business. While the outcome of these matters is currently not determinable, we do not expect that the ultimate costs to resolve these matters will have a material adverse effect on our consolidated financial position, results of operations or cash flows.

In our Form 10-K for the period ending December 31, 2011, we initially reported on a class action lawsuit filed in the U.S. District Court for the Northern District of California against the Bank by Amber Hawthorne relating to overdraft fees and the posting order of point of sale and ACH items. In March 2014, the parties reached an agreement to settle the case and have executed a comprehensive written settlement agreement. On September 15, 2014, the court entered an order granting a motion for preliminary approval of the class settlement and held a final approval hearing on February 19, 2015. On April 28, 2015, the court entered an Order Granting Final Approval of Class Action Settlement and Granting in Part Plaintiffs' Motion For Attorneys' Fees, Costs, and Enhancement Awards. Completion of the settlement of this matter on the agreed final terms will have no material adverse effect on the Company's consolidated financial position, results of operations or cash flows.

In our Form 10-K for the period ending December 31, 2013, we initially reported on two separate class action lawsuits filed in Spokane County, Washington, Superior Court against the Company and other defendants arising from the then-proposed Sterling Merger, which the court consolidated. The consolidated litigation generally alleged that directors of Sterling breached their duties to the Sterling shareholders by approving the Merger, failing to take steps to maximize shareholder value, engaging in a flawed sales process, and agreeing to deal protection provisions in the Merger agreement that are alleged to unduly favor the Company. The Company was alleged to have aided and abetted the alleged breaches of duty. The consolidated litigation also alleged that the disclosures approved by the Sterling board in connection with the Merger and the vote thereon were false and misleading in various respects. As relief, the complaints sought to enjoin the Merger and, among other things, damages in an unspecified amount and payment of plaintiffs' attorneys' fees and costs. The defendants believe that the lawsuits were without merit. On January 16, 2014, the parties executed a Memorandum of Understanding (the "MOU") that contained the essential terms of a settlement and dismissal of the consolidated cases. The MOU did not call for the payment of any money damages, but required the defendants to make certain additional disclosures relating to the Merger and to pay the attorney fees, costs, and expenses of plaintiffs' counsel incurred in connection with the action. The agreed additional disclosures were made and included in the joint proxy statement/prospectus filed January 22, 2014. On September 26, 2014, the parties to the litigation filed a notice of settlement with the court. The court preliminarily approved the proposed settlement on December 5, 2014, and on March 27, 2015, the court issued an Order and Final Judgment approving the settlement and awarding attorney's fees to the plaintiffs' counsel. The settlement expressly disavowed any admission of wrongdoing or liability by any defendant.

The Company assumed, as successor-in-interest to Sterling, the defense of litigation matters pending against Sterling. Sterling previously reported that on December 11, 2009, a putative securities class action complaint captioned City of Roseville Employees' Retirement System v. Sterling Financial Corp., et al., No. CV 09-00368-EFS, was filed in the United States District Court for the Eastern District of Washington against Sterling and certain of its current and former officers. On June 18, 2010, lead plaintiff filed a consolidated complaint alleging that the defendants violated sections 10(b) and 20(a) of the Securities Exchange Act of 1934 and SEC Rule 10b-5 by making false and misleading statements concerning Sterling's business and financial results. Plaintiffs sought unspecified damages and attorneys' fees and costs. On August 30, 2010, Sterling moved to dismiss the Complaint, and the court granted the motion to dismiss without prejudice on August 5, 2013. On October 11, 2013, the lead plaintiff filed an amended consolidated complaint with the same defendants, class period, alleged violations, and relief sought. On January 24, 2014, Sterling moved to dismiss the amended consolidated complaint, and on September 17, 2014, the court entered an order dismissing the amended consolidated complaint in its entirety with no further leave to amend. On October 24, 2014,

plaintiffs filed a Notice of Appeal to the U.S. Court of Appeals for the Ninth Circuit from the district court's order granting the motion to dismiss the amended consolidated complaint and appellant filed its opening brief on April 3, 2015.

See Note 9 of the Notes to the Condensed Consolidated Financial Statements for a discussion of the Company's involvement in litigation pertaining to Visa Inc.

Item 1A. Risk Factors

In addition to the other information set forth in this report, including the updated risk factors stated below, you should carefully consider the factors discussed under "Part I--Item 1A--Risk Factors" in our Form 10-K for the year ended December 31, 2014. These factors could materially and adversely affect our business, financial condition, liquidity, results of operations and capital position, and could cause our actual results to differ materially from our historical results or the results contemplated by the

Table of Contents

forward-looking statements contained in this report. There have been no material changes from the risk factors described in our Form 10-K.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

(a) Not applicable

(b) Not applicable

(c) The following table provides information about repurchases of common stock by the Company during the quarter ended March 31, 2015:

Period	Total number of Common Shares Purchased (1)	Average Price Paid per Common Share	Total Number of Shares Purchased as Part of Publicly Announced Plan (2)	Maximum Number of Remaining Shares that May be Purchased at Period End under the Plan
1/1/15-1/31/15	94,568	\$ 15.84	—	12,013,429
2/1/15-2/28/15	12,596	\$ 16.53	—	12,013,429
3/1/15-3/31/15	23,654	\$ 17.13	—	12,013,429
Total for quarter	130,818	\$ 16.14	—	

Common shares repurchased by the Company during the quarter consist of cancellation of 93,523 restricted stock awards and 30,715 restricted stock units to pay withholding taxes. During the three months ended March 31, 2015, (1) 6,580 common shares were repurchased in connection with option exercises and no shares were repurchased pursuant to the Company's publicly announced corporate stock repurchase plan described in (2) below.

The Company's share repurchase plan, which was first approved by its Board of Directors and announced in August 2003, was amended on September 29, 2011 to increase the number of common shares available for repurchase under the plan to 15 million shares. The repurchase program was extended in April 2013 to run through (2) June 2015. As of March 31, 2015, a total of 12.0 million shares remained available for repurchase. The timing and amount of future repurchases will depend upon the market price for our common stock, securities laws restricting repurchases, asset growth, earnings, and our capital plan.
