* In existence at date of merger closing.

** Acquired in 2001.

At December 31, 2001, Alliant Energy did not hold an ownership interest in any companies operating an exempt wholesale generator (EWG). However, during 2001, Alliant Energy did enter into an agreement to develop an EWG (1,100 megawatt (MW) natural gas combined-cycle generating facility) in western Michigan. At December 31, 2001, Resources had made payments and entered into commitments for the purchase of the long-lead equipment and certain development activities for this project equal to \$238 million. During 2001, Alliant Energy also entered into an agreement to guarantee the debt security of an EWG (6 MW low Btu gas electric generating facility) in Cedar Rapids, Iowa. Both of these amounts have been included in the aggregate investment in EWGs and FUCOs identified in Part III.

Part I.

(a). Identify the company, its location and its business address. Describe the facilities used for the generation, transmission and distribution of electric energy for sale or for the distribution at retail of natural or manufactured gas. Identify each system company that holds an interest in the company and describe the interest held.
