**MERCANTILE BANKSHARES CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

1. Basis of Presentation

The consolidated financial statements, which include the accounts of Mercantile Bankshares Corporation ( Bankshares ) (Nasdaq: MRBK) and all of its affiliates, are prepared in conformity with accounting principles generally accepted in the United States of America and follow general practice within the banking industry. In the opinion of management, the consolidated financial statements include all adjustments necessary for a fair presentation of the interim period. These adjustments are of a normal nature and include adjustments to eliminate all significant intercompany transactions. In view of the changing conditions in the national economy, the effect of actions taken by regulatory authorities and normal seasonal factors, the results for the interim period are not necessarily indicative of annual performances. For comparability, certain prior period amounts have been reclassified to conform with current period presentation.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and contingent assets and liabilities in the financial statements, and the disclosure of revenue and expenses during the reporting period. These assumptions are based on information available as of the date of the financial statements and could differ from actual results. See Form 10-K for more detail.

2. Mergers and Acquisitions

In March and April 2003, Bankshares acquired in separate transactions, Boyd Watterson Asset Management, LLC ( BW ), an investment management firm, and Peremel & Company ( Peremel ), a directed and discount brokerage company. In the aggregate, the companies were purchased for approximately \$29 million in cash. The Boyd Watterson acquisition has a potential additional contingent payment of up to \$8.6 million. The contingent payment will be recorded when amounts are resolved and become payable three years from the acquisition date. Bankshares finalized and recorded approximately \$10.1 million of identified intangibles, mostly client relationships, as a result of these acquisitions. These intangibles are being amortized on a straight-line basis over a range of 3 to 8 years. Goodwill recorded on these transactions totaled approximately \$17.0 million at September 30, 2003.

On August 12, 2003, Bankshares completed its acquisition of F&M Bancorp ( F&M ), a bank holding company headquartered in Frederick, Maryland. The total consideration to be paid to F&M stockholders in connection with the acquisition was fixed at the time the merger agreement was executed at approximately \$123.5 million in cash and 10.3 million shares of Bankshares common stock. F&M transactions have been included in Bankshares financial results since August 13, 2003. Acquired assets on August 12, 2003 totaled \$2.2 billion, including \$1.4 billion of loans and leases; liabilities assumed were \$2.0 billion, including \$1.7 billion of deposits. As part of the purchase price allocation at August 12, 2003, Bankshares recorded \$41.7 million of core deposit intangible, and goodwill totaled approximately \$390.6 million. This is a preliminary estimate pending final analysis that is due in the fourth quarter and is subject to change pending the results. The weighted average amortization period for newly acquired core deposit intangible is seven years and is also subject to change pending final results of analysis.

On October 24, 2003, certain assets and liabilities of F&M were transferred to other Bankshares affiliates in order to align customers accounts with the Bankshares affiliate serving the geographic area where those customers reside. As a result of the transfers, future financial statements of Bankshares will not report results of the former F&M as a stand-alone entity.

Edgar Filing: MERCANTILE BANKSHARES CORP - Form 10-Q

F&M, newly acquired in a business combination, falls under the guidance of the Emerging Issues Task Force ( EITF ) in EITF Issue No. 94-3, *Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity (including Certain Costs Incurred in a Restructuring)* . Under EITF Issue No. 94-3, an entity recognizes a liability for an exit cost on the date that the entity commits itself to an exit plan. Exit costs are defined to include those costs recorded by F&M prior to the merger date and therefore are not included in Bankshares results of operations. F&M has recorded exit costs of \$34.0 million relating to severance, systems conversion, branch consolidation and costs associated with terminating contracts (including leases). \$18.1 million of these exit costs were paid as of September 30, 2003.

Bankshares exit costs, referred to herein as merger-related costs, are defined to include those costs for its branch closings and related severance, combining operations such as systems conversions, integration planning consultant's fees and marketing consultant's fees incurred by Bankshares prior to and after the merger date and are included in Bankshares results of operations. Bankshares expensed merger-related costs totaling \$3.3 million and \$2.4 million for the nine and three-month periods ended September 30, respectively. The costs associated with these activities are included in noninterest expenses. Merger-related expenses incurred year to date consisted largely of expenses for professional services rendered in connection with the merger integration plan. Bankshares will incur additional merger-related expenses in the fourth quarter as systems conversions, branch closings and integration of operations continue and will be reflected as expense when incurred.

Disclosed below is certain pro forma information for 2003 as if F&M had been acquired on January 1, 2003 and 2002. These results combine the historical results of F&M into Bankshares consolidated statement of income. This table reflects noninterest expenses adjusted for exit costs and intangible amortization. This is not necessarily what would have occurred had the acquisition taken place on the indicated dates and is not indicative of future results.

3. Earnings Per Share

Basic earnings per share ( EPS ) are computed by dividing income available to common shareholders by weighted average common shares outstanding. Diluted EPS are computed using the same components as basic EPS with the denominator adjusted for the dilutive effect of stock awards. The following tables provide reconciliation between the computation of basis EPS and diluted EPS for the nine months and quarter ended September 30, 2003 and 2002, respectively.

5. Impaired Loans

A loan is considered impaired, based on current information and events, if it is probable that Bankshares will not collect all principal and interest payments according to the contractual terms of the loan agreement. Generally, a loan is considered impaired once either principal or interest payments become 90 days past due at the end of a calendar quarter. A loan may be considered impaired sooner if, in management's judgment, such action is warranted. The impairment of a loan is measured based on the present value of expected future cash flows discounted at the loan's effective interest rate, or fair value of the collateral if the repayment is expected to be provided predominantly by the underlying collateral. A majority of Bankshares' impaired loans are measured by reference to the fair value of the collateral. If a loan is deemed to be impaired a valuation allowance is established for the amount of the impairment. Accrued interest on impaired loans is reversed and is recognized on a cash basis. Information with respect to impaired loans and the related valuation allowance (if the measure of the impaired loan is less than the recorded investment) at September 30, and June 30, 2003 and at the end of December 2002, is shown below. See Form 10-K for more detail.

(Dollars in thousands)	September 30, 2003	June 30, 2003	December 31, 2002

Quarter-to-date average recorded investment in impaired loans during the period	\$ 34,707	\$ 28,822	\$ 44,263

**Note:** Impaired loans do not include large groups of smaller balance homogeneous loans that are evaluated collectively for impairment (e.g., residential mortgages and consumer installment loans). The allowance for loan losses related to these loans is included in the allowance for loan losses applicable to other than impaired loans.

6. Commitments

Various commitments to extend credit (lines of credit) are made in the normal course of the banking business. Total unused lines of credit approximated \$3.4 billion, \$3.0 billion and \$2.9 billion at September 30, 2003, December 31, 2002 and September 30, 2002, respectively. The lines of credit commitments are shown at fair value. These amounts are not recorded on the books of Bankshares. In addition, letters of credit are issued for the benefit of customers by affiliated banks. These outstanding letters of credit were \$284.3 million at September 30, 2003, \$241.1 million at December 31, 2002 and \$232.9 million at September 30, 2002. In accordance with FASB Interpretation No. 45, *Guarantors' Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others*, the fees received for issuing letters of credit are deferred and amortized over the life of the commitment. The letters of credit at September 30, 2003 had a carrying value of \$745 thousand representing unamortized fees.

Bankshares mortgage banking subsidiary, as a Fannie Mae Delegated Underwriting and Servicing lender, has a loss sharing arrangement for loans originated on behalf of and sold to Fannie Mae. The unamortized principal balance of the underlying loans totaled \$150.0 million at September 30, 2003. No allowance has been established for possible losses since there have been no losses recognized during the six-year history of the arrangement and none are expected as of September 30, 2003. The mortgage subsidiary has also originated and loans sold with recourse in the event of foreclosure on the underlying real estate. The unamortized amount of principal balance of loans sold with recourse totaled \$2.5 million at September 30, 2003. These mortgages are generally in good standing and are well collateralized, no loss has ensued and no future loss is expected.

Bankshares has committed to invest funds in third-party private equity investments. At September 30, 2003, December 31, 2002 and September 30, 2002, \$17.8 million, \$15.2 million and \$10.4 million, respectively, remained unfunded.

## 7. Intangible Assets

The following table discloses the gross carrying amount and accumulated amortization of intangible assets subject to amortization at September 30, 2003 and December 31, 2002:

(Dollars in thousands)	September 30, 2003			December 31, 2002		
	Gross Carrying Amount	Accumulated Amortization	Net Amount	Gross Carrying Amount	Accumulated Amortization	Net Amount
Deposit intangibles	\$ 55,556	\$ (7,679)	\$ 47,877	\$ 13,846	\$ (6,581)	\$ 7,265
Mortgage servicing rights	1,914	(1,524)	390	1,543	(1,282)	261
Customer list	10,110	(1,018)	9,092	50	(46)	4
Total	\$ 67,580	\$ (10,221)	\$ 57,359	\$ 15,439	\$ (7,909)	\$ 7,530

The projections of amortization expense shown for mortgage servicing rights are based on asset balances and the interest rate environment as of September 30, 2003. Future amortization expense may be significantly different depending upon changes in the mortgage servicing portfolio, mortgage interest rates and market conditions.

The following table shows the current period and estimated future amortization expense for amortized intangible assets. Core deposit intangibles are amortized based on useful lives of up to seven years. Bankshares recorded an estimated \$41.7 million of core deposit intangibles in conjunction with the F&M acquisition. Future estimated amortization expense amounts are contingent on the final results of the valuation study being conducted in concert with the previously mentioned planned transfer of selected F&M assets and liabilities to Bankshares affiliates in the fourth quarter. Management reviews other intangible assets for impairment yearly (except mortgage servicing rights, which are reviewed monthly), or whenever events or changes in circumstances indicate that their carrying amounts may not be recoverable. For those intangible assets subject to amortization, impairment is indicated if the sum of undiscounted estimated future net cash flow is less than the carrying amount of the asset. Impairment is recognized by accelerating the write off of the asset to the extent that the carrying value exceeds the estimated fair value.

### 8. Comprehensive Income

The following table summarizes the related tax effect of unrealized gains (losses) on securities available-for-sale for the nine months ended September 30, 2003 and 2002. The net amount is included in accumulated other comprehensive income (loss) in the Statement of Changes in Consolidated Shareholders' Equity.

### 9. Capital Adequacy

Bankshares and its bank affiliates are subject to various regulatory capital adequacy requirements administered by federal and state banking agencies. These requirements include maintaining certain capital ratios above minimum levels. These capital ratios include tier I capital and total risk-based capital as percents of net risk-weighted assets and tier I capital as a percent of adjusted average total assets (leverage ratio). The minimum ratios for capital adequacy purposes are 4.00%, 8.00% and 4.00%, for the tier I capital, total capital and leverage ratios, respectively. To be categorized as *well capitalized*, a bank must maintain minimum ratios of 6.00%, 10.00% and 5.00%, for its tier I capital, total capital and leverage ratios, respectively. As of September 30, 2003, Bankshares and all of its bank affiliates except one, F&M, exceeded all capital adequacy requirements to be considered well capitalized. Although adequately capitalized, F&M did not meet the total risk-based capital threshold to be considered well capitalized. As part of the purchase price allocation F&M recorded core deposit intangibles of \$41.7 million, which is deducted from regulatory capital. This deduction reduced F&M's total risk-based capital ratio to 9.3%, slightly below the 10.0% threshold needed to be considered well capitalized. As a result of the transfers referred to in Footnote 2 to the Consolidated Financial

Statements, F&M s total risk-based capital ratio was 18.0% at October 31, 2003.

Capital ratios and the amounts used to calculate them are presented in the following table for Bankshares and Mercantile-Safe Deposit & Trust Company (MSD&T), the lead bank, as of September 30, 2003 and December 31, 2002.

(Dollars in thousands)	September 30, 2003		December 31, 2002

#### 10. Segment Reporting

Operating segments as defined by SFAS No. 131 *Disclosures about Segments of an Enterprise and Related Information* are components of an enterprise with separate financial information. The component engages in business activities, from which it derives revenues and incurs expenses and whose operating results management relies on for decision-making and performance assessment. Bankshares has three reportable segments – the twenty Community Banks, the Banking Division of MSD&T and the Investment and Wealth Management Division (IWM) of MSD&T.

The following table presents selected segment information for the nine months ended September 30, 2003 and 2002. The components in the Other column consist of amounts for the nonbanking affiliates and intercompany eliminations. Certain expense amounts such as operations overhead have been reclassified from internal financial reporting in order to provide for full cost absorption. These reclassifications are shown in the Adjustments line. F&M is included in the column Community Banks whereas BW and Peremel are included in the column MSD&T IWM.

### 11. Derivative Instruments and Hedging Activities

FASB Statement No. 133 (SFAS No. 133), *Accounting for Derivative Instruments and Hedging Activities*, FASB Statement No. 138 (SFAS No. 138), *Accounting for Certain Derivative Instruments and Certain Hedging Activities – an amendment to FASB Statement No. 133* and FASB Statement No. 149 (SFAS No. 149), *Amendment of Statement 133 on Derivative Instruments and Hedging Activities* (collectively referred to as derivatives), establishes accounting and reporting standards for derivative instruments and for hedging activities. Bankshares maintains an overall interest rate risk management strategy that incorporates the use of derivative instruments to minimize significant unplanned fluctuations in earnings that are caused by interest rate volatility. Derivative instruments that are used as part of the interest rate risk management strategy have been restricted to interest rate swaps. Interest rate swaps generally involve the exchange of fixed-rate and variable-rate interest payments between two parties, based on a common notional principal amount and maturity date. Bankshares entered into interest rate swaps to convert fixed-rate loans made to borrowers to floating-rate loans and convert its nonprepayable fixed-rate debt to floating-rate debt.

The fair value of derivative instruments recorded in other assets was \$14.1 million (notional \$203.1 million) and \$11.4 million (notional \$203.2 million) at September 30, 2003 and December 31, 2002, respectively. The fair value of derivative instruments recorded in other liabilities was \$5.4 million (notional \$100.0 million) and \$0 at September 30, 2003 and December 31, 2002, respectively. For the nine months ended September 30, 2003, Bankshares recognized a net gain of \$50 thousand, included in interest and fees on loans, which represented the ineffective portion of the fair-value hedge of fixed-rate loans made to borrowers. For the year ended December 31, 2002, Bankshares recognized a net loss of \$40 thousand. The fair-value hedges of nonprepayable fixed-rate debt were 100% effective for the reported periods.

### 12. Stock-based Compensation Expense

Bankshares has several stock-based compensation programs for its directors, management and employees. These programs include the use of stock options, restricted stock awards and phantom stock. The compensation costs associated with Bankshares Omnibus Stock Plan and the granting of restricted stock awards are included in salary expense. Restricted stock award expense for the third quarter of 2003 includes \$1.0 million related to the accelerated vesting of certain awards in the IWM Division. The costs associated with Bankshares deferred directors compensation plan are included in professional fees as part of other expenses on the income statement. These amounts are summarized in the table below:

(Dollars in thousands)	For the 9 Months Ended September 30,		For the 3 Months Ended September 30,	
	2003	2002	2003	2002

### 13. Recent Accounting Standards

In April 2003, the Financial Accounting Standards Board ( FASB ) issued SFAS No. 149 (SFAS No. 149), Amendment of Statement No.133 on *Derivative Instruments and Hedging Activities*. SFAS No. 149 amends and clarifies accounting for derivative instruments, including certain derivative instruments embedded in other contracts, and for hedging activities under SFAS No. 133. In particular, SFAS No. 149 clarifies under what circumstances a contract with an initial net investment meets the characteristic of a derivative and when a derivative contains a financing component that warrants special reporting in the statement of cash flows. This Statement is generally effective for contracts entered into or modified after June 30, 2003 and did not have a material impact on Bankshares' financial statements.

In May 2003, the FASB issued SFAS No. 150 (SFAS No. 150), *Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity*. SFAS No. 150 establishes standards for how an issuer classifies and measures certain financial instruments with characteristics of both liabilities and equity. This Statement is not expected to have a material impact on Bankshares' financial statements.

On January 17, 2003, FASB issued FASB Interpretation No. 46 Consolidation of Variable Interest Entities — an interpretation of ARB No. 51 (FIN 46). The FASB has deferred the implementation of FIN 46 for all public entities to the first reporting period ending after December 15, 2003. This deferral applies to all variable interest entities both financial and non-financial in nature. Bankshares is currently in the process of evaluating the impact of FIN 46. This Statement is not expected to have a material impact on Bankshares' financial statements.

## **Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**

### **MERCANTILE BANKSHARES CORPORATION**

#### **Consolidated Financial Results**

In March, April and August of 2003, Bankshares acquired in separate transactions, Boyd Watterson Asset Management, LLC ( BW ), Peremel & Company ( Peremel ), and F&M Bancorp ( F&M ), respectively, which are collectively referred to herein as, the Acquisitions . The Acquisitions were accounted for under the purchase method of accounting and their transactions have been included in Bankshares' financial results since their respective closings. On October 24, 2003, certain assets and liabilities of F&M were transferred to other Bankshares affiliates in order to align customers' accounts with the Bankshares affiliate serving the geographic area where those customers reside. As a result of the transfers, future

financial statements of Bankshares will

not report results of the former F&M as a stand-alone entity. (See Footnote 2 to the Consolidated Financial Statements included in this report.)

Net income for the quarter ended September 30, 2003 was \$47.2 million, a 3.0% decrease from net income of \$48.6 million for the same period in 2002. For the quarter ended September 30, 2003, diluted net income per share was \$.63, a decrease of 8.7% from the \$.69 reported for the third quarter last year. Weighted average shares outstanding increased from 69,637,482 for the quarter ended September 30, 2002, to 74,252,653 for the quarter ended September 30, 2003 as a result of the Acquisitions. The results of operations for the Acquisitions are included from their respective merger dates forward.

Factors affecting earnings for the third quarter included: \$1.5 million or \$.02 per share of after-tax expenses related to F&M; \$2.2 million or \$.03 per share of after-tax severance expenses related to the Investment & Wealth Management Division and continued compression of the net interest margin to 4.19% in the third quarter 2003 from 4.60% in the third quarter 2002.

Bankshares also reports operating earnings, defined as GAAP (Generally Accepted Accounting Principles) earnings excluding the amortization of intangible assets associated with purchase accounting for business combinations, securities gains and losses, and other significant gains, losses or expenses that are unusual in nature (such as merger-related expenses). Net operating earnings totaled \$49.9 million for the quarter, an increase of 1.7% compared to \$49.0 million in the same period for 2002. Diluted net operating earnings per share for the third quarter were \$.67, a decrease of 4.3% from \$.70 earned in the third quarter of 2002. A reconciliation of net income (GAAP basis) to net operating earnings can be found on page 23 of this filing.

For the three months ended September 30, 2003, return on average tangible assets was 1.56%, return on average tangible equity was 15.70% and average tangible equity to average tangible assets was 9.91%. Comparable ratios for the three months ended September 30, 2002 were 1.90%, 16.67% and 11.42%, respectively. A reconciliation of these ratios to their respective GAAP basis ratios can be found on page 23 of this filing.

For the nine months ended September 30, 2003, net income was \$146.2 million, an increase of 3.1% over the \$141.7 million reported for the comparable period in 2002. Diluted net income per share for the first three quarters of 2003 was \$2.05, a 1.5% increase over the \$2.02 reported for the same period last year. The Acquisitions added \$10.7 million to net interest income, \$9.9 million to noninterest income and \$14.0 million to noninterest expenses for the nine months ended September 30, 2003.

For the nine months ended September 30, 2003, return on average assets was 1.71%, return on average equity was 14.05% and average equity to average assets was 12.20%. Comparable ratios for the nine months ended September 30, 2002 were 1.89%, 15.13% and 12.52%, respectively.

Management believes that reporting several key measures based on tangible equity (equity less intangible assets) is important, as this is the basis for measuring the adequacy of capital for regulatory purposes. For the nine months ended September 30, 2003, return on average tangible assets was 1.77% compared to 1.93% for the same period last year. The ratio of average tangible equity to average tangible assets was 10.66% compared to 11.53% for the same period last year. The return on average tangible equity for the nine months ended September 30, 2003 and 2002 was 16.57% and 16.72%, respectively.

## Edgar Filing: MERCANTILE BANKSHARES CORP - Form 10-Q

On the date of purchase, F&M had total loans of \$1.4 billion, total earning assets of \$2.0 billion, and total deposits of \$1.7 billion. There were 10,379,710 shares issued for the acquisition, accounted for under the purchase method, resulting in total consideration paid of \$558.1 million giving rise to the creation of approximately \$432.4 million of intangible assets. See Footnote No. 2 for more details on the impact of the Acquisitions on Bankshares consolidated financial statements. The following tables set forth information regarding the F&M portion of the Acquisitions for the periods indicated.

(1) F&M is included from acquisition date, August 12, 2003, through September 30, 2003.

**Note:** Although not a required disclosure, this is intended solely as an aid to help the readers' understanding of the impact of F&M on Bankshares' third quarter results. As a result of the transfers discussed in Footnote 2 to the Consolidated Financial Statements, future financial statements of Bankshares will not report financial data of the former F&M as a stand-alone entity.

### Net Interest Income and Net Interest Margin

Net interest income for the quarter ended September 30, 2003 increased 9.2% or \$10.3 million from the third quarter last year primarily as a result of the Acquisitions (\$10.7 million). Net interest income is affected by both changes in the amount and composition of interest-earning assets and interest-bearing liabilities and by changes in the level of interest rates. The growth in net interest income was attributable to the growth in average earning assets, particularly in the loan portfolio largely as a result of F&M. Average total loans increased \$1.2 billion or 16.3% compared to the prior period. Included in this increase is \$712.4 million relating to F&M. While the growth in the average loan portfolio shows signs of improvement, management expects loan growth to remain in the mid-single digit range for the next several quarters. Average investment securities for the third quarter 2003 increased by \$598.4 million or 25.1% to \$3.0 billion compared to the third quarter 2002. Approximately one half of the increase in average securities was due to F&M.

Growth in net interest income was partially offset by a 41 basis point (bp) decline in net interest margin from 4.60% for the third quarter 2002 to 4.19% for the current quarter. The year-over-year decline in net interest income was negatively affected by the Federal Reserve's 75 bp reduction in short-term interest rates in the last twelve months. In addition, historically low interest rates led to increased refinancing activity, particularly in the residential real estate loan portfolio, commercial and consumer portfolios. Finally, lower reinvestment yields on maturing investment securities and prepayments of mortgage-related securities reduced yields in the investment portfolio. Based on current market conditions, which include a recent slowing of mortgage refinancing activity and a steepening of the yield curve, management expects the net interest margin to begin to stabilize in the fourth quarter of 2003.

Net interest income for the nine months ended September 30, 2003 increased \$16.6 million or 5.0% over the prior nine month period. The growth in net interest income was attributable to a 9.9% growth in average loans and a 16.8% growth in average securities. Core internal growth accounted for two-thirds of the growth in average loans and three-fourths of the growth in average securities for the nine months ended September 30, 2003 over the nine months ended September 30, 2002. Growth in net interest income was partially offset by a 31 bp decline in the net interest margin from 4.68% for the nine months ended September 30, 2002 to 4.37% for the nine months ended September 30, 2003. Nearly two-thirds of the decline in the net interest margin was attributable to the reduced benefit derived from noninterest-bearing funds. This benefit fell from 61 bp for the nine months ended September 30, 2002 to 42 bp for the nine months ended September 30, 2003.

The Analysis of Interest Rates and Interest Differentials and The Rate/Volume Analysis on pages 25 through 27 present further details supporting this discussion.

Noninterest income increased \$10.5 million or 29.7% to \$45.9 million for the third quarter 2003 versus the comparable period in 2002. The Acquisitions added \$6.9 million to noninterest income for the third quarter, of which \$4.4 million was attributable to F&M. Investment and wealth management ( IWM ) revenues increased 19.9% to \$20.6 million for the quarter ended September 30, 2003, \$2.8 million of which is attributable to the Acquisitions.

Service charges on deposit accounts increased 21.7% to \$9.7 million for the current quarter compared to the prior year, of which \$1.2 million was attributable to F&M. Business checking, overdraft and ATM fees are the major contributors to this growth. Mortgage banking fees increased to \$3.4 million for the quarter, of which \$1.0 million related to F&M while \$2.4 million was attributable to continuing production in Bankshares.

Other income, which includes non-deposit fees, insurance income and bank owned life insurance, increased 54.2% to \$12.6 million for the quarter compared to the same period of 2002. F&M contributed \$2.2 million of this increase, the largest portion being insurance revenue totaling \$1.4 million.

For the nine months ended September 30, 2003 noninterest income increased \$22.2 million, or 20.7%. Excluding gains from the sale of investment securities resulting from the ongoing balance sheet management process, noninterest income rose 15.1%. This was due to a \$5.9 million increase in IWM fees, a \$2.9 million increase in service charges on deposit accounts and a \$6.3 million increase in other income. The Acquisitions contributed \$5.8 million, nearly all of the increase, in IWM revenues for the nine months ended September 30, 2003. The improvement in other income is due to reduced writedowns in private equity fund investments.

### Noninterest Expenses

(Dollars in thousands)	For the 9 Months Ended September 30, 2003 vs. 2002		For the 3 Months Ended September 30, 2003 vs. 2002

Other expenses	10,028	26.0	5,965	43.4
Total noninterest expenses	\$ 35,261	17.4	\$ 22,552	32.9

Noninterest expenses for the quarter ended September 30, 2003, increased by \$22.6 million or 32.9% over the third quarter of 2002. Acquisitions added \$11.4 million to noninterest expenses in the third quarter 2003. With respect to the elements of noninterest expenses, salaries increased approximately \$11.1 million or 33.7%, primarily as a result of the Acquisitions (\$5.5 million) and IWM severance expense (\$3.6 million). Pre-operational merger-related staffing costs that are reflected in the third quarter expenses are expected to diminish in the fourth quarter as we begin to realize the contemplated reductions in head-count relating to the integration of F&M. Bankshares is also on track to realize the other targeted cost-savings from the integration of F&M in the fourth quarter of 2003 and into early 2004.

The employee benefit increase over the third quarter 2002 is primarily due to an increase of \$1.4 million in pension and 401-K expenses. Acquisitions added \$800 thousand of benefit expense in the third quarter of 2003.

The \$2.4 million, or 40.5%, increase in furniture and equipment expenses is attributable to technology improvements that have been made in the IWM Division, expenses incurred as a result of the Acquisitions and increased costs related to handling normal volume growth by the main bank operating systems.

Other expenses for the third quarter increased by \$6.0 million, or 43.4% over the prior year. The increase includes \$3.1 million related to the Acquisitions of which, \$1.1 million is amortization of identifiable intangibles. There were also \$1.5 million of merger-related professional fees and an additional \$600 thousand for the Directors' Deferred Compensation plan expense in the third quarter of 2003. The cost of this plan fluctuates with changes in the market value of Bankshares common stock.

Noninterest expenses for the nine months ended September 30, 2003 increased \$35.3 million, or 17.4%. Acquisitions added \$14.0 million to noninterest expenses for the nine months ended September 30, 2003. With respect to the elements of noninterest expenses, salaries increased approximately \$15.8 million or 16.0%, primarily as a result of the Acquisitions (\$6.8 million) and IWM severance expense (\$1.9 million). Pre-operational merger-related staffing costs are expected to diminish in the fourth quarter as we begin to realize the contemplated reductions in head-count.

The \$3.8 million employee benefit increase over the nine months ended September 30, 2002 is largely due to an increase of \$3.2 million in pension and 401-K expenses. \$346 thousand of the pension and 401-K expense increase was attributable to the Acquisitions.

The \$3.9 million, or 21.7%, increase in furniture and equipment expenses for the nine months ended September 30, 2003 over the same period one year ago, is primarily attributable to technology improvements that have been made in the IWM Division, expenses incurred as a result of the Acquisitions and increased costs related to handling normal volume growth by the main bank operating systems.

Other expenses for the nine months ended September 30, 2003 increased by \$10.0 million, or 26.0% over the nine months ended September 30, 2002. The increase includes \$4.1 million related to the Acquisitions of which \$1.5 million is due to amortization of identifiable intangibles, and \$2.3 million of merger-related professional fees. Also included in the increase is an additional \$1.1 million for the Directors' Deferred Compensation plan. The cost of this plan fluctuates with changes in the market value of Bankshares common stock.

As a result of the increased level of expenses, the operating efficiency ratio, a key measure of expense management, was 48.95% for the nine months ended September 30, 2003 versus 45.69% for the comparable period last year. The efficiency ratio is measured by dividing noninterest expenses by the sum of net interest income on a fully taxable-equivalent basis and noninterest income. When computing the efficiency ratio, management excludes the amortization of intangible assets, merger-related expenses and gains and losses from sales of investment securities because of the uncertainty as to timing and amount of gain or loss to be recognized. See page 23 for a reconciliation of this measure to the GAAP basis calculation.

#### **Analysis of Financial Condition**

Edgar Filing: MERCANTILE BANKSHARES CORP - Form 10-Q

At September 30, 2003 compared to December 31, 2002, total assets increased 28.6% or \$3.1 billion. Total loans increased 23.3% or \$1.7 billion. The Acquisitions contributed \$2.1 billion in total assets and \$1.3 billion in total loans.

At September 30, 2003, total assets increased 31.1% or \$3.3 billion compared to one year earlier. Total loans increased 25.2% or \$1.8 billion at September 30, 2003, compared to one year earlier.

Total deposits at September 30, 2003, were \$10.3 billion, an increase of 24.6% or \$2.0 billion over December 31, 2002. Interest-bearing deposits were \$7.6 billion, an increase of 23.1% or \$1.4 billion from the end of last year. Noninterest-bearing deposits were \$2.7 billion, an increase of 29.3% or \$611.5 million compared to December 31, 2002. A large part of the growth in deposits was due to the Acquisitions. The Acquisitions added \$1.7 billion in total deposits, of which \$1.4 billion were interest-bearing and \$310.5 million were noninterest-bearing deposits. The additional growth in deposits was in core deposits from customers in the local markets. The affiliate banking structure positions Bankshares to compete not only with the large national and regional competition in the gathering of these funds, but also with local community banks. Management believes the company is positioned to retain these deposits in a rising interest rate scenario. However, should the company experience an outflow of deposits, a reversal of recent trends, the investment portfolio should provide adequate liquidity to fund such outflows.

Shareholders' equity at September 30, 2003 was \$1.8 billion, an increase of 37.6% from December 31, 2002. Bankshares has repurchased 5,500 shares year to date, and has authorization enabling it to repurchase up to 1.5 million additional shares. There were no share repurchases during the quarter. Historically, shares repurchased have been open market purchases. For more details see the Statement of Changes in Consolidated Shareholders' Equity on page 5. Since the share repurchase program began in the mid-1990s, Management has generally targeted 40% of net income for cash dividends to shareholders and 30% of net income for potential share repurchases. At September 30, 2003 and December 31, 2002 the cash dividend payout ratio was 46.38% and 43.07% respectively.

#### **Asset Quality**

#### **Nonperforming Assets**

Nonperforming assets consist of nonaccrual loans, renegotiated loans and other real estate owned (i.e., real estate acquired in foreclosure or in lieu of foreclosure). With respect to nonaccrual loans, Bankshares policy is that, regardless of the value of the underlying collateral and/or guarantees, no interest is accrued on the entire balance once either principal or interest payments on any loan become 90 days past due at the end of a calendar quarter. All accrued and uncollected interest on such loans is eliminated from the income statement and is recognized only as collected. A loan may be put on nonaccrual status sooner than this standard if, in management's judgment, such action is warranted.

During the three months ended September 30, 2003, nonperforming assets increased \$13.3 million to \$51.4 million. Nonaccrual loans were \$51.0 million at September 30, 2003 and increased \$17.6 million over year end. Other real estate owned, the other component of nonperforming assets, increased \$265 thousand to \$397 thousand from year end. Nonperforming assets as a percent of period-end loans and other real estate owned was .57% at September 30, 2003 and .46% at December 31, 2002, respectively. The increase in nonperforming loans was due primarily to a customer of Mercantile Safe Deposit and Trust Company (MSD&T), the lead bank, engaged in the air pollution control system business. These loans were moved from monitored to nonaccrual status. The loans to this customer totaled approximately \$10.3 million. The Acquisitions added \$3.6 million to nonperforming assets.

At September 30, 2003 and December 31, 2002, monitored loans, or loans with characteristics suggesting that they could be classified as nonperforming in the near future, were \$30.5 million and \$24.9 million, respectively. Net additions to the monitored loan category were primarily attributable to several customers of MSD&T. The largest component of monitored loans continues to be the two commercial aircraft-related loans added to this category during the fourth quarter of 2002. These two loans are performing and current with a balance of approximately \$18.7 million at September 30, 2003. They remain in the monitored category because of continuing pressure on the airline industry overall. The amount of loans past due 30-89 days decreased from

\$104.2 million at December 31, 2002 to \$40.7 million at September 30, 2003. The Acquisitions accounted for approximately \$9.1 million of loans past due 30-89 days. In general, credit quality indicators remain stable at the community banks with greater fluctuations occurring at MSD&T.

The table below presents a comparison of nonperforming assets at September 30, 2003, June 30, 2003 and December 31, 2002.

(1) Aggregate gross interest income of \$2.8 million, \$1.5 million and \$2.8 million for the nine months ended September 30, 2003, the first six months of 2003 and the year 2002, respectively, on nonaccrual and renegotiated loans, would have been recorded if these loans had been accruing on their original terms throughout the period or since origination if held for part of the period. The amount of interest income on the nonaccrual and renegotiated loans that was recorded totaled \$1.1 million, \$648 thousand and \$641 thousand for the nine months ended September 30, 2003, the first six months of 2003 and the year 2002, respectively.

**Note:** Bankshares was monitoring loans estimated to aggregate \$30.5 million at September 30, 2003, \$34.5 million at June 30, 2003 and \$24.9 million at December 31, 2002, not classified as nonaccrual or renegotiated loans. These loans had characteristics that indicated they might result in such classification in the future.

#### Allowance and Provision for Loan Losses

## Edgar Filing: MERCANTILE BANKSHARES CORP - Form 10-Q

Each Bankshares affiliate is required to maintain an allowance for loan losses adequate to absorb losses inherent in the loan portfolio. Management at each affiliate, along with Bankshares management, conducts a regular review to assure that adequacy. On a periodic basis, significant credit exposures, nonperforming loans, impaired loans, historical losses by loan type and various statistical measurements of asset quality are examined to assure the adequacy of the allowance for loan losses.

The allowance for loan losses has been established through provisions for loan losses charged against income. Loans deemed uncollectible are charged against the allowance for loan losses and any subsequent recoveries are credited to the allowance. Intensive collection efforts continue after charge-off in order to maximize recovery amounts. The provision for loan losses for the third quarter of 2003 was \$3.0 million, a 7.4% decrease from the same period last year. Net charge-offs were \$2.7 million, a 32.5% increase for the third quarter of 2003 compared to the same period in 2002. The allowance for loans as a percent of period-end loans decreased to 1.73% at September 30, 2003 from 1.90% at the end of the third quarter last year.

The provision for loan losses for the nine months ended September 30, 2003 was \$9.1 million, a decrease of 20.7% from last year's provision. The provision increased last year as credit quality issues were identified and addressed within the leasing business. Nonperforming assets in the leasing business have declined from \$4.5

**Cautionary Statement**

This report contains financial information determined by methods other than in accordance with Generally Accepted Accounting Principles ( GAAP ). Bankshares management uses these non-GAAP measures in their analysis of the Company s performance. In, particular, net interest income, net interest margin and net operating efficiency are calculated on a fully tax-equivalent basis ( FTE ). The FTE basis is determined by adjusting net interest income to reflect tax-exempt interest income on a before-tax equivalent basis. These measures typically adjust GAAP performance measures to exclude goodwill and the amortization of goodwill related to the consummation of mergers. These non-GAAP measures may also exclude other significant gains, losses or expenses that are unusual in nature. Since these items and their impact on Bankshares performance are difficult to predict, management believes presentations of financial measures excluding the impact of these items provide useful supplemental information that is essential to a proper understanding of the operating results and financial position of Bankshares core businesses. These disclosures should not be viewed as a substitute for results determined in accordance with GAAP, nor are they necessarily comparable to non-GAAP performance measures that may be presented by other companies.

This report contains forward-looking statements within the meaning of and pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. A forward-looking statement encompasses any estimate, prediction, opinion or statement of belief contained in this report, and the underlying management assumptions. Such statements in this report include identification of trends, loan growth, comments on adequacy of the allowance for loan losses, credit quality, changes in leasing activities, effects of asset sensitivity and interest rate changes, and information concerning market risk referenced in Item 3. Forward-looking statements are based on current expectations and assessments of potential developments affecting market conditions, interest rates and other economic conditions, and results may ultimately vary from the statements made in this report.
