**Assured Guaranty Ltd.
Notes to Consolidated Financial Statements**

September 30, 2008

(Unaudited)

1. Business and Organization

Assured Guaranty Ltd. (the Company) is a Bermuda-based holding company which provides, through its operating subsidiaries, credit enhancement products to the public finance, structured finance and mortgage markets. Credit enhancement products are financial guarantees or other types of support, including credit derivatives, that improve the credit of underlying debt obligations. The Company issues policies in both financial guaranty and credit derivative form. Assured Guaranty Ltd. applies its credit expertise, risk management skills and capital markets experience to develop insurance, reinsurance and derivative products that meet the credit enhancement needs of its customers. Under a reinsurance agreement, the reinsurer, in consideration of a premium paid to it, agrees to indemnify another insurer, called the ceding company, for part or all of the liability of the ceding company under one or more insurance policies that the ceding company has issued. A derivative is a financial instrument whose characteristics and value depend upon the characteristics and value of an underlying security. Assured Guaranty Ltd. markets its products directly to and through financial institutions, serving the U.S. and international markets. Assured Guaranty Ltd.'s financial results include four principal business segments: financial guaranty direct, financial guaranty reinsurance, mortgage guaranty and other. These segments are further discussed in Note 13.

Financial guaranty insurance provides an unconditional and irrevocable guaranty that protects the holder of a financial obligation against non-payment of principal and interest when due. Financial guaranty insurance may be issued to the holders of the insured obligations at the time of issuance of those obligations, or may be issued in the secondary market to holders of public bonds and structured securities. A loss event occurs upon existing or anticipated credit deterioration, while a payment under a policy occurs when the insured obligation defaults. This requires the Company to pay the required principal and interest when due in accordance with the underlying contract. The principal types of obligations covered by the Company's financial guaranty direct and financial guaranty assumed reinsurance businesses are structured finance obligations and public finance obligations. Because both businesses involve similar risks, the Company analyzes and monitors its financial guaranty direct portfolio and financial guaranty assumed reinsurance portfolio on a unified process and procedure basis.

Mortgage guaranty insurance is a specialized class of credit insurance that provides protection to mortgage lending institutions against the default of borrowers on mortgage loans that, at the time of the advance, had a loan to value in excess of a specified ratio. Reinsurance in the mortgage guaranty insurance industry is used to increase the insurance capacity of the ceding company, to assist the ceding company in meeting applicable regulatory and rating agency requirements, to augment the financial strength of the ceding company, and to manage the ceding company's risk profile. The Company provides mortgage guaranty protection on an excess of loss basis.

The Company has participated in several lines of business that are reflected in its historical financial statements but that the Company exited in connection with its 2004 initial public offering (IPO). The results from these lines of business are included in the Company's Other segment discussed in Note 13.

Edgar Filing: ASSURED GUARANTY LTD - Form 10-Q

On April 8, 2008, investment funds managed by WL Ross & Co. LLC ("WL Ross") purchased 10,651,896 shares of the Company's common equity at a price of \$23.47 per share, resulting in proceeds to the Company of \$250.0 million. The Company contributed \$150.0 million of these proceeds to its Bermuda domiciled reinsurance subsidiary, Assured Guaranty Re Ltd. ("AG Re"). In addition, the Company contributed \$100.0 million of these proceeds to its subsidiary, Assured Guaranty US Holdings Inc., which in turn contributed the same amount to its Maryland domiciled insurance subsidiary, Assured Guaranty Corp. ("AGC"). The commitment to purchase these shares was previously announced on February 29, 2008. In addition, Wilbur L. Ross, Jr., President and Chief Executive Officer of WL Ross, was appointed to the Board of Directors of the Company to serve a term expiring at the Company's 2009 annual general meeting of shareholders. Mr. Ross's appointment became effective immediately following the Company's 2008 annual general meeting of shareholders, which was held on May 8, 2008. WL Ross has a remaining commitment through April 8, 2009 to purchase up to \$750.0 million of the Company's common equity, at the Company's option, subject to the terms and conditions of the investment agreement with the Company

Table of Contents

dated February 28, 2008. In accordance with the investment agreement, the Company may exercise this option in one or more drawdowns, subject to a minimum drawdown of \$50 million, provided that the purchase price per common share for the subsequent shares is not greater than 17.5% above, or less than 17.5% below, the price per common share for the initial shares. The purchase price per common share for such shares will be equal to 97% of the volume weighted average price of a common share on the NYSE for the 15 NYSE trading days prior to the applicable drawdown notice. As of September 30, 2008, and as of the date of this filing, the purchase price per common share is outside of this range and therefore the Company may not, at this time, exercise its option for WL Ross to purchase additional shares. Additionally, in accordance with the investment agreement, at this time the ratings of the Company's operating subsidiaries, AGC and AG Re, are not stable (See Note 16) and therefore the Company may not exercise its option for WL Ross to purchase additional shares.

On September 16, 2008, the Company agreed to waive the standstill provisions of the investment agreement to permit investment funds managed by WL Ross (the "WL Ross Funds") to purchase up to 5,000,000 additional common shares of the Company in open market transactions from time to time. The timing and amount of any such purchases are in the sole discretion of WL Ross and they are not obligated to purchase any such shares. The additional shares purchased by the WL Ross Funds, if any, will be purchased from current shareholders and therefore will not result in an increase in shareholders' equity at the Company or its subsidiaries. If all 5,000,000 additional shares were purchased, the WL Ross Funds would beneficially own 17,166,396 shares or approximately 18.9% of the Company's outstanding common shares based on shares outstanding as of September 30, 2008. As of the date of this filing, the Company has not been notified that WL Ross Funds purchased any additional shares of the Company.

The Company's subsidiaries have been assigned the following insurance financial strength ratings:

	Moody's	S&P	Fitch
Assured Guaranty Corp.	Aaa(Exceptional)	AAA(Extremely Strong)	AAA(Extremely Strong)
Assured Guaranty Re Ltd.	Aa2(Excellent)	AA(Very Strong)	AA(Very Strong)
Assured Guaranty Re Overseas Ltd.	Aa2(Excellent)	AA(Very Strong)	AA(Very Strong)
Assured Guaranty Mortgage Insurance Company	Aa2(Excellent)	AA(Very Strong)	AA(Very Strong)
Assured Guaranty (UK) Ltd.	Aaa(Exceptional)	AAA(Extremely Strong)	AAA(Extremely Strong)

On July 21, 2008, Moody's Investors Service ("Moody's") placed under review for possible downgrade the Aaa insurance financial strength ratings of Assured Guaranty Corp. and its wholly owned subsidiary, Assured Guaranty (UK) Ltd., as well as the Aa2 insurance financial strength ratings of Assured Guaranty Re Ltd. and its affiliated insurance operating companies. Moody's has also placed under review for possible downgrade the Aa3 senior unsecured rating of parent company, Assured Guaranty US Holdings Inc. and the Aa3 issuer rating of the ultimate holding company, Assured Guaranty Ltd. The timing and outcome of the Moody's review are uncertain. (See Note 16). As of the date of this filing, the Company's rating outlook is categorized as stable from both S&P and Fitch.

2. Basis of Presentation

The unaudited interim consolidated financial statements, which include the accounts of the Company, have been prepared in conformity with accounting principles generally accepted in the United States of America ("GAAP") and, in the opinion of management, reflect all adjustments, which are of a normal recurring nature, necessary for a fair statement of the Company's financial condition, results of operations and cash flows for the periods presented. The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. These unaudited interim consolidated financial statements cover the three-month period ended September 30, 2008 ("Third Quarter

Edgar Filing: ASSURED GUARANTY LTD - Form 10-Q

2008), the three-month period ended September 30, 2007 (Third Quarter 2007), the nine-month period ended September 30, 2008 (Nine Months 2008) and the nine-month period ended September 30, 2007 (Nine Months 2007). Operating results for the three- and nine-month periods ended September 30, 2008 are not necessarily indicative of the results that may be expected for a full year. These unaudited interim consolidated financial statements should be read in

Table of Contents

conjunction with the Company's consolidated financial statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2007, filed with the Securities and Exchange Commission.

Certain of the Company's subsidiaries are subject to U.S. and U.K. income tax. The provision for income taxes is calculated in accordance with Statement of Financial Accounting Standards (FAS) FAS No. 109, Accounting for Income Taxes. The Company's provision for income taxes for interim financial periods is not based on an estimated annual effective rate due to the variability in changes in fair value of its credit derivatives, which prevents the Company from projecting a reliable estimated annual effective tax rate and pre-tax income for the full year of 2008. A discrete calculation of the provision is calculated for each interim period.

Reclassifications

Certain prior year items have been reclassified to conform to the current year presentation.

Effective with the quarter ended March 31, 2008, the Company reclassified the revenues, expenses and balance sheet items associated with financial guaranty contracts that the Company's financial guaranty subsidiaries write in the form of credit default swap (CDS) contracts. The reclassification does not change the Company's net income (loss) or shareholders' equity. This reclassification is being adopted by the Company after agreement with member companies of the Association of Financial Guaranty Insurers in consultation with the staffs of the Office of the Chief Accountant and the Division of Corporate Finance of the Securities and Exchange Commission. The reclassification is being implemented in order to increase comparability of the Company's financial statements with other financial guaranty companies that have CDS contracts.

In general, the Company structures credit derivative transactions such that the method for making loss payments is similar to that for financial guaranty policies and generally occurs as losses are realized on the underlying reference obligation. Nonetheless, credit derivative transactions are governed by International Swaps and Derivatives Association, Inc. (ISDA) documentation and operates differently from financial guaranty insurance policies. Under GAAP CDS contracts are subject to derivative accounting rules and financial guaranty policies are subject to insurance accounting rules.

In the accompanying unaudited interim consolidated statements of operations and comprehensive income, the Company has reclassified previously reported CDS revenues from net earned premiums to realized gains and other settlements on credit derivatives. Loss and loss adjustment expenses and recoveries that were previously included in loss and loss adjustment expenses (recoveries) have been reclassified to realized gains and other settlements on credit derivatives, as well. Portfolio and case loss and loss adjustment expenses have been reclassified from loss and loss adjustment expenses (recoveries) and are included in unrealized gains (losses) on credit derivatives, which previously included only unrealized mark to market gains or losses on the Company's contracts written in CDS form. In the consolidated balance sheet, the Company reclassified all CDS-related balances previously included in unearned premium reserves, reserves for losses and loss adjustment expenses, prepaid reinsurance premiums, premiums receivable and reinsurance balances payable to either credit derivative liabilities or credit derivative assets, depending on the net position of the CDS contract at each balance sheet date.

The effects of these reclassifications on the Company's consolidated statements of operations and comprehensive income and cash flows for the three and nine months ended September 30, 2007 are as follows (dollars in thousands):

Table of Contents

	Three Months Ended September 30, 2007	
	As previously reported	As reclassified

Increase in unearned premium reserves	(69,273)	(66,631)
Net earned premiums	164,348	113,642
Realized gains and other settlements on credit derivatives		52,116
Unrealized losses on derivative financial instruments	(247,902)	
Unrealized losses on credit derivatives		(250,929)
Loss and loss adjustment expenses (recoveries)	(10,096)	(11,791)
Acquisition costs	32,038	32,116
Net loss	(43,202)	(43,202)

	Nine Months Ended September 30, 2007	
	As previously reported	As reclassified
CASH FLOWS FROM OPERATING ACTIVITIES:		
Change in unrealized losses on derivative financial instruments	\$ 247,902	\$ 247,902
Unrealized losses on credit derivatives		247,902
Other changes in credit derivative assets and liabilities, net		677
Change in premiums receivable	508	4,992
Change in prepaid reinsurance premiums	(9,926)	(9,430)
Change in unearned premium reserves	79,487	76,349
Change in reserves for losses and loss adjustment expenses, net	257	(2,262)
Net cash provided by operating activities	187,368	187,368

These adjustments had no impact on net income (loss), comprehensive income (loss), earnings (loss) per share, cash flows or total shareholders equity.

3. Recent Accounting Pronouncements

In September 2006, the Financial Accounting Standards Board (FASB) issued FAS No. 157, Fair Value Measurements (FAS 157). FAS 157 defines fair value, establishes a framework for measuring fair value and

Table of Contents

expands disclosures about fair value measurements. FAS 157 applies to other accounting pronouncements that require or permit fair value measurements, since the FASB had previously concluded in those accounting pronouncements that fair value is the relevant measure. Accordingly, FAS 157 does not require any new fair value measurements. FAS 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. The Company adopted FAS 157 effective January 1, 2008. See Note 14.

In February 2007, the FASB issued FAS No. 159, *The Fair Value Option for Financial Assets and Liabilities* (FAS 159). FAS 159 allows entities to voluntarily choose, at specified election dates, to measure many financial assets and financial liabilities (as well as certain nonfinancial instruments that are similar to financial instruments) at fair value (the fair value option). The election is made on an instrument-by-instrument basis and is irrevocable. If the fair value option is elected for an instrument, FAS 159 specifies that all subsequent changes in fair value for that instrument shall be reported in the Statement of Operations and Comprehensive Income. FAS 159 is effective as of the beginning of an entity's first fiscal year that begins after November 15, 2007. The Company adopted FAS 159 effective January 1, 2008. The Company did not apply the fair value option to any eligible items on its adoption date.

In April 2007, the FASB Staff issued FASB Staff Position No. FIN 39-1, *Amendment of FASB Interpretation No. 39* (FSP FIN 39-1), which permits companies to offset cash collateral receivables or payables with net derivative positions under certain circumstances. FSP FIN 39-1 is effective for fiscal years beginning after November 15, 2007, with early adoption permitted. FSP FIN 39-1 did not affect the Company's results of operations or financial position.

In March 2008, the FASB issued FAS No. 161, *Disclosures About Derivative Instruments and Hedging Activities* An Amendment of FASB Statement No. 133 (FAS 161). FAS 161 establishes the disclosure requirements for derivative instruments and for hedging activities. FAS 161 is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008. Early application is encouraged. FAS 161 is not expected to have an impact on the Company's current results of operations or financial position.

In May 2008, the FASB issued FAS No. 163, *Accounting for Financial Guarantee Insurance Contracts* An Interpretation of FASB Statement No. 60 (FAS 163). FAS 163 requires that an insurance enterprise recognize a claim liability prior to an event of default (insured event) when there is evidence that credit deterioration has occurred in an insured financial obligation. FAS 163 also clarifies the methodology to be used for financial guaranty premium revenue recognition and claim liability measurement, as well as requiring expanded disclosures about the insurance enterprise's risk management activities. The provisions of FAS 163 related to premium revenue recognition and claim liability measurement are effective for financial statements issued for fiscal years beginning after December 15, 2008, and all interim periods within those fiscal years. Earlier application of these provisions is not permitted. The expanded risk management activity disclosure provisions of FAS 163 are effective for the third quarter of 2008 and are included in Note 6 of these financial statements. FAS 163 will be applied to all existing and future financial guaranty insurance contracts written by the Company. The cumulative effect of initially applying FAS 163 will be recorded as an adjustment to retained earnings as of January 1, 2009. The adoption of FAS 163 is expected to have a material effect on the Company's financial statements. The Company is in the process of estimating the impact of its adoption of FAS 163. The Company will continue to follow its existing accounting policies in regards to premium revenue recognition and claim liability measurement until it adopts FAS 163 on January 1, 2009.

In June 2008, the FASB issued FSP EITF 03-6-1, *Participating Securities and the Two-Class Method* under FASB Statement No. 128 (FSP). The FSP addresses whether instruments granted in share-based payment transactions are participating securities prior to vesting and therefore need to be included in the earnings allocation in calculating earnings per share (EPS) under the two-class method described in FAS No. 128, *Earnings per Share*. The FSP requires companies to treat unvested share-based payment awards that have non-forfeitable rights to dividend or dividend equivalents as a separate class of securities in calculating earnings per share. The FSP is effective for fiscal years beginning after December 15, 2008; earlier application is not permitted. This FSP also requires that all prior period EPS data be adjusted retrospectively. The Company does not expect adoption of the FSP to have a material effect on its results of operations or earnings per share.

Table of Contents

On October 10, 2008, the FASB issued FASB Staff Position No. 157-3, *Determining the Fair Value of a Financial Asset When the Market for That Asset Is Not Active* (FSP 157-3). FSP 157-3 clarified the application of FAS 157, *Fair Value Measurements*, in a market that is not active. FSP 157-3 was effective when issued. It did not have an impact on the Company's current results of operations or financial position.

The FASB adopted FSP FAS 133-1, *Disclosures About Credit Derivatives and Certain Guarantees* and FAS 161, *Disclosures about Derivative Instruments and Hedging Activities* to address concerns that current derivative disclosure requirements did not adequately address the potential adverse effects that these instruments can have on the financial performance and operations of an entity. Companies will be required to provide enhanced disclosures about their derivative activities to enable users to better understand: (1) how and why a company uses derivatives, (2) how it accounts for derivatives and related hedged items, and (3) how derivatives affect its financial statements. These should include the terms of the derivatives, collateral posting requirements and triggers, and other significant provisions that could be detrimental to earnings or liquidity. Disclosures specific to credit derivatives must be included in the December 31, 2008 financial statements. Certain other derivative and hedging disclosures must be included in the Company's March 31, 2009 Form 10-Q. Management believes that the Company's current derivatives disclosures are in compliance with the items required by FSP 133-1 and FAS 161.

4. Credit Derivatives

Credit derivatives issued by the Company, principally in the form of CDS contracts, have been deemed to meet the definition of a derivative under FAS No. 133, *Accounting for Derivative Instruments and Hedging Activities* (FAS 133), FAS No. 149, *Amendment of Statement 133 on Derivative Instruments and Hedging Activities* (FAS 149) and FAS No. 155, *Accounting for Certain Hybrid Financial Instruments* (FAS 155). FAS 133, FAS 149 and FAS 155 (which the Company adopted on January 1, 2007) establish accounting and reporting standards for derivative instruments, including certain derivative instruments embedded in other contracts (collectively referred to as derivatives), and for hedging activities. FAS 133 and FAS 149 require that an entity recognize all derivatives as either assets or liabilities in the consolidated balance sheets and measure those instruments at fair value. If certain conditions are met, a derivative may be specifically designated as a fair value, cash flow or foreign currency hedge. FAS 155 requires companies to recognize freestanding or embedded derivatives relating to beneficial interests in securitized financial instruments. This recognition was not required prior to January 1, 2007. The accounting for changes in the fair value of a derivative depends on the intended use of the derivative and the resulting designation. The Company had no derivatives that were designated as hedges during 2008 and 2007.

Realized gains and other settlements on credit derivatives include credit derivative premiums received and receivable for credit protection the Company has sold under its insured CDS as well as any contractual claim losses paid and payable related to insured credit events under these contracts, ceding commissions (expense) income and realized gains or losses related to their early termination. The Company generally holds credit derivative contracts to maturity. However, in certain circumstances such as for risk management purposes or as a result of a decision to exit a line of business, the Company may decide to terminate a credit derivative contract prior to maturity.

The following table disaggregates realized gains and other settlements on credit derivatives into its component parts for the three- and nine-month periods ended September 30, 2008 and 2007 (dollars in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008	2007
Realized gains and other settlements on credit derivatives				

Edgar Filing: ASSURED GUARANTY LTD - Form 10-Q

Total realized gains and other settlements on credit derivatives	\$	29,960	\$	17,751	\$	89,370	\$	52,116

Unrealized gains (losses) on credit derivatives represent the adjustments for changes in fair value that are

Table of Contents

recorded in each reporting period, under FAS 133. Changes in unrealized gains and losses on credit derivatives are reflected in the consolidated statements of operations and comprehensive income in unrealized gains (losses) on credit derivatives. Cumulative unrealized losses, determined on a contract by contract basis, are reflected as liabilities in the Company's balance sheets. Cumulative unrealized gains, determined on a contract by contract basis, are reflected as assets. Unrealized gains and losses resulting from changes in the fair value of credit derivatives occur because of changes in interest rates, credit spreads, the credit ratings of the referenced entities and the issuing Company's own credit rating and other market factors. The unrealized gains and losses on credit derivatives will reduce to zero as the exposure approaches its maturity date, unless there is a payment default on the exposure. Changes in the fair value of the Company's credit derivative contracts do not reflect actual claims or credit losses, and have no impact on the Company's claims paying resources, rating agency capital or regulatory capital positions.

The Company determines fair value of its credit derivative contracts primarily through modeling that uses various inputs such as credit spreads, based on observable market indices and on recent pricing for similar contracts, and expected contractual life to derive an estimate of the value of our contracts in our principal market (see Note 14). Credit spreads captures the impact of performance of underlying assets, among other factors, on these contracts. The Company's pricing model takes into account not only how credit spreads on risks that it assumes affects pricing, but how the Company's own credit spread affects the pricing of its deals. If credit spreads of the underlying obligations change, the fair value of the related credit derivative changes. Market liquidity could also impact valuations of the underlying obligations.

The impact of changes in credit spreads will vary based upon the volume, tenor, interest rates, and other market conditions at the time these fair values are determined. In addition, since each transaction has unique collateral and structure terms, the underlying change in fair value of each transaction may vary considerably. The fair value of credit derivative contracts also reflects the change in the Company's own credit cost based on the price to purchase credit protection on AGC. During Third Quarter 2008 and Nine Months 2008, the Company incurred net pre-tax mark-to-market losses on credit derivative contracts of \$(116.2) million and gains of \$332.6 million, respectively. The Third Quarter loss includes a gain of \$668.0 million associated with the change in AGC's credit spread, which widened substantially from 900 basis points at June 30, 2008 to 1,255 basis points at September 30, 2008. Management believes that the widening of AGC's credit spread is due to the correlation between AGC's risk profile and that experienced currently by the broader financial markets. Offsetting the gain attributable to the significant increase in AGC's credit spread were declines in fixed income security market prices primarily attributable to widening spreads in certain markets as a result of the continued deterioration in credit markets and some credit rating downgrades, rather than from delinquencies or defaults on securities guaranteed by the Company. The higher credit spreads in the fixed income security market are due to the recent lack of liquidity in the high yield collateralized debt obligation and collateralized loan obligation markets as well as continuing market concerns over the most recent vintages of subprime residential mortgage backed securities.

The total notional amount of credit derivative exposure outstanding as of September 30, 2008 and December 31, 2007 and included in the Company's financial guaranty exposure was \$77.6 billion and \$71.6 billion, respectively.

The components of the Company's unrealized gain (loss) on credit derivatives as of September 30, 2008 are:

Asset Type	Net Par Outstanding (in billions)	Wtd. Avg. Credit Rating	3Q-08 Unrealized Gain (Loss) (in millions)	9 mos. 2008 Unrealized Gain (Loss) (in millions)
Corporate collateralized loan obligations	\$ 26.6	AAA	\$ (3.7)	\$ 292.1
Market value CDOs of corporates	3.7	AAA	0.7	46.0
Trust preferred securities	6.3	AAA	11.4	69.8
Total pooled corporate obligations	36.6	AAA	8.4	408.0
Commercial mortgage-backed securities	5.9	AAA	0.7	79.3
Residential mortgage-backed securities	21.3	AA	(99.8)	60.8

Edgar Filing: ASSURED GUARANTY LTD - Form 10-Q

Other		10.6	AA+		(31.1)	(201.1)
Total	\$	74.4	AA+	\$	(121.8)	\$ 347.0
Reinsurance exposures written in CDS form		3.2	AA+		5.6	(14.4)
Grand Total	\$	77.6	AA+	\$	(116.2)	\$ 332.6

Table of Contents

Corporate collateralized loan obligations, market value CDOs, and trust preferred securities, which comprise the Company's pooled corporate exposures, include all U.S. structured finance pooled corporate obligations and international pooled corporate obligations. Commercial mortgage-backed securities is comprised of commercial U.S. structured finance and commercial international mortgage backed securities. Residential mortgage-backed securities is comprised of prime and subprime U.S. mortgage-backed and home equity securities, international residential mortgage-backed and international home equity securities. Other includes all other U.S. and international asset classes, such as commercial receivables, and international infrastructure and pooled infrastructure securities.

The Company's exposure to pooled corporate obligations is highly diversified in terms of obligors and industries. Most pooled corporate transactions are structured to limit exposure to any given obligor and industry. The majority of the Company's pooled corporate exposure in the direct segment consists of collateralized loan obligations (CLOs). Most of these direct CLOs have an average obligor size of less than 1% and typically restrict the maximum exposure to any one industry to approximately 10%. The Company's exposure also benefits from embedded credit enhancement in the transactions which allows it to sustain a certain level of losses in the underlying collateral, further insulating the Company from industry specific concentrations of credit risk on these deals.

The Company's \$10.6 billion exposure to Other CDS contracts is also highly diversified. It includes \$5.0 billion of exposure to four pooled infrastructure deals comprised of diversified pools of international infrastructure project transactions and loans to regulated utilities. These pools were all structured with underlying enhancement sufficient for the Company to attach at super senior AAA levels. The remaining \$5.6 billion of exposure in Other CDS contracts is comprised of numerous deals typically structured with significant underlying enhancement and spread across various asset classes, such as commercial receivables, infrastructure, regulated utilities and consumer receivables. Substantially all of this \$10.6 billion of exposure is rated investment grade and the weighted average credit rating is AA+.

The Company's exposure to the mortgage industry is discussed in Note 6.

The unrealized loss of \$(31.1) million for the Third Quarter in the Other asset type is mainly due to widening spreads for a pooled infrastructure transaction and a wrapped film securitization transaction. The unrealized loss of \$(201.1) million for Nine Months ended September 30, 2008 is primarily attributable to a change in the call date assumption and widening of spreads for a pooled infrastructure transaction during the Second Quarter 2008, that resulted in a unrealized loss of \$(100.4) million, and a ratings downgrade on a wrapped film securitization transaction, that resulted in an unrealized loss of \$(48.2) million. Other also includes management's estimate of credit related impairments for the Company's credit derivative exposures of \$10.1 million and \$18.9 million for the Third Quarter and Nine Months ended September 30, 2008, respectively. With considerable volatility continuing in the market, the fair value adjustment amount may fluctuate significantly in future periods.

The following table presents additional details about the Company's unrealized gain on pooled corporate obligation credit derivatives, which includes collateralized loan obligations, market value CDOs and trust preferred securities, by asset type as of September 30, 2008:

Asset Type	Original Subordination(2)	Current Subordination(2)	Net Par Outstanding (in billions)	Weighted Average Credit Rating(1)	3Q-08 Unrealized Gain (Loss) (in millions)	9 mos. 2008 Unrealized Gain (Loss) (in millions)
High yield corporates	36.3%	34.3%	\$ 23.5	AAA	\$ (3.7)	\$ 278.0
Trust preferred	46.2%	43.2%	6.3	AAA	11.4	69.8
Market value CDOs of corporates	41.6%	37.5%	3.7	AAA	0.7	46.0
Investment grade corporates	28.7%	29.6%	2.3	AAA	(0.6)	6.2

Edgar Filing: ASSURED GUARANTY LTD - Form 10-Q

Commercial real estate	49.0%	48.9%	0.8	AAA		0.1	7.5

Total	17.9%	26.9%	\$ 21.3	AA	\$ (99.8)	\$ 60.8

In general, the Company structures credit derivative transactions such that the method for making loss payments is similar to that for financial guaranty policies and generally occurs as losses are realized on the underlying reference obligation. Nonetheless, credit derivative transactions are governed by ISDA documentation and operates differently from financial guaranty insurance policies. For example, the Company's control rights with respect to a reference obligation under a credit derivative may be more limited than when the Company issues a financial guaranty insurance policy. In addition, while the Company's exposure under credit derivatives, like the Company's exposure under financial guaranty insurance policies, have been generally for as long as the reference obligation remains outstanding, unlike financial guaranty policies, a credit derivative may be terminated for a breach of the ISDA documentation or other specific events. In some older credit derivative transactions, one such specified event is the failure of AGC to maintain specified financial strength ratings ranging from AA- to BBB-. If a credit derivative is terminated the Company could be required to make a mark-to-market payment as determined under the ISDA documentation. For example, if AGC's rating were downgraded to A+, under market conditions at September 30, 2008, if the counterparties exercised their right to terminate their credit derivatives, AGC would have been required make payments that, under the Company's mark-to-market methodology, was estimated to be approximately \$42 million. Further, if AGC's rating was downgraded to levels between BBB+ and BB+ it would have been required to make additional payments that, under the Company's mark-to-market methodology, was estimated to be approximately \$207 million at September 30, 2008. As of September 30, 2008 the Company had pre-IPO transactions with approximately \$1.3 billion of par subject to collateral posting due to changes in market value. In the event AGC were downgraded from AAA to Aa2, with respect to certain of its credit derivative contracts, the amount of par subject to collateral posting requirements would increase to \$1.5 billion from \$1.2 billion as a result of certain collateral posting thresholds being lowered. In the event AGC were downgraded below A-, the maximum amount of par subject to collateral posting requirements would be \$2.4 billion. However, at current fair market value amounts, AGC would not have to pledge additional collateral for the benefit of

its counterparties. In October and November 2008, the Company posted collateral totaling approximately \$68.5 million based on the unrealized mark-to-market loss position for transactions with two of its counterparties. Under current market conditions we do not anticipate a material increase in the amount posted. Currently no additional collateral posting is required or anticipated for any other transactions.

As of September 30, 2008 and December 31, 2007, the Company considered the impact of its own credit risk, in combination with credit spreads on risk that it assumes through CDS contracts, in determining the fair value of its credit derivatives. The Company determines its own credit risk based on quoted CDS prices traded on the Company at each balance sheet date. The quoted price of CDS contracts traded on the Company at September 30, 2008 and

Table of Contents

December 31, 2007 was 1,255 basis points and 180 basis points, respectively. Historically, the price of CDS traded on the Company generally moves directionally the same as general market spreads. Generally, a widening of the CDS prices traded on the Company has an effect of offsetting unrealized losses that result from widening general market credit spreads, while a narrowing of the CDS prices traded on the Company has an effect of offsetting unrealized gains that result from narrowing general market credit spreads. An overall narrowing of spreads generally results in an unrealized gain on credit derivatives for the Company and an overall widening of spreads generally results in an unrealized loss for the Company.

The following table summarizes the estimated change in fair values on the net balance of the Company's credit derivative positions assuming immediate parallel shifts in credit spreads at September 30, 2008:

(Dollars in millions)

Credit Spreads(1)	Estimated Net Fair Value (Pre-Tax)	Estimated Pre-Tax Change in Gain / (Loss)
September 30, 2008:		
100% widening in spreads	\$ (974.8)	\$ (705.4)
50% widening in spreads	(625.5)	(356.1)
25% widening in spreads	(449.0)	(179.6)
10% widening in spreads	(340.6)	(71.2)
Base Scenario	(269.4)	
10% narrowing in spreads	(213.2)	56.2
25% narrowing in spreads	(133.1)	136.3
50% narrowing in spreads	(4.8)	264.6

(1) Includes the effects of spreads on both the underlying asset classes and the Company's own credit spread.

5. Investments

The following table summarizes the Company's aggregate investment portfolio as of September 30, 2008:

	Amortized Cost	Gross Unrealized Gains (in thousands of U.S. dollars)	Gross Unrealized Losses	Estimated Fair Value
<i>Fixed maturity securities</i>				
U.S. government and agencies	\$ 433,179	\$ 16,841	\$ (1,915)	\$ 448,105

Total investments	\$ 3,079,827	\$ 69,009	\$ (8,944)	\$ 3,139,892

Approximately 31% and 28% of the Company's total investment portfolio as of September 30, 2008 and December 31, 2007, respectively, was composed of mortgage-backed securities, including collateralized mortgage obligations and commercial mortgage-backed securities. As of September 30, 2008 and December 31, 2007, respectively, approximately 66% and 55% of the Company's total mortgage-backed securities were government agency obligations. As of both September 30, 2008 and December 31, 2007, the weighted average credit quality of the Company's entire investment portfolio was AA+ and AAA, respectively. The Company's portfolio is comprised primarily of high-quality, liquid instruments. We continue to receive sufficient information to value our investments and have not had to modify our approach due to the current market conditions.

Under agreements with cedants and in accordance with statutory requirements, the Company maintains fixed maturity securities in trust accounts for the benefit of reinsured companies and for the protection of policyholders, generally in states where the Company or its subsidiaries, as applicable, are not licensed or accredited. The carrying value of such restricted balances as of September 30, 2008 and December 31, 2007 was \$1,019.0 million and \$936.0 million, respectively.

The Company has a formal review process for all securities in our investment portfolio, including a review for impairment losses. Factors considered when assessing impairment include:

- a decline in the market value of a security by 20% or more below amortized cost;
- a decline in the market value of a security for a continuous period of 12 months;
- recent credit downgrades of the applicable security or the issuer by rating agencies;
- the financial condition of the applicable issuer;
- whether scheduled interest payments are past due; and
- whether we have the ability and intent to hold the security for a sufficient period of time to allow for anticipated recoveries in fair value.

If the Company believes a decline in the value of a particular investment is temporary, it records the decline as an unrealized loss, net of tax, on the balance sheet in accumulated other comprehensive income in shareholders' equity. If the Company believes the decline is other than temporary, it writes down the carrying value of the investment and records a realized loss in the statement of operations. The Company's

Edgar Filing: ASSURED GUARANTY LTD - Form 10-Q

assessment of a decline in value includes management's current assessment of the factors noted above. If that assessment changes in the future, the Company may ultimately record a loss after having originally concluded that the decline in value was temporary.

A focus of management's assessment is the evaluation of securities that have been in an unrealized loss position for 12-months or more. Management considers the nature of the investment, the cause for the impairment (interest or credit related), the severity (both as a percentage of book value and absolute dollars) and duration of the impairment and any other available evidence, such as discussions with investment advisors, volatility of the securities fair value and recent news reports when performing its assessment.

As of September 30, 2008, the Company's gross unrealized loss position stood at \$157.0 million compared to \$50.5 million at June 30, 2008. The \$106.5 million increase in gross unrealized losses is primarily attributable to municipal securities, \$46.3 million, mortgage and asset-backed securities, \$37.7 million, and corporate securities, \$21.5 million. The increase in these unrealized losses during the three months ended September 30, 2008 is related to the overall illiquidity in the financial markets and resulted in a sudden and severe depressed demand for non-cash investments.

Table of Contents

As of September 30, 2008, the Company had 102 securities in an unrealized loss position for greater than 12 months, representing a gross unrealized loss of \$35.3 million. Of these securities, 51 securities had unrealized losses greater than 10% of book value. The total unrealized loss for these securities as of September 30, 2008 was \$26.9 million. The aggregate amount of unrealized loss for these 51 bonds over the past 12 months has varied between \$4.1 million and \$14.3 million, until September when the unrealized loss increased to \$26.9 million. This increase in unrealized losses during the quarter is attributable to the market illiquidity and volatility in the U.S. economy mentioned above and not specific to individual issuer credit. Except as noted below, the Company has recognized no other than temporary impairment losses and has the ability and intent to hold these securities until a recovery in value.

The Company recognized \$18.5 million of other than temporary impairment losses related to corporate securities for the three- and nine-month periods ended September 30, 2008. The Company continues to monitor the value of these investments. Future events may result in further impairment of the Company's investments. The Company had no write downs of investments for other than temporary impairment losses for the three- and nine-month periods ended September 30, 2007.

The following table summarizes the unrealized losses in our investment portfolio by type of security and the length of time such securities have been in a continuous unrealized loss position as of the dates indicated:

6. Significant Risk Management Activities

The Risk Oversight and Audit Committees of the Board of Directors oversees our risk management policies and procedures. Within the limits established by the board committees, specific risk policies and limits are set by the Portfolio Risk Management Committee, which includes members of senior management and senior Credit and Surveillance officers. As part of its risk management strategy, the Company may seek to obtain third party reinsurance or retrocessions and may also periodically enter into other arrangements to alleviate all or a portion of this risk.

Risk Management and Surveillance personnel are responsible for monitoring and reporting on all transactions in the insured portfolio, including exposures in both the Direct and Reinsurance segments. The primary objective of the surveillance process is to monitor trends and changes in transaction credit quality, detect any deterioration in credit quality, and take such remedial actions as may be necessary or appropriate. All

Edgar Filing: ASSURED GUARANTY LTD - Form 10-Q

transactions in the insured portfolio are risk rated, and surveillance personnel are responsible for adjusting those ratings to reflect changes in transaction credit quality. Surveillance personnel are also responsible for managing work-out and loss situations when necessary. For transactions where a loss is considered probable, surveillance personnel make recommendations on case loss reserves to a reserve committee. The reserve committee is made up of the Chief Executive Officer, Chief Financial Officer, Chief Surveillance Officer, General Counsel and Chief Accounting Officer. The reserve committee considers the recommendations of the surveillance personnel when reviewing reserve recommendations of our operating subsidiaries.

Direct Businesses

We conduct surveillance procedures to track risk aggregations and monitor performance of each risk. The review cycle and scope vary based upon transaction type and credit quality. In general, the review process includes the collection and analysis of information from various sources, including trustee and servicer reports, financial statements and reports, general industry or sector news and analyses, and rating agency reports. For Public Finance risks, the surveillance process includes monitoring general economic trends, developments with respect to state and municipal finances, and the financial situation of the issuers. For Structured Finance transactions, the surveillance process can include monitoring transaction performance data and cash flows, compliance with transaction terms and conditions, and evaluation of servicer or collateral manager performance and financial condition. Additionally, the Company uses various quantitative tools and models to assess transaction performance and identify situations where there may have been a change in credit quality. For all transactions, surveillance activities may include discussions with or site visits to issuers, servicers or other parties to a transaction.

Reinsurance Businesses

For transactions in the Company's Reinsurance segment, the primary insurers are responsible for conducting ongoing surveillance, and our surveillance personnel monitor the activities of the primary insurers through a variety of means, such as review of surveillance reports provided by the primary insurers, and meetings and discussions with their analysts. Our surveillance personnel take steps to ensure that the primary insurer is managing risk pursuant to the terms of the applicable reinsurance agreement. To this end, we conduct periodic reviews of ceding companies' surveillance activities and capabilities. That process may include the review of the primary insurer's underwriting, surveillance, and claim files for certain transactions. In the event of credit deterioration of a particular exposure, more frequent reviews of the ceding company's risk mitigation activities are conducted. Our surveillance personnel also monitor general news and information, industry trends, and rating agency reports to help focus surveillance activities on sectors or credits of particular concern. For certain exposures, we also will undertake an independent analysis and remodeling of the transaction.

Closely Monitored Credits

The Company's surveillance department is responsible for monitoring our portfolio of credits and maintains a list of closely monitored credits (CMC). The closely monitored credits are divided into four categories:

- Category 1 (low priority; fundamentally sound, greater than normal risk);
- Category 2 (medium priority; weakening credit profile, may result in loss);
- Category 3 (high priority; claim/default probable, case reserve established);
- Category 4 (claim paid, case reserve established for future payments).

The closely monitored credits include all below investment grade (BIG) exposures where there is a material amount of exposure (generally greater than \$10.0 million) or a material risk of the Company incurring a loss greater than \$0.5 million. The closely monitored credits also include investment grade (IG) risks where credit quality is deteriorating and where, in the view of the Company, there is significant potential that the risk quality will fall below investment grade. As of September 30, 2008, the closely monitored credits include approximately 99% of our

BIG

Table of Contents

exposure, and the remaining BIG exposure of \$43.5 million is distributed across 66 different credits. Other than those excluded BIG credits, credits that are not included in the closely monitored credit list are categorized as fundamentally sound risks.

The following table provides financial guaranty net par outstanding by credit monitoring category as of September 30, 2008 (dollars in millions):

	Category 1	Closely Monitored Credit Categories			Category 4	Total
	Category 2	Category 3				
Number of policies	50	48	93	4		195

Net reserves for loss and loss adjustment expenses	\$	\$	\$ 60.6	\$ 21.4	\$	82.0
Reinsurance recoverables						
	\$	\$	\$	\$	\$	

The Company's loss adjustment expenses for mitigating claim liabilities were \$0.3 million and \$0.6 million for the Third Quarter 2008 and Nine Months 2008, respectively.

In accordance with FAS 163, the above table includes financial guaranty contracts written in insurance form. It does not include financial guaranty contracts written in CDS form, mortgage guaranty insurance or the Company's other lines of insurance.

The Company insures various types of residential mortgage-backed securitizations (RMBS). Such transactions may include obligations backed by closed-end first mortgage loans and closed and open-end second mortgage loans or home equity loans on one-to-four family residential properties, including condominiums and cooperative apartments. A RMBS transaction where the underlying collateral is comprised of revolving home equity lines of credit is generally referred to as a HELOC transaction. In general, the collateral supporting HELOC securitizations are second lien loans made to prime borrowers. As of September 30, 2008, the Company had net par outstanding of \$1.9 billion related to HELOC securitizations, of which \$1.3 billion were written in the Company's financial guaranty direct segment. As of September 30, 2008, the Company had net par outstanding of \$1.7 billion for transactions with Countrywide, of which \$1.2 billion were written in the Company's financial guaranty direct segment (direct Countrywide transactions or Countrywide 2005-J and Countrywide 2007-D).

Edgar Filing: ASSURED GUARANTY LTD - Form 10-Q

The performance of the Company's HELOC exposures deteriorated during 2007 and the first nine months of 2008 and transactions, particularly those originated in the period from 2005 through 2007, continue to perform below the Company's original underwriting expectations. In accordance with its standard practice, during Third Quarter 2008 and Nine Months 2008, the Company evaluated the most currently available information, including trends in delinquencies, charge-offs on the underlying loans and draw rates on the lines of credit. The key assumptions used in our analysis of potential case loss reserves on the direct Countrywide transactions are presented in the following table:

Table of Contents**Key Variables**

Constant payment rate (CPR)	10%
Constant default rate (CDR)	6-month average CDR of approximately 18% during months 1-6, declining to 2.5% at the end of month 12. From months 13 onward, a 2.5% CDR is assumed.
Draw rate	2%
Excess spread	250 bps per annum
Repurchases of Ineligible loans by Countrywide	\$26.6 million; or approximately 1% of original pool balance of \$2.4 billion
Loss Severity	100%

In recent periods, performance patterns on these transactions have stabilized, with CDR, CPR, Draw Rates and delinquency percentages fluctuating within what we believe to be a relatively narrow band. Accordingly, the Company is using modeling assumptions that are based upon or which approximate actual historical performance to project future performance and potential losses. During the Third Quarter 2008, the Company extended the time frame during which it expects the CDR to decline to a stabilized 2.5% rate. This revision was based upon management's judgment that a variety of factors including the deterioration of U.S. economic conditions could lead to a longer period in which default rates remain high. The Company continues to model sensitivities around the results booked using a variety of CDR rates and stress periods as well as other modeling approaches including roll rates and hybrid roll rate/CDR methods.

As a result of this modeling and analysis, the Company incurred loss and loss adjustment expenses of \$52.3 million for its direct Countrywide transactions during Third Quarter 2008. The Company's cumulative incurred loss and loss adjustment expenses on the direct Countrywide transactions as of September 30, 2008 were \$94.5 million (\$75.1 million after-tax).

During Third Quarter 2008, certain of the Company's other HELOC transactions in the financial guaranty direct segment experienced increases in delinquencies and collateral losses. Incurred loss and loss adjustment expenses for these other HELOC transactions were \$5.5 million during the Third Quarter 2008. Additionally, during Third Quarter 2008, the Company incurred loss and loss adjustment expenses of \$17.8 million related to its assumed HELOC exposures in its financial guaranty reinsurance segment.

For Nine Months 2008, the Company incurred loss and loss adjustment expenses of \$133.9 million for its HELOC exposures. Of this amount, \$108.3 million related to the Company's financial guaranty direct segment, including \$94.5 million of incurred loss and loss adjustment expenses for the direct Countrywide transactions. The remaining \$25.6 million of incurred loss and loss adjustment expenses related to the Company's assumed HELOC exposures in its financial guaranty reinsurance segment.

The ultimate performance of the Company's HELOC transactions will depend on many factors, such as the level and timing of loan defaults, interest proceeds generated by the securitized loans, repayment speeds and changes in home prices, as well as the levels of credit support built into each transaction. Other factors also may have a material impact upon the ultimate performance of each transaction, including the ability of the seller and servicer to fulfill all of their contractual obligations including its obligation to fund future draws on lines of credit, as well as the amount of benefit received from repurchases of ineligible loans by Countrywide. The variables affecting transaction performance are interrelated, difficult to predict and subject to considerable volatility. As of September 30, 2008, the Company had total incurred loss and loss adjustment expenses of \$94.5 million for these two HELOC transactions. If actual results differ materially from any of the Company's assumptions, the losses incurred could be materially different from the Company's estimate. The Company continues to update its evaluation of these exposures as new information becomes available.

Edgar Filing: ASSURED GUARANTY LTD - Form 10-Q

Table of Contents

A summary of the Company's exposure to these two deals and their actual performance statistics through September 30, 2008 are as follows:

(\$ in millions)

	Countrywide 2005J	Countrywide 2007D
Original principal balance	\$ 1,500	\$ 900
Remaining principal balance	\$ 560.5	\$ 663.7

-
- (1) Cumulative collateral losses expressed as a percentage of the original deal balance.
 - (2) Total delinquencies (loans >30 days past due) as a percentage of the current deal balance.
 - (3) Fair Isaacs and Company score is a measurement designed to indicate the credit quality of a borrower
 - (4) Floating rate charged to borrowers above the prime rate.
 - (5) Time period (usually 5-10 years) in which the borrower may draw funds from their HELOC.
 - (6) Time period (usually 10-20years) in which the borrower must repay the funds withdrawn from the HELOC.
 - (7) Represents the three-month average draw rate as of September 2008.
 - (8) Represent the three-month average constant payment rate as of September 2008.
 - (9) Excess spread during September 2008.

Another type of RMBS transaction is generally referred to as "Subprime RMBS". The collateral supporting such transactions is comprised of first-lien residential mortgage loans made to subprime borrowers. A "subprime borrower" is one considered to be a higher risk credit based on credit scores or other risk characteristics. As of September 30, 2008, the Company had net par outstanding of \$6.7 billion related to Subprime RMBS securitizations. Of that amount, \$6.1 billion is from transactions issued in the period from 2005 through 2007 and written in the Company's financial guaranty direct segment. The majority of the Company's Subprime RMBS exposure is rated triple-A by all major rating agencies, and by the Company, at September 30, 2008. As of September 30, 2008, the Company had portfolio reserves of \$7.4 million and case reserves of \$5.0 million related to its \$6.7 billion U.S. Subprime RMBS exposure, of which \$6.0 million were portfolio reserves related to its \$6.1 billion exposure in the financial guaranty direct segment for transactions issued from 2005 through 2007.

Edgar Filing: ASSURED GUARANTY LTD - Form 10-Q

The problems affecting the subprime mortgage market have been widely reported, with rising delinquencies, defaults and foreclosures negatively impacting the performance of Subprime RMBS transactions. Those concerns relate primarily to Subprime RMBS issued in the period from 2005 through 2007. The \$6.1 billion exposure that the Company has to such transactions in its financial guaranty direct segment benefits from various structural protections, including credit enhancement that on average currently equals approximately 53.9% of the remaining principal balance of the transactions.

The Company also has exposure of \$450.8 million to Closed-End Second (CES) RMBS transactions, of which \$441.9 million is in the direct segment. As with other types of RMBS, the Company has seen significant deterioration in the performance of two of its CES transactions, which had exposure of \$195.0 million, during the nine months ended September 30, 2008. Specifically, during the Second Quarter 2008, one transaction in the financial guaranty direct segment experienced a significant increase in delinquencies and collateral losses, which resulted in erosion of the Company's credit enhancement. Based on the Company's analysis of the transaction and its projected losses, the Company had case reserves of \$14.4 million for this transaction as of September 30, 2008. Additionally, as of September 30, 2008, the Company had portfolio reserves of \$6.2 million in its financial guaranty direct segment and case and portfolio reserves of \$0.1 million and \$0.7 million, respectively, in its financial guaranty reinsurance segment related to its U.S. Closed-End Second RMBS exposure.

Another type of RMBS transaction is generally referred to as Alt-A RMBS. The collateral supporting such transactions is comprised of first-lien residential mortgage loans made to high-quality borrowers that lack certain

Table of Contents

ancillary characteristics that would make them prime. As of September 30, 2008, the Company had net par outstanding of \$7.8 billion related to Alt-A RMBS securitizations. Of that amount, \$7.7 billion is from transactions issued in the period from 2005 through 2007 and written in the Company's financial guaranty direct segment. As of September 30, 2008, the Company had portfolio reserves of \$3.6 million and case reserves of \$0.2 million related to its \$7.8 billion Alt-A RMBS exposure, in the financial guaranty direct and reinsurance segments, respectively.

The ultimate performance of the Company's Subprime RMBS and CES RMBS transactions remains highly uncertain and may be subject to considerable volatility due to the influence of many factors, including the level and timing of loan defaults, changes in housing prices and other variables. The Company will continue to monitor the performance of its Subprime RMBS and CES RMBS exposures and will adjust the risk ratings of those transactions based on actual performance and management's estimates of future performance.

The Company has exposure to two life insurance reserve securitization transactions based on blocks of individual life insurance business reinsured by Scottish Re (U.S.) Inc. ("Scottish Re"). The two transactions relate to Ballantyne Re p.l.c. ("Ballantyne") (gross exposure of \$500 million) and Orkney Re II, p.l.c. ("Orkney II") (gross exposure of \$423 million). Under both transactions, monies raised through the issuance of the insured notes support present and future U.S. statutory life insurance reserve requirements. The monies were invested at inception of each transaction in accounts managed by a large, well-known investment manager. However, those investment accounts have incurred substantial mark-to-market losses since mid-year 2007, largely as a result of their exposure to subprime and Alt-A RMBS transactions. Largely as a result of these mark-to-market losses the rating agencies Moody's, S&P and Fitch have downgraded our exposure to both Ballantyne and Orkney II below investment grade. The Company downgraded its internal risk ratings on these transactions to BB in Q1 2008 and placed them on our credit watch list (CMC list) in risk category 1 (CMC-1). We define transactions on CMC-1 as low priority cases where the risk is considered fundamentally sound and no loss is expected, but where higher than normal risk is present. The Company is working with the directing guarantor, who has insured exposure of \$900 million, to take remedial action on the Ballantyne transaction. The Company, as the directing financial guarantor, is taking remedial action on the Orkney II transaction. All investment proceeds in both Ballantyne and Orkney II are now required to be generally invested in cash or cash equivalents.

No credit losses have been realized and all of the securities in the Ballantyne and Orkney Re II portfolios continue to generate interest income. Performance of the underlying blocks of life insurance business thus far has been in accordance with expectations, and the underlying reinsurance contracts continue to generate overall positive treaty settlements that are captured in the transaction structures. The combination of cash flows from the investment accounts and the treaty settlements currently provides for greater than two times coverage of interest payments due on the notes that we insure. The notional value of the assets held in the investment accounts continues to increase via the retention of that excess cash.

In order for the Company to incur an ultimate net loss on the transactions, adverse experience on the underlying block of life insurance policies and/or credit losses in the investment portfolio would need to exceed the level of credit enhancement built into the transaction structures. The ability of the transactions to absorb such losses will continue to increase for as long as cash flows remain positive. However, further declines in the market value of the investment accounts could trigger a shut off of interest payments to the insured notes and thereby trigger claim payments by the Company. Any such claim payments ultimately could be recoverable, provided that credit losses on the investment accounts remain below the attachment point of our coverage. In addition, cedants to Scottish Re may have the right to recapture blocks of life insurance business which Scottish Re has ceded to Ballantyne and Orkney Re II. Such recaptures could require Ballantyne and Orkney Re II to sell assets and potentially realize substantial investment losses and for Assured to incur corresponding insured losses. At the present time, the Company does not expect the level of recaptures to cause insured losses.

The Company's current estimate of loss reserves represents management's best estimate of loss based on the current information, however, actual results may differ materially from current estimates.

Table of Contents**7. Analysis of premiums written, premiums earned and loss and loss adjustment expenses**

Direct, assumed, and ceded premium and loss and loss adjustment expense amounts for the First, Second and Third Quarters of 2008 and 2007 were as follows (2007 amounts have been reclassified as discussed in Note 2):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008	2007
	(in thousands of U.S. dollars)			
Premiums Written				
Direct	\$ 71,326	\$ 43,135	\$ 415,501	\$ 120,938
Assumed	41,489	25,352	118,892	74,473
Ceded	(1,328)	(8,069)	(12,545)	(15,138)
Net	\$ 111,487	\$ 60,418	\$ 521,848	\$ 180,273
Premiums Earned				
Direct	\$ 27,793	\$ 14,594	\$ 67,441	\$ 39,520
Assumed	59,769	26,076	122,686	79,878
Ceded	(2,046)	(2,062)	(6,093)	(5,756)
Net	\$ 85,516	\$ 38,608	\$ 184,034	\$ 113,642
Loss and Loss Adjustment Expenses (Recoveries)				
Direct	\$ 67,392	\$ 4,666	\$ 131,523	\$ 6,401
Assumed	13,453	(3,476)	42,319	(19,309)
Ceded	1,697	800	1,963	1,117
Net	\$ 82,542	\$ 1,990	\$ 175,805	\$ (11,791)

Total net written premiums for Third Quarter 2008 and Nine Months 2008 were \$111.5 million and \$521.8 million, respectively, compared with \$60.4 million and \$180.3 million for Third Quarter 2007 and Nine Months 2007, respectively.

Direct written premiums increased \$28.2 million in Third Quarter 2008 compared with Third Quarter 2007 primarily attributable to our U.S. public finance business, which generated \$52.1 million of direct written premium in Third Quarter 2008 compared with \$10.4 million during Third Quarter 2007. Partially offsetting this increase was a \$22.2 million decrease in international business premium. Direct written premiums increased \$294.6 million in Nine Months 2008 compared with Nine Months 2007 primarily due to a \$323.9 million increase in U.S. public finance business, as we continue to increase our market share. Partially offsetting this increase was a reduction of our international business to \$14.1 million in Nine Months 2008, compared with \$62.8 million for Nine Months 2007, as the prior year included a few large infrastructure transactions.

Assumed written premiums increased to \$41.5 million in Third Quarter 2008 compared with \$25.4 million in Third Quarter 2007 due primarily to a portfolio assumption from one of our cedants which generated \$48.3 million in written premium. This was offset by the commutation of business assumed from XL Financial Assurance Ltd. (XLFA), a subsidiary of Syncora Ltd. (formerly known as Security Capital Assurance Ltd.), which resulted in negative written premium of \$20.8 million in the Third Quarter 2008.

Edgar Filing: ASSURED GUARANTY LTD - Form 10-Q

Total net premiums earned for Third Quarter 2008 were \$85.5 million compared with \$38.6 million for Third Quarter 2007, while net premiums earned for Nine Months 2008 were \$184.0 million compared with \$113.6 million for Nine Months 2007.

Direct earned premiums increased \$13.2 million, to \$27.8 million for Third Quarter 2008 compared with \$14.6 million for Third Quarter 2007, reflecting the continued growth of our direct book of business. Direct earned premiums increased \$27.9 million, to \$67.4 million for Nine Months 2008 compared with \$39.5 million for Nine Months 2007 for the same reason as above. Additionally, our direct earned premiums for Nine Months 2007

Table of Contents

included \$2.8 million of public finance refundings. Third Quarter 2008 and Nine Months 2008 did not have any direct earned premiums from public finance refundings. Public finance refundings reflect the unscheduled pre-payment or refundings of underlying municipal bonds. Also contributing to the Company's increase in net premiums earned was the financial guaranty reinsurance segment, which increased \$35.8 million (\$7.6 million excluding refundings), compared to the same period last year. This increase was mainly due to the portfolio assumed from Ambac Assurance Corp. (Ambac) during December 2007, which generated \$7.4 million of net earned premium in Third Quarter 2008. Earned premium from refundings were \$31.7 million for Third Quarter 2008 compared with \$3.5 million for Third Quarter 2007. This increase is primarily a result of greater refundings of municipal auction rate and variable rate debt as reported by one of our ceding companies. Offsetting these increases was a decrease of \$1.7 million in net premiums earned in the mortgage segment due to run-off.

Assumed premiums earned increased \$42.8 million (\$19.7 million excluding refundings) in Nine Months 2008 compared with Nine Months 2007 primarily due to \$22.7 million generated from the portfolio assumed from Ambac, as mentioned above.

Total loss and loss adjustment expenses (LAE) (recoveries) were \$82.5 million and \$2.0 million for Third Quarter 2008 and Third Quarter 2007, respectively. Third Quarter 2008 included losses incurred of \$65.9 million in the financial guaranty direct segment, of which \$57.8 million related to the Company's direct HELOC exposures (refer to Note 6 for further detail). Additionally, loss and loss adjustment expenses in the financial guaranty reinsurance segment were \$15.5 million, and related predominantly to our assumed HELOC exposures. Direct loss and LAE for Third Quarter 2007 included \$1.5 million of portfolio reserve additions as a result of management updating its rating agency default statistics, based on data received in the quarter. Third Quarter 2007 also included portfolio reserve increases of \$3.1 million related to portfolio development in our financial guaranty direct segment.

Third Quarter 2007 assumed loss and LAE was \$(3.5) million principally due to a net portfolio reserve release associated with the establishment of a case reserve, based on information reported to us by the ceding company, for an aircraft-related structured finance transaction written prior to the IPO.

Total loss and LAE were \$175.8 million and \$(11.8) million for Nine Months 2008 and Nine Months 2007, respectively. Loss and LAE for Nine Months 2008 in the financial guaranty direct segment included losses incurred of \$23.7 million and \$109.7 million related to the Company's Closed-End Second and HELOC exposures, respectively. In the financial guaranty reinsurance segment, Nine Months 2008 included losses incurred of \$42.5 million mainly related to our U.S. RMBS and HELOC exposures. In addition to Third Quarter 2007 activity, discussed above, assumed loss and LAE for Nine Months 2007 included reserve releases related to aircraft-related transactions.

To limit its exposure on assumed risks, the Company entered into certain proportional and non-proportional retrocessional agreements with other insurance companies, primarily subsidiaries of ACE Limited (ACE), the Company's former parent, to cede a portion of the risk underwritten by the Company, prior to the IPO. In addition, the Company enters into reinsurance agreements with non-affiliated companies to limit its exposure to risk on an on-going basis.

Reinsurance recoverable on ceded losses and LAE as of September 30, 2008 and December 31, 2007 were \$6.1 million and \$8.8 million, respectively and are mainly related to the Company's other segment. In the event that any or all of the reinsurers are unable to meet their obligations, the Company would be liable for such defaulted amounts.

Edgar Filing: ASSURED GUARANTY LTD - Form 10-Q

Effective July 25, 2008, AG Re commuted its \$2.1 billion portfolio of business assumed from XLFA for a payment of \$18.0 million, which included returning \$14.6 million of unearned premium, net of ceding commissions, and loss reserves of \$5.2 million, resulting in a net gain to the Company of \$1.8 million.

Effective October 23, 2008, AGC entered into an agreement with CIFG Assurance North America, Inc. (CIFG) to assume a diversified portfolio of financial guaranty contracts totaling approximately \$13.3 billion of net par outstanding. Upon the closing of the transaction, which the Company anticipates occurring in the fourth quarter

Table of Contents

of 2008, AGC estimates it will receive approximately \$88.1 million of upfront premiums and approximately \$12.2 million of future installments related to this transaction.

8. Commitments and Contingencies

Litigation

Effective January 1, 2004, Assured Guaranty Mortgage Insurance Company (AGMIC) reinsured a private mortgage insurer (the Reinsured) under a Mortgage Insurance Stop Loss Excess of Loss Reinsurance Agreement (the Agreement). Under the Agreement, AGMIC agreed to cover the Reinsured's aggregate mortgage guaranty insurance losses in excess of a \$25 million retention and subject to a \$95 million limit. Coverage under the Agreement was triggered only when the Reinsured's: (1) combined loss ratio exceeded 100%; and (2) risk to capital ratio exceeded 25 to 1, according to insurance statutory accounting. In April 2008, AGMIC notified the Reinsured it was terminating the Agreement because of its breach of the terms of the Agreement. The Reinsured has notified AGMIC that it considers the Agreement to remain in effect and that the two coverage triggers under the Agreement apply as of April 1, 2008. By letter dated May 5, 2008, the Reinsured demanded arbitration against AGMIC seeking a declaration that the Agreement remains in effect and alleged compensatory and other damages. The arbitration hearing is scheduled to begin before a three person panel in December 2008.

AGMIC plans to vigorously defend its position that the termination of the Agreement was of immediate effect and that it has no liability under the Agreement.

It is the opinion of the Company's management, based upon the information available, that the expected outcome of litigation against the Company, individually or in the aggregate, will not have a material adverse effect on the Company's financial position or liquidity, although an adverse resolution of litigation against the Company could have a material adverse effect on the Company's results of operations in a particular quarter or fiscal year.

Real Estate Lease

In June 2008, the Company's subsidiary, Assured Guaranty Corp., entered into a new five-year lease agreement for New York office space. Future minimum annual payments of \$5.3 million for the first twelve month period and \$5.7 million for subsequent twelve month periods will commence October 1, 2008 and are subject to escalation in building operating costs and real estate taxes.

Reinsurance

Edgar Filing: ASSURED GUARANTY LTD - Form 10-Q

In the ordinary course of their respective businesses, certain of the Company's subsidiaries assert claims in legal proceedings against third parties to recover losses paid in prior periods. The amounts, if any, the Company will recover in these proceedings are uncertain, although recoveries in any one or more of these proceedings during any quarter or fiscal year could be material to the Company's results of operations in that particular quarter or fiscal year.

The Company is party to reinsurance agreements with most of the major monoline primary financial guaranty insurance companies. The Company's facultative and treaty agreements are generally subject to termination (i) upon written notice (ranging from 90 to 120 days) prior to the specified deadline for renewal, (ii) at the option of the primary insurer if the Company fails to maintain certain financial, regulatory and rating agency criteria which are equivalent to or more stringent than those the Company is otherwise required to maintain for its own compliance with state mandated insurance laws and to maintain a specified financial strength rating for the particular insurance subsidiary or (iii) upon certain changes of control of the Company. Upon termination under the conditions set forth in (ii) and (iii) above, the Company may be required (under some of its reinsurance agreements) to return to the primary insurer all statutory unearned premiums, less ceding commissions, attributable to reinsurance ceded pursuant to such agreements after which the Company would be released from liability with respect to the ceded business. Upon the occurrence of the conditions set forth in (ii) above, whether or not an agreement is terminated, the Company may be required to obtain a letter of credit or alternative form of security to collateralize its obligation to perform under such agreement or it may be obligated to increase the level of ceding

Table of Contents

commission paid. See Note 16 for further detail on the effect of a ratings downgrade on the Company's reinsurance agreements.

9. Long-Term Debt and Credit Facilities

The Company's unaudited interim consolidated financial statements include long-term debt used to fund the Company's insurance operations, and related interest expense, as described below.

Senior Notes

Assured Guaranty US Holdings Inc. (AGUS), a subsidiary of the Company, issued \$200.0 million of 7.0% Senior Notes due 2034 for net proceeds of \$197.3 million. The proceeds of the offering were used to repay substantially all of a \$200.0 million promissory note issued to a subsidiary of ACE in April 2004 as part of the IPO related formation transactions. The coupon on the Senior Notes is 7.0%, however, the effective rate is approximately 6.4%, taking into account the effect of a cash flow hedge executed by the Company in March 2004, the term of which matches that of the Senior Notes. The Company recorded interest expense of \$3.3 million, including \$0.2 million of amortized gain on the cash flow hedge, for both Third Quarter 2008 and Third Quarter 2007. The Company recorded interest expense of \$10.0 million, including \$0.5 million of amortized gain on the cash flow hedge, for both Nine Months 2008 and Nine Months 2007. These Senior Notes are fully and unconditionally guaranteed by Assured Guaranty Ltd.

Series A Enhanced Junior Subordinated Debentures

On December 20, 2006, AGUS issued \$150.0 million of Series A Enhanced Junior Subordinated Debentures (the Debentures) due 2066 for net proceeds of \$149.7 million. The proceeds of the offering were used to repurchase 5,692,599 of Assured Guaranty Ltd.'s common shares from ACE Bermuda Insurance Ltd., a subsidiary of ACE. The Debentures pay a fixed 6.40% rate of interest until December 15, 2016, and thereafter pay a floating rate of interest, reset quarterly, at a rate equal to 3 month LIBOR plus a margin equal to 2.38%. AGUS may elect at one or more times to defer payment of interest for one or more consecutive periods for up to ten years. Any unpaid interest bears interest at the then applicable rate. AGUS may not defer interest past the maturity date. The Company recorded interest expense of \$2.5 million for both Third Quarter 2008 and Third Quarter 2007 and \$7.4 million for both Nine Months 2008 and Nine Months 2007, respectively. These Debentures are guaranteed on a junior subordinated basis by Assured Guaranty Ltd.

Credit Facilities

2006 Credit Facility

Edgar Filing: ASSURED GUARANTY LTD - Form 10-Q

On November 6, 2006, Assured Guaranty Ltd. and certain of its subsidiaries entered into a \$300.0 million five-year unsecured revolving credit facility (the 2006 credit facility) with a syndicate of banks. Under the \$300.0 million credit facility, each of AGC, Assured Guaranty (UK) Ltd. (AG (UK)), AG Re, Assured Guaranty Re Overseas Ltd. (AGRO) and Assured Guaranty Ltd. are entitled to request the banks to make loans to such borrower or to request that letters of credit be issued for the account of such borrower.

Of the \$300.0 million available to be borrowed, no more than \$100.0 million may be borrowed by Assured Guaranty Ltd., AG Re or AGRO, individually or in the aggregate, and no more than \$20.0 million may be borrowed by AG (UK). The stated amount of all outstanding letters of credit and the amount of all unpaid drawings in respect of all letters of credit cannot, in the aggregate, exceed \$100.0 million.

The 2006 credit facility also provides that Assured Guaranty Ltd. may request that the commitment of the banks be increased an additional \$100.0 million up to a maximum aggregate amount of \$400.0 million. Any such incremental commitment increase is subject to certain conditions provided in the agreement and must be for at least \$25.0 million.

The proceeds of the loans and letters of credit are to be used for the working capital and other general corporate purposes of the borrowers and to support reinsurance transactions.

Table of Contents

At the closing of the 2006 credit facility, (i) AGC guaranteed the obligations of AG (UK) under such facility, (ii) Assured Guaranty Ltd. guaranteed the obligations of AG Re and AGRO under such facility and agreed that, if the Company Consolidated Assets (as defined in the related credit agreement) of AGC and its subsidiaries were to fall below \$1.2 billion, it would, within 15 days, guarantee the obligations of AGC and AG (UK) under such facility, (iii) Assured Guaranty Overseas US Holdings Inc., guaranteed the obligations of Assured Guaranty Ltd., AG Re and AGRO under such facility and (iv) Each of AG Re and AGRO guarantees the other as well as Assured Guaranty Ltd.

The 2006 credit facility's financial covenants require that Assured Guaranty Ltd. (a) maintain a minimum net worth of seventy-five percent (75%) of the Consolidated Net Worth of Assured Guaranty Ltd. as of the most recent fiscal quarter of Assured Guaranty Ltd. prior to November 6, 2006 and (b) maintain a maximum debt-to-capital ratio of 30%. In addition, the 2006 credit facility requires that AGC maintain qualified statutory capital of at least 75% of its statutory capital as of the fiscal quarter prior to November 6, 2006. Furthermore, the 2006 credit facility contains restrictions on Assured Guaranty Ltd. and its subsidiaries, including, among other things, in respect of their ability to incur debt, permit liens, become liable in respect of guaranties, make loans or investments, pay dividends or make distributions, dissolve or become party to a merger, consolidation or acquisition, dispose of assets or enter into affiliate transactions. Most of these restrictions are subject to certain minimum thresholds and exceptions. The 2006 credit facility has customary events of default, including (subject to certain materiality thresholds and grace periods) payment default, failure to comply with covenants, material inaccuracy of representation or warranty, bankruptcy or insolvency proceedings, change of control and cross-default to other debt agreements. A default by one borrower will give rise to a right of the lenders to terminate the facility and accelerate all amounts then outstanding. As of September 30, 2008 and December 31, 2007, Assured Guaranty was in compliance with all of those financial covenants.

As of September 30, 2008 and December 31, 2007, no amounts were outstanding under this facility nor have there been any borrowings under this facility.

The 2006 credit facility replaced a \$300.0 million three-year credit facility. Letters of credit totaling approximately \$2.9 million were outstanding as of September 30, 2008 related to the Real Estate Lease agreement discussed in Note 8. No letters of credit were outstanding as of December 31, 2007.

Non-Recourse Credit Facilities

AG Re Credit Facility

On July 31, 2007 AG Re entered into a non-recourse credit facility (AG Re Credit Facility) with a syndicate of banks which provides up to \$200.0 million to satisfy certain reinsurance agreements and obligations. The AG Re Credit Facility expires in July 2014.

The AG Re Credit Facility does not contain any financial covenants. The AG Re Credit Facility has customary events of default, including (subject to certain materiality thresholds and grace periods) payment default, failure to comply with covenants, material inaccuracy of representation or warranty, bankruptcy or insolvency proceedings, change of control and cross default to other debt agreements. If any such event of default were triggered, AG Re could be required to repay potential outstanding borrowings in an accelerated manner.

AG Re's obligations to make payments of principal and interest on loans under the AG Re Credit Facility, whether at maturity, upon acceleration or otherwise, are limited recourse obligations of AG Re and are payable solely from the collateral securing the AG Re Credit Facility, including recoveries with respect to certain insured obligations in a designated portfolio, premiums with respect to defaulted insured obligations in that portfolio, certain designated reserves and other designated collateral.

As of September 30, 2008 and December 31, 2007, no amounts were outstanding under this facility nor have there been any borrowings under the life of this facility.

Table of Contents

Committed Capital Securities

On April 8, 2005, AGC entered into four separate agreements with four different unaffiliated custodial trusts pursuant to which AGC may, at its option, cause each of the custodial trusts to purchase up to \$50.0 million of perpetual preferred stock of AGC. The custodial trusts were created as a vehicle for providing capital support to AGC by allowing AGC to obtain immediate access to new capital at its sole discretion at any time through the exercise of the put option. If the put options were exercised, AGC would receive \$200.0 million in return for the issuance of its own perpetual preferred stock, the proceeds of which may be used for any purpose including the payment of claims. The put options were not exercised during 2008 or 2007. Initially, all of committed capital securities of the custodial trusts (the "CCS Securities") were issued to a special purpose pass-through trust (the "Pass-Through Trust"). The Pass-Through Trust was dissolved in April 2008 and the committed capital securities were distributed to the holders of the Pass-Through Trust's securities. Neither the Pass-Through Trust nor the Custodial Trusts are consolidated in Assured Guaranty Ltd.'s financial statements.

Income distributions on the Pass-Through Trust Securities and CCS Securities were equal to an annualized rate of One-Month LIBOR plus 110 basis points for all periods ending on or prior to April 8, 2008. Following dissolution of the Pass-Through Trust, distributions on the CCS Securities are determined pursuant to an auction process. On April 7, 2008 this auction process failed, thereby increasing the annualized rate on the CCS Securities to One-Month LIBOR plus 250 basis points. Distributions on the AGC Preferred Stock will be determined pursuant to the same process or, if the Company so elects upon the dissolution of the Custodial Trusts at a fixed rate equal to One-Month LIBOR plus 250 basis points (based on the then current 30-year swap rate).

During Third Quarter 2008 and Third Quarter 2007, AGC incurred \$1.5 million and \$0.6 million, respectively, of put option premiums which are an on-going expense. During Nine Months 2008 and Nine Months 2007, AGC incurred \$4.0 million and \$1.9 million, respectively, of put option premiums which are an on-going expense. The increase in Third Quarter 2008 and Nine Months 2008 compared to the respective periods in 2007 was due to the increase in annualized rates from One-Month LIBOR plus 110 basis points to One-Month LIBOR plus 250 basis points as a result of the failed auction process in April 2008. These expenses are presented in the Company's unaudited interim consolidated statements of operations and comprehensive income under other expense.

The CCS securities have a fair value of \$32.6 million and \$8.3 million as of September 30, 2008 and December 31, 2007, respectively, and a change in fair value during Third Quarter 2008 and Nine Months 2008 of \$6.9 million and \$24.3 million, respectively. The change in fair value is recorded in the unaudited interim consolidated statements of operations and comprehensive income in other income. The change in fair value of CCS securities was \$0 during both Third Quarter 2007 and Nine Months 2007, as the fair value was \$0 at September 30, 2007, June 30, 2007 and December 31, 2006.

10. Employee benefit Plans

Share-Based Compensation

Edgar Filing: ASSURED GUARANTY LTD - Form 10-Q

Share-based compensation expense in Third Quarter 2008 and Third Quarter 2007 was \$1.8 million (\$1.4 million after tax) and \$4.3 million (\$3.6 million after tax), respectively. Share-based compensation expense in Nine Months 2008 and Nine Months 2007 was \$10.2 million (\$8.3 million after tax) and \$13.8 million (\$11.4 million after tax), respectively. The effect of share-based compensation on both basic and diluted earnings per share for Third Quarter 2008 was \$0.02. The effect on basic and diluted earnings per share for Nine Months 2008 was \$0.10 and \$0.09, respectively. The effect of share-based compensation on basic and diluted earnings per share for Third Quarter 2007 and Nine Months 2007 was \$0.05 and \$0.17, respectively. Third Quarter 2008 and Nine Months 2008 expense included \$(0.2) million (\$(0.2) million after tax) and \$3.5 million (\$3.1 million after tax), respectively, related to accelerated vesting for stock award grants to retirement-eligible employees. Third Quarter 2007 and Nine Months 2007 expense included \$1.2 million (\$1.1 million after tax) and \$4.9 million (\$4.3 million after tax), respectively, related to accelerated vesting for stock award grants to retirement-eligible employees.

Beginning February 2008, the Company granted restricted stock units to employees with the vesting terms similar to those of the restricted common shares. During Third Quarter 2008 and Nine Months 2008, the Company

Table of Contents

recognized \$0.2 million (\$0.1 million after tax) and \$2.3 million (\$2.0 million after tax), respectively, of expense for restricted stock units to employees.

Performance Retention Plan

The Company recognized approximately \$(0.3) million (\$(0.3) million after tax) and \$39,000 (\$27,000 after tax) of expense for performance retention awards in Third Quarter 2008 and Third Quarter 2007, respectively. The Company recognized approximately \$6.0 million (\$4.9 million after tax) and \$0.1 million (\$0.1 million after tax) of expense for performance retention awards in Nine Months 2008 and Nine Months 2007, respectively. Included in Third Quarter 2008 and Nine Months 2008 amounts were \$(0.7) million and \$3.9 million, respectively, of accelerated expense related to retirement-eligible employees. The negative expense amounts for Third Quarter 2008 were due to revised estimates of the Company's performance measures for 2008. The Company's Third Quarter 2007 and Nine Months 2007 compensation expense included performance retention awards that were made in 2007 and vest over a four year period.

11. (Loss) Earnings Per Share

Basic earnings per share is calculated by dividing net income by the weighted-average number of common shares outstanding during the period. Diluted earnings per share adjusts basic earnings per share for the effects of restricted stock, stock options and other potentially dilutive financial instruments, only in the periods in which such effect is dilutive.

The following table sets forth the computation of basic and diluted (loss) earnings per share:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008	2007
	(in thousands of U.S. dollars, except per share amounts)			
Net (loss) income as reported	\$ (63,340)	\$ (114,958)	\$ 312,667	\$ (43,202)
Basic shares	90,930	67,773	86,977	67,718
Effect of dilutive securities:				
Stock options and restricted stock awards			1,086	
Diluted shares	90,930	67,773	88,063	67,718
Basic EPS	\$ (0.70)	\$ (1.70)	\$ 3.59	\$ (0.64)
Diluted EPS	\$ (0.70)	\$ (1.70)	\$ 3.55	\$ (0.64)

Potentially dilutive securities representing approximately 5.4 million and 5.1 million shares of common stock for the quarters ended September 30, 2008 and September 30, 2007, respectively, and 2.4 million and 5.0 million shares of common stock for the nine months ended September 30, 2008 and September 30, 2007, respectively, were excluded from the computation of diluted earnings per share for these periods because their effect would have been antidilutive.

12. Income Taxes

Liability For Tax Basis Step-Up Adjustment

In connection with the IPO, the Company and ACE Financial Services Inc. (" AFS "), a subsidiary of ACE, entered into a tax allocation agreement, whereby the Company and AFS made a Section 338 (h)(10) election that has the effect of increasing the tax basis of certain affected subsidiaries tangible and intangible assets to fair value. Future tax benefits that the Company derives from the election will be payable to AFS when realized by the Company.

As a result of the election, the Company has adjusted its net deferred tax liability to reflect the new tax basis of the Company's affected assets. The additional basis is expected to result in increased future income tax

Table of Contents

deductions and, accordingly, may reduce income taxes otherwise payable by the Company. Any tax benefit realized by the Company will be paid to AFS. Such tax benefits will generally be calculated by comparing the Company's affected subsidiaries' actual taxes to the taxes that would have been owed by those subsidiaries had the increase in basis not occurred. After a 15 year period, to the extent there remains an unrealized tax benefit, the Company and AFS will negotiate a settlement of the unrealized benefit based on the expected realization at that time.

The Company initially recorded a \$49.0 million reduction of its existing deferred tax liability, based on an estimate of the ultimate resolution of the Section 338(h)(10) election. Under the tax allocation agreement, the Company estimated that, as of the IPO date, it was obligated to pay \$20.9 million to AFS and accordingly established this amount as a liability. The initial difference, which is attributable to the change in the tax basis of certain liabilities for which there is no associated step-up in the tax basis of its assets and no amounts due to AFS, resulted in an increase to additional paid-in capital of \$28.1 million. As of September 30, 2008 and December 31, 2007, the liability for tax basis step-up adjustment, which is included in the Company's balance sheets in "Other liabilities," were \$9.3 million and \$9.9 million, respectively. The Company has paid ACE and correspondingly reduced its liability by \$0.6 million and \$4.9 million in Nine Months 2008 and Nine Months 2007, respectively.

FIN 48 Liability

The Company adopted the provisions of FASB Interpretation No. 48, "Accounting for Uncertainty in Income Taxes-an interpretation of FASB Statement No. 109" (FIN 48), on January 1, 2007. The total liability for unrecognized tax benefits as of September 30, 2008 and December 31, 2007 was \$5.1 million and \$2.8 million, respectively, and is included in other liabilities on the balance sheet. During the nine months ended September 30, 2008 the net liability of \$2.8 million as of December 31, 2007 increased by approximately \$2.3 million. The Company does not believe it is reasonably possible that this amount will change significantly in the next twelve months. The Company's policy is to recognize interest and penalties related to uncertain tax positions in income tax expense.

Tax Treatment of CDS

The Company treats the guaranty it provides on CDS as insurance contracts for tax purposes and as such a taxable loss does not occur until the Company expects to make a loss payment to the buyer of credit protection based upon the occurrence of one or more specified credit events with respect to the contractually referenced obligation or entity. The Company holds its CDS to maturity, at which time any unrealized mark to market loss would revert to zero absent any credit related losses. As of September 30, 2008, the Company did not anticipate any significant credit related losses on its credit default swaps and, therefore, no resultant tax deductions.

The tax treatment of CDS is an unsettled area of the law. The uncertainty relates to the IRS's determination of the income or potential loss associated with CDS as either subject to capital gain (loss) or ordinary income (loss) treatment. In treating CDS as insurance contracts the Company treats both the receipt of premium and payment of losses as ordinary income and believes it is more likely than not that any CDS credit related losses will be treated as ordinary by the IRS. To the extent the IRS takes the view that the losses are capital losses in the future and the Company incurred actual losses associated with the CDS the Company would need sufficient taxable income of the same character within the carryback and carryforward period available under the tax law.

As of September 30, 2008 and December 31, 2007 the deferred tax assets associated with CDS were \$59.1 million and \$168.9 million, respectively. The Company came to the conclusion that it is more likely than not that its deferred tax asset related to CDS will be fully realized

Edgar Filing: ASSURED GUARANTY LTD - Form 10-Q

after weighing all positive and negative evidence available as required under FAS 109. The evidence that was considered included the following:

Negative Evidence

- Although the Company believes that income or losses for these credit default swaps are properly characterized for tax purposes as ordinary, the federal tax treatment is an unsettled area of tax law as described above.
- Changes in the fair value of CDS have resulted in significant swings in the Company's net income in recent periods. Changes in the fair value of CDS in future periods could result in the U.S. consolidated tax group having a pre-tax loss under GAAP. Although not recognized for tax, this loss could result in a cumulative three year pre-tax loss, which is considered significant negative evidence for the recoverability of a deferred tax asset under FAS 109.

Table of Contents

Positive Evidence

- For the nine months and three year period ended September 30, 2008 the US consolidated tax group had a pre-tax gain under GAAP of \$363.0 million and \$110.6 million, respectively.
- The mark to market loss on CDS is not considered a tax event, and therefore no taxable loss has occurred.
- The Company is in a cumulative net gain position related to the taxable activity on CDS contracts.
- The Company has no significant anticipated loss payments under its existing CDS contracts.
- After analysis of the current tax law on CDS the Company believes it is more likely than not that the CDS will be treated as ordinary income or loss for tax purposes.
- Assuming a hypothetical loss were triggered for the amount of deferred tax asset (DTA), there would be enough taxable income through carryback and future income to offset it as follows:
 - The amortization of the tax-basis unearned premium reserve of \$483.7 million as of September 30, 2008 as well as the collection of future installment premiums of contracts already written we believe will result in significant taxable income in the future.
 - The Company has the ability to carryback losses two years which would offset over \$53.5 million of losses as of September 30, 2008.
 - Although the Company has a significant tax exempt portfolio, this can be converted to taxable securities as permitted as a tax planning strategy under FAS 109.
 - The mark-to-market loss is reflective of market valuations and will change from quarter to quarter. It is not indicative of the Company's ability to enter new business. The Company writes and continues to write new business which will increase the amortization of unearned premium and investment portfolio resulting in expected taxable income in future periods.

After examining all of the available positive and negative evidence, the Company believes that no valuation allowance is necessary in connection with the deferred tax asset. The Company will continue to analyze the need for a valuation allowance on a quarter to quarter basis.

13. Segment Reporting

Edgar Filing: ASSURED GUARANTY LTD - Form 10-Q

The Company has four principal business segments: (1) financial guaranty direct, which includes transactions whereby the Company provides an unconditional and irrevocable guaranty that indemnifies the holder of a financial obligation against non-payment of principal and interest when due, and could take the form of a credit derivative; (2) financial guaranty reinsurance, which includes agreements whereby the Company is a reinsurer and agrees to indemnify a primary insurance company against part or all of the loss which the latter may sustain under a policy it has issued; (3) mortgage guaranty, which includes mortgage guaranty insurance and reinsurance whereby the Company provides protection against the default of borrowers on mortgage loans; and (4) other, which includes lines of business in which the Company is no longer active.

The Company does not segregate assets and liabilities at a segment level since management reviews and controls these assets and liabilities on a consolidated basis. The Company allocates operating expenses to each segment based on a comprehensive cost study which is based on departmental time estimates and headcount.

Management uses underwriting gains and losses as the primary measure of each segment's financial performance. Underwriting gain is calculated as net earned premiums plus realized gains and other settlements on credit derivatives, less the sum of loss and loss adjustment expenses (recoveries) including incurred losses on credit derivatives, profit commission expense, acquisition costs and other operating expenses that are directly related to the operations of the Company's insurance businesses. This measure excludes certain revenue and expense items, such as net investment income, realized investment gains and losses, incurred losses on credit derivatives, other income, and interest and other expenses, that are not directly related to the underwriting performance of the Company's insurance operations, but are included in net income.

Edgar Filing: ASSURED GUARANTY LTD - Form 10-Q

Table of Contents

The following tables summarize the components of underwriting gain (loss) for each reporting segment:

	Three Months Ended September 30, 2008				
	Financial	Financial	Mortgage	Other	Total
	Guaranty	Guaranty	Guaranty		
	Direct	Reinsurance	(in millions of U.S. dollars)

Table of Contents

The following table provides the lines of businesses from which each of the Company's segments derive their net earned premiums:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008	2007
	(in millions of U.S. dollars)			
Financial guaranty direct:				
Public finance	\$ 11.2	\$ 3.8	\$ 22.5	\$ 9.9
Structured finance	15.7	10.2	42.5	28.2
Total	26.9	14.1	65.0	38.1
Financial guaranty reinsurance:				
Public finance	47.6	15.4	83.7	48.3
Structured finance	9.8	6.2	31.1	18.9
Total	57.4	21.6	114.8	67.2
Mortgage guaranty:				
Mortgage guaranty	1.2	2.9	4.4	8.3
Total net earned premiums	\$ 85.5	\$ 38.6	\$ 184.0	\$ 113.6
Net credit derivative premiums received and receivable	\$ 30.5	\$ 17.6	\$ 89.8	\$ 50.7
Total net earned premiums and credit derivative premiums received and receivable	\$ 116.0	\$ 56.2	\$ 273.8	\$ 164.3

The other segment had an underwriting gain of \$1.9 million for Nine Months 2008, consisting of \$0.4 million net credit derivative loss recoveries and \$1.5 million recoveries. The other segment had an underwriting gain of \$1.3 million for Nine Months 2007 as net credit derivative loss recoveries were recorded in the prior year. The other segment did not record an underwriting gain (loss) during Third Quarter 2008 and Third Quarter 2007.

14. Fair Value of Financial Instruments

Background

Effective January 1, 2008, the Company adopted FAS No. 157, Fair Value Measurements (FAS 157). FAS 157 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. FAS 157 applies to other accounting pronouncements that require or permit fair value measurements, but does not require any new fair value measurements.

FAS 157 defines fair value as the price that would be received to sell an asset or paid to transfer a liability (an exit price) in an orderly transaction between market participants on the measurement date. The price shall represent that available in the principal market for the asset or liability. If there is no principal market, then the price is based on the market that maximizes the value received for an asset or minimizes the amount paid for a liability (i.e. the most advantageous market).

FAS 157 specifies a fair value hierarchy based on whether the inputs to valuation techniques used to measure fair value are observable or unobservable. Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect Company estimates of market assumptions. In accordance with FAS 157, the fair value hierarchy prioritizes model inputs into three broad levels as follows:

- Level 1 Quoted prices for identical instruments in active markets.

Table of Contents

- **Level 2** Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and observable inputs other than quoted prices, such as interest rates or yield curves and other inputs derived from or corroborated by observable market inputs.
- **Level 3** Model derived valuations in which one or more significant inputs or significant value drivers are unobservable. This hierarchy requires the use of observable market data when available.

An asset or liability's categorization within the fair value hierarchy is based on the lowest level of significant input to its valuation.

Application of FAS 157 is prospective, with limited exceptions. These exceptions do not apply to the Company. As such, the adoption of FAS 157 is prospective.

Effect on the Company's financial statements

FAS 157 applies to both amounts recorded in the Company's financial statements and to disclosures. Amounts recorded at fair value in the Company's financial statements are fixed maturity securities available for sale, short-term investments, credit derivative assets and liabilities relating to the Company's CDS contracts and CCS Securities. The fair value of these items as of September 30, 2008 is summarized in the following table.

(Dollars in millions)	Fair Value	Fair Value Measurements Using		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets				
Fixed maturity securities	\$ 3,160.6	\$	\$ 3,160.6	\$
Short-term investments	370.1	46.3	323.8	
Credit derivative assets	180.0			180.0
CCS Securities	32.6		32.6	
Total assets	\$ 3,743.3	\$ 46.3	\$ 3,517.0	\$ 180.0
Liabilities				
Credit derivative liabilities	\$ 465.9	\$	\$	\$ 465.9

Fixed Maturity Securities and Short-term Investments

The fair value of fixed maturity securities and short-term investments is determined using one of three different pricing services: pricing vendors, index providers or broker-dealer quotations. Pricing services for each sector of the market are determined based upon the provider's expertise.

Typical inputs used by these three pricing methods include, but are not limited to, reported trades, benchmark yields, issuer spreads, bids, offers, and/or estimated cash flows and prepayments speeds. Based on the typical trading volumes and the lack of quoted market prices for fixed maturities, third party pricing services will normally derive the security prices through recent reported trades for identical or similar securities making adjustments through the reporting date based upon available market observable information as outlined above. If there are no recent reported trades, the third party pricing services and brokers may use matrix or model processes to develop a security price where future cash flow expectations are developed based upon collateral performance and discounted at an estimated market rate. Included in the pricing of asset backed securities are estimates of the rate of future prepayments of principal over the remaining life of the securities. Such estimates are derived based on the characteristics of the underlying structure and prepayment speeds previously experienced at the interest rate levels projected for the underlying collateral. The Company does not make any internal adjustments to prices provided by its third party pricing service.

The Company has analyzed the third party pricing services' valuation methodologies and related inputs, and has also evaluated the various types of securities in its investment portfolio to determine an appropriate FAS 157 fair value hierarchy level based upon trading activity and observability of market inputs. Based on this evaluation, each price was classified as Level 1, 2 or 3. Prices provided by third party pricing services with market

Table of Contents

observable inputs are classified as Level 2. Prices on the money fund portion of short-term investments are classified as Level 1. No investments were classified as Level 3 as of September 30, 2008 or for the three- and nine-month periods then ended.

CCS Securities

The fair value of CCS Securities represents the present value of remaining expected put option premium payments under the CCS Securities agreements and the value of such estimated payments based upon the quoted price for such premium payments as of September 30, 2008 (see Note 9). The \$32.6 million fair value asset for CCS Securities is included in the consolidated balance sheet. Changes in fair value of this asset are included in other income in the consolidated statement of operations and comprehensive income. The significant market inputs used are observable, therefore, the Company classified it as Level 2.

Level 3 Valuation Techniques

Financial instruments are considered Level 3 when their values are determined using pricing models, discounted cash flow methodologies or similar techniques and at least one significant model assumption or input is unobservable. Level 3 financial instruments also include those for which the determination of fair value requires significant management judgment or estimation. A brief description of the valuation techniques used for Level 3 assets and liabilities is provided below.

Credit Derivatives

The Company's credit derivatives consist of insured CDS contracts (see Note 4). As discussed in Note 4, the Company does not typically exit its credit derivative contracts, and there are no quoted prices for its instruments or for similar instruments. Observable inputs other than quoted market prices exist, however, these inputs reflect contracts that do not contain terms and conditions similar to the credit derivative contracts issued by the Company. Therefore, the valuation of credit derivative contracts requires the use of models that contain significant, unobservable inputs. Thus, we believe the credit derivative valuations are in Level 3 in the fair value hierarchy discussed above.

The fair value of the Company's credit derivative contracts represents the difference between the present value of remaining expected premiums the Company receives for the credit protection and the estimated present value of premiums that a comparable financial guarantor would hypothetically charge the Company for the same protection at the balance sheet date. The fair value of the Company's credit derivatives depends on a number of factors including notional amount of the contract, expected term, credit spreads, changes in interest rates, the credit ratings of referenced entities, the Company's own credit risk and remaining contractual cash flows. Contractual cash flows, which are included in the

Realized gains and other settlements on credit derivatives' fair value component of credit derivatives, are the most readily observable variables of the fair value of credit derivative contracts since they are based on contractual terms. These variables include (i) net premiums received and receivable on written credit derivative contracts, (ii) net premiums paid and payable on purchased contracts, (iii) losses paid and payable to credit derivative contract counterparties and (iv) losses recovered and recoverable on purchased contracts. The remaining key variables described above impact Unrealized gains (losses) on credit derivatives.

Edgar Filing: ASSURED GUARANTY LTD - Form 10-Q

Market conditions at September 30, 2008 were such that market prices of the Company's CDS contracts were not generally available. Where market prices were not available, the Company used a combination of observable market data and valuation models, using various market indexes, credit spreads, the Company's own credit risk, and estimated contractual payments to estimate the Unrealized gains (losses) on credit derivatives portion of the fair value of its credit derivatives. These models are primarily developed internally based on market conventions for similar transactions.

Management considers the non-standard terms of its credit derivative contracts in determining the fair value of these contracts. These terms differ from credit derivatives sold by companies outside the financial guaranty industry. The non-standard terms include the absence of collateral support agreements or immediate settlement provisions, relatively high attachment points and the fact that the Company does not exit derivatives it sells for credit protection purposes, except under specific circumstances such as exiting a line of business. Because of these terms and conditions, the fair value of the Company's credit derivatives may not reflect the same prices observed in an actively traded market of credit derivatives that do not contain terms and conditions similar to those observed in the financial guaranty market. These models and the related assumptions are

Table of Contents

continuously reevaluated by management and enhanced, as appropriate, based upon improvements in modeling techniques and availability of more timely market information.

Valuation models include the use of management estimates and current market information. Management is also required to make assumptions on how the fair value of credit derivative instruments is affected by current market conditions. Management considers factors such as current prices charged for similar agreements, performance of underlying assets, life of the instrument, and the extent of credit derivative exposure the Company ceded under reinsurance agreements, and the nature and extent of activity in the financial guaranty credit derivative marketplace. The assumptions that management uses to determine its fair value may change in the future due to market conditions. Due to the inherent uncertainties of the assumptions used in the valuation models to determine the fair value of these credit derivative products, actual experience may differ from the estimates reflected in the Company's consolidated financial statements, and the differences may be material.

Listed below are various inputs and assumptions that are key to the establishment of our fair value for CDS contracts.

Assumptions

The key assumptions of our internally developed model include:

- Gross spread is the difference between the yield of a security paid by an issuer on an insured versus uninsured basis or, in the case of an CDS transaction, the difference between the yield and an index such as LIBOR. Such pricing is well established by historical financial guarantee fees relative to capital market spreads as observed and executed in competitive markets, including in financial guarantee reinsurance and secondary market transactions.
- Gross spread on a financial guarantee written in CDS form gets allocated among 1) profit the originator, usually an investment bank, realizes for putting the deal together and funding the transaction, 2) premiums paid to us for our credit protection provided and 3) the cost of CDS protection purchased on us by the originator to hedge their counterparty credit risk exposure to the Company. The premium the Company receives is referred to as the net spread. The Company's own credit risk is factored into the determination of net spread based on the impact of changes in the quoted market price for credit protection bought on the Company, as reflected by quoted market prices on CDS sold on Assured Guaranty Corp. The cost to acquire CDS protection sold on AGC affects the amount of spread on CDS deals that the Company captures and, hence, their fair value. As the cost to acquire CDS protection sold on AGC increases, as the result of widening spreads on AGC, the amount of premium we capture on a deal generally decreases. As the cost to acquire CDS protection sold on AGC decreases the amount of premium we capture on a deal generally increases. In our model, the premium we capture is not permitted to go below the historic minimum rate charged by us to assume similar risks. This has the effect of mitigating the amount of unrealized gains that are recognized on certain CDS contracts.
- The Company determines the fair value of its CDS contracts by applying the net spread for the remaining duration of each contract to the notional value of its CDS contracts.

- Actual transactions are used to validate the model results and to explain the correlation between various market indices and indicative CDS market prices.

Inputs

The specific model inputs are listed below, including how we derive inputs for market credit spreads on the underlying transaction collateral.

- **Credit spreads on risks assumed** These are obtained from market data sources published by third parties (e.g. dealer spread tables for the collateral similar to assets within our transactions) as well as collateral-specific spreads provided by trustees or obtained from market sources. If observable market credit spreads are not available or reliable for the underlying reference obligations, then market indices are used that most closely resembles the underlying reference obligations, considering asset class, credit quality rating and maturity of the underlying reference obligations. As discussed previously, these indices are adjusted to reflect the non-standard terms of the Company's CDS contracts.
- **Credit spreads on the Company's name** The Company obtains the quoted price of CDS contracts traded on the Company from market data sources published by third parties.

The following spread hierarchy is utilized in determining which source of spread to use, with the rule being to use CDS spreads where available. If not available, the Company either interpolates or extrapolates CDS spreads based on similar transactions or market indices.

1. Actual collateral specific credit spreads (if up-to-date and reliable market-based spreads are available, they are used).
2. Credit spreads are interpolated based upon market indices or deals priced or closed during a specific quarter within a specific asset class and specific rating.

Table of Contents

3. Credit spreads provided by the counterparty of the credit default swap.
4. Credit spreads are extrapolated based upon transactions of similar asset classes, similar ratings, and similar time to maturity.

Over time the data inputs can change as new sources become available or existing sources are discontinued or are no longer considered to be the most appropriate. It is the Company's objective to move to higher levels on the hierarchy whenever possible, but it is sometimes necessary to move to lower priority inputs because of discontinued data sources or assessments that the higher priority inputs are no longer considered to be representative of market spreads for a given type of collateral. This can happen, for example, if transaction volume changes such that a previously used spread index is no longer viewed as being reflective of current market levels.

The Company's credit derivative valuation model, like any financial model, has certain strengths and weaknesses

The primary strengths of the Company's CDS modeling techniques are:

- The model takes account of transaction structure and the key drivers of market value. The transaction structure includes par insured, weighted average life, level of subordination and composition of collateral.
- The model maximizes the use of market-driven inputs whenever they are available. The key inputs to the model are market-based spreads for the collateral, and the credit rating of referenced entities. These are viewed by us to be the key parameters that affect fair value of the transaction.
- The Company is able to use actual transactions to validate its model results and to explain the correlation between various market indices and indicative CDS market prices.
- The model is a well-documented, consistent approach to valuing positions that minimizes subjectivity. The Company has developed a hierarchy for market-based spread inputs that helps mitigate the degree of subjectivity during periods of high illiquidity.

The primary weaknesses of the Company's CDS modeling techniques are:

- There is no exit market or actual exit transactions. Thus our exit market is a hypothetical one based on our entry market.
- There is a very limited market in which to verify the fair values developed by the Company's model.

- At September 30, 2008, the markets for the inputs to the model were highly illiquid, which impacts their reliability. However, the Company employs various procedures to corroborate the reasonableness of quotes received and calculated by our internal valuation model, including comparing to other quotes received on similarly structured transactions, observed spreads on structured products with comparable underlying assets and, on a selective basis when possible, through second independent quotes on the same reference obligation.
- Due to the non-standard terms under which the Company enters into derivative contracts, the fair value of its credit derivatives may not reflect the same prices observed in an actively traded market of credit derivatives that do not contain terms and conditions similar to those observed in the financial guaranty market.

The net par outstanding of the Company's credit derivative contracts was \$77.6 billion and \$71.6 billion at September 30, 2008 and December 31, 2007, respectively. The estimated remaining average life of these contracts at September 30, 2008 was 7.9 years.

As required by FAS 157, financial assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. As of September 30, 2008, these contracts are classified as Level 3 in the FAS 157 hierarchy since there is reliance on at least one unobservable input deemed significant to the valuation model, most significantly the Company's estimate of the value of the non-standard terms and conditions of its credit derivative contracts and of the Company's current credit standing.

The table below presents a reconciliation of the Company's credit derivatives whose fair value included significant unobservable inputs (Level 3) during the three and nine months ended September 30, 2008.

Table of Contents**Three Months Ended September 30, 2008**

		Fair Value Measurements Using Significant Unobservable Inputs (Level 3) Credit Derivative Liability (Asset), net
(Dollars in millions)		
Beginning Balance	\$	165,943
Total gains or losses realized and unrealized		
Unrealized losses on credit derivatives		116,247
Realized gains and other settlements on credit derivatives		(29,960)
Current period net effect of purchases, settlements and other activity included in unrealized portion of beginning balance		33,733
Transfers in and/or out of Level 3		
Ending Balance	\$	285,963
Gains and losses (realized and unrealized) included in earnings for the period are reported as follows:		
Total realized and unrealized losses included in earnings for the period	\$	(86,287)
Change in unrealized losses on credit derivatives still held at the reporting date	\$	(116,838)

Nine Months Ended September 30, 2008

		Fair Value Measurements Using Significant Unobservable Inputs (Level 3) Credit Derivative Liability (Asset), net
(Dollars in millions)		
Beginning Balance	\$	617,644
Total gains or losses realized and unrealized		
Unrealized gains on credit derivatives		(332,634)
Realized gains and other settlements on credit derivatives		(89,370)
Current period net effect of purchases, settlements and other activity included in unrealized portion of beginning balance		90,323
Transfers in and/or out of Level 3		
Ending Balance	\$	285,963
Gains and losses (realized and unrealized) included in earnings for the period are reported as follows:		
Total realized and unrealized gains included in earnings for the period	\$	422,004
Change in unrealized gains on credit derivatives still held at the reporting date	\$	325,729

Table of Contents**15. Subsidiary Information**

The following tables present the unaudited condensed consolidated financial information for Assured Guaranty Ltd., Assured Guaranty US Holdings Inc., of which AGC is a subsidiary and other subsidiaries of Assured Guaranty Ltd. as of September 30, 2008 and December 31, 2007 and for the three and nine months ended September 30, 2008 and 2007.

16. Rating Agency Actions

Edgar Filing: ASSURED GUARANTY LTD - Form 10-Q

On July 21, 2008, Moody's Investors Service placed under review for possible downgrade the Aaa insurance financial strength ratings of Assured Guaranty Corp. and its wholly owned subsidiary, Assured Guaranty (UK) Ltd., as well as the Aa2 insurance financial strength ratings of Assured Guaranty Re Ltd. (AG Re) and its affiliated insurance operating companies. Moody's has also placed under review for possible downgrade the Aa3 senior unsecured rating of AGC's parent company, Assured Guaranty US Holdings Inc. and the Aa3 issuer rating of the ultimate holding company, Assured Guaranty Ltd. The timing and outcome of the Moody's review are uncertain.

Table of Contents

We believe that our new business production has been adversely impacted since Moody's placed us under review. Furthermore, if the ratings of any of our insurance subsidiaries were reduced below current levels, we expect it would have an adverse effect on our subsidiary's competitive position and its prospects for future business opportunities. A downgrade may also reduce the value of the reinsurance we offer, which may no longer be of sufficient economic value for our customers to continue to cede to our subsidiaries at economically viable rates.

With respect to a significant portion of our in-force financial guaranty reinsurance business, in the event that AG Re were downgraded from Aa2 to A1, subject to the terms of each reinsurance agreement, the ceding company may have the right to recapture business ceded to AG Re and assets representing substantially all of the statutory unearned premium and loss reserves (if any) associated with that business. As of September 30, 2008, the statutory unearned premium, which represents deferred revenue to the Company, subject to recapture is approximately \$215 million. If this entire amount were recaptured, it would result in a corresponding one-time reduction to net income of approximately \$10 million. With respect to one of AG Re's ceding companies the right to recapture business can only be exercised if AG Re were downgraded to the A category by more than one rating agency, or below A2/A by any one rating agency. As of September 30, 2008, the statutory unearned premium subject to recapture by this ceding company is approximately \$400 million. If this entire amount were recaptured, it would result in a corresponding one-time reduction to net income of approximately \$50 million. Alternatively, the ceding company can increase the commissions it charges AG Re for cessions. Any such increase may be retroactive to the date of the cession. As of September 30, 2008, the potential increase in ceding commissions would result in a one-time reduction to net income of approximately \$44 million. The effect on net income under these scenarios is exclusive of any capital gains or losses that may be realized.

In the event AGC were downgraded from AAA to Aa2, with respect to certain of its credit derivative contracts, the amount of par subject to collateral posting requirements would increase to \$1.5 billion from \$1.2 billion as a result of certain collateral posting thresholds being lowered. In the event AGC were downgraded below A-, the maximum amount of par subject to collateral posting requirements would be \$2.4 billion. However, at current fair market value amounts, AGC would not have to pledge additional collateral for the benefit of its counterparties. As of the date of this filing AGC has posted collateral totaling approximately \$61.5 million based on the unrealized mark-to-market loss position for transactions with one of its counterparties. A downgrade to Aa2 would not allow AGC's counterparties to terminate their credit derivative agreements, and no payment of a settlement amount would be required. With respect to AGC's assumed reinsurance business, the effect of a downgrade to Aa2 would be immaterial.

The Company's financial strength ratings assigned by Standard & Poor's Rating Service, a division of McGraw-Hill Companies, Inc. (S&P) and Fitch, Inc. (Fitch) were affirmed on June 18, 2008 and December 12, 2007, respectively. Management is uncertain what, if any, impact Moody's review for possible downgrade will have on the Company's financial strength ratings from S&P and Fitch.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward-Looking Statements

This Form 10-Q contains information that includes or is based upon forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements give Assured Guaranty Ltd. (hereafter Assured Guaranty, we, our or the Company) expectations or forecasts of future events. You can identify these statements by the fact that they do not relate strictly to historical or current facts and relate to future operating or financial performance.

Any or all of Assured Guaranty's forward-looking statements herein may turn out to be wrong and are based on current expectations and the current economic environment. Assured Guaranty's actual results may vary materially. Among factors that could cause actual results to differ materially are: (1) downgrades of the financial strength ratings assigned by the major rating agencies to any of our insurance subsidiaries at any time, which has occurred in the past; (2) our inability to execute our business strategy; (3) reduction in the amount of reinsurance ceded by one or more of our principal ceding companies; (4) contract cancellations; (5) developments in the world's financial and capital markets that adversely affect our loss experience, the demand for our products, our unrealized (losses) gains on derivative financial instruments or our investment returns; (6) more severe or frequent losses associated with our insurance products, or changes in our assumptions used to estimate loss reserves and unrealized (losses) gains on credit derivative financial instruments; (7) changes in regulation or tax laws applicable to us, our subsidiaries or customers; (8) governmental action; (9) natural catastrophes; (10) dependence on customers; (11) decreased demand for our insurance or reinsurance products or increased competition in our markets; (12) loss of key personnel; (13) technological developments; (14) the effects of mergers, acquisitions and divestitures; (15) changes in accounting policies or practices; (16) changes in the credit markets, segments thereof or general economic conditions, including the overall level of activity in the economy or particular sectors, interest rates, credit spreads and other factors; (17) other risks and uncertainties that have not been identified at this time; and (18) management's response to these factors. Assured Guaranty is not obligated to publicly correct or update any forward-looking statement if we later become aware that it is not likely to be achieved, except as required by law. You are advised, however, to consult any further disclosures we make on related subjects in our periodic reports filed with the Securities and Exchange Commission.

Executive Summary

Assured Guaranty Ltd. is a Bermuda based holding company which provides, through its operating subsidiaries, credit enhancement products to the public finance, structured finance and mortgage markets. We apply our credit expertise, risk management skills and capital markets experience to develop insurance, reinsurance and credit derivative products that meet the credit enhancement needs of our customers. We market our products directly and through financial institutions. We serve the U.S. and international markets.

Our insurance company subsidiaries have been assigned the following insurance financial strength ratings:

	Moody's	S&P	Fitch
Assured Guaranty Corp.	Aaa(Exceptional)	AAA(Extremely Strong)	AAA(Extremely Strong)
Assured Guaranty Re Ltd.	Aa2(Excellent)	AA(Very Strong)	AA(Very Strong)

Edgar Filing: ASSURED GUARANTY LTD - Form 10-Q

Assured Guaranty Re Overseas Ltd.	Aa2(Excellent)	AA(Very Strong)	AA(Very Strong)
Assured Guaranty Mortgage Insurance Company.	Aa2(Excellent)	AA(Very Strong)	AA(Very Strong)
Assured Guaranty (UK) Ltd.	Aaa(Exceptional)	AAA(Extremely Strong)	AAA(Extremely Strong)

Aaa (Exceptional) is the highest ranking, which Assured Guaranty Corp. (AGC) and Assured Guaranty (UK) Ltd. achieved in July 2007, and Aa2 (Excellent) is the third highest ranking of 21 ratings categories used by Moody's Investors Service (Moody's). A AAA (Extremely Strong) rating is the highest ranking and AA (Very Strong) is the third highest ranking of the 21 ratings categories used by Standard & Poor's Inc. (S&P). AAA (Extremely Strong) is the highest ranking and AA (Very Strong) is the third highest ranking of the 24 ratings categories used by Fitch Ratings (Fitch). An insurance financial strength rating is an opinion with respect to an insurer's ability to pay under its insurance policies and contracts in accordance with their terms. The opinion is not specific to any particular policy or contract. Insurance financial strength ratings do not refer to an insurer's

Table of Contents

ability to meet non insurance obligations and are not a recommendation to purchase or discontinue any policy or contract issued by an insurer or to buy, hold, or sell any security issued by an insurer, including our common shares.

In July 2007, the Company's direct financial guaranty subsidiaries, AGC and Assured Guaranty (UK) Ltd., received a financial strength rating of Aaa (stable) from Moody's. The Company continues to be rated AAA (stable) by S&P and Fitch. The triple-A stable ratings for AGC from all three rating agencies has resulted in increased market share in the U.S. public finance market, and consequently an increase in gross written premiums.

On July 21, 2008, Moody's placed under review for possible downgrade the Aaa insurance financial strength ratings of Assured Guaranty Corp. and its wholly owned subsidiary, Assured Guaranty (UK) Ltd., as well as the Aa2 insurance financial strength ratings of Assured Guaranty Re Ltd. (AG Re) and its affiliated insurance operating companies. Moody's has also placed under review for possible downgrade the Aa3 senior unsecured rating of parent company, Assured Guaranty US Holdings Inc. and the Aa3 issuer rating of the ultimate holding company, Assured Guaranty Ltd. Moody's revised assessment of stress-case loss estimates on our residential mortgage-backed securities portfolio did not change meaningfully from their prior estimates. The timing and outcome of the Moody's review are uncertain.

We believe that our new business production has been adversely impacted since Moody's placed us under review. Furthermore, if the ratings of any of our insurance subsidiaries were reduced below current levels, we expect it would have an adverse effect on our subsidiary's competitive position and its prospects for future business opportunities. A downgrade may also reduce the value of the reinsurance we offer, which may no longer be of sufficient economic value for our customers to continue to cede to our subsidiaries at economically viable rates.

With respect to a significant portion of our in-force financial guaranty reinsurance business, in the event that AG Re were downgraded from Aa2 to A1, subject to the terms of each reinsurance agreement, the ceding company may have the right to recapture business ceded to AG Re and assets representing substantially all of the statutory unearned premium and loss reserves (if any) associated with that business. As of September 30, 2008, the statutory unearned premium, which represents deferred revenue to the Company, subject to recapture is approximately \$215 million. If this entire amount was recaptured, it would result in a corresponding one-time reduction to net income of approximately \$10 million. With respect to one of AG Re's ceding companies the right to recapture business can only be exercised if AG Re were downgraded to the A category by more than one rating agency, or below A2/A by any one rating agency. As of September 30, 2008, the statutory unearned premium subject to recapture by this ceding company is approximately \$400 million. If this entire amount were recaptured, it would result in a corresponding one-time reduction to net income of approximately \$50 million. Alternatively, the ceding company can increase the commissions it charges AG Re for cessions. Any such increase may be retroactive to the date of the cession. As of September 30, 2008, the potential increase in ceding commissions would result in a one-time reduction to net income of approximately \$44 million. The effect on net income under these scenarios is exclusive of any capital gains or losses that may be realized.

In the event AGC were downgraded from AAA to Aa2, with respect to certain of its credit derivative contracts, the amount of par subject to collateral posting requirements would increase to \$1.5 billion from \$1.2 billion as a result of certain collateral posting thresholds being lowered. In the event AGC were downgraded below A-, the maximum amount of par subject to collateral posting requirements would be \$2.4 billion. However, at current fair market value amounts, AGC would not have to pledge additional collateral for the benefit of its counterparties. As of the date of this filing AGC has posted collateral totaling approximately \$61.5 million based on the unrealized mark-to-market loss position for transactions with one of its counterparties. A downgrade to Aa2 would not allow AGC's counterparties to terminate their credit derivative agreements, and no payment of a settlement amount would be required. With respect to AGC's assumed reinsurance business, the effect of a downgrade to Aa2 would be immaterial.

Edgar Filing: ASSURED GUARANTY LTD - Form 10-Q

The Company's financial strength ratings assigned by S&P and Fitch were affirmed on June 18, 2008 and December 12, 2007, respectively. Management is uncertain what, if any, impact Moody's review for possible downgrade will have on the Company's financial strength ratings from S&P and Fitch.

On April 8, 2008, investment funds managed by WL Ross & Co. LLC ("WL Ross") purchased 10,651,896 shares of the Company's common equity at a price of \$23.47 per share, resulting in proceeds to the Company of \$250.0 million. The Company contributed \$150.0 million of these proceeds to its subsidiary, Assured Guaranty Re Ltd. In addition, the Company contributed \$100.0 million of these proceeds to its subsidiary, Assured Guaranty US Holdings Inc., which in turn contributed the same amount to its subsidiary, AGC. The commitment to purchase these shares was previously announced on February 29, 2008. In addition, Wilbur L. Ross, Jr., President and Chief

Table of Contents

Executive Officer of WL Ross, has been appointed to the Board of Directors of the Company to serve a term expiring at the Company's 2009 annual general meeting of shareholders. Mr. Ross's appointment became effective immediately following the Company's 2008 annual general meeting of shareholders, which was held on May 8, 2008. WL Ross has a remaining commitment through April 8, 2009 to purchase up to \$750.0 million of the Company's common equity, at the Company's option, subject to the terms and conditions of the investment agreement with the Company dated February 28, 2008. In accordance with the investment agreement, the Company may exercise this option in one or more drawdowns, subject to a minimum drawdown of \$50 million, provided that the purchase price per common share for the subsequent shares is not greater than 17.5% above, or less than 17.5% below, the price per common share for the initial shares. The purchase price per common share for such shares will be equal to 97% of the volume weighted average price of a common share on the NYSE for the 15 NYSE trading days prior to the applicable drawdown notice. As of September 30, 2008, and as of the date of this filing, the purchase price per common share is outside of this range and therefore the Company may not, at this time, exercise its option for WL Ross to purchase additional shares. Additionally, in accordance with the investment agreement, at this time the ratings of AGC and AG Re are not stable and therefore the Company may not exercise its option for WL Ross to purchase additional shares.

On September 16, 2008, the Company agreed to waive the standstill provisions of the investment agreement to permit investment funds managed by WL Ross (the "WL Ross Funds") to purchase up to 5,000,000 additional common shares of the Company in open market transactions from time to time. The timing and amount of any such purchases are in the sole discretion of WL Ross and they are not obligated to purchase any such shares. The additional shares purchased by the WL Ross Funds, if any, will be purchased from current shareholders and therefore will not result in an increase in shareholders' equity at the Company or its subsidiaries. If all 5,000,000 additional shares were purchased, the WL Ross Funds would beneficially own 17,166,396 shares or approximately 18.9% of the Company's outstanding common shares based on shares outstanding as of September 30, 2008. As of the date of this filing the Company has not been notified that WL Ross Funds purchased any additional shares of the Company.

On December 21, 2007, the Company completed the sale of 12,483,960 of its common shares at a price of \$25.50 per share. The net proceeds of the sale totaled approximately \$303.8 million. The Company has contributed the net proceeds of the offering to its reinsurance subsidiary, AG Re. AG Re has used the proceeds to provide capital support in the form of a reinsurance portfolio transaction with Ambac Assurance Corp. ("Ambac") for approximately \$29 billion of net par outstanding, as well as to support the growth of AGC, the Company's principal direct financial guaranty subsidiary, by providing reinsurance. AG Re is AGC's principal financial guaranty reinsurer.

We regularly evaluate potential acquisitions of other companies, lines of business and portfolios of risks and hold discussions with potential third parties regarding such transactions. As a general rule, we publicly announce such transactions only after a definitive agreement has been reached. Effective October 23, 2008, AGC entered into an agreement with CIFG Assurance North America, Inc. ("CIFG") to assume a diversified portfolio of financial guaranty contracts totaling approximately \$13.3 billion of net par outstanding. Upon closing of this transaction, which the Company anticipates occurring in the fourth quarter of 2008, AGC estimates it will receive approximately \$88.1 million of upfront premiums and approximately \$12.2 million of future installments related to this transaction.

The financial guaranty industry, along with many other financial institutions, continues to be threatened by deterioration of the credit performance of securities collateralized by U.S. residential mortgages. There is significant uncertainty surrounding general economic factors, including interest rates and housing prices, which may adversely affect our loss experience on these securities. The Company continues to monitor these exposures and update our loss estimates as new information is received. Additionally, scrutiny from state and federal regulatory agencies could result in changes that limit our business.

Edgar Filing: ASSURED GUARANTY LTD - Form 10-Q

Our financial results include four principal business segments: financial guaranty direct, financial guaranty reinsurance, mortgage guaranty and other. The other segment represents lines of business that we exited or sold as part of our 2004 initial public offering (IPO).

Table of Contents

We derive our revenues principally from premiums from our insurance and reinsurance businesses, unrealized gains and losses and realized gains and other settlements on credit derivatives, net investment income, and net realized gains and losses from our investment portfolio. Our premiums and realized gains and other settlement on credit derivatives are a function of the amount and type of contracts we write as well as prevailing market prices. We receive payments on an upfront basis when the policy is issued or the contract is executed and/or on an installment basis over the life of the applicable transaction.

Investment income is a function of invested assets and the yield that we earn on those assets. The investment yield is a function of market interest rates at the time of investment as well as the type, credit quality and maturity of our invested assets. In addition, we could realize capital losses on securities in our investment portfolio from other than temporary declines in market value as a result of changing market conditions, including changes in market interest rates, and changes in the credit quality of our invested assets.

Realized gains and other settlements on credit derivatives include credit derivative premiums received and receivable for credit protection the Company has sold under its credit default swaps (CDS), any contractual claim losses paid and payable related to insured credit events under these contracts, realized gains or losses related to their early termination and ceding commissions (expense) income. The Company generally holds credit derivative contracts to maturity. However, in certain circumstances such as for risk management purposes or as a result of a decision to exit a line of business, the Company may decide to terminate a derivative contract prior to maturity.

Unrealized gains (losses) on credit derivatives represent the adjustments for changes in fair value that are recorded in each reporting period under FAS 133. Changes in unrealized gains and losses on credit derivatives are reflected in the consolidated statements of operations and comprehensive income in unrealized gains (losses) on credit derivatives. Cumulative unrealized gains (losses), determined on a contract by contract basis, are reflected as either net assets or net liabilities in the Company's balance sheets. Unrealized gains and losses resulting from changes in the fair value of credit derivatives occur because of changes in interest rates, credit spreads, the credit ratings of the referenced entities, the Company's credit rating and other market factors. The unrealized gains (losses) on credit derivatives will reduce to zero as the exposure approaches its maturity date, unless there is a payment default on the exposure. Changes in the fair value of the Company's credit derivatives do not reflect actual claims or credit losses, and have no impact on the Company's claims paying resources, rating agency capital or regulatory capital positions.

In the three and nine months ended September 30, 2008 the Company also recorded a fair value gain of \$6.9 million and \$24.3 million, pre-tax, respectively, related to Assured Guaranty Corp.'s committed capital securities.

Our expenses consist primarily of losses and loss adjustment expenses (LAE), profit commission expense, acquisition costs, operating expenses, interest expense, put-option premium expense associated with our committed capital securities (the CCS Securities) and income taxes. Losses and LAE are a function of the amount and types of business we write. Losses and LAE are based upon estimates of the ultimate aggregate losses inherent in the portfolio. The risks we take have a low expected frequency of loss and are investment grade at the time we accept the risk. Profit commission expense represents payments made to ceding companies generally based on the profitability of the business reinsured by us. Acquisition costs are related to the production of new business. Certain acquisition costs that vary with and are directly attributable to the production of new business are deferred and recognized over the period in which the related premiums are earned. Operating expenses consist primarily of salaries and other employee related costs, including share based compensation, various outside service providers, rent and related costs and other expenses related to maintaining a holding company structure. These costs do not vary with the amount of premiums written. Interest expense is a function of outstanding debt and the contractual interest rate related to that debt. Put-option premium expense, which is included in other expenses on the Consolidated Statements of Operations and Comprehensive Income, is a function of the outstanding amount of the CCS Securities and the applicable distribution rate. Income taxes are a function of our profitability and the applicable tax rate in the various jurisdictions in which we do business.

Critical Accounting Estimates

Our unaudited interim consolidated financial statements include amounts that, either by their nature or due to requirements of accounting principles generally accepted in the United States of America (GAAP), are

Table of Contents

determined using estimates and assumptions. The actual amounts realized could ultimately be materially different from the amounts currently provided for in our unaudited interim consolidated financial statements. We believe the items requiring the most inherently subjective and complex estimates to be reserves for losses and LAE, valuation of credit derivative financial instruments, valuation of investments, other than temporary impairments of investments, premium revenue recognition, deferred acquisition costs, deferred income taxes and accounting for share based compensation. An understanding of our accounting policies for these items is of critical importance to understanding our unaudited interim consolidated financial statements. The following discussion provides more information regarding the estimates and assumptions used for these items and should be read in conjunction with the notes to our unaudited interim consolidated financial statements.

Reserves for Losses and Loss Adjustment Expenses

Reserves for losses and loss adjustment expenses for non-derivative transactions in our financial guaranty direct, financial guaranty assumed reinsurance and mortgage guaranty business include case reserves and portfolio reserves. See the Valuation of Derivative Financial Instruments of the Critical Accounting Estimates section for more information on our derivative transactions. Case reserves are established when there is significant credit deterioration on specific insured obligations and the obligations are in default or default is probable, not necessarily upon non-payment of principal or interest by an insured. Case reserves represent the present value of expected future loss payments and LAE, net of estimated recoveries, but before considering ceded reinsurance. This reserving method is different from case reserves established by traditional property and casualty insurance companies, which establish case reserves upon notification of a claim and establish incurred but not reported (IBNR) reserves for the difference between actuarially estimated ultimate losses and recorded case reserves. Financial guaranty insurance and assumed reinsurance case reserves and related salvage and subrogation, if any, are discounted at the taxable equivalent yield on our investment portfolio, which is approximately 6%, in all periods presented. When the Company becomes entitled to the underlying collateral of an insured credit under salvage and subrogation rights as a result of a claim payment, it records salvage and subrogation as an asset, based on the expected level of recovery. Such amounts have been recorded as salvage recoverable in the Company's balance sheet.

We record portfolio reserves in our financial guaranty direct, financial guaranty assumed reinsurance and mortgage guaranty business. Portfolio reserves are established with respect to the portion of our business for which case reserves have not been established.

Portfolio reserves are not established based on a specific event, rather they are calculated by aggregating the portfolio reserve calculated for each individual transaction. Individual transaction reserves are calculated on a quarterly basis by multiplying the par in-force by the product of the ultimate loss and earning factors without regard to discounting. The ultimate loss factor is defined as the frequency of loss multiplied by the severity of loss, where the frequency is defined as the probability of default for each individual issue. The earning factor is inception to date earned premium divided by the estimated ultimate written premium for each transaction. The probability of default is estimated from rating agency data and is based on the transaction's credit rating, industry sector and time until maturity. The severity is defined as the complement of recovery/salvage rates gathered by the rating agencies of defaulting issues and is based on the industry sector.

Portfolio reserves are recorded gross of reinsurance. We have not ceded any amounts under these reinsurance contracts, as our recorded portfolio reserves have not exceeded our contractual retentions, required by said contracts.

The Company records an incurred loss that is reflected in the statement of operations upon the establishment of portfolio reserves. When we initially record a case reserve, we reclassify the corresponding portfolio reserve already recorded for that credit within the balance sheet. The difference between the initially recorded case reserve and the reclassified portfolio reserve is recorded as a charge in our statement of operations. Any subsequent change in portfolio reserves or the initial case reserves are recorded quarterly as a charge or credit in our statement of operations in the period such estimates change. Due to the inherent uncertainties of estimating loss and LAE reserves, actual experience may differ from the

estimates reflected in our unaudited interim consolidated financial statements, and the differences may be material.

The weighted average default frequencies and severities as of September 30, 2008 and December 31, 2007 are as follows:

Table of Contents

	Average Default Frequency	Average Default Severity
September 30, 2008	0.85%	24.98%
December 31, 2007	0.58%	26.53%

The Company incorporates default frequency and severity by asset class into its portfolio loss reserve models. Average default frequency and severity are based on information published by rating agencies. The increase in average default frequency shown in 2008 is reflective of downgrades within the Company's direct insured portfolio, including HELOC exposures. Rating agencies update default frequency and severity information on a periodic basis, as warranted by changes in observable data.

The chart below demonstrates the portfolio reserve's sensitivity to frequency and severity assumptions. The change in these estimates represent management's estimate of reasonably possible material changes and are based upon our analysis of historical experience. Portfolio reserves were recalculated with changes made to the default and severity assumptions. In all scenarios, the starting point used to test the portfolio reserve's sensitivity to the changes in the frequency and severity assumptions was the weighted average frequency and severity by rating and asset class of our insured portfolio. Overall the weighted average default frequency was 0.85% and the weighted average severity was 24.98% at September 30, 2008. For example, in the first scenario where the frequency was increased by 5.0%, each transaction's contribution to the portfolio reserve was recalculated by adding 0.04% (i.e. 5.0% multiplied by 0.85%) to the individual transaction's default frequency.

(in thousands of U.S. dollars)	Portfolio Reserve	Reserve Increase	Percentage Change
Portfolio reserve(1) as of September 30, 2008	\$ 97,484	\$	
5% Frequency increase	101,948	4,464	4.58%
10% Frequency increase	106,487	9,003	9.24%
5% Severity increase	102,623	5,139	5.27%
10% Severity increase	107,809	10,325	10.59%
5% Frequency and severity increase	107,384	9,900	10.16%

(1) Includes portfolio reserve on credit derivatives of \$19.6 million, which balance is included in credit derivative liability in the Company's consolidated balance sheets.

In addition to analyzing the sensitivity of our portfolio reserves to possible changes in frequency and severity, we have also considered the effect of changes in assumptions on our financial guaranty and mortgage guaranty case reserves. At September 30, 2008 case reserves were \$82.6 million. Case reserves may change from our original estimate due to changes in assumptions including, but not limited to, severity factors, credit deterioration of underlying obligations and salvage estimates. As of September 30, 2008, we had net par outstanding of \$1.9 billion related to HELOC securitizations, of which \$1.7 billion are transactions with Countrywide and \$1.3 billion were written in the Company's financial guaranty direct segment (direct Countrywide transactions).

The performance of our HELOC exposures deteriorated during 2007 and the first nine months of 2008 and transactions, particularly those originated in the period from 2005 through 2007, continue to perform below our original underwriting expectations. In accordance with its standard practice, during the three and nine months ended September 30, 2008, we evaluated the most currently available information, including trends in delinquencies and charge-offs on the underlying loans, draw rates on the lines of credit, and the servicer's ability to fulfill its contractual obligations including its obligation to fund additional draws. In recent periods, performance patterns on these transactions have stabilized, with CDR, CPR, Draw Rates and delinquency percentages fluctuating within what we believe to be a relatively narrow band. Accordingly, the

Edgar Filing: ASSURED GUARANTY LTD - Form 10-Q

Company is using modeling assumptions that are based upon or which approximate actual historical performance to project future performance and potential losses. During the Third Quarter 2008, the Company extended the time frame during which it expects the CDR to decline to a stabilized 2.5% rate. This revision was based upon management's judgment that a variety of factors including the deterioration of U.S. economic conditions could lead to a longer period in which default rates remain high. The Company continues to model sensitivities around the results booked using a variety of CDR rates and stress periods as well as other modeling approaches including roll rates and hybrid roll rate/CDR methods. As a result of this modeling and analysis, the Company incurred loss and loss adjustment expenses of \$52.3 million for its direct Countrywide transactions

Table of Contents

during Third Quarter 2008. The Company's cumulative incurred loss and loss adjustment expenses on the direct Countrywide transactions as of September 30, 2008 were \$94.5 million (\$75.1 million after-tax).

Credit support for HELOC transactions comes primarily from two sources. In the first instance, excess spread is used to build a certain amount of credit enhancement and absorb losses. Currently, excess spread (the difference between the interest collections on the collateral and the interest paid on the insured notes) is running at a rate of approximately 250 basis points per annum. Additionally, for the transactions serviced by Countrywide, the servicer is required to fund additional draws on the HELOC loans following the occurrence of a Rapid Amortization Event. Among other things, such an event is triggered when claim payments by us exceed a certain threshold. Prior to the occurrence of a Rapid Amortization Event, during the transactions' revolving period, new draws on the HELOC loans are funded first from principal collections. As such, during the revolving period no additional credit enhancement is created by the additional draws, and the speed at which our exposure amortizes is reduced to the extent of such additional draws, since principal collections are used to fund those draws rather than pay down the insured notes. Subsequent to the occurrence of a Rapid Amortization Event, new draws are funded by Countrywide and all principal collections are used to pay down the insured notes. Any draws funded by Countrywide are subordinate to us in the cash flow waterfall and hence represent additional credit enhancement available to absorb losses before we have to make a claim payment. Additionally, since all principal collections are used to pay down the insured notes, rather than fund additional draws, our exposure begins to amortize more quickly. A Rapid Amortization Event occurred for both of these deals in June 2008.

We have modeled our HELOC exposures under a number of different scenarios, taking into account the multiple variables and structural features that materially affect transaction performance and potential losses to us. The key variables include the speed or rate at which borrowers make payments on their loans, as measured by the Constant Payment Rate (CPR)(1), the default rate, as measured by the Constant Default Rate (CDR)(2), excess spread, and the amount of loans that are already delinquent more than 30 days. We also take into account the pool factor (the percentage of the original principal balance that remains outstanding), and the timing of the remaining cash flows. Additionally, it should be noted that our contractual rights allow us to retroactively claim that loans included in the insured pool were inappropriately included in the pool by the seller, and to put these loans back to the seller such that we would not be responsible for losses related to these loans. Such actions would benefit us by reducing potential losses.

The ultimate performance of the Company's HELOC transactions will depend on many factors, such as the level and timing of loan defaults, interest proceeds generated by the securitized loans, repayment speeds and changes in home prices, as well as the levels of credit support built into each transaction. Other factors also may have a material impact upon the ultimate performance of each transaction, including the ability of the seller and servicer to fulfill all of their contractual obligations including its obligation to fund future draws on lines of credit, as well as the amount of benefit received from repurchases of ineligible loans by Countrywide. The variables affecting transaction performance are interrelated, difficult to predict and subject to considerable volatility. Consequently, the range of potential outcomes is wide and subject to significant uncertainty. As of September 30, 2008, we had total incurred loss and loss adjustment expenses of \$94.5 million for these two HELOC transactions. If actual results differ materially from any of our assumptions, the losses incurred could be materially different from our estimate. We continue to update our evaluation of these exposures as new information becomes available.

(1) The CPR is the annualized rate at which the portfolio amortizes, so that a 15% CPR implies that 15% of the collateral will be retired over a one-year period.

(2) The CDR is the annualized default rate, so that a 2.5% CDR implies that 2.5% of the collateral will default each year.

Table of Contents

The key assumptions used in our case loss reserves on the direct Countrywide transactions is presented in the following table:

Key Variables

Constant payment rate (CPR)	10%
Constant default rate (CDR)	6-month average CDR of approximately 18% during months 1-6, declining to 2.5% at the end of month 12. From months 13 onward, a 2.5% CDR is assumed.
Draw rate	2%
Excess spread	250 bps per annum
Repurchases of Ineligible loans by Countrywide	\$26.6 million; or approximately 1% of original pool balance of \$2.4 billion
Loss Severity	100%

Another type of RMBS transaction is generally referred to as Subprime RMBS. The collateral supporting such transactions is comprised of first-lien residential mortgage loans made to subprime borrowers. A subprime borrower is one considered to be a higher risk credit based on credit scores or other risk characteristics. As of September 30, 2008, we had net par outstanding of \$6.7 billion related to Subprime RMBS securitizations. Of that amount, \$6.1 billion is from transactions issued in the period from 2005 through 2007 and written in our direct financial guaranty segment. The majority of our Subprime RMBS exposure is rated triple-A by all major rating agencies, and by us, at September 30, 2008. As of September 30, 2008, we had portfolio reserves of \$7.4 million and case reserves of \$5.0 million related to our \$6.7 billion U.S. Subprime RMBS exposure, of which \$6.0 million were portfolio reserves related to our \$6.1 billion exposure in the direct financial guaranty segment for transactions issued from 2005 through 2007.

The problems affecting the subprime mortgage market have been widely reported, with rising delinquencies, defaults and foreclosures negatively impacting the performance of Subprime RMBS transactions. Those concerns relate primarily to Subprime RMBS issued in the period from 2005 through 2007. The \$6.1 billion exposure that we have to such transactions in our direct financial guaranty segment benefits from various structural protections, including credit enhancement that on average currently equals approximately 53.9% of the remaining principal balance of the transactions.

We also have exposure of \$450.8 million to Closed-End Second (CES) RMBS transactions, of which \$441.9 million is in the direct segment. As with other types of RMBS, we have seen significant deterioration in the performance of two of our CES transactions, which had exposure of \$195.0 million, during the nine months ended September 30, 2008. Specifically, during the Second Quarter 2008, one transaction in the financial guaranty direct segment experienced a significant increase in delinquencies and collateral losses, which resulted in erosion of the Company's credit enhancement. Based on the Company's analysis of the transaction and its projected losses, the Company had case reserves of \$14.4 million for this transaction as of September 30, 2008. Additionally, as of September 30, 2008, the Company had portfolio reserves of \$6.2 million in its financial guaranty direct segment and case and portfolio reserves of \$0.1 million and \$0.7 million, respectively, in its financial guaranty reinsurance segment related to its U.S. Closed-End Second RMBS exposure.

Another type of RMBS transaction is generally referred to as Alt-A RMBS. The collateral supporting such transactions is comprised of first-lien residential mortgage loans made to prime quality borrowers that lack certain ancillary characteristics that would make them prime. As of September 30, 2008, the Company had net par outstanding of \$7.8 billion related to Alt-A RMBS securitizations. Of that amount, \$7.7 billion is from transactions issued in the

Table of Contents

period from 2005 through 2007 and written in the Company's financial guaranty direct segment. The majority of the Company's Alt-A RMBS exposure is rated triple-A by all major rating agencies, and by the Company, at September 30, 2008. As of September 30, 2008, the Company had portfolio reserves of \$3.6 million and case reserves of \$0.2 million related to its \$7.8 billion Alt-A RMBS exposure, in the financial guaranty direct and reinsurance segments, respectively.

The ultimate performance of the Company's Subprime RMBS and CES RMBS transactions remains highly uncertain and may be subject to considerable volatility due to the influence of many factors, including the level and timing of loan defaults, changes in housing prices and other variables. The Company will continue to monitor the performance of its Subprime RMBS and CES RMBS exposures and will adjust the risk ratings of those transactions based on actual performance and management's estimates of future performance.

The Company has exposure on two life insurance reserve securitization transactions based on blocks of individual life insurance business reinsured by Scottish Re (U.S.) Inc. ("Scottish Re"). The two transactions relate to Ballantyne Re p.l.c. ("Ballantyne") (gross exposure of \$500 million) and Orkney Re II, p.l.c. ("Orkney II") (gross exposure of \$423 million). Under both transactions, monies raised through the issuance of the insured notes support present and future U.S. statutory life insurance reserve requirements. The monies were invested at inception of each transaction in accounts managed by a large, well-known investment manager. However, those investment accounts have incurred substantial mark-to-market losses since mid-year 2007, largely as a result of their exposure to subprime and Alt-A RMBS transactions. Largely as a result of these mark-to-market losses the rating agencies Moody's, S&P and Fitch have downgraded our exposure to both Ballantyne and Orkney II below investment grade. The Company downgraded its internal risk ratings on these transactions to the BB range in Q1 2008 and placed them on our credit watch list (CMC list) in risk category 1 (CMC-1). We define transactions on CMC-1 as low priority cases where the risk is considered fundamentally sound and no loss is expected, but where higher than normal risk is present. The Company is working with the directing guarantor, who has insured exposure of \$900 million, to take remedial action on the Ballantyne transaction. The Company, as the directing financial guarantor, is taking remedial action on the Orkney II transaction. All investment proceeds in both Ballantyne and Orkney II are now required to be generally invested in cash or cash equivalents.

No credit losses have been realized and all of the securities in the Ballantyne and Orkney Re II portfolios continue to generate interest income. Performance of the underlying blocks of life insurance business thus far has been in accordance with expectations, and the underlying reinsurance contracts continue to generate overall positive treaty settlements that are captured in the transaction structures. The combination of cash flows from the investment accounts and the treaty settlements currently provides for greater than two times coverage of interest payments due on the notes that we insure. The notional value of the assets held in the investment accounts continues to increase via the retention of that excess cash.

In order for the Company to incur an ultimate net loss on the transactions, adverse experience on the underlying block of life insurance policies and/or credit losses in the investment portfolio would need to exceed the level of credit enhancement built into the transaction structures. The ability of the transactions to absorb such losses will continue to increase for as long as cash flows remain positive. However, further declines in the market value of the investment accounts could trigger a shut off of interest payments to the insured notes and thereby trigger claim payments by the Company. Any such claim payments ultimately could be recoverable, provided that credit losses on the investment accounts remain below the attachment point of our coverage. In addition, cedants to Scottish Re may have the right to recapture blocks of life insurance business which Scottish Re has ceded to Ballantyne and Orkney Re II. Such recaptures could require Ballantyne and Orkney Re II to sell assets and potentially realize substantial investment losses and for Assured to incur corresponding insured losses. At the present time, the Company does not expect the level of recaptures to cause insured losses.

A sensitivity analysis is not appropriate for our other segment reserves, since the amounts are 100% reinsured.

Edgar Filing: ASSURED GUARANTY LTD - Form 10-Q

We also record IBNR reserves for our other segment. IBNR is an estimate of losses for which the insured event has occurred but the claim has not yet been reported to us. In establishing IBNR, we use traditional actuarial methods to estimate the reporting lag of such claims based on historical experience, claim reviews and information reported by ceding companies. We record IBNR for trade credit reinsurance within our other segment, which is 100% reinsured. The other segment represents lines of business that we exited or sold as part of our 2004 IPO.

Table of Contents

For mortgage guaranty transactions we record portfolio reserves in a manner consistent with our financial guaranty business. While other mortgage guaranty insurance companies do not record portfolio reserves, rather just case and IBNR reserves, we record portfolio reserves because we write business on an excess of loss basis, while other industry participants write quota share or first layer loss business. We manage and underwrite this business in the same manner as our financial guaranty insurance and reinsurance business because they have similar characteristics as insured obligations of mortgage-backed securities.

Statement of Financial Accounting Standards (FAS) No. 60, Accounting and Reporting by Insurance Enterprises (FAS 60) is the authoritative guidance for an insurance enterprise. FAS 60 prescribes differing reserving methodologies depending on whether a contract fits within its definition of a short-duration contract or a long-duration contract. Financial guaranty contracts have elements of long-duration insurance contracts in that they are irrevocable and extend over a period that may exceed 30 years or more, but for regulatory purposes are reported as property and liability insurance, which are normally considered short-duration contracts. The short-duration and long-duration classifications have different methods of accounting for premium revenue and contract liability recognition. Additionally, the accounting for deferred acquisition costs (DAC) could be different under the two methods.

We believe the guidance of FAS 60 does not expressly address the distinctive characteristics of financial guaranty insurance, so we also apply the analogous guidance of Emerging Issues Task Force (EITF) Issue No. 85-20, Recognition of Fees for Guaranteeing a Loan (EITF 85-20), which provides guidance relating to the recognition of fees for guaranteeing a loan, which has similarities to financial guaranty insurance contracts. Under the guidance in EITF 85-20, the guarantor should assess the probability of loss on an ongoing basis to determine if a liability should be recognized under FAS No. 5, Accounting for Contingencies (FAS 5). FAS 5 requires that a loss be recognized where it is probable that one or more future events will occur confirming that a liability has been incurred at the date of the financial statements and the amount of loss can be reasonably estimated.

The following tables summarize our reserves for losses and LAE by segment and type of reserve as of the dates presented. For an explanation of changes in these reserves see Consolidated Results of Operations.

The following table sets forth the financial guaranty insurance policy and credit derivative contract in-force portfolio by underlying rating:

Ratings(1)	As of September 30, 2008		As of December 31, 2007	
	Net par outstanding	% of Net par outstanding	Net par outstanding	% of Net par outstanding
	(in billions of U.S. dollars)			
Super senior	\$ 35.1	15.4%	\$ 36.4	18.2%
AAA	41.7	18.3%	47.3	23.6%
AA	49.4	21.7%	38.4	19.2%
A	63.9	28.1%	49.2	24.6%
BBB	32.7	14.4%	26.9	13.4%
Below investment grade	4.6	2.0%	2.1	1.1%
Total exposures(2)	\$ 227.3	100.0%	\$ 200.3	100.0%

(1) The Company's internal rating. The Company's scale is comparable to that of the nationally recognized rating agencies. The super senior category, which is not generally used by rating agencies, is used by the Company in instances where the Company's AAA-rated exposure has additional credit enhancement due to either (1) the existence

of another security rated AAA that is subordinated to the Company's exposure or (2) the Company's exposure benefits from a different form of credit enhancement that would pay any claims first in the event that any of the exposures incurs a loss, and such credit enhancement, in management's opinion, causes the Company's attachment point to be materially above the AAA attachment point.

(2) Total does not add due to rounding.

The change in ratings above is mainly related to the Company's U.S. RMBS exposures.

Table of Contents

Our surveillance department is responsible for monitoring our portfolio of credits and maintains a list of closely monitored credits (CMC). The closely monitored credits are divided into four categories: Category 1 (low priority; fundamentally sound, greater than normal risk); Category 2 (medium priority; weakening credit profile, may result in loss); Category 3 (high priority; claim/default probable, case reserve established); Category 4 (claim paid, case reserve established for future payments). The closely monitored credits include all below investment grade (BIG) exposures where there is a material amount of exposure (generally greater than \$10.0 million) or a material risk of the Company incurring a loss greater than \$0.5 million. The closely monitored credits also include investment grade (IG) risks where credit quality is deteriorating and where, in the view of the Company, there is significant potential that the risk quality will fall below investment grade. As of September 30, 2008, the closely monitored credits include approximately 99% of our BIG exposure, and the remaining BIG exposure of \$43.5 million was distributed across 66 different credits. As of December 31, 2007, the closely monitored credits include approximately 99% of our BIG exposure, and the remaining BIG exposure of \$19.8 million was distributed across 46 different credits. Other than those excluded BIG credits, credits that are not included in the closely monitored credit list are categorized as fundamentally sound risks.

The following table provides financial guaranty insurance policy and credit derivative contract net par outstanding by credit monitoring category as of September 30, 2008 and December 31, 2007:

Description:	Net Par Outstanding	As of September 30, 2008		Case Reserves(2)
		% of Net Par Outstanding (\$ in millions)	# of Credits in Category	
Fundamentally sound risk	\$ 222,597	97.9%		
Closely monitored:				
Category 1	1,368	0.6%	41	\$
Category 2	1,422	0.6%	26	
Category 3	1,892	0.8%	47	68
Category 4	20		14	21
CMC total(1)	4,702	2.1%	128	89
Other below investment grade risk	44		66	
Total(1)	\$ 227,342	100.0%		\$ 89

Description:	Net Par Outstanding	As of December 31, 2007		Case Reserves(2)
		% of Net Par Outstanding (\$ in millions)	# of Credits in Category	
Fundamentally sound risk	\$ 198,133	98.9%		
Closely monitored:				
Category 1	1,288	0.6%	36	\$
Category 2	743	0.4%	12	
Category 3	71		16	17
Category 4	24		16	22
CMC total(1)	2,126	1.1%	80	39
Other below investment grade risk	20		46	
Total	\$ 200,279	100.0%		\$ 39

(1) Total does not add due to rounding.

(2) Includes case reserves on credit derivatives of \$7.4 million at September 30, 2008 and \$3.2 million at December 31, 2007, which balances are included in credit derivative liabilities in the Company's consolidated balance sheets.

Table of Contents

The following chart summarizes movements in CMC exposure by risk category:

Net Par Outstanding	Category 1	Category 2	Category 3 (\$ in millions)	Category 4	Total CMC
Balance, December 31, 2007	\$ 1,288	\$ 743	\$ 71	\$ 24	\$ 2,126
Less: amortization	72	375	73		520
Additions from first time on CMC	2,137	948	220		3,305
Deletions Upgraded and removed	175		30	3	208
Category movement	(1,810)	106	1,704		
Net change	80	679	1,821	(3)	2,577
Balance, September 30, 2008(1)	\$ 1,368	\$ 1,422	\$ 1,892	\$ 20	\$ 4,702

(1) Total does not add due to rounding.

The increase of \$2,577 million in financial guaranty CMC net par outstanding during the nine months ended September 30, 2008 is attributable primarily to the downgrade of RMBS exposures.

The Company's current estimate of loss reserves represents management's best estimate of loss based on the current information, however, actual results may differ materially from current estimates.

Industry Methodology

We are aware that there are certain differences regarding the measurement of portfolio loss liabilities among companies in the financial guaranty industry. In January and February 2005, the Securities and Exchange Commission (SEC) staff had discussions concerning these differences with a number of industry participants. Based on those discussions, in June 2005, the Financial Accounting Standards Board (FASB) staff decided additional guidance is necessary regarding financial guaranty contracts. In May 2008, the FASB issued FAS No. 163, Accounting for Financial Guarantee Insurance Contracts An Interpretation of FASB Statement No. 60 (FAS 163). FAS 163 requires that an insurance enterprise recognize a claim liability prior to an event of default (insured event) when there is evidence that credit deterioration has occurred in an insured financial obligation. FAS 163 also clarifies the methodology to be used for financial guaranty premium revenue recognition and claim liability measurement as well as requiring expanded disclosures about the insurance enterprise's risk management activities. The provisions of FAS 163 related to premium revenue recognition and claim liability measurement are effective for financial statements issued for fiscal years beginning after December 15, 2008, and all interim periods within those fiscal years. Earlier application of these provisions is not permitted. The expanded risk management activity disclosure provisions of FAS 163 are effective for the third quarter of 2008 and are included in Note 6 of the accompanying financial statements. FAS 163 will be applied to all existing and future financial guaranty insurance contracts written by us. The cumulative effect of initially applying FAS 163 will be recorded as an adjustment to retained earnings as of January 1, 2009. The adoption of FAS 163 is expected to have a material effect on our financial statements. We are in the process of estimating the impact of the adoption of FAS 163. We will continue to follow our existing accounting policies in regards to premium revenue recognition and claim liability measurement until we adopt FAS 163 on January 1, 2009.

Reclassification

Effective with the quarter ended March 31, 2008, we reclassified the revenues, expenses and balance sheet items associated with financial guaranty contracts that our financial guaranty subsidiaries write in the form of credit default swap (CDS) contracts. The reclassification does not change our net income (loss) or shareholder s equity. This reclassification is being adopted by us after agreement with member companies of the Association of Financial Guaranty Insurers in consultation with the staffs of the Office of the Chief Accountant and the Division of Corporate Finance of the Securities and Exchange Commission. The reclassification is being implemented in order to increase comparability of our financial statements with other financial guaranty companies that have CDS contracts.

Our CDS contracts provide for credit protection against payment default and have substantially the same terms and conditions as its financial guaranty insurance contracts. Under United States Generally Accepted

Table of Contents

Accounting Principles, however, CDS contracts are subject to derivative accounting rules and financial guaranty policies are subject to insurance accounting rules.

In our accompanying unaudited interim consolidated statements of operations and comprehensive income, we have reclassified CDS revenues from net earned premiums to realized gains and other settlements on credit derivatives. Loss and loss adjustment expenses and recoveries that were previously included in loss and loss adjustment expenses (recoveries) will be reclassified to realized gains and other settlements on credit derivatives, as well. Portfolio and case loss and loss adjustment expenses will be reclassified from loss and loss adjustment expenses (recoveries) and will be included in unrealized gains (losses) on credit derivatives, which previously included only unrealized mark to market gains or losses on our contracts written in CDS form. In the consolidated balance sheet, we reclassified all CDS-related balances previously included in unearned premium reserves, reserves for losses and loss adjustment expenses, prepaid reinsurance premiums, premiums receivable and reinsurance balances payable to either credit derivative liabilities or credit derivative assets, depending on the net position of the CDS contract at each balance sheet date.

Fair Value of Credit Derivatives

We follow FAS No. 133, Accounting for Derivative Instruments and Hedging Activities (FAS 133), FAS No. 149, Amendment of Statement 133 on Derivative Instruments and Hedging Activities (FAS 149) and FAS No. 155, Accounting for Certain Hybrid Financial Instruments (FAS 155), which establishes accounting and reporting standards for derivative instruments and FAS 157 Fair Value Measurements , which establishes a comprehensive framework for measuring fair value. FAS 133 and FAS 149 require recognition of all derivatives on the balance sheet at fair value. FAS 157 defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. FAS 157 also requires an entity maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value. The price shall represent that available in the principal market for the asset or liability. If there is no principal market, then the price is based on the market that maximizes the value received for an asset or minimizes the amount paid for a liability (i.e. the most advantageous market).

FAS 157 specifies a fair value hierarchy based on whether the inputs to valuation techniques used to measure fair value are observable or unobservable. Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect Company-based market assumptions. In accordance with FAS 157, the fair value hierarchy prioritizes model inputs into three broad levels as follows:

- Level 1 Quoted prices for identical instruments in active markets.
- Level 2 Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and observable inputs other than quoted prices, such as interest rates or yield curves and other inputs derived from or corroborated by observable market inputs.
- Level 3 Model derived valuations in which one or more significant inputs or significant value drivers are unobservable. This hierarchy requires the use of observable market data when available.

An asset or liability's categorization within the fair value hierarchy is based on the lowest level of significant input to its valuation.

We issue credit derivatives that we view as an extension of our financial guaranty business but that do not qualify for the financial guaranty insurance scope exception under FAS 133 and FAS 149 and therefore are reported at fair value, with changes in fair value included in our earnings.

Our realized gains and other settlements on credit derivatives include credit derivative premiums received and receivable, credit derivative losses paid and payable and realized gains or losses due to early terminations and ceding commissions (expense) income. Credit derivative premiums and ceding commissions (expense) income are earned over the life of the transaction. Claim payments or recoveries are related to credit events requiring payment

Table of Contents

by or to us under the credit derivative contract. Realized gains or losses are recorded related to the early termination of credit derivative contracts.

Our unrealized gains and losses on credit derivatives represent changes in fair value of these instruments that are required to be recorded under FAS 133. The unrealized gains and losses on credit derivatives will amortize to zero as the exposure approaches its maturity date, unless there is a payment default on the exposure. However, in the event that we terminate a credit derivative contract prior to maturity the unrealized gain or loss will be realized through realized gains or losses and other settlements on credit derivatives. Changes in the fair value of our credit derivative contracts do not reflect actual claims or credit losses, and have no impact on our claims paying resources, rating agency capital or regulatory capital positions.

We do not typically exit our credit derivative contracts and there are not quoted prices for our instruments or similar instruments. Observable inputs other than quoted market prices exist, however, these inputs reflect contracts that do not contain terms and conditions similar to the credit derivatives issued by us. Therefore, the valuation of our credit derivative contracts requires the use of models that contain significant, unobservable inputs. Thus, we believe that our credit derivative contract valuations are in Level 3 in the fair value hierarchy of FAS 157.

The fair value of these instruments represents the difference between the present value of remaining contractual premiums charged for the credit protection and the estimated present value of premiums that a comparable financial guarantor would hypothetically charge for the same protection at the balance sheet date. The fair value of these contracts depends on a number of factors including notional amount of the contract, expected term, credit spreads, changes in interest rates, the credit ratings of the referenced entities, our own credit risk and remaining contractual flows.

Remaining contractual cash flows, which are included in the realized gains and other settlements on credit derivatives component of credit derivatives, are the most readily observable variables since they are based on the CDS contractual terms. These variables include i) net premiums received and receivable on written credit derivative contracts, ii) net premiums paid and payable on purchased contracts, iii) losses paid and payable to credit derivative contract counterparties and iv) losses recovered and recoverable on purchased contracts. The remaining key variables described above impact unrealized gains (losses) on credit derivatives.

Market conditions at September 30, 2008 were such that market prices were generally not available. Where market prices were not available, we used a combination of observable market data and valuation models, including various market indexes, credit spreads, our own credit risk and estimated contractual payments to estimate the fair value of our credit derivatives. These models are primarily developed internally based on market conventions for similar transactions. Management considers the non-standard terms of its credit derivative contracts in determining the fair value of these contracts. These terms differ from credit derivatives sold by companies outside of the financial guaranty industry. The non-standard terms include the absence of collateral support agreements or immediate settlement provisions, relatively high attachment points and the fact that we do not exit derivatives we sell for credit protection purposes, except under specific circumstances such as exiting a line of business. Because of these terms and conditions, the fair value of our credit derivatives may not reflect the same prices observed in an actively traded market of credit default swaps that do not contain terms and conditions similar to those observed in the financial guaranty market. These models and the related assumptions are continuously reevaluated by management and enhanced, as appropriate, based upon improvements in modeling techniques and availability of more timely market information.

Valuation models include the use of management estimates and current market information. Management is also required to make assumptions on how the fair value of credit derivative instruments is affected by current market conditions. Management considers factors such as current prices charged for similar agreements, performance of underlying assets, life of the instrument, and the extent of credit default swaps exposure

we ceded under reinsurance agreements, and the nature and extent of activity in the financial guaranty credit derivative marketplace. The assumptions that management uses to determine its fair value may change in the future due to market conditions. Due to the inherent uncertainties of the assumptions used in the valuation models to determine the fair value of these credit derivative products, actual experience may differ from the estimates reflected in our consolidated financial statements, and the differences may be material.

Table of Contents

The fair value adjustment recognized in our statements of operations for the three months ended September 30, 2008 (Third Quarter 2008) was a \$(116.2) million loss compared with a \$(222.7) million loss for the three months ended September 30, 2007 (Third Quarter 2007). The fair value adjustment recognized in our statements of operations for the nine months ended September 30, 2008 (Nine Months 2008) was a \$332.6 million gain compared with a \$(250.9) million loss for the nine months ended September 30, 2007 (Nine Months 2007). The change in fair value for Third Quarter 2008 and Nine Months 2008 is mainly due to an increase in the market measure of the Company's credit risk as indicated by the cost of CDS credit protection on us, which increased from 180 basis points at December 31, 2007 to 1,255 basis points at September 30, 2008, which was only partially offset by widening spreads of the underlying obligations. For Third Quarter 2008 and Nine Months 2008, approximately 85% and 15%, respectively, of our unrealized loss on credit derivative financial instruments is attributable to the fair value of Alt-A and subprime RMBS transactions, with the balance of the change in fair values principally in the high yield and investment grade corporate collateralized loan obligation transactions and commercial mortgage backed securities markets. The change in fair value for Third Quarter 2007 and Nine Months 2007 is attributable to spreads widening and includes no credit losses. For the Third Quarter 2007, approximately 70% of the Company's unrealized loss on derivative financial instruments was due to a decline in the market value of high yield and investment grade corporate collateralized loan obligation transactions, with the balance generated by lower market values principally in the residential and commercial mortgage-backed securities markets. With considerable volatility continuing in the market, the fair value adjustment amount will fluctuate significantly in future periods. The Third Quarter 2008 and Nine Months 2008 amounts also included a fair value gain of \$6.9 million and \$24.3 million, pre-tax, respectively, related to Assured Guaranty Corp.'s CCS Securities as resulting of the widening of the Company's credit spreads. The Company recorded no fair value gain in Third Quarter 2007 and Nine Months 2007, as the fair value of CCS securities was \$0 as of September 30, 2007, June 30, 2007 and December 31, 2006.

Valuation of Investments

As of September 30, 2008 and December 31, 2007, we had total investments of \$3.5 billion and \$3.1 billion, respectively. The fair values of all of our investments are calculated from independent market valuations. The fair values of the Company's U.S. Treasury securities are primarily determined based upon broker dealer quotes obtained from several independent active market makers. The fair values of the Company's portfolio other than U.S. Treasury securities are determined primarily using matrix pricing models. The matrix pricing models incorporate factors such as tranche type, collateral coupons, average life, payment speeds, and spreads, in order to calculate the fair values of specific securities owned by the Company. As of September 30, 2008, under FAS 157, all of our fixed maturity securities were classified as Level 2 and our short-term investments were classified as either Level 1 or Level 2.

As of September 30, 2008, approximately 90% of our investments were long-term fixed maturity securities, and our portfolio had an average duration of 4.7 years, compared with 82% and 3.9 years as of December 31, 2007. Changes in interest rates affect the value of our fixed maturity portfolio. As interest rates fall, the fair value of fixed maturity securities increases and as interest rates rise, the fair value of fixed maturity securities decreases. The Company's portfolio is comprised primarily of high-quality, liquid instruments. We continue to receive sufficient information to value our investments and have not had to modify our approach due to the current market conditions.

Other than Temporary Impairments

We have a formal review process for all securities in our investment portfolio, including a review for impairment losses. Factors considered when assessing impairment include:

- a decline in the market value of a security by 20% or more below amortized cost for a continuous period of at least six months;
- a decline in the market value of a security for a continuous period of 12 months;
- recent credit downgrades of the applicable security or the issuer by rating agencies;
- the financial condition of the applicable issuer;

Table of Contents

- whether scheduled interest payments are past due; and
- whether we have the ability and intent to hold the security for a sufficient period of time to allow for anticipated recoveries in fair value.

If we believe a decline in the value of a particular investment is temporary, we record the decline as an unrealized loss on our balance sheet in accumulated other comprehensive income in shareholders' equity. If we believe the decline is other than temporary, we write down the carrying value of the investment and record a realized loss in our statement of operations. Our assessment of a decline in value includes management's current assessment of the factors noted above. If that assessment changes in the future, we may ultimately record a loss after having originally concluded that the decline in value was temporary.

A focus of management's assessment is the evaluation of securities that have been in an unrealized loss position for 12-months or more. We consider the nature of the investment, the cause for the impairment (interest or credit related), the severity (both as a percentage of book value and absolute dollars) and duration of the impairment and any other available evidence, such as discussions with investment advisors, volatility of the securities fair value, recent news reports, etc., when performing our assessment.

As of September 30, 2008, our gross unrealized loss position stood at \$157.0 million compared to \$50.5 million at June 30, 2008. The \$106.5 million increase in gross unrealized losses is primarily attributable to municipal securities, \$46.3 million, mortgage and asset-backed securities, \$37.7 million, and corporate securities, \$21.5 million. The increase in these unrealized losses during the three months ended September 30, 2008 is related to impaired values of U.S. mortgage backed securities, which has caused illiquidity in the financial markets and resulted in depressed demand for non-cash investments.

As of September 30, 2008, we had 102 securities in an unrealized loss position for greater than 12 months, representing a gross unrealized loss of \$35.3 million. Of these securities, 51 securities had unrealized losses greater than 10% of book value. The total unrealized loss for these securities as of September 30, 2008 was \$26.9 million. The amount of unrealized loss for these 51 bonds over the past 12 months has varied between \$4.1 million and \$14.3 million, until September when the unrealized loss increased to the \$26.9 million level. This increase in unrealized losses during the quarter is attributable to the severe economic downturn experienced by the U.S. economy mentioned above. Except as noted below, the Company has recognized no other than temporary impairment losses for the three and nine month periods ended September 30, 2008 and has the ability and intent to hold these securities until a recovery in value or maturity, whichever comes first.

The Company recognized \$18.5 million of other than temporary impairment losses related to corporate securities for the three- and nine-month periods ended September 30, 2008. The Company continues to monitor the value of these investments. Future valuations may result in further impairment of the Company's investments. The Company had no write downs of investments for other than temporary impairment losses for the three- and nine-month periods ended September 30, 2007.

Table of Contents

The following table summarizes the unrealized losses in our investment portfolio by type of security and the length of time such securities have been in a continuous unrealized loss position as of the dates indicated:

Table of Contents

Premium Revenue Recognition

Premiums are received either upfront or in installments. Upfront premiums are earned in proportion to the expiration of the amount at risk. Each installment premium is earned ratably over its installment period, generally one year or less. Premium earnings under both the upfront and installment revenue recognition methods are based upon and are in proportion to the principal amount guaranteed and therefore result in higher premium earnings during periods where guaranteed principal is higher. For insured bonds for which the par value outstanding is declining during the insurance period, upfront premium earnings are greater in the earlier periods thus matching revenue recognition with the underlying risk. The premiums are allocated in accordance with the principal amortization schedule of the related bond issue and are earned ratably over the amortization period. When an insured issue is retired early, is called by the issuer, or is in substance paid in advance through a refunding accomplished by placing U.S. Government securities in escrow, the remaining unearned premium reserves are earned at that time. Unearned premium reserves represent the portion of premiums written that is applicable to the unexpired amount at risk of insured bonds.

In our reinsurance businesses, we estimate the ultimate written and earned premiums to be received from a ceding company at the end of each quarter and the end of each year because some of our ceding companies report premium data anywhere from 30 to 90 days after the end of the relevant period. Written premiums reported in our statement of operations are based upon reports received from ceding companies supplemented by our own estimates of premium for which ceding company reports have not yet been received. As of September 30, 2008 and December 31, 2007, the assumed premium estimate and related ceding commissions included in our unaudited interim consolidated financial statements were \$5.7 million and \$1.4 million and \$8.8 million and \$2.0 million, respectively. Key assumptions used to arrive at management's best estimate of assumed premiums are premium amounts reported historically and informal communications with ceding companies. Differences between such estimates and actual amounts are recorded in the period in which the actual amounts are determined. Historically, the differences have not been material. We do not record a provision for doubtful accounts related to our assumed premium estimate. Historically there have not been any material issues related to the collectibility of assumed premium. No provision for doubtful accounts related to our premium receivable was recorded for September 30, 2008 or December 31, 2007.

Deferred Acquisition Costs

Acquisition costs incurred, other than those associated with credit derivative products, that vary with and are directly related to the production of new business are deferred and amortized in relation to earned premiums. These costs include direct and indirect expenses such as ceding commissions, brokerage expenses and the cost of underwriting and marketing personnel. As of September 30, 2008 and December 31, 2007, we had deferred acquisition costs of \$292.1 million and \$259.3 million, respectively. Ceding commissions paid to primary insurers are the largest component of deferred acquisition costs, constituting 61% and 68% of total deferred acquisition costs as of September 30, 2008 and December 31, 2007, respectively. Management uses its judgment in determining what types of costs should be deferred, as well as what percentage of these costs should be deferred. We annually conduct a study to determine which operating costs vary with, and are directly related to, the acquisition of new business and qualify for deferral. Ceding commissions received on premiums we cede to other reinsurers reduce acquisition costs. Anticipated losses, LAE and the remaining costs of servicing the insured or reinsured business are considered in determining the recoverability of acquisition costs. Acquisition costs associated with credit derivative products are expensed as incurred. When an insured issue is retired early, as discussed in the Premium Revenue Recognition section of these Critical Accounting Estimates, the remaining related deferred acquisition cost is expensed at that time.

Taxation of Subsidiaries

Edgar Filing: ASSURED GUARANTY LTD - Form 10-Q

The Company's Bermuda subsidiaries are not subject to any income, withholding or capital gains taxes under current Bermuda law. The Company's U.S. and U.K. subsidiaries are subject to income taxes imposed by U.S. and U.K. authorities and file applicable tax returns. In addition, AGRO, a Bermuda domiciled company, has elected under Section 953(d) of the U.S. Internal Revenue Code to be taxed as a U.S. domestic corporation.

The U.S. Internal Revenue Service (IRS) has completed audits of all of the Company's U.S. subsidiaries' federal income tax returns for taxable years through 2001. In September 2007, the IRS completed its audit of tax

Table of Contents

years 2002 through 2004 for Assured Guaranty Overseas US Holdings Inc. and subsidiaries, which includes Assured Guaranty Overseas US Holdings Inc., AGRO, Assured Guaranty Mortgage Insurance Company and AG Intermediary Inc. As a result of the audit there were no significant findings and no cash settlements with the IRS. In addition the IRS is reviewing Assured Guaranty US Holdings Inc. and subsidiaries (AGUS) for tax years 2002 through the date of the IPO. AGUS includes Assured Guaranty US Holdings Inc., AGC and AG Financial Products and were part of the consolidated tax return of a subsidiary of ACE Limited (ACE), our former Parent, for years prior to the IPO. The Company is indemnified by ACE for any potential tax liability associated with the tax examination of AGUS as it relates to years prior to the IPO. In addition, tax years 2005 and subsequent remain open.

Deferred Income Taxes

As of September 30, 2008 and December 31, 2007, we had a net deferred income tax asset of \$82.3 million and \$147.6 million, respectively. Certain of our subsidiaries are subject to U.S. income tax. Deferred income tax assets and liabilities are established for the temporary differences between the financial statement carrying amounts and tax bases of assets and liabilities using enacted rates in effect for the year in which the differences are expected to reverse. Such temporary differences relate principally to unrealized gains and losses on investments and derivative financial instruments, deferred acquisition costs, reserves for losses and LAE, unearned premium reserves, net operating loss carryforwards (NOLs) and statutory contingency reserves. A valuation allowance is recorded to reduce a deferred tax asset to the amount that in management's opinion is more likely than not to be realized.

As of September 30, 2008, Assured Guaranty Re Overseas Ltd. (AGRO) had a stand alone NOL of \$49.2 million, compared with \$54.8 million as of December 31, 2007, which is available to offset its future U.S. taxable income. The Company has \$28.5 million of this NOL available through 2017 and \$20.7 million available through 2023. AGRO's stand alone NOL is not permitted to offset the income of any other members of AGRO's consolidated group due to certain tax regulations. Under applicable accounting rules, we are required to establish a valuation allowance for NOLs that we believe are more likely than not to expire before being utilized. Management has assessed the likelihood of realization of all of its deferred tax assets. Based on this analysis, management believes it is more likely than not that \$20.0 million of AGRO's \$49.2 million NOL will not be utilized before it expires and has established a \$7.0 million valuation allowance related to the NOL deferred tax asset. Management believes that all other deferred income taxes are more-likely-than-not to be realized. The valuation allowance is subject to considerable judgment, is reviewed quarterly and will be adjusted to the extent actual taxable income differs from estimates of future taxable income that may be used to realize NOLs or capital losses.

The Company adopted the provisions of FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes-an interpretation of FASB Statement No. 109 (FIN 48), on January 1, 2007. The total liability for unrecognized tax benefits as of September 30, 2008 and December 31, 2007 was \$5.1 million and \$2.8 million, respectively, and is included in other liabilities on the balance sheet. During the nine months ended September 30, 2008 the net liability increased by approximately \$2.3 million. The Company does not believe it is reasonably possible that this amount will change significantly in the next twelve months. The Company's policy is to recognize interest and penalties related to uncertain tax positions in income tax expense.

Liability For Tax Basis Step-Up Adjustment

In connection with the IPO, the Company and ACE Financial Services Inc. (AFS), a subsidiary of ACE, entered into a tax allocation agreement, whereby the Company and AFS made a Section 338 (h)(10) election that has the effect of increasing the tax basis of certain affected subsidiaries tangible and intangible assets to fair value. Future tax benefits that the Company derives from the election will be payable to AFS when realized by the Company.

As a result of the election, the Company has adjusted its net deferred tax liability to reflect the new tax basis of the Company's affected assets. The additional basis is expected to result in increased future income tax deductions and, accordingly, may reduce income taxes otherwise payable by the Company. Any tax benefit realized by the Company will be paid to AFS. Such tax benefits will generally be calculated by comparing the Company's affected subsidiaries' actual taxes to the taxes that would have been owed by those subsidiaries had the increase in basis not occurred. After a 15 year period, to the extent there remains an unrealized tax benefit, the Company and AFS will negotiate a settlement of the unrealized benefit based on the expected realization at that time.

Table of Contents

The Company initially recorded a \$49.0 million reduction of its existing deferred tax liability, based on an estimate of the ultimate resolution of the Section 338(h)(10) election. Under the tax allocation agreement, the Company estimated that, as of the IPO date, it was obligated to pay \$20.9 million to AFS and accordingly established this amount as a liability. The initial difference, which is attributable to the change in the tax basis of certain liabilities for which there is no associated step-up in the tax basis of its assets and no amounts due to AFS, resulted in an increase to additional paid-in capital of \$28.1 million. As of September 30, 2008 and December 31, 2007, the liability for tax basis step-up adjustment, which is included in the Company's balance sheets in Other liabilities, were \$9.3 million and \$9.9 million, respectively. The Company has paid ACE and correspondingly reduced its liability by \$0.6 million and \$4.9 million in Nine Months 2008 and Nine Months 2007, respectively.

Accounting for Share-Based Compensation

Effective January 1, 2006, we adopted the fair value recognition provisions of FAS No. 123 (revised), Share-Based Payment (FAS 123R) using the modified prospective transition method. Share-based compensation expense in Third Quarter 2008 and Third Quarter 2007 was \$1.8 million (\$1.4 million after tax) and \$4.3 million (\$3.6 million after tax), respectively. Share-based compensation expense in Nine Months 2008 and Nine Months 2007 was \$10.2 million (\$8.3 million after tax) and \$13.8 million (\$11.4 million after tax), respectively. The effect of share-based compensation on both basic and diluted earnings per share for Third Quarter 2008 was \$0.02. The effect on basic and diluted earnings per share for Nine Months 2008 was \$0.10 and \$0.09, respectively. The effect of share-based compensation on basic and diluted earnings per share for Third Quarter 2007 and Nine Months 2007 was \$0.05 and \$0.17, respectively. Third Quarter 2008 and Third Quarter 2007 expense included \$(0.2) million (\$(0.2) million after tax) and \$1.2 million (\$1.1 million after tax), respectively, related to accelerated vesting for stock award grants to retirement-eligible employees. Nine Months 2008 and Nine Months 2007 expense included \$3.5 million (\$3.1 million after tax) and \$4.9 million (\$4.3 million after tax), respectively, related to accelerated vesting for stock award grants to retirement-eligible employees.

Accounting for Cash-Based Compensation

The Company's compensation expense for the three- and nine-month periods ended September 30, 2008 and 2007 was in the form of performance retention awards and the awards that were made in 2008 (which vest over a four year period) and 2007 (which cliff vest after 4 years). The Company recognized approximately \$(0.3) million (\$(0.3) million after tax) and \$39,000 (\$27,000 after tax) of expense for performance retention awards in Third Quarter 2008 and Third Quarter 2007, respectively. The Company recognized approximately \$6.0 million (\$4.9 million after tax) and \$0.1 million (\$0.1 million after tax) of expense for performance retention awards in Nine Months 2008 and Nine Months 2007, respectively. Included in Third Quarter 2008 and Nine Months 2008 amounts were \$(0.7) million and \$3.9 million, respectively, of accelerated expense related to retirement-eligible employees. The negative expense amounts for Third Quarter 2008 were due to revised estimates of the Company's performance measures for 2008.

Information on Residential Mortgage Backed Securities (RMBS), Subprime RMBS, Collateralized Debt Obligations of Asset Backed Securities (CDOs of ABS) and Prime RMBS Exposures

Our Risk Management and Surveillance personnel are responsible for monitoring and reporting on all transactions in the insured portfolio. The primary objective of the surveillance process is to monitor trends and changes in transaction credit quality, detect any deterioration in credit quality and take such remedial actions as may be necessary or appropriate. All transactions in the insured portfolio are risk rated, and surveillance personnel are responsible for adjusting these ratings to reflect changes in transaction credit quality. In assessing the credit quality of our insured portfolio, we take into consideration a variety of factors. For RMBS exposures such factors include the amount of credit support or subordination benefiting our exposure, delinquency and loss trends on the underlying collateral, the extent to which the exposure has amortized and the year in which it was insured.

Our Risk Management and Surveillance personnel are responsible for monitoring and reporting on all transactions in

(1) Assured's internal rating. Assured's scale is comparable to that of the nationally recognized rating agencies. The super senior category, which is not generally used by rating agencies, is used by the Company in instances where Assured's AAA-rated exposure has additional credit enhancement due to either (1) the existence of another security rated AAA that is subordinated to Assured's exposure or (2) Assured's exposure benefits from a different form of credit enhancement that would pay any claims first in the event that any of the exposures incurs a loss and such credit enhancement, in management's opinion, causes Assured's attachment point to be materially above the AAA attachment point.

The tables below provide information on the risk ratings and certain other risk characteristics of the Company's RM

(1) Assured's internal rating. Assured's scale is comparable to that of the nationally recognized rating agencies. The super senior category, which is not generally used by rating agencies, is used by the Company in instances where Assured's AAA-rated exposure has additional credit enhancement due to either (1) the existence of another security rated AAA that is subordinated to Assured's exposure or (2) Assured's exposure benefits from a different form of credit enhancement that would pay any claims first in the event that any of the exposures incurs a loss and such credit enhancement, in management's opinion, causes Assured's attachment point to be materially above the AAA attachment point.

(1) For this release, net par outstanding is based on values as of September 2008. Pool factor, subordination, cumulative losses and delinquency data is based on September 2008 information obtained from Intex, Bloomberg, and/or provided by the trustee and may be subject to restatement or correction.

(2) Pool factor is the percentage of net par outstanding divided by the original net par outstanding of the transactions at inception.

(3) Represents the sum of subordinate tranches and over-collateralization, expressed as a percentage of total transaction size and does not include any benefit from excess interest collections that may be used to absorb losses.

(4) Cumulative losses are defined as net charge-offs on the underlying loan collateral divided by the original pool balance.

(5) 60+ day delinquencies are defined as loans that are greater than 60 days delinquent and all loans that are in foreclosure, bankruptcy or REO divided by net par outstanding.

(1) A CDO of ABS is a collateralized debt obligation (CDO) transaction whose collateral pool consists primarily of asset-backed securities (ABS), including mortgage-backed securities (MBS). ABS transactions securities generally represent an ownership interest in a trust that contains collateral supporting the notes. Those interests are divided into several tranches that can have varying levels of subordination, credit protection triggers and credit ratings.

(2) Legal Final Maturity represents the final date for payment specified in the transaction documents and does not take into account prepayments that shorten the expected maturity and weighted average life.

(3) CDOs of Mezzanine ABS is a market term that refers to transactions where the underlying collateral at issuance is comprised primarily of mezzanine tranches rated BBB or lower. The collateral underlying Assured's exposure to CDOs of Mezzanine ABS is comprised of mezzanine tranches of CMBS transactions and senior unsecured debt issued by commercial property REITs. The transactions to which Assured has exposure are static pools rather than actively managed transactions, and the collateral in these static pools was originated primarily in the period from 1997-2003. The collateral underlying Assured's exposure to CDOs of Mezzanine ABS had weighted average ratings, based on rating information as of September 30, 2008, as follows: 17% AAA, 8% AA, 13% A, 44% BBB and 18% below investment grade (BIG).

(4) CDOs of High Grade ABS is a market term that refers to transactions where the underlying collateral at issuance is comprised of mezzanine tranches rated single-A or higher.

(5) CDOs of Pooled AAA ABS is a market term that refers to transactions where the underlying collateral at issuance is comprised of the senior-most AAA rated securities. Assured's exposure to CDOs of Pooled AAA ABS was rated, based on rating information as of September 30, 2008: 100% AAA.

The tables below provide information on the risk ratings and certain other risk characteristics of the Company's RMBS.

(6) Represents the sum of subordinate tranches and over-collateralization and does not include any benefit from excess interest collections that may be used to absorb losses.

(1) Some amounts may not add due to rounding.

We organize our business around four principal business segments: financial guaranty direct, financial guaranty reinsurance, mortgage guaranty and other. There are a number of lines of business that we have exited as part of our IPO in April 2004, which are included in the other segment. However, the results of these businesses are reflected in the above numbers. These unaudited interim consolidated financial statements cover the Third Quarter 2008, Third Quarter 2007, Nine Months 2008 and Nine Months 2007.

The tables below provide information on the risk ratings and certain other risk characteristics of the Company's RM

Net (Loss) Income

Edgar Filing: ASSURED GUARANTY LTD - Form 10-Q

Net loss was \$(63.3) million and \$(115.0) million for Third Quarter 2008 and Third Quarter 2007, respectively. The increase of \$51.7 million in 2008 compared with 2007 is primarily due to the following factors:

Table of Contents

- a \$(116.2) million unrealized loss on credit derivatives in Third Quarter 2008 compared with a \$(222.7) million unrealized loss on credit derivatives in Third Quarter 2007, mainly attributable to the downgrades of RMBS transactions, offset by the Company's own credit spread widening. Net of related income taxes, the unrealized loss on credit derivatives, was \$(84.1) million and \$(164.2) million for Third Quarter 2008 and Third Quarter 2007, respectively. With considerable volatility continuing in the market, this amount will fluctuate significantly in future periods,
- an increase of \$11.6 million in net investment income to \$43.4 million in Third Quarter 2008 from \$31.8 million in Third Quarter 2007 which is attributable to increased invested assets from positive operating cash flows as well as increased capital from equity offerings in April 2008 and December 2007,
- an increase in other income, which included a fair value gain of \$6.9 million pre-tax, \$4.5 million after-tax, related to Assured Guaranty Corp.'s committed capital securities.

Partially offsetting these positive factors were:

- a decrease of \$37.7 million in underwriting gain to \$16.5 million underwriting loss in 2008, compared with a \$21.2 million underwriting gain in 2007, primarily due to an increase in loss and loss adjustment expenses associated with an increase in reserves related to our RMBS exposures,
- an increase in net realized investment (losses) of \$(19.9) million primarily related to the \$(18.5) million write down of several corporate securities due to other than temporary impairment, and
- a \$23.0 million increase in our provision (benefit) for income tax to \$(36.2) million in Third Quarter 2008, compared with \$(59.2) million in Third Quarter 2007. This benefit is mainly related to the unrealized loss on credit derivatives recognized in Third Quarter 2008 and Third Quarter 2007. In addition, Third Quarter 2007 amount included a \$6.0 million reduction in our provision for income taxes in due to a reduction in our FIN 48 liability as a result of the completion of an IRS audit of Assured Guaranty Overseas US Holdings Inc. and subsidiaries.

Net income (loss) was \$312.7 million for Nine Months 2008, compared with \$(43.2) million for Nine Months 2007. The increase of \$355.9 million in 2008 compared with 2007 is primarily due to the same reasons mentioned above. The increase in operating expenses during Nine Months 2008 was also due to (1) the amortization of restricted stock and stock option awards, due to new stock awards in 2008 and the related amortization as well as the accelerated vesting of these awards for retirement eligible employees as required by FAS 123R and (2) expansion of our performance retention plan. In addition, Nine Months 2007 provision for income taxes included a \$10.1 million reduction of the Company's FIN 48 liability, which was reduced subsequent to the adoption of FIN 48, due to final regulations on the treatment of a tax uncertainty regarding the use of consolidated losses.

Table of Contents**Gross Written Premiums**

Gross Written Premiums	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008	2007

Total gross written premiums	\$ 112.8	\$ 68.5	\$ 534.4	\$ 195.4

Gross written premiums for Third Quarter 2008 were \$112.8 million compared with \$68.5 million for Third Quarter 2007. Gross written premiums from our financial guaranty direct operations increased \$28.3 million in Third Quarter 2008 compared with Third Quarter 2007, reflecting growth in our U.S. public finance business. The Third Quarter 2008 financial guaranty direct segment included upfront gross written premiums of \$52.1 million from our U.S. public finance business, an increase of \$41.7 million compared with the Third Quarter 2007. Additionally, the Third Quarter 2008 reflects an increase in financial guaranty reinsurance gross written premiums of \$17.4 million compared to the same period last year, mainly due to a new portfolio assumed from one of our cedants, which contributed \$48.3 million of premium. This was offset by the commutation of business assumed from XL Financial Assurance Ltd. (XLFA), a subsidiary of Security Capital Assurance Ltd., which resulted in negative gross written premium of \$(20.8) million.

Gross written premiums for Nine Months 2008 were \$534.4 million, compared with \$195.4 million for Nine Months 2007. Gross written premiums in our financial guaranty direct operations increased \$294.7 million for Nine Months 2008 compared with Nine Months 2007 primarily due to a \$343.2 million increase in U.S. generated business, of which \$323.9 million was from our upfront U.S. public finance business, as we continue to increase our market share. Partially offsetting this increase was a reduction of our international business to \$14.1 million in Nine Months 2008, compared with \$62.8 million for Nine Months 2007. Gross written premiums in our financial guaranty reinsurance segment increased primarily due to the same reasons mentioned above, as well as an increase in facultative cessions from our cedants during the first half of 2008.

Net Earned Premiums

Net Earned Premiums	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008	2007
	(\$ in millions)			
Financial guaranty direct	\$ 26.9	\$ 14.1	\$ 65.0	\$ 38.1
Financial guaranty reinsurance	57.4	21.6	114.8	67.2
Mortgage guaranty	1.2	2.9	4.4	8.3
Total financial guaranty net earned premiums	85.5	38.6	184.0	113.6
Other				
Total net earned premiums	\$ 85.5	\$ 38.6	\$ 184.0	\$ 113.6

Net earned premiums for Third Quarter 2008 were \$85.5 million compared with \$38.6 million for Third Quarter 2007. Financial guaranty direct net earned premiums increased \$12.8 million in Third Quarter 2008,

Table of Contents

compared with Third Quarter 2007. This increase is attributable to the continued growth of our in-force book of business, resulting in increased net earned premiums. Third Quarter 2007 had \$1.1 million of earned premiums from public finance refundings in the financial guaranty direct segment compared to none in Third Quarter 2008. Public finance refunding premiums reflect the unscheduled pre-payment or refundings of underlying municipal bonds. The increase in financial guaranty reinsurance segment was due to the increase in public finance refundings of \$28.2 million to \$31.7 million in Third Quarter 2008. This increase is primarily a result of greater refundings of municipal auction rate and variable rate debt as reported by one of our ceding companies. Excluding refundings, our financial guaranty reinsurance segment increased \$7.6 million in Third Quarter 2008 compared with Third Quarter 2007 due mainly to the portfolio assumed from Ambac in December 2007, which contributed \$7.4 million to net premiums earned in the Third Quarter 2008. The \$1.7 million decrease in net earned premiums in our mortgage guaranty segment in Third Quarter 2008 compared with Third Quarter 2007 reflects the run-off of our quota share treaty business as well as commutations executed in the latter part of 2007.

Net earned premiums for Nine Months 2008 were \$184.0 million, compared with \$113.6 million for Nine Months 2007. Financial guaranty direct segment net earned premiums were \$65.0 million for Nine Months 2008 an increase of \$26.9 million compared with Nine Months 2007. Nine Months 2007 included public finance refundings of \$2.8 million in the financial guaranty direct segment. Nine Months 2008 had no earned premiums from public finance refundings in the financial guaranty direct segment. The variances in the financial guaranty direct, financial guaranty reinsurance and mortgage guaranty segments for Nine Months 2008 compared with Nine Months 2007 are primarily due to the same reasons mentioned above.

Net Investment Income

Net investment income was \$43.4 million for Third Quarter 2008, compared with \$31.8 million for Third Quarter 2007. The \$11.6 million increase is attributable to increased invested assets due to positive operating cash flows as well as increased capital from equity offerings in April 2008 and December 2007.

Net investment income was \$120.2 million for Nine Months 2008, compared with \$94.2 million for Nine Months 2007. Pre-tax book yields were 4.8% and 5.2% for the nine-month periods ended September 30, 2008 and 2007, respectively. The \$26.0 million increase for Nine Months 2008 compared with Nine Months 2007 is primarily due to the same reasons mentioned above.

Net Realized Investment Losses

Net realized investment losses were \$(20.0) million and \$(0.1) million for Third Quarter 2008 and Third Quarter 2007, respectively, and \$(18.0) million and \$(1.9) million for Nine Months 2008 and Nine Months 2007, respectively. The Company wrote down \$18.5 million of investments related to corporate securities for other than temporary impairment losses for the three and nine months ended September 30, 2008. The Company had no write downs of investments for other than temporary impairment losses for the three and nine months ended September 30, 2007. Net realized investment losses, net of related income taxes, were \$(15.9) million and \$(0.2) million for Third Quarter 2008 and Third Quarter 2007, respectively, and \$(17.1) million and \$(1.7) million for Nine Months 2008 and Nine Months 2007, respectively.

Table of Contents*Realized Gains and Other Settlements on Credit Derivatives*

Realized gains and other settlements on credit derivatives	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008	2007
	(\$ in millions)			
Net credit derivative premiums received and receivable:				
Direct segment	\$ 28.4	\$ 17.6	\$ 86.4	\$ 50.7
Reinsurance segment	2.1		3.4	
Total net credit derivative premiums received and receivable	30.5	17.6	89.8	50.7
Net credit derivative losses recovered and recoverable			0.4	1.3
Ceding commissions (paid/payable) received/receivable, net	(0.5)	0.1	(0.8)	0.1
Total realized gains and other settlements on credit derivatives	\$ 30.0	\$ 17.8	\$ 89.4	\$ 52.1

Realized gains and other settlements on credit derivatives, were \$30.0 million and \$17.8 million for Third Quarter 2008 and Third Quarter 2007, respectively. Total net credit derivative premiums received and receivable, which represents premium income recognized attributable to CDS contracts, was \$30.5 million and \$17.6 million for the Third Quarter 2008 and Third Quarter 2007, respectively. This increase is attributable to growth in our direct business written in credit derivative form. There were no net credit derivative losses recovered and recoverable, which represents contractual claim losses paid and payable related to insured credit events under these contracts, for both Third Quarter 2008 and Third Quarter 2007. We did not have any losses paid or payable under these contracts in either Third Quarter 2008 and Third Quarter 2007.

Realized gains and other settlements on credit derivatives, were \$89.4 million and \$52.1 million for Nine Months 2008 and Nine Months 2007, respectively. Total net credit derivative premiums received and receivable, which represents premium income recognized attributable to CDS contracts, was \$89.8 million and \$50.7 million for the Nine Months 2008 and Nine Months Quarter 2007, respectively. This increase is attributable to growth in our direct business written in credit derivative form. Net credit derivative losses recovered and recoverable, which represents contractual claim losses paid and payable related to insured credit events under these contracts, of \$0.4 million and \$1.3 million for Nine Months 2008 and Nine Months 2007, respectively, related to recoveries received by us related to claim payments made in prior years. We did not have any losses paid or payable under these contracts in either Nine Months 2008 or Nine Months 2007.

Unrealized Gains (Losses) on Credit Derivatives

Unrealized gains (losses) on credit derivatives	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008	2007
	(\$ in millions)			
Unrealized (losses) gains on credit derivatives, excluding				
incurred losses on credit derivatives	\$ (106.2)	\$ (221.0)	\$ 351.5	\$ (247.9)
Incurred losses on credit derivatives	(10.1)	(1.8)	(18.9)	(3.0)
Total unrealized (losses) gains on credit derivatives	\$ (116.2)	\$ (222.7)	\$ 332.6	\$ (250.9)

Credit derivatives are recorded at fair value as required by FAS 133, FAS 149 and FAS 155. The fair value adjustment for Third Quarter 2008 and Third Quarter 2007 was a \$116.2 million loss and a \$222.7 million loss, respectively. The change in fair value for Third Quarter 2008

Edgar Filing: ASSURED GUARANTY LTD - Form 10-Q

includes a gain of \$1,626.7 million associated with the change in AGC's credit spread, which widened substantially from 900 basis points at June 30, 2008 to 1,255 basis points at September 30, 2008. Management believes that the widening of AGC's credit spread is the result of, among other things, the reduced liquidity in the market and increased demand for credit protection against AGC commensurate with our increased new business production and the correlation between AGC's risk profile and that

Table of Contents

experienced currently by the broader financial markets. Partially offsetting the gain attributable to the increase in AGC's credit spread were declines in fixed income security market prices attributable to widening spreads in certain markets as a result of the continued deterioration in credit markets and some credit rating downgrades, rather than from delinquencies or defaults on securities guaranteed by the Company. The higher credit spreads in the fixed income security market are due to the continued lack of liquidity in the high yield collateralized debt obligation and collateralized loan obligation markets as well as continuing market concerns over the most recent vintages of subprime residential mortgage backed securities. For the three months ended September 30, 2008, approximately 85% of our unrealized loss on credit derivative financial instruments is attributable to the fair value of Alt-A and subprime RMBS transactions, with the balance of the change in fair values principally in the high yield and investment grade corporate collateralized loan obligation and commercial mortgage backed securities markets. Changes in the fair value of our credit derivative contracts do not reflect actual claims or credit losses, and have no impact on the Company's claims paying resources, rating agency capital or regulatory capital positions. With considerable volatility continuing in the market, the fair value adjustment amount will fluctuate significantly in future periods. The change in fair value for Third Quarter 2007 was due to credit spreads widening, primarily related to the deterioration of the sub-prime mortgage market, and included no credit losses. Unrealized losses on credit derivative financial instruments, net of related income taxes, were \$(84.1) million and \$(164.2) million for Third Quarter 2008 and Third Quarter 2007, respectively.

The fair value adjustment for Nine Months 2008 and Nine Months 2007 was a \$332.6 million gain and a \$250.9 million loss, respectively. The change in fair value for Nine Months 2008 was attributable to the higher credit risk of the Company as indicated by the cost of credit protection on us, which increased from 180 basis points at December 31, 2007 to 1,255 basis points at September 30, 2008. For the nine months ended September 30, 2008, approximately 15% of our unrealized gain on credit derivative financial instruments is attributable to the fair value of high yield and investment grade corporate collateralized loan obligation transactions, with the balance of the change in fair values principally in the residential and commercial mortgage backed securities markets. Changes in the fair value of our credit derivative contracts do not reflect actual claims or credit losses, and have no impact on our claims paying resources, rating agency capital or regulatory capital positions. With considerable volatility continuing in the market, the fair value adjustment amount will fluctuate significantly in future periods. The change in fair value for Nine Months 2007 was due to credit spreads widening, primarily related to the deterioration of the sub-prime mortgage market, and included no credit losses. Unrealized gains (losses) on credit derivative financial instruments, net of related income taxes, were \$228.1 million and \$(184.5) million for Nine Months 2008 and Nine Months 2007, respectively.

The gain or loss created by the estimated fair value adjustment will rise or fall based on estimated market pricing and may not be an indication of ultimate claims. Fair value is defined as the amount at which an asset or liability could be bought or sold in a current transaction between willing parties. We enter into credit derivative contracts which require us to make payments upon the occurrence of certain defined credit events relating to an underlying obligation (generally a fixed income obligation). Our credit derivative exposures are substantially similar to our financial guaranty insurance contracts and provide for credit protection against payment default. They are contracts that are generally held to maturity. The unrealized gains and losses on credit derivative financial instruments will reduce to zero as the exposure approaches its maturity date, unless there is a payment default on the exposure.

Management also calculates portfolio and case reserves expenses on our credit derivative contracts in the same manner as we do for our financial guaranty insurance contracts. Prior to the First Quarter 2008, incurred losses on credit derivatives was apportioned in our financial statements from unrealized gains (losses) on credit derivatives and included in loss and loss adjustment expenses. As a result of reclassifying our accounting activity related to credit derivative contracts commencing with the First Quarter 2008, we no longer make this apportionment in our financial statements, but believe it is an important metric in evaluating the credit quality of our credit derivative contracts. The incurred losses on credit derivatives were \$10.1 million and \$1.8 million for Third Quarter 2008 and Third Quarter 2007, respectively, and \$18.9 million and \$3.0 million for Nine Months 2008 and Nine Months 2007, respectively.

Table of Contents

Other Income

The Third Quarter 2008 and Nine Months 2008 amounts included a fair value gain of \$6.9 million and \$24.3 million, pre-tax, respectively, related to Assured Guaranty Corp.'s committed capital securities. The Company recorded a fair value gain of \$0 in both Third Quarter 2007 and Nine Months 2007, as the fair value of CCS securities was \$0 as of September 30, 2007, June 30, 2007 and December 31, 2006.

Loss and Loss Adjustment Expenses (Recoveries)

Edgar Filing: ASSURED GUARANTY LTD - Form 10-Q

Loss and Loss Adjustment Expenses (Recoveries)	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008	2007
	(\$ in millions)			
Financial guaranty direct	\$ 65.9	\$ 4.7	\$ 130.0	\$ 6.4
Financial guaranty reinsurance	15.5	(3.4)	46.0	(19.2)
Mortgage guaranty	1.0	0.8	1.1	1.0
Total financial guaranty loss and loss adjustment expenses (recoveries)	82.5	2.0	177.1	(11.8)
Other			(1.5)	
Total loss and loss adjustment expenses (recoveries)	\$ 82.5	\$ 2.0	\$ 175.8	\$ (11.8)

Loss and loss adjustment expenses (LAE) for Third Quarter 2008 and Third Quarter 2007 were \$82.5 million and \$2.0 million, respectively. Loss and loss adjustment expenses for the financial guaranty direct segment increased \$61.2 million to \$65.9 million in Third Quarter 2008 from \$4.7 million in Third Quarter 2007. Third Quarter 2008 included \$57.8 million related to HELOC exposures in the financial guaranty direct segment. The financial guaranty reinsurance segment loss and loss adjustment expenses were \$15.5 million in Third Quarter 2008, compared with \$(3.4) million in Third Quarter 2007. Substantially all of the \$15.5 million of losses incurred for the Third Quarter 2008 related to our assumed HELOC exposures. During Third Quarter 2007 the financial guaranty direct segment had loss and LAE of \$4.7 million, as a result of an increase in portfolio reserves due to portfolio migration and the continued development of loss reserves in the ordinary course as our portfolio grows, as well as management updating its rating agency default statistics used in the portfolio loss reserving process, based on data received during the quarter. Case loss activity during Third Quarter 2007 was \$0.3 million. During Third Quarter 2007 the financial guaranty reinsurance segment had loss and LAE of \$(3.4) million, primarily due to a net portfolio reserve release of \$3.6 million due to the establishment of a case reserve, based on information reported to us by the ceding company, for an aircraft-related structured finance transaction written prior to the IPO. Additionally, there was an increase in portfolio reserves of \$2.9 million due to the updating of rating agency default statistics mentioned above, offset by reserve releases from run-off and loss recoveries for aircraft-related transactions.

Loss and LAE for Nine Months 2008 and Nine Months 2007 were \$175.8 million and \$(11.8) million, respectively. Results for the financial guaranty direct segment for Nine Months 2008 included losses incurred of \$23.7 million and \$109.7 million related to Closed-End Second and HELOC exposures, respectively, driven by deterioration, including increases in delinquencies. In addition to Third Quarter 2007 activity, results for the financial guaranty direct segment for Nine Months 2007 included a \$1.9 million case reserve increase and a \$1.0 million portfolio reserve increase, primarily attributable to downgrades of transactions in our CMC list related to the subprime mortgage market. The financial guaranty reinsurance segment included losses incurred of \$42.5 million related primarily to our assumed HELOC and U.S. Subprime RMBS exposures during Nine Months 2008. In addition to the Third Quarter 2007 activity mentioned above, the financial guaranty reinsurance segment had a \$(15.8) million loss benefit principally due to the restructuring of a European infrastructure transaction, as well as loss recoveries for aircraft-related transactions, during Nine Months 2007.

Profit Commission Expense

Edgar Filing: ASSURED GUARANTY LTD - Form 10-Q

Profit commissions, which are primarily related to our mortgage guaranty segment, allow the ceding company to share favorable experience on a reinsurance contract due to lower than expected losses. Expected or

Table of Contents

favorable loss development generates profit commission expense, while the inverse occurs on unfavorable loss development. Portfolio reserves are not a component of these profit commission calculations. Profit commissions for Third Quarter 2008 and Nine Months 2008 were \$(1.4) million and \$0.8 million, respectively, compared with \$1.1 million and \$3.6 million for the comparable periods in the prior year. The benefit recognized in the Third Quarter 2008 is the result of increases in losses incurred for certain transactions ceded to us and subject to profit commission. Additionally, the decrease in the Nine Month 2008 expense is also related to commutations executed in our mortgage segment.

Acquisition Costs

Acquisition costs primarily consist of ceding commissions, brokerage fees and operating expenses that are related to the acquisition of new business. Acquisition costs that vary with and are directly related to the acquisition of new business are deferred and amortized in relation to earned premium. For Third Quarter 2008 and Third Quarter 2007, acquisition costs incurred were \$19.3 million and \$10.4 million, respectively, while Nine Months 2008 and Nine Months 2007 acquisition costs incurred were \$43.0 million and \$32.1 million, respectively. These amounts are consistent with changes in net earned premium from non-derivative transactions.

Operating Expenses

For Third Quarter 2008 and Third Quarter 2007, operating expenses were \$21.6 million and \$19.9 million, respectively. Operating expenses for Nine Months 2008 were \$69.9 million, compared with \$59.4 million for Nine Months 2007. The \$1.7 million increase for Third Quarter 2008 compared with Third Quarter 2007 was mainly due to higher salaries and related employee benefits, due to staffing additions and merit increases. The \$10.5 million increase for Nine Months 2008 compared with Nine Months 2007 was mainly due to the amortization of restricted stock and stock option awards, due to new stock awards and other performance retention programs each year and the related amortization as well as the accelerated vesting of these awards for retirement eligible employees for which the expense was recognized in the first quarter 2008, as well as increases in salaries and employee related benefits due to staffing additions.

Interest Expense

For Third Quarter 2008 and Third Quarter 2007, interest expense was \$5.8 million and \$5.9 million, respectively. For Nine Months 2008 and Nine Months 2007, interest expense was \$17.5 million and \$17.7 million, respectively. Interest expense related to the issuance of our 7% Senior Notes (Senior Notes) in May 2004 was \$3.3 million in both Third Quarter 2008 and Third Quarter 2007 and \$10.0 million in both Nine Months 2008 and Nine Months 2007. Interest expense related to the issuance of our 6.40% Series A Enhanced Junior Subordinated Debentures in December 2006 was \$2.5 million in both Third Quarter 2008 and Third Quarter 2007 and \$7.4 million in both Nine Months 2008 and Nine Months 2007. In addition, Nine Months 2007 included \$0.2 million of interest expense on taxes owed.

Other Expenses

For Third Quarter 2008 and Third Quarter 2007, other expenses were \$1.5 million and \$0.6 million, respectively. For Nine Months 2008 and Nine Months 2007, other expenses were \$4.0 million and \$1.9 million, respectively. These amounts reflect the put option premiums associated

Edgar Filing: ASSURED GUARANTY LTD - Form 10-Q

with AGC's \$200.0 million committed capital securities. The increase in Third Quarter 2008 and Nine Months 2008 compared to the respective periods in 2007 was due to the increase in annualized rates from One-Month LIBOR plus 110 basis points to One-Month LIBOR plus 250 basis points as a result of the failed auction process in April 2008.

Income Tax

For Third Quarter 2008 and Third Quarter 2007, income tax benefit was \$(36.2) million and \$(59.2) million, respectively. For Nine Months 2008 and Nine Months 2007, income tax expense (benefit) was \$109.5 million and \$(52.3) million, respectively. Our effective tax rate was 36.4% and 25.9% for Third Quarter 2008 and Nine Months 2008, respectively, compared with 34.0% and 54.7% for Third Quarter 2007 and Nine Months 2007, respectively. Our effective tax rates reflect the proportion of income recognized by each of our operating subsidiaries, with U.S. subsidiaries taxed at the U.S. marginal corporate income tax rate of 35%, UK subsidiaries taxed at the UK marginal corporate tax rate of 30%, and no taxes for our Bermuda holding company and

Table of Contents

subsidiaries. Accordingly, our overall corporate effective tax rate fluctuates based on the distribution of taxable income across these jurisdictions. Third Quarter 2008 and Nine Months 2008 included \$(84.1) million and \$228.1 million, respectively, of unrealized (losses) gains on credit derivatives, the majority of which is associated with subsidiaries taxed in the U.S., compared with \$(164.2) million and \$(184.5) million, respectively, of unrealized losses on credit derivatives in Third Quarter 2007 and Nine Months 2007. Additionally, during the Third Quarter 2007, the IRS completed its audit of Assured Guaranty Overseas US Holdings Inc. and subsidiaries for the 2002 through 2004 tax years, resulting in a \$6.0 million reduction of our FIN 48 tax liability. Nine Months 2007 also included a \$4.1 million reduction of the Company's FIN 48 liability, which was reduced subsequent to adoption of FIN 48, due to final regulations on the treatment of a tax uncertainty regarding the use of consolidated losses.

Segment Results of Operations

Our financial results include four principal business segments: financial guaranty direct, financial guaranty reinsurance, mortgage guaranty and other. Management uses underwriting gains and losses as the primary measure of each segment's financial performance. Underwriting gain is calculated as net earned premiums plus realized gains and other settlements on credit derivatives less the sum of loss and loss adjustment expenses including incurred losses on credit derivatives, profit commission expense, acquisition costs and other operating expenses that are directly related to the operations of our insurance businesses. This measure excludes certain revenue and expense items, such as net investment income, realized investment gains and losses, unrealized gains and losses on credit derivatives, excluding loss reserves allocation, other income, and interest and other expenses, that are not directly related to the underwriting performance of our insurance operations, but are included in net income.

Loss and loss adjustment expense ratio, which is a non-GAAP financial measure, is defined as loss and loss adjustment expenses (recoveries) plus the Company's net estimate of credit derivative incurred case and portfolio loss and loss adjustment expense reserves, which is included in unrealized gains (losses) on credit derivatives, plus net credit derivative losses (recoveries), which is included in realized gains and other settlements on credit derivatives, divided by net earned premiums plus net credit derivative premiums received and receivable, which is included in realized gains and other settlements on credit derivatives. Expense ratio is calculated by dividing the sum of ceding commissions expense (income), profit commission expense, acquisition costs and operating expenses by net earned premiums plus net credit derivative premiums received and receivable, which is included in realized gains and other settlements on credit derivatives. Combined ratio, which is a non-GAAP financial measure, is the sum of the loss and loss adjustment expense ratio and the expense ratio.

Financial Guaranty Direct Segment

The financial guaranty direct segment consists of our primary financial guaranty insurance business and our credit derivative business. Financial guaranty insurance provides an unconditional and irrevocable guaranty that protects the holder of a financial obligation against non-payment of principal and interest when due. Financial guaranty insurance may be issued to the holders of the insured obligations at the time of issuance of those obligations, or may be issued in the secondary market to holders of public bonds and structured securities. As an alternative to traditional financial guaranty insurance, credit protection on a particular security or issuer can also be provided through a credit derivative, such as a credit default swap. Under a credit default swap, the seller of protection makes a specified payment to the buyer of protection upon the occurrence of one or more specified credit events with respect to a reference obligation or a particular reference entity. Credit derivatives typically provide protection to a buyer rather than credit enhancement of an issue as in traditional financial guaranty insurance.

Table of Contents

The table below summarizes the financial results of our financial guaranty direct segment for the periods presented:

Edgar Filing: ASSURED GUARANTY LTD - Form 10-Q

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008	2007
	(\$ in millions)

Edgar Filing: ASSURED GUARANTY LTD - Form 10-Q

Gross Written Premiums	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008	2007
	(\$ in millions)			
Public finance	\$ 52.8	\$ 33.6	\$ 367.4	\$ 90.6
Structured finance	18.6	9.5	48.2	30.3
Total	\$ 71.4	\$ 43.1	\$ 415.6	\$ 120.9

For Third Quarter 2008 the financial guaranty direct segment contributed \$71.4 million to gross written premiums, an increase of \$28.3 million, compared with \$43.1 million for Third Quarter 2007. The increase reflects our continued execution of our direct business strategy resulting in increased market share, particularly in the U.S. public finance market. Third Quarter 2008 included upfront gross written premiums of \$52.1 million from our U.S. public finance business, an increase of \$41.7 million compared to the Third Quarter 2007. Gross written premiums for Nine Months 2008 and Nine Months 2007 were \$415.9 million and \$120.9 million, respectively. Gross written premiums in our financial guaranty direct operations increased \$294.7 million for Nine Months 2008 compared with Nine Months 2007 primarily due to a \$343.2 million increase in U.S. generated business, of which \$323.9 million was from our upfront public finance business, as we continue to increase our book of business. Partially offsetting this increase was a reduction of our international infrastructure business to \$14.1 million in Nine Months 2008, compared with \$62.8 million for Nine Months 2007, as the prior included a few large infrastructure transactions.

Edgar Filing: ASSURED GUARANTY LTD - Form 10-Q

Table of Contents

Generally, gross and net written premiums from the public finance market are received upfront, while the structured finance market has been received on an installment basis. For Nine Months 2008, 88% of gross written premiums in this segment were upfront premiums and 12% were installment premiums. For Nine Months 2007, 74% of gross written premiums in this segment were upfront premiums and 26% were installment premiums.

Net Written Premiums	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008	2007
	(\$ in millions)			
Public finance	\$ 52.4	\$ 26.0	\$ 360.7	\$ 80.8
Structured finance	17.6	9.2	46.0	28.8
Total	\$ 70.0	\$ 35.1	\$ 406.7	\$ 109.6

For Third Quarter 2008 and Nine Months 2008, net written premiums were \$70.0 million and \$406.7 million, respectively, compared with \$35.1 million for Third Quarter 2007 and \$109.6 million for Nine Months 2007. The variances in net written premiums are consistent with the variances in gross written premiums as we typically retain a substantial portion of this business.

Net Earned Premiums	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008	2007
	(\$ in millions)			
Public finance	\$ 11.2	\$ 3.8	\$ 22.5	\$ 9.9
Structured finance	15.7	10.2	42.5	28.2
Total	\$ 26.9	\$ 14.1	\$ 65.0	\$ 38.1

Included in public finance direct net earned premiums are refundings of	\$	\$ 1.1	\$	\$ 2.8
---	----	--------	----	--------

Net earned premiums for Third Quarter 2008 were \$26.9 million compared with \$14.1 million for Third Quarter 2007. The increase in net earned premiums reflects our increased market penetration, which has resulted in growth of our in-force book of business. Net earned premiums for Nine Months 2008 increased \$26.9 million compared with Nine Months 2007 for the same reason. Included in Third Quarter 2007 and Nine Months 2007 financial guaranty direct net earned premiums are \$1.1 million and \$2.8 million, respectively, of public finance refundings, which reflect the unscheduled pre-payment or refundings of underlying municipal bonds. These unscheduled refundings are sensitive to market interest rates. There were no unscheduled refundings during Third Quarter and Nine Months 2008. We evaluate our net earned premiums both including and excluding these refundings.

Realized gains and other settlements on credit derivatives	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008	2007
	(\$ in millions)			
Net credit derivative premiums received and receivable	\$ 28.4	\$ 17.6	\$ 86.4	\$ 50.7
Net credit derivative losses recovered and recoverable or payable				0.1
Ceding commissions received/receivable (paid/payable), net	0.2	0.1	0.3	0.1
Total realized gains and other settlements on credit derivatives	\$ 28.6	\$ 17.8	\$ 86.7	\$ 50.9

Table of Contents

Realized gains and other settlements on credit derivatives, were \$28.6 million and \$17.8 million for Third Quarter 2008 and Third Quarter 2007, respectively, and \$86.7 million and \$50.9 million for Nine Months 2008 and Nine Months 2007, respectively, and was comprised only of net credit derivative premiums received and receivable, which represents premium income recognized attributable to CDS contracts. This increase is attributable to the increase in our direct business written in credit derivative form, as indicated by a 22% increase in par outstanding since September 30, 2007. We did not have any losses paid or payable under these contracts in either 2008 or 2007.

Loss and LAE were \$65.9 million and \$4.7 million, respectively, for Third Quarter 2008 and Third Quarter 2007, while loss and LAE were \$130.0 million and \$6.4 million for Nine Months 2008 and Nine Months 2007, respectively. Third Quarter 2008 included loss and LAE of \$52.3 million related to the direct Countrywide transactions, as well as loss and LAE of \$20.2 million for other HELOC and RMBS exposures. Third Quarter 2007 included a \$3.0 million increase in portfolio reserves due to management updating its rating agency default statistics used in the portfolio loss reserving process, based on data received during the quarter. Additionally, portfolio reserves increased \$3.1 million due to portfolio development. Case loss activity in the Third Quarter 2007 was \$0.3 million.

Nine Months 2008 included an increase in loss and LAE of \$29.8 million mainly attributable to two Closed-End Second transactions and loss and LAE of \$109.7 million mainly related to our direct HELOC exposures driven by further deterioration, including increases in delinquencies and decreases in credit enhancement. In addition to the Third Quarter 2007 increases discussed above, Nine Months 2007 included a \$1.9 million case reserve increase and a \$1.0 million portfolio reserve increase, primarily attributable to downgrades of transactions in our CMC list related to the subprime mortgage market.

Acquisition costs incurred for Third Quarter 2008 and Nine Months 2008 were \$4.0 million and \$10.1 million, respectively. For Third Quarter 2007 and Nine Months 2007 acquisition costs were \$2.5 million and \$7.7 million, respectively. The changes in acquisition costs incurred over the periods are directly related to changes in net earned premium from non-derivative transactions.

Operating expenses for Third Quarter 2008 and Third Quarter 2007 were \$15.4 million and \$15.1 million, respectively. The increase for the quarter is due to higher salaries and related employee benefits, due to staffing additions and merit increases. Operating expenses for Nine Months 2008 were \$51.9 million, compared with \$45.5 million for Nine Months 2007. The increase in operating expenses for the nine months is mainly due to the amortization of restricted stock and stock option awards, due to new stock awards and other performance retention programs each year and the related amortization as well as the accelerated vesting of these awards for retirement eligible employees, as well as staffing additions.

Financial Guaranty Reinsurance Segment

In our financial guaranty reinsurance business, we assume all or a portion of risk undertaken by other insurance companies that provide financial guaranty protection. The financial guaranty reinsurance business consists of public finance and structured finance reinsurance lines. Premiums on public finance are typically written upfront and earned over the life of the policy, and premiums on structured finance are typically written on an installment basis and earned ratably over the installment period.

Table of Contents

The table below summarizes the financial results of our financial guaranty reinsurance segment for the periods presented:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008	2007
	(\$ in millions)			
Gross written premiums	\$ 41.2	\$ 23.8	\$ 114.6	\$ 68.0
Net written premiums	41.2	23.8	114.4	67.8
Net earned premiums	57.4	21.6	114.8	67.2
Realized gains and other settlements on credit derivatives:				
Net credit derivative premiums received and receivable	2.1		3.4	
Net credit derivative losses recovered and recoverable				
Ceding commissions (expense) income, net	(0.7)		(1.1)	
Total realized gains and other settlements on credit derivatives	1.4		2.3	
Loss and loss adjustment expenses (recoveries)	15.5	(3.4)	46.0	(19.2)
Incurred losses on credit derivatives				
Total loss and loss adjustment expenses (recoveries)	15.5	(3.4)	46.0	(19.2)

Combined ratio	59.6%	44.2%	81.3%	29.5%

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008	2007
	(\$ in millions)			
Gross Written Premiums				
Public finance	\$ 36.0	\$ 18.6	\$ 86.9	\$ 50.8
Structured finance	5.2	5.2	27.7	17.2
Total	\$ 41.2	\$ 23.8	\$ 114.6	\$ 68.0

Gross written premiums for our financial guaranty reinsurance segment include upfront premiums on transactions underwritten during the period, plus installment premiums on business primarily underwritten in prior periods. Consequently, this amount is affected by changes in the business mix between public finance and structured finance. For Nine Months 2008, 64% of gross written premiums in this segment were upfront premiums and 36% were installment premiums. For Nine Months 2007, 60% of gross written premiums in this segment were upfront premiums and 40% were installment premiums.

Gross written premiums for Third Quarter 2008 were \$41.2 million, an increase of \$17.4 million, compared with \$23.8 million for Third Quarter 2007, while gross written premiums for Nine Months 2008 were \$114.6 million, an increase of \$46.6 million, compared with \$68.0 million for Nine Months 2007. The increase in the Third Quarter 2008 is mainly a result of a new portfolio assumed from one of our cedants which contributed \$48.3 million of written premium, offset by negative written premium of \$20.8 million due to the commutation of

Table of Contents

XLFA business. The increase for Nine Months 2008 is also attributable to increased premiums from facultative cessions, including \$14.8 million of premium as a result of a portfolio assumption executed during Second Quarter 2008.

The following table summarizes the Company's gross written premiums by type of contract:

Gross Written Premiums	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008	2007
	(\$ in millions)			
Treaty	\$ 0.4	\$ 15.8	\$ 30.1	\$ 46.9
Facultative	40.8	8.0	84.5	21.1
Total	\$ 41.2	\$ 23.8	\$ 114.6	\$ 68.0

The following table summarizes the Company's gross written premiums by significant client:

Gross Written Premiums by Client(1)	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008	2007
	(\$ in millions)			
Financial Security Assurance Inc	\$ 50.9	\$ 14.8	\$ 89.8	\$ 37.8
Ambac Assurance Corporation(2)	7.9	2.6	20.0	9.4
Financial Guaranty Insurance Company	1.9	2.5	19.8	7.3
MBIA Insurance Corporation	1.5	2.0	5.0	6.0
XL Capital Assurance Ltd.(3)	(21.0)	1.8	(20.2)	7.4

(1) Excludes credit derivative gross written premiums.

(2) In December 2007, the Company's reinsurance subsidiary, AG Re, reinsured a diversified portfolio of financial guaranty contracts totaling approximately \$29 billion of net par outstanding from Ambac.

(3) Effective July 25, 2008, AG Re commuted its \$2.1 billion portfolio of business assumed from XLFA, for a payment of \$18.0 million, which included returning \$14.6 million of unearned premium, net of ceding commissions, and loss reserves of \$5.2 million, resulting in a net gain to the Company of \$1.8 million

Net Written Premiums	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008	2007
	(\$ in millions)			
Public finance	\$ 36.0	\$ 18.6	\$ 86.7	\$ 50.6
Structured finance	5.2	5.2	27.7	17.2
Total	\$ 41.2	\$ 23.8	\$ 114.4	\$ 67.8

For Third Quarter 2008 and Nine Months 2008, net written premiums were \$41.2 million and \$114.4 million, respectively, compared with \$23.8 million and \$67.8 million, respectively, for the same periods last year. The changes in all periods are consistent with the changes in gross written premiums because, to date, we have not retroceded a significant amount of premium to external reinsurers.

Table of Contents

Net Earned Premiums	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008	2007
	(\$ in millions)			
Public finance	\$ 47.6	\$ 15.4	\$ 83.7	\$ 48.3
Structured finance	9.8	6.2	31.1	18.9
Total	\$ 57.4	\$ 21.6	\$ 114.8	\$ 67.2
Included in public finance reinsurance net earned premiums are refundings of	\$ 31.7	\$ 3.5	\$ 36.2	\$ 13.1

Net earned premiums for Third Quarter 2008 and Nine Months 2008 were \$57.4 million and \$114.8 million, respectively, compared with \$21.6 million and \$67.2 million for Third Quarter 2007 and Nine Months 2007, respectively. Public finance net earned premiums also include refundings, which reflect the unscheduled pre-payment or refundings of underlying municipal bonds. These unscheduled refundings, which were \$31.7 million and \$36.2 million for Third Quarter 2008 and Nine Months 2008, respectively, compared with \$3.5 million and \$13.1 million, respectively, for the same periods last year, are sensitive to market interest rates. This increase is primarily a result of greater refundings of municipal auction rate and variable rate debt as reported by one of our ceding companies. Excluding refundings, net earned premiums increased \$7.6 million and \$24.5 million in the three and nine months ended September 30, 2008 compared with 2007, due primarily to the portfolio assumed from Ambac in December 2007, which contributed \$7.4 million and \$22.7 million to net earned premiums in Third Quarter 2008 and Nine Months 2008, respectively.

Realized gains and other settlements on credit derivatives	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008	2007
	(\$ in millions)			
Net credit derivative premiums received and receivable	\$ 2.1	\$	\$ 3.4	\$
Net credit derivative losses recovered and recoverable or payable				
Ceding commissions (paid/payable) received/receivable, net	(0.7)		(1.1)	
Total realized gains and other settlements on credit derivatives	\$ 1.4	\$	\$ 2.3	\$

Realized gains and other settlements on credit derivatives, were \$1.4 million and \$0 million for Third Quarter 2008 and Third Quarter 2007, respectively, and \$2.3 million and \$0 million for Nine Months 2008 and Nine Months 2007, respectively. Net credit derivative premiums received and receivable, which represents premium income recognized attributable to CDS contracts, and related ceding commission expense, increased based on amounts reported to us by our cedants. We did not have any losses paid or payable under these contracts in either the three and nine months ended September 30, 2008 and 2007.

Loss and LAE were \$15.5 million and \$(3.4) million for Third Quarter 2008 and Third Quarter 2007, respectively. Third Quarter 2008 loss and LAE was mainly related to our assumed HELOC exposures. During Third Quarter 2007 we had a net portfolio reserve release of \$3.6 million related to the establishment of a case reserve, based on information reported to us by the ceding company, for an aircraft-related structured finance transaction written prior to the IPO. Additionally, there was an increase in portfolio reserves of \$2.9 million due to the updating of rating agency default statistics, based on data received during the quarter, offset by reserve releases due to run-off and loss recoveries for aircraft-related transactions.

Edgar Filing: ASSURED GUARANTY LTD - Form 10-Q

Loss and LAE were \$46.0 million and \$(19.2) million for Nine Months 2008 and Nine Months 2007, respectively. Nine Months 2008 included \$42.5 million of loss and LAE related to our assumed U.S. Subprime RMBS and HELOC exposures. In addition to Third Quarter 2007 activity discussed above, the financial guaranty reinsurance segment had \$(15.8) million of incurred losses principally due to the restructuring of a European infrastructure transaction, as well as loss recoveries for aircraft-related transactions during Nine Months 2007.

Table of Contents

Profit commission expense was \$(1.5) million in Third Quarter 2008 compared to \$0.8 million in Third Quarter 2007, and \$0.5 million in Nine Months 2008 compared to \$2.2 million in Nine Months 2007. The decrease in Third Quarter 2008 and Nine Months 2008 is primarily related to amounts reported by our ceding companies, which reflects increases in reported loss and LAE for transactions subject to profit commission. Nine Months 2007 included a \$0.5 million release of profit commission reserves based on updated information received from cedants.

For Third Quarter 2008 and Third Quarter 2007, acquisition costs incurred were \$15.1 million and \$7.7 million, respectively, while acquisition costs incurred were \$32.5 million for Nine Months 2008 compared with \$24.0 million for Nine Months 2007. The changes in acquisition costs incurred over the periods are directly related to changes in net earned premiums from non-derivative transactions and also reflect a decrease in negotiated ceding commission rates for transactions executed in recent years.

Operating expenses for Third Quarter 2008 and Third Quarter 2007 were \$5.6 million and \$4.5 million, respectively. The increase for the quarter is due to higher salaries and related employee benefits, due to staffing additions and merit increases. Operating expenses for Nine Months 2008 were \$16.0 million, compared with \$12.8 million for Nine Months 2007. The increase in operating expenses for the nine month period is mainly due to the increase in first quarter 2008 amortization of restricted stock and stock option awards, primarily due to the amortization of restricted stock and stock option awards, due to new stock awards and other performance retention programs each year and the related amortization as well as the accelerated vesting of these awards for retirement eligible employees, as well as staffing additions.

Mortgage Guaranty Segment

Mortgage guaranty insurance provides protection to mortgage lending institutions against the default of borrowers on mortgage loans that, at the time of the advance, had a loan-to-value ratio in excess of a specified ratio. We primarily function as a reinsurer in this industry and assume all or a portion of the risks undertaken by primary mortgage insurers.

The table below summarizes the financial results of our mortgage guaranty segment for the periods presented:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008	2007
	(\$ in millions)			
Gross written premiums	\$ 0.2	\$ 1.4	\$ 0.7	\$ 2.9
Net written premiums	0.2	1.4	0.7	2.9
Net earned premiums	1.2	2.9	4.4	8.3
Loss and loss adjustment expenses	1.0	0.8	1.1	1.0
Profit commission expense	0.1	0.4	0.3	1.5
Acquisition costs	0.1	0.2	0.3	0.4
Operating expenses	0.5	0.3	1.9	1.0
Underwriting (loss) gain	\$ (0.5)	\$ 1.3	\$ 0.8	\$ 4.4
Loss and loss adjustment expense ratio	81.0%	26.5%	25.0%	11.7%
Expense ratio	59.3%	27.5%	57.5%	34.5%

Edgar Filing: ASSURED GUARANTY LTD - Form 10-Q

Combined ratio	140.3%	54.0%	82.5%	46.2%
----------------	--------	-------	-------	-------

Gross written premiums for Third Quarter 2008 and Nine Months 2008 were \$0.2 million and \$0.7 million, respectively, compared with \$1.4 million and \$2.9 million for the comparable periods in 2007. The decrease in gross written premiums for both periods is primarily related to the run-off of our quota share treaty business as well as commutations executed in the latter part of 2007.

Table of Contents

Net written premiums for Third Quarter 2008 and Nine Months 2008 were \$0.2 million and \$0.7 million, respectively, compared with \$1.4 million and \$1.9 million for the comparable periods in 2007. This is consistent with gross written premiums, as we do not cede a significant amount of our mortgage guaranty business.

For Third Quarter 2008 and Third Quarter 2007, net earned premiums were \$1.2 million and \$2.9 million, respectively. For Nine Months 2008 net earned premiums were \$4.4 million compared with \$8.3 million for Nine Months 2007. The decrease in net earned premiums for both periods reflects the run-off of our quota share treaty business as well as commutations executed in the latter part of 2007.

Loss and LAE were \$1.0 million and \$0.8 million for Third Quarter 2008 and Third Quarter 2007, respectively. Loss and LAE for Nine Months 2008 and Nine Months 2007 were \$1.1 million and \$1.0 million, respectively. Third Quarter 2008 included \$1.0 million of LAE related to one transaction in arbitration (refer to Commitments and Contingencies for further discussion). During Third Quarter 2007 portfolio reserves increased by \$0.9 million, primarily due to the annual updating of rating agency default statistics as part of the portfolio reserve process.

Profit commission expense for Third Quarter 2008 and Third Quarter 2007 was \$0.1 million and \$0.4 million, respectively. For Nine Months 2008 profit commission expense decreased to \$0.3 million, compared with \$1.5 million for Nine Months 2007. The decrease in profit commission expense for 2008 compared with 2007 is primarily due to the run-off of mortgage guaranty experience rated quota share treaties, which have a large profit commission component.

Acquisition costs incurred for Third Quarter 2008 and Third Quarter 2007 were \$0.1 million and \$0.2 million, respectively. Acquisition costs for Nine Months 2008 and Nine Months 2007 were \$0.3 million and \$0.4 million, respectively.

Operating expenses for Third Quarter 2008 and Third Quarter 2007 were \$0.5 million and \$0.3 million, respectively, while for Nine Months 2008 they were \$1.9 million compared with \$1.0 million for Nine Months 2007. The increase for the quarter is due to higher salaries and related employee benefits, due to staffing additions and merit increases. The increase in operating expenses for the nine month period is mainly due to the increase in amortization of restricted stock and stock option awards, due to new stock awards and other performance retention programs each year and the related amortization as well as the accelerated vesting of these awards for retirement eligible employees, as well as staffing additions.

Other Segment

The other segment represents lines of business that we exited or sold as part of our 2004 IPO.

The other segment had no earned premiums during 2008 or 2007. During Nine Months 2008 and Nine Months 2007, due to loss recoveries the other segment generated \$1.9 million and \$1.3 million of underwriting gain, respectively. There were no loss recoveries in Third Quarter 2008 and Third Quarter 2007.

Liquidity and Capital Resources

Our liquidity, both on a short-term basis (for the next twelve months) and a long-term basis (beyond the next twelve months), is largely dependent upon: (1) the ability of our operating subsidiaries to pay dividends or make other payments to us, (2) external financings and (3) net investment income from our invested assets. Our liquidity requirements include the payment of our operating expenses, interest on our debt, and dividends on our common shares. We may also require liquidity to make periodic capital investments in our operating subsidiaries. In the ordinary course of our business, we evaluate our liquidity needs and capital resources in light of holding company expenses, debt-related expenses and our dividend policy, as well as rating agency considerations. Based on the amount of dividends we expect to receive from our subsidiaries and the income we expect to receive from our invested assets, management believes that we will have sufficient liquidity to satisfy our needs over the next twelve months, including the ability to pay dividends on our common shares. Total cash paid in Nine Months 2008 and

Table of Contents

Nine Months 2007 for dividends to shareholders was \$11.9 million, or \$0.135 per common share, and \$8.3 million, or \$0.12 per common share, respectively. Beyond the next twelve months, the ability of our operating subsidiaries to declare and pay dividends may be influenced by a variety of factors including market conditions, insurance and rating agencies regulations and general economic conditions. Consequently, although management believes that we will continue to have sufficient liquidity to meet our debt service and other obligations over the long term, it remains possible that we may be required to seek external debt or equity financing in order to meet our operating expenses, debt service obligations or pay dividends on our common shares. These external sources of financing may or may not be available to us, and if available, the costs of such financing may be higher than our current levels.

We anticipate that a major source of our liquidity, for the next twelve months and for the longer term, will be amounts paid by our operating subsidiaries as dividends. Certain of our operating subsidiaries are subject to restrictions on their ability to pay dividends. See

Business Regulation. The amount available at AGC to pay dividends in 2008 with notice to, but without the prior approval of, the Maryland Insurance Commissioner is approximately \$40.0 million. Dividends paid by a U.S. company to a Bermuda holding company presently are subject to a 30% withholding tax. The amount available at AG Re to pay dividends or make a distribution of contributed surplus in 2008 in compliance with Bermuda law is \$1,001.4 million. However, any distribution which results in a reduction of 15% or more of AG Re's total statutory capital, as set out in its previous years financial statements, would require the prior approval of the Bermuda Monetary Authority.

Liquidity at our operating subsidiaries is used to pay operating expenses, claims, payment obligations with respect to credit derivatives, reinsurance premiums and dividends to AGUS for debt service and dividends to us, as well as, where appropriate, to make capital investments in their own subsidiaries. In addition, certain of our operating companies may be required to post collateral in connection with credit derivatives and reinsurance transactions. Management believes that these subsidiaries' operating needs generally can be met from operating cash flow, including gross written premium and investment income from their respective investment portfolios.

Net cash flows provided by operating activities were \$369.9 million and \$187.4 million during Nine Months 2008 and Nine Months 2007, respectively. The increase in Nine Months 2008 cash flows provided by operating activities compared with Nine Months 2007 was due to the large proportion of upfront premiums received in our financial guaranty direct segment due to growth in our U.S. public finance business.

Net cash flows used in investing activities were \$603.0 million and \$152.9 million during Nine Months 2008 and Nine Months 2007, respectively. These investing activities consist of net purchases and sales of fixed maturity securities and short-term investments. The increase in 2008 was due to purchases of fixed maturity securities with the cash generated from positive cash flows from operating activities and capital received from the equity offerings in April 2008 and December 2007.

Net cash flows provided by (used in) financing activities were \$233.4 million and \$(14.8) million during Nine Months 2008 and Nine Months 2007, respectively. On April 8, 2008, investment funds managed by WL Ross & Co. LLC ("WL Ross") purchased 10,651,896 shares of the Company's common equity at a price of \$23.47 per share, resulting in proceeds to the Company of \$250.0 million. The Company contributed \$150.0 million of these proceeds to its subsidiary, AG Re. In addition, the Company contributed \$100.0 million of these proceeds to its subsidiary, Assured Guaranty US Holdings Inc., which in turn contributed the same amount to its subsidiary, AGC. The commitment to purchase these shares was previously announced on February 29, 2008. WL Ross has a remaining commitment through April 8, 2009 to purchase up to \$750.0 million of the Company's common equity, at the Company's option, subject to the terms and conditions of the investment agreement with the Company dated February 28, 2008. In accordance with the investment agreement, the Company may exercise this option in one or more drawdowns, subject to a minimum drawdown of \$50 million, provided that the purchase price per common share for the subsequent shares is not greater than 17.5% above, or less than 17.5% below, the price per common share for the initial shares. The purchase price per common share for such shares will be equal to 97% of the volume weighted average price of a common share on the NYSE for the 15 NYSE trading days prior to the applicable drawdown notice. As of September 30, 2008, and as of the date of this filing, the purchase price per common share is outside of this range and therefore the Company may not, at this time, exercise its option for WL Ross to purchase additional shares.

Additionally, in accordance with the investment agreement, at this time the ratings of AGC and

Table of Contents

AG Re are not stable and therefore the Company may not exercise its option for WL Ross to purchase additional shares.

During Nine Months 2008 we paid \$11.9 million in dividends, \$3.6 million, net, under our option and incentive plans and \$1.0 million for offering costs incurred in connection with the December 2007 equity offering and issuance of common shares to WL Ross. During Nine Months 2007 we paid \$8.3 million in dividends, \$2.5 million, net, under our option and incentive plans and \$0.4 million in debt issue costs related to \$150.0 million of Series A Enhanced Junior Subordinated Debentures issued in December 2006. In addition, during nine Months 2007 we paid \$3.7 million to repurchase 0.2 million shares of our Common Stock under our 1.0 million common shares repurchased program which was approved by the Company's Board of Directors on May 4, 2006.

In June 2008, the Company's subsidiary, Assured Guaranty Corp., entered into a new five-year lease agreement for New York office space. Future minimum annual payments of \$5.3 million for the first twelve month period and \$5.7 million for subsequent twelve month periods will commence October 1, 2008 and are subject to escalation in building operating costs and real estate taxes.

As of September 30, 2008 our future cash payments associated with other contractual obligations have not materially changed since December 31, 2007.

Credit Facilities

2006 Credit Facility

On November 6, 2006, Assured Guaranty Ltd. and certain of its subsidiaries entered into a \$300.0 million five-year unsecured revolving credit facility (the 2006 credit facility) with a syndicate of banks, for which ABN AMRO Incorporated and Bank of America Securities LLC acted as lead arrangers. Under the 2006 credit facility, each of AGC, Assured Guaranty (UK) Ltd. (AG (UK)), AG Re, AGRO and Assured Guaranty Ltd. are entitled to request the banks to make loans to such borrower or to request that letters of credit be issued for the account of such borrower.

Of the \$300.0 million available to be borrowed, no more than \$100.0 million may be borrowed by Assured Guaranty Ltd., AG Re or AGRO, individually or in the aggregate, and no more than \$20.0 million may be borrowed by AG (UK). The stated amount of all outstanding letters of credit and the amount of all unpaid drawings in respect of all letters of credit cannot, in the aggregate, exceed \$100.0 million.

The 2006 credit facility also provides that Assured Guaranty Ltd. may request that the commitment of the banks be increased an additional \$100.0 million up to a maximum aggregate amount of \$400.0 million. Any such incremental commitment increase is subject to certain conditions provided in the agreement and must be for at least \$25.0 million.

Edgar Filing: ASSURED GUARANTY LTD - Form 10-Q

The proceeds of the loans and letters of credit are to be used for the working capital and other general corporate purposes of the borrowers and to support reinsurance transactions.

At the closing of the 2006 credit facility, (i) AGC guaranteed the obligations of AG (UK) under such facility, (ii) Assured Guaranty Ltd. guaranteed the obligations of AG Re and AGRO under such facility and agreed that, if the Company Consolidated Assets (as defined in the related credit agreement) of AGC and its subsidiaries were to fall below \$1.2 billion, it would, within 15 days, guarantee the obligations of AGC and AG (UK) under such facility, (iii) Assured Guaranty Overseas US Holdings Inc. guaranteed the obligations of Assured Guaranty Ltd., AG Re and AGRO under such facility and (iv) Each of AG Re and AGRO guarantees the other as well as Assured Guaranty Ltd.

The 2006 credit facility's financial covenants require that Assured Guaranty Ltd. (a) maintain a minimum net worth of seventy-five percent (75%) of the Consolidated Net Worth of Assured Guaranty Ltd. as of the most recent fiscal quarter of Assured Guaranty Ltd. prior to November 6, 2006 and (b) maintain a maximum debt-to-capital ratio of 30%. In addition, the 2006 credit facility requires that AGC maintain qualified statutory capital of at least 75% of its statutory capital as of the fiscal quarter prior to November 6, 2006. Furthermore, the 2006 credit

Table of Contents

facility contains restrictions on Assured Guaranty Ltd. and its subsidiaries, including, among other things, in respect of their ability to incur debt, permit liens, become liable in respect of guaranties, make loans or investments, pay dividends or make distributions, dissolve or become party to a merger, consolidation or acquisition, dispose of assets or enter into affiliate transactions. Most of these restrictions are subject to certain minimum thresholds and exceptions. The 2006 credit facility has customary events of default, including (subject to certain materiality thresholds and grace periods) payment default, failure to comply with covenants, material inaccuracy of representation or warranty, bankruptcy or insolvency proceedings, change of control and cross default to other debt agreements. A default by one borrower will give rise to a right of the lenders to terminate the facility and accelerate all amounts then outstanding. As of September 30, 2008 and December 31, 2007, Assured Guaranty was in compliance with all of those financial covenants.

As of September 30, 2008 and December 31, 2007, no amounts were outstanding under this facility nor have there been any borrowings under this facility.

The 2006 credit facility replaced a \$300.0 million three-year credit facility. Letters of credit for a total aggregate stated amount of approximately \$2.9 million remained outstanding as of September 30, 2008. No letters of credit were outstanding as of December 31, 2007.

Non-Recourse Credit Facilities

AG Re Credit Facility

On July 31, 2007 AG Re entered into a non-recourse credit facility (AG Re Credit Facility) with a syndicate of banks which provides up to \$200.0 million to satisfy certain reinsurance agreements and obligations. The AG Re Credit Facility expires in July 2014.

The AG Re Credit Facility does not contain any financial covenants. The AG Re Credit Facility has customary events of default, including (subject to certain materiality thresholds and grace periods) payment default, failure to comply with covenants, material inaccuracy of representation or warranty, bankruptcy or insolvency proceedings, change of control and cross default to other debt agreements. If any such event of default were triggered, AG Re could be required to repay potential outstanding borrowings in an accelerated manner.

AG Re's obligations to make payments of principal and interest on loans under the AG Re Credit Facility, whether at maturity, upon acceleration or otherwise, are limited recourse obligations of AG Re and are payable solely from the collateral securing the AG Re Credit Facility, including recoveries with respect to certain insured obligations in a designated portfolio, premiums with respect to defaulted insured obligations in that portfolio, certain designated reserves and other designated collateral.

As of September 30, 2008 and December 31, 2007, no amounts were outstanding under this facility nor have there been any borrowings under the life of this facility.

Committed Capital Securities

On April 8, 2005, AGC entered into separate agreements (the Put Agreements) with each of Woodbourne Capital Trust I, Woodbourne Capital Trust II, Woodbourne Capital Trust III and Woodbourne Capital Trust IV (each, a Custodial Trust) pursuant to which AGC may, at its option, cause each of the Custodial Trusts to purchase up to \$50,000,000 of perpetual preferred stock of AGC (the AGC Preferred Stock).

Structure

Each of the Custodial Trusts is a newly organized Delaware statutory trust formed for the purpose of (i) issuing a series of flex committed capital securities (the CCS Securities) representing undivided beneficial interests in the assets of such Custodial Trust; (ii) investing the proceeds from the issuance of the CCS Securities or any redemption in full of AGC Preferred Stock in a portfolio of high-grade commercial paper and (in limited cases)

Table of Contents

U.S. Treasury Securities (the Eligible Assets), (iii) entering into the Put Agreement with AGC; and (iv) entering into related agreements.

Initially, all of the CCS Securities were issued to a special purpose pass-through trust (the Pass-Through Trust). The Pass-Through Trust was dissolved in April 2008 and the committed capital securities were distributed to the holders of the Pass-Through Trust's securities. Neither the Pass-Through Trust nor the Custodial Trusts are consolidated in Assured Guaranty's financial statements.

Income distributions on the Pass-Through Trust Securities and CCS Securities were equal to an annualized rate of One-Month LIBOR plus 110 basis points for all periods ending on or prior to April 8, 2008. Following dissolution of the Pass-Through Trust, distributions on the CCS Securities will be determined pursuant to an auction process. On April 7, 2008 this auction process failed, thereby increasing the annualized rate on the CCS Securities to One-Month LIBOR plus 250 basis points. Distributions on the AGC Preferred Stock will be determined pursuant to the same process or, if the Company so elects upon the dissolution of the Custodial Trusts at a fixed rate equal to One-Month LIBOR plus 250 basis points (based on the then current 30-year swap rate).

Put Agreement

Pursuant to the Put Agreement, AGC will pay a monthly put premium to each Custodial Trust except (1) during any period when the AGC Preferred Stock that has been put to a Custodial Trust is held by that Custodial Trust or (2) upon termination of the Put Agreement. The put premium will equal the product of (A) the applicable distribution rate on the CCS Securities for the respective distribution period less the excess of (i) the Custodial Trust's stated return on the Eligible Assets for such distribution period (including any fees and expenses of the Pass-Through Trust) (expressed as an annual rate) over (ii) the expenses of the Custodial Trust for such distribution period (expressed as an annual rate), (B) the aggregate face amount of the CCS Securities of the Custodial Trust outstanding on the date the put premium is calculated, and (C) a fraction, the numerator of which will be the actual number of days in such distribution period and the denominator of which will be 360. In addition, and as a condition to exercising the put option under a Put Agreement, AGC is required to enter into a Custodial Trust Expense Reimbursement Agreement with the respective Custodial Trust pursuant to which AGC agrees it will pay the fees and expenses of the Custodial Trust (which includes the fees and expenses of the Pass-Through Trust) during the period when such Custodial Trust holds AGC Preferred Stock.

Upon exercise of the put option granted to AGC pursuant to the Put Agreement, a Custodial Trust will liquidate its portfolio of Eligible Assets and purchase the AGC Preferred Stock and will hold the AGC Preferred Stock until the earlier of (i) the redemption of such AGC Preferred Stock and (ii) the liquidation or dissolution of the Custodial Trust.

Each Put Agreement has no scheduled termination date or maturity, however, it will terminate if (1) AGC fails to pay the put premium in accordance with the Put Agreement, and such failure continues for five business days, (2) AGC elects to have the AGC Preferred Stock bear a fixed rate dividend (a Fixed Rate Distribution Event), (3) AGC fails to pay (i) dividends on the AGC Preferred Stock, or (ii) the fees and expenses of the Custodial Trust, for the related dividend period, and such failure continues for five business days, (4) AGC fails to pay the redemption price of the AGC Preferred Stock and such failure continues for five business days, (5) the face amount of a Custodial Trust's CCS Securities is less than \$20,000,000, (6) AGC elects to terminate the Put Agreement, or (7) a decree of judicial dissolution of the Custodial Trust is entered. If, as a result of AGC's failure to pay the put premium, the Custodial Trust is liquidated, AGC will be required to pay a termination payment which will be distributed to the holders of the Pass-Through Trust Securities. The termination payment will be at a rate equal to 1.10% per annum of the amount invested in Eligible Assets calculated from the date of the failure to pay the put premium through the end of the

applicable period.

As of September 30, 2008 and December 31, 2007, the put option had not been exercised.

AGC Preferred Stock

AGC Preferred Stock under the Put Agreement will be issued in one or more series, with each series in an aggregate liquidation preference amount equal to the aggregate face amount of a Custodial Trust's outstanding CCS Securities, net of fees and expenses, upon exercise of the put option. Unless redeemed by AGC, the AGC Preferred Stock will be perpetual.

Table of Contents

For each distribution period, holders of the outstanding AGC Preferred Stock of any series, in preference to the holders of common stock and of any other class of shares ranking junior to the AGC Preferred Stock, will be entitled to receive out of any funds legally available therefore when, as and if declared by the Board of Directors of AGC or a duly authorized committee thereof, cash dividends at a rate per share equal to the dividends rate for such series of AGC Preferred Stock for the respective distribution period. Prior to a Fixed Rate Distribution Event, the dividend rate on the AGC Preferred Stock will be equal to the distribution rate on the CCS Securities. The Custodial Trust's expenses (including any expenses of the Pass-Through Trust) for the period will be paid separately by AGC pursuant to the Custodial Trust Expense Reimbursement Agreement.

Upon a Fixed Rate Distribution Event, the distribution rate on the AGC Preferred Stock will equal the fixed rate equivalent of one-month LIBOR plus 2.50%. A Fixed Rate Distribution Event will be deemed to have occurred when AGC Preferred Stock is outstanding, if: (1) AGC elects to have the AGC Preferred Stock bear dividends at a fixed rate, (2) AGC fails to pay dividends on the AGC Preferred Stock for the related distribution period and such failure continues for five business days or (3) AGC fails to pay the fees and expenses of the Custodial Trust for the related distribution period pursuant to the Custodial Trust Expense Reimbursement Agreement and such failure continues for five business days.

During the period in which AGC Preferred Stock is held by a Custodial Trust and unless a Fixed Rate Distribution Event has occurred, dividends will be paid every 49 days. Following a Fixed Rate Distribution Event, dividends will be paid every 90 days.

Following exercise of the put option during any Flexed Rate Period, AGC may redeem the AGC Preferred Stock held by a Custodial Trust in whole and not in part on any distribution payment date by paying a redemption price to such Custodial Trust in an amount equal to the liquidation preference amount of the AGC Preferred Stock (plus any accrued but unpaid dividends on the AGC Preferred Stock for the then current distribution period). If AGC redeems the AGC Preferred Stock held by a Custodial Trust, the Custodial Trust will reinvest the redemption proceeds in Eligible Assets and, in accordance with the Put Agreement, AGC will pay the put premium to the Custodial Trust. If the AGC Preferred Stock was distributed to holders of CCS Securities during any Flexed Rate Period then AGC may not redeem the AGC Preferred Stock until the end of such period.

Following exercise of the put option AGC Preferred Stock held by a Custodial Trust in whole or in part on any distribution payment date by paying a redemption price to the Custodial Trust in an amount equal to the liquidation preference amount of the AGC Preferred Stock to be redeemed (plus any accrued but unpaid dividends on such AGC Preferred Stock for the then current distribution period). If AGC partially redeems the AGC Preferred Stock held by a Custodial Trust, the redemption proceeds will be distributed pro rata to the holders of the CCS Securities (and a corresponding reduction in the aggregate face amount of CCS Securities); provided that AGC must redeem all of the AGC Preferred Stock if after giving effect to a partial redemption, the aggregate liquidation preference amount of the AGC Preferred Stock held by such Custodial Trust immediately following such redemption would be less than \$20,000,000. If a Fixed Rate Distribution Event occurs, AGC may not redeem the AGC Preferred Stock for a period of two years from the date of such Fixed Rate Distribution Event.

Investment Portfolio

Edgar Filing: ASSURED GUARANTY LTD - Form 10-Q

Our investment portfolio consisted of \$3,160.6 million of fixed maturity securities, \$370.1 million of short-term investments and a duration of 4.7 years as of September 30, 2008, compared with \$2,587.0 million of fixed maturity securities, \$552.9 million of short-term investments and a duration of 3.9 years as of December 31, 2007. Our fixed maturity securities are designated as available-for-sale in accordance with FAS No. 115 Accounting for Certain Investments in Debt and Equity Securities (FAS 115). Fixed maturity securities are reported at their fair value in accordance with FAS 115, and the change in fair value is reported as part of accumulated other comprehensive income. If we believe the decline in fair value is other than temporary, we write down the carrying value of the investment and record a realized loss in our statement of operations.

Fair value of the fixed maturity securities is based upon market prices provided by either independent pricing services or, when such prices are not available, by reference to broker or underwriter bid indications. Our

Edgar Filing: ASSURED GUARANTY LTD - Form 10-Q

Table of Contents

investment portfolio does not include any non-publicly traded securities. For a detailed description of our valuation of investments see Critical Accounting Estimates.

We review our investment portfolio for possible impairment losses. For additional information, see Critical Accounting Estimates.

The following table summarizes the ratings distributions of our investment portfolio as of September 30, 2008 and December 31, 2007. Ratings are represented by the lower of the Moody's Investors Service and Standard & Poor's Inc., a division of The McGraw-Hill Companies, Inc., classifications.

	As of September 30, 2008	As of December 31, 2007
AAA or equivalent	64.7%	79.9%
AA	23.7%	15.6%
A	11.5%	4.5%
BBB(1)		
Below investment grade(2)		
Total(3)	100.0%	100.0%

(1) Represents \$1.5 million, or less than 0.1%, of the investment portfolio at September 30, 2008.

(2) Represents \$1.3 million, or less than 0.1%, of the investment portfolio at September 30, 2008.

(3) Total may not add due to rounding.

As of September 30, 2008 and December 31, 2007, our investment portfolio contained three securities that were not rated or rated below investment grade. The change in the rating distributions reflected above is mainly the result of downgrades of certain financial guaranty insurance companies during the Second Quarter 2008. As of September 30, 2008 and December 31, 2007, the weighted average credit quality of our entire investment portfolio was AA+ and AAA, respectively.

As of September 30, 2008, \$636.3 million of the Company's \$3,160.6 million of fixed maturity securities were guaranteed by third parties. The following table presents the credit rating of these \$636.3 million of securities without the third-party guaranty:

Rating	Amount (in millions)
AAA	\$
AA	367.1
A	246.1
BBB	8.5
Not Available	14.6
Total	\$ 636.3

Edgar Filing: ASSURED GUARANTY LTD - Form 10-Q

As of September 30, 2008, the distribution by third-party guarantor of the \$636.3 million is presented in the following table:

Guarantor	Amount (in millions)	
Ambac	\$	186.3
MBIA		166.0
FSA		145.9
FGIC		138.1
Total	\$	636.3

Table of Contents

As of September 30, 2008 and to date, the Company has had no investments in or asset positions with any of these guarantors.

Short-term investments include securities with maturity dates equal to or less than one year from the original issue date. Our short-term investments are composed of money market funds, discounted notes and certain time deposits for foreign cash portfolios. Short-term investments are reported at fair value.

Under agreements with our cedants and in accordance with statutory requirements, we maintain fixed maturity securities in trust accounts for the benefit of reinsured companies and for the protection of policyholders, generally in states where we or our subsidiaries, as applicable, are not licensed or accredited. The carrying value of such restricted balances as of September 30, 2008 and December 31, 2007 was \$1,019.0 million and \$936.0 million, respectively.

Credit Risk

The recent credit crisis and related turmoil in the global financial system has had and may continue to have an impact on our business. On September 15, 2008, Lehman Brothers Holdings Inc. filed for protection under Chapter 11 of the United States Bankruptcy Code in the United States Bankruptcy Court in the Southern District of New York. As of September 30, 2008, we had CDS contracts outstanding with Lehman Brothers International (Europe), a subsidiary of Lehman Brothers Holdings Inc., with future installment payments totaling \$93.6 million (\$80.8 million present value). We have not received payment since September 15, 2008, and are currently reviewing our rights under the CDS contracts.

As of September 30, 2008, the present value of future installments (PVI) of our CDS contracts with counterparties in the financial services industry is approximately \$538.5 million. The three largest counterparties are:

Counterparty	PVI Amount (in millions)	
Deutsche Bank AG	\$	152.9
Lehman Brothers International		80.6
Barclays Capital		33.6
Others (1)		271.4
Total	\$	538.5

(1) Each counterparty within the Other category represents less than 5% of the total.

Recent Accounting Pronouncements

Edgar Filing: ASSURED GUARANTY LTD - Form 10-Q

In September 2006, the Financial Accounting Standards Board (FASB) issued FAS No. 157, Fair Value Measurements (FAS 157). FAS 157 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. FAS 157 applies to other accounting pronouncements that require or permit fair value measurements, since the FASB had previously concluded in those accounting pronouncements that fair value is the relevant measure. Accordingly, FAS 157 does not require any new fair value measurements. FAS 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. We adopted FAS 157 effective January 1, 2008. FAS 157 did not have a material impact on our results of operations or financial position.

In February 2007, the FASB issued FAS No. 159, The Fair Value Option for Financial Assets and Liabilities (FAS 159). FAS 159 allows entities to voluntarily choose, at specified election dates, to measure many financial assets and financial liabilities (as well as certain nonfinancial instruments that are similar to financial instruments) at fair value (the fair value option). The election is made on an instrument-by-instrument basis and is

Table of Contents

irrevocable. If the fair value option is elected for an instrument, FAS 159 specifies that all subsequent changes in fair value for that instrument shall be reported in the Statement of Operations and Comprehensive Income. FAS 159 is effective as of the beginning of an entity's first fiscal year that begins after November 15, 2007. We adopted FAS 159 effective January 1, 2008. We did not apply the fair value option to any eligible items on our adoption date.

In April 2007, the FASB Staff issued FASB Staff Position No. FIN 39-1, Amendment of FASB Interpretation No. 39 (FSP FIN 39-1), which permits companies to offset cash collateral receivables or payables with net derivative positions under certain circumstances. FSP FIN 39-1 is effective for fiscal years beginning after November 15, 2007, with early adoption permitted. FSP FIN 39-1 did not affect the Company's results of operations or financial position.

In March 2008, the FASB issued FAS No. 161, Disclosures About Derivative Instruments and Hedging Activities—An Amendment of FASB Statement No. 133 (FAS 161). FAS 161 establishes the disclosure requirements for derivative instruments and for hedging activities. FAS 161 is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008. Early application is encouraged. FAS 161 is not expected to have an impact on the Company's current results of operations or financial position.

In May 2008, the FASB issued FAS No. 163, Accounting for Financial Guarantee Insurance Contracts—An Interpretation of FASB Statement No. 60 (FAS 163). FAS 163 requires that an insurance enterprise recognize a claim liability prior to an event of default (insured event) when there is evidence that credit deterioration has occurred in an insured financial obligation. FAS 163 also clarifies the methodology to be used for financial guaranty premium revenue recognition and claim liability measurement, as well as requiring expanded disclosures about the insurance enterprise's risk management activities. The provisions of FAS 163 related to premium revenue recognition and claim liability measurement are effective for financial statements issued for fiscal years beginning after December 15, 2008, and all interim periods within those fiscal years. Earlier application of these provisions is not permitted. The expanded risk management activity disclosure provisions of FAS 163 are effective for the third quarter of 2008 and are included in Note 6 of the accompanying financial statements. FAS 163 will be applied to all existing and future financial guaranty insurance contracts written by the Company. The cumulative effect of initially applying FAS 163 will be recorded as an adjustment to retained earnings as of January 1, 2009. The adoption of FAS 163 is expected to have a material effect on the Company's financial statements. The Company is in the process of estimating the impact of its adoption of FAS 163. The Company will continue to follow its existing accounting policies in regards to premium revenue recognition and claim liability measurement until it adopts FAS 163 on January 1, 2009.

In June 2008, the FASB issued FSP EITF 03-6-1, Participating Securities and the Two-Class Method under FASB Statement No. 128 (FSP). The FSP addresses whether instruments granted in share-based payment transactions are participating securities prior to vesting and therefore need to be included in the earnings allocation in calculating earnings per share (EPS) under the two-class method described in FAS No. 128, Earnings per Share. The FSP requires companies to treat unvested share-based payment awards that have non-forfeitable rights to dividend or dividend equivalents as a separate class of securities in calculating earnings per share. The FSP is effective for fiscal years beginning after December 15, 2008; earlier application is not permitted. This FSP also requires that all prior period EPS data be adjusted retrospectively. The Company does not expect adoption of the FSP to have a material effect on its results of operations or earnings per share.

On October 10, 2008, the FASB issued FASB Staff Position No. 157-3, Determining the Fair Value of a Financial Asset When the Market for That Asset Is Not Active (FSP 157-3). FSP 157-3 clarified the application of FAS 157, Fair Value Measurements, in a market that is not active. FSP 157-3 was effective when issued. It did not have an impact on the Company's current results of operations or financial position.

Edgar Filing: ASSURED GUARANTY LTD - Form 10-Q

The FASB adopted FSP FAS 133-1, Disclosures About Credit Derivatives and Certain Guarantees and FAS 161, Disclosures about Derivative Instruments and Hedging Activities to address concerns that current derivative disclosure requirements did not adequately address the potential adverse effects that these instruments can have on the financial performance and operations of an entity. Companies will be required to provide enhanced disclosures about their derivative activities to enable users to better understand: (1) how and why a company uses derivatives, (2) how it accounts for derivatives and related hedged items, and (3) how derivatives affect its financial statements. These should include the terms of the derivatives, collateral posting requirements and triggers, and other significant provisions that could be detrimental to earnings or liquidity. Disclosures specific to credit derivatives must be included in the December 31, 2008 financial statements. Certain other derivative and hedging disclosures must be included in the Company's March 31, 2009 Form 10-Q. Management believes that the Company's current derivatives disclosures are in compliance with the items required by FSP 133-1 and FAS 161.

Table of Contents

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Market Risk

Market risk represents the potential for losses that may result from changes in the value of a financial instrument as a result of changes in market conditions. The primary market risks that impact the value of our financial instruments are interest rate risk, basis risk, such as taxable interest rates relative to tax-exempt interest rates, and credit spread risk. Each of these risks and the specific types of financial instruments impacted are described below. Senior managers in our surveillance department are responsible for monitoring risk limits and applying risk measurement methodologies. The estimation of potential losses arising from adverse changes in market conditions is a key element in managing market risk. We use various systems, models and stress test scenarios to monitor and manage market risk. These models include estimates made by management that use current and historic market information. The valuation results from these models could differ materially from amounts that actually are realized in the market. See Critical Accounting Estimates Valuation of Investments.

Financial instruments that may be adversely affected by changes in interest rates consist primarily of investment securities. The primary objective in managing our investment portfolio is generation of an optimal level of after-tax investment income while preserving capital and maintaining adequate liquidity. Investment strategies are based on many factors, including our tax position, fluctuation in interest rates, regulatory and rating agency criteria and other market factors. As of January 1, 2005 we have retained BlackRock Financial Management, Inc. to manage our investment portfolio. These investment managers manage our fixed maturity investment portfolio in accordance with investment guidelines approved by our Board of Directors.

Financial instruments that may be adversely affected by changes in credit spreads consist primarily of Assured Guaranty's outstanding credit derivative contracts. We enter into credit derivative contracts which require us to make payments upon the occurrence of certain defined credit events relating to an underlying obligation (generally a fixed income obligation). The Company's credit derivative exposures are substantially similar to its financial guaranty insurance contracts and provide for credit protection against payment default, and are generally not subject to collateral calls due to changes in market value. In general, the Company structures credit derivative transactions such that the method for making loss payments is similar to that for financial guaranty policies and only occurs as losses are realized on the underlying reference obligation. Nonetheless, credit derivative transactions are governed by International Swaps and Derivatives Association, Inc. (ISDA) documentation and may operate differently from financial guaranty policies. For example, our control rights with respect to a reference obligation under a credit derivative may be more limited than when we issue a financial guaranty policy. In addition, while our exposure under credit derivatives, like our exposure under financial guaranty policies, have been generally for as long as the reference obligation remains outstanding, unlike financial guaranty policies, a credit derivative may be terminated for a breach of the ISDA documentation or other specific events. In some older credit derivative transactions, one such specified event is the failure of AGC to maintain specified financial strength ratings ranging from AA- to BBB-. If a credit derivative is terminated we could be required to make a mark-to-market payment as determined under the ISDA documentation. For example, if AGC's rating were downgraded to A, under market conditions at September 30, 2008, if the counterparties exercised their right to terminate their credit derivatives, AGC would have been required to make payments that, under the Company's mark-to-market methodology, was estimated to be approximately \$42 million. Further, if AGC's rating was downgraded to levels between BBB+ and BB+ it would have been required to make additional payments that, under the Company's mark-to-market methodology, was estimated to be approximately \$207 million at September 30, 2008. As of September 30, 2008 we had pre-IPO transactions with approximately \$1.3 billion of par subject to collateral posting due to changes in market value. In October and November 2008, the Company posted collateral totaling approximately \$68.5 million based on the unrealized mark-to-market loss position for transactions with two of its counterparties. Under current market conditions we do not anticipate a material increase in the amount posted. Currently no collateral posting is required or anticipated for any other transactions.

Unrealized gains and losses on credit derivative financial instruments are a function of changes in the estimated fair value of our credit derivative contracts. If credit spreads of the underlying obligations change, the fair value of the related credit derivative changes. Market

liquidity could also impact valuations of the underlying obligations. As such, Assured Guaranty experiences mark-to-market gains or losses. We consider the impact of our own credit risk, in collaboration with credit spreads on risk that we assume through CDS contracts, in determining the fair value of our credit derivatives. We determine our own credit risk based on quoted CDS prices traded on the

Table of Contents

Company at each balance sheet date. The quoted price of CDS contracts traded on the Company at September 30, 2008 and December 31, 2007 was 1,255 basis points and 180 basis points, respectively. The price of CDS traded on the Company generally moves directionally the same as general market spreads. A widening of the CDS prices traded on the Company has an effect of offsetting unrealized losses that result from widening general market credit spreads. Thus, as the Company's credit spreads widen, the value of our CDS decreases. Conversely, as our own credit spread narrows, the value of our unrealized losses widens. However, an overall narrowing of spreads generally results in an unrealized gain on credit derivatives for us and a widening of spreads generally results in an unrealized loss for us.

The impact of changes in credit spreads will vary based upon the volume, tenor, interest rates, and other market conditions at the time these fair values are determined. In addition, since each transaction has unique collateral and structure terms, the underlying change in fair value of each transaction may vary considerably. The fair value of credit derivatives also reflects the change in our own credit cost based on the price to purchase credit protection on AGC. During Third Quarter 2008 and Nine Months 2008, we incurred net pre-tax mark-to-market losses on credit derivative contracts of \$(116.2) million and gains of \$332.6 million, respectively. The Second Quarter 2008 loss includes a gain of \$1,626.7 million associated with the change in AGC's credit spread, which widened substantially from 900 basis points at June 30, 2008 to 1,255 basis points at September 30, 2008. The widening of AGC's credit spread is primarily the result of reduced liquidity in the market and increased demand for credit protection against AGC commensurate with our increased new business production. Partially offsetting the gain attributable to the increase in AGC's credit spread were declines in fixed income security market prices attributable to widening spreads, rather than from credit rating downgrades, delinquencies or defaults on securities guaranteed by us. The higher credit spreads in the fixed income security market are due to the recent lack of liquidity in the high yield collateralized debt obligation and collateralized loan obligation markets as well as continuing market concerns over the most recent vintages of subprime residential mortgage backed securities.

The total notional amount of credit derivative exposure outstanding as of September 30, 2008 and December 31, 2007 and included in our financial guaranty exposure was \$77.6 billion and \$71.6 billion, respectively.

We generally hold these credit derivative contracts to maturity. The unrealized gains and losses on credit derivative financial instruments will reduce to zero as the exposure approaches its maturity date, unless there is a payment default on the exposure.

The following table summarizes the estimated change in fair values on the net balance of Assured Guaranty's net credit derivative positions assuming immediate parallel shifts in credit spreads at September 30, 2008:

(Dollars in millions)

Credit Spreads	Estimated Net Fair Value (Pre-Tax)	Estimated Pre-Tax Change in Gain / (Loss)
September 30, 2008:		
100% widening in spreads	\$ (974.8)	\$ (705.4)
50% widening in spreads	(625.5)	(356.1)
25% widening in spreads	(449.0)	(179.6)
10% widening in spreads	(340.6)	(71.2)
Base Scenario	(269.4)	
10% narrowing in spreads	(213.2)	56.2
25% narrowing in spreads	(133.1)	136.3
50% narrowing in spreads	(4.8)	264.6

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures. Assured Guaranty Ltd.'s management, with the participation of Assured Guaranty Ltd.'s Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of Assured Guaranty Ltd.'s disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and

Table of Contents

15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)) as of the end of the period covered by this report. Based on this evaluation, Assured Guaranty Ltd.'s Chief Executive Officer and Chief Financial Officer have concluded that, as of the end of such period, Assured Guaranty Ltd.'s disclosure controls and procedures are effective in recording, processing, summarizing and reporting, on a timely basis, information required to be disclosed by Assured Guaranty Ltd. (including its consolidated subsidiaries) in the reports that it files or submits under the Exchange Act.

There has been no change in the Company's internal controls over financial reporting during the Company's quarter ended September 30, 2008, that has materially affected, or is reasonably likely to materially affect, the Company's internal controls over financial reporting.

PART II OTHER INFORMATION

Item 1 Legal Proceedings

Litigation

Lawsuits arise in the ordinary course of the Company's business. It is the opinion of the Company's management, based upon the information available, that the expected outcome of these matters, individually or in the aggregate, will not have a material adverse effect on the Company's financial position, results of operations or liquidity, although an adverse resolution of a number of these items could have a material adverse effect on the Company's results of operations or liquidity in a particular quarter or fiscal year.

Effective January 1, 2004, Assured Guaranty Mortgage Insurance Company (AGMIC) reinsured a private mortgage insurer (the Reinsured) under a Mortgage Insurance Stop Loss Excess of Loss Reinsurance Agreement (the Agreement). Under the Agreement, AGMIC agreed to cover the Reinsured's aggregate mortgage guaranty insurance losses in excess of a \$25 million retention and subject to a \$95 million limit. Coverage under the Agreement was triggered only when the Reinsured's: (1) combined loss ratio exceeded 100%; and (2) risk to capital ratio exceeded 25 to 1, according to insurance statutory accounting. In April 2008, AGMIC notified the Reinsured it was terminating the Agreement because of its breach of the terms of the Agreement. The Reinsured has notified AGMIC that it considers the Agreement to remain in effect and that the two coverage triggers under the Agreement apply as of April 1, 2008. By letter dated May 5, 2008, the Reinsured demanded arbitration against AGMIC seeking a declaration that the Agreement remains in effect and alleged compensatory and other damages. The arbitration hearing is scheduled to begin before a three person panel in December 2008. AGMIC plans to vigorously defend its position that the termination of the Agreement was of immediate effect and that it has no liability under the Agreement.

It is the opinion of the Company's management, based upon the information available, that the expected outcome of litigation against the Company, individually or in the aggregate, will not have a material adverse effect on the Company's financial position or liquidity, although an adverse resolution of litigation against the Company could have a material adverse effect on the Company's results of operations in a particular quarter or fiscal year.

Edgar Filing: ASSURED GUARANTY LTD - Form 10-Q

In the ordinary course of their respective businesses, certain of the Company's subsidiaries assert claims in legal proceedings against third parties to recover losses paid in prior periods. The amounts, if any, the Company will recover in these proceedings are uncertain, although recoveries in any one or more of these proceedings during any quarter or fiscal year could be material to the Company's results of operations in that particular quarter or fiscal year.

Reinsurance

The Company is party to reinsurance agreements with most of the major monoline primary financial guaranty insurance companies. The Company's facultative and treaty agreements are generally subject to termination (i) upon written notice (ranging from 90 to 120 days) prior to the specified deadline for renewal, (ii) at

Table of Contents

the option of the primary insurer if the Company fails to maintain certain financial, regulatory and rating agency criteria which are equivalent to or more stringent than those the Company is otherwise required to maintain for its own compliance with state mandated insurance laws and to maintain a specified financial strength rating for the particular insurance subsidiary or (iii) upon certain changes of control of the Company. Upon termination under the conditions set forth in (ii) and (iii) above, the Company may be required (under some of its reinsurance agreements) to return to the primary insurer all statutory unearned premiums, less ceding commissions, attributable to reinsurance ceded pursuant to such agreements after which the Company would be released from liability with respect to the ceded business. Upon the occurrence of the conditions set forth in (ii) above, whether or not an agreement is terminated, the Company may be required to obtain a letter of credit or alternative form of security to collateralize its obligation to perform under such agreement or it may be obligated to increase the level of ceding commission paid.

Item 1A Risk Factors

In addition to the other information set forth in this report, you should carefully consider the factors discussed in Part I, Item 1A. Risk Factors in our Annual Report on Form 10-K for the year ended December 31, 2007, which could materially affect our business, financial condition or future results.

The discussion below elaborates upon and updates Risks Related to our Company--A downgrade of the financial strength or financial enhancement ratings of any of our insurance subsidiaries could adversely affect our business and prospects, and, consequently, our results of operations and financial condition., set forth in our Annual Report on Form 10-K for the year ended December 31, 2007.

On July 21, 2008, Moody's Investors Service placed under review for possible downgrade the Aaa insurance financial strength ratings of Assured Guaranty Corp. and its wholly owned subsidiary, Assured Guaranty (UK) Ltd., as well as the Aa2 insurance financial strength ratings of Assured Guaranty Re Ltd. (AG Re) and its affiliated insurance operating companies. Moody's has also placed under review for possible downgrade the Aa3 senior unsecured rating of parent company, Assured Guaranty US Holdings Inc. and the Aa3 issuer rating of the ultimate holding company, Assured Guaranty Ltd. The timing and outcome of the Moody's review are uncertain.

We believe that our new business production has been adversely impacted since Moody's placed us under review. Furthermore, if the ratings of any of our insurance subsidiaries were reduced below current levels, we expect it would have an adverse effect on the our subsidiary's competitive position and its prospects for future business opportunities. A downgrade may also reduce the value of the reinsurance we offer, which may no longer be of sufficient economic value for our customers to continue to cede to our subsidiaries at economically viable rates.

With respect to a significant portion of our in-force financial guaranty reinsurance business, in the event that AG Re were downgraded from Aa2 to A1, subject to the terms of each reinsurance agreement, the ceding company may have the right to recapture business ceded to AG Re and assets representing substantially all of the statutory unearned premium and loss reserves (if any) associated with that business. As of September 30, 2008, the statutory unearned premium, which represents deferred revenue to the Company, subject to recapture is approximately \$215 million. If this entire amount were recaptured, it would result in a corresponding one-time reduction to net income of approximately \$10 million. With respect to one of AG Re's ceding companies the right to recapture business can only be exercised if AG Re were downgraded to the A category by more than one rating agency, or below A2/A by any one rating agency. As of September 30, 2008, the statutory unearned premium subject to recapture by this ceding company is approximately \$400 million. If this entire amount were recaptured, it would result in a corresponding one-time reduction to net income of approximately \$50 million. Alternatively, the ceding company can increase the commissions it charges AG Re for cessions. Any such increase may be retroactive to the date of the cession. As of September 30, 2008, the potential increase in ceding commissions would result in a one-time reduction to net income of approximately \$44 million. The effect on net income under these scenarios is exclusive of any capital gains or losses that may be realized.

In the event AGC were downgraded from AAA to Aa2, with respect to certain of its credit derivative contracts, the amount of par subject to collateral posting requirements would increase to \$1.5 billion from \$1.2 billion, as a result of certain collateral posting thresholds being lowered. In the event AGC were downgraded below A-, the maximum amount of par subject to collateral posting requirements would be \$2.4 billion. However, at current fair market value amounts, AGC would not have to pledge additional collateral for the benefit of its

Table of Contents

counterparties. A downgrade to Aa2 would not allow AGC's counterparties to terminate their credit derivative agreements, and no payment of a settlement amount would be required. With respect to AGC's assumed reinsurance business, the effect of a downgrade to Aa2 would be immaterial.

The Company's financial strength ratings assigned by Standard & Poor's Rating Service, a division of McGraw-Hill Companies, Inc. ("S&P") and Fitch, Inc. ("Fitch") were affirmed on June 18, 2008 and December 12, 2007, respectively. Management is uncertain what, if any, impact Moody's review for possible downgrade will have on the Company's financial strength ratings from S&P and Fitch.

If the current difficult conditions in the national and world-wide financial markets continue for an extended period or intensify, our business, liquidity, financial condition and stock price may be adversely affected.

The volatility and disruption in the global financial markets have reached unprecedented levels. The availability and cost of credit has been materially affected. These factors, combined with volatile oil prices, depressed home prices and increasing foreclosures, falling equity market values, declining business and consumer confidence and the risks of increased inflation and unemployment, have precipitated an economic slowdown and fears of a severe recession. These conditions may adversely affect our profitability, financial position, investment portfolio, cash flow, statutory capital and stock price.

Issuers or borrowers whose securities or loans we hold and counterparties under swaps and other derivative contracts may default on their obligations to us due to bankruptcy, insolvency, lack of liquidity, adverse economic conditions, operational failure, fraud or other reasons. Additionally, the underlying assets supporting our structured securities may deteriorate causing these securities to incur losses.

The Company's access to funds under its credit facilities is dependent on the ability of the banks that are parties to the facilities to meet their funding commitments. Those banks may not be able to meet their funding commitments to the Company if they experience shortages of capital and liquidity or if they experience excessive volumes of borrowing requests from the Company and other borrowers within a short period of time. In addition, consolidation of financial institutions could lead to an increased credit risk.

Regulatory change could adversely affect our ability to enter into future business.

On September 22, 2008, the New York State Insurance Department (the "Department") issued Circular Letter No. 19 (2008) (the "Circular Letter"), which establishes best practices guidelines for financial guaranty insurers effective January 1, 2009. The best practice guidelines impose new limitations on credit default swaps. In addition, the best practices guidelines seek to limit concentration risk (i.e., the risk from insuring too many securities from a single source). The Department plans to propose legislation and regulations to formalize these guidelines. These guidelines and the related legislation and regulations may limit the amount of new structured finance business that AGC is able to write in future periods.

Item 2 Unregistered Sales of Equity Securities and Use of Proceeds

Issuer's Purchases of Equity Securities

The following table reflects purchases made by the Company during the three months ended September 30, 2008. All shares repurchased were for the payment of employee withholding taxes due in connection with the vesting of restricted stock awards:

Period	(a) Total Number of Shares Purchased	(b) Average Price Paid Per Share	(c) Total Number of Shares Purchased as Part of Publicly Announced Program	(d) Maximum Number of Shares that May Yet Be Purchased Under the Program
July 1 - July 31	679	\$ 19.33		1,717,400
August 1 - August 31	3,800	\$ 13.78		1,717,400
September 1 - September 30	1,279	\$ 16.63		1,717,400
Total	5,758	\$ 15.07		

Items 3, 4 and 5 are omitted either because they are inapplicable or because the answer to such question is negative.
