

CUBIC CORP /DE/
Form 10-K
December 09, 2009

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934

For the Fiscal Year Ended September 30, 2009

Commission File Number 1-8931

CUBIC CORPORATION

Exact Name of Registrant as Specified in its Charter

Delaware
State of Incorporation

95-1678055
IRS Employer Identification No.

9333 Balboa Avenue
San Diego, California 92123
Telephone (858) 277-6780

Securities registered pursuant to Section 12(b) of the Act:

Edgar Filing: CUBIC CORP /DE/ - Form 10-K

Common Stock
Title of each class

New York Stock Exchange, Inc.
Name of exchange on which registered

Securities registered pursuant to Section 12(g) of the Act: **None**

Indicate by check mark if the registrant is a well known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicated by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months, and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of the registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K. Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definition of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act (check one).

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act) Yes No

The aggregate market value of 15,848,189 shares of voting stock held by non-affiliates of the registrant was: \$401,434,627 as of March 31, 2009, based on the closing stock price on that date.

Edgar Filing: CUBIC CORP /DE/ - Form 10-K

Number of shares of common stock outstanding as of November 12, 2009 including shares held by affiliates is: 26,731,987 (after deducting 8,945,120 shares held as treasury stock).

DOCUMENTS INCORPORATED BY REFERENCE:

Portions of the Registrant's Proxy Statement for its 2010 Annual Meeting of Shareholders to be held on February 23, 2010, are incorporated by reference into Part III of this Annual Report on Form 10-K.

PART I

Item 1. BUSINESS.

GENERAL

CUBIC CORPORATION (Cubic), was incorporated in the State of California in 1949 and began operations in 1951. In 1984, we moved our corporate domicile to the State of Delaware.

We design, develop, manufacture and install products and replacement parts which are mainly electronic in nature, such as:

Equipment for use in customized military range instrumentation, training and applications systems, simulators, communications and surveillance systems, surveillance receivers, power amplifiers, and avionics systems.

Automated revenue collection systems, including contactless smart cards, passenger gates, central computer systems and ticket vending machines for mass transit networks, including rail systems, buses, and parking applications.

We also perform a variety of services, such as computer simulation training, distributed interactive simulation, military education, development of military doctrine, as well as field operations and maintenance.

During fiscal year 2009, approximately 58% of our total business was conducted, either directly or indirectly, with various agencies of the United States government. Most of the remainder of our revenue was from local, regional and foreign governments or agencies.

Cubic's internet address is www.Cubic.com. The content on our website is available for information purposes only. It should not be relied upon for investment purposes, nor is it incorporated by reference into this Form 10-K. We make available free of charge on or through our Internet website under the heading "Investor Information," our reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to those reports as soon as reasonably practicable after we electronically file such material with the Securities and Exchange Commission.

BUSINESS SEGMENTS

Information regarding the amounts of revenue, operating profit and loss and identifiable assets attributable to each of our business segments, is set forth in Note 10 to the Consolidated Financial Statements for the year ended September 30, 2009. Additional information regarding the amounts of revenue and operating profit and loss attributable to major classes of products and services is set forth in Management's Discussion and Analysis which follows at Item 7.

MISSION SUPPORT SERVICES SEGMENT

Cubic Mission Support Services (MSS) is a leading provider of training, operations, maintenance, technical, and other support services to the U.S. Government and allied nations, with an emphasis on military education. MSS comprises approximately 5,000 Cubic employees working at more than 130 locations in 20 nations throughout the world. Our people serve with clients in actual training and operational environments to help prepare and support forces through provision of comprehensive training, exercises, education, operational, and logistical assistance to meet the full scope of their assigned missions. The scope of mission support that Cubic provides includes training and rehearsal for both small and large scale combat operations; training and preparation of military advisor teams; mobilization and demobilization of forces prior to and following deployment; combat and material development; military staff augmentation, logistics and maintenance support for fielded and deployed systems; special operations; peacekeeping; consequence management; and humanitarian assistance operations worldwide. We plan, prepare, execute and document realistic and focused mission rehearsal exercises (using both live and computer-based exercises) as final preparation of forces prior to deployment. In addition, we provide high level consultation and advisory services to the governments and militaries of allied nations.

In July 2008, we acquired all outstanding capital stock of the privately-held Omega Training Group, Inc. (Omega). Omega provides training, testing, analysis, logistics and staffing services to U.S. Army and other Services at Fort Benning, Fort Bliss, Fort Jackson, Fort Hood, and six other locations. Founded in 1990, Omega now operates as the Omega Training Division of Mission Support Services. The Omega division now has approximately 1,000 employees.

U.S. government service contracts are typically awarded on a competitive basis with options for multiple years. In this competitive market, Cubic is viewed as a premier service provider and formidable competitor. We typically compete as prime contractors to the government, but also team with other companies, depending on the skills required. Much of our early work centered on battle command training and simulation, in which military commanders are taught to make correct decisions in battlefield situations. More recently, our business base has broadened to include integrated live, virtual, and constructive training support; advanced distance learning and other professional military education; comprehensive logistics and maintenance support; weapons effects and analytical modeling; intelligence analysis; homeland security training and exercises; training and preparation of U.S. Army and Marine Corps foreign service advisor teams; and military force modernization. Additionally, we support the deployment and re-deployment of both active and reserve component forces at U.S. Army Mobilization Centers at Forts Bliss and Hood in Texas and at several other U.S. locations; and we provide in-country logistics, maintenance, operational, and training support to U.S. Forces deployed in Kuwait, Iraq, and Afghanistan.

Cubic's contracts include providing mission support services to three of the Army's major Combat Training Centers (CTCs): the Joint Readiness Training Center (JRTC) as prime contractor; and to the National Training Center (NTC) and Battle Command Training Program (BCTP) as a principal subcontractor. These services include planning, executing, and documenting large scale exercises and mission rehearsals aimed at stressing both active and reserve U.S. forces in situations as close to actual combat as possible.

Edgar Filing: CUBIC CORP /DE/ - Form 10-K

At U.S. Joint Forces Command (USJFCOM), Cubic is a principal member of the contractor team that supports and helps manage all aspects of the operations of the Joint Warfighting Center (JWFC), including support to worldwide exercises and the development and fielding of the Joint National Training Capability (JNTC). We provide similar technical and management support services to the U.S. Army's National

Edgar Filing: CUBIC CORP /DE/ - Form 10-K

Simulation Center (NSC) at Fort Leavenworth, Kansas. Under the Marine Air Ground Task Force (MAGTF) Training Systems Support (MTSS) contract, Cubic provides comprehensive training and exercise support to U.S. Marine Corps forces worldwide, including real-world mission rehearsals. We have planned and executed virtually all Marine Corps simulation-based exercises worldwide since 1998, directly preparing Marines for combat operations. Cubic provides training and professional military education support to the U.S. Army's Quartermaster Center and School, the Signal School and to the Transportation School. We also provide contractor maintenance and instructional support necessary to operate and maintain a wide variety of flight simulation and training systems, and other facilities worldwide for U.S. and allied forces under multiple long-term contracts. In addition, we provide a broad range of operational support to the U.S. Navy for Anti-Submarine Warfare (ASW) countermine operations and training.

Cubic initiated and has continued to operate the Korea Battle Simulation Center (KBSC) since its inception in 1991. KBSC prepares U.S. and allied forces in Korea to deal with mission situations that may develop in their areas of responsibility. Our KBSC contract includes support to the world's largest and most complex simulation-based training events.

At the U.S. Army I Corps Battle Simulation Center, Cubic provides the technical and operational expertise necessary to support worldwide training, exercises, evaluations, and mission rehearsals for I Corps active and reserve component units, the new Stryker brigades, other services, and joint commands.

Cubic supports the Defense Threat Reduction Agency (DTRA) with technology-based engineering and other services necessary to accomplish DTRA's mission of predicting and defeating the effects of chemical, biological, radiological, nuclear and high explosive (CBRNE) weapons. Cubic supports DTRA with modeling and simulations to analyze, assess and predict the effects of such weapons in combat and other environments. Additionally, Cubic provides comprehensive support to help plan, manage, and execute DTRA's worldwide CBRNE exercise program, which trains senior U.S. and allied civilian and military personnel, first responders, and other users of DTRA products.

Cubic has multiple contracts with all U.S. Armed Services and other government agencies to improve the quality and reach of training and education of individuals and small teams up through collective training of large organizations. Cubic's products and capabilities include development and deployment of curriculum and related courseware, computer-based training, knowledge management and distribution, advanced distance learning, serious games for training, and other advanced education programs for U.S. and allied forces.

An important part of Cubic's services business is to provide specialized teams of military experts to advise the governments and militaries of the nations of the former Warsaw Pact and Soviet Union, and other former communist countries in the transformation of their militaries to a NATO environment. These very broad defense modernization contracts entail sweeping vision and minute detail, involving both the nations' strategic foundation and the detailed planning of all aspects of reform. Mission Support Services also develops and operates battle simulation centers for selected countries in Central and Eastern Europe.

We believe the combination and scope of Cubic's growing mission support services and training systems business is unique in the industry, permitting us to offer customers a complete training and combat readiness capability from one source.

Backlog MSS:

Edgar Filing: CUBIC CORP /DE/ - Form 10-K

Funded sales backlog of our MSS segment at September 30, 2009 was \$207 million compared to \$181 million at September 30, 2008. Total backlog, including unfunded customer orders and options under multiyear service contracts, was \$856 million at September 30, 2009 compared to \$880 million at September 30, 2008. We expect that approximately \$554 million of the September 30, 2009 total backlog will not be completed by September 30, 2010.

DEFENSE SYSTEMS SEGMENT

Cubic Defense Systems (CDS) consists of two market-focused businesses: Training Systems and Communications. Our products include customized military range instrumentation systems, electro-optical systems, firearm simulation systems, communications and surveillance systems, surveillance receivers, power amplifiers, and avionics systems. We market our capabilities directly to various U.S. government departments and agencies and foreign governments. In addition, we frequently contract or team with other leading defense suppliers.

Training Systems

Our Training Systems business is a pioneer and market leader in the design, innovation, and manufacture of immersive and instrumented training systems and products for military customers. Immersive training systems enable dismounted soldiers to train in a hyper-realistic virtual environment. Instrumented training systems are used for live training in air and ground combat domains, with weapons and other effects simulated by electronics, software, and/or laser technologies. These products collect and record simulated weapons engagements, tactical behavior, and event data to evaluate combat effectiveness, lessons learned, and provide a basis to develop after action reviews.

Our training business is organized into Air Combat and Ground Combat segments. In Air Combat, Cubic was the initial developer and supplier of Air Combat Maneuvering Instrumentation (ACMI) capability during the Vietnam War. The ACMI product line has progressed through several generations of technologies and capabilities. We continue to enjoy a market leadership position based on the competitive award of a 10-year, \$525 million indefinite delivery/ indefinite quantity (IDIQ) contract in 2003, called P5, to provide advanced air combat training capability to the U.S. Air Force, Navy and Marine Corps. We also received a \$50 million development contract in 2007 to develop an internal version of the P5 system for use on the F-35 Joint Strike Fighter. While most of the latest ACMI systems are designed to operate in a rangeless environment we continue to support a number of legacy, fixed geographic ranges. Many nations employ our ACMI systems for air to air combat training.

Ground Combat training uses systems analogous to air ranges for ground force training, tactical engagement simulation systems (generally known as MILES (Multiple Integrated Laser Engagement Simulation equipment)), as well as virtual simulation products. Our leadership role in instrumented training was established during the 1990s when we provided turnkey systems for U.S. Army training centers at Fort Polk, LA (Joint Readiness Training Center - JRTC) and Hohenfels, Germany (Combat Maneuver Training Center - CMTC). Since these original contracts were completed we have dramatically expanded our market footprint with the sale of fixed, mobile, and urban operation training centers around the world. Increasingly, our efforts are focused on joint training solutions and those that can operate simultaneously in multiple simulation environments including live, virtual, constructive, and gaming domains.

Laser-based tactical engagement simulation systems are used at combat training centers (CTC) to permit weapons to be used realistically, registering hits or kills, without live ammunition. We supply MILES equipment as part of CTC contracts and as an independent product line. Cubic MILES systems are being utilized by all branches of the U.S. Armed Services, as well as the Department of Energy, and civilian security firms. We manufacture MILES equipment in the U.S. and at our New Zealand-based wholly-owned subsidiary, Cubic Defence New Zealand.

At our Simulation Systems Division (SSD) in Orlando, FL, we produce immersive virtual training systems, employing actual or realistic weapons and systems together with visual imagery to simulate battle field environments. Also at SSD, we produce maintenance trainers for combat systems and vehicles.

Communications

Our Communications business is a supplier of secure data links, high power RF amplifiers, direction finding systems, remote video terminals, and search and rescue avionics for the U.S. military, government agencies,

and allied nations. We supplied the air/ground secure data link for the U.S. Army/Air Force Joint STARS system during the 1980s, as well as the United Kingdom's ASTOR program. More recently we have focused on the supply of Common Data Link (CDL) products for ship borne applications, unmanned aerial vehicles (UAV), and remote video terminals. Capitalizing on a multiyear internal R&D program, we won a competitive contract in Fiscal 2003 to develop and produce the Common Data Link Subsystem (CDLS) for the U.S. Navy. CDLS has been installed on major surface ships of the U.S. fleet. Smaller, tactical versions of our Common Data Link have been selected for both UAV and remote video terminal applications such as the U.K. Watchkeeper and the U.S. Firescout UAV programs

Our Personnel Locator System (PLS) is standard equipment on U.S. aircraft with a search-rescue mission. PLS has been redesigned to interface with all modern search and rescue system standards. We also supply high power amplifiers, intelligence receivers and direction finding systems to major primes and end users for both domestic and international applications. These include systems used by the Canadian Coast Guard, the U.S. Navy, the U.S. Air Force, and the French Army.

Raw Materials CDS:

The principal raw materials used by CDS are sheet aluminum and steel, copper electrical wire, and composite products. A significant portion of our end products are composed of purchased electronic components and subcontracted parts and supplies. We procure these items primarily from commercial sources. In general, supplies of raw materials and purchased parts are adequate to meet our requirements.

Backlog CDS:

Funded sales backlog of CDS at September 30, 2009 was \$556 million compared to \$412 million at September 30, 2008. We expect that approximately \$322 million of the September 30, 2009 backlog will not be completed by September 30, 2010.

MSS and CDS Competitive Environment:

Cubic's broad defense business portfolio means we compete with numerous companies, large and small, domestic and international. Well known competitors include Lockheed Martin, Northrop Grumman, General Dynamics, Boeing, L3 Communications, and SAIC. In many cases, we have also teamed with these same companies on specific bid opportunities. While we are generally smaller than our competitors, we believe our competitive advantages include an outstanding record of past performance, strong incumbent relationships, our ability to control operating costs, and the ability to rapidly focus technology and innovation to solve customer problems.

Projects must compete for funding in the defense budget. While the U.S. defense budget has seen above average increases in recent years, long-term growth will only occur in those segments that offer very high payoff and are consistent with warfighting priorities and growing fiscal restraints. The U.S. defense market today can be characterized as highly dynamic, with priorities and funding shifting in reaction to, or anticipation of, world events much more rapidly than during the Cold War or since. Overarching military priorities include lighter, faster, more lethal forces with the ability and training to rapidly adapt to new situations based on superior knowledge of the battle environment. Superior

knowledge is enabled by systems that rapidly collect, process and disseminate the right information to the right place at the right time, resulting in what DoD calls network-centric warfare. We believe our training systems, training support and intelligence, surveillance and reconnaissance capabilities are well matched to these sustainable defense priorities.

TRANSPORTATION SYSTEMS SEGMENT

Cubic Transportation Systems (CTS) is the leading turnkey solution provider of automated fare collection systems for public transport authorities worldwide. We provide a range of service and system solutions for the bus, bus rapid transit, light rail, commuter rail, heavy rail, ferry and parking markets. These solutions and services include system design, central computer systems, equipment design and manufacturing, device-level software, integration, test, installation, warranty, maintenance, computer hosting services, call center services, card management and distribution services, financial clearing and settlement, multi-application support and outsourcing services. In addition, we design, develop and manufacture special technology components, such as smart card readers and magnetic ticket transports for use within our suite of fare collection equipment consisting of on-bus solutions, access control solutions, vending solutions, retail and card issuing solutions, and mobile inspection and sales solutions.

Over the years, we have been awarded over 400 projects in 40 major markets on 5 continents. Active projects include London, and various other cities around the U.K., Miami, Florida, Vancouver, B.C. Canada, the New York / New Jersey region, the Washington, D.C. / Baltimore / Virginia region, the Los Angeles region, the San Diego region, San Francisco Bay region, Minneapolis/St. Paul, Chicago, Atlanta, Brisbane and Sydney in Australia, the Frankfurt/RMV region in Germany, and Sweden.

These programs provide a base of current business and the potential for additional future business as the systems are expanded. In 1998, Transaction Systems Limited (TranSys), a company in which we have a 37.5% ownership, was awarded a contract called PRESTIGE to outsource the London Transport fare collection services. This contract, now in its twelfth and final year, is the largest automated fare collection contract ever awarded. In August 2008, Transport for London (TfL) notified TranSys that they would terminate the PRESTIGE fare collection system contract as of August 2010 in accordance with an early termination option in the contract. To replace PRESTIGE, TfL, awarded a contract directly to Cubic for continuing the services until 2013. The new contract, with an initial value of £170 million (\$272 million), will include all the existing operational services as well as laying the groundwork for future ticketing innovations such as mobile phone ticketing and bank card ticketing.

Industry Overview

Transport agencies, particularly those based in the U.S., rely heavily on federal, state and local governments for subsidies in capital investments, including new procurements and/or upgrades of automated fare collection systems. The average lifecycle for rail fare collection systems is 12 to 15 years, and for bus systems is 7 to 10 years. Procurements tend to follow a long and strict competitive bid process where low price is a significant factor.

The automated fare collection business is a niche market able to sustain only a relatively few number of suppliers. Because of the long life expectancy of these systems and only a few companies able to supply them, there is fierce competition to win these jobs, often resulting in low initial contract profitability.

Advances in communications, networking and security technologies are enabling interoperability of multiple modes of transportation within a single networked system as well as interoperability of multiple operators within a single networked system. As such, there is a growing trend for regional ticketing systems, usually built around a large transit agency and including neighboring operators, all sharing a common regional smart card. There is an emerging trend for other applications to be added to these regional systems to expand the utility of the smart card, offering

Edgar Filing: CUBIC CORP /DE/ - Form 10-K

higher value and incentives to the end users and lowering costs and creating new revenue streams for the regional system operators. As a result, these regional systems have created opportunities for new levels of systems support and services including call center support, smart card production and distribution, financial clearing and settlement and multi-application support. In some cases, operators are choosing to outsource the ongoing operations and commercialization of these regional ticketing systems. This growing new market provides the opportunity to establish lasting relationships and grow revenues and profits over the long-term.

Raw Materials CTS:

Raw materials used by CTS include sheet steel, composite products, copper electrical wire and castings. A significant portion of our end product is composed of purchased electronic components and subcontracted parts and supplies. We procure all of these items from commercial sources. In general, supplies of raw materials and purchased parts are adequate to meet our requirements.

Backlog CTS:

Funded sales backlog of CTS at September 30, 2009 and 2008 amounted to \$772 million and \$481 million, respectively. As mentioned above, in November 2008, TfL awarded us a new three year contract that includes virtually all of the services currently being performed by TranSys through the major shareholders. The term of this contract is for the time period from August 2010 to August 2013, with a base value of approximately \$272 million (£170 million). We expect that approximately \$501 million of the September 30, 2009 backlog will not be completed by September 30, 2010.

CTS Competitive Environment:

We are one of several companies involved in providing automated fare collection systems solutions and services for public transport operators worldwide including such competitors as Thales, ACS and Scheidt & Bachmann. In addition, there are many smaller local companies, particularly in European and Asian markets. For large national tenders, our competitors may form consortiums that could include, in addition to the fare collection companies noted above, telecommunications, financial institutions, consulting and computer services companies. These procurement activities are very competitive and require that we have highly skilled and experienced technical personnel to compete. We believe that our competitive advantages include intermodal and interagency regional integration expertise, technical skills, past contract performance, systems quality and reliability, experience in the industry and long-term customer relationships.

BUSINESS STRATEGY

Our objective is to consistently grow sales, improve profitability and deliver attractive returns on capital. We intend to build on our position with U.S. and foreign governments as the leading full spectrum supplier of training systems and mission support services, grow our niche position as a supplier of data links and communications products, and maintain our position as the leading provider of integrated intermodal regional transit fare collection systems to transit authorities worldwide. Our strategies to achieve these objectives include:

Leverage Long-Term Relationships

We seek to maintain long-term relationships with our customers through repeat business by continuing to achieve high levels of performance and providing innovations on our existing contracts. By achieving this goal we can leverage our returns through repeat business with existing customers and expand our presence in the market through sales of similar systems at good value to additional customers.

An example of this at MSS is the award in April 2009 of a five year contract to develop and conduct battle simulation training exercises for the United States Forces Korea. Cubic won its first simulation support contract for United States Forces Korea in July 1991 and with this new award continues the on-going relationship. Under this contract, we plan and conduct all facets of computer-based battle simulation exercises for U.S., Republic of Korea, and other allied forces from platoon through theater-levels.

An example of this at CDS is the recent award of a contract to provide the next generation U.S. air combat training system. Starting in 1971 Cubic developed the first generation of Air Combat Maneuvering Instrumentation system, or ACMI, for the U.S. Military for live combat training. In 2003 we were awarded the P5 \$525 million ID/IQ contract to deliver the latest technology for rangeless live training to the U.S. and foreign militaries. In 2007 we were awarded a \$50.3 million contract to develop the next generation of live training for the F-35 Joint Strike Fighter aircraft using embedded technology. Thus since the initial contract in 1971, we have successfully and continuously supplied the U.S. and foreign militaries with the latest in air combat training technologies.

At CTS we have had a continuous relationship with Transport for London (TfL) since the 1970 s. Starting with a small trial of magnetic ticketing and gating in 1978, we have continuously delivered fare collection equipment and systems to TfL as its exclusive fare collection system supplier. Today under the PRESTIGE contract more than 27 million Oyster smart cards have been sold, making this one of the largest transportation smart card systems in the world. In August 2008 TfL notified our 37.5% owned company, TranSys, that it was exercising its option to terminate the PRESTIGE contract for convenience effective in August 2010. Subsequently, TfL awarded Cubic the follow-on contract to operate and maintain the Oyster system under a contract called the Future Ticket Agreement, thus continuing Cubic s relationship through 2013. Similarly, we are regionalizing integrated fare collection systems in Washington D.C., New York, the San Francisco Bay Area, and Southern California.

Expand Services Business

We view services as a core element of our business and we are working to expand our service offerings and customer base. In aggregate, approximately 48% of our sales revenue in 2009 was from service work. We believe that a strong base of service work helps to enhance profitability and smooth the revenue fluctuations inherent in systems work.

At CTS, our managed service offerings are growing. Due to the technical complexities of operating electronic fare collection systems, transit agencies are turning to third parties to supply operational and maintenance services, such as regional settlement, card management and customer support services, that would otherwise be performed by the transit agency. As a result, we are now providing managed services for more than 20 transit authorities worldwide. We have also expanded our services through acquisitions. For example, our recent acquisition of certain assets of Vix ERG Pty Ltd. further expands our presence in the managed services market. As part of that transaction, we acquired a fully functioning service operation in Concord, CA, specifically equipped to support public transport authorities with complete solutions for smart card distribution and call center operations.

At MSS, we offer a full suite of defense services including planning and support for theater and worldwide exercises, computer-based simulation, training and preparation of foreign military advisor and transition teams, mobilization and demobilization of deploying forces, range support and operations, logistics and maintenance operations, curriculum and leadership development, force modernization, open source data collection and engineering and technical support. Our integration of last year s acquisition of Omega Training Group has further expanded our defense services and customer base. This acquisition enhances our position at several key U.S. Army installations, including Forts Bliss and Hood, in Texas, and at Fort Benning, Georgia, that should become even more important as the Base Realignment and Closing (BRAC) efforts are fully implemented. This acquisition has also enabled us to expand our logistics services offerings to the U.S. Army.

Maintain a Diversified Business Mix

Edgar Filing: CUBIC CORP /DE/ - Form 10-K

We have a diverse mix of business in our three segments. Approximately 58% of our sales are made directly or indirectly to the U.S. government; however, this represents a wide variety of product and service sales to many different U.S. government agencies. The largest single contract in the transportation segment is the PRESTIGE contract in London which represented about 10% of consolidated sales in 2009. No other single customer represented 10 percent or more of our revenues.

Expand International Footprint

We have developed a large global presence in our three business segments. CTS has delivered over 400 projects in 40 major markets on five continents. In London, we continue to expand the city's PRESTIGE system and pursue other projects with train operating companies in the Greater London area. In Vancouver, we recently completed expansion of the automated fare collection system for the new Canada Line in advance of the 2010 Winter Olympics. We are also pursuing significant upcoming opportunities in Australia and Germany, and we recently established a new subsidiary in India.

CDS is actively marketing its domestic products and systems for export to the militaries of U.S. allies. Recently, we were awarded contracts to provide our Engagement Skills Trainer to the governments of Lebanon and Kyrgyzstan. In addition, we were recently awarded a contract to supply a ground combat training system to the Kingdom of Jordan. We are also working to supply additional ground and air combat training systems to allied nations in key international markets.

The expansion of MSS to new locations further reinforces our international business. For example, under a contract awarded by the Organization of American States, we are providing port security assessments and maritime security training in the independent Caribbean island nations of Trinidad and Tobago, and Saint Vincent and the Grenadines, and at other locations. In addition, we were recently awarded a new competitive Defense Department contract by the U.S. Africa Command headquartered in Stuttgart, Germany. Additionally, we were awarded a position on a new State Department contract to provide peacekeeping-related services to selected African nations.

Pursue Strategic Acquisitions

We are focused on finding attractive acquisitions to enhance our market positions. We look for specific growth opportunities at CDS, MSS and CTS, and adjacent markets in smart cards and security. In 2009, we acquired the Concord operations center and licenses on select software from the U.S. subsidiary of Australia-based Vix ERG Pty Ltd. The acquired assets will add approximately \$20 million in annual revenues and expand our services business to transit agencies in the San Francisco Bay area, Boston, Ventura, and Las Vegas. In addition, approximately 125 ERG employees have joined Cubic from ERG's U.S. operations and engineering operations in Perth, Australia.

OTHER MATTERS

We pursue a policy of seeking patent protection for our products where deemed advisable, but do not regard ourselves as materially dependent on patents for the maintenance of our competitive position.

We do not engage in any business that is seasonal in nature. Because our revenues are generated primarily from work on contracts performed by our employees and subcontractors, first quarter revenues tend to be lower than the other three quarters due to our policy of providing many of our employees seven holidays in the first quarter, compared to one or two in each of the other quarters of the year. This is not necessarily a consistent pattern as it depends upon actual activities in any given year.

Edgar Filing: CUBIC CORP /DE/ - Form 10-K

The cost of company sponsored research and development (R&D) activities was \$8.2 million, \$12.2 million and \$5.2 million in 2009, 2008 and 2007, respectively. We do not rely heavily on internally funded R&D, as most of our new product development occurs in conjunction with the performance of work on our contracts. The amount of contract-required product development activity was \$54 million in 2009 compared to \$55 million and \$66 million in 2008 and 2007, respectively; however, these costs are included in cost of sales as they are directly related to contract performance.

We comply with federal, state and local laws and regulations regarding discharge of materials into the environment and the handling and disposal of materials classed as hazardous and/or toxic. Such compliance has no material effect upon our capital expenditures, earnings or competitive position.

We employed approximately 7,400 persons at September 30, 2009.

Our domestic products and services are sold almost entirely by our employees. Overseas sales are made either directly or through representatives or agents.

Item 1A. RISK FACTORS.

The following are some of the factors we believe could cause our actual results to differ materially from expected and historical results. Additional risks and uncertainties not presently known to us, or that we currently see as immaterial, may also harm our business. If any of the risks or uncertainties described below or any such additional risks and uncertainties actually occur, our business, results of operations or financial condition could be materially and adversely affected.

We depend on government contracts for substantially all of our revenues and the loss of government contracts or a delay or decline in funding of existing or future government contracts could adversely affect our sales and cash flows and our ability to fund our growth.

Our revenues from contracts, directly or indirectly, with foreign and United States, state, regional and local governmental agencies represented more than 95% of our total revenues in fiscal year 2009. Although these various government agencies are subject to common budgetary pressures and other factors, many of our various government customers exercise independent purchasing decisions. Because of the concentration of business with governmental agencies, we are vulnerable to adverse changes in our revenues, income and cash flows if a significant number of our government contracts or subcontracts or prospects are delayed or canceled for budgetary or other reasons.

The factors that could cause us to lose these contracts or could otherwise materially harm our business, prospects, financial condition or results of operations include:

- re-allocation of government resources as the result of actual or threatened terrorism or hostile activities or for other reasons;

- budget constraints affecting government spending generally, or specific departments or agencies such as U.S. or foreign defense and transit agencies and regional transit agencies, and changes in fiscal policies or a reduction of available funding;

- Disruptions in our customers' ability to access funding from capital markets;

- curtailment of government's use of outsourced service providers;

- the adoption of new laws or regulations pertaining to government procurement;
- government appropriations delays or shutdowns;
- suspension or prohibition from contracting with the government or any significant agency with which we conduct business;
- impairment of our reputation or relationships with any significant government agency with which we conduct business;
- impairment of our ability to provide third-party guarantees and letters of credit; and
- delays in the payment of our invoices by government payment offices.

Government spending priorities may change in a manner adverse to our businesses.

In the past, our businesses have been adversely affected by significant changes in government spending during periods of declining budgets. A significant decline in overall spending, or the decision not to exercise options to renew contracts, or the loss of or substantial decline in spending on a large program in which we participate could materially adversely affect our business, prospects, financial condition or results of operations. As an example, the U.S. defense and intelligence budgets generally, and spending

in specific agencies with which we work, such as the Department of Defense, have declined from time to time for extended periods since the 1980s, resulting in program delays, program cancellations and a slowing of new program starts. Although spending on defense-related programs by the U.S. government has increased in recent years, future levels of expenditures and authorizations for those programs may decrease, remain constant or shift to programs in areas where we do not currently provide products or services.

Even though our contract periods of performance for a program may exceed one year, Congress must usually approve funds for a given program each fiscal year and may significantly reduce funding of a program in a particular year. Significant reductions in these appropriations or the amount of new defense contracts awarded may affect our ability to complete contracts, obtain new work and grow our business. Congress does not always enact spending bills by the beginning of the new fiscal year. Such delays leave the affected agencies under-funded which delays their ability to contract. Future delays and uncertainties in funding could impose additional business risks on us.

Our contracts with government agencies may be terminated or modified prior to completion, which could adversely affect our business.

Government contracts typically contain provisions and are subject to laws and regulations that give the government agencies rights and remedies not typically found in commercial contracts, including providing the government agency with the ability to unilaterally:

- terminate our existing contracts;
- reduce the value of our existing contracts;
- modify some of the terms and conditions in our existing contracts;
- suspend or permanently prohibit us from doing business with the government or with any specific government agency;
- control and potentially prohibit the export of our products;
- cancel or delay existing multiyear contracts and related orders if the necessary funds for contract performance for any subsequent year are not appropriated;
- decline to exercise an option to extend an existing multiyear contract; and

- claim rights in technologies and systems invented, developed or produced by us.

Most U.S. government agencies and some other agencies with which we contract can terminate their contracts with us for convenience, and in that event we generally may recover only our incurred or committed costs, settlement expenses and profit on the work completed prior to termination. If an agency terminates a contract with us for default, we are denied any recovery and may be liable for excess costs incurred by the agency in procuring undelivered items from an alternative source. We may receive show-cause or cure notices under contracts that, if not addressed to the agency's satisfaction, could give the agency the right to terminate those contracts for default or to cease procuring our services under those contracts.

In the event that any of our contracts were to be terminated or adversely modified, there may be significant adverse effects on our revenues, operating costs and income that would not be recoverable.

Failure to retain existing contracts or win new contracts under competitive bidding processes may adversely affect our revenue.

We obtain most of our contracts through a competitive bidding process, and substantially all of the business that we expect to seek in the foreseeable future likely will be subject to a competitive bidding process. Competitive bidding presents a number of risks, including:

- the need to compete against companies or teams of companies with more financial and marketing resources and more experience in bidding on and performing major contracts than we have;

Edgar Filing: CUBIC CORP /DE/ - Form 10-K

- the need to compete against companies or teams of companies that may be long-term, entrenched incumbents for a particular contract for which we are competing and that have, as a result, greater domain expertise and better customer relations;
- the need to compete to retain existing contracts that have in the past been awarded to us on a sole-source basis;
- the U.S. Government's increased emphasis on awarding contracts to small businesses could preclude us from bidding on certain work or reduce the scope of work we can bid as a prime contractor;
- the expense and delay that may arise if our competitors protest or challenge new contract awards;
- the need to bid on some programs in advance of the completion of their design, which may result in higher research and development expenditures, unforeseen technological difficulties, or increased costs which lower our profitability;
- the substantial cost and managerial time and effort, including design, development and marketing activities, necessary to prepare bids and proposals for contracts that may not be awarded to us;
- the need to develop, introduce, and implement new and enhanced solutions to our customers' needs;
- the need to locate and contract with teaming partners and subcontractors; and
- the need to accurately estimate the resources and cost structure that will be required to perform any fixed-price contract that we are awarded.

We may not be afforded the opportunity in the future to bid on contracts that are held by other companies and are scheduled to expire if the agency decides to extend the existing contract. If we are unable to win particular contracts that are awarded through the competitive bidding process, we may not be able to operate in the market for services that are provided under those contracts for a number of years. If we win a contract, and upon expiration, if the customer requires further services of the type provided by the contract, there is frequently a competitive rebidding process and there can be no assurance that we will win any particular bid, or that we will be able to replace business lost upon expiration or completion of a contract.

Because of the complexity and scheduling of contracting with government agencies, we occasionally incur costs before receiving contractual funding by the government agency. In some circumstances, we may not be able to recover these costs in whole or in part under subsequent

contractual actions.

If we are unable to consistently retain existing contracts or win new contract awards, our business prospects, financial condition and results of operations will be adversely affected.

The U.S. Government's increased emphasis on awarding contracts to small businesses could increase the number of contracts we receive as a subcontractor to small businesses. Some of these small businesses may not be financially sound, which could adversely affect our business.

There has been an increased emphasis by the U.S. government recently on awarding contracts to small businesses which may preclude companies the size of ours from obtaining certain work, other than as a subcontractor to these small businesses. There are inherent risks in contracting with small companies that may not have the capability or financial resources to perform these contracts or administer them correctly. If a small business with which we have a subcontract fails to perform, fails to bill the government properly or fails financially, we may have difficulty receiving timely payments or may incur bad debt write-offs if the small business is unable or unwilling to pay us for work we perform. This could result in significant adverse effects on our revenues, operating costs and cash flows.

Government audits of our contracts could result in a material charge to our earnings and have a negative effect on our cash position following an audit adjustment.

Many of our government contracts are subject to cost audits which may occur several years after the period to which the audit relates. If an audit identifies significant unallowable costs, we could incur a material charge to our earnings or reduction in our cash position.

Our international business exposes us to additional risks, including exchange rate fluctuations, foreign tax and legal regulations and political or economic instability that could harm our operating results.

Our international operations subject us to risks associated with operating in and selling products or services in foreign countries, including:

- devaluations and fluctuations in currency exchange rates;
- changes in foreign laws that adversely affect our ability to sell our products or services or our ability to repatriate profits to the United States;
- increases or impositions of withholding and other taxes on remittances and other payments by foreign subsidiaries or joint ventures to us;
- increases in investment and other restrictions or requirements by foreign governments in order to operate in the territory or own the subsidiary;
- costs of compliance with local laws, including labor laws;
- export control regulations and policies which govern our ability to supply foreign customers;
- unfamiliar and unknown business practices and customs;
- domestic and foreign government policies, including requirements to expend a portion of program funds locally and governmental industrial cooperation requirements;
- the complexity and necessity of using foreign representatives and consultants or being prohibited from such use;
- the uncertainty of the ability of foreign customers to finance purchases;

- imposition of tariffs or embargoes, export controls and other trade restrictions;
- the difficulty of management and operation of an enterprise in various countries; and
- economic and geopolitical developments and conditions, including international hostilities, acts of terrorism and governmental reactions, inflation, trade relationships and military and political alliances.

Our foreign subsidiaries generally conduct business in foreign currencies and enter into contracts and make purchase commitments that are denominated in foreign currencies. Accordingly, we are exposed to fluctuations in exchange rates, which could have a significant impact on our results of operations. We have no control over the factors that generally affect this risk, such as economic, financial and political events and the supply of and demand for applicable currencies. While we use foreign exchange forward and option contracts to hedge significant contract sales and purchase commitments that are denominated in foreign currencies, our hedging strategy may not prevent us from incurring losses due to exchange fluctuations.

Our operating margins may decline under our fixed-price contracts if we fail to estimate accurately the time and resources necessary to satisfy our obligations.

Approximately 71% of our revenues in 2009 were from fixed-price contracts under which we bear the risk of cost overruns. Our profits are adversely affected if our costs under these contracts exceed the assumptions we used in bidding for the contract. Sometimes we are required to fix the price for a contract before the project specifications are finalized, which increases the risk that we will incorrectly price these contracts. The complexity of many of our engagements makes accurately estimating the time and resources required more difficult.

We may be liable for civil or criminal penalties under a variety of complex laws and regulations, and changes in governmental regulations could adversely affect our business and financial position.

Our businesses must comply with and are affected by various government regulations that impact our operating costs, profit margins and our internal organization and operation of our businesses. These regulations affect how we do business and, in some instances, impose added costs. Any changes in

applicable laws could adversely affect our financial performance. Any material failure to comply with applicable laws could result in contract termination, price or fee reductions or suspension or debarment from contracting. The more significant regulations include:

- the Federal Acquisition Regulations and all department and agency supplements, which comprehensively regulate the formation, administration and performance of U.S. government contracts;
- the Truth in Negotiations Act and implementing regulations, which require certification and disclosure of all cost and pricing data in connection with contract negotiations;
- laws, regulations and executive orders restricting the use and dissemination of information classified for national security purposes and the exportation of certain products and technical data;
- regulations of most state and regional agencies and foreign governments similar to those described above;
- the Sarbanes-Oxley Act of 2002; and
- tax laws and regulations in the U.S. and in other countries in which we operate.

Our failure to identify, attract and retain qualified technical and management personnel could adversely affect our existing businesses.

We may not be able to attract or retain the highly qualified technical personnel, including engineers, computer programmers, and personnel with security clearances required for classified work, or management personnel to supervise such activities that are necessary for maintaining and growing our existing businesses.

We may incur significant costs in protecting our intellectual property which could adversely affect our profit margins. Our inability to protect our patents and proprietary rights could adversely affect our businesses prospects and competitive positions.

We seek to protect proprietary technology and inventions through patents and other proprietary-right protection. The laws of some foreign countries do not protect proprietary rights to the same extent as the laws of the United States. If we are unable to obtain or maintain these protections, we may not be able to prevent third parties from using our proprietary rights. In addition, we may incur significant expense both in protecting our intellectual property and in defending or assessing claims with respect to intellectual property owned by others.

We also rely on trade secrets, proprietary know-how and continuing technological innovation to remain competitive. We have taken measures to protect our trade secrets and know-how, including the use of confidentiality agreements with our employees, consultants and advisors. These agreements may be breached and remedies for a breach may not be sufficient to compensate us for damages incurred. We generally control and limit access to our product documentation and other proprietary information. Other parties may independently develop our know-how or otherwise obtain access to our technology.

We compete primarily for government contracts against many companies that are larger, better capitalized and better known than us. If we are unable to compete effectively, our business and prospects will be adversely affected.

Our businesses operate in highly competitive markets. Many of our competitors are larger, better financed and better known companies who may compete more effectively than we can. In order to remain competitive, we must keep our capabilities technically advanced and compete on price and on value added to our customers. Our ability to compete may be adversely affected by limits on our capital resources and our ability to invest in maintaining and expanding our market share.

The terms of our financing arrangements may restrict our financial and operational flexibility, including our ability to invest in new business opportunities.

We currently have unsecured borrowing arrangements. The terms of these borrowing arrangements include provisions that require and/or limit our levels of working capital, debt and net worth and coverage of fixed charges. We also have provided performance guarantees to various customers that include financial covenants including limits on working capital, debt, tangible net worth and cash flow coverage.

Our current \$150 million unsecured revolving credit facility expires in March 2010. We are in the process of negotiating a new credit facility and expect to pay higher interest rates and fees, and will be subject to new loan covenants under the new facility. These new covenants may create restrictions that could affect our financial and operational flexibility or subject us to different events of default. We may also incur future obligations that would subject us to additional covenants that could further affect our operations and financial capabilities.

Our revenues could be less than expected if we are not able to deliver services or products as scheduled due to disruptions in supply.

Because our internal manufacturing capacity is limited, we use contract manufacturers. While we use care in selecting our manufacturers, we have less control over the reliability of supply, quality and price of products or components than if we manufactured them. In some cases, we obtain products from a sole supplier or a limited group of suppliers. Consequently, we risk disruptions in our supply of key products and components if our suppliers fail or are unable to perform because of strikes, natural disasters, financial condition or other factors. Any material supply disruptions could adversely affect our ability to perform our obligations under our contracts and could result in cancellation of contracts or purchase orders, penalties, delays in realizing revenues, payment delays, as well as adversely affect our ongoing product cost structure.

Failure to perform by one of our subcontractors could materially and adversely affect our contract performance and our ability to obtain future business.

Our performance of contracts often involves subcontractors, upon which we rely to complete delivery of products or services to our customers. We may have disputes with subcontractors. A failure by a subcontractor to satisfactorily deliver products or services can adversely affect our ability to perform our obligations as a prime contractor. Any subcontractor performance deficiencies could result in the customer terminating our contract for default, which could expose us to liability for excess costs of reprocurement by the customer and have a material adverse effect on our ability to compete for other contracts.

We may acquire other companies, which could increase our costs or liabilities or be disruptive.

Part of our strategy involves the acquisition of other companies. We may not be able to integrate acquired entities successfully without substantial expense, delay or operational or financial problems. The acquisition and integration of new businesses involves risk. The integration of acquired businesses may be costly and may adversely impact our results of operations or financial condition:

Edgar Filing: CUBIC CORP /DE/ - Form 10-K

- we may need to divert management resources to integration, which may adversely affect our ability to pursue other more profitable activities;
- integration may be difficult as a result of the necessity of coordinating geographically separated organizations, integrating personnel with disparate business backgrounds and combining different corporate cultures;
- we may not be able to eliminate redundant costs anticipated at the time we select acquisition candidates; and
- one or more of our acquisition candidates may have unexpected liabilities or adverse operating issues that we fail to discover through our due diligence procedures prior to the acquisition.

Our results of operations have historically fluctuated and may continue to fluctuate significantly in the future, which could adversely affect the market price of our common stock.

Our revenues are affected by factors such as the unpredictability of contract awards due to the long procurement process for most of our products and services, the potential fluctuation of governmental

agency budgets, the time it takes for the new markets we target to develop and for us to develop and provide products and services for those markets, competition and general economic conditions. Our contract type/product mix and unit volume, our ability to keep expenses within budget, and our pricing affect our operating margins. Significant growth in costs to complete our contracts may adversely affect our results of operations in future periods. These factors and other risk factors described herein may adversely affect our results of operations and cause our financial results to fluctuate significantly on a quarterly or annual basis. Consequently, we do not believe that comparison of our results of operations from period to period is necessarily meaningful or predictive of our likely future results of operations. In some future financial period our operating results may be below the expectations of public market analysts or investors. If so, the market price of our securities may decline significantly.

CAUTIONARY STATEMENT ABOUT FORWARD-LOOKING INFORMATION

This report, including the documents that we incorporate by reference, contains forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended, that are subject to the safe harbor created by those sections. Any statements about our expectations, beliefs, plans, objectives, assumptions or future events or our future financial and/or operating performance are not historical and may be forward-looking. These statements are often, but not always, made through the use of words or phrases such as may, will, anticipate, estimate, plan, project, continuing, ongoing, expect, believe, intend, predict, potential, opportunity and similar words or phrases of these words or phrases. These statements involve estimates, assumptions and uncertainties, including those discussed in Risk Factors and elsewhere throughout this filing and in the documents incorporated by reference into this filing that could cause actual results to differ materially from those expressed in these statements.

Because the risk factors referred to above could cause actual results or outcomes to differ materially from those expressed in any forward-looking statements made by us or on our behalf, you should not place undue reliance on any forward-looking statements. In addition, past financial and/or operating performance is not necessarily a reliable indicator of future performance and you should not use our historical performance to anticipate results or future period trends. Further, any forward-looking statement speaks only as of the date on which it is made, and we undertake no obligation to update any forward-looking statement to reflect events or circumstances after the date on which the statement is made or to reflect the occurrence of unanticipated events. New factors emerge from time to time, and it is not possible for us to predict which factors will arise. In addition, we cannot assess the impact of each factor on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements.

Item 1B. UNRESOLVED STAFF COMMENTS.

None

Item 2. PROPERTIES.

We conduct our operations in approximately 1.6 million square feet of both owned and leased properties located in the United States and foreign countries. We own approximately 73% of the square footage, including 498,000 square feet located in San Diego, California and 467,000 square feet located in Orlando, Florida. All owned and leased properties are considered in good condition and, with the exception of the Orlando facility, adequately utilized. The following table identifies significant properties by business segment:

Location of Property	Owned or Leased
<u>Corporate Headquarters:</u>	
San Diego, CA	Owned
<u>Mission Support Services:</u>	
Columbus, GA	Leased and owned
El Paso, TX	Leased
Hampton, VA	Leased
Honolulu, HI	Leased
Kingstowne, VA	Leased
Lacey, WA	Leased
Leavenworth, KS	Leased

Teterboro, NJ	Leased
Vancouver, Canada	Leased

Item 3. LEGAL PROCEEDINGS.

In 1998, the Ministry of Defense for the Armed Forces of the Islamic Republic of Iran obtained a United States District Court judgment enforcing an arbitration award in its favor against us of \$2.8 million, plus costs and interest. Both parties appealed to the 9th Circuit Court of Appeals, where the cases are stayed. Several potential lienors of Iran's judgment have filed liens but have not obtained valid court orders enforcing the liens. We are not aware whether any such claimants against Iran's judgment have received Terrorism Risk Insurance Act funds (which would make their claims unenforceable). Under a 1979 Presidential executive order, all transactions by United States citizens with Iran are prohibited. Therefore, even if Iran were to prevail in the 9th Circuit litigation, it is unlikely that we would be permitted to pay any amount to Iran. Payments to valid lienors could potentially be enforced, so in a previous year we recorded a liability for the amount of the judgment and are continuing to accrue interest.

In December 2008, we were named in a class action lawsuit alleging misclassification of Training Analysts as exempt from overtime, seeking damages for overtime pay and back wages, as well as damages for various violations of California and federal wage and hour laws. We filed an Answer in January 2009. We sent a demand for indemnity to our prime contractor, and we sent a demand to our insurance carrier for coverage on some or all of the claims. Mediation was conducted in August 2009 and we settled the matter for \$1.7 million. The insurance carrier agreed to contribute \$0.3 million toward the settlement; however, we are still awaiting a response from the prime contractor. Preparation of a Settlement Agreement and related documents are in process. We expect preliminary court approval of the settlement in late 2009. We recorded a liability for the settlement amount less the insurance carrier contribution in the fourth quarter of fiscal 2009.

We are not a party to any other material pending proceedings and we consider all other matters to be ordinary proceedings incidental to the business. We believe the outcome of these proceedings and the proceedings described above will not have a materially adverse effect on our financial position.

Item 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS.

Information regarding submission of matters to a vote of security holders is incorporated herein by reference from our definitive Proxy Statement, which will be filed no later than 30 days prior to the date of the Annual Meeting of Shareholders.

PART II

Item 5. MARKET FOR THE REGISTRANT'S COMMON STOCK AND RELATED SECURITY HOLDER MATTERS.

The principal market on which our common stock is being traded is the New York Stock Exchange under the symbol CUB. The closing high and low sales prices for the stock, as reported in the consolidated transaction reporting systems of the American and New York stock exchanges for the quarterly periods during the past two fiscal years, and dividend information for those periods, are as follows:

MARKET AND DIVIDEND INFORMATION

Quarter	Sales Price of Common Shares						Dividends per Share	
	Fiscal 2009			Fiscal 2008			Fiscal 2009	Fiscal 2008
	High	Low		High	Low			
First	\$ 28.91	\$ 18.85	\$ 47.80	\$ 34.90			\$ 0.09	\$ 0.09
Second	31.43	22.50	35.99	25.42			0.09	0.09
Third	40.05	25.10	28.72	20.12				
Fourth	41.40	33.73	29.58	21.43			0.09	0.09

On November 12, 2009, the closing price of our common stock on the New York Stock Exchange was \$34.08. There were 927 shareholders of record of our common stock as of November 12, 2009.

Item 6. SELECTED FINANCIAL DATA.

FINANCIAL HIGHLIGHTS AND SUMMARY OF CONSOLIDATED OPERATIONS

(amounts in thousands, except per share data)

	Years Ended September 30,				
	2009	2008	2007	2006	2005
Results of Operations:					
Sales	\$ 1,016,657	\$ 881,135	\$ 889,870	\$ 821,386	\$ 804,372
Cost of sales	805,516	709,481	727,540	687,213	672,541
Selling, general and administrative expenses	111,828	98,613	94,107	96,325	110,109
Interest expense	2,031	2,745	3,403	5,112	5,386
Income taxes	29,554	20,385	23,662	12,196	453
Net income	55,686	36,854	41,586	24,133	11,628
Average number of shares outstanding					
	26,731	26,725	26,720	26,720	26,720
Per Share Data:					
Net income	\$ 2.08	\$ 1.38	\$ 1.56	\$ 0.90	\$ 0.44
Cash dividends	0.18	0.18	0.18	0.18	0.18
Year-End Data:					
Shareholders equity	\$ 420,845	\$ 388,852	\$ 382,771	\$ 323,226	\$ 297,158
Equity per share	15.74	14.55	14.33	12.10	11.12
Total assets	756,315	641,252	592,565	548,071	547,280
Long-term debt	20,570	25,700	32,699	38,159	43,776

This summary should be read in conjunction with the related consolidated financial statements and accompanying notes.

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

Our primary businesses are in the defense and transportation industries. For the year ended September 30, 2009, 70% of sales were derived from defense systems and services, while 30% were derived from transportation fare collection systems and other commercial operations. These are high technology businesses that design, manufacture and integrate complex systems to meet the needs of various federal and regional government agencies in the U.S. and other nations around the world. The U.S. Government remains our largest customer, accounting for approximately 58% of sales in 2009 compared to 54% in 2008 and 2007.

At September 30, 2009, we reevaluated our segment reporting in light of changes to our management structure, internal performance reporting and incentive compensation plans that became effective in 2009. Previously our defense business had been reported as a single segment, with a single executive responsible for the entire business, operating performance measured as a single unit and management incentive plans that were based on total defense segment performance. With the changes during the current fiscal year, we are now reporting results for two defense segments, Defense Systems and Mission Support Services. The Transportation Systems segment is still considered one reporting segment. We have reclassified prior period amounts to reflect this organizational change.

Mission Support Services (MSS) operates constructive military training systems, provides live training mission support, distributed interactive simulation, development of military training doctrine, force modernization services for NATO entrants and field operations and maintenance.

Cubic Defense Systems (CDS) is focused on two primary lines of business: Training Systems and Communications. The segment is a diversified supplier of live and virtual military training systems, and communication systems and products to the U.S. Department of Defense, other government agencies and allied nations. We design instrumented range systems for fighter aircraft, armored vehicles and infantry force-on-force live training; weapons effects simulations; laser-based tactical and communication systems; and precision gunnery solutions. Our communications products are aimed at intelligence, surveillance, and search and rescue markets.

Cubic Transportation Systems (CTS) develops and delivers innovative fare collection systems for public transit authorities worldwide. We provide hardware, software and multiagency, multimodal transportation integration technologies and a full scope of operational services that allow the agencies to efficiently collect fares, manage their operations, reduce shrinkage and make using public transit a more convenient and attractive option for commuters.

Consolidated Overview

Sales in fiscal 2009 increased 15% from 2008 due to growth in all three segments. About 60% of the growth was from our previously existing businesses, with the remainder due to acquisitions we made in 2008 and 2009. In 2009 sales exceeded \$1 billion for the first time in our history, totaling \$1.017 billion, compared to \$881.1 million in 2008. In 2008, sales were down slightly from 2007 because of the sale of our corrugated box business in the fourth quarter of 2007 and because of a transition in some of our defense systems contracts from the development phase to the production phase. This is described more fully in the segment discussion following.

As a result of the growth in sales and improved operating performance from CDS, our operating income increased 59% in fiscal 2009 to \$84.7 million from \$53.3 million in 2008. Last year's results had included a restructuring charge of \$6.2 million and an operating loss of \$15.6 million

in the communications business within CDS. We made two small transportation systems acquisitions in 2009 which resulted in a slight decrement to operating income this year, as the amortization of purchased intangibles exceeded the operating income from the acquired businesses. We believe this is a short-term situation, as the amortization charges are highest in the first year and profitability of the acquired contracts is expected to improve in future years.

Operating income decreased 14% in fiscal 2008 from \$62.1 million in 2007. Operating income from CTS increased significantly in 2008, more than doubling from the 2007 level. However, CDS incurred an operating loss in 2008 more than offsetting the improvement from CTS. In addition, we incurred the restructuring charge in 2008, as mentioned above. See the segment discussions following for further details of segment operating results.

Net income increased to \$55.7 million (\$2.08 per share) from \$36.9 million (\$1.38 per share) in 2008 and \$41.6 million (\$1.56 per share) in 2007. Higher net income resulted primarily from the improvement in operating income, as described above. This was partially offset by lower investment income due to lower interest rates and a provision for settlement of a lawsuit of \$1.4 million that reduced net income in the fourth quarter by approximately \$0.9 million, after applicable income taxes, or \$0.03 per share. Net income in 2008 was lower than in 2007 primarily because of the operating loss in CDS. The restructuring costs mentioned above also reduced net income in 2008 by approximately \$3.7 million after applicable income taxes, or \$0.14 per share. Also included in 2008 was a gain of \$1.2 million in the fourth quarter on the sale of our investment in a defense-related joint venture that added approximately \$0.8 million to net income, after applicable income taxes, or \$0.03 per share. In 2007 we sold our corrugated box business, also in the fourth quarter, for a gain of approximately \$0.6 million, after applicable income taxes, or \$0.02 per share. Reductions in tax contingency reserves accounted for approximately \$0.1 million, \$1.2 million and \$0.9 million, respectively, of the 2009, 2008 and 2007 net income.

The gross margin from product sales improved in 2009 to 25.1% from 21.4% in 2008 and 19.6% in 2007. Improved performance from CDS accounted for the improvement in 2009. In 2008, better performance from CTS systems contracts contributed to the gross margin improvement over 2007, partially offset by a lower margin from CDS due to the operating loss in the communications business. The gross margin from service sales was 16.1% in 2009 compared to 17.2% in 2008 and 16.3% in 2007. Gross margins in the MSS business were lower in 2009 primarily because of a competitively bid follow-on contract that generated lower margins than the previous contract had in 2008 and 2007. Higher sales and margins from CTS service contracts in Europe contributed to the improvement in 2008 over 2007.

Selling, general and administrative (SG&A) expenses increased to \$111.8 million or 11.0% of sales in 2009 compared to \$98.6 million, or 11.2% of sales, in 2008, and \$94.1 million, or 10.6% of sales, in 2007. SG&A increased in 2009 due to a bad debt write-off of \$3.1 million incurred at CDS and from the businesses acquired in 2008 and 2009. In 2008, SG&A increased at CDS due to increased bid and proposal expenditures.

Amortization expense increased to \$6.4 million or 0.6% of sales compared to \$1.3 million, or 0.2% of sales, in 2008, and \$0.9 million, or 0.1% of sales, in 2007. The increase in 2009 was due primarily to the acquisition of Omega in the 4th quarter of 2008, as well as from the transportation systems acquisitions made in 2009.

Company sponsored research and development (R&D) spending was \$8.2 million in 2009 compared to \$12.2 million in 2008 and \$5.2 million in 2007. R&D projects for the development of data link technologies begun in 2008 were completed, resulting in lower spending in 2009; however, this was partially offset by increased spending for transportation and security related projects. Our R&D spending continues to be incurred primarily in connection with customer funded activities. We do not rely heavily on company sponsored R&D, as most of our new product development occurs in conjunction with the performance of work on our contracts. The amount of contract required development activity in 2009 was \$54 million, compared to \$55 million in 2008 and \$66 million in 2007; however, these costs are included in cost of sales, rather than R&D, as they are directly related to contract performance.

Interest and dividend income decreased significantly in 2009 to \$1.6 million compared to \$6.4 million in 2008 and \$3.4 million in 2007, despite higher available cash balances, due to lower interest rates. Other Income (Expense) netted to income of \$0.9 million in 2009 compared to an expense of \$0.7 million in 2008 and income of \$1.3 million in 2007. In 2009 and 2007 we realized foreign currency exchange gains on advances to our foreign subsidiaries, compared to a loss in 2008. Interest expense decreased to \$2.0 million in 2009 compared to \$2.7 million in 2008 and

\$3.4 million in 2007 due to a reduction in long-term borrowings over the three year period.

Our effective tax rate for 2009 was 34.7% of pretax income compared to 35.6% in 2008 and 36.3% in 2007. The effective rate decreased in 2009 primarily because of a higher Research and Experimentation (R&E) credit realized this year due partially to an increase in qualifying activity. The credit for 2009 also included \$0.8 million from fiscal 2008 that was not realized until 2009 because the credit had expired and was not reinstated by the U.S. Congress until October 2008. Higher income in the U.S. added to our effective tax rate in 2009 due to higher state income taxes, however, this was partially offset by a lower provision for taxes from foreign earnings repatriation. The effective rates in 2009, 2008 and 2007 benefited from the reversal of tax contingency provisions amounting to a net \$0.1 million, \$1.2 million and \$0.9 million, respectively. Our effective tax rate could be affected in future years by, among other factors, the mix of business between U.S. and foreign jurisdictions, our ability to take advantage of available tax credits, and audits of our records by taxing authorities.

Mission Support Services Segment

Years ended September 30,	2009	2008	2007
		(in millions)	
Mission Support Services Sales	\$ 424.4	\$ 332.5	\$ 308.0
Mission Support Services Operating Income	\$ 27.9	\$ 27.8	\$ 27.6

MSS sales increased 28% in 2009 compared to an 8% increase in 2008 over 2007. About half of the sales increase in both years came from Omega, the company we acquired at the end of July 2008. The sales improvement in 2009 also came from an increase in activity at the Joint Readiness Training Center (JRTC) in Fort Polk, LA and at the U.S. Army Quartermaster School. In 2008, lower sales from the JRTC were more than offset by higher sales from the Quartermaster School contract which was new that year and from our contract with the U.S. Marine Corps that was expanded as a result of the contract renewal in 2008.

Operating income from MSS increased less than 1% in 2009, after increasing 1% in 2008. The new company, Omega, contributed over \$2 million to operating income in the first two months we owned it in 2008, however, the contract that generated much of that profit was scaled back significantly in 2009, resulting in lower operating income this year. Overall, Omega was only slightly profitable for the year, after covering acquisition related costs of \$0.4 million and amortization of intangible assets of \$5.4 million. Higher sales from the JRTC contract in 2009 helped to increase operating profits, in addition to better performance from certain operations and maintenance contracts. However, we realized lower operating income from the U.S. Marine Corp. contract, as it was competitively bid at a lower profit margin than we had experienced from the previous Marine Corp. contract. We did, however, receive a contract modification in 2009 related to the completed Marine Corp. contract that reimbursed us for out-of-scope costs expensed in 2008, adding \$1.2 million to operating income in 2009. We also provided a reserve of \$1.4 million in 2009 for settlement of a wage-related lawsuit on one of our contracts in California. In 2008, higher sales from the U.S. Marine Corps contract contributed to operating income growth. However, these increases were nearly offset by lower sales and profit margins from the JRTC contract and from other MSS contracts that had experienced particularly strong performance in 2007.

Defense Systems Segment

Years ended September 30,	2009	2008	2007
		(in millions)	
<u>Defense Systems Sales</u>			
Training systems	\$ 238.5	\$ 227.7	\$ 263.4
Communications	45.4	36.0	57.4
Tactical systems and other	1.5	11.6	12.3
	\$ 285.4	\$ 275.3	\$ 333.1
<u>Defense Systems Operating Income</u>			
Training systems	\$ 16.2	\$ 6.8	\$ 18.9
Communications	3.4	(15.6)	(0.7)
Tactical systems and other	(0.6)	(0.7)	(1.6)
	\$ 19.0	\$ (9.5)	\$ 16.6

Training Systems

Training Systems sales increased 5% in 2009 after decreasing 14% in 2008. Sales of small arms virtual training systems and air combat training systems increased in 2009, while ground combat training systems sales decreased. Sales were higher from the air combat training system contract known as P5 and from air combat training sales to the Far East. Sales were lower in 2009 from ground combat training systems in the U.K. and Canada.

The decrease in 2008 sales came from each of the major product lines, including air combat training, ground combat training and small arms virtual training systems. Sales were lower in 2008 by \$23.0 million from the P5 contract and from an air combat training system in Australia that was completed in the first quarter. Partially offsetting these sales decreases was an increase in sales from the new Joint Strike Fighter (JSF) development contract and other air combat training contracts. Sales in three major Training Systems product lines were impacted in 2008 by a transition from the development phase, where revenue is recognized on a cost-to-cost percentage completion basis, to the production phase, where we recognize revenues from production orders on a units-of-delivery percentage completion basis, resulting in the recording of sales when the product is delivered and accepted by the customer. This includes the P5 air combat training contract, electro-optics contracts and small arms training systems. This transition also resulted in an increase in inventories of \$30.3 million from these product lines in fiscal 2008, partially offset by customer advances of \$11.5 million.

Training Systems operating income increased from \$6.8 million in 2008 to \$16.2 million this year. Higher sales of air combat training systems and small arms virtual training systems and higher profit margins on air combat training systems in the Far East contributed to the improvement. In addition, last year's results included cost growth for the development of an electro-optic training system, which totaled \$9.6 million compared to \$3.6 million this year. Product shipments on this contract also contributed to the improved results for the year, adding \$2.3 million to operating income in 2009. Partially offsetting these profit improvements was a \$3.1 million allowance for doubtful accounts established during the second fiscal quarter this year. A company through which we sold training systems products to the U.S. government in previous periods failed to pass on to us cash they collected from the government on our behalf. We were able to collect a portion of the money they owed us and have negotiated a payment plan with them; however, the company appears to be in financial trouble and collection of the remainder continues to be doubtful. We will reverse the reserve only upon the collection of cash from them.

Training Systems operating income decreased 64% in 2008 compared to 2007. Lower sales from the P5 and Australian air combat training contracts and small arms virtual training systems contributed to the decrease in operating income. However, the primary cause of the decrease was cost growth of \$9.6 million on the electro-optics contract mentioned above. This cost growth stemmed from problems

encountered in the second quarter during system integration testing, resulting in increased engineering development costs for design changes and higher manufacturing and rework costs. We also experienced further cost growth of \$4.2 million in 2008 on a contract for the development of a ground combat training system in the Middle East. This compares to cost growth of \$5.1 million in 2007 on the same contract. Improved profit margins in 2008 from a ground combat training system in Canada partially offset the loss from this Middle East contract.

Communications

Communications sales improved to \$45.4 million this year compared to \$36.0 million last year, a 26% increase. A settlement agreement reached in the first quarter with the U.S. Navy on a data link development contract added \$3.3 million to sales and facilitated progress toward completion of the contract, further increasing sales for the year. Sales were also higher from a contract to develop a data link for unmanned aerial vehicles for a U.K. customer. Lower sales of power amplifiers partially offset the growth in data link sales for the year.

Sales from Communications decreased 37% in 2008, as lower sales were realized from contracts for the development of data links for unmanned aerial vehicles in the U.S. and U.K. and from a contract for the development of a data link for the U.S. Navy. These decreases were partially offset by higher sales of personnel locator systems and power amplifiers.

Communications operating income improved in 2009 to \$3.4 million from an operating loss of \$15.6 million last year. Cost growth on three data link development contracts had resulted in last year's operating loss. This year two of the three contracts generated operating income due to contract restructurings and change orders received. Lower sales of power amplifiers in 2009 resulted in lower operating income, partially offsetting the improvements in profitability from the data link contracts.

The primary cause of the \$15.6 million operating loss in Communications in 2008 was cost growth of \$9.5 million from a contract to develop new data link technology for unmanned aerial vehicles for a U.K. customer. As mentioned above, the contract was restructured in early 2009. Cost growth on two other data link development contracts impacted profitability by \$6.2 million in 2008. One of these is the U.S. Navy contract mentioned above for which we reached a settlement agreement with the customer in early 2009. In addition, we incurred costs on several research and development projects for new data link technology during 2008, which added \$2.7 million to the operating loss for the year. Partially offsetting these increased costs was higher operating income on higher sales of power amplifiers and personnel locator systems.

Transportation Systems Segment

Years ended September 30,	2009	2008	2007
		(in millions)	
Transportation Systems Sales	\$ 303.4	\$ 272.3	\$ 236.6
Transportation Systems Operating Income	\$ 44.1	\$ 43.0	\$ 20.1

CTS sales increased 11%, from \$272.3 million in 2008 to \$303.4 million in 2009. Sales increased in North America from a fare collection development contract awarded last year, from the sale of spare parts and from contracts we added in a small service business acquisition made in July 2009. In the U.K., higher sales came primarily from contracts with Transport for London and U.K. train operating companies, however, a lower average exchange rate between the British Pound and the U.S. Dollar in 2009 resulted in a decrease in the dollar value of U.K. sales of \$38.6 million compared to the rate in effect in 2008.

CTS sales increased 15% in 2008 primarily due to additional work from change orders on the PRESTIGE contract and from other contracts in the U.K. Sales were also higher from system installation work on a contract in Australia and increased sales of spare parts in North America. These increases were partially

offset by decreased sales from system installation contracts in North America and Sweden. The exchange rate between the British Pound and the U.S. Dollar had no impact on sales for 2008, when compared to 2007, as the average rate for the year was virtually the same as in 2007.

CTS operating income improved from \$43.0 million in 2008 to \$44.1 million in 2009, a 3% increase. Higher sales of spare parts added to operating income and contract restructuring agreements reached during the first quarter added a net \$1.6 million to operating income. As a result of one of the contract restructurings, we wrote off accounts receivable of \$4.1 million against the associated allowance for doubtful accounts, resulting in no impact on operating income. In addition, the successful completion of a new fare collection system in North America resulted in an additional contribution to operating income for the year. Although operating income in the U.K. was higher in 2009 than in 2008 as a result of higher sales, the lower British Pound vs. U.S. Dollar exchange rate negatively impacted operating income by \$8.8 million in 2009.

Operating income for CTS more than doubled in 2008 when compared to 2007. Higher sales and improved performance from U.K. contracts, including bonuses earned on the PRESTIGE contract for system usage, and profits from increased spares sales in the U.S. contributed to the increase in 2008. Cost growth on North American contracts was limited to \$1.6 million in 2008, a significant improvement over 2007 when cost growth on the same contracts had been \$7.0 million. Partially offsetting the profit improvements in 2008 was cost growth of \$3.4 million on a contract in Sweden and an investment in new technology of \$1.8 million we made related to a new contract in North America. A reduction in legal fees of \$2.0 million in 2008 also contributed to the operating income improvement. As mentioned above relating to sales, currency exchange between the British Pound and U.S. Dollar had no impact on 2008 operating income when compared to 2007.

Backlog

September 30,	2009	(in millions)	2008
<u>Total backlog</u>			
Transportation Systems	\$ 772.2		\$ 480.6
Mission Support Services	855.5		880.0
Defense Systems			
Training systems	484.4		363.6
Communications	69.0		45.9
Other	2.3		2.4
Total Defense Systems	555.7		411.9
Total	\$ 2,183.4		\$ 1,772.5
<u>Funded backlog</u>			
Transportation Systems	\$ 772.2		\$ 480.6
Mission Support Services	206.7		180.6
Defense Systems			
Training systems	484.4		363.6
Communications	69.0		45.9
Other	2.3		2.4
Total Defense Systems	555.7		411.9
Total	\$ 1,534.6		\$ 1,073.1

In addition to the amounts identified above, we have been selected as a participant in or, in some cases, the sole contractor for several substantial indefinite delivery/ indefinite quantity (IDIQ) contracts. IDIQ contracts are not included in backlog until an order is received.

In August 2008, Transport for London (TfL) notified our 37.5% owned subsidiary, TranSys, that they will be terminating the PRESTIGE fare collection system contract as of August 2010 in accordance with the early termination provision of the contract. As a result of this early termination, \$290 million (£142 million) was removed from transportation systems backlog as of September 30, 2008. However, in November 2008, TfL awarded Cubic directly a new three year contract that includes virtually all of the services currently being performed by TranSys through its shareholders. The term of this contract is for the time period from August 2010 to August 2013, with a base value of approximately \$272 million (£170 million), which was added to the September 30, 2009 backlog. The contract value will be indexed for inflation from August 2008 through its completion and additionally includes variable payments that are contingent upon system usage, similar to provisions that were contained in the PRESTIGE contract.

A decrease in the value of the British Pound vs. the U.S. Dollar between September 30, 2008 and September 30, 2009, resulted in a decrease in transportation systems backlog of approximately \$28 million.

The difference between total backlog and funded backlog represents options under multiyear service contracts. Funding for these contracts comes from annual operating budgets of the U.S. government and the options are normally exercised annually. Options for the purchase of additional systems or equipment are not included in backlog until exercised.

New Accounting Standards

On July 1, 2009 the Financial Accounting Standards Board officially launched the Accounting Standards Codification (*FASB ASC*), as the authoritative source of generally accepted accounting principles in the United States. The ASC is effective for financial statements issued for interim and annual periods ending after September 15, 2009. Rules and interpretive releases of the Securities and Exchange Commission (SEC) under federal securities laws are also sources of authoritative GAAP for SEC registrants. The adoption of this standard had no impact on our consolidated financial position, results of operations or cash flows.

In August 2009, the SEC issued guidance regarding the impact of the FASB ASC on certain SEC rules, regulations, and interpretive releases and staff accounting bulletins. The SEC advised that references to FASB standards in current SEC text should correspond to the rules in the FASB ASC. The FASB ASC does not supersede any SEC rules or regulations. The FASB ASC should not be considered the authoritative source for SEC guidance.

In September 2006, the FASB issued an accounting standard that defines fair value, establishes a framework and gives guidance regarding the methods used for measuring fair value, and expands disclosures about fair value measurements. We adopted this standard in the quarter ending December 31, 2008 with no material impact to our results of operations, financial position or cash flows.

In February 2007, the FASB issued an accounting standard that permits an entity to choose to measure many financial instruments and certain other items at fair value at specified election dates. Subsequent unrealized gains and losses on items for which the fair value option has been elected will be reported in earnings. We adopted this standard in the quarter ending December 31, 2008 with no material impact to our results of operations, financial position or cash flows.

Edgar Filing: CUBIC CORP /DE/ - Form 10-K

In December 2007 the FASB issued an accounting standard that applies to all transactions or other events in which an entity obtains control of one or more businesses. This standard applies to all business entities, including mutual entities that previously used the pooling-of-interests method of accounting for some business combinations. We will adopt this standard in the fiscal year beginning October 1, 2009. The impact of this standard will depend on the size and structure of future acquisitions.

In March 2008 the FASB issued an accounting standard that requires enhanced disclosures about an entity's financial position, financial performance, and cash flows. The statement requires that objectives for using derivative instruments be disclosed in terms of underlying risks and accounting designation. We adopted this standard in the quarter ended March 31, 2009 with no material impact to our results of operations, financial position or cash flows.

During the quarter ended June 30, 2009, we adopted a standard that establishes general accounting for and disclosures of events that occur after the balance sheet date but before financial statements are issued or are available to be issued. The adoption of this standard did not have a material impact on our results of operations, financial position or cash flows.

In December 2007, the FASB issued an accounting standard that requires all entities to report noncontrolling (minority) interests in subsidiaries as equity in the consolidated financial statements. This standard is effective for fiscal years beginning after December 15, 2008, which for us will be the fiscal year beginning October 1, 2009. We currently do not expect that the adoption of this standard will have a material impact on our results of operations, financial position or cash flows.

In December 2008, the FASB issued a standard which expands the disclosure requirements about plan assets for defined benefit pension plans and postretirement plans. This standard is effective for financial statements issued for fiscal years ending after December 15, 2009, which for us will be the fiscal year beginning October 1, 2009. We currently do not expect that the adoption of this standard will have a material impact on our results of operations, financial position or cash flows.

In June 2009, the FASB issued a standard which changes the approach in determining whether an entity is a variable interest entity, and modifies the methods allowed for determining the primary beneficiary of a variable interest entity. In addition, this standard requires ongoing reassessments of whether an enterprise is the primary beneficiary of a variable interest entity and enhanced disclosures related to an enterprise's involvement in a variable interest entity. We are currently evaluating the impact that the adoption of this standard will have on our results of operations, financial position or cash flows. This standard is effective for the first annual reporting period that begins after November 15, 2009, which for us will be the fiscal year beginning October 1, 2010.

In October 2009, the FASB issued revised accounting guidance, which can be applied prospectively or retrospectively. This guidance modifies the objective-and-reliable-evidence-of-fair-value criterion from the separation criteria used to determine whether an arrangement involving multiple deliverables contains more than one unit of accounting, replaces references to fair value with selling price to distinguish from the fair value measurement required under the Fair Value Measurements and Disclosures guidance, provides a hierarchy that entities must use to estimate the selling price, eliminates the use of the residual method for allocation, and expands the ongoing disclosure requirements. We are currently evaluating the effect that adoption of this update will have, if any, on our consolidated financial position, results of operations, or cash flows. This revised guidance is effective for new or materially modified arrangements in fiscal years beginning on or after June 15, 2010, and we expect to adopt it in the fiscal year beginning October 1, 2010, although early adoption is allowed.

Liquidity and Capital Resources

Operating activities provided cash of \$176.0 million in 2009, compared to \$92.7 million in 2008, and \$69.2 million in 2007. In addition to cash generated by earnings, a decrease in accounts receivable in each of the three years amounting to \$36.2 million, \$40.5 million and \$18.1 million in 2009, 2008 and 2007, respectively, contributed to the positive cash flows. In addition, net customer advances of \$48.7 million, \$17.0 million and \$12.2 million in 2009, 2008 and 2007, respectively, added to the positive result. Growth in inventories partially offset these improvements in each of the three years, using cash of \$4.3 million, \$18.7 million and \$7.6 million, respectively, reflecting the transition from development type contracts to production contracts described in the Defense Systems section above and a temporary build-up of inventories at CTS related to one contract in 2009. Positive operating cash flows in 2009 and 2008 came from all three segments, with CDS providing more than half of the operating cash flows in 2009. In 2008 the greater portion came from CTS. All of the operating cash flows in 2007 came from CTS, while CDS and MSS cash flows were slightly negative for the year.

We have classified certain unbilled accounts receivable balances as noncurrent because we do not expect to receive payment within one year from the balance sheet date. At September 30, 2009, this balance was \$13.4 million compared to \$19.9 million at September 30, 2008.

Cash flows used in investing activities in 2009 included two small transportation systems acquisitions made during the year and the final payment of \$6.1 million from our 2008 acquisition of Omega Training Group, Inc. We also made normal capital expenditures of \$5.3 million and purchased marketable securities totaling \$8.1 million in 2009. In 2008 our acquisition of Omega used cash of \$53.8 million, net of cash acquired. We made capital expenditures of \$8.1 million in 2008, partially offset by proceeds of \$1.8 million from the sale of our interest in a joint venture. We also liquidated \$27.2 million of short-term investments in early 2008, thereby avoiding much of the turmoil in the credit markets that occurred later in the year. During 2007 we had invested a net of \$18.3 million in these financial instruments, received \$3.8 million from the sale of our former corrugated box business and made \$6.1 million in capital expenditures.

Financing activities in 2009 included scheduled payments on long-term borrowings of \$6.0 million and the payment of a dividend to shareholders of \$4.8 million (18 cents per share). Similarly, in 2008 financing activities included payments on long-term borrowings of \$6.1 million and the payment of a dividend to shareholders of \$4.8 million (18 cents per share). Financing activities in 2007 included the repayment of short term borrowings of \$10.0 million and scheduled payments on long-term borrowings of \$6.1 million, in addition to the payment of a dividend to shareholders of \$4.8 million (18 cents per share).

Accumulated other comprehensive income decreased \$18.9 million in 2009 primarily because of an increase in the recorded liability for our pension plans which reduced the balance by \$15.2 million after applicable income taxes. In addition, foreign currency translation adjustments also reduced the balance by \$3.9 million. These adjustments, less a small unrealized gain from cash flow hedges, resulted in a negative balance in accumulated other comprehensive income of \$11.4 million at September 30, 2009 compared to a positive balance of \$7.6 million at September 30, 2008.

The pension plan unfunded balance increased from the September 30, 2008 balance of \$16.5 million to \$32.2 million at September 30, 2009. This decrease in the funded position can be attributed primarily to a decrease in the discount rate we used to calculate the pension liability.

The net deferred tax asset increased to \$36.2 million at September 30, 2009 compared to \$31.7 million at September 30, 2008. The reason for the increase is that the effect of recording adjustments to the pension liability through other comprehensive income resulted in a deferred tax asset of \$12.2 million at September 30, 2009 compared to \$4.0 million at September 30, 2008. We expect to generate sufficient taxable income in the future such that the net deferred tax asset will be realized.

We own 37.5% of the common stock of Transaction Systems Limited (TranSys), a special-purpose company formed in the United Kingdom to bid on the PRESTIGE fare collection system contract, which outsourced most of the functions of the Transport for London (TfL) fare collection system. In August 2008, TfL notified TranSys that they will be terminating the PRESTIGE contract as of August 2010 in accordance with the early termination provision of the contract. As a result of this termination for convenience, upon completion of the contract in 2010, the operations of TranSys will cease.

The contract termination notice triggered a requirement for TranSys to engage an independent engineer to produce a report on the state of the assets associated with the PRESTIGE system. The engineer is scheduled to deliver their report in December 2009, stating whether, in their opinion, the fare collection system assets are able to pass a Performance Test for a period of two years beyond the contract termination. The Performance Test requires the assets to perform at contractual minimum levels with broadly the same level of maintenance as that performed under the contract. If the engineer determines that the assets may fail the Performance Test then TranSys and its subcontractors have until

August 2010 to carry out the necessary remediation of the assets.

At the date of the termination of the contract in August 2010, the same engineer will deliver a Supplementary Report which is a follow up assessment to take into account the remediation efforts of TranSys and its subcontractors, and to give an opinion on the remaining level of remediation work required in order to allow the system to pass the Performance Test for the two year period. The contract allows TfL to withhold an amount up to approximately £40 million (\$64 million) from its final payment to TranSys pending the delivery of the Supplementary Report and the completion of any remediation work identified in the report. This process is not expected to take longer than six months and TfL would be required to pay interest on any funds withheld.

TranSys is required to repay the banks in August 2010 and, to the extent that there is a funding shortfall in TranSys because of a withhold by TfL, the shareholders are each required to provide TranSys their share of the cash required to fully repay the debt until the funds are returned to TranSys by TfL, at which time the shareholders would be repaid by TranSys. We estimate that our share of this withhold could be as much as \$38.5 million. In addition, although we consider the possibility remote, if the other shareholders of TranSys fail to provide their share of the funding, we could be forced to provide the entire funding amount to TranSys for up to six months. While there is the possibility that TfL will withhold some amount from TranSys upon contract termination, we do not believe this will be necessary. In recent years the fare collection system has consistently exceeded the contractual performance levels and we believe that sufficient costs have been included in our estimated costs to complete the contract to continue this level of performance for the required period. In addition, since we have been selected as the successor contractor to the PRESTIGE contract, we believe TfL will have no reason to withhold funds to assure any required remediation will be completed. However, there remains the possibility that we will be required to provide some amount of funding to TranSys for up to 6 months following the end of the contract in August 2010.

Our financial condition remains strong with working capital of \$315.2 million and a current ratio of 2.2 to 1 at September 30, 2009. We expect that cash on hand and our ability to access the debt markets will be adequate to meet our working capital requirements for the foreseeable future. In addition to the short-term borrowing arrangement we have in New Zealand, we have a committed five year credit facility from a group of financial institutions in the U.S., aggregating \$150 million. This agreement will expire in March 2010 and we are currently in negotiations for a new three year agreement for the same amount. We expect the annual fees under the new arrangement to increase by several hundred thousand dollars per year. As of September 30, 2009, \$45.3 million of this capacity was used for letters of credit, leaving an additional \$104.7 million available. Our total debt to capital ratio at September 30, 2009 was less than 6%. In addition, our cash and short-term investments totaled \$252.2 million at September 30, 2009 which exceeded our total long-term debt by \$227.1 million. Our cash is invested primarily in highly liquid government treasury instruments in the U. S. and Europe.

The following is a schedule of our contractual obligations outstanding as of September 30, 2009:

	Total	Less than 1 Year	1 - 3 years (in millions)	4 - 5 years	After 5 years
Long-term debt	\$ 25.1	\$ 4.6	\$ 9.1	\$ 9.1	\$ 2.3
Interest payments	4.2	1.4	1.8	0.7	0.3
Operating leases	19.9	6.7	9.1	3.2	0.9
Deferred compensation	9.0	1.1	1.2	0.8	5.9
	\$ 58.2	\$ 13.8	\$ 21.2	\$ 13.8	\$ 9.4

Critical Accounting Policies, Estimates and Judgments

Our financial statements are prepared in accordance with accounting principles that are generally accepted in the United States. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets and liabilities, and disclosure of contingent assets

and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. We continually evaluate our estimates and judgments, the most critical of which are those related to revenue recognition, income taxes, valuation of goodwill, purchased intangibles and pension liabilities. We base our estimates and judgments on historical experience and other factors that we believe to be reasonable under the circumstances. Materially different results can occur as circumstances change and additional information becomes known.

Besides the estimates identified above that are considered critical, we make many other accounting estimates in preparing our financial statements and related disclosures. All estimates, whether or not deemed critical, affect reported amounts of assets, liabilities, revenues and expenses, as well as disclosures of contingent assets and liabilities. These estimates and judgments are also based on historical experience and other factors that are believed to be reasonable under the circumstances. Materially different results can occur as circumstances change and additional information becomes known, even for estimates and judgments that are not deemed critical.

This discussion of critical accounting policies, estimates and judgments should be read in conjunction with other disclosures included in this discussion, and the Notes to the Consolidated Financial Statements related to estimates, contingencies and new accounting standards. Significant accounting policies are identified in Note 1 to the Consolidated Financial Statements. We have discussed each of the critical accounting policies and the related estimates with the audit committee of the Board of Directors.

Revenue Recognition

A significant portion of our business is derived from long-term development, production and system integration contracts. We consider the nature of these contracts, and the types of products and services provided, when we determine the proper accounting for a particular contract. Generally, we record revenue for long-term fixed price contracts on a percentage of completion basis using the cost-to-cost method to measure progress toward completion. Most of our long-term fixed-price contracts require us to deliver minimal quantities over a long period of time or to perform a substantial level of development effort in relation to the total value of the contract. Under the cost-to-cost method of accounting, we recognize revenue based on a ratio of the costs incurred to the estimated total costs at completion. For certain other long-term, fixed price production contracts not requiring substantial development effort we use the units-of-delivery percentage completion method as the basis to measure progress toward completing the contract and recognizing sales. The units-of-delivery measure is a modification of the percentage-of-completion method, which recognizes revenues as deliveries are made to the customer generally using unit sales values in accordance with the contract terms. We estimate profit as the difference between total estimated revenue and total estimated cost of a contract and recognize that profit over the life of the contract based on deliveries. Amounts representing contract change orders, claims or other items are included in the contract value only when they can be reliably estimated and realization is considered probable. Provisions are made on a current basis to fully recognize any anticipated losses on contracts.

We record sales under cost-reimbursement-type contracts as we incur the costs. Incentives or penalties and awards applicable to performance on contracts are considered in estimating sales and profits, and are recorded when there is sufficient information to assess anticipated contract performance. Incentive provisions that increase or decrease earnings based solely on a single significant event are not recognized until the event occurs.

Sales of products are recorded when a firm sales agreement is in place, delivery has occurred and collectibility of the fixed or determinable sales price is reasonably assured. Sales for fixed-price service contracts that do not contain measurable units of work performed are generally recognized on a straight-line basis over the contractual service period, unless evidence suggests that the revenue is earned, or obligations fulfilled, in a different manner. Sales for fixed-price service contracts that contain measurable units of work performed are recognized when the units of work are completed.

Sales and profits on contracts that specify multiple deliverables are allocated to separate units of accounting when there is objective evidence of fair value and that each accounting unit has value to the customer on a stand-alone basis.

Income Taxes

Significant judgment is required in determining our income tax provisions and in evaluating our tax return positions. We establish reserves when, despite our belief that our tax return positions are fully supportable, we believe it is more-likely-than-not a tax position taken or expected to be taken in a tax return, if examined, would be challenged and that we may not prevail. We adjust these reserves in light of changing facts and circumstances, such as the progress of a tax audit.

Tax regulations require items to be included in the tax return at different times than the items are reflected in the financial statements and are referred to as timing differences. In addition, some expenses are not deductible on our tax return and are referred to as permanent differences. Timing differences create deferred tax assets and liabilities. Deferred tax assets generally represent items that can be used as a tax deduction or credit in future years for which we have already recorded the benefit in our income statement. We establish valuation allowances for our deferred tax assets when the amount of expected future taxable income is not likely to support the use of the deduction or credit. Deferred tax liabilities generally represent deductions we have taken on our tax return but have not yet recognized as expense in our financial statements.

We have not recognized any United States tax expense on undistributed earnings of our foreign subsidiaries since we intend to reinvest the earnings outside the U.S. for the foreseeable future. These undistributed earnings totaled approximately \$57.5 million at September 30, 2009. Annually we evaluate the capital requirements in our foreign subsidiaries and determine the amount of excess capital, if any, that is available for distribution. Whether or not we actually repatriate the excess capital in the form of a dividend, we would provide for U.S. taxes on the amount determined to be available for distribution. This evaluation is judgmental in nature and, therefore, the amount of U.S. taxes provided on undistributed earnings of our foreign subsidiaries is affected by these judgments. Based on this analysis in 2009, we determined that 12.0 million British pounds (\$18.4 million, net of hedge losses) was excess capital in the U.K. and that 10.0 million New Zealand Dollars (\$6.4 million, net of hedge losses) was excess capital in New Zealand and paid dividends in these amounts to the U.S. parent company. U.S. taxes provided on these dividends amounted to \$3.1 million in 2009.

Valuation of Goodwill

We evaluate our recorded goodwill balances for potential impairment annually by comparing the fair value of each reporting unit to its carrying value, including recorded goodwill. Our annual testing date is June 30. We have not yet had a case where the carrying value exceeded the fair value; however, if it did, impairment would be measured by comparing the derived fair value of goodwill to its carrying value, and any impairment determined would be recorded in the current period. To date there has been no impairment of our recorded goodwill. Goodwill balances by reporting unit are as follows:

September 30,	2009	(in millions)	2008
Mission Support Services	\$ 36.7		\$ 36.7
Defense Systems	15.3		16.1
Transportation Systems	7.4		8.2
Total goodwill	\$ 59.4		\$ 61.0

Edgar Filing: CUBIC CORP /DE/ - Form 10-K

Determining the fair value of a reporting unit for purposes of the goodwill impairment test is judgmental in nature and involves the use of estimates and assumptions. These estimates and assumptions could have a significant impact on whether or not an impairment charge is recognized and also the magnitude of any such charge. We currently perform internal valuation analysis and consider other market information that is publicly available. Estimates of fair value are primarily determined using discounted cash flows and

comparisons with recent transactions. These approaches use significant estimates and assumptions including projected future cash flows, discount rate reflecting the inherent risk in future cash flows, perpetual growth rate and determination of appropriate market comparables.

For fiscal 2009, the discounted cash flows for each reporting unit were based on discrete three-year financial forecasts developed by management for planning purposes. Cash flows beyond the three-year discrete forecasts were estimated based on projected growth rates and financial ratios, influenced by an analysis of historical ratios, and by calculating a terminal value at the end of ten years. The compound annual growth rates for sales ranged from 5.0% to 8.0% and for operating profit margins ranged from 7.0% to 10.0% for the reporting units, beyond the discrete forecast period. The future cash flows were discounted to present value using a discount rate of 12.0%. We did not recognize any goodwill impairment as a result of performing this annual test. Changes in estimates and assumptions we make in conducting our goodwill assessment could affect the estimated fair value of one or more of our reporting units and could result in a goodwill impairment charge in a future period. However, a 10% decrease in the estimated fair value of any of our reporting units at June 30, 2009 would not have resulted in a goodwill impairment charge.

Purchased Intangibles

We generally fund acquisitions using cash on hand. The purchase price of an acquisition is allocated to the assets acquired and liabilities assumed using the fair values determined by management as of the acquisition day, with any excess purchase price recorded as goodwill. We amortize intangible assets acquired as part of business combinations over their estimated useful lives unless their useful lives are determined to be indefinite. For certain business combinations, the amounts we record related to purchased intangibles are determined from independent valuations. Our purchased intangibles primarily relate to contracts and programs acquired and customer relationships, which are amortized over periods of 15 years or less.

Pension Costs

The measurement of our pension obligations and costs is dependent on a variety of assumptions used by our actuaries. These assumptions include estimates of the present value of projected future pension payments to plan participants, taking into consideration the likelihood of potential future events such as salary increases and demographic experience. These assumptions may have an effect on the amount and timing of future contributions.

The assumptions used in developing the required estimates include the following key factors:

- Discount rates
- Inflation
- Salary growth
- Expected return on plan assets
- Retirement rates
- Mortality rates

Edgar Filing: CUBIC CORP /DE/ - Form 10-K

We base the discount rate assumption on investment yields available at year-end on high quality corporate long-term bonds. Our inflation assumption is based on an evaluation of external market indicators. The salary growth assumptions reflect our long-term actual experience in relation to the inflation assumption. The expected return on plan assets reflects asset allocations, our historical experience, our investment strategy and the views of investment managers and large pension sponsors. Retirement and mortality rates are based primarily on actual plan experience. The effects of actual results differing from our assumptions are accumulated and amortized over future periods, and therefore, generally affect our recognized expense in such future periods.

Changes in the above assumptions can affect our financial statements, although the relatively small size of our defined benefit pension plans limits the impact any individual assumption changes can have on earnings. For example, a 50 basis point change in the assumed rate of return on assets would have changed the pension expense recorded in 2009 by about \$0.6 million, before applicable income taxes.

Item 7a. QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK

Interest Rate Risk

We invest in money market instruments and short-term marketable debt securities whose return is tied to short-term interest rates being offered at the time the investment is made. We maintain short-term borrowing arrangements in the U.S. and New Zealand which are also tied to short term rates (the U.S. prime rate and the New Zealand base rate). We also have senior unsecured notes payable to insurance companies that are due in annual installments. These notes have fixed coupon interest rates. See Note 5 to the Consolidated Financial Statements for more information.

Interest income earned on our short-term investments is affected by changes in the general level of interest rates in the U.S., the U.K., and New Zealand. These income streams are generally not hedged. Interest expense incurred under the short-term borrowing arrangements is affected by changes in the general level of interest rates in the U.S. and New Zealand. The expense related to these cost streams is usually not hedged since it is either revolving, payable within three months and/or immediately callable by the lender at any time. Interest expense incurred under the long-term notes payable is not affected by changes in any interest rate because it is fixed. However, we have in the past, and may in the future, use an interest rate swap to essentially convert this fixed rate into a floating rate for some or all of the long-term debt outstanding. The purpose of a swap would be to tie the interest expense risk related to these borrowings to the interest income risk on our short-term investments, thereby mitigating our net interest rate risk. We believe that we are not significantly exposed to interest rate risk at this point in time. There was no interest rate swap outstanding at September 30, 2009.

Foreign Currency Exchange Risk

In the ordinary course of business, we enter into firm sale and purchase commitments denominated in many foreign currencies. We have a policy to hedge those commitments greater than \$20,000 by using foreign currency exchange forward and option contracts that are denominated in currencies other than the functional currency of the subsidiary responsible for the commitment, typically the British pound, Canadian dollar, Singapore dollar, Euro, Swedish krona, New Zealand dollar and Australian dollar. These contracts are designed to be effective hedges regardless of the direction or magnitude of any foreign currency exchange rate change, because they result in an equal and opposite income or cost stream that offsets the change in the value of the underlying commitment. See Note 1 to the Consolidated Financial Statements for more information on our foreign currency translation and transaction accounting policies. We also use balance sheet hedges to mitigate foreign exchange risk. This strategy involves incurring British pound denominated debt (See Interest Rate Risk above) and having the option of paying off the debt using U.S. dollar or British pound funds. We do not believe that we are significantly exposed to foreign currency exchange rate risk at this point in time.

Investments in our foreign subsidiaries in the U.K., Australia, New Zealand, and Canada are not hedged because we consider them to be invested indefinitely. In addition, we generally have control over the timing and amount of earnings repatriation, if any, and expect to use this control to mitigate foreign currency exchange risk.

CUBIC CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

September 30, 2009

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Organization and Nature of the Business: We design, develop and manufacture products which are mainly electronic in nature, provide government services and services related to products previously produced by us and others. Our principal lines of business are defense systems, defense services, and transportation fare collection systems. Our principal customers for defense products and services are the United States and foreign governments. Our transportation fare collection systems are sold primarily to large local government agencies in the United States and worldwide.

Principles of Consolidation: The consolidated financial statements include the accounts of Cubic Corporation and its majority-owned subsidiaries. All significant intercompany balances and transactions have been eliminated in consolidation. The consolidation of foreign subsidiaries requires translation of their assets and liabilities into U.S. dollars at year-end exchange rates. We translate our statements of income and cash flows at the average exchange rates for each year. Transaction gains and losses on advances to foreign subsidiaries amounted to a \$1.8 million gain in 2009, a \$1.0 million loss in 2008 and a gain of \$0.7 million in 2007.

Cash Equivalents: We consider highly liquid investments with maturity of three months or less when purchased to be cash equivalents.

Concentration of Credit Risk: We have established guidelines pursuant to which our cash and cash equivalents are diversified among various money market instruments and investment funds. These guidelines emphasize the preservation of capital by requiring minimum credit ratings assigned by established credit organizations. We achieve diversification by specifying maximum investments in each instrument type and issuer. The majority of these investments are not on deposit in federally insured accounts.

Fair Value of Financial Instruments: We carry financial instruments, including cash equivalents, accounts receivable, accounts payable and accrued liabilities at cost, which we believe approximates fair value because of the short-term maturity of these instruments. The fair value of long-term debt is based upon quoted market prices for the same or similar debt instruments and approximates the carrying value of the debt. Receivables consist primarily of amounts due from U.S. and foreign governments for defense products and local government agencies for transportation systems. Due to the nature of our customers, we generally do not require collateral. We have limited exposure to credit risk as we have historically collected substantially all of our receivables from government agencies. We generally require no allowance for doubtful accounts for these customers unless specific contractual circumstances warrant it.

In the quarter ended December 31, 2008 we adopted a new accounting standard that clarifies the definition of fair value, prescribes methods for measuring fair value, establishes a fair value hierarchy based on the inputs used to measure fair value, and expands disclosures about the use of

Edgar Filing: CUBIC CORP /DE/ - Form 10-K

fair value measurements. The valuation techniques required are based upon observable and unobservable inputs. Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect internal market assumptions. The two types of inputs create the following fair value hierarchy:

- Level 1 - Quoted prices for identical instruments in active markets.
- Level 2 - Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations whose inputs are observable or whose significant value drivers are observable.
- Level 3 - Significant inputs to the valuation model are unobservable.

CUBIC CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS Continued

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES Continued

The following table presents assets and liabilities measured and recorded at fair value on our Balance Sheet on a recurring basis. All are categorized as Level 2.

September 30,	2009	2008
	(in thousands)	
Assets		
Short-term investments	\$ 8,127	\$ 4,285
Derivative assets	18,106	4,285
Total assets	26,233	4,285
Liabilities		
Derivative liabilities	17,933	4,285
Net assets	\$ 8,300	\$

Short-term Investments: Short-term investments include marketable U.S. government agency securities and pre-refunded municipal bonds that may be purchased at a discount or premium, may have callable options, and are categorized as available-for-sale securities. The securities in our portfolio had contractual maturities of approximately two years at September 30, 2009. We record short-term investments at fair value and we would record any net difference between fair market value and cost in Accumulated Other Comprehensive Income (Loss) on the Consolidated Balance Sheets; however, the difference between cost and fair market value was not material at September 30, 2009.

Inventories: We state our inventories at the lower of cost or market. We determine cost using the first-in, first-out (FIFO) method, which approximates current replacement cost. We value our work in process at the actual production and engineering costs incurred to date, including applicable overhead, and reduce the value by charging any amounts in excess of estimated realizable value to cost of sales. Where contracts include advances, performance-based payments and progress payments, we reflect the advances as an offset against any related inventory balances. Costs we incur for certain government contracts include general and administrative costs as allowed by government cost accounting standards. The amounts remaining in inventory at September 30, 2009 and 2008 were \$7.4 million and \$5.1 million respectively.

Property, Plant and Equipment: We carry property, plant and equipment at cost. We provide depreciation in amounts sufficient to amortize the cost of the depreciable assets over their estimated useful lives. Generally, we use straight-line methods for real property over estimated useful lives ranging from 15 to 39 years or the term of the underlying lease for leasehold improvements. We use accelerated methods (declining balance and sum-of-the-years-digits) for machinery and equipment over estimated useful lives ranging from five to seven years. Our provisions for depreciation of plant and equipment and amortization of leasehold improvements amounted to \$9.2 million, \$8.3 million and \$7.9 million in 2009, 2008 and 2007, respectively.

Goodwill: We evaluate goodwill for potential impairment annually by comparing the fair value of a reporting unit to its carrying value, including recorded goodwill. If the carrying value exceeds the fair value, we would measure impairment by comparing the derived fair value of goodwill to its carrying value, and any impairment determined would be recorded in the current period. To date there has been no impairment of our recorded goodwill.

CUBIC CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS Continued

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES Continued

The changes in the carrying amount of goodwill for the two years ended September 30, 2009 are as follows:

	Transportation Systems	Defense Systems	Mission Support Services	Total
	(in thousands)			
Balances at October 1, 2007	\$ 9,362	\$ 16,951	\$ 9,690	\$ 36,003
Goodwill acquired during the year			27,045	27,045
Reduction of acquired tax accrual		(435)		(435)
Foreign currency exchange rate changes	(1,152)	(429)		(1,581)
Balances at September 30, 2008	8,210	16,087	36,735	61,032
Reduction of acquired tax accrual		(1,083)		(1,083)
Foreign currency exchange rate changes	(772)	256		(516)
Balances at September 30, 2009	\$ 7,438	\$ 15,260	\$ 36,735	\$ 59,433

Purchased Intangible Assets: The table below summarizes our purchased intangible assets:

(in thousands)	September 30, 2009			September 30, 2008		
	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
Contract and program intangibles	\$ 33,346	\$ (8,371)	\$ 24,975	\$ 19,545	\$ (3,139)	\$ 16,406
Other purchased intangibles	5,055	(1,412)	3,643	2,787	(133)	2,654
Total	\$ 38,401	\$ (9,783)	\$ 28,618	\$ 22,332	\$ (3,272)	\$ 19,060

Our purchased intangible assets are subject to amortization and we use a combination of straight-line and accelerated methods over a weighted average period of 7 years. Total amortization expense for 2009, 2008 and 2007, was \$6.4 million, \$1.3 million and \$0.9 million, respectively.

The table below shows our expected amortization for purchased intangibles as of September 30, 2009, for each of the next five years (in thousands):

Total

Edgar Filing: CUBIC CORP /DE/ - Form 10-K

	Transportation Systems	Defense Systems	Mission Support Services
	(in thousands)		
2010	\$ 1,914	\$ 157	\$ 4,533
2011	1,772	79	3,550
2012	1,641		2,650
2013	1,604		1,734
2014	1,604		749
Thereafter	6,631		6,631
	\$ 15,166	\$ 236	\$ 13,216
			\$ 28,618

Impairment of Long-Lived Assets: We generally evaluate the carrying values of long-lived assets other than goodwill for impairment only if events or changes in facts and circumstances indicate that carrying values

CUBIC CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS Continued

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES Continued

may not be recoverable. If we determined there was any impairment, we would measure it by comparing the fair value of the related asset to its carrying value and record the difference in the current period. Fair value is generally determined by identifying estimated undiscounted cash flows to be generated by those assets. We have not recorded any impairments for the years ended September 30, 2009, 2008 and 2007.

Deferred Compensation: Deferred compensation includes amounts due under an arrangement in which participating members of management may elect to defer receiving payment for a portion of their compensation a minimum of five years or until periods after their respective retirements. We accrue interest on deferred compensation at market rates, until such time as it is paid in full. We adjust the interest rate semi-annually; it was 4.875% at September 30, 2009.

Other Comprehensive Income: We present other comprehensive income (OCI) and its components in the statement of changes in shareholders equity. Accumulated OCI (loss) consisted of the following:

September 30,	2009	(in thousands)	2008
Adjustment to pension liability	\$	(22,591)	\$ (7,436)
Foreign currency translation		11,122	15,006
Net unrealized gains from cash flow hedges		112	
	\$	(11,357)	\$ 7,570

The adjustment to the pension liability is shown net of a tax benefit of \$12.2 million and \$4.0 million at September 30, 2009 and 2008, respectively. Deferred income taxes are not recognized for translation-related temporary differences of foreign subsidiaries whose undistributed earnings are considered to be permanently invested.

Revenue Recognition: We recognize sales and profits under our long-term fixed-price contracts, which generally require a significant amount of development effort in relation to total contract value, using the cost-to-cost percentage of completion method of accounting. We record sales and profits based on the ratio of costs incurred to estimated total costs at completion. In the early stages of contract performance, we do not recognize profit until progress is demonstrated or contract milestones are reached. For certain other long-term, fixed price production contracts not requiring substantial development effort we use the units-of-delivery percentage of completion method as the basis to measure progress toward completing the contract and recognizing sales. We only include amounts representing contract change orders, claims or other items in the contract value when they can be reliably estimated and we consider realization probable.

Edgar Filing: CUBIC CORP /DE/ - Form 10-K

We record sales of products when a firm sales agreement is in place, delivery has occurred and collectibility of the fixed or determinable sales price is reasonably assured. For fixed-price service contracts that do not contain measurable units of work performed we generally recognize sales on a straight-line basis over the contractual service period, unless evidence suggests that the revenue is earned, or obligations fulfilled, in a different manner. For fixed-price service contracts that contain measurable units of work performed we recognize sales when the units of work are completed.

We record sales under cost-reimbursement-type contracts as we incur the costs. We consider incentives or penalties and awards applicable to performance on contracts in estimating sales and profits, and record them when there is sufficient information to assess anticipated contract performance. We do not recognize incentive provisions that increase or decrease earnings based solely on a single significant event until the event occurs.

CUBIC CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS Continued

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES Continued

For contracts that specify multiple deliverables, we allocate sales and profits to separate units of accounting when there is objective evidence of fair value and that each accounting unit has value to the customer on a stand-alone basis.

We make provisions in the current period to fully recognize any anticipated losses on contracts. If we receive cash on a contract prior to revenue recognition we classify it as a customer advance on the balance sheet.

Income Taxes: Our provision for income taxes includes federal, state, local, and foreign income taxes. We recognize tax credits, primarily for research and development and export programs, as a reduction of our provision for income taxes in the year in which they are available for tax purposes. We provide deferred income taxes on temporary differences between assets and liabilities for financial reporting and tax purposes as measured by enacted tax rates we expect to apply when the temporary differences are settled or realized. We establish valuation allowances for deferred tax assets when the amount of future taxable income we expect is not likely to support the use of the deduction or credit. Deferred tax liabilities generally represent deductions that have been taken on tax returns but have not yet been recognized as expense in the financial statements. Annually we evaluate the capital requirements of our foreign subsidiaries and determine the amount of excess capital, if any, that is available for distribution. We provide for U.S. taxes on the amount we determine to be excess capital available for distribution.

Earnings Per Share: We calculate per share amounts based upon the weighted average number of shares of common stock outstanding.

Restructuring Activity: In 2008 we reduced our defense segment facility workforce by 139 employees. In addition, we eliminated 6 corporate office positions. Affected employees received severance pay and outplacement assistance, as well as company paid medical coverage for a defined period based on years of service. The cost of this restructuring was \$6.2 million and is reflected in our results for 2008.

The following table presents a roll forward of our restructuring liability, which was included in other current liabilities in the audited consolidated balance sheet at September 30, 2008 (in thousands):

	Employee Separation Expenses
Liability as of October 1, 2007	\$
Additions	6,203
Cash Payments	(4,523)
Liability as of September 30, 2008	1,680

Additions	
Cash Payments	(1,680)
Liability as of September 30, 2009	\$

Derivative Financial Instruments: We use derivative and nonderivative financial instruments, such as foreign currency forwards, foreign currency debt obligations and foreign currency cash balances, to manage our exposure to fluctuations in foreign currency exchange rates. We do not use any derivative financial instruments for trading or other speculative purposes. The purpose of our foreign currency hedging activities is to fix the dollar value of specific commitments, investments, payments to foreign vendors, and the value of foreign currency denominated receipts from our customers. At September 30, 2009, we had foreign exchange contracts with a notional value of \$148.3 million outstanding.

CUBIC CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS Continued

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES Continued

All derivatives are recorded at fair value, however, the classification of gains and losses resulting from changes in the fair values of derivatives are dependent on the intended use of the derivative and its resulting designation. If a derivative is designated as a fair value hedge, then a change in the fair value of the derivative is offset against the change in the fair value of the underlying hedged item and only the ineffective portion of the hedge, if any, is recognized in earnings. If a derivative is designated as a cash flow hedge, then the effective portion of a change in the fair value of the derivative is recognized as a component of Accumulated OCI until the underlying hedged item is recognized in earnings, or the forecasted transaction is no longer probable of occurring. If a derivative does not qualify as a highly effective hedge, a change in fair value is immediately recognized in earnings. We formally document all hedging relationships for all derivative hedges and the underlying hedged items, as well as the risk management objectives and strategies for undertaking the hedge transactions.

We classify the fair value of all derivative contracts as either current assets or liabilities, depending on the realized and unrealized gain or loss position of the hedged contract at the balance sheet date. The cash flows from derivatives treated as hedges are classified in the Consolidated Statements of Cash Flows in the same category as the item being hedged.

The amount of gains and losses from derivative instruments and hedging activities classified as not highly effective, did not have a material impact on the results of operations for the years ended September 30, 2009, 2008 and 2007. Due to delays in completion of a contract in Sweden, a foreign currency hedge contract became classified as not highly effective in 2009. As a result, we realized a \$1.4 million gain on this foreign currency exchange contract during the second quarter of 2009; however, in the fourth quarter we recorded a \$1.5 million loss, more than offsetting the earlier gain. In addition, a foreign currency forward has been excluded from the assessment of hedge effectiveness as it is marked to market on a quarterly basis. There are no significant credit risks related to contingent features in our derivative agreements, and the amount of estimated unrealized net gains or losses from cash flow hedges which are expected to be reclassified to earnings in the next twelve months is not significant.

New Accounting Standards: On July 1, 2009 the Financial Accounting Standards Board officially launched the Accounting Standards Codification (*FASB ASC*), as the authoritative source of generally accepted accounting principles in the United States. The ASC is effective for financial statements issued for interim and annual periods ending after September 15, 2009. Rules and interpretive releases of the Securities and Exchange Commission (SEC) under federal securities laws are also sources of authoritative GAAP for SEC registrants. The adoption of this standard had no impact on our consolidated financial position, results of operations or cash flows.

In August 2009, the SEC issued guidance regarding the impact of the FASB ASC on certain SEC rules, regulations, and interpretive releases and staff accounting bulletins. The SEC advised that references to FASB standards in current SEC text should correspond to the rules in the FASB ASC. The FASB ASC does not supersede any SEC rules or regulations. The FASB ASC should not be considered the authoritative source for SEC guidance.

Edgar Filing: CUBIC CORP /DE/ - Form 10-K

In September 2006, the FASB issued an accounting standard that defines fair value, establishes a framework and gives guidance regarding the methods used for measuring fair value, and expands disclosures about fair value measurements. We adopted this standard in the quarter ending December 31, 2008 with no material impact to our results of operations, financial position or cash flows.

CUBIC CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS Continued

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES Continued

In February 2007, the FASB issued an accounting standard that permits an entity to choose to measure many financial instruments and certain other items at fair value at specified election dates. Subsequent unrealized gains and losses on items for which the fair value option has been elected will be reported in earnings. We adopted this standard in the quarter ending December 31, 2008 with no material impact to our results of operations, financial position or cash flows.

In December 2007 the FASB issued an accounting standard that applies to all transactions or other events in which an entity obtains control of one or more businesses. This standard applies to all business entities, including mutual entities that previously used the pooling-of-interests method of accounting for some business combinations. We will adopt this standard in the fiscal year beginning October 1, 2009. The impact of this standard will depend on the size and structure of future acquisitions.

In March 2008 the FASB issued an accounting standard that requires enhanced disclosures about an entity's financial position, financial performance, and cash flows. The statement requires that objectives for using derivative instruments be disclosed in terms of underlying risks and accounting designation. We adopted this standard in the quarter ended March 31, 2009 with no material impact to our results of operations, financial position or cash flows.

During the quarter ended June 30, 2009, we adopted a standard that establishes general accounting for and disclosures of events that occur after the balance sheet date but before financial statements are issued or are available to be issued. The adoption of this standard did not have a material impact on our results of operations, financial position or cash flows.

In December 2007, the FASB issued an accounting standard that requires all entities to report noncontrolling (minority) interests in subsidiaries as equity in the consolidated financial statements. This standard is effective for fiscal years beginning after December 15, 2008, which for us will be the fiscal year beginning October 1, 2009. We currently do not expect that the adoption of this standard will have a material impact on our results of operations, financial position or cash flows.

In December 2008, the FASB issued a standard which expands the disclosure requirements about plan assets for defined benefit pension plans and postretirement plans. This standard is effective for financial statements issued for fiscal years ending after December 15, 2009, which for us will be the fiscal year beginning October 1, 2009. We currently do not expect that the adoption of this standard will have a material impact on our results of operations, financial position or cash flows.

Edgar Filing: CUBIC CORP /DE/ - Form 10-K

In June 2009, the FASB issued a standard which changes the approach in determining whether an entity is a variable interest entity, and modifies the methods allowed for determining the primary beneficiary of a variable interest entity. In addition, this standard requires ongoing reassessments of whether an enterprise is the primary beneficiary of a variable interest entity and enhanced disclosures related to an enterprise's involvement in a variable interest entity. We are currently evaluating the impact that the adoption of this standard will have on our results of operations, financial position or cash flows. This standard is effective for the first annual reporting period that begins after November 15, 2009, which for us will be the fiscal year beginning October 1, 2010.

In October 2009, the FASB issued revised accounting guidance, which can be applied prospectively or retrospectively. This guidance modifies the objective-and-reliable-evidence-of-fair-value criterion from the separation criteria used to determine whether an arrangement involving multiple deliverables contains more than one unit of accounting, replaces references to fair value with selling price to distinguish from the fair value measurement required under the Fair Value Measurements and Disclosures guidance, provides

CUBIC CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS Continued

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES Continued

a hierarchy that entities must use to estimate the selling price, eliminates the use of the residual method for allocation, and expands the ongoing disclosure requirements. We are currently evaluating the effect that adoption of this update will have, if any, on our consolidated financial position, results of operations, or cash flows. This revised guidance is effective for new or materially modified arrangements in fiscal years beginning on or after June 15, 2010, and we expect to adopt it in the fiscal year beginning October 1, 2010, although early adoption is allowed.

Use of Estimates: The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires us to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Significant estimates include the estimated total costs at completion of our long-term contracts, estimated discounted cash flows of our reporting units used for goodwill impairment testing, and estimated rates of return and discount rates related to our defined benefit pension plans. Actual results could differ from our estimates.

Risks and Uncertainties: We are subject to the normal risks and uncertainties of performing large, multiyear, often fixed-price contracts. In addition, we are subject to audit of incurred costs related to many of our U.S. Government contracts. These audits could produce different results than we have estimated; however, our experience has been that our costs are acceptable to the government.

Subsequent Events: We have completed an evaluation of all subsequent events through December 9, 2009, which is the issuance date of these consolidated financial statements, and concluded no subsequent events have occurred that require recognition or disclosure.

Reclassifications: We reclassified Amortization of Purchased Intangibles in 2008 and 2007 from Selling, General and Administrative expenses to a separate line item in the Consolidated Statements of Income, for comparative purposes, as the expense became significant in 2009.

NOTE 2 INVESTMENT IN VARIABLE INTEREST ENTITY

We own 37.5% of the common stock of Transaction Systems Limited (TranSys), a special-purpose company formed in the United Kingdom to bid on a contract called PRESTIGE (Procurement of Revenue Services, Ticketing, Information, Gates and Electronics), which outsourced most of the functions of the Transport for London (TfL) fare collection system for a period of twelve to seventeen years. In August 1998, TranSys was awarded the contract and began operations. We and the other 37.5% shareholder participate in the PRESTIGE contract solely through subcontracts from TranSys. All of the work to be performed by TranSys is subcontracted to the two 37.5% shareholders and the arrangement provides for the pass-through of virtually all revenues from TfL to the two shareholders. Our investment in TranSys is immaterial. TranSys is considered a variable interest entity; however, we do not consolidate TranSys as we are not considered the primary beneficiary.

In August 2008, TfL notified TranSys that they will be terminating the PRESTIGE fare collection system contract as of August 2010 in accordance with the early termination provision of the contract. As a result of this termination for convenience, upon completion of the contract in 2010, the operations of TranSys will cease. Our best estimate at this time is that TranSys will incur a loss of approximately \$1.3 million by the time the contract is completed in August 2010. We have recorded a provision of approximately \$0.6 million for our share of the loss in the year ended September 30, 2009.

CUBIC CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS Continued

NOTE 2 INVESTMENT IN VARIABLE INTEREST ENTITY Continued

Financing for the project was provided by a syndicate of banks which participated in creating the project's financial structure. Debt servicing began in 2003 and will continue until the end of the contract in August 2010, at which time TfL is obligated to pay TranSys an amount sufficient to repay the loan, subject to a possible withhold, as described below. This debt is guaranteed by TfL and is nonrecourse to the shareholders of TranSys.

The contract termination notice triggered a requirement for TranSys to engage an independent engineer to produce a report on the state of the assets associated with the PRESTIGE system. The engineer is scheduled to deliver their report in December 2009, stating whether, in their opinion, the fare collection system assets are able to pass a Performance Test for a period of two years beyond the contract termination. The Performance Test requires the assets to perform at contractual minimum levels with broadly the same level of maintenance as that performed under the contract. If the engineer determines that the assets may fail the Performance Test then TranSys and its subcontractors have until August 2010 to carry out the necessary remediation of the assets.

Upon termination of the contract in August 2010, the same engineer will deliver a Supplementary Report which is a follow up assessment to take into account the remediation efforts of TranSys and its subcontractors, and to give an opinion on the remaining level of remediation work required in order to allow the system to pass the Performance Test for the two year period. The contract allows TfL to withhold an amount up to approximately £40 million (\$64 million) from its final payment to TranSys pending the delivery of the Supplementary Report and the completion of any remediation work identified in the report.

TranSys is required to repay the banks in August 2010 and, to the extent that there is a funding shortfall in TranSys because of a withhold by TfL, the shareholders are each required to provide TranSys their share of the cash required to fully repay the debt until the funds are returned to TranSys by TfL, at which time the shareholders would be repaid by TranSys. We estimate that our share of this withhold could be as much as \$38.5 million. In recent years the fare collection system has consistently exceeded the contractual performance levels and we believe that sufficient costs have been included in our estimated costs to complete the contract to continue this level of performance for the required period. In addition, since we have been selected as the successor contractor to the PRESTIGE contract, we believe TfL will have no reason to withhold funds to assure any required remediation will be completed.

We have provided certain performance guarantees to various parties related to the PRESTIGE contract and TranSys, including TfL, the banks and the TranSys shareholders. The other TranSys shareholders have provided similar performance guarantees to the same parties and to us.

Summarized unaudited financial information for TranSys is as follows:

Edgar Filing: CUBIC CORP /DE/ - Form 10-K

Years ended September 30,	2009	2008 (in millions)	2007
Statement of Operations:			
Sales	\$ 203.0	\$ 215.3	\$ 210.8
Operating loss	\$ (1.7)	\$	\$
Net loss	\$ (1.3)	\$	\$

CUBIC CORPORATION

NOTE 2 INVESTMENT IN VARIABLE INTEREST ENTITY Continued

September 30,	2009	(in millions)	2008
Balance Sheets:			
Cash	\$	44.6	\$ 43.7
Unbilled contract accounts receivable		131.1	171.6
Other current assets		79.6	116.3
Total Assets	\$	255.3	\$ 331.6
Current portion of long-term debt	\$	217.4	\$ 297.7
Other current liabilities		39.2	33.9
Equity		(1.3)	
Total Liabilities and Equity	\$	255.3	\$ 331.6

NOTE 3 ACCOUNTS RECEIVABLE

The components of accounts receivable under long-term contracts are as follows:

September 30,	2009	(in thousands)	2008
U.S. Government Contracts:			
Amounts billed	\$	62,093	\$ 60,016
Recoverable costs and accrued profits on progress completed not billed		44,556	50,600
		106,649	110,616
Commercial Customers:			
Amounts billed		41,907	47,209
Recoverable costs and accrued profits on progress completed not billed		88,030	126,853
		129,937	174,062
		236,586	284,678
Less unbilled amounts not currently due commercial customers		(13,400)	(19,930)
	\$	223,186	\$ 264,748

A portion of recoverable costs and accrued profits on progress completed is billable under progress payment provisions of the related contracts. The remainder of these amounts is billable upon delivery of products or furnishing of services, with an immaterial amount subject to retainage provisions of the contracts. It is anticipated that we will bill and collect substantially all of the unbilled portion of receivables identified as current assets under progress billing provisions of the contracts or upon completion of performance tests and/or acceptance by the customers during fiscal 2010.

CUBIC CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS Continued

NOTE 4 INVENTORIES

Inventories are classified as follows:

September 30,	2009	(in thousands)	2008
Finished products	\$ 55		\$ 172
Work in process and inventoried costs under long-term contracts	96,962		64,179
Customer advances	(49,734)		(20,783)
Materials and purchased parts	1,824		1,550
	\$ 49,107		\$ 45,118

At September 30, 2009 and 2008, work in process and inventoried costs under long-term contracts included approximately \$0.9 million and \$1.6 million, respectively, in costs incurred outside the scope of work on several contracts in the defense systems segment. We believe it is probable we will recover these costs, plus a profit margin, under contract change orders within the next year.

NOTE 5 FINANCING ARRANGEMENTS

Long-term debt consists of the following:

September 30,	2009	(in thousands)	2008
Unsecured notes payable to a group of insurance companies, with annual principal payments of \$4,000,000 due in November. Interest at 6.31% is payable semiannually in November and May.	\$ 20,000		\$ 24,000
Unsecured note payable to an insurance company, interest at 6.11%.			1,429
Mortgage note from a UK financial institution, with quarterly installments of principal and interest at 6.5%	5,124		6,316
	25,124		31,745
Less current portion	(4,554)		(6,045)
	\$ 20,570		\$ 25,700

Edgar Filing: CUBIC CORP /DE/ - Form 10-K

The terms of the notes payable and other financial instruments include provisions that require and/or limit, among other financial ratios and measurements, the permitted levels of working capital, debt and tangible net worth and coverage of fixed charges. We have also provided certain performance guarantees to various parties related to the PRESTIGE contract and the TranSys arrangement. As consideration for the performance guarantee, we have agreed to certain financial covenants including limits on working capital, debt, tangible net worth and cash flow coverage. At September 30, 2009, the most restrictive covenant under these agreements leaves consolidated retained earnings of \$188 million available for the payment of dividends to shareholders, purchases of our common stock and other charges to shareholders' equity. To date, there have been no covenant violations.

CUBIC CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS Continued

NOTE 5 FINANCING ARRANGEMENTS Continued

We maintain a short-term borrowing arrangement in New Zealand totaling \$0.5 million New Zealand dollars (equivalent to approximately \$0.4 million) to help meet the short-term working capital requirements of our subsidiary in that country. At September 30, 2009, no amounts were outstanding under this borrowing arrangement.

We have a \$150 million revolving line of credit arrangement with a group of U.S. banks which expires in March 2010. Commitment fees associated with this financing arrangement are 0.15% of the unutilized balance per annum. As of September 30, 2009 we had no short-term debt outstanding under this line of credit and \$45.3 million in outstanding letters of credit.

Maturities of long-term debt for each of the five years in the period ending September 30, 2014, are as follows: 2010 \$4.6 million; 2011 \$4.6 million; 2012 \$4.6 million; 2013 \$4.6 million; 2014 \$4.6 million.

Interest paid amounted to \$1.8 million, \$2.3 million, and \$3.6 million in 2009, 2008 and 2007, respectively.

As of September 30, 2009 we had letters of credit and bank guarantees outstanding totaling \$72.8 million, which guarantee either our performance or customer advances under certain contracts. In addition, we had financial letters of credit outstanding totaling \$5.8 million as of September 30, 2009, which primarily guarantee our payment of certain self-insured liabilities. We have never had a drawing on a letter of credit instrument, nor are any anticipated; therefore, we estimate the fair value of these instruments to be zero.

Our self-insurance arrangements are limited to certain workers' compensation plans, automobile liability, and product liability claims. Under these arrangements, we self-insure only up to the amount of a specified deductible for each claim. Self-insurance liabilities included in other current liabilities on the balance sheet amounted to \$7.6 million and \$5.4 million as of September 30, 2009 and 2008, respectively.

NOTE 6 COMMITMENTS

We lease certain office, manufacturing and warehouse space, and miscellaneous computer and other office equipment under noncancelable operating leases expiring in various years through 2018. These leases, some of which may be renewed for periods up to 10 years, generally require us to pay all maintenance, insurance and property taxes. Several leases are subject to periodic adjustment based on price indices or cost increases. Rental expense, net of sublease income, for all operating leases amounted to \$6.6 million, \$6.2 million, and \$6.7 million in 2009, 2008

and 2007, respectively.

Future minimum payments, net of minimum sublease income, under noncancelable operating leases with initial terms of one year or more consist of the following at September 30, 2009 (in thousands):

2010	\$	6,738
2011		5,179
2012		3,907
2013		1,978
2014		1,215
Thereafter		935
	\$	19,952

NOTE 7 INCOME TAXES

Significant components of the provision for income taxes are as follows:

Years ended September 30,	2009	2008	2007
	(in thousands)		
Current:			
Federal	\$ 11,417	\$ 8,474	\$ 9,695
State	3,691	2,063	2,793
Foreign	11,090	16,051	10,429
Total current	26,198	26,588	22,917
Deferred (credit):			
Federal	2,516	(5,440)	670
State	420	(1,078)	352
Foreign	420	315	(277)
Total deferred	3,356	(6,203)	745
Total income tax expense	\$ 29,554	\$ 20,385	\$ 23,662

We calculate deferred tax assets and liabilities based on differences between financial reporting and tax bases of assets and liabilities, and measure them using the enacted tax rates and laws that we expect will be in effect when the differences reverse. Significant components of our deferred tax assets and liabilities are as follows:

September 30,	2009	2008
	(in thousands)	
Deferred tax assets:		
Accrued employee benefits	\$ 8,064	\$ 9,796
Allowance for doubtful accounts	1,670	1,833
Long-term contracts and inventory valuation reductions	10,643	14,185
Allowances for loss contingencies	5,192	4,506
Deferred compensation	3,306	3,145
Book over tax depreciation	1,954	2,295
Adjustment to pension liability	12,163	4,003
California research and development credit carryforward	3,410	
Other	3,115	1,498
Subtotal	49,517	41,261
Valuation allowance	(3,410)	
Deferred tax assets	46,107	41,261
Deferred tax liabilities:		
Amortization of goodwill and intangibles	4,681	3,726

Edgar Filing: CUBIC CORP /DE/ - Form 10-K

Prepaid expenses	1,924	2,007
State taxes	980	1,316
Other	2,308	2,499
Deferred tax liabilities	9,893	9,548
Net deferred tax asset	\$ 36,214	\$ 31,713

CUBIC CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS Continued

NOTE 7 INCOME TAXES Continued

The reconciliation of income tax computed at the U.S. federal statutory tax rate to income tax expense is as follows:

Years ended September 30,	2009	2008 (in thousands)	2007
Tax at federal statutory rate	\$ 29,834	\$ 20,034	\$ 22,837
State income taxes, net of federal tax effect	2,672	640	2,044
Income exclusion on export sales			(192)
Nondeductible expenses	408	152	157
Reversal of reserve accrued for tax contingencies	(80)	(1,205)	(911)
Tax effect from foreign earnings repatriation	3,063	3,856	2,626
Tax effect from foreign subsidiaries	(2,523)	(2,651)	(1,368)
Tax credits and other	(3,820)	(441)	(1,531)
	\$ 29,554	\$ 20,385	\$ 23,662

We are subject to ongoing audits from various taxing authorities in the jurisdictions in which we do business. As of September 30, 2009, our open tax years in significant jurisdictions include 2006-2009 in both the U.S. and the U.K. We believe we have adequately provided for uncertain tax issues we have not yet resolved with federal, state and foreign tax authorities. Although not more likely than not, the most adverse resolution of these issues could result in additional charges to earnings in future periods. Based upon a consideration of all relevant facts and circumstances, we do not believe the ultimate resolution of uncertain tax issues for all open tax periods will have a materially adverse effect upon our results of operations or financial condition.

We have recorded liabilities for unrecognized tax benefits related to permanent and temporary tax adjustments which totaled \$4.8 million at September 30, 2009 and \$5.8 million at September 30, 2008. The net changes in the liability were as follows:

Years ended September 30,	2009	2008
	(in thousands)	
Balance at October 1	\$ 5,845	\$ 10,001
Increase (decrease) related to tax positions in prior years		
Recognition of benefits from change in tax method of accounting		(1,577)
Recognition of benefits from expiration of statutes	(1,555)	(2,673)
Tax positions related to the current year	778	1,008
Decreases related to settlements with taxing authorities	(259)	(914)
Balance at September 30	\$ 4,809	\$ 5,845

Edgar Filing: CUBIC CORP /DE/ - Form 10-K

At September 30, 2009, the amount of unrecognized tax benefits from permanent tax adjustments that, if recognized, would affect the effective rate was \$3.0 million, and \$1.8 million would decrease goodwill. Effective October 1, 2009, we are adopting the revised accounting standard referred to in Note 1, which changes the accounting for acquired tax liabilities such that the utilization of a net operating loss carryforward will no longer reduce goodwill. Therefore, as of October 1, 2009, the amount of unrecognized tax benefits from permanent tax adjustments that, if recognized, would affect the effective rate

CUBIC CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS Continued

NOTE 7 INCOME TAXES Continued

is \$4.7 million. Over the next year, we do not expect a significant increase or decrease in the unrecognized tax benefits recorded as of September 30, 2009. The amount of net interest and penalties recognized as a component of income tax expense during 2009, 2008 and 2007 was not material. Interest and penalties accrued at September 30, 2009 and 2008 amounted to \$0.4 million and \$0.5 million, respectively, bringing the total liability for uncertain tax issues to \$5.1 million and \$6.3 million as of September 30, 2009 and 2008, respectively.

We made income tax payments, net of refunds, totaling \$28.8 million, \$18.2 million and \$26.2 million in 2009, 2008 and 2007, respectively.

Income before income taxes includes the following components:

Years ended September 30,	2009	2008 (in thousands)	2007
United States	\$ 45,329	\$ 4,920	\$ 33,412
Foreign	39,911	52,319	31,836
Total	\$ 85,240	\$ 57,239	\$ 65,248

Management evaluates our capital requirements in our foreign subsidiaries on an annual basis to determine what level of capital is needed for the long-term operations of the businesses. We provide U.S. taxes on the amount of capital that is determined to be in excess of the long-term requirements of the business and is, therefore, available for distribution. In 2009, we determined that 12 million British Pounds (\$18.4 million, net of hedge losses) was excess capital in the U.K. and 10 million New Zealand Dollars (\$6.4 million, net of hedge losses) was excess capital in New Zealand and paid dividends of those amounts to the U.S. parent company in 2009. U.S. taxes provided on these dividends amounted to approximately \$3.1 million in 2009.

Undistributed earnings of all our foreign subsidiaries amounted to approximately \$57.5 million at September 30, 2009. We consider those earnings to be indefinitely reinvested, and accordingly, we have not provided for U.S. federal and state income taxes thereon. Upon distribution of those earnings in the form of dividends or otherwise, we would be subject to both U.S. income taxes and withholding taxes payable to the foreign countries, but would also be able to offset unrecognized foreign tax credit carryforwards. It is not practicable for us to determine the total amount of unrecognized deferred U.S. income tax liability because of the complexities associated with its hypothetical calculation.

NOTE 8 PENSION, PROFIT SHARING AND OTHER RETIREMENT PLANS

Edgar Filing: CUBIC CORP /DE/ - Form 10-K

We have profit sharing and other defined contribution retirement plans that provide benefits for most employees in the U.S. An employee is eligible to participate in these plans after six months to one year of service, and may make additional contributions to the plans from their date of hire. These plans provide for full vesting of benefits over periods from zero to five years. More than half of our contributions to these plans are discretionary with the Board of Directors. Company contributions to the plans aggregated \$15.4 million, \$14.2 million and \$13.6 million in 2009, 2008 and 2007, respectively.

Certain employees in the U.S. are covered by a noncontributory defined benefit pension plan for which benefits were frozen as of December 31, 2006 (curtailment). The effect of the curtailment is that no new benefits have been accrued after that date. Approximately one-half of our European employees are covered by a contributory defined benefit pension plan. Our funding policy provides that contributions will be at least equal to the minimum amounts mandated by statutory requirements. September 30 is used as the measurement date for these plans.

CUBIC CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS Continued

NOTE 8 PENSION, PROFIT SHARING AND OTHER RETIREMENT PLANS Continued

The unrecognized amounts recorded in accumulated other comprehensive income will be subsequently recognized as net periodic pension cost, consistent with our historical accounting policy for amortizing those amounts. We will recognize actuarial gains and losses that arise in future periods and are not recognized as net periodic pension cost in those periods as increases or decreases in other comprehensive income, net of tax, in the period they arise. We adjust actuarial gains and losses recognized in other comprehensive income as they are subsequently recognized as a component of net periodic pension cost.

The following table sets forth changes in the projected benefit obligation and fair value of plan assets and the funded status for these defined benefit plans:

September 30,	2009	2008
	(in thousands)	
Change in benefit obligations:		
Net benefit obligation at the beginning of the year	\$ 145,440	\$ 164,075
Service cost	2,521	3,520
Interest cost	9,679	9,761
Actuarial loss (gain)	16,065	(19,898)
Participant contributions	1,124	1,211
Gross benefits paid	(5,197)	(5,148)
Foreign currency exchange rate changes	(5,010)	(8,081)
Net benefit obligation at the end of the year	164,622	145,440
Change in plan assets:		
Fair value of plan assets at the beginning of the year	128,989	162,542
Actual return on plan assets	3,207	(24,913)
Employer contributions	9,504	3,380
Participant contributions	1,124	1,211
Gross benefits paid	(5,197)	(5,148)
Administrative expenses	(701)	(809)
Foreign currency exchange rate changes	(4,518)	(7,274)
Fair value of plan assets at the end of the year	132,408	128,989
Unfunded status of the plans	(32,214)	(16,451)
Unrecognized net actuarial loss	34,754	11,439
Net amount recognized	\$ 2,540	\$ (5,012)
Amounts recognized in Accumulated OCI		
Liability adjustment to OCI	\$ (34,754)	\$ (11,439)
Deferred tax asset	12,163	4,003
Accumulated other comprehensive loss	\$ (22,591)	\$ (7,436)

CUBIC CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS Continued

NOTE 8 PENSION, PROFIT SHARING AND OTHER RETIREMENT PLANS Continued

The projected benefit obligation, ABO and fair value of plan assets for the defined benefit pension plans in which the ABO was in excess of the fair value of plan assets were as follows:

September 30,	2009	(in thousands)	2008
Projected benefit obligation	\$ 164,622		\$ 91,988
Accumulated benefit obligation	148,375		91,988
Fair value of plan assets	132,408		82,534

The ABO for our U.K. pension plan did not exceed the fair value of plan assets at September 30, 2008 and, therefore, values for the U.K. plan are not included in the table above for 2008.

The components of net periodic pension cost were as follows:

Years ended September 30,	2009	2008	2007
		(in thousands)	
Service cost	\$ 2,521	\$ 3,520	\$ 5,056
Interest cost	9,679	9,761	9,581
Expected return on plan assets	(9,569)	(12,706)	(11,323)
Amortization of:			
Prior service cost			7
Actuarial loss (gain)		(243)	458
Administrative expenses	100	112	114
Net pension cost	\$ 2,731	\$ 444	\$ 3,893

Years ended September 30,	2009	2008	2007
Weighted-average assumptions used to determine benefit obligation at September 30:			
Discount rate	5.6%	7.3%	6.2%
Rate of compensation increase	4.5%	4.8%	4.4%
Weighted-average assumptions used to determine net periodic benefit cost for the years ended September 30:			
Discount rate	7.3%	6.2%	5.6%
Expected return on plan assets	7.8%	8.0%	8.1%
Rate of compensation increase	4.8%	4.4%	4.5%

CUBIC CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS Continued

NOTE 8 PENSION, PROFIT SHARING AND OTHER RETIREMENT PLANS Continued

The weighted average asset allocations by asset category for our pension plans as of September 30 were as follows:

	2009	2008
Equity securities	67%	71%
Debt securities	30%	22%
Real estate	2%	5%
Other	1%	2%
Total	100%	100%

We have the responsibility to formulate the investment policies and strategies for the plans' assets. Our overall policies and strategies include: maintain the highest possible return commensurate with the level of assumed risk, preserve benefit security for the plans' participants, and minimize the necessity of contributions by maintaining a ratio of plan assets to liabilities in excess of 1.0.

We do not direct the day-to-day operations and selection process of individual securities and investments, and, accordingly, we have retained the professional services of investment management organizations to fulfill those tasks. The investment management organizations have investment discretion over the assets placed under their management. We provide each investment manager with specific investment guidelines by asset class. The table below presents the ranges for each major category of the plans' assets at September 30, 2009:

Asset Category	Allocation Range
Equity securities	35% to 80%
Debt securities	10% to 60%
Other, primarily cash and cash equivalents	0% to 8%

The pension plans held no positions in Cubic Corporation common stock as of September 30, 2009 and 2008.

We expect to contribute approximately \$3.2 million to our pension plans in 2010.

We expect the following pension benefit payments, which reflect expected future service, as appropriate, to be paid (in thousands):

Edgar Filing: CUBIC CORP /DE/ - Form 10-K

2010	\$	5,692
2011		6,257
2012		6,645
2013		7,051
2014		7,311
2015-2019		43,092

CUBIC CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS Continued

NOTE 9 LEGAL MATTERS

In 1998, the Ministry of Defense for the Armed Forces of the Islamic Republic of Iran obtained a United States District Court judgment enforcing an arbitration award in its favor against us of \$2.8 million, plus costs and interest. Both parties appealed to the 9th Circuit Court of Appeals, where the cases are stayed. Several potential lienors of Iran's judgment have filed liens but have not obtained valid court orders enforcing the liens. We are not aware whether any such claimants against Iran's judgment have received Terrorism Risk Insurance Act funds (which would make their claims unenforceable). Under a 1979 Presidential executive order, all transactions by United States citizens with Iran are prohibited. Therefore, even if Iran were to prevail in the 9th Circuit litigation, it is unlikely that we would be permitted to pay any amount to Iran. Payments to valid lienors could potentially be enforced, so in a previous year we recorded a liability for the amount of the judgment and are continuing to accrue interest.

In December 2008, we were named in a class action lawsuit alleging misclassification of Training Analysts as exempt from overtime, seeking damages for overtime pay and back wages, as well as damages for various violations of California and federal wage and hour laws. We filed an Answer in January 2009. We sent a demand for indemnity to our prime contractor, and we sent a demand to our insurance carrier for coverage on some or all of the claims. Mediation was conducted in August 2009 and we settled the matter for \$1.7 million. The insurance carrier agreed to contribute \$0.3 million toward the settlement; however, we are still awaiting a response from the prime contractor. Preparation of a Settlement Agreement and related documents are in process. We expect preliminary court approval of the settlement in late 2009. We recorded a liability for the settlement amount less the insurance carrier contribution in the fourth quarter of fiscal 2009.

We are not a party to any other material pending proceedings and we consider all other matters to be ordinary proceedings incidental to the business. We believe the outcome of these proceedings and the proceedings described above will not have a materially adverse effect on our financial position.

NOTE 10 BUSINESS SEGMENT INFORMATION

At September 30, 2009, we reevaluated our segment reporting in light of changes to our management structure, internal performance reporting and incentive compensation plans that became effective in 2009. Previously our defense business had been reported as a single segment, with a single executive responsible for the entire business, operating performance measured as a single unit and management incentive plans that were based on total defense segment performance. With the changes during the current fiscal year, we are now reporting results for two defense segments, Defense Systems and Mission Support Services. The Transportation Systems segment is still considered one reporting segment. We have reclassified prior period amounts to reflect this organizational change.

Description of the types of products and services from which each reportable segment derives its revenues:

Edgar Filing: CUBIC CORP /DE/ - Form 10-K

We have three primary business segments: Cubic Transportation Systems (CTS), Cubic Defense Systems (CDS) and Mission Support Services (MSS). CTS designs, produces, installs and services electronic revenue collection systems for mass transit projects, including railways and buses. CDS performs work under U.S. and foreign government contracts relating to electronic defense systems and equipment. Products include customized range instrumentation and training systems, simulators, communications and surveillance systems, avionics systems, power amplifiers and receivers. MSS provides computer simulation training, development of training doctrine, live training support and field operations and maintenance services.

CUBIC CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS Continued

NOTE 10 BUSINESS SEGMENT INFORMATION Continued

Measurement of segment profit or loss and segment assets:

We evaluate performance and allocate resources based on total segment operating profit or loss. The accounting policies of the reportable segments are the same as those described in the summary of significant accounting policies. Intersegment sales and transfers are immaterial.

Factors management used to identify our reportable segments:

Our reportable segments are business units that offer different products and services and are each managed separately. Operating results for each segment are reported separately to senior corporate management to make decisions as to the allocation of corporate resources and to assess performance.

Business segment financial data is as follows:

Years ended September 30,	2009	2008	2007
		(in millions)

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders of Cubic Corporation

We have audited the accompanying consolidated balance sheets of Cubic Corporation as of September 30, 2009 and 2008, and the related consolidated statements of income, shareholders' equity, and cash flows for each of the three years in the period ended September 30, 2009. These financial statements are the responsibility of the company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Cubic Corporation at September 30, 2009 and 2008, and the consolidated results of its operations and its cash flows for each of the three years in the period ended September 30, 2009, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Cubic's internal control over financial reporting as of September 30, 2009, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated December 9, 2009 expressed an unqualified opinion thereon.

Item 9. DISAGREEMENTS ON ACCOUNTING AND FINANCIAL DISCLOSURE.

None.

Item 9a. CONTROLS AND PROCEDURES.

Evaluation of Disclosure Controls and Procedures We conducted an evaluation, under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures as of September 30, 2009. Based on this evaluation, our management, including the Chief Executive Officer and Chief Financial Officer, concluded that our disclosure controls and procedures are effective in providing reasonable assurance that information required to be disclosed in the reports we file and submit under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported as and when required.

In designing and evaluating our disclosure controls and procedures, we recognize that any controls, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives.

Management's Report on Internal Control over Financial Reporting

We are responsible for establishing and maintaining adequate internal control over financial reporting for the company. In order to evaluate the effectiveness of internal control over financial reporting, as required by Section 404 of the Sarbanes-Oxley Act, we conducted an assessment, including testing, using the criteria in Internal Control – Integrated Framework, issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Our system of internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Based on our assessment, we concluded that we maintained, in all material respects, effective internal control over financial reporting as of September 30, 2009, based on criteria in Internal Control – Integrated Framework, issued by COSO. Our internal control over financial reporting as of September 30, 2009, has been audited by Ernst & Young, LLP, an independent registered public accounting firm, as stated in their report which follows.

Changes in Internal Controls Over Financial Reporting There were no changes in our internal control over financial reporting that occurred during the fourth fiscal quarter of 2009 that have materially affected, or are reasonably likely to materially affect our internal control over financial reporting.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders of Cubic Corporation

We have audited Cubic Corporation's internal control over financial reporting as of September 30, 2009, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). Cubic Corporation's management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Cubic Corporation maintained, in all material respects, effective internal control over financial reporting as of September 30, 2009, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Cubic Corporation as of September 30, 2009 and 2008, and the related statements of income, shareholder's equity, and cash flows for each of the three years in the period ended September 30, 2009 of Cubic Corporation and our report dated December 9, 2009 expressed an unqualified opinion thereon.
