SAVING LIVES WITH SMS FOR LIFE

IBM, Novartis and Vodafone Join Forces to Help Halt Malaria in Africa

London, United Kingdom, 14 December 2009: A new solution developed by IBM, Novartis and Vodafone with the Roll Back Malaria Partnership, is helping to save lives using everyday technology to improve the availability of anti-malarial drugs in remote areas in Tanzania.

Called SMS for Life, the initiative uses a combination of mobile phones, SMS (Short Messaging Service) technologies and intuitive web sites to track and manage the supply of Artemisinin-based Combination Therapy (ACT) drugs and Quinine injectables, both of which are key to reducing the number of deaths from malaria.

The mosquito-borne disease causes nearly one million deaths in Africa each year, mostly among pregnant women and young children, and many people die because they simply lack quick access to vital medication.

The concept of using text messaging to improve stock management of lifesaving medicines was developed by pharmaceutical company Novartis and a team of international students taking part in IBM's internship programme, Extreme Blue. The team came up with SMS for Life, as it relies on simple technology and fosters self-sufficiency. IBM was tasked with managing the overall project, and Vodafone was invited to develop and manage a system based on simple SMS messaging that would help ensure dispensaries did not run out of vital stock.

After visits to clinics, hospitals and dispensaries across Tanzania, IBM, Novartis and Vodafone initiated a five month pilot of the SMS for Life solution, covering 135 villages and over a million people in different geographic locations across Tanzania.

Vodafone, together with its technology partner MatsSoft, developed a system in which healthcare staff at each facility receive automated SMS messages, which prompt them to check the remaining stock of anti-malarial drugs each week. Using toll-free numbers, staff reply with an SMS to a central database system hosted in the United Kingdom, providing details of stock levels, and deliveries can be made before supplies run out at local health centres.

This is an example of a truly innovative solution helping solve a humanitarian problem, says Peter Ward of IBM, SMS for Life Project Manager. After spending time on the ground, we created a project plan, developed the application with Vodafone and Novartis and established the best way to deliver the pilot, working with the Tanzanian Ministry of Health. We expect other countries will also be able to benefit in the future.

Vodafone has worked closely with IBM, Novartis and MatsSoft, to develop a simple, robust and innovative system that is able to deliver even in the most remote African communities, said Dr. Dianne Sullivan, Scientific Adviser, Mobile Health, of Vodafone. The SMS for Life solution shows the tremendous potential of mobile technology to deliver social good through lateral thinking by helping to ensure supplies of life-saving drugs.

During the first few weeks of the pilot, the number of health facilities with stock-outs in one district alone, was reduced by over 75%. The early success of the SMS for Life pilot project has the Tanzanian authorities interested in implementing the solution across the rest of the country. Tanzania has around 5000 clinics, hospitals and dispensaries, but at any one time, as many as half could potentially be out of stock of anti-malarial drugs.

The SMS for Life program has already had a positive effect in Tanzania, says Senior Health Officer with Ministry of Health and Social Welfare, Tanzania, Winfred Mwafongo. I've seen district medical officers ordering urgent stock replacements for various health facilities. During a visit to 19 rural health facilities in one district alone, I saw huge improvements in their inventory management systems. I'm very impressed with the results so far and look forward to following the rest of the pilot through to completion.

Collaboration is critical to tackle health problems of the developing world, and we are proud to be part of the SMS for Life partnership, a project that will reduce stock-outs, and ensure that mothers and their young children in Africa have access to life-saving anti-malarial medicines, says Silvio Gabriel, Executive Vice President and Head of the Malaria Initiatives at Novartis.

Designed as a public and private partnership leveraging the skills and resources of several companies, SMS for Life could have far-reaching implications for existing health systems worldwide. Several other African states are already keen to introduce the project.

About the RBM Global Partnership

The RBM Partnership is the global coordinator of the fight against malaria. RBM draws its strength and experience from hundreds of partners from malaria endemic countries, country donors, companies, non-governmental and community organisations, foundations and research and academic institutions. RBM partners' collective aim is to reduce annual malaria deaths from around one million to virtually zero by 2015 through the implementation of the Global Malaria Action Plan (GMAP). This outlines RBM's vision for a substantial and sustained reduction in the burden of malaria in the near and mid-term, and the eventual global eradication of malaria in the long term with the introduction of new tools. www.rollbackmalaria.org

About IBM

For more information about IBM, please visit www.ibm.com

About Novartis

Novartis provides healthcare solutions that address the evolving needs of patients and societies. Focused solely on healthcare, Novartis offers a diversified portfolio to best meet these needs: innovative medicines, cost-saving generic pharmaceuticals, preventive vaccines, diagnostic tools and consumer health products. Novartis is the only company with leading positions in each of these areas. In 2008, the Group's continuing operations achieved net sales of USD 41.5 billion and net income of USD 8.2 billion. Approximately USD 7.2 billion was invested in R&D activities throughout the Group. Headquartered in Basel, Switzerland, Novartis Group companies employ approximately 99,000 full-time-equivalent associates and operate in more than 140 countries around the world. For more information, please visit <http://www.novartis.com>.

About Vodafone

Vodafone is the world's leading international mobile communications group with approximately 323 million proportionate customers as at 30 September 2009. Vodafone currently has equity interests in 31 countries across five continents and around 40 partner networks worldwide. For more information, please visit www.vodafone.com

FUTURE AGENDA, SPONSORED BY VODAFONE, PUBLISHES INITIAL INSIGHTS

A global, open foresight programme addressing the major challenges of the next decade

The Future Agenda, sponsored by Vodafone, is a cross-discipline programme connecting informed people from around the globe to address the greatest challenges of the next decade. The aim is to map out the major issues, identify and discuss potential solutions, and suggest the best ways forward in order to provide a platform for collective innovation at a higher level than has been achieved in the past. Today it has published some insights based on the outputs from a series of workshops and initial discussions.

As the first global open foresight programme the Future Agenda has begun by identifying 16 of the most pressing issues to face society over the next 10 years, irrespective of location, industry or financial stability, and has invited experts in each area to publish an initial point of view for others to comment upon.

The subjects and experts who have written the initial point of view include:-

<i>Authenticity</i>	<i>Diane Coyle, OBE, Enlightenment Economics, UK</i>
<i>Choice</i>	<i>Professor Jose Louis Nueno, Professor of Marketing, IESE, Barcelona, Spain</i>
<i>Cities</i>	<i>Professor Richard Burdett, Professor of Architecture & Urbanisation, LSE, UK</i>
<i>Connectivity</i>	<i>Jan Farjh, Vice President and Head of Ericsson Research, Sweden</i>
<i>Currency</i>	<i>Dr Rajiv Kumar, Chief Executive ICRIER, India</i>
<i>Data</i>	<i>DJ Collins, Head of Corporate Communications, Google Europe,</i>
<i>Energy</i>	<i>Dr Leo Roodhart, President of the Society of Petroleum Engineers, VP Royal Dutch Shell, Netherlands</i>
<i>Food</i>	<i>Jim Kirkwood, Vice President R&D, Centre for Technology Creation, General Mills, USA</i>
<i>Health</i>	<i>Dr Jack Lord, CEO, Navigneics Inc, USA</i>
<i>Identity</i>	<i>Professor Mike Hardy, OBE, Director of British Council Intercultural Dialogue, UK</i>

<i>Migration</i>	<i>Professor Richard Black, Head of Global Science University of Surrey</i>
<i>Money</i>	<i>Dave Birch, Founder Digital Money Forum, UK</i>
<i>Transport</i>	<i>Mark Philips, Interior Design Manager at Jaguars Advanced Design Studio, UK</i>
<i>Waste</i>	<i>Professor Ian Williams, Director of School of Civil Engineering and the Environment, University of Southampton, UK</i>
<i>Water</i>	<i>Professor Stewart Burn Stream Leaders of Infrastructure Technologies, CISRO, Australia</i>
<i>Work</i>	<i>Chris Meyer, Chief Executive of Monitor Networks, USA</i>

The discussions will continue over the next 6 months. More opinion leaders will contribute through a series of workshops in different locations across Europe, Asia, Africa and the Americas and in addition others can voice their view by going online at www.futureagenda.org. The consultation period will close in April 2010 and the results will be analysed and published, with conclusions and recommendations, in July 2010. All those who participate in the programme will also have access to the original data.

All organisations need to gain clearer, richer and more informed views of the future so that they can place more intelligent choices in terms of business strategy and innovation focus. This can no longer be achieved in isolation. At Vodafone we believe we should look beyond traditional horizons, and use new combinations of insight and foresight methodologies. This will help us support our customers as they prepare for the challenges ahead, said Nick Jeffrey, CEO of Vodafone Group Enterprise.

Tim Jones, Principle of Future Agenda, said The Future Agenda is an open foresight programme which crosses many frontiers and, because all participants are free to use the material as a source for ongoing research, it provides a unique way to generate and share insight. The initial views, such as the introduction of an Asian Euro and the future reduction of choice, are provoking significant discussion already.

The Future Agenda has identified 20 insights which will have impact by 2020.

Global Connectivity

In 2010 the number of mobile subscribers reached 4bn. By 2020 there may well be as many as 50bn devices connected to each other. Everything that can benefit from a network connection will have one.

Less Choice

Fewer choices provide higher levels of satisfaction. We can see consumers making a trade-off between variety and cost: Cost is winning and, as Asian consumers set the global trends, we will be focused on less variety not more.

Asian Euro

The introduction of a broad-basket ACU (Asian Currency Unit) as the third global reserve currency will provide the world with the opportunity to balance economic influence and trade more appropriately.

Virtual Authenticity

Virtual identity and physical identity are not the same thing; they differ in ways that we are only beginning to take on board. By 2020 this difference will disappear.

Dense Cities

As urban migration increases globally, seen through the lens of efficiency, more densely populated cities such as Hong Kong and Manhattan are inherently more sustainable places to live than the spread-out alternatives found in the likes of Houston and Mexico City.

Open Access

Access to information is the great leveller. As we become more comfortable sharing our search histories and locations, more relevant information will be provided more quickly and the power of innovation will shift to the public.

Less Energy

The days of easy energy are over. However, as CO2 capture yields no revenues without government support, global emissions will only be reduced by fundamental changes in behaviour for us all to use less energy.

Feeding the World

We are in a world of paradox where a growing portion of the developed world is obese at the same time as 15% of the global population is facing hunger and malnutrition. Technology to improve food yield will be accelerated to balance supply and demand.

Food Markets

In the next decade, the world economics of food will change and food will change the economics of the world. Decisions on where and what to produce will be made on a global basis not by individual market or geography.

Global Pandemics

Between now and 2020 we are likely to see somewhere between 2 to 3 global pandemics. These will arise in areas that do not have the top tier of preventative or public health infrastructure and will rapidly spread to developed Western countries.

Chinese train travel

China is now the pacesetter for change in inter-urban transport and is investing over \$1 trillion in expanding its rail network to 120,000km by 2020 – the second largest public works program in history. China is rapidly reshaping its landscape around train services.

Slow Luxury

The luxury market buyers increasingly want better not more. They will move away from Bling Bling to have items that are visually more discreet and will increasingly want to position themselves as being more responsible.

Homogenous Identity

We are likely to move more quickly and more widely towards an integrated identity for work and social interaction. We will no longer compartmentalise our lives but the integrated me and you will be how we see each other and interact.

Digital Money

Money is the means of exchange that is most immediately subject to the pressure of rapid technological change. Digital money transfer via mobile phones will be the default by 2020.

Zero Waste

Global waste production is predicted to double over the next twenty years. Much of this will be due to increased urbanisation and emerging economic growth. A shift towards the zero waste society is a desperate global need that will accelerate in the next decade.

Water Wars

Today over 6.6bn people share the same volume of water that 1.6bn did a hundred years ago. As population and economies grow and diets change we need more of this scarce resource. This will be the decade that we fight wars over water not oil.

Flattening world

As income increases in India, China, Brazil, and elsewhere, growth in demand for skilled services will occur disproportionately in these emerging economies. Combined with more global networks, this will lead to income stagnation in established economies.

Commoditised Knowledge

Education will become increasingly industrialized - broken into small, repeatable tasks and thus increasingly deskilled. As a consequence, the industrialization of information work is certain, and this will affect pretty much every business.

Global Tele-health

The drive towards personalized treatments will be matched by a greater focus on prevention. By delivering healthcare content to the individual's handset, mobile technology can help to maintain wellness.

Urban Poverty

The nature of economic activity in cities seems to be leading to a greater degree of urban poverty as in-migration and the move to the knowledge society favours the educated and the nimble. This will widen the gap between the rich and poor.

About the Future Agenda

The Future Agenda is a not-for-profit, cross-discipline programme which aims to unite the best minds from around the globe to address the greatest challenges of the next decade. In doing so, it will map out the major issues, identify and discuss potential solutions, suggest the best ways forward and, we hope, as a consequence, provide a platform for collective innovation at a higher level than has been previously achieved.

About Vodafone

Vodafone is the world's leading international mobile communications group with approximately 315 million proportionate customers as at 30 June 2009. Vodafone currently has equity interests in 31 countries across five continents and around 40 partner networks worldwide. For more information, please visit www.vodafone.com

**VODAFONE POSITIONED IN THE LEADERS QUADRANT OF THE MAGIC QUADRANT FOR
PAN-WESTERN EUROPEAN MOBILE SERVICE PROVIDERS**

Evaluation Based on Completeness of Vision and Ability to Execute

Vodafone, the world's leading international mobile communications group, today announced it has been positioned by Gartner, Inc. in the Leaders quadrant of the Pan-Western European Mobile Service Providers report.*

The evaluation criteria used by Gartner was operators' Ability to Execute and Completeness of Vision across 17 countries in Western Europe.

We are delighted with our positioning in the Leaders quadrant, said Nick Jeffery, CEO of Vodafone Global Enterprise. From my perspective, this is confirmation by Gartner of our expertise in meeting the communications needs of multi-national companies underlines the strength of our product and service offering. We now have nearly 600 multi-national corporate customers who have seen productivity gains, increased transparency in their management of communications around the globe, and, importantly in these challenging times, are benefiting from our tailored approach to pricing and costs.

The Report says there are two main aspects to enterprises' interest in mobile services. Their main concern at present is to cut the cost of basic services such as voice telephony, messaging and data connectivity. Increasingly, as the economic situation improves and the focus shifts towards growth and innovation, they are also interested in sourcing mobile services and devices more effectively, and in using mobile communications as business enablers.

VODAFONE TO BRING IPHONE TO THE UK ON JANUARY 14

- **Vodafone UK customers can pre order iPhone today**
- **iPhone 3G free on £35 post paid plan**
- **Unlimited texts on consumer price plans or unlimited calls to landlines for businesses**

LONDON, UK - December 21, 2009 - Vodafone today announced that it will launch iPhone in the UK on January 14, with a range of contract price plans tailored to let customers make the most of the UK's outstanding network.

Available from as little as £30 a month (on a 24 month contract) customers will be able to pre-order their iPhone from today, in-store, through their account manager or online at vodafone.co.uk/iphone. Customers who have already registered interest will be contacted by email with details of how to pre-order their iPhone.

iPhone 3GS is the fastest, most powerful iPhone yet, packed with incredible new features including improved speed and performance - up to twice as fast as iPhone 3G - with longer battery life, a high-quality 3 megapixel autofocus camera, easy to use video recording and hands free voice control. The groundbreaking App Store provides access to more than 100,000 applications from games to social networking to financial planning and health management, generating more than 2 billion downloads to date. iPhone is now available in over 80 countries around the world.

We started preparing our network over a year ago so that iPhone customers will really feel the advantage of being with Vodafone, said Guy Laurence, CEO, Vodafone UK. We will offer an outstanding iPhone experience wherever our customers live, work and travel, delivering speed and reliability - something our customers have told us they really value.

Edgar Filing: VODAFONE GROUP PUBLIC LTD CO - Form 6-K

We're especially pleased to offer iPhone to business customers from launch, both directly and through a network of 20 dealers across the country - clearly demonstrating that Vodafone is the natural home for small business.

iPhone customers can use up to 1GB of mobile data as part of their price plans as well as take advantage of unlimited access to Wi-Fi in the home and free, publicly available services throughout the country. Also included within the price plans, to add even more value, customers will also be able to use up to 1GB of data on one of the UK's largest Wi-Fi networks, BT Openzone, providing high-speed internet access at premium locations across the UK.

As a thank you to consumer customers who have already registered interest in iPhone and choose to pre-order, Vodafone will give them free Vodafone to Vodafone phone calls, for the life of their initial contract. Consumer and business customers can choose whether they wish to buy directly from Vodafone's 400 stores or online, through Apple retail outlets, or through our indirect partners Carphone Warehouse, Phones4U and 20 of the leading business dealers.

Example pricing and tariff information below. iPhone will also be available on all Vodafone standard plans. For full details of the extended price plan range, please visit vodafone.co.uk/iphone.

Consumer contract price plans (including VAT at 17.5%)

	24 Month				18 Month						
Monthly fee	£30		£35		£45		£40		£50		£80
Voice minutes	300		600		1200		600		1200		3000
Text messages	Unlimited		Unlimited		Unlimited		Unlimited		Unlimited		Unlimited
Data	1GB		1GB		1GB		1GB		1GB		1GB
Wi-Fi	Unlimited		Unlimited		Unlimited		Unlimited		Unlimited		Unlimited
iPhone 3G 8GB	£59		FREE		FREE		FREE		FREE		FREE
iPhone 3GS 16GB	£149		£89		FREE		£89		FREE		FREE
iPhone 3GS 32GB	£239		£179		£89		£179		£89		FREE

Edgar Filing: VODAFONE GROUP PUBLIC LTD CO - Form 6-K

Small business customers can sign up to unlimited calls to landlines, included in their price plans. Example price plans as below (excluding VAT):

	24 Month						18 Month									
Monthly fee	£30			£40			£50			£35			£45			£55
Voice minutes	600			1200			2000			600			1200			2000
