1. Organization and Significant Accounting Policies

LMP Corporate Loan Fund Inc. (the Fund) was incorporated in Maryland and is registered as a non-diversified, closed-end management investment company under the Investment Company Act of 1940, as amended (the 1940 Act). The Fund s investment objective is to maximize current income consistent with prudent efforts to preserve capital.

The following are significant accounting policies consistently followed by the Fund and are in conformity with U.S. generally accepted accounting principles (GAAP).

(a) Investment valuation. Senior loans are valued at readily ascertainable market values provided by an independent pricing service. Securities for which market quotations are not available are valued in good faith at fair value by or under the direction of the Board of Directors. In fair valuing a loan, Legg Mason Partners Fund Advisor, LLC (LMPFA), with the assistance of Citigroup Alternative Investments LLC (CAI), the Fund s subadviser, will consider among other factors: (1) the creditworthiness of the borrower and any party interpositioned between the Fund and the borrower; (2) the current interest rate, period until next interest rate reset and maturity date of the senior loan; (3) recent market prices for similar loans, if any; and (4) recent prices in the market for instruments with similar quality, rate, period until next interest rate reset, maturity, terms and conditions. LMPFA may also consider prices or quotations, if any, provided by banks, dealers or pricing services which may represent the prices at which secondary market transactions in the senior loans held by the Fund have or could have occurred. U.S. government agency obligations are valued at the mean between the quoted bid and asked prices. Securities traded on national securities markets are valued at the closing price on such markets. Securities traded in the over-the-counter market and listed securities for which no sales prices were reported are valued at the mean between the quoted bid and asked prices. Securities listed on the NASDAQ National Market System for which market quotations are available are valued at the official closing price or, if there is no official closing price on that day, at the last sale price. Short-term obligations with maturities of 60 days or less are valued at amortized cost, which approximates fair value.

The Fund has adopted Financial Accounting Standards Board Codification Topic 820 (ASC Topic 820). ASC Topic 820 establishes a single definition of fair value, creates a three-tier hierarchy as a framework for measuring fair value based on inputs used to value the Fund s investments, and requires additional disclosure about fair value. The hierarchy of inputs is summarized below.

- Level 1 quoted prices in active markets for identical investments
- Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)
- Level 3 significant unobservable inputs (including the Fund s own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The Fund uses valuation techniques to measure fair value that are consistent with the market approach and/or income approach, depending on the type of the security and the particular circumstance. The market approach uses prices and other relevant information generated by market transactions involving identical or comparable securities. The income approach uses valuation techniques to convert future amounts of cash flow to a single present amount.

The following is a summary of the inputs used in valuing the Fund s assets carried at fair value:

2. Investments

At June 30, 2010, the aggregate gross unrealized appreciation and depreciation of investments for federal income tax purposes were substantially as follows:

Gross unrealized appreciation	\$ 2,471,287
Gross unrealized depreciation	(7,258,140)
Net unrealized depreciation	\$ (4,786,853)

¹ This amount is included in net realized gain (loss) from investment transactions.

² Change in unrealized appreciation (depreciation) includes net unrealized appreciation (depreciation) resulting from changes in investment values during the reporting period and the reversal of previously recorded unrealized appreciation (depreciation) when gains or losses are realized.
