Decoupling proceeding

The following is an update to the discussion in Management's Discussion and Analysis of Financial Condition and Results of Operations Electric utility under Decoupling proceeding, which is incorporated herein by reference to page 64 of HEI's and HECO's Quarterly Report on Form 10-Q for the quarter ended June 30, 2010.

On August 31, 2010, the Public Utilities Commission of the State of Hawaii (PUC) issued a Final Decision and Order (D&O) in the proceeding which approves a decoupling mechanism and provides implementation details for the mechanism. The approved decoupling mechanism largely mirrors the proposed Final D&O submitted by the utilities and the Consumer Advocate in March 2010. In approving the decoupling mechanism, the PUC stated decoupling is the right regulatory model to move Hawaii toward a clean energy future, while protecting the financial health of the electric utilities. The order also noted that decoupling helps reduce or eliminate regulatory lag, thereby allowing the utilities more timely cost recovery, which facilitates their ability to fulfill Hawaii's statutorily-mandated energy policy objectives.

The approved decoupling mechanism has the following components: (1) decouple electric revenues from kilowatt-hour usage and allow a periodic true-up of electric revenues through a revenue balancing account; (2) provide an annual adjustment to electric revenues to account for indexed changes in expenses through a revenue adjustment mechanism; (3) provide an annual revenue adjustment mechanism to account for capital additions during the year and (4) allow for an earnings sharing revenue credit and major and baseline capital projects credit for customers as part of the revenue adjustment mechanism.

The PUC order suggests that the currently allowed rate of return for each utility may be adjusted to reflect a lower risk profile under the decoupling mechanism and that decoupling will be implemented prospectively for each utility when an interim or final D&O in the utilities pending rate cases is issued by the PUC and reflects a reduced rate of return due to decoupling. Management cannot predict when the PUC will issue interim or final D&Os in the pending rate cases nor can it predict the rate of return that will be determined by the PUC for each utility.

HEI and HECO intend to continue to use HEI's website, <http://www.hei.com/>, as a means of disclosing material and other important information and for complying with its disclosure obligations under SEC Regulation FD. Such disclosures will be included on HEI's website under the headings News & Events and Financial Information in the Investor Relations section. Accordingly, investors should routinely monitor such portions of HEI's website, in addition to following HEI's, HECO's and ASB's press releases, SEC filings and public conference calls and webcasts. Investors should also refer to the PUC website at <http://dms.puc.hawaii.gov/dms/> in order to review documents filed with and issued by the PUC.
