ITEM 8.01 OTHER EVENTS

On February 21, 2018, Southern Copper Corporation, or SCC, announced that it had won the public bidding process for the Michiquillay project in Cajamarca, Peru for a proposed price of \$400 million.

SCC indicated that Michiquillay is indisputably a world-class mining project with estimated mineral resources of 1,150 million tons and a copper grade of 0.63%, which SCC expects will produce 225,000 tons of copper per year (along with such by-products as molybdenum, gold and silver) for an initial mine life of more than 25 years. SCC estimates that the capital investment hovers around \$2.5 billion. SCC expects that Michiquillay will start production in 2025 to become one of the largest copper mines in Peru.

SCC stated that it will make every effort to make it a priority to work side by side with the communities and the Government of Peru to reach a satisfactory social agreement that will lay a shared and firm foundation for the project. SCC believes that the acquisition of this new mining asset further strengthens its position as a leading copper mining company, with the world's largest copper ore reserves, and with one of the industry's most attractive and sustainable portfolios of growing brownfield and greenfield projects. A copy of SCC's press release containing the announcement is filed as Exhibit 99.1 to this report.
