FORWARD-LOOKING STATEMENTS

Except for the historical information contained in this document, this report contains forward-looking statements that have been made pursuant to the provisions of the Private Securities Litigation Reform Act of 1995, including estimates, projections, statements relating to our business plans, objectives and expected operating results and assumptions. These forward-looking statements generally are identified by the words believes, goals, projects, expects, anticipates, estimates, intends, strategy, plan, variations of these words and similar expressions. Forward-looking statements are based on current expectations, estimates, projections and assumptions regarding product, services, and customer support revenue; our expectations associated with Evolving Systems Labs, Evolving Systems India, Evolving Systems U.K. Evolving Systems NC, Inc., Evolving Systems BLS LTD, Lumata UK LTD, Lumata France SAS, Lumata Deutschland GmbH, and Lumata Spain SL and short- and long-term cash needs, and are subject to risks and uncertainties which may cause our actual results to differ materially from those discussed here. Factors that could cause or contribute to such differences include, but are not limited to those discussed in the sections entitled Business, Management's Discussion and Analysis of Financial Condition and Results of Operations and Risk Factors. We undertake no obligation to update or revise publicly any forward-looking statements, whether as a result of new information, future events or otherwise.

PART I

ITEM 1. BUSINESS

INTRODUCTION

Evolving Systems, Inc. is a provider of real-time digital engagement solutions and services to more than 100 customers in over 65 countries worldwide. The Company's portfolio includes market-leading solutions and services for real-time analytics, customer acquisition and activation, customer value management and loyalty for the telecom industry promoting partnerships into retail and financial services.

The acquisitions by Evolving Systems, Inc., of BLS Limited (EVOL BLS), a wholly owned subsidiary of the Company, of Business Logic Systems Limited (BLS) completed on July 3, 2017 and by Evolving Systems Holdings Limited (EVOL Holdings), a wholly owned subsidiary of the Company, of all the issued and outstanding shares of four (4) Lumata Holdings subsidiaries, Lumata France SAS, Lumata Spain S.L., Lumata UK Ltd and Lumata Deutschland GmbH (collectively, Lumata Entities) on September 7, 2017, along with the acquisition of RateIntegration d/b/a Sixth Sense Media (SSM) in the third quarter of-2015 accelerated the Company's entry into the high value digital engagement space and also initiated the company's transition from a traditional software license model to a recurring revenue model based on managed services and Software as a Service (SaaS).

The Company has moved from selling technology to offering business solutions. The value proposition likewise has moved away from cost savings to a focus on revenue increases for the carrier and our business model has moved from classic capital expenditure license and services to operating expense models based on managed services with performance fees.

We offer real time, interactive digital engagement solutions and services that drives increases in Customer Lifetime Value for our enterprise customers:

- Acquisition and Activation Solutions that increases new subscribers (customers) enrollment through multiple channels and dealer networks, electronically authenticate customer identity and activate complex bundles of traditional telecom services (voice, messaging and data) and value-added network services.
- Retention and Loyalty Solutions that extends the lifetime of customers by engaging them with the brand, interacting and rewarding them with personalized offers through loyalty and partner programs.
- Analytics and Value Management Solutions that analyze consumer behavior in real time and enable marketing departments to innovate, create and manage highly-personalized and contextually-relevant, interactive campaigns that engage consumers with event-triggered offers that results in higher take-rates and increased customer revenues.

The combination of these offerings increases customer activations and activity, extends their lifetime and increases customer spend resulting in increased customer lifetime value.

We report the operations of our business consistent with our new business solutions model as one segment since we are packaging multiple products and services into offerings for carriers. We report geographic information based upon revenue and long-lived assets in the United States, United Kingdom and all other foreign countries as a group. Further information is contained in Note 12 to our Consolidated Financial Statements included in Item 8 of this Annual Report on Form 10-K.

Table of Contents

COMPANY BACKGROUND

Evolving Systems was founded in 1985 to provide software and services to the U.S. telecommunications industry. During our early years our product focus was on solutions that supported number management and number porting. In November 2004, we expanded our product set and geographical reach with the acquisition of Tertio Telecoms Ltd. (Evolving Systems U.K.), a supplier of Operations Support Systems (OSS) software solutions for service activation and mediation to communication carriers throughout Europe, the Middle East, Africa and Asia. With this acquisition we not only expanded our markets beyond North America, we also added service activation and mediation solutions to our product portfolio. The acquisition significantly expanded our product and service capabilities, allowing us to address a larger portion of our customers' OSS application needs with a balanced mix of products as well as services. The Company's focus was primarily on the wireless markets in the areas of subscriber activation, SIM card management and activation, self-service mobile applications, data enablement solutions, connected device activation and management of services.

On October 24, 2013 we acquired privately held Telespree Communications (Telespree), now known as Evolving Systems Labs, Inc. (Evolving Systems Labs), for an initial payment of approximately \$1.6 million, comprised of approximately \$0.8 million in cash and approximately \$0.8 million in stock. There was an earn-out provision whereby we potentially would have made additional payments in cash on the achievement of certain financial targets for the period from October 25, 2013 through October 24, 2016. This provision was not achieved and was recognized as other income in 2016. In addition, there is a final payment of \$0.5 million to be made subject to reduction for certain claims. The final payment has not been made as of the date of this Form 10-K was filed. The acquisition included technology used in the delivery and management of mobile data services and a portfolio of SaaS based solutions.

On September 30, 2015, we acquired privately held SSM, now known as Evolving Systems NC, Inc. (Evolving Systems NC) for an initial cash payment totaling approximately \$9.75 million, plus customary working capital adjustments, and we agreed to make a payment of \$250,000 on the one-year anniversary of the transaction, with such payment being available to secure SSM's representations and warranties under the acquisition agreement. The acquisition included SSM's software solution, RLM, a platform which enables carrier marketing departments to innovate, execute and manage highly-personalized and contextually-relevant, interactive campaigns that engage consumers in real time as well as a platform for Customer Loyalty and Retention. The final payment has not been made as of the date this Form 10-K was filed due to pending resolution of outstanding claims.

On July 3, 2017, BLS Limited (EVOL BLS), a wholly owned subsidiary of the Company, completed the purchase of Business Logic Systems Limited (BLS). EVOL BLS and BLS are both companies incorporated under the laws of England and Wales. Under the terms of the Asset Purchase Agreement, dated as of May 5, 2017 (the Purchase Agreement), the BLS will sell substantially all of its assets and transfer certain liabilities relating to BLS's business of providing customer value management solutions and data driven marketing solutions for £1.2 million (\$1.6 million) in cash, plus (a) an additional sum of £0.1million (\$0.1 million), reduced by any sums paid by EVOL BLS for certain employee severance obligations (collectively, the Cash Payments); (b) a percentage of collections on certain receivables over a 24-month period; and (c) an earnout equal to 50% of BLS based revenue over defined threshold levels for a period of 3 years after the closing date. BLS specializes in data-driven customer value management and customer engagement solutions that have been implemented in over 20 mobile operators in Europe, Africa, Asia-Pacific and the Caribbean. BLS solutions turn customer data into actionable insights and personalized contextual offers. Customer engagement occurs through in-bound and out-bound offers and is further extended through a suite of loyalty and retention solutions.

On September 7, 2017 EVOL Holdings acquired all of the issued and outstanding shares of four (4) Lumata Holdings (Seller) subsidiaries, Lumata Entities, in exchange for a cash payment totaling 4.0 million (\$4.8 million), subject to certain adjustments. The Seller and certain members of the Seller's management entered into Management Warranty Deeds to secure Lumata Holdings' representations and warranties under the Purchase Agreement and, to the extent the amounts provided under the Management Warranty Deeds are not sufficient to satisfy post-closing claims, EVOL Holdings may seek recovery from the Guarantor in an amount not to exceed 0.4 million (\$0.5 million). In

Edgar Filing: EVOLVING SYSTEMS INC - Form 10-K

connection with the Acquisition, EVOL Holdings entered into a Term Loan Facility Agreement, a Debenture and a Subordination Deed with East West Bank as lender in the amount of \$4,730,000 (collectively, the Loan Facility Agreements).

The Lumata Entities are a leading global provider of real-time, next generation loyalty and customer lifecycle management software and services that helps businesses gain value from their customer data for relevant and contextual insights and actions of value to both customers and enterprises. Its customers are mobile operators including Orange, Telefonica and other Tier-1 and emerging operators in Europe and around the world. The acquisition is expected to be accretive to our operations once the integration of the business is completed during 2018.

Evolving Systems, through its acquisitions of Sixth Sense Media, Business Logic Systems and Lumata is now a leader in real-time digital engagement solutions and services that drives increases in customer lifetime value through increases in customer acquisition and activation, the extension of customer lifetime and the increase in customer value and revenues in the converging

Table of Contents

mobile, entertainment, financial and retail services eco-system. We now also have one of the industry's best teams of experts, experience and platforms to help drive service providers increase their customer lifetime value (CLV) over the course of the customer lifecycle.

INDUSTRY DYNAMICS

The market for digital engagement to increase customer life time value through increased customer acquisition, customer retention and value management is growing. Several key factors are driving carrier demand for next generation solutions, supporting growth for specific products within the sector:

- Carriers seeking to further monetize their customer relationships and associated demographic, behavioral, location and contextual information to up-sell their network services and open new channels for optimized and personalized third-party service revenues;
- Rapid adoption of smart phones and network-attached devices, driving increased usage of mobile data;
- On-going network investment in 5G and Internet of things (IoT) networks is driving increased demand for digital engagement solutions
- Pricing pressure within the telecom industry driven by relatively flat subscriber growth, network upgrade costs, subscriber churn, and increased competition from traditional and new market entrants such as Over-the-Top (OTT) services both in the developed and emerging markets; and
- Adoption of the Enterprise Mobility and Machine to Machine (M2M) requirements are driving further demand.

Today, carriers are compelled to offer a growing array of services to deliver personalized and differentiated user experiences, reduce subscriber churn and maintain or grow market share. These value-added services have to be delivered to the market in ever shorter windows as competitive pressure has increased the velocity at which carriers deliver new products and services. To achieve these objectives, operators are increasingly reliant on flexible service enablement solutions that offer a myriad of options for their subscribers.

As network migrations to 5G, IoT and M2M accelerate the SIM card and embedded SIM (eSIM) have emerged as a vital links in the end to end value chain. Evolving Systems' full life cycle management of SIMs and eSIMs from ordering, dynamically activating and managing the SIM card is becoming an important component in the service provider's infrastructure, both to reduce operating costs associated with the provisioning of SIM cards, as well as to improve the end-user experience. We are a pioneer and leader in this market and believe we are well-positioned to maintain our leadership role in this growth segment. To date our Subscriber Activation solution has activated over half a billion SIM cards, providing enhanced functionality and significant operator savings.

Edgar Filing: EVOLVING SYSTEMS INC - Form 10-K

In a market where consumers perceive their telecoms services as a commodity, maintaining or growing customer value and retaining valuable customers is a persistent challenge. Customers are demanding ever greater incentives for their loyalty, attracted by disruptive OTT alternatives and competitive offers on data, airtime, and SMS. This can lead to a spiral of price-driven value destruction unless a truly differentiated approach is used to stand out from the crowd and deliver superior value.

The digital revolution offers unparalleled opportunities to generate new revenue streams, create highly relevant and differentiated offerings, and deliver more engaging customer experiences to the growing universe of connected consumers. But digital requires a whole new way of interacting with consumers in real-time, via multiple channels such as apps, web, email, as well as traditional SMS, in a highly contextual manner. Having a deep understanding of customer preferences and behaviour is critical in this digital environment full of demanding customers.

Mobile service is ubiquitous and mobile operators are the digital enablers between consumers and brands, the trusted processors of customer data, uniquely able to bridge the digital and physical world through their technology infrastructure. The mobile industry is going through a transition period. Traditional voice and messaging revenues are in decline due to several factors including the over-the-top OTT players. Mobile data demand is growing. Service providers are focused on building upon their brand and their last mile connectivity to more actively engage their customers and to increase the customer wallet-share through digital and non-digital partnerships.

Evolving Systems can help Telcos navigate through the digital marketing jungle of fragmented technologies, converging communication channels and data overload through our portfolio of digital engagement solutions. Evolving Systems combines big ideas and a deep understanding of mobile customer behaviour with powerful software capabilities to create digital engagement & loyalty experiences that stand out from the crowd.

Table of Contents

We sit at the intersection of technology and marketing. Our solutions leverage mechanics such as digital vouchering, digital badges, in-app engagement, etc. to drive a two-sided business model, where we generate value from 3rd party brands, as well as retail customers. It is a virtuous circle where customers increase spend and extend tenure in return for perceived high value rewards and experiences, which brands provide in order to access a highly targeted mobile customer base.

This is important because connecting brands and consumers via a digital platform, positions the mobile operator at the center of commerce, content, and communication flows in the connected world. Mobile operators have access to accurate data on customer preferences, behaviour, spending, etc.. While it is critical to ensure customer opt-in for data use, industry research confirms that consumers will allow a trusted mobile operator to use customer information in return for highly relevant and attractive incentives from brands.

DIGITAL ENGAGEMENT SOLUTIONS PORTFOLIO

Acquisition and Activation

Our Subscriber Acquisition and Activation solutions support carriers in adding new subscribers to their network, from the sales and contract process through to the allocation of network and service resources and the activation of services to the mobile device.

- ***Smart Dealer*** provides SIM retailers with a tool set that enables them to sell SIM cards efficiently and effectively. With Smart Dealer, the operator is able to communicate and guide dealers towards using the latest promotions, enabling instant reactions to competitor activities. Smart Dealer captures subscriber details for Know Your Customer prepaid registration, including biometric data, using standard, low cost devices.
- ***Dynamic SIM AllocationTM*** is a SIM Activation solution which is integrated into the carrier's signaling network, enabling new SIM cards that have not been pre-provisioned to be detected on first use. This triggers an efficient, dynamic provisioning process and eliminates the need for pre-provisioning, thus lowering the operator's costs of subscriber acquisition. The SIM activation occurs only when a SIM card is first used. During the activation process, the solution enables an on-device interaction with the end-user, delivering a differentiated user-experience, reducing customer churn and boosting revenue for the carrier.
- ***Tertio[®] Service Activation*** is used by carriers to activate a new subscriber or to add a new service to an existing subscriber. Our solution provides a flexible operating environment for carriers to manage their voice, data, and content service needs for both their traditional and broadband IP networks. It provides a point of flexibility in the carrier's OSS/BSS architecture, allowing fast introduction of new network technologies and easing the burden of integration with existing devices and systems. Service providers who use our Tertio solution can better plan, manage and execute the introduction of new services.

- ***Number Inventory and Management*** is a scalable and fully automated solution that enables operators to reliably and efficiently manage their telephone numbers (i.e. SIMs, MSISDNs, IMSIs, Integrated Circuit Card Identifiers (ICCIDs) as well as other communication identifiers such as Uniform Resource Locators or (URLs) and email addresses. Our solution focuses on the automation of all number resource management processes, allowing operators to adhere to regulatory requirements and effectively manage the lifecycle of telephone numbers, as well as benefit from time savings and reduced costs.

Analytics and Value Management

Our Analytics and Value Management solutions empower marketing departments to create and deploy highly personalized, location and contextually relevant, interactive customer engagement campaigns. Our cutting-edge Evolution platform enables us to deliver a full-service solution in a cloud SaaS model or hosted on-site, worldwide. The platform monitors customer events and behavioural patterns in real-time, building a profile of each subscriber. When the right conditions are met, the platform pushes the best match or a personalized offer or ad to the customer.

Compared with many other marketing campaign management systems, our solution more accurately targets marketing messages and campaigns that drive incremental revenue more quickly.

Table of Contents

- ***The Profiling Engine*** supports static as well as ongoing dynamic profiling of subscribers. It fully supports any real-time or micro segmentation requirements as needed by the business. The Profiling Engine is a rules-driven flexible aggregator of subscriber baseline and usage data. It has been designed to handle any data model, including any data representation that may be available within the carrier's legacy billing and Customer Relationship Management (CRM) environment.
- ***The Campaign Engine*** is used to configure and deliver marketing campaigns and offers to subscribers. It includes a business friendly dashboard that enables rapid configuration, testing and launching of new business campaigns. Through the dashboard the business user can target specific subscribers, define offers and rewards, and create personalized messages per campaign, interaction and subscriber. The dashboard provides a real-time view on each campaign's effectiveness and impact.
- ***Campaign Modules*** provide predefined templates for specific types of real-time mobile marketing tactics, including marketing for data bundles, digital services such as music, video, movies, gaming, entertainment, and mobile money as well as non-digital services including retail offers.
- ***Social Media Integration*** enables carriers to expand their engagement with subscribers beyond simple network usage and direct channels and can support social marketing campaigns that leverage the subscribers as a part of the marketing network.
- ***App Promotion*** engages subscribers when they are first configuring new services or when they are upgrading to mobile devices with new capabilities. It enables carriers to promote the use of their own mobile applications for subscriber care, and also those of third party app publishers, opening possibilities for new revenue streams.

Customer Retention and Loyalty

Evolving's Customer Retention and Loyalty solutions help reduce churn, extend the customer lifetime and generate more revenue from existing subscribers by using the latest innovative programs. Strong subscriber loyalty is created by rewarding subscribers via schemes that offer additional carrier services or the services and products of participating partners.

Brand partnerships are the true differentiators given the commoditization of typical carrier offers in the market. Some of the examples of Digital Engagement concepts we have created include Orange Wednesdays Film Sponsorship, Recharge & Instant Win, the largest points system with 28 million customers online and two of the most successful loyalty programs in the tough African market. Badges, a highly-successful next generation loyalty eco-system with gamification, is another break-through innovation that is very successful among European mobile operators. These concepts were designed with specific mechanics that work within the local market in conjunction with brand partners. They

are successful solutions which endure, because of key ingredients such as simple customer journeys, perceived high value rewards and innovative engagement mechanics in conjunction with strategic brand partnerships.

The key modules include:

- ***Loyalty Points and Programs*** are used to reward mobile subscribers for use of the carrier's services. Credit is earned in the forms of status points and bonus points. Gamification can be used to encourage the collection of rewards by subscribers and comparison with others in their social group. Loyalty Credit is then exchanged for services or discounts from the carrier, or for digital and physical goods from third party businesses and retail partners.
- ***Coupon, Voucher and Badges Management*** covers the whole lifecycle of coupons, vouchers and badges as a medium for delivering rewards. Our solution manages the interface with partners, the delivery of coupons to subscribers, redemption for digital or physical goods, and settlement between carrier and partner.
- ***Digital Engagement Engine*** includes several solution components:
 - Proprietary framework for engagement concept design and partner selection
 - Flexible business rules to define tiers to earn, burn or transfer credits
 - Multi-variable definition to calculate loyalty, including spend, tenure, social advocacy, brand engagement, digital maturity, etc.
 - Intelligent predictive analytics engine and segmentation capability

Table of Contents

- Channel agnostic redemption capability with standard partner APIs to connect into Point of Sale retail systems and other redemption networks
- Tier1 carrier grade data capture and configurable provisioning engine

MANAGED SERVICES (MARKETING AND EXPERT IT SERVICES)

Our Marketing Services team work through a five stage approach to assist our customers marketing departments in engaging and retaining and growing their valuable customers

- **Engage:** We design engagement plans that map against specific segments based on propensity to participate and lifetime value indicators.
- **Interact:** We design the push and real-time trigger-based interactions with customers to attract them into the program and keep them engaged.
- **Reward:** We define a broad range of trigger events and a variety of engagement mechanics (points, badges, instant wins, vouchers, etc.).
- **Redeem:** We work with partners to stitch together a redemption network online and offline so customers have a highly relevant, branded rewards (a key source of differentiation and program longevity) from which to choose.
- **Optimise/Learn:** We use program data, overlay program results from our global customer base, and apply an iterative process to reach the right customers with meaningful incentives.

Our Expert IT Services team provides expert and vastly experienced consulting services for the customization, integration and deployment of our solutions. Our services cover all aspects of the project lifecycle, including system architecture, design, software development and customization, system integration, testing, live deployment and production support, program and project level management, post-implementation maintenance and domain and product expertise.

Our Managed Services can be delivered on-site at a carrier or remotely. Services range from operational support of our software solutions, through technical services to expand those solutions with new modules and functionality to support new business value, to marketing and customer engagement consultancy that directly drives marketing campaigns for our customers and helps them achieve their business objectives. The Managed Services teams also offer their expertise and experience to create the maximum financial impact to the carrier from using our solutions.

Edgar Filing: EVOLVING SYSTEMS INC - Form 10-K

Our teams work closely with customers and integration partners and have established long-term relationships with operators in the Americas, Europe, the Middle East, Africa and Asia Pacific regions.

PRODUCT DEVELOPMENT

Our Product Development teams develop our software solutions internally in our labs in North Carolina, France, Romania and India. We conduct research to identify specific industry and customer business needs as well as market requirements and we use that information to determine our investment in product development. We evaluate the market for new products and we leverage our existing product capabilities with enhancements of existing products. We build investment plans for our principal product areas and we make other investments in tools and product extensions to accelerate the development, implementation and integration process for customer solutions.

The Evolution platform, a combination of software capabilities through each of the acquisitions will provide a powerful environment to configure and operate rich Customer Lifecycle Journeys from Acquisition to Retention through variety of Engagement Models, Offer Schemes and Loyalty Programs. Primarily designed to address integrated mobile Digital Engagement needs it can accommodate any type of customer and any type of use case. The platform's Customer Journey Manager will be responsible for profiling individual engagements to enable better insights and more automation. This approach produces more relevant and engaging predictions and offers for us to present to customers.

The platform will provide service providers with unmatched Artificial Intelligence based on smart data and operational predictive analytics functions enabling to improve efficiency and to maximize revenues, all the while reducing time and effort to execute hundreds of micro-segmented engagement and offers. Evolving Systems is looking to take its digital engagement readiness solution for carriers beyond just enabling customers to use their traditional data. The new platform will move beyond its current SQL engine to using a Docker-optimized Kafka-powered Big Data platform. This will enable the real-time processing of multiple data-streams for unlimited flexibility and scalability.

Table of Contents

Gathering all knowhow acquired by Evolving, the Evolution platform will be used to operate the most innovative large-scale loyalty programs, as well as to provide unique mechanics enabling gamification, optimization and personalization across a variety of channels. It will enable to engage with customers at all stage of their lifecycle, providing interactive dialogue and smart recommendations through all available traditional and digital channels. The platform will seamlessly integrate within the service provider's IT infrastructure, either on premises or on private cloud. It will be operated or managed as a service depending on the market needs.

Product Development is expensed as incurred. For the years ended December 31, 2017, 2016 and 2015, we expensed \$2.0 million, \$3.0 million and \$3.8 million, respectively, in development costs. The majority of product development investments in 2017 went into the further development and enhancement of our RLM and DSA solutions.

SALES AND MARKETING

Our sales force is primarily a field organization structured to focus on specific geographical territories around the world including North America, Latin America, Europe, Middle East, Africa, the Commonwealth of Independent States (comprised of Russia and other former Soviet Republics), South Asia and Asia Pacific. Our sales activities cover direct sales to enterprise customers as well as sales through partners and resellers. Partners include Ericsson and Gemalto who include our products as part of their wider solution offerings and systems integrators such as IBM, TechMahindra and Wipro who license our technology to customers as part of their delivery engagements. The Resellers include regional or country specific companies that manage our customer relationships in countries where English is not the primary language.

Our solutions and our customers' infrastructures are complex, and require a high degree of consultative selling which often results in a long sales cycle in excess of twelve months. In addition, our business relies on incremental revenue from existing customers, which requires regular interaction with customers to discuss enhancements to our existing solutions as well as the introduction of new features and functionality. The sales team is also responsible for making proactive proposals to prospects, as well as managing and delivering responses to competitive tenders. This complex, highly interactive approach, typically results in a long sales cycle, requiring us to invest a considerable amount of time developing business opportunities without guaranteed sales.

Our marketing organization supports our sales activities by identifying markets for our products and establishing an awareness of our offerings in those markets through a combination of direct marketing, web marketing, and participation in shows, conferences, and industry bodies. The marketing organization is responsible for maintaining our web site and creating electronic and print-based sales collateral to support our sales activities and lead generation.

COMPETITION

The market for telecommunications OSS products and mobile analytics and advertising is highly competitive and subject to rapid technological change, changing industry standards, regulatory developments and consolidation. We face increasing demand for improved product performance, enhanced functionality, rapid integration capabilities; all in the context of continuing pricing pressure. Our existing and potential competitors include many large domestic and international companies that often have substantially greater financial, technological, marketing, distribution and other resources, larger installed customer bases and longer-standing relationships with telecommunications customers. The market for telecommunications OSS software and services is extremely large and we currently hold only a small portion of total market share.

Edgar Filing: EVOLVING SYSTEMS INC - Form 10-K

Nonetheless, we believe our work to establish the Subscriber Acquisition and Activation area has resulted in our achieving a measurable and reasonable market share in those areas.

Our principal competitors for Subscriber Acquisition and Activation are vendors such as Comptel-Nokia, Amdocs and Oracle, as well as billing vendors and vendors such as Ericsson. In the area of Subscriber Acquisition and Activation, we believe we hold a significant leadership position; however, we see occasional competition from Giesecke & Devrient GmbH and HP, as well as a few other smaller regional competitors

Competitors for Digital Engagement Customer Value Management, Retention and Loyalty, include specialist vendors such as Pontis (acquired by Amdocs), CRM software from vendors such as SAP and Oracle, Analytics software from vendors like SAS and a few independent software companies like FlyTxt and Pelatro.

For all of our products, our ability to compete successfully depends on a wide range of factors. First and foremost is our ability to deliver both marketing services and expert services based on our solutions platform, which offers a cost-effective way for our customers to benefit from our many years of experience and product investment. We deliver value by offering competitively priced quality solutions, tailored specifically to our customers' network and IT infra-structure. After a customer implements our products, we often receive subsequent orders for enhancements to add functionality or increase capacity. Complex solutions tailored to customers' needs are expensive and time consuming to replace, thus providing us with an incumbent advantage. Furthermore,

Table of Contents

many of our customer relationships span five years or more. We believe all of these factors give us a competitive advantage and can be a barrier to entry for potential competitors.

SIGNIFICANT CUSTOMERS

For the year ended December 31, 2017 one significant customer accounted for 11% of revenue from operations. This customer is a large telecommunications operator in Europe. For the year ended December 31, 2016 and 2015, no significant customer exceeded the threshold (defined as contributing at least 10%) of revenue from operations.

INTELLECTUAL PROPERTY

We rely on a combination of patents, copyright, trademark and trade secret laws, as well as confidentiality agreements and licensing arrangements, to establish and protect our proprietary rights. We have 16 patents in the U.S. on elements of our DSA and mobile broadband enablement products and patents pending in other countries on elements of our DSA and other products.

EMPLOYEES

As of December 31, 2017, we employed 314 people including 17 in the United States, 126 in the United Kingdom and European Union and 171 in India. This includes 111 employees from the recent acquisitions. Of our worldwide staff, 80% are involved in product delivery, development, support and professional services, 4% in sales and marketing, and 16% in general administration. The number and mix of our staff was significantly affected by the recent acquisitions and changes may occur in the coming year. The Company also engages with multiple contractors in various countries to allow us to service our global customers.

AVAILABLE INFORMATION

You can find out more information about us at www.evolving.com. The information on or accessible through our website is not incorporated into this Annual Report on Form 10-K. Our Annual Reports on Form 10-K, our Quarterly Reports on Form 10-Q, and our Current Reports on Form 8-K and any amendments to those reports are available free of charge on our Internet website as soon as reasonably practicable after we electronically file or furnish such material with the SEC. Additionally, these reports are available at the SEC's Public Reference Room at 100 F Street, N.E., Washington, D.C. 20549 or on the SEC's website at www.sec.gov. Information on the operation of the Public Reference Room can be obtained by calling the SEC at 1-800-SEC-0330.

ITEM 1A. RISK FACTORS

General Risk Statement

Our operations and financial results are subject to various risks and uncertainties, many of which are driven by factors we cannot control or predict. An investment in our common stock involves a high degree of risk. The risks that we have highlighted here represent the material risks known to us, but they are not the only ones that we face. If any of the risks actually occur, our business, financial condition, results of operation and cash flows could be negatively affected. You should carefully consider these risks and uncertainties before investing in our securities.

Risks Related to Our Business and Industry

We operate a global business that exposes us to currency, economic, regulatory and tax risks.

Our revenue comes primarily from sales outside the U.S. and our growth strategy is largely focused on emerging markets. Our success delivering solutions and competing in international markets is subject to our ability to manage various risks and difficulties, including, but not limited to:

- our ability to effectively staff, provide technical support and manage operations in multiple countries;
- fluctuations in currency exchange rates;
- timely collecting of accounts receivable from customers and resellers located outside of the U.S.;
- our ability to repatriate cash from foreign locations and manage potential adverse tax consequences in connection with repatriating funds;
- trade restrictions, political instability, disruptions in financial markets, and deterioration of economic conditions;

Table of Contents

- compliance with the U.S. Foreign Corrupt Practices Act, the U.K. Bribery Act and other anti-bribery laws and regulations;
- variations and changes in laws applicable to our operations in different jurisdictions, including enforceability of intellectual property and contract rights; and
- compliance with export regulations, tariffs and other regulatory barriers.

Approximately 52% of our revenue is transacted in currencies other than the U.S. dollar (e.g. British Pound Sterling, Swiss Franc and Euro). As a result, when the U.S. dollar strengthens, our revenue, when converted to U.S. dollars, is reduced. At the same time, approximately 75% of our operating expenses are incurred overseas. The strengthening dollar, conversely, lowers expenses outside of the U.S. Although this has provided some defense against currency fluctuations for our bottom line results, we may not be able to maintain this ratio of revenue to expense in the future. In addition, we may not be able to repatriate cash without incurring substantial risks involving floating currency exchange rates, or to recover or apply withholding taxes remitted to foreign governments. Any of the foregoing factors may have a material adverse impact on our business, financial condition and results of operations. On December 22, 2017, the 2017 Tax Cuts and Jobs Act (the Tax Act) was enacted and significantly affected U.S. tax law by changing how the U.S. imposes income tax on multinational corporations. The U.S. Department of Treasury has broad authority to issue regulations and interpretative guidance that may significantly impact how we will apply the law and impact our results of operations in the period issued. The Tax Act requires complex computations not previously provided in U.S. tax law. As such, the application of accounting guidance for such items is currently uncertain. Further, compliance with the Tax Act and the accounting for such provisions require accumulation of information not previously required or regularly produced. As a result, we have provided a provisional estimate on the effect of the Tax Act in our financial statements. As additional regulatory guidance is issued by the applicable taxing authorities, as accounting treatment is clarified, as we perform additional analysis on the application of the law, and as we refine estimates in calculating the effect, our final analysis, which will be recorded in the period completed, may be different from our current provisional amounts, which could materially affect our tax obligations and effective tax rate.

Our revenue, earnings and profitability are affected by the length of our sales cycle, and a longer sales cycle could adversely affect our results of operations and financial condition.

Our business is impacted by the length of our sales cycles. Our customers have relatively complex businesses and the purchase of large communications solutions used for enterprise-wide, mission-critical purposes, involve significant capital expenditures and lengthy implementation plans. Prospective customers often take a long period of time to evaluate our products and services and require us to spend substantial time, effort and money educating them about our solutions. The purchase of the types of products and services we offer typically also requires coordination and agreement across many departments within a customer's organization. This process often results in a lengthy sales cycle, typically ranging between three and twelve months. Mergers and acquisitions of large communications companies, as well as the formation of new alliances, have also resulted in purchasing delays. Further lengthening of our sales cycle could hinder growth in our revenue and result in increased cost of sales, thereby reducing our profitability.

We depend on a limited number of significant customers for a substantial portion of our revenue, and the loss of one or more of these customers, or a delay in a large order, could adversely affect our business.

We earn a significant portion of our revenue from a small number of customers in the communications industry. The loss of any significant customer, delays in delivery or acceptance of any of our products by a customer, delays in performing services for a customer, or delays in collection of customer receivables could harm our business and operating results to a greater degree than other companies with a broader customer base.

Customers' budgetary constraints and internal acceptance reviews may cause potential customers to delay or forego a purchase, making it difficult for us to forecast the timing and size of our contracts. In addition, our sales opportunities in any given quarter and year typically include a few high value opportunities. The delay or failure to close one or more large orders could have a material adverse effect on our results of operations and financial condition and cause our results to vary significantly from quarter to quarter and year to year.

Our managed services offerings and our cloud strategy, or Software as a Service (SaaS), may not be successful.

We offer some of our products as a managed service or a SaaS implementation and we intend to offer more of our solutions in this manner in the future. While we believe the demand for managed services and cloud-based solutions is strong, there are no guarantees that we will be able to compete effectively, generate significant revenues or maintain profitability. Whether we are successful in providing our solutions as managed services or solutions as cloud solutions depends on our execution in a number of

Table of Contents

areas, including continuing to innovate and bring to market compelling managed services and cloud-based offerings and ensuring that our services meet the reliability expectations of our customers and maintain the security of customer data. Our managed and cloud-based services strategies also may fail to achieve success if other companies offering managed services and cloud-based solutions experience data loss, security breaches or service reliability issues that cause consumers to become less willing to accept managed services and cloud-based solutions in general.

We incurred debt in connection with our recent acquisitions of Lumata and SSM which could adversely affect our financial condition and restrict our operating flexibility.

In connection with our acquisition of Lumata Entities completed on September 4, 2017, we entered into a Term Loan Facility Agreement with East West Bank as lender in the amount of \$4,730,000 (the Lumata Facility) and we used the full amount of the Lumata Loan Facility to fund the acquisition. The Lumata Facility requires the Company to make monthly principal payments of approximately \$131,400 commencing July 31, 2018 and interest at the greater of (a) 3.5% or (b) the variable rate of interest that appears in the Wall Street Journal on a monthly measurement date, plus in either case 1.5%. The Lumata Facility is secured by substantially all of the assets of the Company. The unpaid balance of the Lumata Facility is due on August 16, 2021.

In connection with our acquisition of SSM in September 2015, we increased our revolving credit facility with East West Bank from \$5.0 million to \$10.0 million (the Revolving Facility) and we used the full amount of the Revolving Facility to fund the acquisition. On February 29, 2016, we retired the Revolving Facility and we entered into a term loan agreement with East West Bank (Term Loan) for \$6.0 million. The Term Loan bears interest at a floating rate equal to the U.S. Prime Rate plus 1.0%, and is secured by substantially all of the Company's assets, including a pledge, subject to certain limitations with respect to stock of foreign subsidiaries, of the stock of the existing and future direct subsidiaries of the Company. Interest accrues and is payable monthly. We are required to repay the Term Loan in 36 equal monthly installments, commencing on January 1, 2017. The Term Loan matures on January 1, 2020.

Both in the Lumata Facility and the Term Loan (collectively, Loans), require us to maintain a minimum current ratio, a specified ratio of Total Liabilities to EBITDA and a minimum fixed charge coverage ratio, as defined in the Term Loan. The Loans also include negative covenants that place restrictions on the Company's ability to, among other things: incur additional indebtedness; create liens or other encumbrances on assets; make loans, enter into letters of credit, guarantees, investments and acquisitions; sell or otherwise dispose of assets; cause or permit a change of control; merge or consolidate with another entity; make negative pledges; enter into affiliate transactions; limits the amount of cash distributions to our shareholders; and change the nature of our business materially. Outstanding amounts under the loans may be accelerated by East West Bank upon the occurrence and continuance of certain events of default, including without limitation: payment defaults, breach of covenants beyond applicable grace periods, breach of representations and warranties, bankruptcy and insolvency defaults, and the occurrence of a material adverse effect (as defined). Acceleration is automatic upon the occurrence of certain bankruptcy and insolvency defaults.

Our debt and related obligations, including interest payments, covenants and restrictions, could have important consequences, including the following:

- reserving cash in order to satisfy the obligations relating to our debt could adversely affect the amount or timing of investments to grow our business, impairing our ability to invest in and successfully grow our business;

- our existing debt could limit our ability to obtain additional financing on satisfactory terms to fund our working capital requirements, capital expenditures, acquisitions, debt obligations and other general corporate requirements;
- our debt may increase our vulnerability to general economic downturns, competition and industry conditions and we may be unable to take advantage of opportunities that our leverage prevents us from exploiting, placing us at a disadvantage to our competitors that are less leveraged; and
- the Loans imposes restrictions on the manner in which we conduct our business, including restrictions on our ability to pay dividends, incur additional debt and sell assets.

The obligations under the Loans could have an adverse effect on our business, financial condition, operating results or cash flows. In addition, our failure to comply with the covenants under the Loans could result in an event of default and acceleration of the outstanding balance, which could significantly harm our business and cause our stock price to decline.

Table of Contents

We recently completed a number of acquisitions in support of our new strategy based on recurring managed services. Acquisitions present many risks and we cannot guarantee that we will realize the financial and strategic goals that were contemplated at the time of a transaction.

Since September of 2015 we have acquired the Lumata Entities, BLS and SSM and we believe these acquisitions demonstrate our pivot to the customer acquisition and customer value management (CVM) domains. We expect to continue making acquisitions or entering into strategic alliances as part of our long-term business strategy. We cannot be sure that these transactions will ultimately enhance our products or strengthen our competitive position. These transactions involve significant challenges and risks: they may not advance our business strategy, we may not get a satisfactory return on our investment, we may have difficulty integrating operations, new technologies, products and employees, and they may distract management and employees from our other businesses. The success of these transactions will depend in part on our ability to leverage them to enhance our existing products and services or develop compelling new ones. It may take longer than expected to realize the full benefits from these transactions, such as increased revenue, enhanced efficiencies, or increased market share, or the benefits may ultimately be smaller than we expected.

Furthermore, we may fail to identify or assess the magnitude of certain liabilities, shortcomings or other circumstances prior to acquiring a company or technology, which could result in regulatory exposure, unfavorable accounting treatment, unexpected increases in taxes due, a loss of anticipated tax benefits or other adverse effects on our business, operating results or financial condition. In addition, future acquisitions could result in dilutive issuances of equity securities, impact employee stock options, reduce our cash available for operations and increase our debt. All of these factors associated with acquisitions could result in unexpected litigation from employees and stockholders. The occurrence of any of these risks could have a material adverse effect on our business, results of operations, financial condition or cash flows, particularly in the case of a large acquisition or several concurrent acquisitions.

Our periodic workforce restructurings can be disruptive.

We have in the past restructured our workforce in response to management changes, acquisitions, product changes, performance issues or other considerations. These types of restructurings have resulted in increased restructuring costs and temporary reduced productivity while our staff adjusted to new roles and responsibilities. We may choose to implement additional restructuring, particularly in connection with recent or future acquisitions. There is no certainty that we will achieve the expected cost savings or other benefits of these restructurings or do so within the expected timeframe. As a result, our business, revenues and other results of operations could be negatively affected.

Our products are complex and have a lengthy implementation process; unanticipated difficulties or delays in the customer acceptance process could result in higher costs and delayed payments.

Implementing our solutions can be a relatively complex and lengthy process since we typically customize these solutions for each customer s unique environment. Often our customers also require rapid deployment of our software solutions, resulting in pressure on us to meet demanding delivery and implementation schedules. Inability to meet these demanding schedules, or quality issues resulting from accelerated delivery schedules, may result in customer dissatisfaction and/or damage our reputation, which could materially harm our business.

The majority of our existing contracts provide for acceptance testing by the customer, which can be a lengthy process. Unanticipated difficulties or delays in the customer acceptance process could result in higher costs, delayed payments, and deferral of revenue recognition. In addition, if

our software contains defects or we otherwise fail to satisfy acceptance criteria within prescribed times, the customer may be entitled to liquidated damages, to cancel its contract and receive a refund of all or a portion of amounts paid or to seek other monetary damages. These could exceed related contract revenue and result in a future charge to earnings. Any failure or delay in achieving final acceptance of our software and services could harm our business, financial condition, results of operations and cash flows.

Compliance with changing European privacy laws could require us to incur significant costs and failure to comply could give rise to liabilities.

During the course of providing our products and services we may collect names, addresses, telephone numbers and other personally identifiable information, or PII. This may subject us to complex regulatory requirements related to data collection and risks of improper use or disclosure. In addition, we have offices and customers in the EU where new more stringent regulations, known as the General Data Protection Regulations or GDPR, will be going into effect in May 2018, imposing potentially large monetary fines for privacy violations. We strive to limit the amount of PII we collect and/or store and we have implemented steps designed to protect against unauthorized access to such information but because of the inherent risks and complexities involved in protecting this information, particularly if we store such information in a cloud implementation, the steps we have taken may not be sufficient to prevent the misappropriation or improper disclosure of such PII. In addition, third party vendors that we engage to perform services for us may unintentionally release PII or otherwise fail to comply with applicable laws and regulations. We may also experience hesitancy, reluctance or refusal by European or multi-national customers to continue to use our services due to the potential risk exposure that these customers might face as a result of the current data protection obligations imposed on them by certain data

Table of Contents

protection authorities. These customers may decide not to do business with us or may require that their personal data remains in certain locations. We will incur additional costs if we are required to implement special operational processes and store data in jurisdictions not of our choosing. Any failure by us to comply with laws and regulations regulating privacy, data security, or consumer protection could result in lost or restricted business, actions or fines brought against us or levied by governmental entities or others and could adversely affect our business and harm our reputation.

We face risks associated with doing business through local partners.

In some countries, because of local customs and regulations or for language reasons, we do business through local partners who resell our products and services, with or without value-added services. This can cause delays in closing contracts because of the increased complexity of having another party involved in negotiations. In addition, where the local partner provides additional software, hardware and/or services to the end-user customer, our products and services may only be a small portion of the total solution. As a result, conditions surrounding acceptance and payments owed to us may be impacted by factors that are out of our control. Resellers may also delay paying us even when they have been paid by the end-user customer. We have in the past experienced delays in closing contracts through partners and collecting from resellers and this situation may arise again in the future, negatively impacting our cash flows. Doing business through local partners may also increase our risks under anti-bribery regulations, discussed below.

The success of our business depends on continued growth in the wireless services industry and demand for connected devices, and other usage of mobile data.

Our primary market, wireless telecommunications is fairly mature and saturated, which may result in lower budgets and margins for our solutions and services. The future success of our business depends upon continued new subscriber growth, consumer adoption of new types of connected devices like IoT and consequently mobile operator demand for next generation software solutions and services. If there is a slowdown in subscriber growth in the wireless services industry or the demand for connected devices and usage of mobile data were to stabilize or decline, our business and results of operations may be adversely affected.

The success of our business also depends on our ability to renew our support and managed services offerings. The quality of our support and managed services offerings is important to our customers. If we fail to meet our service level obligations under our agreements we could incur penalties and could lose customers.

A high level of support for our solutions is critical for the successful marketing and sale of our solutions. Our customers expect us to resolve issues relating to the use of our solutions and if we are unable to meet or exceed the expectations of our customers, we could experience loss of customers and difficulty attracting new customers. In addition, we have service level agreements with many of our customers under which we guarantee specified levels of service availability and service credits for failing to achieve our agreed service levels, which could result in higher than expected costs, decreased revenues and decreased operating margins. Any of the above results would likely have a material adverse impact on our business, revenue, results of operations, financial condition and reputation.

We are a relatively small company with a limited number of products and staff. Sales fluctuations and employee turnover may adversely affect our business.

We are a relatively small company. Consequently, compared to larger companies, sales fluctuations have a greater impact on our revenue and profitability on a quarter-to-quarter and year-to-year basis and a delayed contract could cause our operating results to vary significantly from quarter to quarter and year-to-year. In addition, as a small company we have limited staff and are heavily reliant on certain key personnel to operate our business. If a key employee were to leave the company it could have a material impact on our business and results of operations as we might not have sufficient depth in our staffing to fill the role that was previously being performed. A delay in filling the vacated position could put a strain on existing personnel or result in a failure to satisfy our contractual obligations or to effectively implement our internal controls, and materially harm our business.

Because our quarterly and annual operating results are difficult to predict and may fluctuate, the market price for our stock may be volatile.

Our operating results have fluctuated significantly in the past and may continue to fluctuate significantly in the future from quarter-to-quarter and year-to-year. These quarterly and annual fluctuations may result from a number of factors, including:

- the size of new contracts, rate of progress under our contracts and when we are able to recognize the related revenue;
- foreign exchange fluctuations;

Table of Contents

- budgeting cycles of our customers;
- changes in the terms and rates related to the renewal of support agreements;
- the mix of products and services sold;
- the timing of delivery of software and hardware by third parties;
- level and timing of operating expenses and capital investments;
- changes in our strategy; and
- general economic conditions.

As a result, quarter-to-quarter and year-to-year comparisons of operating results are not necessarily meaningful nor do they indicate what our future performance will be. Furthermore, we base our operating expenses and capital investment budgets on expected sales and revenue and many of our expenses, such as lease expenses, expenses associated with our debt and personnel costs, are relatively fixed in the short term. Variations in the rate and timing of conversion of our sales prospects into actual revenue could cause us to plan or budget inaccurately and we may be unable to adjust spending quickly enough to compensate for an unexpected shortfall in revenue. Any significant shortfall in anticipated levels of demand for our products and services could adversely affect our business, financial condition, results of operations and cash flows and the market price of our common stock.

The markets for our service activation and number management products are mature and the markets for our next generation loyalty and customer lifecycle management software and services are evolving. The industry in which we compete is subject to rapid technological change and if we do not adapt to rapid technological change, we could lose customers or market share.

Our industry is characterized by rapid technological change, evolving industry standards, changes in carrier requirements and preferences and frequent new service offerings. The introduction of products that incorporate new technologies and the emergence of new industry standards can make existing products obsolete and unmarketable. To compete successfully, we must continue to design, develop and sell new products and enhancements to existing products that provide higher levels of performance and reliability, take advantage of technological advancements and changes in industry standards and respond to new customer requirements. Developing new products and services is complex and time-consuming. It can require long development and testing periods. Significant delays in new releases or significant problems in creating new products or services could adversely affect our revenue.

If we are unable to properly supervise our software development staff in India, or if political or other uncertainties interfere, we may be unable to satisfactorily perform our customer contracts.

In 2004, we formed Evolving Systems India, a wholly owned subsidiary of Evolving Systems, Inc. and as a result of our 2015 acquisition of SSM, we acquired two additional Indian subsidiaries. We have experienced a high level of turnover with our Indian development staff as a result of strong competition for technology-based personnel in India. In addition, salary levels in India are steadily increasing, reducing the competitive advantages associated with offshore labor. If we are unable to effectively manage our India-based development staff and/or we continue to experience high levels of staff turnover, we may fail to provide quality software in a timely fashion. Furthermore, political changes and uncertainties in India could negatively impact the business climate there. As a result, we may be unable to satisfactorily perform our customer contracts and our business, financial condition and results of operations could be materially harmed.

Changes or challenges to the regulations of the communication industry could hurt the market for our products and services.

Our customers may require, or we may find it necessary or advisable, to modify our products or services to address actual or anticipated changes in regulations affecting our customers. This could increase our costs, delay adoption of our products and increase our sales cycle, which could materially harm our business, financial condition, results of operations, and cash flows. We are also subject to numerous regulatory requirements of foreign jurisdictions, which are often complex and changing. Any failure to comply with such regulations could, likewise, materially harm our business, financial condition, results of operations and cash flows.

Table of Contents

Consolidation in the communications industry may impact our financial performance.

The global communications industry has experienced and continues to experience significant consolidation. These consolidations have caused us to lose customers and may result in fewer potential customers. In addition, combining companies often re-evaluate their solutions and their capital expenditures, choosing to consolidate with one solution; there is no guarantee our solution will be selected in this process. As our customers become larger, they generally have longer sales cycles and stronger purchasing power, which can result in delays in securing contracts and pressure to reduce our prices. All of these factors can have a negative impact on our financial performance, particularly in any fiscal quarter.

Many of our products and services are sold on a fixed-price basis. If we incur budget overruns this may reduce our profitability.

A large portion of our revenue currently is, and historically has been, derived from fixed-price contracts and we expect this will continue. These contracts specify certain obligations and deliverables we must meet regardless of the actual costs we incur. Projects done on a fixed-price basis are subject to budget overruns. On occasion, we have experienced budget overruns, resulting in lower than anticipated margins. We may incur similar budget overruns in the future, including overruns that result in losses on these contracts. If we incur budget overruns, our margins may be harmed, thereby affecting our overall profitability.

Percentage-of-completion accounting used for most of our projects can result in overstated or understated profits or losses.

The revenue for our license fee/services and fixed-price services contracts is accounted for on the percentage-of-completion method of accounting. Under this method we recognize revenue and profits for each project based on the percentage of the project that is completed, which requires us to estimate the total cost to complete the project, project schedule and completion date, and probable change orders. Our failure to accurately estimate these often subjective factors could result in overstated or understated revenue, profits or losses.

The communications industry is highly competitive and if our products do not satisfy customer demand for performance or price, our customers could purchase products and services from our competitors.

Our primary markets are intensely competitive and we face continuous demand to release new products, new features and product enhancements, to improve product performance and to reduce prices. Our competitors include many large domestic and international companies who have substantially greater resources, larger installed customer bases and longer-standing relationships with customers. In addition, some companies who would not typically compete with us, such as network equipment manufacturers, offer next generation solutions that address some of the benefits provided by our DSA solution.

Our customers are not precluded from competing with us and also may offer competitive products or services. Many telecommunications companies have large internal development organizations, which develop software solutions and provide services similar to the products and

services we provide.

We believe that our ability to compete successfully depends on numerous factors, including the quality and price of our products and services compared to those of our competitors, the emergence of new industry standards and technical innovations and our ability to respond to those changes. Some of these factors are within our control, and others are not. A variety of potential actions by our competitors, including price reductions or increased marketing and promotion, accelerated introduction of new or enhanced products, or cooperative relationships among competitors and their strategic partners, could negatively impact the sale of our products. We may have to reduce the prices we charge for our products, resulting in lower revenue and operating margins. We may not be able to compete successfully or to properly identify and address the demands of new markets. This is particularly true in new markets where standards are not yet established. Our failure to adapt to emerging market demands, respond to regulatory and technological changes or compete successfully with existing and new competitors would materially harm our business, financial condition, results of operations and cash flows.

Our business depends largely on our ability to attract and retain talented employees.

Attracting and retaining talented employees is key to our success. The market for skilled workers in our industry is very competitive. We may not be able to retain personnel or to hire additional personnel on a timely basis, if at all. Because of the complexity of our software solutions, a significant time lag exists between the hiring date of technical and sales personnel and the time when they become fully productive. We have at times experienced high employee turnover and difficulty in recruiting and retaining technical personnel. Our failure to retain personnel or to hire qualified personnel on a timely basis could adversely affect our business by impacting our ability to develop new products, to complete our projects and secure new contracts.

Table of Contents

Our products are complex and may have errors that are not detected until deployment. Resolving warranty and product liability claims could be expensive and could negatively affect our reputation and profitability.

The provisions of our agreements with customers are designed to limit our exposure to potential liability for damages arising out of the use of, or defects in, our products. We cannot guarantee that these limitations will be effective. Although we carry errors and omissions insurance, to the extent that any successful product liability claim is not covered by our errors and omissions insurance or exceeds the coverage under our policy, we may be required to incur legal fees and pay for a claim. This could be expensive, particularly since our software products may be used in critical business applications. On occasion, we also engage subcontractors to provide deliverables under customer contracts; we could be required to indemnify customers for work performed by our subcontractors. We may be able to recover these damages from a subcontractor, but there is no guarantee that we will be able to do so. Defending against a product liability claim, regardless of its merits, could be expensive and require the time and attention of key management personnel, either of which could materially harm our business, financial condition and results of operations. In addition, our business reputation could be harmed by product liability claims, regardless of their merit or the eventual outcome of these claims.

Our measures to protect our intellectual property may not be adequate.

Our success and ability to compete are dependent to a significant degree on our proprietary technology. Protecting our global intellectual property rights is difficult. We rely on a combination of patent, copyright, trademark and trade secret laws, as well as confidentiality agreements and licensing arrangements, to establish and protect our proprietary rights. We have 16 patents in the U.S. on elements of our DSA and mobile broadband enablement products and patents pending in other countries on elements of our DSA and Intelligent M2M Controller (IMC) products. In addition, we have registered or filed for registration of certain of our trademarks. Our patent portfolio is relatively small and given the cost of obtaining additional patent protection, we may choose not to patent certain inventions that later become important. There is also the possibility that our means of protecting our proprietary rights may not be adequate; a third party may copy or otherwise obtain and use our products or technology without authorization or may develop similar technology independently or design around our patents. In addition, the laws of some foreign countries may not adequately protect our proprietary rights.

Source code, the detailed program commands for our software programs, is critical to our business. While we take steps to limit access to our source code and to protect it as a trade secret, we may not be able to protect our source code from copying if there is an unauthorized disclosure. Trade secret protection for that source code could be jeopardized, making it easier for third parties to develop competing products.

If our intellectual property protection proves inadequate, we may lose our competitive advantage and our future financial results may suffer.

Third parties may claim we are infringing their intellectual property rights, or that we have not complied with their license requirements and we may incur significant expenses in resolving these claims.

It is possible that our business activities may infringe upon the proprietary rights of others, or that other parties may assert infringement claims against us. Those claims may involve patent holding companies or other adverse patent owners who have no relevant product revenue of their own, and against whom our own patents may provide little or no deterrence. We could incur substantial costs in defending against any infringement claim and we could be required to develop non-infringing technology, obtain licenses, or cease selling the applications that contain

Edgar Filing: EVOLVING SYSTEMS INC - Form 10-K

the infringing intellectual property. Adverse publicity related to any intellectual property litigation also could harm the sale of our products and damage our competitive position.

Certain software we develop or use may include so called open source software made available under a license which may impose obligations on us in the event we distribute derivative works based on the open source software. Certain licenses impose obligations that could require us to make source code for a derivative work available to the public or license the derivative work under a particular type of open source software license, rather than the license terms we customarily use to protect our software.

There is little or no legal precedent for interpreting the terms of certain of these open source licenses, including the terms addressing the extent to which software incorporating open source software may be considered a derivative work subject to these licenses. We believe we have complied with our obligations under the various applicable open source licenses. However, if the owner of any open source software were to successfully establish that we had not complied with the terms of an open source license for a particular product that includes such open source software, we may be forced to release the source code for that derivative work to the public or cease distribution of that work.

Table of Contents

Cyber-attacks and security vulnerabilities could lead to reduced revenue, increased costs, liability claims, or harm to our competitive position.

Increased sophistication and activities of perpetrators of cyber-attacks have resulted in an increase in information security risks in recent years. Hackers develop and deploy viruses, worms, and other malicious software programs that attack products and services and gain access to networks and data centers. A substantial portion of our software development and customer support is provided from our India facility, which may be subject to increased risk of power loss, telecommunications failure, terrorist attacks and similar events. If we were to experience difficulties maintaining existing systems or implementing new systems, we could incur significant losses due to disruptions in our operations. Additionally, these systems contain valuable proprietary and confidential information and may contain personal data of our customers subscribers. A security breach could result in disruptions of our internal systems and business applications, impairment of our ability to provide services to our customers, product development delays, harm to our competitive position from the compromise of confidential business information, or subject us to liability under laws that protect personal data. Although we believe that we have robust information security procedures and other safeguards in place, many of our services do not have fully redundant systems or a formal disaster recovery plan, and we may not have adequate business interruption insurance to compensate us for losses that occur from a system outage. As cyber threats continue to evolve, we may be required to expend additional resources to continue to enhance our information security measures and/or to investigate and remediate any information security vulnerabilities. Any of these consequences would adversely affect our revenue and margins.

Disruptions from terrorist activities, geopolitical conditions or military actions may disrupt our business.

The continued threat of terrorism and acts of war may cause significant disruption to commerce throughout the world. Abrupt political changes and armed conflict pose a risk of economic disruption in affected countries, which may increase our operating costs and add uncertainty to the timing and budget for technology investment decisions by our customers. Our business and results of operations could be materially and adversely affected to the extent that such disruptions result in delays or cancellations of customer orders, delays in collecting cash, a general decrease in corporate spending on information technology, or our inability to effectively market, manufacture or ship our products. We are unable to predict whether war, political unrest and the threat of terrorism will result in any long-term commercial disruptions or if such activities will have any long-term material adverse effect on our business, results of operations, financial condition or cash flows.

Our international operations subject us to potential liability under anti-corruption laws and regulations.

Our international business operations are subject to the Foreign Corrupt Practices Act (FCPA), which generally prohibits U.S. companies and their intermediaries from paying or offering anything of value to foreign government officials for the purpose of obtaining or keeping business, or otherwise receiving discretionary favorable treatment of any kind. To the extent we do business through Evolving Systems UK, we are also subject to the U.K. Bribery Act of 2010. In addition, many countries in which we do business have their own anti-bribery rules and regulations. Under these regulations, we may be held liable for actions taken by our local partners and agents, even if such parties act without our knowledge. Any determination that we have violated the FCPA or the Bribery Act of 2010 (whether directly or through acts of others, intentionally or through inadvertence) or other anti-bribery legislation could result in sanctions that could have a material adverse effect on our business. While we have procedures and controls in place to monitor compliance, situations outside of our control may arise that could put us in violation of anti-bribery legislation inadvertently and thus negatively impact our business.

As a result of operating as a smaller public company, our management is required to devote a substantial amount of time to comply with regulatory matters; our relatively small staff can make compliance challenging.

Because our common stock is publicly traded, we are subject to certain rules and regulations of federal, state and financial market exchange entities charged with the protection of investors and the oversight of companies whose securities are publicly traded. These entities, including the Public Company Accounting Oversight Board, the SEC and NASDAQ, have issued requirements and regulations and continue to adopt additional regulations and requirements in response to laws enacted by Congress. Establishment of effective internal controls is further complicated because we are a relatively small company with global operations, and multiple locations and IT systems. Our management and other personnel have, and will continue to devote a substantial amount of time to these compliance initiatives.

Changes in, or interpretations of, accounting principles or tax rules and regulations, could adversely affect our results of operations.

We prepare our consolidated financial statements in conformity with U.S. generally accepted accounting principles (GAAP). It is possible that future requirements could change our current application of U.S. GAAP, resulting in a material adverse impact on our financial positions or results of operations. In addition, our future effective tax rates could be unfavorably affected by

Table of Contents

changes in tax laws or the interpretation of tax laws or by changes in the valuation of our deferred tax assets and liabilities. We regularly assess our implementation of applicable accounting principles and the adequacy of our provision for income taxes, but we are a relatively small company and our business is complex; the final determination of any tax authority, upon examination of our income tax returns, could have an adverse effect on our operating results and financial position.

On December 22, 2017, the Tax Cuts and Jobs Act (the "Tax Act") was enacted in the United States. The Tax Act includes a number of changes to existing U.S. tax laws that impact the Company. The income tax effects of the Tax Act in its 2017 recognized in the Company's financial statements are provisional in accordance with Staff Accounting Bulletin No. 118, which provides SEC staff guidance for the application of ASC Topic 740, Income Taxes, in the reporting period in which the Tax Act was signed into law. As such, the Company's financial results reflect the income tax effects of the Tax Act for which accounting under ASC Topic 740 is incomplete but a reasonable estimate could be determined.

Sales of large blocks of our stock may result in the reduction in the market price of our stock and make it more difficult to raise funds in the future.

If our stockholders sell substantial amounts of our common stock in the public market, the market price of our common stock could fall. The perception among investors that such sales will occur could also produce this effect. We currently have several stockholders who own large percentages of our stock. To the extent we continue to have one or more stockholders who own a large percentage of our stock and those stockholders chose to liquidate their holdings, it may have a dramatic impact on the market price of our stock. These factors also could make it more difficult to raise funds through future offerings of common stock.

Certain provisions of our charter documents, employment arrangements and Delaware law may discourage, delay or prevent an acquisition of us, even if an acquisition would be beneficial to our stockholders, and may prevent attempts by our stockholders to replace or remove our current management.

Provisions of our amended and restated certificate of incorporation and bylaws, as well as provisions of Delaware law, could make it difficult for a third party to acquire us, even if doing so would benefit our stockholders. In addition, these provisions, which make it more difficult for stockholders to replace members of our board of directors, may frustrate or prevent attempts by our stockholders to replace or remove our current management because our board of directors is responsible for appointing the members of our management team. These provisions include the following:

- our stockholders cannot take action by written consent;
- we have advance notice requirements for nominations for election to the Board of Directors or for proposing matters that can be acted upon at stockholder meetings;
- our stockholders can only remove directors without cause by supermajority vote; and

- our stockholders can only amend our bylaws or certain Board of Directors-related provisions of our amended and restated certificate of incorporation by a supermajority vote.

In addition, we are subject to the anti-takeover provisions of Section 203 of Delaware General Corporation Law, which prohibit us from engaging in a business combination with an interested stockholder for a period of three years after the date of the transaction in which the person became an interested stockholder, unless the business combination is approved in the prescribed manner. The application of Section 203 and certain provisions of our restated certificate of incorporation may have the effect of delaying or preventing changes in control of our management, which could adversely affect the market price of our common stock by discouraging or preventing takeover attempts that might result in the payment of a premium price to our stockholders.

Our named executive officers have entered into agreements with us that contain a change in control provision. These agreements generally provide for acceleration on vesting of stock awards. The acceleration of vesting of stock awards upon a change in control may be viewed as an anti-takeover measure and may have the effect of discouraging a merger proposal, tender offer or other attempt to gain control of us.

Our Stock Incentive Plans provide for acceleration of vesting of stock awards under certain changes in control. As noted above, the acceleration on vesting of stock awards upon a change in control may be viewed as an anti-takeover measure.

All of the above factors could adversely affect the market price of our common stock by discouraging or preventing takeover attempts that might result in the payment of a premium price to our stockholders.

Table of Contents***We suspended our dividends in 2016 and we may not pay dividends in the future.***

In June 2016, our Board of Directors suspended our quarterly dividends. Any decision to pay dividends in the future and the amount of any dividend we may declare will depend on general business conditions, the impact of such payment on our financial condition and other factors our Board of Directors may consider to be relevant. In addition, our Loans limit our ability to pay dividends by establishing a maximum amount that can be paid per quarter and prohibiting payment of dividends when an event of default has occurred. If we elect to pay future dividends, this could reduce our cash reserves to levels that may be inadequate to fund expansions to our business plan or unanticipated contingent liabilities.

Our stock price could become more volatile and your investment could lose value.

All of the factors discussed in this section, as well as general economic and market conditions, could affect our stock price. A significant drop in our stock price could also expose us to the risk of securities class actions lawsuits, which could result in substantial costs and divert management's attention and resources, which could adversely affect our business.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

We lease office space at various locations which are shown below.

Location	Square Footage	Lease Expiration
Englewood, Colorado (Headquarters)	400	month-to-month
New York, New York	212	5/31/18
Durham, North Carolina	2,860	7/31/18
London, England	376	10/31/18
Bangalore, India	12,300	8/18/18
Kolkata, India	5,638	7/31/26
Kolkata, India	2,708	11/14/18
Kuala Lumpur, Malaysia	1,042	7/14/18
Grenoble, France	3,767	03/21/21
Cluj-Napoca, Romania	7,793	1/3/19
Madrid, Spain	215	month-to-month

We believe that our facilities are adequate for our current and near-term needs, and that we will be able to locate additional facilities as needed.

ITEM 3. LEGAL PROCEEDINGS

We are involved in various legal matters arising in the normal course of business. Losses, including estimated costs to defend, are recorded for these matters to the extent they were probable of loss and the amount of loss could be reasonably estimated. We do not believe that any such matters, either individually or in the aggregate, will have a material impact on our results of operations and financial position.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

Table of Contents**PART II****ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES**

Our common stock is traded on the Nasdaq Capital Market under the symbol EVOL. The following table sets forth the high and low sale prices of our common stock for the periods indicated.

	For the Years Ended December 31,			
	2017		2016	
	High	Low	High	Low
First Quarter	\$ 5.07	\$ 4.05	\$ 5.92	\$ 4.99
Second Quarter	\$ 5.70	\$ 4.45	\$ 5.82	\$ 5.02
Third Quarter	\$ 5.35	\$ 4.50	\$ 5.53	\$ 3.99
Fourth Quarter	\$ 4.90	\$ 4.00	\$ 4.45	\$ 3.85

As of March 27, 2018, there were approximately 70 holders of record of our common stock.

Dividends

Our Board of Directors declared a cash dividend of \$0.11 per share in the first and second quarters of 2016. In 2015, our Board of Directors declared a cash dividend of \$0.11 per share during each of the four quarters of 2015. In June 2016, our Board of Directors suspended our quarterly dividends and there can be no guarantee that we will resume paying dividends. Any decision to declare dividends in the future and the amount of any dividend we may declare will depend on general business conditions, the impact of such payment on our financial condition and other factors our Board of Directors may consider to be relevant. In addition, our Loans limit our ability to pay dividends by establishing a maximum amount that can be paid per quarter and prohibiting payment of dividends when an event of default has occurred. Payment of future dividends can also affect our business as this could reduce our cash reserves to levels that may be inadequate to fund expansions to our business plan or unanticipated contingent liabilities.

Stock Performance Graph

The graph below matches the cumulative 5-Year total return of holders of Evolving Systems, Inc.'s common stock with the cumulative total returns of the NASDAQ Composite index, the RDG Software Composite index and the DJ US MicroCap Total Stock Market Software Index. The graph assumes that the value of the investment in our common stock, and in each index (including reinvestment of dividends) was \$100 on December 31, 2012 and tracks it through December 31, 2017.

(1) In connection with our acquisition of SSM in September 2015, we increased our revolving credit facility with East West Bank from \$5.0 million to \$10.0 million (the Revolving Facility) and we used the full amount of the Revolving Facility to fund the acquisition. On February 29, 2016, we retired the Revolving Facility and we entered into a term loan agreement with East West Bank (Term Loan) for \$6.0 million. The Term Loan bears interest at a floating rate equal to the U.S. Prime Rate plus 1.0%, and is secured by substantially all of the Company's assets, including a pledge, subject to certain limitations with respect to stock of foreign subsidiaries, of the stock of the existing and future direct subsidiaries of the Company. Interest accrues and is payable monthly. We are required to repay the Term Loan in 36 equal monthly installments, commencing on January 1, 2017. We must maintain a minimum current ratio, a specified ratio of Total Liabilities to EBITDA and a minimum fixed charge coverage ratio, as defined in the Term Loan. We were required to use the \$6 million Term Loan proceeds, plus \$4.0 million from our cash reserves, to pay off the Revolving Facility. The Term Loan matures on January 1, 2020.

In connection with our acquisition of the Lumata Entities completed on September 4, 2017, we entered into a Term Loan Facility Agreement with East West Bank as lender in the amount of \$4,730,000 (the Lumata Facility) and we used the full amount of the Lumata Loan Facility to fund the acquisition. The Lumata Facility requires the Company to make monthly principal payments of approximately \$131,400 commencing 31 July 2018 and interest at the greater of (a) 3.5% or (b) the variable rate of interest that appears in the Wall Street Journal on a monthly

Edgar Filing: EVOLVING SYSTEMS INC - Form 10-K

measurement date, plus in either case 1.5%. We must maintain a minimum current ratio, a specified ratio of Total Liabilities to EBITDA and a minimum fixed charge coverage ratio, as defined in the Term Loan. The Lumata Facility is secured by substantially all of the assets of the Company. The unpaid balance of the Lumata Facility is due on August 16, 2021.

(2) On June 30, 2016, our Board of Directors suspended the payment of quarterly dividends. Prior to suspending the dividend, our Board of Directors declared a first quarter cash dividend of \$0.11 per share on March 15, 2016, which was paid April 1, 2016, to stockholders of record March 28, 2016 and a second quarter cash dividend of \$0.11 per share, on May 3, 2016, which was paid on July 1, 2016, to stockholders of record June 3, 2016.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

FORWARD-LOOKING STATEMENTS

This Management's Discussion and Analysis of Financial Condition and Results of Operations contains forward-looking statements that have been made pursuant to the provisions of the Private Securities Litigation Reform Act of 1995. These forward-

Table of Contents

looking statements are based on current expectations, estimates, and projections about Evolving Systems' industry, management's beliefs, and certain assumptions made by management. Forward-looking statements include our expectations regarding product, services, and customer support revenue; our expectations associated with Evolving Systems India, Evolving Systems U.K., Evolving Systems NC Evolving Systems BLS LTD, Lumata UK LTD, Lumata France SAS, Lumata Deutschland GmbH, and Lumata Spain SL and short- and long-term cash needs. In some cases, words such as anticipates, expects, intends, plans, believes, estimates, variations of these words, and similar expressions are intended to identify forward-looking statements. The following discussion should be read in conjunction with, and is qualified in its entirety by, the consolidated financial statements and the notes thereto included elsewhere in this Annual Report on Form 10-K. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including those set forth in this section and in Item 1A - Risk Factors.

OVERVIEW

Evolving Systems, Inc. is a provider of real-time digital engagement solutions and services to the wireless, wireline and cable markets. We maintain long-standing relationships with many of the largest wireline, wireless and cable companies worldwide. The Company's portfolio includes market-leading solutions and services for real-time analytics, customer acquisition and activation, customer value management and loyalty for the telecom industry promoting partnerships into retail and financial services

We recognize revenue in accordance with the prescribed accounting standards for software revenue recognition under generally accepted accounting principles. As a result, our license fees and services revenue fluctuate from period to period as a result of the timing of revenue recognition on existing projects.

RECENT DEVELOPMENTS

We reported net income of \$2.5 million, \$3.4 million and \$3.3 million for the years ended December 31, 2017, 2016 and 2015, respectively.

On July 6, 2017 we announced the completion of the previously announced acquisition of Business Logic Systems (BLS). BLS, headquartered in Newbury, UK, specializes in data-driven customer value management and customer engagement solutions that have been implemented in over 20 mobile operators in Europe, Africa, Asia-Pacific and the Caribbean. BLS solutions turn customer data into actionable insights and personalized contextual offers. Customer engagement occurs through in-bound and out-bound offers and is further extended through a suite of loyalty and retention solutions.

On September 7, 2017 we announced the completion of the acquisition of four business operating units of Lumata Holdings Ltd. (the Lumata Entities). The Lumata Entities are a leading global provider of real-time, next generation loyalty and customer lifecycle management software and services that helps businesses gain value from their customer data for relevant and contextual insights and actions of value to both customers

Edgar Filing: EVOLVING SYSTEMS INC - Form 10-K

and enterprises. Its customers include mobile operators including Orange, Telefonica and other Tier-1 and emerging operators in Europe and around the world. The acquisition is expected to be accretive to our operations once the integration of the business is completed during 2018.

On September 30, 2015 we acquired privately held SSM, now known as Evolving Systems NC, Inc., a provider of real time analytics and marketing solutions to wireless carriers, for an initial payment of approximately \$9.75 million and a \$0.5 million working capital adjustment. We also agreed to make a payment on the one-year anniversary of the transaction of \$250,000, with such payment being available to secure SSM's representations and warranties in the agreement. The final payment has not been made as of the date this Form 10-K was filed due to pending resolution of outstanding claims.

We have operations in foreign countries where the local currency is used to prepare the consolidated financial statements which are translated into our reporting currency, U.S. dollars. Changes in the exchange rates between these currencies and our reporting currency are partially responsible for some of the changes from period to period in our financial statement amounts. The majority of the changes in 2017 and 2016 are a result of the U.S. dollar strengthening on average versus the British Pound Sterling. The chart below summarizes what the effects on our revenue and expenses would be on a constant currency basis. The constant currency basis assumes that the exchange rate was constant for the periods presented (in thousands).

	For the Years ended December 31,			
	2017 vs. 2016		2016 vs. 2015	
Revenue	\$	(203)	\$	(753)
Costs of revenue and operating expenses		44		(1,318)
Operating gain (loss)	\$	(247)	\$	565

The net effect of our foreign currency translations for the year ended December 31, 2017 was a \$0.2 million decrease in revenue and a slight increase in operating expenses versus the year ended December 31, 2016 due to a stronger U.S. dollar on average

Edgar Filing: EVOLVING SYSTEMS INC - Form 10-K

Table of Contents

during the year 2016. The net effect of our foreign currency translations for the year ended December 31, 2016 was a \$0.8 million decrease in revenue and a \$1.3 million decrease in operating expenses versus the year ended December 31, 2016 due to a stronger U.S. dollar on average during the year 2015.

RESULTS OF OPERATIONS

The following table presents our consolidated statements of operations in comparative format.

	For the Years Ended December 31,			For the Years Ended December 31,		
	2017	2016	Change	2016	2015	Change
REVENUE

Table of Contents

Revenue

Revenue is comprised of license fees and services. License fees represent the fees we receive from the licensing of our software products. Services revenue are services directly related to the delivery of the licensed product as well as integration services, managed services, SaaS services, time and materials work and customer support services. Customer support services includes annual support fees, recurring maintenance fees, minor product upgrades and warranty fees. Warranty fees are typically bundled with a license sale and the related revenue, based on Vendor Specific Objective Evidence (VSOE)and is deferred and recognized ratably over the warranty period.

License Fees

License fees revenue increased 20%, or \$0.5 million to \$3.4 million for the year ended December 31, 2017 compared to \$2.9 million for the year ended December 31, 2016. The increase is related to \$1.2 million from the acquired companies offset by a decrease in organic license fee revenue primarily due to lower First User Activations (FUA's).

License fees revenue decreased 9%, or \$0.3 million to \$2.9 million for the year ended December 31, 2016 compared to \$3.2 million for the year ended December 31, 2015. The decrease in license fee revenue is primarily related to lower First User Activations (FUA's) offset by an increase of initial license sales.

Services

Services revenue increased 16%, or \$3.5 million, to \$25.4 million for the year ended December 31, 2017 from \$21.9 million for the year ended December 31, 2016. The increase is related to \$4.8 million in service revenue from the acquired companies offset by a decline in our customer support and managed services revenues.

Services revenue decreased 2%, or \$0.5 million, to \$21.9 million for the year ended December 31, 2016 from \$22.4 million for the year ended December 31, 2015. The decrease in services revenue is due to a decline in fixed-price services from customization required of our software products offset by an increase of our customer support and managed services revenue due to Evolving Systems NC, which was acquired on September 30, 2015.

Costs of Revenue, excluding depreciation and amortization

Costs of revenue consist primarily of personnel costs, facilities costs, the costs of third-party software and all other direct costs associated with these personnel. Costs of revenue, excluding depreciation and amortization were \$8.7 million, \$5.3 million and \$6.4 million for the years ended December 31, 2017, 2016 and 2015, respectively.

Costs of revenue increased 64%, or \$3.4 million, to \$8.7 million for the year ended December 31, 2017 from \$5.3 million for the year ended December 31, 2016. The increase in costs of revenue is primarily attributable to the cost of revenue from the acquisitions of EVOL BLS and the Lumata Entities increasing the number of hours performed on customer projects. As a percentage of revenue, costs of revenue,

Table of Contents

excluding depreciation and amortization, increased to 30% for the year ended December 31, 2017 from 21% for the year ended December 31, 2016 related to the aforementioned increase from the acquired entities.

Costs of revenue decreased 18%, or \$1.1 million, to \$5.3 million for the year ended December 31, 2016 from \$6.4 million for the year ended December 31, 2015. The decrease in costs was primarily the result of lower embedded software expense, reduced headcount, and travel, due to lower revenue during the period partially offset by increased expenses related to the operations of Evolving Systems NC. As a percentage of revenue, costs of revenue, excluding depreciation and amortization, decreased to 21% for the year ended December 31, 2016 from 25% for the year ended December 31, 2015. The decrease in costs as a percentage of revenue is primarily related to the aforementioned reduction in costs of revenue which exceeded the decrease in revenue during the period.

Sales and Marketing

Sales and marketing expenses primarily consist of compensation costs, including incentive compensation and commissions, other employee related costs, travel expenses, advertising and occupancy expenses. Sales and marketing expenses increased 5%, or \$0.2 million, to \$5.2 million for the year ended December 31, 2017 from \$5.0 million for the year ended December 31, 2016. The increase in costs is primarily attributable to the sales and marketing expenses from the acquisitions offset partially by a reduction in employees. As a percentage of total revenue, sales and marketing expenses for the year ended December 31, 2017 decreased to 18% from 20% for the year ended December 31, 2016. The decrease in sales and marketing expenses as a percentage of revenue is primarily due to the acquired companies have a lower percentage of cost compared to the increase in revenue from the acquired companies and a reduction in employees.

Sales and marketing expenses decreased 15%, or \$0.9 million, to \$5.0 million for the year ended December 31, 2016 from \$5.8 million for the year ended December 31, 2015. The decrease in costs is primarily related to partner fees, reduced employees and lower travel expenses offset by increased sales operations expenses related to Evolving Systems NC. As a percentage of total revenue, sales and marketing expenses for the year ended December 31, 2016 decreased to 20% from 23% for the year ended December 31, 2015. The decrease as a percentage of revenue is due to the aforementioned reduction in expenses.

General and Administrative

General and administrative expenses consist principally of employee related costs, professional fees and occupancy costs for the following departments: facilities, finance, legal, human resources and executive management. General and administrative expenses increased 57%, or \$2.2 million, to \$6.1 million for the year ended December 31, 2017 from \$3.9 million for the year ended December 31, 2016. The increase for the year ended December 31, 2017 was due primarily to higher professional fees and additional general and administrative costs relating to the acquisitions of \$0.4 million, the write-off of uncollectable accounts of \$0.9 million, and costs related to the acquired companies. As a percentage of total revenue, general and administrative expenses increased to 21% for the year ended December 31, 2017 from 16% for the year ended December 31, 2016. The increase in expenses as a percentage of revenue is related to the aforementioned increase of expenses.

General and administrative expenses decreased 4%, or \$0.1 million, to \$3.9 million for the year ended December 31, 2016 from \$4.0 million for the year ended December 31, 2015. The decrease for the period was primarily due to a decline of professional fees related to merger and acquisition activities and lower travel expense, offset by increased general and administrative expenses related to Evolving Systems NC and an

allowance placed on uncollectible accounts receivables. As a percentage of total revenue, general and administrative expenses remained at 16% for the years ended December 31, 2016 and 2015.

Product Development

Product development expenses consist primarily of employee-related costs for product development. Product development expenses decreased 32%, or \$1.0 million, to \$2.0 million for the year ended December 31, 2017 from \$3.0 million for the year ended December 31, 2016. The decrease in product development expenses was due to hours worked on projects related to managed services which are charged to cost of revenue offset by the product and development expenses from the acquisitions of EVOL BLS and the Lumata Entities. As a percentage of total revenue, product development expenses decreased to 7% for the year ended December 31, 2017 from 12% for the year ended December 31, 2016. The decrease as a percentage of revenue is primarily due to the aforementioned decrease of expenses during the period.

Product development expenses decreased 22%, or \$0.8 million, to \$3.0 million for the year ended December 31, 2016 from \$3.8 million for the year ended December 31, 2015. The decrease in costs was related to reduced headcount partially offset by expenses from Evolving Systems NC product development department. As a percentage of total revenue, product development

Table of Contents

expenses decreased to 12% for the year ended December 31, 2016 from 15% for the year ended December 31, 2015. The decrease in expenses as a percentage of revenue is related to the aforementioned decrease of expenses during the period.

Depreciation

Depreciation expense consists of depreciation of long-lived property and equipment. Depreciation expenses decreased 3% to \$0.2 million for the year ended December 31, 2017 from \$0.2 million for the year ended December 31, 2016. The decrease of expense was due to lower capital purchases in the current period and older assets becoming fully depreciated. As a percentage of revenue, depreciation expense remained at 1% for the years ended December 31, 2017 and 2016.

Depreciation expenses decreased 18%, or \$0.1 million, to \$0.2 million for the year ended December 31, 2016 from \$0.3 million for the year ended December 31, 2015. The decrease of expense was due to lower capital purchases in the current period and older assets becoming fully depreciated. As a percentage of revenue, depreciation expense remained at 1% for the years ended December 31, 2016 and 2015.

Amortization

Amortization expense consists of amortization of identifiable intangibles related to our acquisitions of Evolving Systems Labs, Evolving Systems NC, EVOL BLS, and the Lumata Entities. Amortization expense increased 10%, or \$0.1 million to \$0.9 million for the year ended December 31, 2017 from \$0.8 million for the year ended December 31, 2016. The increase in amortization expense was due to the amortization expense of the intangible assets relating to the acquisition of EVOL BLS on July 3, 2017 and the Lumata Entities on September 4, 2017. As a percentage of revenue, amortization expense remained 3% for the year ended December 31, 2017 and 2016.

Amortization expense increased 194%, or \$0.5 million to \$0.8 million for the year ended December 31, 2016 from \$0.3 million for the year ended December 31, 2015. The increase in amortization expense was due to the amortization expense of the intangible assets relating to the acquisition of Evolving Systems NC on September 30, 2015. As a percentage of revenue, amortization expense increased to 3% for the year ended December 31, 2016 from 1% for the year ended December 31, 2015. The increase of amortization expense as a percentage of total revenue is due to the aforementioned increase of expense.

Restructuring

Restructuring expense includes the costs associated with a reduction in workforce due to the consolidation of duplicative functions and alignment of staff with ongoing business activity as a result of the acquisition of EVOL BLS and the Lumata Entities in third quarter of 2017. Restructuring decreased 72%, or \$0.7 million, to \$0.3 million for the year ended December 31, 2017 from \$1.0 million for the year ended December 31, 2016. As a percentage of revenue, restructuring expense decreased to 1% for the year ended December 31, 2017 from 4% for the year ended December 31, 2016. The decrease of restructuring expense as a percentage of total revenue is related to the lower activity in the current year.

Restructuring increased 90%, or \$0.5 million, to \$1.0 million for the year ended December 31, 2016 from \$0.5 million for the year ended December 31, 2015. Restructuring expense for the years ended December 31, 2016 and 2015 related to the acquisition of Evolving Systems NC. As a percentage of revenue, restructuring expense increased to 4% for the year ended December 31, 2016 from 2% for the year ended December 31, 2015. The increase of restructuring expense as a percentage of total revenue is due to the aforementioned increase of expense and lower revenue.

Interest Income

Interest income includes interest income earned on cash, cash equivalents and long-term investments. Interest income decreased 83%, or \$5,000, to \$1,000 for the year ended December 31, 2017 from \$6,000 for the year ended December 31, 2016.

Interest income decreased 67%, or \$12,000, to \$6,000 for the year ended December 31, 2016 from \$18,000 for the year ended December 31, 2015.

Interest Expense

Interest expense includes interest expense on our term loan, revolving line of credit and amortization of debt issuance costs. Interest expense for the year ended December 31, 2017 increased 7% to \$0.4 million as compared to \$0.3 million for the year ended December 31, 2016. This increase in interest expense primarily due to the loan and security agreement with East West Bank which provided for a Term Loan of \$4.7 million to purchase the Lumata entities offset by the amended security agreement with East West Bank which provided for a Term Loan of \$6.0 million. The amendment agreement required us to use the term loan's proceeds and \$4.0 million from our cash balances to pay off and terminate the Revolving Facilities totaling \$10.0 million. The result of the \$4.0

Table of Contents

million payment in February 2016 from our cash reserves and reducing the \$10 million revolving facility to \$6.0 million lowered the interest expense in the current period. Refer to Note 5, Long-Term Debt, of our Consolidated Financial Statements included elsewhere in this Annual Report on Form 10-K for more information regarding the Term Loan.

Interest expense for the year ended December 31, 2016 increased 181%, or \$0.2 million, to \$0.3 million as compared to \$0.1 million for the year ended December 31, 2015. This increase in interest expense was due to a larger principal balance from our term loan and revolving line of credit related to the acquisition of Evolving Systems NC.

Loss on Foreign Exchange Transactions

Loss on foreign exchange transactions consists of realized and unrealized foreign currency transaction gains and losses. Foreign currency transaction gains and losses result from transactions denominated in a currency other than the functional currency of the respective subsidiary. The foreign currency transaction loss increased 106%, or \$0.5 million, to \$1.1 million for the year ended December 31, 2017 compared to a \$0.6 million loss for the year ended December 31, 2016. The losses were generated primarily through the re-measurement of certain non-functional currency denominated financial assets and liabilities of our Evolving Systems U.K., EVOL BLS, the Lumata Entities and India subsidiaries.

The foreign currency transaction loss increased 9,100%, or \$0.6 million, to \$0.6 million for the year ended December 31, 2016 compared to a \$6,000 loss for the year ended December 31, 2015. The net loss was generated through the re-measurement of certain non-functional currency denominated financial assets and liabilities of our Evolving Systems U.K. and India subsidiaries of which the loss was primarily related to Evolving Systems U.K. contract receivables.

Income Tax Expense

We recorded income tax expense of \$1.4 million, \$1.5 million and \$0.9 million for the years ended December 31, 2017, 2016 and 2015, respectively. The net expense during year ended December 31, 2017 consisted of current income tax expense of \$1.7 million, a prior year tax assessment of \$0.3 million and a net deferred tax benefit of (\$0.6) million. The current tax expense consists primarily of income tax from our U.K., France, and India based operations. The deferred tax benefit was primarily a reduction of deferred tax liabilities related to the reduction in the valuation allowance on AMT credit carryforwards, the repatriation of undistributed foreign earnings, and remeasurement of the deferred tax liabilities as December 31, 2017 based on the rate they are expected to reverse in the future. Refer to Note 6, Income Taxes, of our Consolidated Financial Statements included elsewhere in this Annual Report on Form 10-K for more information regarding the foreign tax credit.

The net expense during year ended December 31, 2016 consisted of current income tax expense of \$1.5 million and a net deferred tax benefit of (\$24,000). The current tax expense consists primarily of income tax from our U.K. and India based operations. The deferred tax benefit was related primarily to the reduction of deferred tax liabilities related to intangible assets incurred due to the acquisition of Evolving Systems NC.

Edgar Filing: EVOLVING SYSTEMS INC - Form 10-K

The net expense during year ended December 31, 2015 consisted of current income tax expense of \$2.0 million and a net deferred tax benefit of (\$1.1) million. The current tax expense consists primarily of income tax from our U.S., U.K. and India based operations and unrecoverable foreign withholding tax in the U.K. U.S. income taxes payable of \$0.8 million were offset due to realization of Net Operating Losses (NOL) comprised of windfall tax benefits related to stock-based compensation. Our effective tax rates for the years ended December 31, 2017, 2016 and 2015 were 36%, 30% and 22%, respectively. The effective tax rate increased in 2017 compared to 2016 was due primarily to a prior year tax assessment of \$0.3 million to an Indian subsidiary offset by \$0.1 million related to the remeasurement of the Company's deferred tax assets as of December 31, 2017. The effective tax rate increased during 2016 was due to foreign tax credits utilized in 2015.

We use a recognition threshold and a measurement attribute for the financial statement recognition and measurement of tax positions taken or expected to be taken in a tax return. For those benefits to be recognized, a tax position must be more-likely-than-not to be sustained upon examination by taxing authorities. As of December 31, 2017 and 2016, we had no liability for unrecognized tax benefits. We do not believe there will be any material changes to our unrecognized tax positions over the next twelve months.

FINANCIAL CONDITION

Our working capital position of \$9.3 million at December 31, 2017 reflects an increase of \$1.3 million from our working capital position of \$8.0 million at December 31, 2016. The increase in working capital is related to increases in contract receivables, unbilled work-in-progress and prepaid and other current assets primarily as a result of the acquisitions of EVOL BLS and the Lumata Entities.

Table of Contents

LIQUIDITY AND CAPITAL RESOURCES

We have historically financed operations through cash flows from operations as well as debt and equity transactions. At December 31, 2017, our principal sources of liquidity were \$7.6 million in cash and cash equivalents and \$10.2 million in contract receivables, net of allowances. During 2017, in connection with the Acquisition, EVOL Holdings entered into a Term Loan Facility Agreement, a Debenture and a Subordination Deed with East West Bank as lender in the amount of \$4.7 million. We used the full amount of the Lumata Facility to fund the acquisition. The Lumata Facility requires the Company to make monthly principal payments of approximately \$131,400 commencing July 31, 2018 and interest at the greater of (a) 3.5% or (b) the variable rate of interest that appears in the Wall Street Journal on a monthly measurement date, plus in either case 1.5%. The Lumata Facility is secured by substantially all of the assets of the Company. The unpaid balance of the Lumata Facility is due on August 16, 2021.

On February 29, 2016, we retired the Revolving Facility and we entered into a term loan agreement with East West Bank (Term Loan) for \$6.0 million. The Term Loan bears interest at a floating rate equal to the U.S. Prime Rate plus 1.0% and is secured by substantially all of the Company's assets, including a pledge, subject to certain limitations with respect to stock of foreign subsidiaries, of the stock of the existing and future direct subsidiaries of the Company. Interest accrues and is payable monthly. We are required to repay the Term Loan in 36 equal monthly installments, commencing on January 1, 2017. We were required to use the \$6 million Term Loan proceeds, plus \$4.0 million from our cash reserves, to pay off the Revolving Facility. The Term Loan matures on January 1, 2020.

Both the Lumata Facility and the Term Loan (collectively, Loans) include negative covenants that place restrictions on the Company's ability to, among other things: incur additional indebtedness; create liens or other encumbrances on assets; make loans, enter into letters of credit, guarantees, investments and acquisitions; sell or otherwise dispose of assets; cause or permit a change of control; merge or consolidate with another entity; make negative pledges; enter into affiliate transactions; limits the amount of cash distributions to our shareholders; and change the nature of our business materially. We must also maintain a minimum current ratio, a specified ratio of Total Liabilities to EBITDA and a minimum fixed charge coverage ratio, as defined in the Term Loan. As of the Balance Sheet date of December 31, 2017, we are in compliance with our covenants.

Net cash provided by operating activities for the year ended December 31, 2017, 2016 and 2015 was \$3.5 million, \$6.9 million and \$2.2 million, respectively. The decrease in cash provided by operating activities for the year ended December 31, 2017 was primarily due to increase in contract receivables related to the acquisitions and additional expenses related to the acquisitions as well as a decrease in accounts payable and current liabilities.

The increase in cash provided by operating activities for the year ended December 31, 2016 was primarily due to higher collections of contract receivables and decreased unbilled work-in-progress as-well-as increases in accounts payable and accrued liabilities and unearned revenue.

Net cash used in investing activities was \$6.0 million, \$0.1 million and \$9.2 million for the years ended December 31, 2017, 2016 and 2015, respectively. Cash used in investing activities for the year ended December 31, 2017 was for the acquisition of EVOL BLS and the Lumata Entities as well as the purchase of property and equipment. Refer to Note 2, Acquisition, of our Consolidated Financial Statements included elsewhere in this Annual Report on Form 10-K for more information regarding the acquisitions. During 2017, 2016 and 2015, we purchased \$0.1 million, \$0.1 million and \$0.2 million in property and equipment to

support operations, respectively. Historically, capital expenditures have been financed by cash from operating activities.

Cash used in investing activities for the year ended December 31, 2016 was related to the purchase of property and equipment. Cash used in investing activities for the year ended December 31, 2015 was related to the acquisition of Evolving Systems NC and purchase of property and equipment.

Net cash provided by (used in) financing activities was \$2.7 million, (\$6.6) million and \$5.9 million for the years ended December 31, 2017, 2016 and 2015, respectively. The cash provided was primarily related to the proceeds from the Lumata Facility entered into August 2017 to acquire the Lumata Entities offset by the principal payments on our term loan and the payment for second year debt issuance costs.

The net cash used in financing activities as of December 31, 2016 is due to proceeds from the term loan of \$6.0 million, which was used along with \$4.0 million of cash-on-hand to pay off the revolving line of credit of \$10.0 million and \$2.6 million paid for dividends. The net cash provided by financing activities as of December 31, 2015 is due to proceeds from the revolving line of credit of \$10.0 million for the initial payment of the acquisition of Evolving Systems NC, \$0.8 million in windfall tax benefits from stock-based compensation and \$0.3 million in proceeds from the exercise of stock options offset by payments of \$5.1 million for dividends.

Table of Contents

We believe that our current cash and cash equivalents, together with anticipated cash flow from operations will be sufficient to meet our working capital, debt extinguishment and capital expenditure requirements for at least the next twelve months as of the date this Form 10-K was filed. In making this assessment, we considered the following:

- Our cash and cash equivalents balance at December 31, 2017 of \$7.6 million;
- Our working capital balance of \$9.3 million;
- Our ability to historically generate positive operating cash flows; and
- Our planned capital expenditures of less than \$1.0 million during 2018.

We are exposed to foreign currency rate risks which impact the carrying amount of our foreign subsidiaries and our consolidated equity, as well as our consolidated cash position due to translation adjustments. For the years ended December 31, 2017, 2016 and 2015, the effect of exchange rate changes resulted in a (\$0.2) million decrease, (\$1.1) million decrease and a (\$0.3) million decrease to consolidated cash, respectively. We do not currently hedge our foreign currency exposure, but we closely monitor the rate changes and may hedge our exposures in the future.

Off-Balance Sheet Arrangements

We have no off-balance sheet arrangements that have a material current effect, or that are reasonably likely to have a material future effect, on our financial condition, changes in financial condition, revenue or expenses, results of operations, liquidity, capital expenditures, or capital resources.

Contractual Obligations and Commercial Commitments

The following summarizes our significant contractual obligations as of December 31, 2017, which are comprised of operating leases (in thousands).

	Total	2018	Payments due by period				Thereafter
			2019	2020	2021	2022	
Operating leases	1,228	487	140	130	92	83	296

Edgar Filing: EVOLVING SYSTEMS INC - Form 10-K

Total commitments \$ 1,228 \$ 487 \$ 140 \$ 130 \$ 92 \$ 83 \$ 296

CRITICAL ACCOUNTING POLICIES

Our significant accounting policies are disclosed in Note 1 of our Consolidated Financial Statements included elsewhere in this Annual Report on Form 10-K. The following discussion addresses our most critical accounting policies, which are those that are both important to the portrayal of our financial condition and results of operations and that require significant judgment or use of complex estimates.

Revenue Recognition

We recognize revenue when an agreement is signed, the fee is fixed or determinable and collectability is reasonably assured. We recognize revenue from two primary sources: license fees and services. The majority of our license fees and services revenue is generated from fixed-price contracts, which provide for licenses to our software products and services to customize such software to meet our customers' use. When the customization services are determined to be essential to the functionality of the delivered software, we recognize revenue using the percentage-of-completion method of accounting. In these types of arrangements, we do not typically have vendor specific objective evidence (VSOE) of fair value on the license fee/services portion (services are related to customizing the software) of the arrangement due to the large amount of customization required by our customers; however, we do have VSOE for the warranty/maintenance services based on the renewal rate of the first year of maintenance in the arrangement. The license/services portion is recognized using the percentage-of-completion method of accounting and the warranty/maintenance services are separated based on the renewal rate in the contract and recognized ratably over the warranty or maintenance period. We estimate the percentage-of-completion for each contract based on the ratio of direct labor hours incurred to total estimated direct labor hours and recognize revenue based on the percent complete multiplied by the contract amount allocated to the license fee/services. Since estimated direct labor hours, and changes thereto, can have a significant impact on revenue recognition, these estimates are critical and we review them regularly. If the arrangement includes a customer acceptance provision, the hours to complete the

Table of Contents

acceptance testing are included in the total estimated direct labor hours; therefore, the related revenue is recognized as the acceptance testing is performed. Revenue is not recognized in full until the customer has provided proof of acceptance on the arrangement. Generally, our contracts are accounted for individually. However, when certain criteria are met, it may be necessary to account for two or more contracts as one to reflect the substance of the group of contracts. We record amounts billed in advance of services being performed as unearned revenue. Unbilled work-in-progress represents revenue earned but not yet billable under the terms of the fixed-price contracts. All such amounts are expected to be billed and collected within 12 months.

We may encounter budget and schedule overruns on fixed-price contracts caused by increased labor or overhead costs. We make adjustments to cost estimates in the period in which the facts requiring such revisions become known. We record estimated losses, if any, in the period in which current estimates of total contract revenue and contract costs indicate a loss. If revisions to cost estimates are obtained after the balance sheet date but before the issuance of the interim or annual financial statements, we make adjustments to the interim or annual financial statements accordingly.

In arrangements where the services are not essential to the functionality of the delivered software, we recognize license revenue when a license agreement has been signed, delivery and acceptance have occurred, the fee is fixed or determinable and collectability is reasonably assured. Where applicable, we unbundle and record as revenue fees from multiple element arrangements as the elements are delivered to the extent that VSOE of fair value of the undelivered elements exist. If VSOE for the undelivered elements does not exist, we defer fees from such arrangements until the earlier of the date that VSOE does exist on the undelivered elements or all of the elements have been delivered.

We recognize revenue from fixed-price service contracts using the proportional performance method of accounting, which is similar to the percentage-of-completion method described above. We recognize revenue from professional services provided pursuant to time-and-materials based contracts and training services as the services are performed, as that is when our obligation to our customers under such arrangements is fulfilled.

We recognize revenue from our managed services contracts primarily ratably over the service contract period. On occasion, our managed services contracts will contain a specified number of hours to work over the term of the contract. Revenue for this type of managed service contract is recognized using the proportional performance method of accounting.

We recognize revenue from our Mobile Data Enablement (MDE) contracts based on the number of transactions per month multiplied by a factor based on a unique table for transaction volumes relating to each account at a rate for the particular Tier level attained.

We recognize customer support, including maintenance revenue, ratably over the service contract period. When maintenance is bundled with the original license fee arrangement, its fair value, based upon VSOE, is deferred and recognized during the periods when services are provided.

Contract Receivables, Unbilled Work-in-Progress and Allowance for Doubtful Accounts Contract receivables are recorded at the invoiced amount and do not bear interest. Credit is extended based on the evaluation of a customer's financial condition and collateral is not required. Unbilled work in progress is revenue which has been earned but not invoiced. An allowance is placed against accounts receivable or unbilled work in progress for our best estimate of the

amount of probable credit losses. We determine the allowance based on historical write-off experience and information received during collection efforts. We review our allowances monthly and past due balances over 90 days are reviewed individually for collectability. Account balances are charged against the allowance after all means of collection have been exhausted and the potential for recovery is considered remote. We do not have any off-balance-sheet credit exposure related to our customers.

Allowance for Doubtful Accounts

We make judgments related to our ability to collect outstanding accounts receivable and unbilled work-in-progress. We provide allowances for receivables when their collection becomes doubtful by recording an expense. We determine the allowance based on our assessment of the realization of receivables using historical information and current economic trends, including assessing the probability of collection from customers. If the financial condition of our customers were to deteriorate, resulting in an impairment of their ability to make payments owed to us, an increase in the allowance for doubtful accounts would be required. We evaluate the adequacy of the allowance regularly and make adjustments accordingly. Adjustments to the allowance for doubtful accounts could materially affect our results of operations.

Table of Contents

Income Taxes

Significant judgment is required in determining our provision for income taxes. We assess the likelihood that our deferred tax asset will be recovered from future taxable income, and to the extent we believe that recovery is not likely, we establish a valuation allowance. We consider future taxable income projections, historical results and ongoing tax planning strategies in assessing the recoverability of deferred tax assets. However, adjustments could be required in the future if we determine that the amount to be realized is less or greater than the amount that we recorded. Such adjustments, if any, could have a material impact on our results of our operations.

We use a recognition threshold and a measurement attribute for the financial statement recognition and measurement of tax positions taken or expected to be taken in a tax return. For those benefits to be recognized, a tax position must be more-likely-than-not to be sustained upon examination by taxing authorities. The Company uses the incremental approach to recognizing excess tax benefits associated with equity compensation.

On December 22, 2017, the 2017 Tax Cuts and Job Act (the Tax Act) was enacted into law and the new legislation contains key tax provisions that affected us. We are required to recognize the effect of the tax law changes in the period of enactment, such as determining the transition tax, remeasuring our US deferred tax assets and liabilities as well as reassessing the net realizability of our deferred tax assets and liabilities. In December 2017, the SEC staff issued Staff Accounting Bulletin No. 118, *Income Tax Accounting Implications of the Tax Cuts and Jobs Act* (SAB 118), which allows us to record provisional amounts during a measurement period not extend beyond one year of the enactment date, since the Tax Act was passed late in the year.

Business Combinations On July 6, 2017 and September 7, 2017 we announced our acquisitions of Business Logic Systems which became EVOL BLS and the four business operating units of Lumata Holdings Ltd.. This business combinations are reflected in these consolidated financial statements since the acquisition date. Refer to Note 2, Acquisitions, for more information regarding the acquisitions.

We account for business combinations in accordance with the acquisition method. The acquisition method of accounting requires that assets acquired and liabilities assumed be recorded at their fair values on the date of a business acquisition. The excess of the purchase price over the fair value of assets acquired is recognized as goodwill. Certain adjustments to the assessed fair values of the assets and liabilities made subsequent to the acquisition date, but within the measurement period, which is up to one year, are recorded as adjustments to goodwill. Any adjustments subsequent to the measurement period are recorded in income. Our consolidated financial statements and results of operations reflect an acquired business from the completion date of an acquisition.

The judgments that we make in determining the estimated fair value assigned to each class of assets acquired and liabilities assumed, as well as asset lives, can materially impact net income in periods following a business combination. We generally use either the income, cost or market approach to aid in our conclusions of such fair values and asset lives. The income approach presumes that the value of an asset can be estimated by the net economic benefit to be received over the life of the asset, discounted to present value. The cost approach presumes that an investor would pay no more for an asset than its replacement or reproduction cost. The market approach estimates value based on what other participants in the market have paid for reasonably similar assets. Although each valuation approach is considered in valuing the assets acquired, the approach ultimately selected is based on the characteristics of the asset and the availability of information.

Goodwill

Goodwill is the excess of acquisition cost of an acquired entity over the fair value of the identifiable net assets acquired. Goodwill is not amortized, but tested for impairment annually or whenever indicators of impairment exist. These indicators may include a significant change in the business climate, legal factors, operating performance indicators, competition, sale or disposition of a significant portion of the business or other factors. Application of the goodwill impairment test requires judgment, including the identification of reporting units, assignment of assets and liabilities to reporting units, assignment of goodwill to reporting units, and determination of the fair value of each reporting unit.

We performed our annual goodwill impairment test as of July 31, 2017, at which time we had \$21.5 million. The fair value of each reporting unit was estimated using both market and income based approaches. Specifically, we incorporated observed market multiple data from selected guideline public companies and values arrived at through the application of discounted cash flow analyses which in turn were based upon our financial projections as of the valuation date. We believe that a market participant would weigh both possibilities without a bias to one or the other. Consequently, we gave equal consideration to both. This analysis requires significant judgments, including estimation of future cash flows, which is dependent on internal forecasts, estimation of the long-term rate of growth for our business, estimation of the useful life over which cash flows will occur, and determination of our weighted average cost of capital. Changes in these estimates and assumptions could materially affect the determination of fair value and goodwill impairment for each reporting unit. If the carrying value of a reporting unit were to exceed its fair value, we would then compare the fair value of the reporting unit's goodwill to its carrying amount, and any excess of the carrying amount over the fair value would be charged to operations as an impairment loss. If the projected future performance of our segment as estimated in the income valuation approach is adjusted downward or is lower than expected in the future, we could be required to record a goodwill

Table of Contents

impairment charge. As a result of the first step of the 2017 goodwill impairment analysis, the fair value of each reporting unit exceeded its carrying value. Therefore the second step was not necessary. Due to our transition of packaging our products and services into a single managed service offering, we have determined we have one reporting unit. We do not believe the aggregation of our reporting units impacts the value of our goodwill nor are there any events through the date this Form 10 K was filed which impact our assumptions on the determination of the fair value of our goodwill.

Intangible Assets

Amortizable intangible assets consist primarily of purchased software and licenses, customer relationships, trademarks and tradenames, non-competition and purchased software acquired in conjunction with our purchase of Evolving Systems Labs, Evolving Systems NC., EVOL BLS and the Lumata Entities. These assets are amortized using the straight-line method over their estimated lives.

We assess the impairment of identifiable intangibles if events or changes in circumstances indicate that the carrying value of the asset may not be recoverable.

If we determine that the carrying value of intangibles and/or long-lived assets may not be recoverable, we compare the estimated undiscounted cash flows expected to result from the use of the asset and its eventual disposition to the asset's carrying amount. If an amortizable intangible or long-lived asset is not deemed to be recoverable, we recognize an impairment loss representing the excess of the asset's carrying value over its estimated fair value.

Capitalization of Internal Software Development Costs

We expend amounts on product development, particularly for new products and/or for enhancements of existing products. For internal development of software products that are to be licensed by us, we expense the cost of developing software prior to establishing technological feasibility and those costs are capitalized once technological feasibility has been established. Capitalization ceases upon general release of the software. The determination of whether internal software development costs are subject to capitalization is, by its nature, highly subjective and involves significant judgments. This decision could significantly affect earnings during the development period. Further, once capitalized, the software costs are generally amortized on a straight-line basis over the estimated economic life of the product. The determination of the expected useful life of a product is highly judgmental. Finally, capitalized software costs must be assessed for impairment if facts and circumstances warrant such a review.

We did not capitalize any internal software development costs during the years ended December 31, 2017, 2016, or 2015. In addition, we did not have any capitalized internal software development costs included in our December 31, 2017 and 2016 Consolidated Balance Sheets. We believe that during these periods no material internal software development costs were required to be capitalized. Our conclusion is primarily based on the fact that the feature-rich, pre-integrated, and highly-scalable nature of our products requires that our development efforts include complex design, coding and testing methodologies, which include next generation software languages and development tools. Development projects of this nature carry a high degree of development risk.

Substantially all of our internal software development efforts are of this nature, and therefore, we believe the period between achieving technological feasibility and the general release of the software to operations is so short that any costs incurred during this period are not material.

Stock-based Compensation

We account for stock-based compensation by applying a fair-value-based measurement method to account for share-based payment transactions with employees and directors and record compensation cost for all stock awards granted after January 1, 2006 and awards modified, repurchased, or cancelled after that date. We record compensation costs associated with the vesting of unvested options on a straight-line basis over the vesting period. Stock-based compensation is a non-cash expense because we settle these obligations by issuing shares of our common stock instead of settling such obligations with cash payments. We use the Black-Scholes model to estimate the fair value of each option grant on the date of grant. This model requires the use of estimates for expected term of the options and expected volatility of the price of our common stock.

In March 2016, the FASB issued ASU No. 2016-09, Stock Compensation (Topic 718), which includes provisions intended to simplify various aspects related to how share-based payments are accounted for and presented in the financial statements. The standard is effective for annual periods beginning after December 15, 2016. We adopted this ASU during the first quarter 2017. The key effects of the adoption on our financial statements include that the Company will now recognize windfall tax benefits as deferred tax assets instead of tracking the windfall pool and recording such benefits in equity. Additionally, we have elected to recognize forfeitures as they occur rather than estimating them at the time of grant.

Table of Contents

The fair market value of restricted shares for share-based compensation expensing is equal to the closing price of our common stock on the date of grant. Of the restrictions on the stock awards granted during the three months ended March 31, 2017 and June 30, 2017, 20% will be released in January 2018, and 10% annually beginning on the one year anniversary of their offering thereafter for four years. The remaining 40% will be released evenly over four years beginning in 2018 contingent upon the attainment of annual performance goals established by our Board of Directors. Of the restrictions on the stock awards granted during the three months ended September 30, 2017, one-fourth will be released on the one-year anniversary of the date of the grant and the balance will be released quarterly over a three year period. Of the restrictions on the stock awards granted during the three months ended December 31, 2017, one-fourth will be released on the one-year anniversary of the date of the grant and the balance will be released quarterly over a three year period.

Stock-based payments made to non-employees, including grants of stock options, are recognized in the statements of operations based on their estimated fair values. The fair value of these options will be re-measured on each reporting date until the options vest. The re-measured fair value will be recognized as compensation expense over the remaining vesting term of the options.

Recent Accounting Pronouncements

In May 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2014-09, Revenue from Contracts with Customers, Topic 606. This Update affects any entity that either enters into contracts with customers to transfer goods or services or enters into contracts for the transfer of nonfinancial assets, unless those contracts are within the scope of other standards. The guidance in this Update supersedes the revenue recognition requirements in Topic 605, Revenue Recognition and most industry-specific guidance. The core principle of the guidance is that an entity should recognize revenue to illustrate the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The new guidance also includes a cohesive set of disclosure requirements that will provide users of financial statements with comprehensive information about the nature, amount, timing, and uncertainty of revenue and cash flows arising from a reporting organization's contracts with customers. In April 2016, the FASB issued ASU No. 2016-10, Revenue from Contracts with Customers, Topic 606: Identifying Performance Obligations and Licensing . This Update clarifies guidance related to identifying performance obligations and licensing implementation guidance contained in the new revenue recognition standard. The Update includes targeted improvements based on input the Board received from the Transition Resource Group for Revenue Recognition and other stakeholders. The update seeks to proactively address areas in which diversity in practice potentially could arise, as well as to reduce the cost and complexity of applying certain aspects of the guidance both at implementation and on an ongoing basis. In May 2016, the FASB issued ASU No. 2016-12, Revenue from Contracts with Customers, Topic 606: Narrow-Scope Improvements and Practical Expedients . The amendments in this Update address narrow-scope improvements to the guidance on collectability, noncash consideration, and completed contracts at transition. Additionally, the amendments in this Update provide a practical expedient for contract modifications at transition and an accounting policy election related to the presentation of sales taxes and other similar taxes collected from customers. This ASU is the final version of Proposed Accounting Standards Update 2015-320, Revenue from Contracts with Customers, (Topic 606): Narrow-Scope Improvements and Practical Expedients, which has been deleted. In December 2016, the FASB issued ASU No. 2016-20, Revenue from Contracts with Customers, Topic 606: Technical Corrections and Improvements to Topic 606, Revenue from Contracts with Customers . The amendments in this Update address narrow-scope improvements to the guidance on loan guarantee fees, contract cost-impairment testing, contract costs-interaction of impairment testing with guidance in other topics, provision for losses on construction-type and production-type contracts, scope of topic 606 to exclude all contracts that are within the scope of Topic 944, disclosure of remaining performance obligations, disclosure of prior-period performance obligations, contract modifications, contract asset versus receivable, refund liability, advertising costs, fixed-odds wagering contracts in the casino industry and cost capitalization for advisors to private funds and public funds. The Board decided to issue a separate Update for technical corrections and improvements to Topic 606 and other Topics amended by Update 2014-09 to increase stakeholders' awareness of the proposals and to expedite improvements to Update 2014-09. This ASU is effective for fiscal years, and interim periods within those years beginning after December 15, 2017 for public companies and 2018 for non-public entities. We adopted the new standard effective January 1, 2018, using the modified retrospective transition method.

We developed an implementation plan to adopt this new guidance, which included an assessment of the impact of the new guidance on our financial position and results of operations. We have substantially completed our assessment and have determined that this standard will not

Edgar Filing: EVOLVING SYSTEMS INC - Form 10-K

have a material impact on our financial position or results of operations, except enhanced disclosure regarding revenue recognition, including disclosures of revenue streams, performance obligations, variable consideration and the related judgments and estimates necessary to apply the new standard. On January 1, 2018, we adopted the new accounting standard ASC 606, *Revenue from Contracts with Customers* and for all open contracts and related amendments as of January 1, 2018 using the modified retrospective method. Results for reporting periods beginning after January 1, 2018 will be presented under ASC 606, while

Table of Contents

the comparative information will not be restated and will continue to be reported under the accounting standards in effect for those periods.

In February 2016, the FASB issued ASU No. 2016-02, *Leases (Topic 842)*, which requires lessees to put most leases on their balance sheets by recognizing a lessee's rights and obligations, while expenses will continue to be recognized in a similar manner to today's legacy lease accounting guidance. This ASU could also significantly affect the financial ratios used for external reporting and other purposes, such as debt covenant compliance. This ASU will be effective for us on January 1, 2019, with early adoption permitted. We are currently in the process of assessing the impact of this ASU on our consolidated financial statements.

In January 2017, the FASB issued Accounting Standards Update No. 2017-01, *Business Combinations (Topic 805): Clarifying the Definition of a Business (ASU 2017-01)*, which revises the definition of a business and provides new guidance in evaluating when a set of transferred assets and activities is a business. This ASU is effective for fiscal years, and interim periods within those years beginning after December 15, 2017 for public companies and 2018 for non-public entities. We do not expect the standard to have a material impact on our consolidated financial statements.

In January 2017, the FASB issued ASU No. 2017-04, *Intangibles-Goodwill and Other (Topic 350)*, which includes provisions intended to simplify the test for goodwill impairment. The standard is effective for annual periods beginning after December 15, 2019, with early adoption permitted for interim or annual goodwill impairment tests performed on testing dates after January 1, 2017. We do not expect the adoption of this standard to have a significant impact on our financial position and results of operations.

In February 2018, the FASB issued ASU No. 2018-02, *Income Statement - Reporting Comprehensive Income (Topic 220) - Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income*. This standard allows a reclassification from accumulated other comprehensive income to retained earnings for stranded tax effects resulting from the Tax Cuts and Jobs Act and requires certain disclosures about stranded tax effects. This standard will be effective for the Company beginning after December 15, 2018 and should be applied either in the period of adoption or retrospectively. Early adoption is permitted. We are currently evaluating the impact of the new accounting standard.

In March 2018, the FASB issued ASU No. 2018-05, *Income Taxes (Topic 740) - Amendments to SEC Paragraphs Pursuant to SEC Staff Accounting Bulletin No. 118 (ASU 2018-05)*. This standard amends Accounting Standards Codification 740, Income Taxes (ASC 740) to provide guidance on accounting for the tax effects of the Tax Cuts and Jobs Act (the Tax Act) pursuant to Staff Accounting Bulletin No. 18, which allows companies to complete the accounting under ASC 740 within a one-year measurement period from the Tax Act enactment date. This standard is effective upon issuance. We are currently evaluating the impact of the new accounting standard.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

In the ordinary course of business, we are exposed to certain market risks, including changes in foreign currency exchange rates and interest rates. Uncertainties that are either non-financial or non-quantifiable such as political, economic, tax, other regulatory, or credit risks are not included in the following assessment of market risks.

Interest Rate Risks

Our cash balances are subject to interest rate fluctuations and as a result, interest income amounts may fluctuate from current levels. As of December 31, 2017 we had \$8.7 million outstanding under our term loans, which under the loan agreements bear interest at variable rates. Refer to Note 5, Long-Term Debt, of our Consolidated Financial Statements included elsewhere in this Annual Report on Form 10-K for more information regarding the Term Loan. A 1% change in the interest rates on our Loans would change our interest expense by approximately \$0.1 million.

Foreign Currency Risk

We are exposed to fluctuations of the U.S. dollar (our functional currency) against the currencies of our operating subsidiaries. Any increase (decrease) in the value of the U.S. dollar against any foreign currency that is the functional currency of one of our operating subsidiaries will cause the parent company to experience unrealized foreign currency translation losses (gains) with

Table of Contents

respect to amounts already invested in such foreign currencies. In addition, we and our operating subsidiaries are exposed to foreign currency risk to the extent that we enter into transactions denominated in currencies other than our respective functional currencies, such as revenue and related accounts receivable (including intercompany amounts) that are denominated in a currency other than their own functional currency. Changes in exchange rates with respect to these items will result in unrealized (based upon period-end exchange rates) or realized foreign currency transaction gains and losses upon settlement of the transactions. In addition, we are exposed to foreign exchange rate fluctuations related to our operating subsidiaries' monetary assets and liabilities and the financial results of foreign subsidiaries and affiliates when their respective financial statements are translated into U.S. dollars for inclusion in our consolidated financial statements. We record cumulative translation adjustments in accumulated other comprehensive income (loss) as a separate component of equity. As a result of foreign currency risk, we may experience economic loss and a negative impact on earnings and equity with respect to our holdings solely as a result of foreign currency exchange rate fluctuations.

The relationship between the British Pound Sterling, Indian rupee and the U.S. dollar, which is our functional currency, is shown below, per one U.S. dollar:

	December 31, 2017	December 31, 2016
Spot rates:		
British pound sterling	0.74071	0.81103
Euro	0.83348	0.95043
Indian rupee	63.84000	67.95500

	For the Years Ended December 31,		
Average rates:	2017	2016	2015
British pound sterling	0.77673	0.74067	0.65442
Euro	0.88675	0.90392	0.90141
Indian rupee	65.11189	67.19148	64.14862

At the present time, we do not hedge our foreign currency exposure or use derivative financial instruments that are designed to reduce our long-term exposure to foreign currency exchange risk. We continually monitor our foreign currency exchange risk and we may consider various options to reduce this risk in the future.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Board of Directors and Stockholders

Evolving Systems, Inc.

Opinion on the Consolidated Financial Statements

We have audited the accompanying consolidated balance sheets of Evolving Systems, Inc. (a Delaware corporation, the Company) as of December 31, 2017 and 2016, and the related consolidated statements of income, comprehensive income (loss), stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2017, and the related notes (collectively referred to as the consolidated financial statements). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2017 and 2016, and the results of its operations and its cash flows for each of the years in the three-year period ended December 31, 2017, in conformity with accounting principles generally accepted in the United States of America.

Basis for Opinion

These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's consolidated financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audits, we are required to obtain an understanding of internal control over financial reporting, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that our audits provide a reasonable basis for our opinion.

/s/ Friedman LLP

We have served as the Company's auditor since 2012

EVOLVING SYSTEMS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 ORGANIZATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Organization Evolving Systems, Inc. is a provider of real-time digital engagement solutions and services to the wireless, wireline and cable markets. We maintain long-standing relationships with many of the largest wireless, wireline and cable companies worldwide. The Company's portfolio includes market-leading solutions and services for real-time analytics, customer acquisition and activation, customer value management and loyalty for the telecom industry promoting partnerships into retail and financial services

In 2016, we began a shift from selling technology to offering business solutions. The value proposition has moved from cost savings to revenue increases for the carrier and our business model has moved from classic capex license and services to opex models based on recurring managed services with performance fees. Our software solution platform, *Real-time Lifecycle Marketing* (RLM), enables carriers marketing departments to innovate, execute and manage highly-personalized and contextually-relevant, interactive campaigns that engage consumers in real time. Our service activation solution, *Tertio*® (TSA) is used to activate bundles of voice, video and data services for wireless, wireline and cable network operators; our SIM card activation solution, *Dynamic SIM Allocation*™ (DSA) is used to dynamically allocate and assign resources to Mobile Network Operators (MNOs) devices that rely on SIM cards; our *Mobile Data Enablement*™ (MDE) solution provides a data consumption and policy management solution for wireless carriers and Mobile Virtual Network Operators (MVNOs) that monitor the usage and consumption of data services; our *Total Number Management* (TNM) product is a scalable and fully automated database solution that enables operators to reliably and efficiently manage their telephone numbers as well as other communication identifiers (i.e. SIMs, MSISDNs, IMSIs, ICCIDs, IPs). Our solutions can be deployed on premise or as a Software-as-a-Service (SaaS).

On July 6, 2017 we announced the completion of the previously announced acquisition of Business Logic Systems (BLS). BLS, headquartered in Newbury, UK, specializes in data-driven customer value management and customer engagement solutions that have been implemented in over 20 mobile operators in Europe, Africa, Asia-Pacific and the Caribbean. BLS solutions turn customer data into actionable insights and personalized contextual offers. Customer engagement occurs through in-bound and out-bound offers and is further extended through a suite of loyalty and retention solutions.

On September 7, 2017 we announced the completion of the acquisition of four business operating units of Lumata Holdings Ltd. (the Lumata Entities). The Lumata Entities are a leading global provider of real-time, next generation loyalty and customer lifecycle management software and services that helps businesses gain value from their customer data for relevant and contextual insights and actions of value to both customers and enterprises. Its customers include mobile operators including Orange, Telefonica and other Tier-1 and emerging operators in Europe and around the world. The acquisition is expected to be accretive to Evolving Systems' operations once the integration of the business is completed during 2018.

Edgar Filing: EVOLVING SYSTEMS INC - Form 10-K

We believe the acquisitions of BLS and the Lumata Entities further reinforces our commitment to the customer acquisition and customer value management (CVM) domains that began with the acquisition of Sixth Sense Media (Evolving Systems NC,

Table of Contents

Inc.). With these recent acquisitions, we now have a customer base of more than 100 customers spanning 65 countries across the world. The experienced team and technology from BLS, which provides actionable insights and relevant offers based on customer data, greatly complements our software portfolio and 25 years of expertise in customer acquisition, activation and retention. The technology further expands our Managed Services platform for delivering on-tap strategic and tactical solutions. The Lumata Entities' value lies in its patented technology, industry expertise and strong customer relationships, in particular, those across Western Europe. Led by the explosive growth in mobile, the next generation of CVM is moving beyond traditional CRM and points based loyalty systems to highly personalized and contextual, real-time, omni-channel consumer engagement in multiple verticals including telecom, finance, and retail.

Business Combinations On July 6, 2017 and September 7, 2017 we announced our acquisitions of Business Logic Systems which became EVOL BLS and the four business operating units of Lumata Holdings Ltd.. These business combinations are reflected in these consolidated financial statements since the acquisition date. Refer to Note 2, Acquisitions, for more information regarding the acquisitions.

We account for business combinations in accordance with the acquisition method. The acquisition method of accounting requires that assets acquired and liabilities assumed be recorded at their fair values on the date of a business acquisition. The excess of the purchase price over the fair value of assets acquired is recognized as goodwill. Certain adjustments to the assessed fair values of the assets and liabilities made subsequent to the acquisition date, but within the measurement period, which is up to one year, are recorded as adjustments to goodwill. Any adjustments subsequent to the measurement period are recorded in income. Our consolidated financial statements and results of operations reflect an acquired business from the completion date of an acquisition.

The judgments that we make in determining the estimated fair value assigned to each class of assets acquired and liabilities assumed, as well as asset lives, can materially impact net income in periods following a business combination. We generally use either the income, cost or market approach to aid in our conclusions of such fair values and asset lives. The income approach presumes that the value of an asset can be estimated by the net economic benefit to be received over the life of the asset, discounted to present value. The cost approach presumes that an investor would pay no more for an asset than its replacement or reproduction cost. The market approach estimates value based on what other participants in the market have paid for reasonably similar assets. Although each valuation approach is considered in valuing the assets acquired, the approach ultimately selected is based on the characteristics of the asset and the availability of information.

Principles of Consolidation The consolidated financial statements include the accounts of Evolving Systems, Inc. and subsidiaries, all of which are wholly owned. All significant intercompany transactions and balances have been eliminated in consolidation.

Reclassifications - Certain reclassifications have been made to the 2016 and 2015 financial statements to conform to the consolidated 2017 financial statement presentation. These reclassifications had no effect on net earnings or cash flows as previously reported.

Use of Estimates The preparation of consolidated financial statements in conformity with GAAP requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities, at the date of the consolidated financial statements, as well as the reported amounts of revenue and

expenses during the reporting period. We made estimates with respect to revenue recognition for estimated hours to complete projects accounted for using the percentage-of-completion method, allowance for doubtful accounts, income tax valuation allowance, fair values of long-lived assets, valuation of intangible assets and goodwill, useful lives for property, equipment and intangible assets, business combinations, capitalization of internal software development costs and fair value of stock-based compensation amounts. Actual results could differ from these estimates.

Foreign Currency Our functional currency is the U.S. dollar. The functional currency of our foreign operations, generally, is the respective local currency for each foreign subsidiary. Assets and liabilities of foreign operations denominated in local currencies are translated at the spot rate in effect at the applicable reporting date. Our consolidated statements of income are translated at the weighted average rate of exchange during the applicable period. The resulting unrealized cumulative translation adjustment is recorded as a component of accumulated other comprehensive income (loss) in stockholders' equity. Realized and unrealized transaction gains and losses generated by transactions denominated in a currency different from the functional currency of the applicable entity are recorded in other income (loss) in the period in which they occur.

Goodwill Goodwill is the excess of acquisition cost of an acquired entity over the fair value of the identifiable net assets acquired. Goodwill is not amortized, but tested for impairment annually or whenever indicators of impairment exist. These indicators may include a significant change in the business climate, legal factors, operating performance indicators, competition, sale or

Table of Contents

disposition of a significant portion of the business or other factors. Application of the goodwill impairment test requires judgment, including the identification of reporting units, assignment of assets and liabilities to reporting units, assignment of goodwill to the reporting unit, and determination of the fair value of the reporting unit.

Intangible Assets Amortizable intangible assets consist primarily of purchased software and licenses, customer relationships, trademarks and tradenames, non-competition and purchased software acquired in conjunction with our purchase of Telespree Communications (Evolving Systems Labs, Inc.), Evolving Systems NC, Inc., EVOL BLS and the Lumata Entities. These assets are amortized using the straight-line method over their estimated lives.

We assess the impairment of identifiable intangibles if events or changes in circumstances indicate that the carrying value of the asset may not be recoverable.

If we determine that the carrying value of intangibles and/or long-lived assets may not be recoverable, we compare the estimated undiscounted cash flows expected to result from the use of the asset and its eventual disposition to the asset's carrying amount. If an amortizable intangible or long-lived asset is not deemed to be recoverable, we recognize an impairment loss representing the excess of the asset's carrying value over its estimated fair value.

Fair Value Measurements Fair value is the price that would be received from selling an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value is estimated by applying the following hierarchy, which prioritizes the inputs used to measure fair value into three levels and bases the categorization within the hierarchy upon the lowest level of input that is available and significant to the fair value measurement:

Level 1 Quoted prices in active markets for identical assets or liabilities.

Level 2 Observable inputs other than quoted prices in active markets for identical assets and liabilities, quoted prices for identical or similar assets or liabilities in inactive markets, or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 Inputs that are generally unobservable and typically reflect management's estimate of assumptions that market participants would use in pricing the asset or liability.

Cash and Cash Equivalents - All highly liquid investments with maturities of three months or less at the date of purchase are classified as cash equivalents.

Revenue Recognition We recognize revenue when an agreement is signed, the fee is fixed or determinable and collectability is reasonably assured. We recognize revenue from two primary sources: license fees and services. The majority of our license fees and services revenue is generated from fixed-price contracts, which provide for licenses to our software products and services to customize such software to meet our customers' use. When the customization services are determined to be essential to the functionality of the delivered software, we recognize revenue using the percentage-of-completion method of accounting. In these types of arrangements, we do not typically have vendor specific objective evidence (VSOE) of fair value on the license fee/services portion (services are related to customizing the software) of the arrangement due to the large amount of customization required by our customers; however, we do have VSOE for the warranty/maintenance services based on the renewal rate of the first year of maintenance in the arrangement. The license/services portion is recognized using the percentage-of-completion method of accounting and the warranty/maintenance services are separated based on the renewal rate in the contract and recognized ratably over the warranty or maintenance period. We estimate the percentage-of-completion for each contract based on the ratio of direct labor hours incurred to total estimated direct labor hours and recognize revenue based on the percent complete multiplied by the contract amount allocated to the license fee/services. Since estimated direct labor hours, and changes thereto, can have a significant impact on revenue recognition, these estimates are critical and we review them regularly. If the arrangement includes a customer acceptance provision, the hours to complete the acceptance testing are included in the total estimated direct labor hours; therefore, the related revenue is recognized as the acceptance testing is performed. Revenue is not recognized in full until the customer has provided proof of acceptance on the arrangement. Generally, our contracts are accounted for individually. However, when certain criteria are met, it may be necessary to account for two or more contracts as one to reflect the substance of the group of contracts. We record amounts billed in advance of services being performed as unearned revenue. Unbilled work-in-progress represents revenue earned but not yet billable under the terms of the fixed-price contracts. All such amounts are expected to be billed and collected within 12 months.

We may encounter budget and schedule overruns on fixed-price contracts caused by increased labor or overhead costs. We make adjustments to cost estimates in the period in which the facts requiring such revisions become known. We record estimated losses, if any, in the period in which current estimates of total contract revenue and contract costs indicate a loss. If revisions to cost estimates are obtained after the balance sheet date but before the issuance of the interim or annual financial statements, we make adjustments to the interim or annual financial statements accordingly.

Table of Contents

In arrangements where the services are not essential to the functionality of the delivered software, we recognize license revenue when a license agreement has been signed, delivery and acceptance have occurred, the fee is fixed or determinable and collectability is reasonably assured. Where applicable, we unbundle and record as revenue fees from multiple element arrangements as the elements are delivered to the extent that VSOE of fair value of the undelivered elements exist. If VSOE for the undelivered elements does not exist, we defer fees from such arrangements until the earlier of the date that VSOE does exist on the undelivered elements or all of the elements have been delivered.

We recognize revenue from fixed-price service contracts using the proportional performance method of accounting, which is similar to the percentage-of-completion method described above. We recognize revenue from professional services provided pursuant to time-and-materials based contracts and training services as the services are performed, as that is when our obligation to our customers under such arrangements is fulfilled.

We recognize revenue from our managed services contracts primarily ratably over the service contract period. On occasion, our managed services contracts will contain a specified number of hours to work over the term of the contract. Revenue for this type of managed service contract is recognized using the proportional performance method of accounting.

We recognize revenue from our MDE contracts based on the number of transactions per month multiplied by a factor based on a unique table for transaction volumes relating to each account.

We recognize customer support, including maintenance revenue, ratably over the service contract period. When maintenance is bundled with the original license fee arrangement, its fair value, based upon VSOE, is deferred and recognized during the periods when services are provided.

We review and update our contract-related estimates regularly. The impact of an adjustment in estimate is recognized prospectively over the remaining contract term. No adjustment on any one contract was material to our Consolidated financial Statements for the years ended December 31, 2017, 2016, and 2015.

Stock-based Compensation We account for stock-based compensation by applying a fair-value-based measurement method to account for share-based payment transactions with employees and directors. We record compensation costs associated with the vesting of unvested options on a straight-line basis over the vesting period. Stock-based compensation is a non-cash expense because we settle these obligations by issuing shares of our common stock instead of settling such obligations with cash payments. We use the Black-Scholes model to estimate the fair value of each option grant on the date of grant. This model requires the use of estimates for expected term of the options and expected volatility of the price of our common stock.

In March 2016, the FASB issued ASU No. 2016-09, Stock Compensation (Topic 718), which includes provisions intended to simplify various aspects related to how share-based payments are accounted for and presented in the financial statements. The standard is effective for annual periods beginning after December 15, 2016. We adopted this ASU during the first quarter 2017. The key effects of the adoption on our financial statements include that the Company will now recognize windfall tax benefits as deferred tax assets instead of tracking the windfall pool and recording such benefits in equity. Additionally, we have elected to recognize forfeitures as they occur rather than estimating them at the time of

grant.

The fair market value of restricted shares for share-based compensation expensing is equal to the closing price of our common stock on the date of grant. Of the restrictions on the stock awards granted during the three months ended March 31, 2017 and June 30, 2017, 20% will be released in January 2018, and 10% annually beginning on the one year anniversary of their offering thereafter for four years. The remaining 40% will be released evenly over four years beginning in 2018 contingent upon the attainment of annual performance goals established by our Board of Directors. Of the restrictions on the stock awards granted during the three months ended September 30, 2017, one-fourth will be released on the one-year anniversary of the date of the grant and the balance will be released quarterly over a three year period. Of the restrictions on the stock awards granted during the three months ended December 31, 2017, one-fourth will be released on the one-year anniversary of the date of the grant and the balance will be released quarterly over a three year period.

Stock-based payments made to non-employees, including grants of stock options, are recognized in the statements of operations based on their estimated fair values. The fair value of these options will be re-measured on each reporting date until the options vest. The re-measured fair value will be recognized as compensation expense over the remaining vesting term of the options.

Comprehensive Income (Loss) - Comprehensive income consists of two components, net income and other comprehensive income (loss). Other comprehensive income refers to revenue, expenses, gains, and losses that under GAAP are recorded as an element of shareholders' equity but are excluded from net income. Other comprehensive income (loss) consists of foreign currency translation adjustments from those subsidiaries not using the U.S. dollar as their functional currency and unrealized gains and losses on marketable securities categorized as available-for-sale.

Table of Contents

Contract Receivables, Unbilled Work-in-Progress and Allowance for Doubtful Accounts Contract receivables are recorded at the invoiced amount and do not bear interest. Credit is extended based on the evaluation of a customer's financial condition and collateral is not required. Unbilled work in progress is revenue which has been earned but not invoiced. An allowance is placed against accounts receivable or unbilled work in progress for our best estimate of the amount of probable credit losses. We determine the allowance based on historical write-off experience and information received during collection efforts. We review our allowances monthly and past due balances over 90 days are reviewed individually for collectability. Account balances are charged against the allowance after all means of collection have been exhausted and the potential for recovery is considered remote. We do not have any off-balance-sheet credit exposure related to our customers.

The following table reflects the activity in the allowance for doubtful accounts:

Fiscal Year	Description	Balance at Beginning of Period	Bad Debt Expense/ (Recovery)	Write-Offs Charged to Allowance	Effects of Foreign Currency Exchange Rates	Balance at End of Period
2017	Allowance for doubtful accounts	\$ 221	\$ 789	\$ (41)	\$ 1	\$ 970
2016	Allowance for doubtful accounts	\$ 83	\$ 150	\$	\$ (12)	\$ 221
2015	Allowance for doubtful accounts	\$ 43	\$ 41	\$	\$ (1)	\$ 83

The following table reflects the activity in the allowance for unbilled work-in-progress:

Fiscal Year	Description	Balance at Beginning of Period	Unbilled Work-in-Progress Allowance/ (Recovery)	Write-Offs Charged to Allowance	Effects of Foreign Currency Exchange Rates	Balance at End of Period
2017	Allowance for unbilled work-in-progress	\$	\$ 107	\$	\$	\$ 107
2016	Allowance for unbilled work-in-progress	\$	\$	\$	\$	\$
2015	Allowance for unbilled work-in-progress	\$ 306	\$	\$ (306)	\$	\$

Concentration of Credit Risk Financial instruments that potentially subject us to concentrations of credit risk consist primarily of contract receivables and unbilled work-in-progress. We perform on-going evaluations of customers financial condition and, generally, require no collateral from customers.

A substantial portion of our revenue is from a limited number of customers, all in the telecommunications industry.

Edgar Filing: EVOLVING SYSTEMS INC - Form 10-K

For the year ended December 31, 2017, one significant customers accounted for 11% of revenue from operations. This customer is a large telecommunications operators in Europe. For the years ended December 31, 2016 and 2015, no significant customers exceeded the threshold (defined as contributing at least 10%) of revenue from operations.

As of December 31, 2017 and 2016 no customers accounted for 10% of contract receivables and unbilled work-in-progress.

We are subject to concentration of credit risk with respect to our cash and cash equivalents, which we attempt to minimize by maintaining our cash and cash equivalents with institutions of sound financial quality. At times, cash balances may exceed limits federally insured by the Federal Deposit Insurance Corporation (FDIC).

Our funds not under any FDIC program were \$5.4 million and \$6.3 million as of December 31, 2017 and 2016, respectively.

Sales, Use and Other Value Added Tax Revenue is recorded net of applicable state, use and other value added taxes.

Table of Contents

Advertising and Promotion Costs Advertising and promotion costs are expensed as incurred. Advertising costs totaled approximately \$0.1 million, \$0.1 million and \$0.1 million for the years ended December 31, 2017, 2016 and 2015.

Capitalization of Internal Software Development Costs We expend amounts on product development, particularly for new products and/or for enhancements of existing products. For internal development of software products that are to be licensed by us, we expense the cost of developing software prior to establishing technological feasibility and those costs are capitalized once technological feasibility has been established. Capitalization ceases upon general release of the software. The determination of whether internal software development costs are subject to capitalization is, by its nature, highly subjective and involves significant judgments. This decision could significantly affect earnings during the development period. Further, once capitalized, the software costs are generally amortized on a straight-line basis over the estimated economic life of the product. The determination of the expected useful life of a product is highly judgmental. Finally, capitalized software costs must be assessed for impairment if facts and circumstances warrant such a review. We did not capitalize any internal software development costs during the three years ended December 31, 2017. In addition, we did not have any capitalized internal software development costs included in our December 31, 2017 and 2016 Consolidated Balance Sheets. We believe that during these periods no material internal software development costs were required to be capitalized. Our conclusion is primarily based on the fact that the feature-rich, pre-integrated, and highly-scalable nature of our products requires that our development efforts include complex design, coding and testing methodologies, which include next generation software languages and development tools. Development projects of this nature carry a high degree of development risk. Substantially all of our internal software development efforts are of this nature, and therefore, we believe the period between achieving technological feasibility and the general release of the software to operations is so short that any costs incurred during this period are not material.

Property and Equipment and Long-Lived Assets Property and equipment are stated at cost or estimated fair value if acquired in an acquisition, less accumulated depreciation, and are depreciated over their estimated useful lives, or the lease term, if shorter, using the straight-line method. Leasehold improvements are stated at cost, less accumulated amortization, and are amortized over the shorter of the lease term or estimated useful life of the asset. Maintenance and repair costs are expensed as incurred.

We review our long-lived assets, such as property and equipment and purchased intangible assets subject to amortization, for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset or asset group may not be recoverable. We evaluate the recoverability of an asset or asset group by comparing its carrying amount to the estimated undiscounted future cash flows expected to be generated by the asset or asset group. If the carrying amount of an asset or asset group exceeds its estimated future cash flows, we recognize an impairment charge as the amount by which the carrying amount of the asset exceeds the estimated fair value of the asset.

Income Taxes We record deferred tax assets and liabilities for the estimated future tax effects of temporary differences between the tax bases of assets and liabilities and amounts reported in the accompanying consolidated balance sheets, as well as operating loss and tax credit carry-forwards. We measure deferred tax assets and liabilities using enacted tax rates expected to be applied to taxable income in the years in which those temporary differences are expected to be recovered or settled. We reduce deferred tax assets by a valuation allowance if, based on available evidence, it is

more likely than not that these benefits will not be realized.

We use a recognition threshold and a measurement attribute for the financial statement recognition and measurement of tax positions taken or expected to be taken in a tax return. For those benefits to be recognized, a tax position must be more likely than not to be sustained upon examination by taxing authorities.

On December 22, 2017, the 2017 Tax Cuts and Job Act (the Tax Act) was enacted into law and the new legislation contains key tax provisions that affected us. We are required to recognize the effect of the tax law changes in the period of enactment, such as determining the transition tax, remeasuring our US deferred tax assets and liabilities as well as reassessing the net realizability of our deferred tax assets and liabilities. In December 2017, the SEC staff issued Staff Accounting Bulletin No. 118, *Income Tax Accounting Implications of the Tax Cuts and Jobs Act* (SAB 118), which allows us to record provisional amounts during a measurement period not extend beyond one year of the enactment date.

Segment Information We define operating segments as components of our enterprise for which separate financial information is reviewed regularly by the chief operating decision-makers to evaluate performance and to make operating decisions. We have identified our Chief Executive Officer and Senior Vice President of Finance as our chief operating decision-makers (CODM). These chief operating decision makers review revenues by segment and review overall results of operations.

We currently operate our business as one operating segment which includes two revenue types: license fees revenue and services revenue (as shown on the consolidated statements of income). License fees revenue represents the fees received from the license of software products. Services revenue includes services directly related to the delivery of the licensed products, such as fees

Table of Contents

for custom development, integration services, SaaS service, managed services, annual support fees, recurring maintenance fees, fees for maintenance upgrades and warranty services. Warranty services that are similar to software maintenance services are typically bundled with a license sale.

Recent Accounting Pronouncements In May 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2014-09, Revenue from Contracts with Customers, Topic 606. This Update affects any entity that either enters into contracts with customers to transfer goods or services or enters into contracts for the transfer of nonfinancial assets, unless those contracts are within the scope of other standards. The guidance in this Update supersedes the revenue recognition requirements in Topic 605, Revenue Recognition and most industry-specific guidance. The core principle of the guidance is that an entity should recognize revenue to illustrate the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The new guidance also includes a cohesive set of disclosure requirements that will provide users of financial statements with comprehensive information about the nature, amount, timing, and uncertainty of revenue and cash flows arising from a reporting organization's contracts with customers. In April 2016, the FASB issued ASU No. 2016-10, Revenue from Contracts with Customers, Topic 606: Identifying Performance Obligations and Licensing . This Update clarifies guidance related to identifying performance obligations and licensing implementation guidance contained in the new revenue recognition standard. The Update includes targeted improvements based on input the Board received from the Transition Resource Group for Revenue Recognition and other stakeholders. The update seeks to proactively address areas in which diversity in practice potentially could arise, as well as to reduce the cost and complexity of applying certain aspects of the guidance both at implementation and on an ongoing basis.

In May 2016, the FASB issued ASU No. 2016-12, Revenue from Contracts with Customers, Topic 606: Narrow-Scope Improvements and Practical Expedients . The amendments in this Update address narrow-scope improvements to the guidance on collectability, noncash consideration, and completed contracts at transition. Additionally, the amendments in this Update provide a practical expedient for contract modifications at transition and an accounting policy election related to the presentation of sales taxes and other similar taxes collected from customers. This ASU is the final version of Proposed Accounting Standards Update 2015-320, Revenue from Contracts with Customers, (Topic 606): Narrow-Scope Improvements and Practical Expedients, which has been deleted. In December 2016, the FASB issued ASU No. 2016-20, Revenue from Contracts with Customers, Topic 606: Technical Corrections and Improvements to Topic 606, Revenue from Contracts with Customers . The amendments in this Update address narrow-scope improvements to the guidance on loan guarantee fees, contract cost-impairment testing, contract costs-interaction of impairment testing with guidance in other topics, provision for losses on construction-type and production-type contracts, scope of topic 606 to exclude all contracts that are within the scope of Topic 944, disclosure of remaining performance obligations, disclosure of prior-period performance obligations, contract modifications, contract asset versus receivable, refund liability, advertising costs, fixed-odds wagering contracts in the casino industry and cost capitalization for advisors to private funds and public funds. The Board decided to issue a separate Update for technical corrections and improvements to Topic 606 and other Topics amended by Update 2014-09 to increase stakeholders' awareness of the proposals and to expedite improvements to Update 2014-09. This ASU is effective for fiscal years, and interim periods within those years beginning after December 15, 2017 for public companies and 2018 for non-public entities.

We adopted the new standard effective January 1, 2018, using the modified retrospective transition method. We developed an implementation plan to adopt this new guidance, which included an assessment of the impact of the new guidance on our financial position and results of operations. We have substantially completed our assessment and have determined that this standard will not have a material impact on our financial position or results of operations, except enhanced disclosure regarding revenue recognition, including disclosures of revenue streams, performance obligations, variable consideration and the related judgments and estimates necessary to apply the new standard. On January 1, 2018, we adopted the new accounting standard ASC 606, *Revenue from Contracts with Customers* and for all open contracts and related

Edgar Filing: EVOLVING SYSTEMS INC - Form 10-K

amendments as of January 1, 2018 using the modified retrospective method. Results for reporting periods beginning after January 1, 2018 will be presented under ASC 606, while the comparative information will not be restated and will continue to be reported under the accounting standards in effect for those periods.

In February 2016, the FASB issued ASU No. 2016-02, Leases (Topic 842), which requires lessees to put most leases on their balance sheets by recognizing a lessee's rights and obligations, while expenses will continue to be recognized in a similar manner to today's legacy lease accounting guidance. This ASU could also significantly affect the financial ratios used for external reporting and other purposes, such as debt covenant compliance. This ASU will be effective for us on January 1, 2019, with early adoption permitted. We are currently in the process of assessing the impact of this ASU on our consolidated financial statements.

In January 2017, the FASB issued Accounting Standards Update No. 2017-01, Business Combinations (Topic 805): Clarifying the Definition of a Business (ASU 2017-01), which revises the definition of a business and provides new guidance in

Table of Contents

evaluating when a set of transferred assets and activities is a business. This ASU is effective for fiscal years, and interim periods within those years beginning after December 15, 2017 for public companies and 2018 for non-public entities. We do not expect the standard to have a material impact on our consolidated financial statements.

In January 2017, the FASB issued ASU No. 2017-04, *Intangibles-Goodwill and Other (Topic 350)*, which includes provisions intended to simplify the test for goodwill impairment. The standard is effective for annual periods beginning after December 15, 2019, with early adoption permitted for interim or annual goodwill impairment tests performed on testing dates after January 1, 2017. We do not expect the adoption of this standard to have a significant impact on our financial position and results of operations.

In February 2018, the FASB issued ASU No. 2018-02, *Income Statement - Reporting Comprehensive Income (Topic 220) - Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income*. This standard allows a reclassification from accumulated other comprehensive income to retained earnings for stranded tax effects resulting from the Tax Cuts and Jobs Act and requires certain disclosures about stranded tax effects. This standard will be effective for the Company beginning after December 15, 2018 and should be applied either in the period of adoption or retrospectively. Early adoption is permitted. We are currently evaluating the impact of the new accounting standard.

In March 2018, the FASB issued ASU No. 2018-05, *Income Taxes (Topic 740) - Amendments to SEC Paragraphs Pursuant to SEC Staff Accounting Bulletin No. 118 (ASU 2018-05)*. This standard amends Accounting Standards Codification 740, *Income Taxes (ASC 740)* to provide guidance on accounting for the tax effects of the Tax Cuts and Jobs Act (the Tax Act) pursuant to Staff Accounting Bulletin No. 18, which allows companies to complete the accounting under ASC 740 within a one-year measurement period from the Tax Act enactment date. This standard is effective upon issuance. We are currently evaluating the impact of the new accounting standard.

NOTE 2 ACQUISITIONS

Business Logic Systems

On July 3, 2017, we completed the purchase by BLS Limited (EVOL BLS), a wholly owned subsidiary of Evolving Systems, Inc., a Delaware corporation (the Company), of Business Logic Systems Limited (Seller). EVOL BLS and Seller are both companies incorporated under the laws of England and Wales. Under the terms of the Asset Purchase Agreement, dated as of May 5, 2017 (the Purchase Agreement), the Seller agreed to sell substantially all of its assets and transfer certain liabilities relating to Seller s business of providing customer value management solutions and data driven marketing solutions for £1.2 million (\$1.6 million) in cash, plus (a) an additional sum of £100,000 (\$134,000), which was reduced in full by the sums paid by EVOL BLS to certain employees severance obligations (collectively, the Cash Payments); (b) a percentage of collections on certain receivables over a 24 month period; and (c) an earnout equal to 50% of BLS based revenue over \$4.8 million per year for 3 years after the closing date. The Company agreed to guarantee EVOL BLS obligations under the Purchase Agreement.

The Purchase Agreement contains a two year no solicitation provision which restricts the Seller s ability to compete with EVOL BLS with respect to the BLS business or to solicit BLS customers or BLS employees serving in an executive, managerial, sales or technical role.

Edgar Filing: EVOLVING SYSTEMS INC - Form 10-K

We accounted for this business combination by applying the acquisition method, and accordingly, the purchase price was allocated to the assets and liabilities assumed based upon their fair values at the acquisition date. The excess of the purchase price over the net assets and liabilities, approximately \$0.3 million, was recorded as goodwill. The results of EVOL BLS's operations have been included in the consolidated financial statements since the acquisition date. The amortization of the intangible assets is deductible for tax purposes.

Total purchase price is summarized as follows (in thousands):

	July 3, 2017	
Cash Consideration		
Total Cash Consideration	\$	1,553
Earnout		380
Total purchase price	\$	1,933

Edgar Filing: EVOLVING SYSTEMS INC - Form 10-K

Table of Contents

The following table summarizes the estimated fair values of the assets and liabilities assumed at the acquisition date (in thousands):

	July 3, 2017	
Contract receivables	\$	1,037
Unbilled work-in-progress		1,039
Intangible assets		246
Prepaid and other current assets		437
Other assets, non-current		55
Total identifiable assets acquired	\$	2,814
Accounts payable and accrued liabilities	\$	792
Deferred revenue		338
Total identifiable liabilities acquired	\$	1,130
Net identifiable assets acquired		1,684
Goodwill		249
Net assets acquired	\$	1,933

We recorded \$0.2 million in intangible assets as of the acquisition date with a weighted-average amortization period of approximately six years and are amortizing the value of the purchased software, trademarks and trade names, non-competition and customer relationships over an estimated useful life of 5, 0.5, 2 and 7 years, respectively. Amortization expense of approximately \$25,000 related to the acquired intangible assets was recorded during the year ended December 31, 2017.

The \$0.3 million of the goodwill recognized is attributed primarily to expected synergies and the assembled workforce of EVOL BLS. Goodwill was adjusted by \$0.2 million related to changes in the opening client balances for contract receivables and unbilled work in progress. The Company expects the purchase price allocation will be finalized in 2018. As of the date of this report there were no additional changes in the recognized amounts of goodwill resulting from the acquisition of EVOL BLS.

Intangible assets related to the EVOL BLS acquisition as of December 31, 2017 were as follows (in thousands):

	December 31, 2017							
	Gross Amount		Effects of changes in foreign currency exchange rates		Net Amount	Accumulated Amortization	Net Carrying Amount	Weighted- Average Amortization Period
Purchased software	\$ 98	\$	4	\$	102	\$ 9	\$ 93	5 yrs

	\$ 246	\$ 9	\$ 255	\$ 25	\$ 230	5.9 yrs

Lumata

On September 4, 2017, Evolving Systems Holdings Limited (EVOL Holdings), a wholly owned subsidiary of Evolving Systems, Inc., completed the acquisition under a Share Purchase Agreement (the Purchase Agreement) with Lumata Holdings Limited (Lumata Holdings or Seller) and Francisco Partners III (Cayman) L.P., as Guarantor (the Acquisition). EVOL Holdings acquired all of the issued and outstanding shares of four (4) Lumata Holdings subsidiaries, Lumata France SAS, Lumata Spain S.L., Lumata UK Ltd and Lumata Deutschland GmbH (collectively, Lumata Entities) in exchange for a cash payment totaling

Edgar Filing: EVOLVING SYSTEMS INC - Form 10-K

Table of Contents

4.0 million (\$4.8 million), subject to certain adjustments. The Seller and certain members of the Seller's management entered into Management Warranty Deeds to secure Lumata Holdings' representations and warranties under the Purchase Agreement and, to the extent the amounts provided under the Management Warranty Deeds are not sufficient to satisfy post-closing claims, EVOL Holdings may seek recovery from the Guarantor in an amount not to exceed 400,000 (\$476,000). EVOL Holdings and Seller are both companies incorporated under the laws of England and Wales.

We accounted for this business combination by applying the acquisition method, and accordingly, the purchase price was allocated to the assets and liabilities assumed based upon their fair values at the acquisition date. The excess of the purchase price over the net assets and liabilities, approximately \$3.1 million, was recorded as goodwill. The Company is in the process of finalizing the purchase allocation, thus the provisional measures of deferred income taxes, intangibles and goodwill are subject to change. The Company expects the purchase price allocation will be finalized in 2018. The results of the Lumata Entities' operations have been included in the consolidated financial statements since the acquisition date. The amortization of the intangible assets is not deductible for tax purposes.

Total purchase price is summarized as follows (in thousands):

	September 4, 2017	
Cash Consideration		
Total Cash Consideration	\$	4,766
Total purchase price	\$	4,766

The following table summarizes the estimated fair values of the assets and liabilities assumed at the acquisition date (in thousands):

	September 4, 2017	
Cash and cash equivalents	\$	386
Contract receivables		1,444
Unbilled work-in-progress		110
Intangible assets		1,935
Prepaid and other current assets		1,539
Other assets, non-current		19
Total identifiable assets acquired	\$	5,433
Accounts payable and accrued liabilities	\$	3,086
Deferred tax liability		329
Deferred revenue		325
Total identifiable liabilities acquired	\$	3,740
Net identifiable assets acquired		1,693
Goodwill		3,073
Net assets acquired	\$	4,766

We recorded \$1.9 million in intangible assets as of the acquisition date with a weighted-average amortization period of approximately ten years and are amortizing the value of the purchased software, trademarks and tradename, non-competition and customer relationships over an

Edgar Filing: EVOLVING SYSTEMS INC - Form 10-K

estimated useful life of 7, 5, 1.5 and 13 years, respectively. Amortization expense of approximately \$72,000 related to the acquired intangible assets was recorded during the year ended December 31, 2017.

The \$3.1 million of goodwill recognized is attributed to expected synergies and the assembled workforce and residual goodwill of the Lumata Entities. As of the date of this report there were no changes in the recognized amounts of goodwill resulting from the acquisition of the Lumata Entities.

Intangible assets related to the Lumata Entities acquisition as of December 31, 2017 (in thousands):

Table of Contents

December 31, 2017

Pro Forma

The following table presents the unaudited pro forma results of the Company for the years ended December 31, 2017 and 2016 as if the acquisitions of EVOL BLS and Lumata Entities occurred on January 1, 2016. The pro forma results include estimates and assumptions which management believes are necessary. However, pro forma results do not include an anticipated cost savings or their effects of the planned integration of EVOL BLS and Lumata Entities and are not necessarily indicative of the result that would have occurred if the business combination had been in effect on the dates indicated, or which may result in the future. The unaudited pro forma revenue and net loss for EVOL BLS was approximately \$1.4 million and \$ 2.0 million, respectively, for the pre-acquisition period during 2017. The unaudited pro forma revenue and net loss for the Lumata Entities was approximately \$4.6 million and \$0.2 million, respectively, for the pre-acquisition period during 2017. The unaudited pro forma revenue and net loss for EVOL BLS was approximately \$5.9 million and \$ 1.5 million, respectively, for the year ended December 31, 2016. The unaudited pro forma revenue and net loss for the Lumata Entities was approximately \$6.4 million and \$1.1 million, respectively, for the year ended December 31, 2016. The pro forma information includes adjustments for the amortization of intangible assets.

	Year ended December 31,	
	2017 (unaudited)	2016 (unaudited)
Revenue	\$ 34,821	\$ 37,102
Earnings	144	537

EVOL BLS or the Lumata Entities did not have any material, nonrecurring pro forma adjustments directly attributable to the business combination included in the reported pro forma revenue and earnings.

NOTE 3 GOODWILL AND INTANGIBLE ASSETS

Changes in the carrying amount of goodwill by reporting unit were as follows (in thousands):

Total

Edgar Filing: EVOLVING SYSTEMS INC - Form 10-K

		Goodwill
Balance as of December 31, 2015	\$	23,142
Goodwill acquired during the year		
Effects of changes in foreign currency exchange rates (1)		(2,543)
Balance as of December 31, 2016	\$	20,599
Goodwill acquired during the year		3,322
Effects of changes in foreign currency exchange rates (1)		1,295
Balance as of December 31, 2017	\$	25,216

Table of Contents

(1) Represents the impact of foreign currency translation for instances when goodwill is recorded in foreign entities whose functional currency is also their local currency. Goodwill balances are translated into U.S. dollars using exchange rates in effect at period end. Adjustments related to foreign currency translation are included in other comprehensive income.

We performed our annual goodwill impairment test as of July 31, 2017, at which time we had \$21.5 million of goodwill. The fair value of the reporting unit was estimated using both market and income based approaches. Specifically, we incorporated observed market multiple data from selected guideline public companies and values arrived at through the application of discounted cash flow analyses which in turn were based upon our financial projections as of the valuation date. We believe that a market participant would weigh both possibilities without a bias to one or the other. Consequently, we gave equal consideration to both. This analysis requires significant judgments, including estimation of future cash flows, which is dependent on internal forecasts, estimation of the long-term rate of growth for our business, estimation of the useful life over which cash flows will occur, and determination of our weighted average cost of capital. Changes in these estimates and assumptions could materially affect the determination of fair value and goodwill. If the carrying value were to exceed its fair value, we would then compare the fair value of goodwill to its carrying amount, and any excess of the carrying amount over the fair value would be charged to operations as an impairment loss. If the projected future performance of our segment as estimated in the income valuation approach is adjusted downward or is lower than expected in the future, we could be required to record a goodwill impairment charge. As a result of the first step of the 2017 goodwill impairment analysis, the fair value of each reporting unit exceeded its carrying value. Therefore the second step was not necessary. Due to our transition of packaging our products and services into a single managed service offering, we have determined we have one reporting unit. We do not believe the aggregation of our reporting units impacts the value of our goodwill nor are there any events through the date this Form 10-K was filed which impact our assumptions on the determination of the fair value of our goodwill.

We amortized identifiable intangible assets for Evolving Systems Labs, Evolving Systems NC, EVOL BLS, and the Lumata entities on a straight-line basis over their estimated lives ranging from one to eight years. As of December 31, 2017 and December 31, 2016, identifiable intangibles were as follows (in thousands):

	December 31, 2017			December 31, 2016			Weighted-Average Amortization Period
	Gross Amount	Accumulated Amortization	Net Carrying Amount	Gross Amount	Accumulated Amortization	Net Carrying Amount	
Purchased software	\$ 2,921	\$ 743	\$ 2,178	\$ 2,118	\$ 436	\$ 1,682	7.7 yrs
Trademarks and tradenames	310	189	121	185	116	69	3.7 yrs
Non-competition	40	35	5	33	21	12	2.0 yrs
Customer relationships	4,363	1,054	3,309	3,024	587	2,437	8.7 yrs
	\$ 7,634	\$ 2,021	\$ 5,613	\$ 5,360	\$ 1,160	\$ 4,200	6.8 yrs

Amortization expense of identifiable intangible assets was \$0.9 million, \$0.8 million and \$0.3 million for the years ended December 31, 2017, 2016 and 2015, respectively. Expected future amortization expense related to identifiable intangibles based on our carrying amount as of December 31, 2017 was as follows (in thousands):

Year ending December 31,	
2018	\$ 954
2019	942
2020	940

NOTE 5 LONG-TERM DEBT

On August 16, 2017, we entered into a Term Loan Facility Agreement with East West Bank as lender in the amount of \$4.7 million (the Loan Facility). The purpose of the Loan Facility is to provide funds in connection with the Company's entry into a Share Purchase Agreement with Lumata Holdings Limited for a cash payment totaling 4 million (\$4.8 million). See Note 2 Acquisitions for the Lumata Entities acquisition. The Loan Facility requires the Company to make monthly principal payments of approximately \$131,400 commencing July 31, 2018 and interest at the greater of (a) 3.5% or (b) the variable rate of interest that appears in the Wall Street Journal on a monthly measurement date plus in either case 1.5%. As of December 31, 2017 the U.S.A. Prime Rate was 4.50%. EVOL Inc. entered into the Loan Facility as the Parent Guarantor; Evolving Systems BLS LTD and Evolving Systems Limited entered into the Loan Facility as Original Guarantors (the Original Guarantors). The Loan Facility is secured by all of the assets of EVOL Holdings and the Original Guarantors in accordance with the terms of a Debenture entered into by EVOL Holdings and the Original Guarantors in favor of East West Bank. EVOL Holdings, EVOL Inc. and the Original Guarantors also entered into a Subordination Deed whereby each of the parties agreed to subordinate all loans by and among each other to East West Bank. Following completion of the Lumata Acquisition, Lumata France SAS and Lumata UK Ltd

are also bound to adhere to the finance documents as additional obligors.

The Loan Facility requires the Company to pay an Arrangement Fee (Origination Fee) of \$23,650, payable in 4 equal installments, with the first payment due on the date of the Loan Facility and the remaining three payments on the first, second and third anniversary thereof. The Company also agreed to pay East West Bank's legal fees in connection with the transaction. The Company may prepay the Loan Facility at any time, in a minimum amount of \$250,000 and increments of \$50,000, subject to a prepayment fee of 2% of the amount prepaid, on any prepayment made before the second anniversary date of the Agreement. The unpaid balance of the Loan Facility is due on August 16, 2021.

The Loan Facility includes financial covenants to maintain a minimum current ratio, a specified ratio of Total Liabilities to EBITDA and a minimum fixed charge coverage ratio as well as negative covenants that place restrictions on EVOL Holdings, the

Table of Contents

Parent and Original Guarantors and the additional obligors ability to, among other things: incur additional indebtedness; create liens or other encumbrances on assets; make loans, enter into letters of credit, guarantees, investments and acquisitions; sell or otherwise dispose of assets; declare dividends, cause or permit a change of control; merge or consolidate with another entity; enter into affiliate transactions; and change the nature of its business materially, subject to standard exceptions.

On February 29, 2016, we entered into the Fifth Amendment to the Loan and Security Agreement with East West Bank which provides for a Term Loan (the Term Loan) for \$6.0 million. The \$6.0 million loan bears interest at a floating rate equal to the U.S.A. Prime Rate plus 1.0%. As of December 31, 2017, the U.S.A. Prime Rate was 4.50%. The Term Loan is secured by substantially all of the assets of Evolving Systems, including a pledge, subject to certain limitations with respect to stock of foreign subsidiaries, of the stock of the existing and future direct subsidiaries of Evolving Systems. Interest accrues from the date the Term Loan was made at the aforementioned rate and is payable monthly. The Term Loan shall be repaid in 36 equal monthly installments of principal, plus accrued but unpaid interest, commencing on January 1, 2017 and continuing on the first day of each month thereafter through and including January 1, 2020. On the Term Loan maturity date, the outstanding principal amount of the Term Loan and all accrued and unpaid interest thereon shall be immediately due and payable. The Term Loan, once repaid, may not be reborrowed. We must maintain a minimum current ratio, a specified ratio of Total Liabilities to EBITDA and a minimum fixed charge coverage ratio which are as defined in the Term Loan. The Term Loan requires us to pay two annual credit facility fees of \$18,750 and legal fee equal to \$1,000. The Term Loan agreement required us to use the term loan s proceeds and \$4.0 million from our cash balances to pay off and terminate a Revolving Facilities Loan and Security Agreement with East West Bank totaling \$10.0 million. The Term Loan matures on January 1, 2020.

The Term Loan and the Loan Facility (collectively, Loans) include negative covenants that place restrictions on the Company s ability to, among other things: incur additional indebtedness; create liens or other encumbrances on assets; make loans, enter into letters of credit, guarantees, investments and acquisitions; sell or otherwise dispose of assets; cause or permit a change of control; merge or consolidate with another entity; make negative pledges; enter into affiliate transactions; limits the amount of cash distributions to our shareholders; and change the nature of our business materially. Outstanding amounts under the Term Loan may be accelerated by East West Bank upon the occurrence and continuance of certain events of default, including without limitation: payment defaults, breach of covenants beyond applicable grace periods, breach of representations and warranties, bankruptcy and insolvency defaults, and the occurrence of a material adverse effect (as defined). Acceleration is automatic upon the occurrence of certain bankruptcy and insolvency defaults.

As of December 31, 2017, we are in compliance with the covenants and have a \$8.7 million balance under the Loans net of approximately \$14,000 of debt issuance costs. The proceeds from the borrowings against the facilities were used for the initial payment for the SSM acquisition agreement on September 30, 2015 and the purchase of the Lumata Entities on September 4, 2017.

NOTE 6 INCOME TAXES

On December 22, 2017, the Tax Cuts and Jobs Act (the Tax Act) was enacted in the United States. The Tax Act includes a number of changes to existing U.S. tax laws that impact the Company including the reduction of the U.S. corporate income tax rate from 35 percent to 21 percent for tax years beginning after December 31, 2017. The Tax Act also provides for a one-time transition tax on indefinitely reinvested foreign earnings and the acceleration of depreciation for certain assets placed into service after September 27, 2017, as well as prospective changes beginning in 2018, including the elimination of certain domestic deductions and credits, capitalization of research and development expenditures, and additional limitations on the deductibility of executive compensation and interest.

The income tax effects of the Tax Act in 2017 recognized in the Company's financial statements are provisional in accordance with Staff Accounting Bulletin No. 118, which provides SEC staff guidance for the application of ASC Topic 740, Income Taxes, in the reporting period in which the Tax Act was signed into law. As such, the Company's financial results reflect the income tax effects of the Tax Act for which accounting under ASC Topic 740 is incomplete but a reasonable estimate could be determined. The Company did not identify items for which the income tax effects of the Tax Act have not been completed and a reasonable estimate could not be determined as of December 31, 2017.

The changes to existing U.S. tax laws as a result of the Tax Act, which have the most significant impact on the company's provision for income taxes as of December 31, 2017 are as follows:

Reduction of the U.S. Corporate Income Tax Rate

The Company measures deferred tax assets and liabilities using enacted tax rates that will apply in the years in which the temporary differences are expected to be recovered or paid. Accordingly, the Company's deferred tax assets and liabilities were

Edgar Filing: EVOLVING SYSTEMS INC - Form 10-K

Table of Contents

adjusted to reflect the reduction in the U.S. corporate income tax rate from 35 percent to 21 percent, resulting in a \$0.1 million decrease in income tax expense for the year ended December 31, 2017 and a corresponding \$0.1 million reduction in net deferred tax liabilities as of December 31, 2017.

Transition Tax on Foreign Earnings

The Company utilized foreign tax credits of \$0.5 million for the year ended December 31, 2017 to offset the estimated one-time transition tax on indefinitely reinvested and unrepatriated foreign earnings. The determination of the transition tax requires further analysis regarding the amount and composition of the Company's historical foreign earnings, the amount of foreign tax credits available, and the ability to utilize certain foreign tax credits, which is expected to be completed in 2018.

The adjustments to the deferred tax assets and liabilities and the liability for the transition tax on indefinitely reinvested foreign earnings, including the analysis of our ability to fully utilize foreign tax credits associated with the transition tax, are provisional amounts estimated based on information reviewed as of December 31, 2017. As we complete our analysis of the Tax Act, review all information, collect and prepare necessary data, and interpret any additional guidance, we may make adjustments to the provisional amounts that we have recorded as of December 31, 2017 that may materially impact our provision for income taxes. Any subsequent adjustment will be recorded in the quarter of 2018 when the analysis is completed.

The pre-tax income from continuing operations on which the provision for income taxes was computed is as follows (in thousands):

	2017	For the Years Ended December 31,		2015
		2016		
Domestic	\$ (4,168)	\$ (2,928)	\$ (2,948)	\$ (2,948)
Foreign	8,105	7,820	7,159	7,159
Total	\$ 3,937	\$ 4,892	\$ 4,211	\$ 4,211

The expense (benefit) from continuing operations for income taxes consists of the following (in thousands):

	2017	For the Years Ended December 31,		2015
		2016		
Current:				
Federal	\$ (108)	\$ (112)	\$ 789	\$ 789
Foreign	1,998	1,483	1,174	1,174

Edgar Filing: EVOLVING SYSTEMS INC - Form 10-K

Total	\$	1,421	\$	1,457	\$	915
-------	----	-------	----	-------	----	-----

As of December 31, 2017, 2016 and 2015 we had no Federal NOL carryforwards remaining. As of December 31, 2017 and 2016, we had state NOL s of approximately \$28.9 million and \$17.5 million, respectively. The state NOL carryforwards expire at various times beginning in 2018 and ending in 2036. In addition, we have research and experimentation credit carryforwards of approximately \$0.3 million which may expire in 2018 and Alternative Minimum Tax (AMT) credits of \$0.8 million. For tax years beginning after 2017 and before 2022, the AMT credit is refundable in an amount equal to 50% of excess of the credit for the tax year over the amount of the credit allowable for the year against regular tax liability.

In our U.S. Federal income tax returns we historically deducted income taxes paid to various countries. In our 2014 U.S. Federal income tax return we had \$2.3 million of NOL carryforwards. Our income tax calculations have historically been under the regular and AMT regulations found in U.S. tax laws. The U.S. tax system contains rules to alleviate the burden of double taxation on income generated in foreign countries and subject to tax in such countries. The U.S. allows for either a deduction or credit of such foreign taxes against U.S. taxable income. An election to either claim a deduction or credit on such foreign income taxes can be made

Table of Contents

each tax year, independent from elections made in other years. A credit reduces a company's actual U.S. income tax on a dollar-for-dollar basis, while a deduction reduces only the company's income subject to tax. We made a comparison of our foreign dividends paid by our foreign subsidiary for which we deducted foreign taxes claimed versus claiming a Foreign Tax Credit (FTC) on the dividend paid by the foreign subsidiary. The dividends received were grossed-up with its corresponding foreign taxes. The U.S. law requires the offset of taxable income with NOL prior to applying the FTC rules. We determined it was beneficial for the company to gross-up the foreign dividends paid by the foreign subsidiary for the years 2012 through 2014 and make the election to claim a FTC. By doing so we fully utilized our December 31, 2014, \$2.3 million balance of the federal NOL. As the election to claim the foreign tax credit or deduction is made on an annual basis, we intend to compare benefits to either claim a deduction or foreign tax credit on an annual basis. The company had approximately \$4.9 million of FTCs to carryforward into 2017 and subsequent years as a deferred tax asset. As of December 31, 2017, our FTC deferred tax asset balance was approximately \$4.7 million.

The Company used the incremental approach to recognizing excess tax benefits associated with equity compensation. Our federal NOLs were primarily windfall excess tax benefit related to stock compensation expense, the benefit of which, if realized, will be an increase to Additional Paid-in Capital (APIC) as opposed to a reduction in tax expense. Due to the aforementioned election to claim a FTC, during the year 2015 \$0.8 million of the federal NOL was realized, with a corresponding increase in additional paid-in capital. We adopted ASU 2016-09, Compensation - Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting during the first quarter of 2017. This update simplifies several aspects of the accounting for share-based payment transactions, including the income tax consequences, classification of awards as either equity or liabilities and classification on the statement of cash flows. During the year ended December 31, 2017, amounts recorded related to excess tax deficiencies or benefits were immaterial. Additionally, the Company elected to recognize forfeitures as they occur rather than estimating them at the time of grant. The Company adopted the provisions of ASU 2016-09 related to changes on the Consolidated Statements of Cash Flows on a retrospective basis. As a result, we no longer classify excess tax benefits as a financing activity, which increased net cash provided by operating activities and reduced net cash provided by financing activities for fiscal years ended December 31, 2016 and 2015 there was no material effect. Additionally, employee taxes paid for shares withheld for income taxes are classified within financing activities on the Consolidated Statements of Cash Flows, which is consistent with our accounting policy prior to the adoption of ASU 2016-09. For the years prior to 2017, the Company used the incremental approach to recognizing excess tax benefits associated with equity compensation. At December 31, 2014 our \$2.3 million of federal NOLs were primarily windfall excess tax benefit related to stock compensation expense, the benefit of which, if realized, was an increase to Additional Paid-in Capital (APIC) as opposed to a reduction in tax expense. Due to the aforementioned election to claim a FTC, during the years ended December 31, 2016 and 2015, \$1.5 million and \$0.8 million of the federal NOL was realized respectively, with a corresponding increase in additional paid-in capital.

Deferred tax assets and liabilities reflect the net tax effects of temporary differences between the carrying amount of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. Significant components of our deferred tax assets and liabilities are as follows (in thousands):

	As of December 31,	
	2017	2016
Deferred tax assets:		
Foreign tax credits carryforwards	\$ 4,731	\$ 4,360
Net operating loss carryforwards - State	914	544
Research and development credits	303	303
Equity compensation	570	561
AMT credit	770	770

Edgar Filing: EVOLVING SYSTEMS INC - Form 10-K

Depreciable assets	33	71
Intangibles		
Accrued liabilities and reserves	66	124
Total deferred tax assets	7,387	6,733
Deferred tax liabilities:		
Intangibles	(1,045)	(1,339)
Undistributed foreign earnings		(662)
Unrealized gains on investments		
Accrued liabilities and reserves	(120)	
Depreciable assets		
Total deferred tax liability	(1,165)	(2,001)
Net deferred tax assets, before valuation allowance	6,222	4,732
Valuation allowance	(5,948)	(4,732)
Net deferred tax asset	\$ 274	\$

Edgar Filing: EVOLVING SYSTEMS INC - Form 10-K

Table of Contents

In conjunction with the acquisition of Evolving Systems Labs in October 2013, we recorded certain identifiable intangible assets. We established a deferred tax asset of \$0.1 million at the acquisition date for the expected difference between what would be expensed for financial reporting purposes and what would be deductible for income tax purposes. In September 2015, we established a deferred tax liability of \$1.8 million as a result of the acquisition of Evolving Systems NC. In September 2017, we established a deferred tax liability of \$0.3 million as a result of the acquisition of the Lumata Entities. As of December 31, 2017 and 2016, there was a net deferred tax liability of (\$0.8) million and a net deferred tax liability of (\$1.3) million, respectively. This net deferred tax liability will be recognized as the identifiable intangibles are amortized.

We maintain a valuation allowance on the domestic net deferred tax asset other than AMT credits, as we have determined it is more likely than not that we will not realize our domestic deferred tax assets. Such assets primarily consist of certain net state operating loss carryforwards research and development credits, foreign tax credits. We assessed the realizability of our domestic deferred tax assets using all available evidence. In particular, we considered both historical results and projections of profitability for the reasonably foreseeable future periods. We are required to reassess our conclusions regarding the realization of our deferred tax assets at each financial reporting date. A future evaluation could result in a conclusion that all or a portion of the valuation allowance is no longer necessary which could have a material impact on our results of operations and financial position.

The benefit for income taxes differs from the amount computed by applying the U.S. federal income tax rate of 34% to income before income taxes as follows (in thousands):

	2017	For the Years Ended December 31,		2015		
		2016				
U.S. federal income tax expense at statutory rates	\$	1,776	\$	1,854	\$	2,392
State income tax expense, net of federal impact		22		54		
Foreign Tax Credit		(848)		(874)		(3,667)
Foreign rate differential		(1,312)		(1,331)		(449)
Foreign deemed dividends		1,311		1,515		939
Undistributed foreign earnings		0		0		(221)
Change in valuation allowance		844		517		2,415
Research and development expenses		(305)		(604)		(1,096)
Foreign taxes		18		0		314
Section 78 Gross-UP		311		457		371
US Tax Reform		(108)		0		0
Permanent differences and other, net		(288)		(131)		(83)
Total tax expense	\$	1,421	\$	1,457	\$	915

The Company recognizes the tax benefit from an uncertain tax position when it determines that it is more likely than not that the position would be sustained upon examination by taxing authorities.

As of December 31, 2017 and 2016, we had no liability for unrecognized tax benefits. We do not believe there will be any material changes to our unrecognized tax positions over the next twelve months. Interest and penalties related to income tax liabilities are included as a component of income tax expense (benefit) in the accompanying statements of operations.

Edgar Filing: EVOLVING SYSTEMS INC - Form 10-K

Our income taxes payable may be reduced by the AMT tax benefits from employee stock plan awards. We had no net excess tax benefits from employee stock plan awards for the years ended December 31, 2017 and 2016, which would be reflected as an increase to additional paid-in capital.

We conduct business globally and, as a result, Evolving Systems Inc. or one or more of our subsidiaries file income tax returns in the U.S. federal jurisdiction and various state and foreign jurisdictions. In the normal course of business, we are subject to examination by taxing authorities throughout the world, namely the United Kingdom, Germany and India. Although carryovers can always be subject to review by taxing authorities, we are no longer subject to U.S. federal, state and local, or non-U.S. income tax examinations for years before 2013.

Table of Contents

Two Indian subsidiaries of SSM were acquired pursuant to the terms of the Agreement and Plan of Merger dated September 30, 2015. We have reason to believe there is uncertainty related to the lack of historical US International reporting for these two foreign subsidiaries, and are in the process of determining whether either or both of these subsidiaries are controlled foreign corporations (CFCs) within the meaning of the Internal Revenue Code and related Regulations, or if a check-the-box election has taken place to effectively treat one or both of these subsidiaries as disregarded entities for US federal tax reporting purposes. The Company is in the process of obtaining pertinent information to assess the degree of uncertainty and to quantify related costs or liabilities.

NOTE 7 STOCKHOLDERS EQUITY

Common Stock Dividends

Our Board of Directors declared a first quarter cash dividend of \$0.11 per share on March 15, 2016, which was paid April 1, 2016 to stockholders of record March 28, 2016. On May 3, 2016, our Board of Directors declared a second quarter cash dividend of \$0.11 per share which was paid July 1, 2016, to stockholders of record June 3, 2016. In June of 2016, our Board of Directors suspended out quarterly dividends. There were no accrued dividends as of December 31, 2017 and 2016.

Any determination to declare a future quarterly dividend, as well as the amount of any cash dividend which may be declared, will be based on our financial position, earnings, earnings outlook and other relevant factors at that time, including applicable limits under our term loan facility or any other credit facility then in effect.

Treasury Stock

Beginning on May 20, 2011, and continuing through December 31, 2014, we had the ability through our stock purchase program to re-purchase our common stock at prevailing market prices either in the open market or through privately negotiated transactions up to \$5.0 million. The size and timing of such purchases, if any, was based on market and business conditions as well as other factors. We were not obligated to purchase any shares. The re-purchase program expired on December 31, 2014.

From the inception of the plan through December 31, 2014, we purchased 178,889 shares of our common stock for \$1.3 million or an average price of \$6.97 per share.

Certain Anti-Takeover Provisions/Agreements with Stockholders

Our restated certificate of incorporation allows the board of directors to issue up to 2,000,000 shares of preferred stock and to determine the price, rights, preferences and privileges of those shares without any further vote or action by our stockholders. The rights of the holders of our

Edgar Filing: EVOLVING SYSTEMS INC - Form 10-K

common stock will be subject to, and may be adversely affected by, the rights of the holders of any preferred stock that may be issued in the future. Issuance of preferred stock, while providing desired flexibility in connection with possible acquisitions and other corporate purposes could make it more difficult for a third party to acquire a majority of our outstanding voting stock. As of December 31, 2017 and December 31, 2016, no shares of preferred stock were outstanding.

In addition, we are subject to the anti-takeover provisions of Section 203 of Delaware General Corporation Law which prohibit us from engaging in a business combination with an interested stockholder for a period of three years after the date of the transaction in which the person became an interested stockholder, unless the business combination is approved in the prescribed manner. The application of Section 203 may have the effect of delaying or preventing changes in control of our management, which could adversely affect the market price of our common stock by discouraging or preventing takeover attempts that might result in the payment of a premium price to our stockholders.

NOTE 8 SHARE-BASED COMPENSATION

We account for stock-based compensation by applying a fair-value-based measurement method to account for share-based payment transactions with employees and directors, and record compensation cost for all stock awards granted after January 1, 2006 and awards modified, repurchased, or cancelled after that date, using the modified prospective method. We record compensation costs associated with the vesting of unvested options on a straight-line basis over the vesting period. We recognized \$0.7 million, \$0.3 million and \$0.3 million for the years ended December 31, 2017, 2016 and 2015, respectively, of compensation expense in the consolidated statements of operations, with respect to our stock-based compensation plans. The following table summarizes stock-based compensation expenses recorded in the statement of operations (in thousands):

Table of Contents

	For the Years Ended December 31,		
	2017	2016	2015
Cost of revenue, excluding depreciation and amortization	\$ 26	\$ 39	\$ 82
Sales and marketing	28	28	36
General and administrative	611	119	112
Product development	77	73	87
Total share based compensation	\$ 742	\$ 259	\$ 317

Stock Option/Incentive Plans

In June 2007, our stockholders approved the 2007 Stock Incentive Plan (the "2007 Stock Plan") with a maximum of 1,000,000 shares reserved for issuance. In June 2010, our stockholders approved an amendment to the 2007 Stock Plan which increased the maximum shares that may be awarded under the plan to 1,250,000. In June 2013, our stockholders approved an amendment to the 2007 Stock Plan which increased the maximum shares that may be awarded under the plan to 1,502,209. In June 2015, our stockholders approved an amendment to the 2007 Stock Plan which increased the maximum shares that may be awarded under the plan to 2,002,209. Awards permitted under the 2007 Stock Plan include: Stock Options, Stock Appreciation Rights, Restricted Stock, Restricted Stock Units, Performance Awards and Other Stock-Based Awards. Awards issued under the 2007 Stock Plan are at the discretion of the Board of Directors. As applicable, awards are granted with an exercise price equal to the closing price of our common stock on the date of grant, generally vest over four years for employees and one year for directors and, with respect to stock option grants, expire no more than ten years from the date of grant. At December 31, 2016, there were approximately 0.3 million shares available for grant under the 2007 Stock Plan, there were no shares available for grant at December 31, 2017. Of the shares available as of December 31, 2016 0.2 million shares had been reserved for acquisitions. At December 31, 2017 and 2016, 0.7 million and 0.7 million options and restricted shares were issued and outstanding under the 2007 Stock Plan, respectively.

In June 2016, our stockholders approved the 2016 Stock Incentive Plan (the "2016 Stock Plan") with a maximum of 250,000 shares reserved for issuance. In June 2017, our stockholders approved an amendment to the 2016 Stock Plan which increased the maximum shares that may be awarded under the plan to 650,000 Awards permitted under the 2016 Stock Plan include: Stock Options, Stock Appreciation Rights, Restricted Stock, Restricted Stock Units, Performance Awards and Other Stock-Based Awards. Awards issued under the 2016 Stock Plan are at the discretion of the Board of Directors. As applicable, awards are granted with an exercise price equal to the closing price of our common stock on the date of grant, generally vest over four years for employees and three years for an initial grant and one year for subsequent grants for directors and expire no more than ten years from the date of grant. At December 31, 2017 and December 31, 2016, 0.6 million and 0 options and restricted shares were issued and outstanding under the 2016 Stock Plan, respectively. At December 31, 2017 and December 31, 2016, there were approximately 0.1 million and 0.3 million shares available for grant under the 2016 Stock Plan.

During the year ended December 31, 2017 we awarded a total of 622,000 shares of restricted stock to members of our senior management. No shares of restricted stock were awarded during the year ended December 31, 2016. During the years ended December 31, 2017 and 2016, approximately 5,000 and 5000 shares of restricted stock vested, respectively. There were forfeitures of approximately 34,500 shares of restricted stock during year ended December 31, 2017 and no forfeitures during the year ended December 31, 2016. The fair market value for stock-based compensation expense is equal to the closing price of our common stock on the date of grant. The restrictions on the stock award are released generally over four years for senior management and over one year for board members. Stock-based compensation expense includes \$0.6 million, \$30,000 and \$8,000 for the years ended December 31, 2017, 2016 and 2015, respectively for restricted stock. The shares of restricted stock granted to our Board of Directors and senior management team in 2017 includes 242,800 shares subject to achievement of annual performance goals established by our Board of Directors. The restricted shares vest over four years. . Of the restrictions on the stock awards granted during the six months ended June 30, 2017, 20% will be released in January 2018, and 10% annually beginning on the one year anniversary of their offering thereafter for four years. The remaining 40% will be released evenly over four years beginning in 2018 contingent upon the attainment of annual performance goals

Edgar Filing: EVOLVING SYSTEMS INC - Form 10-K

established by our Board of Directors. Of the restrictions on the stock awards granted during the sixth months ended December 31, 2017, one-fourth will be released on the one-year anniversary of the date of the grant and the balance will be released quarterly over a three year period. These shares are included in the April 2, 2018 number of Common Stock outstanding shares referenced on the cover of this Annual Report on Form 10-K.

The weighted-average assumptions used in the fair value calculations are as follows:

	2017	For the Years Ended December 31,		2015
		2016		
Expected term (years)	6.4	6.0		6.0
Risk-free interest rate	2.15%	1.32%		1.37%
Expected volatility	38.86%	36.81%		42.01%
Expected dividend yield	%	7.2%		6.4%

Edgar Filing: EVOLVING SYSTEMS INC - Form 10-K

Table of Contents

The following is a summary of stock option activity under the stock option plans for the years ended December 31, 2017 and 2016:

	Number of Shares (in thousands)	Weighted- Average Exercise Price	Weighted- Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value (in thousands)
Options outstanding at December 31, 2015	834	\$ 5.97	6.94	\$ 957
Options granted	158	\$ 5.31		
Less options forfeited and cancelled	(196)	\$ 7.47		
Less options exercised	(112)	\$ 1.14		
Options outstanding at December 31, 2016	684	\$ 6.17	7.30	\$ 139
Options granted	370	\$ 4.53		
Less options forfeited and cancelled	(233)	\$ 5.50		
Less options exercised	(108)	\$ 2.46		
Options outstanding at December 31, 2017	713	\$ 5.71	8.23	\$ 128
Options exercisable at December 31, 2017	283	\$ 6.88	6.60	\$ 69

The following is a summary of stock options outstanding under the plans as of December 31, 2017:

Range of Exercise Prices	Stock Options Outstanding			Stock Options Exercisable	
	Number of Shares (in thousands)	Weighted Avg. Remaining Contractual Life (years)	Weighted Avg. Exercise Price	Number of Shares (in thousands)	Weighted Avg. Exercise Price
\$ 0.01 - \$ 4.46	30	2.34	\$ 2.43	30	\$ 2.43
\$ 4.47 - \$ 4.55	270	9.84	\$ 4.50		\$
\$ 4.56 - \$ 5.90	98	8.91	\$ 5.02	26	\$ 5.48
\$ 5.91 - \$ 6.23	189	7.75	\$ 6.00	109	\$ 6.00
\$ 6.24 - \$ 10.90	126	6.44	\$ 9.20	118	\$ 9.19
	713	8.24	\$ 5.71	283	\$ 6.89

The weighted-average grant-date fair value of stock options granted during the years ended December 31, 2017, 2016 and 2015 was \$1.87, \$0.84 and \$1.60 respectively.

As of December 31, 2017, there were approximately \$2.9 million of total unrecognized compensation costs related to unvested stock options and restricted stock. These costs are expected to be recognized over a weighted average period of 3.2 years.

The total intrinsic value of stock option exercises for the years ended December 31, 2017, 2016 and 2015 was \$0.1 million, \$0.3 million and \$0.3 million, respectively. The total fair value of stock awards vested during the years ended December 31, 2017, 2016 and 2015 was \$0.3 million.

The deferred income tax benefits from stock options expense related to Evolving Systems U.K. totaled approximately \$11,000, \$11,000 and \$19,000 for the years ended December 31, 2017, 2016 and 2015, respectively.

Cash received from stock option exercises was \$30,000, \$0.1 million and \$0.2 million for the years ended December 31, 2017, 2016 and 2015, respectively. During the year ended December 31, 2017, we had net settlement exercises of stock options,

Table of Contents

whereby the optionee did not pay cash for the options but instead received the number of shares equal to the difference between the exercise price and the market price on the date of exercise. Net settlement exercises during the year ended December 31, 2017, resulted in approximately 18,951 shares issued and 75,327 options cancelled in settlement of shares issued.

Net settlement exercises during the year ended December 31, 2016, resulted in approximately 32,502 shares issued and 93,782 options cancelled in settlement of shares issued. There were no net settlement exercises during the year ended December 31, 2015.

Employee Stock Purchase Plan

Under the Employee Stock Purchase Plan (ESPP), we are authorized to issue up to 550,000 shares of our common stock to full-time employees, nearly all of whom are eligible to participate. Under the terms of the ESPP, employees may elect to have up to 15% of their gross compensation withheld through payroll deduction to purchase our common stock, capped at \$25,000 annually and no more than 10,000 shares per offering period. The purchase price of the stock is 85% of the lower of the market price at the beginning or end of each three-month participation period. As of December 31, 2017, there were approximately 50,000 shares available for purchase. For the years ended December 31, 2017, 2016 and 2015, we recorded compensation expense of \$600, \$2,000 and \$13,000, respectively, associated with grants under the ESPP which includes the fair value of the look-back feature of each grant as well as the 15% discount on the purchase price. This expense fluctuates each period primarily based on the level of employee participation.

	For the Years Ended December 31,		
	2017	2016	2015
Expected term (years)	0.25	0.25	0.25
Risk-free interest rate	0.97%	0.26%	0.07%
Expected volatility	41.72%	41.65%	39.58%
Expected dividend yield	0.0%	6.7%	6.3%

Cash received from employee stock plan purchases was approximately \$2,000, \$7,000 and \$53,000 for the years ended December 31, 2017, 2016 and 2015, respectively. We issued shares related to the ESPP of approximately 800, 2,000 and 9,000 for the years ended December 31, 2017, 2016 and 2015, respectively.

NOTE 9 BENEFIT PLANS

We have established a defined contribution retirement plan for our employees under section 401(k) of the Internal Revenue Code (the 401(k) Plan) that is available to all U.S. employees 21 years of age or older with a month of service. Beginning in 2012, we adopted a Safe Harbor 401(k) requiring us to contribute 3% of the employee's compensation for each eligible employee, regardless of whether the employee chooses to participate in the plan. All employee contributions are fully vested immediately and employer contributions vest over a period of three years. Evolving Systems U.K. has established a defined contribution pension scheme that is available to all employees in their first full month of employment. Employees may contribute a percentage of their earnings, the amount of which is dependent upon the age of the employee, not to exceed the maximum statutory contribution amount. We match 5% of employee contributions. All contributions are immediately vested in their entirety.

Edgar Filing: EVOLVING SYSTEMS INC - Form 10-K

During 2017, 2016 and 2015, we recorded a consolidated expense of \$0.2 million, \$0.3 million and \$0.4 million, under the aforementioned plans, respectively.

NOTE 10 EARNINGS PER SHARE

Basic earnings per share (EPS) is computed by dividing net income or loss available to common stockholders by the weighted average number of shares of common stock outstanding during the period. Diluted EPS is computed using the weighted average number of shares of common stock outstanding, plus all potentially dilutive common stock equivalents using the treasury stock method. Common stock equivalents consist of stock options. The following is the reconciliation of the numerators and denominators of the basic and diluted EPS computations (in thousands except per share data):

	For the Years Ended December, 31		
	2017	2016	2015
Basic income per share:			
Net income	\$ 2,516	\$ 3,435	\$ 3,296
Basic weighted average shares outstanding	11,934	11,845	11,693
Basic income per share:			
Net Income per share	\$ 0.21	\$ 0.29	\$ 0.28
Diluted income per share:			
Net income	\$ 2,516	\$ 3,435	\$ 3,296
Weighted average shares outstanding	11,934	11,845	11,693
Effect of dilutive securities - options	47	116	242
Diluted weighted average shares outstanding	11,981	11,961	11,935
Diluted income per share:			
Net Income per share	\$ 0.21	\$ 0.29	\$ 0.28

Table of Contents

Weighted average options to purchase approximately 0.4 million, 0.5 million and 0.3 million shares of common stock equivalents were excluded from the computation of diluted weighted average shares outstanding for the years ended December 31, 2017, 2016 and 2015, respectively, because the effect would have been anti-dilutive since their exercise prices were greater than the average market value of our common stock for the period.

NOTE 11 COMMITMENTS AND CONTINGENCIES**(a) Lease Commitments**

We lease office and operating facilities under non-cancelable operating leases. Current facility leases include our headquarters in Englewood, Colorado, New York, New York, Durham, North Carolina, Bangalore and Kolkata, India, Kuala Lumpur, Malaysia, Grenoble, France, and Cluj-Napoca, Romania. Rent expense was \$0.6 million for the years ended December 31, 2017, 2016 and 2015, respectively. Rent expense is net of sublease rental income. There were no sublease rental income for the years ended December 31, 2017, 2016 and 2015.

Our headquarters facility terminated on November 30, 2017 at the end of the lease term. Any leasehold improvements had been fully amortized and equipment disposed of related to the office closure was fully depreciated. We entered into a monthly lease for new office facilities in Englewood Colorado to serve as our headquarters. We account for the effect of any free rent or escalating lease payments as if the lease rate were consistent over the lease term. Future minimum commitments under non-cancelable operating leases gross of sublease payments as of December 31, 2017 are as follows (in thousands):

	Operating Leases	
2018	\$	487
2019		140
2020		130
2021		92
2022		83
Thereafter		296
Total minimum lease payments	\$	1,228

(b) Other Commitments

As permitted under Delaware law, we have agreements with officers and directors under which we agree to indemnify them for certain events or occurrences while the officer or director is, or was, serving at our request in this capacity. The term of the indemnification period is indefinite. There is no limit on the amount of future payments we could be required to make under these indemnification agreements; however, we maintain Director and Officer insurance policies, as well as an Employment Practices Liability Insurance Policy, that may enable us to recover a portion of any amounts paid. As a result of our insurance policy coverage, we believe the estimated fair value of these indemnification agreements is minimal. Accordingly, we did not record any liabilities for these agreements as of December 31, 2017 and 2016.

Edgar Filing: EVOLVING SYSTEMS INC - Form 10-K

We enter into standard indemnification terms with customers and suppliers, in the ordinary course of business, for third party claims arising under our contracts. In addition, as we may subcontract the development of deliverables under customer contracts, we could be required to indemnify customers for work performed by subcontractors. Depending upon the nature of the indemnification, the potential amount of future payments we could be required to make under these indemnification agreements may be unlimited. We may be able to recover damages from a subcontractor or other supplier if the indemnification results from the subcontractor's or

Table of Contents

supplier's failure to perform. To the extent we are unable to recover damages from a subcontractor or other supplier, we could be required to reimburse the indemnified party for the full amount. We have never incurred costs to defend lawsuits or settle claims relating to an indemnification. As a result, we believe the estimated fair value of these agreements is minimal. We did not record any liabilities for these agreements as of December 31, 2017 and 2016.

Our standard license agreements contain product warranties that the software will be free of material defects and will operate in accordance with the stated requirements for a limited period of time. The product warranty provisions require us to cure any defects through any reasonable means. We believe the estimated fair value of the product warranty provisions in the license agreements in place with our customers is minimal. Accordingly, we did not record any liabilities for these product warranty provisions as of December 31, 2017 and 2016.

Our software arrangements generally include a product indemnification provision whereby we will indemnify and defend a customer in actions brought against the customer for claims that our products infringe upon a copyright, trade secret, or valid patent of a third party. We have not historically incurred any significant costs related to product indemnification claims. Accordingly, we did not record any liabilities for these indemnification provisions as of December 31, 2017 and 2016.

In connection with our acquisition of Telespree on October 24, 2013, we agreed to make a cash payment of \$0.5 million on the one-year anniversary of the closing. This payment was subject to reduction for certain claims and has not been paid to date. We have made claims against this payment which are currently under dispute. Once settled the final payment will be released.

In connection with our acquisition of SSM on September 30, 2015, we agreed to make a cash payment of \$0.3 million on the one-year anniversary of the closing. This payment is subject to reduction for certain claims and has not been paid to date. Once settled the final payment will be released.

In connection with our acquisition of BLS on July 3, 2017, we agreed to an earnout equal to 50% of BLS based revenue over \$4.8 million per year for 3 years after the closing date. The Company also agreed to guarantee EVOL BLS obligations under the Purchase Agreement. We have estimated the earnout to be approximately \$0.4 million as of the year ended December 31, 2017.

(c) **Litigation**

We are involved in various legal matters arising in the normal course of business. Losses, including estimated costs to defend, are recorded for these matters to the extent they were probable of loss and the amount of loss could be reasonably estimated. We do not believe that any such matters, either individually or in the aggregate, will have a material impact on our results of operations and financial position.

NOTE 12 SEGMENT INFORMATION

Edgar Filing: EVOLVING SYSTEMS INC - Form 10-K

We define operating segments as components of our enterprise for which separate financial information is reviewed regularly by the chief operating decision-makers to evaluate performance and to make operating decisions. We have identified our Chief Executive Officer and Senior Vice President of Finance decision-makers (CODM). These chief operating decision makers review revenue by segment and review overall results of operations.

We currently operate our business as one operating segment which includes two revenue types: license fees revenue and services revenue (as shown on the consolidated statements of operations). License fees revenue represents the fees received from the license of software products. Services revenue includes services directly related to the delivery of the licensed products, such as fees for custom development, integration services, SaaS service, managed services, annual support fees, recurring maintenance fees, fees for maintenance upgrades and warranty services. Warranty services that are similar to software maintenance services are typically bundled with a license sale. Total assets by segment have not been disclosed as the information is not available to the chief operating decision-makers.

Revenue information by segment was as follows (in thousands):

	For the Years Ended December 31,		
	2017	2016	2015
Revenue			
License fees	\$ 3,438	\$ 2,873	\$ 3,161

Foreign currency exchange (gain) loss	1,137	552	6
Income from operations before income taxes	\$ 3,937	\$ 4,892	\$ 4,211

Table of Contents**Geographic Regions**

We are headquartered in Englewood, a suburb of Denver, Colorado. We use customer locations as the basis for attributing revenue to individual countries. We provide products and services on a global basis through our offices in Colorado, North Carolina and our U.K.-based Evolving Systems U.K. subsidiary. Additionally, personnel in Bangalore and Kolkata, India, provide software development services and support to our global operations. Financial information relating to operations by geographic region exceeding the threshold (defined as contributing at least 10%) of revenue from operations is as follows (in thousands):

Table of Contents**NOTE 13 RESTRUCTURING**

During the second half of 2017, we undertook a reduction in workforce involving the termination of employees resulting in an expense of \$0.3 million primarily related to severance for the affected employees. The reduction in workforce was related to the consolidations of duplicative functions and alignment of staff with ongoing business activity as a result of the acquisition of EVOL BLS in the third quarter of 2017. During the first and second quarters of 2016, we undertook a reduction in workforce involving the termination of employees resulting in an expense of \$0.9 million and \$0.1 million, respectively, primarily related to severance for the affected employees. The reduction in workforce was related to the consolidation of duplicative functions and alignment of staff with ongoing business activity as a result of the acquisition of Evolving Systems NC in the third quarter of 2015. Restructuring expense of \$0.5 million was recorded for the year ending December 31, 2015, due to severance for a reduction in workforce was related to the acquisition of Evolving Systems NC in the fourth quarter 2015.

There was no restructuring liability as of December 31, 2017 and 2016, respectively.

NOTE 14 QUARTERLY FINANCIAL INFORMATION (UNAUDITED)

Quarterly financial information is as follows (in thousands, except per share data):

	First Quarter	Second Quarter	Third Quarter	Fourth Quarter

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of disclosure controls and procedures. We maintain disclosure controls and procedures, as such term is defined in Rule 13a-15(e) and 15d-15(f) under the Securities Exchange Act of 1934 (the Exchange Act), that are designed to provide reasonable assurance that information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Senior Vice President of Finance, as appropriate, to allow timely decisions regarding required disclosure.

Our management, with the participation of the Chief Executive Officer and the Senior Vice President of Finance, has evaluated the effectiveness of our disclosure controls and procedures as of the end of the period covered by this Annual Report on Form 10-K. Based on that evaluation, our Chief Executive Officer and Senior Vice President of Finance have concluded that our disclosure controls and procedures were effective as of the end of such period.

In designing and evaluating our disclosure controls and procedures, management recognized that disclosure controls and procedures, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the disclosure controls and procedures are met. Additionally, in designing disclosure controls and procedures, we are required to apply judgment in evaluating the cost-benefit relationship of possible disclosure controls and procedures. The design of any disclosure controls and procedures also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions.

Management's report on internal control over financial reporting. Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rule 13a-15(f). All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation. Under the supervision and with the participation of our management, including our Chief Executive Officer and Senior Vice President of Finance, we conducted an evaluation of the effectiveness of our internal control over financial reporting based on the 2013 framework set forth in the report entitled Internal Control Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The COSO framework summarizes each of the components of a company's internal control system, including (i) the control environment, (ii) risk assessment, (iii) control activities, (iv) information and communication, and

(v) monitoring.

Based on our evaluation under the framework in Internal Control – Integrated Framework, our management concluded that our internal control over financial reporting was effective as of December 31, 2017.

This Annual Report on Form 10-K does not include an attestation report of our independent registered public accounting firm regarding internal control over financial reporting. Management’s report was not subject to attestation by our independent registered public accounting firm pursuant to rules of the Securities and Exchange Commission that permit us to provide only management’s report in this Annual Report on Form 10-K.

Changes in internal control over financial reporting. During the quarter ended December 31, 2017, there was no change in our internal control over financial reporting or in other factors that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.
