SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, D.C. 20549

**FORM 10-K**

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF  
1934

For the fiscal year ended December 31, 2013

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF  
1934

For the transition period from \_\_\_\_\_ to \_\_\_\_\_

Commission File Number: 000-30371

**DYNARESOURCE, INC.**

(Exact name of Registrant as specified in its charter)

Delaware                      94-1589426  
(State of Incorporation) (Employer Identification No.)

Edgar Filing: DYNARESOURCE INC - Form 10-K

222 W. Las Colinas Blvd., Suite 744 East Tower Irving, Texas 75039  
(Address of principal executive offices) (Zip Code)

Registrant's telephone number: Phone: (972) 868-9066; Fax: (972) 868-9067

Securities registered pursuant to Section 12(b) of the Act:

None

Securities registered pursuant to Section 12(g) of the Act:

Common Stock: \$0.01 Par Value

(Title of Class)

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes [ ] No [X]

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act.

Yes [ ] No [X]

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes  No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes  No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§ 229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by a check mark whether the Registrant is a large filer, an accredited filer, non-accredited filer, or a smaller reporting company. See the definitions of "large accredited filer", "accredited filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accredited filer  Accredited filer

Non-accredited filer  Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act).

Yes  No

The aggregate market value of common stock, par value \$0.01 per share, held by non-affiliates of the registrant, based on the average bid and asked prices of the common stock on December 31, 2013 (the last business day of the

registrant's most recently completed fiscal year) was approximately \$27 million. For purposes of this computation, all officers, directors and 10% beneficial owners of the registrant are deemed to be affiliates. Such determination should not be deemed an admission that such officers, directors or 10% beneficial owners are, in fact, affiliates of the registrant.

Number of common shares outstanding at April 15, 2014 11,052,008

## **FORWARD-LOOKING STATEMENTS**

This annual report on Form 10-K includes forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, which we refer to in this annual report as the Securities Act, and Section 21E of the Securities Exchange Act of 1934, as amended, which we refer to in this annual report as the Exchange Act. Forward-looking statements are not statements of historical fact but rather reflect our current expectations, estimates and predictions about future results and events. These statements may use words such as “anticipate,” “believe,” “estimate,” “expect,” “intend,” “predict,” “project” and similar expressions as they relate to us or our management. When we make forward-looking statements, we are basing them on our management’s beliefs and assumptions, using information currently available to us. These forward-looking statements are subject to risks, uncertainties and assumptions, including but not limited to, risks, uncertainties and assumptions discussed in this annual report. Factors that can cause or contribute to these differences include those described under the headings “Risk Factors” and “Management Discussion and Analysis and Plan of Operation.”

If one or more of these or other risks or uncertainties materialize, or if our underlying assumptions prove to be incorrect, actual results may vary materially from what we projected. Any forward-looking statement you read in this annual report reflects our current views with respect to future events and is subject to these and other risks, uncertainties and assumptions relating to our operations, results of operations, growth strategy and liquidity. All subsequent written and oral forward-looking statements attributable to us or individuals acting on our behalf are expressly qualified in their entirety by this paragraph. You are cautioned not to place undue reliance on forward-looking statements, which speak only as of the date of this annual report. The Company expressly disclaims any obligation to release publicly any updates or revisions to these forward-looking statements to reflect any change in its views or expectations. The Company can give no assurances that such forward-looking statements will prove to be correct.

## **CAUTIONARY NOTE TO UNITED STATES INVESTORS - INFORMATION CONCERNING PREPARATION OF RESOURCE AND RESERVE ESTIMATES**

The Company has elected to prepare reports under the Canadian Securities Administrators’ National Instrument 43-101 “Standards of Disclosure for Mineral Projects” (“NI 43-101”). These standards are materially different from the standards generally permitted in reports filed with the United States Securities and Exchange Commission (“SEC”).

The terms “mineral reserve”, “proven mineral reserve” and “probable mineral reserve” used in this report are Canadian mining terms defined in accordance with the Canadian Institute of Mining, Metallurgy and Petroleum (the “CIM”) in the CIM Standards on Mineral Resources and Mineral Reserves, adopted by the CIM Council. These definitions differ from the definitions of those terms in Industry Guide 7 (“Guide 7”) promulgated by the SEC. Under U.S. standards, mineralization may not be classified as a “reserve” unless a determination has been made that the mineralization could be economically and legally produced or extracted at the time the reserve determination is made. Under Guide 7 standards, a “Final” or “Bankable” feasibility study is required to report reserves, the three-year historical average precious metals prices are used in any reserve or cash flow analysis to designate reserves, and the primary environmental analysis or report must be filed with the appropriate government authority. One consequence of these differences is that “reserves” calculated in accordance with Canadian standards may not be “reserves” under Guide 7 standards. U.S. investors should be aware that the Company’s properties located in Mexico do not have “reserves” as defined by Guide 7 and are cautioned not to assume that any part or all of the disclosed mineralized material will be confirmed or

converted into Guide 7 compliant “reserves”.

Under NI 43-101, we report “Measured”, “Indicated” and “Inferred” resources, which are measurements that are generally not permitted in filings made with the SEC. The estimation of measured resources and indicated resources involve greater uncertainty as to their existence and economic feasibility than the estimation of proven and probable reserves. U.S. investors are cautioned not to assume that any part of measured or indicated resources will ever be converted into economically mineable reserves. The estimation of inferred resources involves far greater uncertainty as to their existence and economic viability than the estimation of other categories of resources. It cannot be assumed that all or any part of inferred resources will ever be upgraded to a higher category. Therefore, U.S. investors are also cautioned not to assume that all or any part of inferred resources exist, or that they can be mined legally or economically.

## **PART I**

### **Item 1. Business**

#### Company

DynaResource, Inc., the Company described herein, is a Delaware corporation, with offices located at 222 W. Las Colinas Blvd., Suite 744 East Tower, Irving, Texas 75039. It can be reached by phone at (972) 868-9066 and by fax at (972) 868-9067.

#### History

The Company was incorporated in the State of California on September 28, 1937, under the name West Coast Mines, Inc. In November 1998, the Company re-domiciled from California to Delaware and changed its name to DynaResource, Inc. (aka “DynaUSA”).

The Company is in the business of acquiring, investing in, and developing precious metals properties, and the production of precious metals.

Through its 80% owned Mexican subsidiary, DynaResource de México, S.A. de C.V. (“DynaMéxico”), the Company owns a portfolio of mining concessions that currently includes its interests in the San José de Gracia Project (“SJG”) in northern Sinaloa State, Mexico. The SJG District covers 69,121 hectares (170,802 acres) on the west side of the Sierra Madre mountain range.

A wholly owned subsidiary of the Company, Mineras de DynaResource S.A. de C.V. (“MinerasDyna”), entered into an operating agreement with DynaMéxico on April 15, 2005 and, as a consequence of that agreement and subsequent amendments to that agreement, is the named exclusive operating entity for the SJG Project.

In 2005, the Company formed another wholly owned subsidiary, DynaResource Operaciones, SA de C.V. (“DynaOperaciones”). DynaOperaciones entered into a personnel management agreement with MinerasDyna and, as a consequence of that agreement, is the exclusive management company for personnel and consultants involved at the SJG Project.

At incorporation of DynaMexico, 100 shares of Fixed Capital Series “A” shares were issued with DynaUSA receiving 99 shares and Koy W. Diepholz receiving 1 share.

From January 2008 through March 2011, DynaMexico issued 100 Variable Capital Series “B” Shares to Goldgroup Resources Inc., a wholly owned subsidiary of Goldgroup Mining Inc. Vancouver, BC. (“Goldgroup”), in exchange for Goldgroup’s contributing \$18,000,000 USD to DynaMexico. At the issuance of the 100 Series B Shares to Goldgroup, it owned 50% of the outstanding capital shares of DynaMexico.

On May 17, 2013, DynaResource agreed to acquire a Certificate for 300 Series "B" Variable Capital Shares of DynaMexico, in exchange for the settlement of accounts receivable from DynaMexico in the amount of \$31,090,710 Mexican Pesos (approximately \$2.4 M USD). After the issuance and receipt of the 300 Series B Shares on June 21, 2013, DynaUSA holds 80% of the total outstanding Capital of DynaMexico. DynaMexico owns 100% of the San Jose de Gracia Project in northern Sinaloa, Mexico ("SJG", and the "SJG Property"). (See table representation of the outstanding Capital of DynaMexico below).

The exchange of shares by DynaMexico for amounts payable to DynaUSA was unanimously approved by attending shareholders at a meeting of the shareholders of DynaMexico, held on the second call for shareholder's meeting on May 17, 2013 in Mazatlan, Sinaloa, Mexico. Of the total amount of \$31,090,170 Mexican Pesos exchanged for the 300 Shares, \$150,000 Mexican Pesos was accounted for at the nominal value of \$500 Mexican Pesos per share, and the remaining balance of \$30,940,710 Mexican Pesos was accounted for as a premium for the subscription of the shares agreed to be paid by DynaUSA.

The date of issuance of the 300 Series B Share Certificate was June 21, 2013. As a result of the issuance and exchange of the 300 Variable Capital shares for amounts owed to DynaUSA, the accounts payable amount owed by DynaMexico to DynaUSA was retired in full. MinerasDyna, the 100 % owned subsidiary of DynaUSA, continues to carry an amount receivable from DynaMexico of \$2,150,000 USD at December 31, 2013, and MinerasDyna continues to make cash advances to DynaMexico under the terms of the exploitation amendment agreement ("EAA"), below.

After the issuance of the 300 Series B Variable Capital shares of DynaMexico to DynaUSA as described above, the current outstanding Capital of DynaMexico is set forth in the table below:

	Fixed Capital Series "A" Shares	Variable Capital Series "B" Shares	Total Capital Shares (Series A and B)
DynaMexico Shareholder			
DynaResource, Inc.	099	300	399
Koy W. Diepholz	001		001
Goldgroup Resources Inc.		100	100
Total Capital Issued	100	400	500

DynaResource currently owns 80% of the outstanding common shares of DynaMéxico.

On May 15, 2013, MinerasDyna entered into an Exploitation Amendment Agreement (“EAA”) with DynaMexico. The EAA grants to MinerasDyna the right to finance, explore, develop and exploit the SJG Property, in exchange for: (A) Reimbursement of all costs associated with financing, maintenance, exploration, development and exploitation of the SJG Property, which costs are to be charged and billed by MinerasDyna to DynaMexico; and, (B) After Item (A) above, the receipt by MinerasDyna of 75 % of gross receipts received by DynaMexico from the sale of all minerals produced from SJG, to the point that MinerasDyna has received 200 % of its advanced funds; and, (C) After Items (A) and (B) above; the receipt by MinerasDyna of 50 % of all gross receipts received by DynaMexico from the sale of all minerals produced from SJG, and throughout the term of the EAA; and, (D) in addition to Items (A), (B), and (C) above, MinerasDyna shall receive a 2.5 % NSR (“Net Smelter Royalty”) on all minerals sold from SJG over the term of the EAA.

The EAA is the third and latest Amendment to the original Contract Mining Services and Mineral Production Agreement (the “Operating Agreement”), which was previously entered into by MinerasDyna with DynaMexico in April 2005, wherein MinerasDyna was named the Exclusive Operating Entity at SJG. The Operating Agreement was previously amended in September 2006 (the “First Amendment”), and amended again at July 15, 2011 (the “Second Amendment”). The Term of the Second Amendment is 20 years, and the EAA provides for the continuation of the 20 Year Term from the date of the Second Amendment (July 15, 2011).

On June 17, 2013, DynaMexico received from the Secretaria de Medio Ambiente Y Recursos Naturales, the Federal Environmental Authority in Mexico (“SEMARNAT”), the approval and permission which allows for the rehabilitation and operation of the pilot mill facility at SJG (“the Semarnat-SJG Mill Permit,” and, the “Semarnat Exploitation Permit”). Under the terms of the Semarnat-SJG Mill Permit, DynaMexico will be responsible to maintain the SJG pilot mill facility, and including the adjacent tailings pond area, in compliance with the regulations described in la Norma Oficial Mexicana (“NOM-141-SEMARNAT-2003).

On September 30, 2013, DynaMexico received from the Secretaria de Medio Ambiente Y Recursos Naturales, the Federal Environmental Authority in México (“SEMARNAT”), the approval and permission which allows for the exploitation and mining activities at the San Pablo Area of SJG (“the Semarnat-SJG San Pablo Exploitation Permit” and the “Semarnat Exploitation Permit”). Under the terms of the Semarnat Exploitation Permit, DynaMéxico will be restricted to conducting exploitation activities within the San Pablo Area of SJG (as defined in the Map of the San Pablo area as submitted to Semarnat).

Subsequent to December 31, 2013, MinerasDyna entered into a 20 Year Land Lease Agreement with the Santa Maria Ejido Community surrounding San Jose de Gracia. The Land Lease Agreement is dated January 6, 2014 and continues through 2033. The Land Lease agreement covers an area of 4,399 hectares surrounding the main mineral resource

areas of SJG, and provides for annual lease payments by MinerasDyna of \$ 1,359,443 Pesos (approx. \$104,250 USD), commencing in 2014. Additionally, under the description of the 20 Year Land Lease, MinerasDyna expects to construct a Medical Facility at SJG in year 2014, and a Community Center in year 2015.

The Land Lease Agreement provides MinerasDyna with surface access to the core resource areas of SJG (4,399 hectares), and allows for all permitted mining and exploration activities from the owners of the surface rights (Santa Maria Ejido community).

Licenses and Concessions

The SJG District is comprised of 33 mining concessions covering 69,121 hectares (171,802 acres) and is located within the Sierra Madre gold-silver belt, where the majority of hydrothermal deposits in Mexico are located. The Company's concessions, all of which are formally held by DynaMéxico, are granted by the Mexican government, or acquired from previous owners. The Company's concessions are comprised of a combination of exploration concessions and development concessions, are filed in the Public Registry of Mining, and are scheduled to expire from 2028 through 2058. The concessions can be renewed prior to the expiry dates. The table below contains a listing of the mineral concessions currently held by DynaMéxico.

Under amendments to the *Mining Act* of Mexico that came into effect on December 2006, the classifications of Mining Exploration Concessions and Mining Exploitation Concessions were replaced by a single classification of Mining Concessions valid for a renewable term of 50 years, commencing from the initial issuance date. To be converted into Mining Concessions at the time these amendments came into force, former exploration and exploitation concessions had to be in good standing at the time of conversion. All of the SJG concessions were converted to 50-year Mining Concessions at the time the amendments to the Mining Act came into effect. To renew the 50-year term, Mining Concessions must be in good standing at the time application is filed. An application for renewal must be filed within 5 years prior to expiration of the term.

To maintain Mining Concessions in good standing, the registered owner must (a) pay bi-annual mining duties in advance, by January 31 and July 31 each year, (b) file assessment work reports by May 30 each year, for the preceding year (some exception rules apply), and (c) file by January 31 each year, statistical reports on exploration / exploitation work conducted for the preceding year.

Notice of Commencement of Production Activities and Annual Production Reports must be filed annually by January 31 each year for those concessions where mineral ore extraction is taking place. As a general provision, registered owners of Mining Concessions must follow environmental and labor laws and regulations in order to maintain their Mining Concessions in good standing.

As of the date of this Form 10-K, all of the 33 mining concessions comprising the SJG Property are in good standing with respect to the payment of taxes and the filing of assessment work obligations imposed by the Mining Act of Mexico and its Regulations.

(1) According to the records of the Mines Registry Office, the registered owners to 100% undivided title to the San Miguel (t.183504) mining concession are: María Trinidad Acosta Salazar (25%), Miguel López Medina (25%), Josefa González Castro (25%) and Otilia Tracy Vizcarra (25%). On October 17, 2000 and March 8, 2001 DynaMexico signed with each of Miguel Lopez Medina and Josefa Gonzalez Castro, respectively, agreements for the transfer to DynaMexico of 50% undivided title to the San Miguel (t.183504) mining concession (the “San Miguel Transfer Agreements”).

In respect to the San Miguel Transfer Agreements, DynaMexico has been advised that in order for the San Miguel Transfer Agreements to produce legal effects and be eligible for registration before the Mines Registry Office, DynaMexico is required to first obtain the legal consent to such transfers, or the written relinquishment of first rights of refusal, from María Trinidad Acosta Salazar and Otilia Tracy Vizcarra (or court-appointed estate executor).

In addition to the San Miguel Transfer Agreements, DynaMexico has entered into the following Promise to Sell and Purchase Agreements (the “San Miguel Promise to Sell and Purchase Agreements”):

(a) Promise to Sell and Purchase Agreement signed on March 8, 2001 among DynaMexico and Maria Trinidad Acosta Salazar, the registered owner to 25% undivided title to the San Miguel (t.183504) mining concession, and

(b) Promise to Sell and Purchase Agreement signed on December 15, 2000 among DynaMexico and Margarita Tracy Vizcarra, the sister of the deceased Otilia Tracy Vizcarra.

In respect to the San Miguel Promise to Sell and Purchase Agreements, DynaMexico has been advised that:

(a) with respect to the Promise to Sell and Purchase Agreement signed on March 8, 2001 among DynaMexico and Maria Trinidad Acosta Salazar, to contact Ms. María Trinidad Acosta Salazar to demand compliance with such agreement by executing the definitive transfer to DynaMexico of the 25% undivided title to the San Miguel (t.183504) mining concession registered in her name, and

(b) with respect to the Promise to Sell and Purchase Agreement signed on December 15, 2000 among DynaMexico and Margarita Tracy Vizcarra, the sister of the deceased Otilia Tracy Vizcarra, the estate of Otilia Tracy Vizcarra requires the appointment of a court-appointed executor that would be capable under Mexican law to formally grant the estate’s consent for the execution of the San Miguel Transfer Agreements, to relinquish the estate’s first rights of refusal or to request court approval for the transfer to DynaMexico of the 25% undivided interest in the San Miguel

(t.183504) mining concession registered in the name of the deceased Otilia Tracy Vizcarra.

Surface Lease Rights

In addition to the surface rights held by DynaMexico pursuant to the Mining Act of Mexico and its Regulations (*Ley Minera y su Reglamento*), MinerasDyna maintains access and surface rights to the SJG Project pursuant to the 20 year

8

Land Lease Agreement (above) The 20 Year Land Lease Agreement with the Santa Maria Ejido Community surrounding San Jose de Gracia is dated January 6, 2014 and continues through 2033. It covers an area of 4,399 hectares surrounding the main mineral resource areas of SJG, and provides for annual lease payments by MinerasDyna of \$ 1,359,443 Pesos (approx. \$104,250 USD), commencing in 2014. Additionally, under the description of the 20 Year Land Lease, MinerasDyna expects to construct a Medical Facility at SJG in year 2014, and a Community Center in year 2015.

The Land Lease Agreement provides MinerasDyna with surface access to the core resource areas of SJG (4,399 hectares), and allows for all permitted mining and exploration activities from the owners of the surface rights (Santa Maria Ejido community).

#### Property Location

The San Jose de Gracia mining property surrounds the area of San Jose de Gracia, Sinaloa State, Mexico. San Jose de Gracia is located on the west side of the Sierra Madre mountain range in the Sierra Madre Gold-Silver Belt, approximately 100 kilometers inland from Los Mochis, Sinaloa Mexico and approximately 200 kilometers north of Mazatlan, Sinaloa.

#### Access

The San José de Gracia Project can be accessed by road, via a sealed highway from either Culiacan, the capital city of the State of Sinaloa (located to the south of the San José de Gracia Project) or the city of Guamuchil (located to the southwest of SJG), to the small town of Sinaloa de Leyva, then by gravel mountainous road to the village of San José de Gracia.

The San José de Gracia Project can also be accessed by air. A gravel airstrip is located adjacent to the village of San José de Gracia which is located at the southwestern portion of the property at the SJG Project, and the airstrip is suitable for light aircraft.

#### Climate and Operating Season

The climate is semi-tropical with a rainy season dominating from late June / early July through September. Operations at the San José de Gracia Project are in part dependent on the weather and some activities may be suspended during the rainy season.

#### Infrastructure and Local Resources

##### Power

A power line to the San José de Gracia Project has been installed by the Comisión Federal de Electricidad, the only authorized power producer in Mexico. The power line was installed in March 2012 from the municipality of Sinaloa de Leyva (La Estancia area), a distance of approximately 75 kilometers.

The power line is currently 220 volts maximum capacity, which supports domestic use only, including the office and camp facilities at SJG, such as water pump, air conditioning, refrigeration, lights, internet, and fans, as well as local residential use. Currently, the SJG Project produces its own diesel-generated power for industrial use.

##### Water

The water source for the SJG camp is from a water well located close to the river which runs just west of the village of San José de Gracia. DynaMexico has obtained the water concession rights for this water source, which provide for usage of 1,000,000 cubic meters per year. Currently, DynaMexico estimates its consumption of water to be approximately 10,000 liters per week.

#### Accommodations

The mine site area camp maintains facilities which can accommodate about 50 persons. The village of San José de Gracia maintains few stores, and which offer only minimal goods.

#### Offices – Camp Facilities

DynaMexico maintains an administrative and logistics office in Guamuchil, located 125 kilometers southwest of the SJG property. The SJG Project sources many of its supplies from Guamuchil, and from Los Mochis and Culiacan. A satellite dish installed at the SJG Property provides communications from the SJG Property to Guamuchil.

The SJG property is described in more detail in this Form 10-K, under Item 2, Properties.

#### ***Sierra Madre Gold-Silver Belt in Mexico***

Historical Production

SJG reports 1,000,000 Oz. gold historical production from a series of underground workings. The major production reported was 471,000 Oz. Au at the La Purisima area of SJG, at an average grade of 66.7 g/t; and production of 215,000 Oz. Au from the La Prieta area, at an average grade of 27.6 g/t. Mineralization at SJG has been traced on surface and underground over a 15 square kilometer area.

1997-1998 Drilling – Exploration Programs

A drill program was conducted at SJG in 1997 - 1998 by a prior majority owner. Approximately 6,172 meters drilling was completed in 63 core drill holes. Significant intercepts, including bonanza grades, outlined the down dip potential of the Northeast section (150 Meter NE to SW extent of the Drilling) of the Los Hilos to Tres Amigos Trend of SJG. Surface and underground sampling in 1999 - 2000 confirmed high grades in historic workings and surface exposures throughout the project area. These high grades outline the presence of mineralization shoots developed within the veins. The mineralized shoots appear to be controlled by dilational jogs and/or vein intersections. A total of 544 samples were collected in 1999-2000, and assayed an average 6.51 grams/ton gold.

Pilot Production Activities (2003 – 2006)

DynaMexico, conducting activities through its operating sister companies MinerasDyna and DynaOperaciones, mined high-grade veins at the San Pablo area of SJG from mid-2003 to June 2006. 18,250 Oz. gold was produced and sold from mill feed tonnage of 42,000 tons, at an average grade of approximately 15-20 g/t. Production costs were reported at approx. \$ 175. / Oz. Au in this small scale, pilot production operation.

Mined Tonnage	42,500 tons
Production (Oz Au)	18,250 Oz
Average Grade	15-20 g/t
Recovery Efficiency (Plant)	85%
Recovery in Concentrate (Sales)	90%
Production Cost (Average, 4 Years)	\$175 / Oz

The small scale mining and production activities at SJG consisted of improvements to an existing mill, including the installation of a gravity / flotation processing circuit, and initial test runs with tailings were completed in 2002. Actual mining at the higher grade San Pablo area of the property commenced in March 2003.

Suspension of Production Activities

The Company initiated the test production activity in 2003 at the time gold prices were depressed, and when exploration funding opportunities, while available, were deemed to be too dilutive by Company management. While the test production was considered successful (see results in the table above), a small scale production activity was not expected to provide the necessary capital in order to explore a project the size of SJG.

The earlier, limited-scope pilot production activity provided significant benefits in terms of confirming production grades, metallurgy and process, efficiency of recoveries, and production costs – all of which is valuable for larger scale production plans.

Earn In / Option Agreement – Financing of Drilling – Exploration Programs

As gold prices continued to appreciate into 2006, exploration financing opportunities increased and the Company negotiated and entered into an Earn In / Option Agreement with Goldgroup Mining Inc. (“Goldgroup”), dated September 1, 2006. The

10

terms of the Earn In / Option Agreement provided for Goldgroup to furnish \$18,000,000 USD financing to DynaMexico for exploration expenditures at SJG, in exchange for a 50% share interest in DynaMexico.

On June 21, 2013, DynaResource acquired a Certificate for 300 Series “B” Variable Capital Shares of DynaMexico, in exchange for the settlement of accounts receivable from DynaMexico in the amount of \$31,090,710 Mexican Pesos (approximately \$2.4 M USD). After the issuance and receipt of the 300 Series B Shares, DynaUSA holds 80% of the total outstanding Capital of DynaMexico. DynaMexico owns 100% of the San Jose de Gracia Project in northern Sinaloa, Mexico.

#### No Known Reserves

Currently, the Company’s drilling programs (through DynaMexico) are exploratory in nature. The Company expects to commence pilot production activities in 2014.

#### The SJG Property is without known reserves

Under U.S. standards, set forth in SEC Industry Guide 7, mineralization may not be classified as a “reserve” unless a determination has been made that the mineralization could be economically and legally produced or extracted at the time the reserve determination is made.

#### Future Drilling – Exploration Programs

Further drilling programs at SJG are contemplated, in view of the 2012 DynaMexico-CAM SJG Mineral Resource Estimate and the formal National Instrument 43-101 (“NI 43-101”) Technical Report for San Jose de Gracia (the “2012 DynaMexico Luna-CAM SJG Technical Report”), and the updated NI 43-101 Technical Report, dated December 31, 2012 (See “Updated National Instrument 43-101 Technical Report for San Jose de Gracia”, below.)

The Company expects DynaMéxico will be successful in expanding the size and scope of the resources at SJG through continued drilling and development programs at San Pablo, Tres Amigos, La Cecena, Palos Chinos, La Union, La Purisima, and La Prieta. The Company expects extensions to mineralization in all directions and down dip from the main target areas.

#### National Instrument 43-101 (“NI 43-101”) Mineral Resource Estimate

The Company received from DynaMexico on February 14, 2012 a National Instrument 43-101 (“NI 43-101”) Mineral Resource Estimate for San Jose de Gracia. The NI 43-101 Mineral Resource Estimate was prepared by Mr. Robert Sandefur, BS, MSc, P.E., a Qualified Person (“QP”) as defined under NI 43-101, and a senior reserve analyst for Chlumsky, Armbrust & Meyer LLC, Lakewood, CO (“CAM”). The Mineral Resource Estimate concentrates on four separate vein systems at SJG: Tres Amigos, San Pablo, La Union, and La Purisima.

#### National Instrument 43-101 Technical Report for San Jose de Gracia

The Company received from DynaMexico on March 28, 2012 a National Instrument 43-101 (“NI 43-101”) compliant Technical Report for the San Jose de Gracia Project (the “2012 DynaMexico Luna-CAM SJG Technical Report”, the “Technical Report”), and approved by DynaResource de Mexico, SA de CV. (“DynaMexico”), the 100% owner of SJG.

The 2012 DynaMexico Luna-CAM SJG Technical Report was prepared by Mr. Ramon Luna, BS, P.Geo., of Servicios y Proyectos Mineros, Hermosillo, Mexico, and a Qualified Person as defined under NI 43-101; and by Mr. Robert Sandefur, BS, MSc, P.E., a senior reserve analyst for Chlumsky, Armbrust & Meyer LLC, Lakewood, CO., and a Qualified Person as defined under NI 43-101. The 2012 DynaMexico Luna-CAM SJG Technical Report includes as

Section Fourteen (14) a Mineral Resource Estimate for SJG as prepared by Mr. Sandefur (the “2012 DynaMexico-CAM SJG 43-101 Mineral Resource Estimate”, the “Resource Estimate”).

The Company filed the Technical Report on SEDAR (www.sedar.com) on March 28, 2012.

Updated National Instrument 43-101 Technical Report for San Jose de Gracia

The Company received from DynaMexico on December 31, 2012, an updated NI 43-101 compliant Technical Report for the San Jose de Gracia Project (the “Updated 2012 DynaMexico Luna-CAM SJG Technical Report, and the “updated Technical Report”). The updated Technical Report was approved by DynaMexico, and filed by the Company with SEDAR on December 31, 2012.

Commissioning of an Updated Mineral Resource Estimate

During the fourth quarter 2012, DynaMexico, through MinerasDyna, commissioned Chlumsky, Armbrust & Meyer LLC, Lakewood, CO. (“CAM”), Mr. Robert Sandefur, BS, MSc, P.E., senior reserve analysis and a Qualified Person as defined under NI 43-101, for the purpose of updating the Mineral Resource Estimate at San Jose de Gracia and to include lower grade

mineralized areas of San Jose de Gracia using a .3 g/t Au cut off grade. This work is pending until the company deems it necessary to continue.

#### Commissioning of Metallurgical Testing

During the fourth quarter 2012, DynaMexico, through MinerasDyna, engaged Kappes, Cassidy & Associates, Reno, NV. ("KCA"), for the purpose of designing a metallurgical test program to confirm possible heap leach recoveries of specific mineralized areas of San Jose de Gracia. This work is pending until the company deems it necessary to continue.

#### Company Transition from Exploration to Mining – Production

The Company expects to transition its business from that of a purely exploration company, to an exploration and production company in 2014. The basis for the exploration and production activity is provided through the foundational resource for SJG as reported in the 2012 DynaMexico-CAM SJG Mineral Resource Estimate (and Technical Report), and supported further by the company's successful pilot production activities during the 2003-2006 period.

#### SEMARNAT Permission for Operating Mill Facility at San Jose de Gracia

On June 17, 2013, DynaMexico received from the Secretaria de Medio Ambiente Y Recursos Naturales, the Federal Environmental Authority in Mexico ("SEMARNAT"), the approval and permission which allows for the rehabilitation and operation of the pilot mill facility at SJG ("the Semarnat-SJG Mill Permit," and, the "Semarnat Permit"). Under the terms of the Semarnat-SJG Mill Permit, DynaMexico will be responsible to maintain the SJG pilot mill facility, and including the adjacent tailings pond area, in compliance with the regulations described in la Norma Oficial Mexicana ("NOM-141-SEMARNAT-2003).

#### Rehabilitation of Pilot Mill Facility at San Jose de Gracia

Under the terms of the Exploitation Amendment Agreement ("EAA"), as described above, MinerasDyna is in process of the rehabilitating and planning the subsequent operation of the pilot mill facility at SJG. The SJG pilot mill facility (a gravimetric-flotation circuit) is projected to process bulk samples to be mined from selected target areas of SJG. Operations at SJG will be managed by MinerasDyna, and are projected to be similar to those conducted by DynaMexico during the 2003-2006 Period.

#### SEMARNAT Permission for Exploitation and Mining of the San Pablo Mine Area at San Jose de Gracia

On September 30, 2013, DynaMexico received from the Secretaria de Medio Ambiente Y Recursos Naturales, the Federal Environmental Authority in Mexico ("SEMARNAT"), the approval and permission which allows for the exploitation and mining activities at the San Pablo Area of SJG ("the Semarnat-SJG San Pablo Exploitation Permit" and, the "Semarnat Exploitation Permit").

#### Regional Geology & Mineral Deposits

San José de Gracia lies within the Sierra Madre Occidental Gold-Silver Belt, in a second-order Graben directly east of the regional-scale Grete Graben. The basement to the Sierra Madre Occidental consists of deformed Paleozoic sedimentary strata, which are non-conformably overlain by Tertiary mafic to felsic volcanic and volcanoclastic strata known as the Lower Volcanic Series ("LVS"). Strata of the LVS are recognized as being spatially related to gold and silver mineralization in the region. Volcanic and sedimentary strata are capped by a thick sequence of non-deformed Late Tertiary ignimbrites, known as the Upper Volcanic Series ("UVS").

Property Geology

The oldest rocks exposed at San José de Gracia are deformed Paleozoic shale, sandstone, conglomerate and minor limestone, which are non-conformably overlain by andesite and rhyodacite flows and tuffs of the LVS. Volcanic and sedimentary strata are cut by quartz-feldspar porphyry, porphyritic diorite bodies and fine-grained mafic dykes, which may be co-temporal with the LVS. Ignimbrites of the UVS are exposed at higher elevations on the property and are thought to act as a post mineralization cap rock, thereby indicating an Early to Mid Tertiary (Paleocene to Eocene) age for gold mineralization at San José de Gracia.

Geologic Structure

Detailed mapping within the project area has defined several stages of deformation, beginning with compression during the Laramide Orogeny which affected the Paleozoic basement and formed flat-lying reverse faults, which have been reactivated as conduits for gold-bearing fluids in the La Prieta trend (Table 2). Extension in Tertiary time led to the development of second order structures, trending south, southwest and southeast; which formed the major structural orientations for

mineralization at San José de Gracia. The latest phase of deformation is characterized by late-stage extension and southwest tilting.

#### Mineralization & Alteration

High grade gold mineralization at San José de Gracia is hosted within andesite and rhyodacite of the LVS and underlying Paleozoic sediments as fault breccia veins and crackle breccias that exhibit multiple stages of reactivation and fluid flow, as evidenced by crustiform/colloform textures and cross cutting veins. Locally, veins exhibit sharp, clay gouge hangingwall and footwall contacts with slickensides, indicating reactivation of structurally-hosted veins subsequent to mineralization. Gold grades can also be carried within the mineralized halo adjacent to the principal veins as quartz-chlorite stockwork. In addition to vein-hosted mineralization, broad zones of un-mineralized clay alteration, developed southwest of the main mineralized trends, may overlie lower-grade, disseminated gold mineralization at depth.

Alteration at San José de Gracia is laterally and vertically zoned from discrete zones of silicification to broad zones of illite to clay alteration with increasing elevation and/or distance from the main feeder structures. Faulting and tilting of the mineralization system has affected the surface distribution of alteration and in general has exposed deeper portions of the system in the northeast and exposed shallower, more distal portions of the hydrothermal system in the southwest part of the property.

Six principal mineralized trends have been identified at San José de Gracia, from south to north, consisting of:

1. *La Purisima Ridge trend;*

2. *Palos Chinos trend;*

3. *La Parilla to Veta Tierra trend (Including La Union);*

4. *San Pablo trend;*

5. *La Prieta trend, and*

6. *Los Hilos to Tres Amigos trend.*

#### Lab

A field laboratory is maintained within the camp facility. DynaMexico utilized the lab for internal assaying services during its production activities of 2003-2006. Assays were performed by DynaMexico personnel for mined mineralization, feed mineralization, gravity and flotation concentrates, and tailings. The current status of the lab and equipment is care and maintenance. The Company anticipates that MinerasDyna will utilize the lab facility in the future for providing check assays to support ongoing exploration and bulk sampling works.

#### Mineral Resource Estimate - Construction of Wireframes

Mineral Resources were estimated by Mr. Sandefur within wireframes constructed by technical personnel of Minop SA de CV (“Minop”), a subsidiary of Goldgroup Mining Inc. (“Goldgroup”). Minop was contracted by Mineras de

DynaResource SA de CV. (“MinerasDyna”).

Mineral Resource Estimate - Parameters Used to Estimate the Mineral Resource

The data base for the San Jose de Gracia Project consists of 372 drill holes of which 361 are diamond drill holes and the remaining 11 were reverse circulation holes, with a total drilling of 75,878 meters. The 2012 DynaMexico-CAM SJG Mineral Resource Estimate concentrates on four main mineralized vein systems at SJG: Tres Amigos, San Pablo, La Union, and La Purisima. Of the 372 drill holes, 368 were drilled to test these four main vein systems and the remaining four holes tested the Argillic Zone. Technical personnel of Minop built three dimensional solids to constrain estimation to the interpreted veins in each swarm. The 172 holes most recently drilled (2009-2011), were allocated as follows: Tres Amigos (64 holes), San Pablo (49 holes), La Union (24 holes), La Purisima (32 holes) and the Argillic Zone (3 holes).

Servicios y Proyectos Mineros performed a database review and considers that a reasonable level of verification has been completed, and that no material issues have been left unidentified from the drilling programs undertaken.

A total of 5,540 pieces of core were measured for specific gravity using the weight in air vs. weight in water method. This represents an additional 3,897 measurements taken in the 2009-11 drill seasons with density measurements taken from all mineral zones. Dried samples were coated with paraffin wax before being measured. The results tabulated have been sorted by lithology and mineralized veins. The average specific gravity of 5,051 wall rock samples is 2.59 while the average specific gravity for 489 samples of vein material is 2.68. CAM and Servicios y Proyectos Mineros have reviewed the procedures and results, and opine that the results are suitable for use in mineral resource estimation.

### Mineral Resource Estimate - Explanation of Resource Estimation

Resource estimation was done in MineSight and MicroModel computer systems with only those composites that were inside the wireframe used in the estimate. Estimation was done using kriging with the omni-directional variogram derived from all the data in each area for gold using the relative variogram derived from the log variogram. High grades were restricted by capping the assays at a breakpoint based on the cumulative frequency curves. Estimation was done using search radii of 100 x 100 x 50 m oriented subparallel to the general strike and dip of the vein system in each area. A sector search, corresponding to the faces of the search box with a maximum of two points per sector was used in estimation. A density of 2.68 based on within 'vein density' samples was used in the resource estimate. Within each of the four areas there are approximately 20 to 40 veins in the vein swarm. Resources were estimated by kriging using data from all veins in the swarm. In general, gold accounts for at least 80% of the value of contained metal at the project, so the variograms for gold were used in estimation of the four other metals. Mineral Resources at Tres Amigos and San Pablo were classified as "Indicated" as follows:

- 1) they were within a vein within the swarm which contained at least 7 drill holes;
- 2) they are within 25 m of the nearest sample point; and,
- 3) they were estimated by at least three drill holes.

All other Mineral Resources were classified as "Inferred". Since there are no precise quantitative definitions of Measured, Indicated and Inferred, resource classification is subjective and depends on the experience and judgment of the Qualified Person ("QP") calculating the resource estimate. CAM, Mr. Sandefur QP, allowed indicated material at Tres Amigos and San Pablo because of (1) the similarity of the variograms, and (2) the fact of recent production by DynaMexico from San Pablo of some 42,000 tonnes plant feed at an average grade of approximately 15 g/t ("grams per tonne"). Three of the individual veins at La Purisima satisfied criterion (1) above but Mr. Sandefur elected not to include this material in "Indicated" because of the shorter first range at La Purisima. This Mineral Resource Estimate for SJG does not include any ore loss or dilution outside wireframes, and as currently defined, is probably most appropriate for a highly selective, small equipment underground operation.

The veins at San Jose de Gracia have been historically mined for many years and historic mined volumes are not available. The one exception is the approximate 42,000 tonnes of ore processed by DynaMexico during its pilot production activities in 2003-2006. The resource table is not adjusted for any historic mining. To validate that historic mining had not significantly reduced the resource, CAM reviewed the database for all assays greater than 1 gram per ton gold that were next to missing values at the bottom of drill holes. Only four assays satisfying this criterion were found, and on the basis of this review, CAM does not believe that significant mining has occurred within the volumes defined by the wireframes.

### No Known Reserves

The SJG property is without known reserves. Mineral resources which are not mineral reserves do not have demonstrated economic viability. The quantity and grade of the "Indicated" and "Inferred" mineral resources reported in the mineral resource estimate contained in this Form 10 K are estimates only. There has been insufficient exploration to define any mineral reserves on the property, and it is uncertain if further exploration will result in discovery of mineral reserves.

Currently, the Company's drilling programs are exploratory in nature. However, The Company expects to commence pilot production activities in 2014 using the foundational resource for SJG as reported in the 2012 DynaMexico-CAM SJG Mineral Resource Estimate (and Technical Report), and supported further by the company's recent pilot production activities during the 2003-2006 period.

Mineral Resource Estimate and 43-101 Technical Report - Data Verification

Mr. Luna initially visited the San Jose de Gracia Project in November 2010, and conducted site inspections at SJG in November 2011 and January 2012. Mr. Sandefur conducted a site inspection of the SJG Project in January 2012. While at the Property in November 2011, Mr. Luna inspected the areas of Tres Amigos, La Prieta, Gossan Cap, San Pablo, La Union, and La Purisima, and historic mining sites. In January 2012, Mr. Sandefur and Mr. Luna inspected the areas of Tres Amigos, San Pablo, La Union, and La Purisima. Pictures of the areas were taken. Many of the drill pads for the drilling programs of 2007 to 2011 were clearly located and identified. Mr. Luna also inspected San José de Gracia's core logging and storage facilities, the geology offices, the meteorological station, the plant nursery, and the mill. Mr. Sandefur also inspected San José de Gracia's core logging and storage facilities.

2012 DynaMexico CAM Mineral Resource Estimate and Technical Report - Qualified Persons

Mr. Luna and Mr. Sandefur each are a "Qualified Person" as that term is defined in National Instrument 43-101 and is "independent" as that term is also defined in National Instrument 43-101.

The Company filed the Technical Report on SEDAR ([www.sedar.com](http://www.sedar.com)) on March 28, 2012. And, on December 31, 2012, the Company filed an updated Technical Report on SEDAR.

### DynaMexico Water Concession

The Company has been informed by DynaResource de Mexico, SA de CV. (“DynaMexico”), the 100% owner of SJG, that DynaMexico has secured the Water Rights Concession for the area surrounding SJG. The Director of Water Administration of the National Water Commission of Mexico (CONAGUA) formally certified in writing the rights of DynaResource de Mexico, S.A. de C.V. to legally use, exploit and extract 1,000,000 m<sup>3</sup> of water per year from the DynaMexico extraction infrastructure located within the perimeter of the mining concessions comprising the San Jose de Gracia Mining Property in Sinaloa State, Mexico. CONAGUA determined that the DynaMexico water rights are not subject to any water rights concession or any other water extraction restriction. Water extracted by DynaMexico will be subject to applicable levies imposed by the Mexican tax authorities in accordance with current Mexican tax laws.

### Exclusive Operating Entity at San Jose de Gracia

Under agreement with DynaMexico, Mineras de DynaResource SA de CV. (“MinerasDyna”) has been named the exclusive operating entity at the San Jose de Gracia Project. DynaResource owns 100% of MinerasDyna.

### DynaMexico General Power of Attorney

The Chairman-CEO of DynaUSA also serves as the President of DynaMexico and as the President of MinerasDyna. And, the President of DynaMexico holds a broad power of attorney granted by the shareholders of DynaM xico which gives the current President significant and broad authority within DynaM xico.

### Updated Mineral Resource Estimate

During the third quarter 2012, MinerasDyna commissioned Chlumsky, Armbrust & Meyer LLC, Lakewood, CO. (“CAM”), Mr. Robert Sandefur, BS, MSc, P.E., senior reserve analysis and a Qualified Person as defined under NI 43-101, for the purpose of updating the Mineral Resource Estimate at San Jose de Gracia and to include lower grade mineralized areas of San Jose de Gracia using a .3 g/t Au cut off grade. This work is pending until the company deems it appropriate to continue.

### Metallurgical Testing

During the third quarter 2012, MinerasDyna engaged Kappes, Cassidy & Associates, Reno, NV. (“KCA”), for the purpose of designing a metallurgical test program to confirm possible heap leach recoveries of specific mineralized areas of San Jose de Gracia. This work is pending until the company deems it appropriate to continue.

### Capital Requirements

The mining industry in general requires significant capital in order to take a property from the exploration, to development to production. These costs remain a significant barrier to entry for the average company but once in production, there is a ready market for the final products, In the case of SJG, the final product would be mainly gold, the price of which is determined by global markets, so there is not a dependence on a customer base.

### Gold

*Gold Uses.* Gold generally is used for fabrication or investment. Fabricated gold has a variety of end uses, including jewelry, electronics, dentistry, industrial and decorative uses, medals, medallions and official coins. Gold investors buy gold bullion, official coins and jewelry.

*Gold Supply.* A combination of current mine production, recycling and draw-down of existing gold stocks held by governments, financial institutions, industrial organizations and private individuals make up the annual gold supply. Based on public information available for the years 2008 through 2013, on average, current mine production has accounted for approximately 64% of the annual gold supply.

*Gold Price.* The following table presents the annual high, low and average daily afternoon fixing prices for gold over the past ten years on the London Bullion Market (\$/ounce):

<b>Year</b>	<b>High</b>	<b>Low</b>	<b>Average</b>
2002	\$349	\$278	\$ 310
2003	\$416	\$320	\$ 363
2004	\$454	\$375	\$ 410
2005	\$536	\$411	\$ 444
2006	\$725	\$525	\$ 604
2007	\$841	\$608	\$ 695
2008	\$1,011	\$713	\$ 872
2009	\$1,213	\$810	\$ 972

15

2010	\$1,421	\$1,058	\$1,225
2011	\$1,895	\$1,319	\$1,572
2012	\$1,792	\$1,540	\$1,669
2013	\$1,694	\$1,192	\$1,411
2014 (through April 8, 2014)	\$1,385	\$1,221	\$1,293

Source: Kitco, Reuters and the London Bullion Market Association

On April 8, 2014, the afternoon fixing gold price on the London Bullion Market was \$1,302 per ounce and the spot market gold price on the New York Commodity Exchange was \$1,310 per ounce.

#### Condition of Physical Assets and Insurance

Our business is capital intensive and requires ongoing capital investment for the replacement, modernization or expansion of equipment and facilities. We, and our subsidiaries, maintain insurance policies against property loss. Such insurance, however, contains exclusions and limitations on coverage, particularly with respect to environmental liability and political risk. There can be no assurance that claims would be paid under such insurance policies in connection with a particular event.

#### Environmental Matters

Our activities are largely outside the United States and subject to governmental regulations for the protection of the environment. We conduct our operations so as to protect public health and the environment and believe our operations are in compliance with applicable laws and regulations in all material respects. DynaMexico is involved with reclamation matters with the oversight of Semarnat, the federal environmental agency of Mexico.

#### Exploration and Mining Permit Requirements (Mexico)

In respect of permit requirements for mineral exploration and mining in Mexico, the most relevant applicable laws, regulations and official technical norms are the following: the *Federal Mining Act*, and its Regulations, the *Federal Environmental Protection and Ecological Equilibrium Act*, and its Regulations, the *Federal Sustainable Forestry Development Act* and its Regulations, the *Federal Explosives and Firearms Act*, the *National Waters Act* and the *Mexican Official Norm 120*.

To carry out mineral exploration activities, holders of mining concessions in Mexico are required to file at the offices of the Federal Secretariat of the Environment and Natural Resources (“SEMARNAT”) a “Notice of Commencement of Exploration Activities” under the guidelines of the *Mexican Official Norm 120* (“Norm 120”). SEMARNAT is the office of the Federal Government of Mexico responsible for the review and issuance of a CSUP (referenced below), the review of a Technical Justification Study (referenced below) and the filing of Norm 120. Norm 120 is a notice to SEMARNAT only, and has no processing time.

If contemplated mineral exploration activities fall outside of the parameters defined under Norm 120, a “Change of Soil Use Permit” (“CSUP”) Application is required to be filed at the SEMARNAT under the guidelines of the *Federal Sustainable Forestry Development Act* and its Regulations. To meet the requirements for issuance of a CSUP, the applicant must also file a Technical Study (“Technical Justification Study”) to justify the change of soil use from

forestry to mining, to demonstrate that biodiversity will not be compromised, and to demonstrate that there will be no soil erosion or water quality deterioration on completion of the mineral exploration activities.

As a pre-requisite for issuance of a CSUP, Article 118 of the *Federal Sustainable Forestry Development Act* provides for the posting of a bond to the Mexican Forestry Fund for remediation, restoration and reforestation of the areas impacted by the mineral exploration activities.

To carry out mining activities in Mexico, holders of mining concessions are also required to file an “Environmental Impact Assessment Study” (“Environmental Impact Study”) under the guidelines of the *Federal Environmental Protection and Ecological Equilibrium Act* and its Regulations, in order to evaluate the environmental impact of the contemplated mining activities.

As a pre-requisite for approval of an Environmental Impact Study, the *Federal Environmental Protection and Ecological Equilibrium Act* and its Regulations require the posting of a bond to guarantee remediation and rehabilitation of the areas impacted by the mining activities.

If the use of explosives materials is required for execution of mineral exploration or mining activities, an Application for General Permit for Use, Consumption and Storage of Explosive (“Explosives Permit”) is required to be filed at the offices of the Secretariat of National Defense (“SEDENA”) under the guidelines of the *Federal Explosives and Firearms Act*.

Under the *Federal Mining Act*, holders of mining concessions in Mexico have the right to the use of the water coming from the mining works. However, certification of water rights and/or issuance of water rights concessions are required from the National Water Commission (“CONAGUA”) under the guidelines of the *National Waters Act*.

#### DynaMexico Permit Filings / Permits

On February 10, 2003, SEDENA granted DynaMexico an Explosives Permit for the use and storage of explosives materials in SJG.

In June 2006, DynaMexico ceased use of explosives materials in its mining activities at SJG, and requested suspension of the Explosives Permit. The Explosives Permit has been temporarily suspended by SEDENA and DynaMexico will be required to file a re-activation application to re-activate the Explosives Permit.

On June 28, 2010, DynaMexico filed a Preventive Exploration Notice at the office of SEMARNAT in connection with contemplated mineral exploration activities at the *La Prieta, San Pablo, La Purísima, La Unión, Tres Amigos* and *La Ceceña* areas of the San José de Gracia Project.

On July 21, 2010, SEMARNAT authorized DynaMexico to conduct the mineral exploration activities referenced in the Preventive Exploration Notice, for a term of 36 months, as SEMARNAT determined that such activities fall within the framework of Norm 120. SEMARNAT’s approval was subject to the following conditions: (a) DynaMexico’s filing of a CSUP Application (referenced below) and approval thereof by SEMARNAT, and (b) posting of a bond in the amount of \$134,487 Mexican Pesos to guarantee remediation and rehabilitation measures following the conclusion of the mineral exploration activities referenced in the Preventive Exploration Notice. The bond was timely posted by DynaMexico.

On August 9, 2010, DynaMexico filed at the offices of SEMARNAT a CSUP Application and a Technical Justification Study to carry out certain mineral exploration activities at the *La Prieta, San Pablo, La Purísima, La Unión, Tres Amigos* and *La Ceceña* areas of the San José de Gracia Project.

On December 20, 2010, SEMARNAT approved the CSUP Application filed by DynaMexico with respect to the San José de Gracia Project and authorized DynaMexico to conduct mineral exploration activities on 5.463 hectares of the San José de Gracia Project for a term of 36 months.

On March 8, 2012, the Director of Water Administration of CONAGUA certified in writing the rights of DynaMexico to use exploit and extract 1,000,000 cubic meters of water per year from the extraction infrastructure located in San José de Gracia. CONAGUA determined that DynaMexico’s water rights are not subject to any water rights concession or any other water extraction restriction. Water extracted by DynaMexico will be subject to applicable levies imposed by the Mexican tax authorities under applicable tax laws.

- On June 17, 2013, DynaMexico received from the Secretaria de Medio Ambiente Y Recursos Naturales, the Federal Environmental Authority in Mexico (“SEMARNAT”), the approval and permission which allows for the rehabilitation and operation of the pilot mill facility at SJG (“the Semarnat-SJG Mill Permit,” and the “Semarnat Permit”). Under the terms of the Semarnat-SJG Mill Permit, DynaMexico will be responsible to maintain the SJG pilot mill facility, and including the adjacent tailings pond area, in compliance with the regulations described in la Norma Oficial Mexicana (“NOM-141-SEMARNAT-2003”).

On July 31, 2013, SEMARNAT authorized DynaMexico to conduct the mineral exploration activities referenced in the Preventive Exploration Notice, for a term of an additional 18 months, extending the initial term of 36 months as SEMARNAT had determined on July 10, 2010. Semarnat determined that such activities fall within the framework of Norm 120.

On September 30, 2013, DynaMexico received from SEMARNAT the approval and permission which allows for mining activities and the exploitation of the San Pablo area of San Jose de Gracia.

Subsequent to December 31, 2013, MinerasDyna entered into a 20 Year Land Lease Agreement with the Santa Maria Ejido Community surrounding San Jose de Gracia. The 20 Year Land Lease Agreement is dated January 6, 2014 and continues through 2033. It covers an area of 4,399 hectares surrounding the main mineral resource areas of SJG, and provides for annual lease payments by MinerasDyna of \$ 1,359,443 Pesos (approx. \$104,250 USD), commencing in

2014. Additionally, under the description of the Land Lease Agreement, MinerasDyna expects to construct a Medical Facility at SJG in year 2014, and a Community Center in year 2015.

The land lease agreement provides MinerasDyna with surface access to the core resource areas of SJG (4,399 hectares), and allows for all permitted mining and exploration activities from the owners of the surface rights (Santa Maria Ejido community).

#### DynaMexico Bonding Requirements

Under the Exploration Permit issued to DynaMexico on July 21, 2010, SEMARNAT imposed upon DynaMexico a bonding obligation in the amount of \$ 134,487 Mexican Pesos to guarantee remediation and rehabilitation measures following the conclusion of the mineral exploration activities referenced in the Preventive Exploration Notice. The bond was timely posted by DynaMexico.

Under the CSUP issued to DynaMexico on December 20, 2010, SEMARNAT imposed upon DynaMexico a bonding obligation of \$116,911 Mexican Pesos for reforestation and remediation measures with respect to the San José de Gracia Project. The bond was timely posted by DynaMexico.

#### Permit Processing Times (In General)

Processing time for review and approval of a CSUP Application and Technical Justification Study varies depending on the workload of the SEMARNAT regional office where an application is filed, but a processing time of four months is typical.

Processing time for review and approval of an Environmental Impact Study varies depending on the workload of the SEMARNAT regional office where an application is filed, but a processing time of six months is typical.

Processing time for issuance of an Explosives Permit by SEDENA is approximately six months.

Processing time for issuance of a water rights concession by CONAGUA is approximately six months.

\*\*\*

## **Item 1A. Risk Factors**

### **Business Risk**

**The Company is involved in the business of exploration and development of resource properties, which carries the inherent risk of failure.**

The exploration and development of mineral deposits involve significant risks which a combination of careful evaluation, experience and knowledge may not eliminate. There is no assurance that the Company's exploration programs will result in further discoveries of commercial mineralization bodies.

### **Nature of Mineral Exploration and Mining**

**The Company's future is dependent upon its exploration programs. The exploration and development of mineral deposits involve significant risks over significant periods of time. It is impossible to ensure that the current or proposed exploration programs on the Company's property will result in a profitable mining operation.**

Whether a mineralized deposit will be commercially viable depends on many factors, such as size and grade of the deposit, proximity to infrastructure, financing costs, regulations, environmental protection, commodities prices, taxes, political risks. The impact of these factors cannot be accurately predicted, but the combination of factors may result in the Company's failure to provide a return on investment.

### **Competitive Business Conditions**

**The Company competes with many larger, well capitalized companies which places the Company at a competitive disadvantage.**

The Company competes with many companies in the mining business, including large, established mining companies with substantial capabilities, personnel, and financial resources. There is a limited supply of desirable mineral lands available for claim-staking, lease, or acquisition in Mexico where the Company's activities are focused. The Company may be at a competitive disadvantage in acquiring mineral properties, since it competes with companies which have greater financial resources and larger technical staffs. From time to time, specific properties or areas which would otherwise be attractive for acquisition or exploration are unavailable due to their previous acquisition by competitors or due to the Company's lack of financial resources.

Competition in the industry extends to the technical expertise to find, advance, and operate mineral properties; the labor to operate the properties; and the capital for the purpose of funding exploration and development activities on such properties. Many competitors explore for and mine precious metals, and conduct refining and marketing operations on a world-wide basis. Such competition may make it more difficult for the Company to recruit or retain qualified employees, to obtain equipment and personnel to assist in its exploration and production activities, or to acquire the capital necessary to fund operations.

### **Government Regulations**

**The Company conducts its resource exploration and development activities in Mexico, subject to rules and regulations for owning and maintaining mining concessions and surface rights, environmental, water rights, hazardous wastes, explosives, reclamation, and others. There can be no certainty that the Company maintains full compliance with all government regulations.**

*Mexico.* Exploration and development of minerals in Mexico may be carried out through Mexican companies incorporated under Mexican law by means of obtaining exploration and development (exploitation) concessions. The Company's concessions are granted by the Mexican government, or acquired from previous owners, are filed in the Public Registry of Mining, and are scheduled to expire from 2028 through 2058. Holders of exploration concessions may, prior to the expiration of such concessions, apply for one or more development concessions covering all or part of the area covered by an exploration concession.

Environmental law in Mexico provides for general environmental policies, with specific requirements set forth under regulations of the Ministry of Environment, Natural Resources and Fishing, which regulate all environmental matters with the assistance of the National Institute of Ecology and the Procuraduria Federal de Proteccion al Ambiente.

The primary laws and regulations governing environmental protection for mining in Mexico are found in the General Law, the Ecological Technical Standards, and also in the air, water and hazardous waste regulations, among others. In order to comply with the environmental regulations, a concessionaire must obtain a series of permits during the exploration stage. Generally, these permits are issued on a timely basis after the completion of an application by a concession holder. The Company believes it is currently in full compliance with the General Law and its regulations in relation to its mineral property interests in Mexico.

### **Commodities Prices**

**Any potential economic success of the Company's properties will depend to a large extent to the market price of commodities; the future price of which is impossible to predict.**

The current value and potential value for properties obtained by the Company is directly related to the market price for gold. The market price of gold may also have a significant influence on the market price of the Company's common stock. If the Company obtains positive drill results and a property progresses to a point where a commercial production decision can be made, the decision to put a mine in production and to commit funds necessary for that purpose would be made long before any revenue from production would be received. A decrease in the market price of gold at any time during future exploration or development may prevent a property from being economically mined or result in the write-off of assets whose value is impaired as a result of lower gold prices.

The price of gold is affected by numerous factors beyond the Company's control, including inflation, fluctuation of the United States dollar and foreign currencies, global and regional demand, the purchase or sale of gold by central banks, and the political and economic conditions of major gold producing countries throughout the world. During the last five years, the market price of gold has fluctuated between approximately \$608 and \$1,895 per ounce. The volatility of gold prices represents a substantial risk which is impossible to fully eliminate. In the event gold prices decline and remain low for prolonged periods of time, the Company might be unable to explore, develop, or produce revenue from its properties.

### **No Significant Revenue**

**The Company suspended its production activity in June 2006, and currently receives no significant revenue. There is a risk that the Company would expend available cash and funding in exploration and administration costs, and would not be able to obtain further funding to continue its work.**

In June 2006, production activities at SJG were suspended, in order to focus on the exploration of the vast SJG district. Funds received by DynaMexico pursuant to the Earn In Agreement were utilized for exploration and related activities. In addition, the Company maintains overhead in the US and other costs which are not reimbursed. The Company and its subsidiaries have \$1,143,344 cash on hand at December 31, 2013. The Company could incur exploration expenses and corporate expenses greater than the amount of available cash on hand. The Company may need to raise additional funds in order to support its activities. If the Company needs to raise additional capital, its common stock could be diluted. Further, if the Company is unable to raise funds to meet its obligations, the value of its common stock may decline.

**Substantial Control of Chairman / Preferred Shares**

**The Company's Chairman and CEO owns 100% of the Series A preferred stock, which give him the right to elect the majority of the board of directors.**

K.W. ("K.D.") Diepholz, the Company's Chairman and CEO, owns 100% of the outstanding shares of Series A preferred stock, which hold special voting rights. As a result, Mr. Diepholz has the ability to elect the majority of the Company's Board of Directors. Such ownership and the resultant concentration of control may have the effect of delaying, deferring or preventing a change in control of the Company, even if the transaction would be beneficial to Company stockholders as a whole.

## Capital Needs

**The Company may need to raise additional capital, which may not be available or may be too costly, and which, if not obtained, could cause the Company to cease operations.**

The Company's capital requirements could be greater than its operating income. The Company believes it has adequate cash on hand for the foreseeable future, but it does not have sufficient cash to indefinitely sustain operating losses. The Company's liquidity depends on its ability to raise capital through the sale of common stock or through debt or equity offerings. Additional financing may not be available, or, if available, may be on terms unacceptable or unfavorable. If additional capital is required and not obtained, or if the Company is not able to produce revenue from operations, or otherwise operate at a profit, the value of investment in the Company could decline or be lost entirely.

## Illiquid Market

**The Company has a limited public market trading on the pink sheets, and an active trading market may never materialize, and an investor may not be able to sell stock.**

There is currently only a limited public market for the Company's Common Stock and there can be no assurance that a more robust trading market will develop further or be maintained in the future. An active trading market may not develop and if not the market value could decline to a value below the amount investors paid for stock. Additionally, if the market is not active or illiquid, investors may not be able to sell the securities of the Company.

## Penny Stock Classification

**If a public trading market for the Company's common stock materializes, it may be classified as a 'penny stock' which would result in additional requirements for trading the stock. These additional requirements could affect the liquidity of the stock.**

The SEC has adopted regulations which generally define a "penny stock" to be an equity security that has a market price of less than \$5.00 per share, subject to specific exemptions. The market price of the Company's Common Stock may trade at less than \$5.00 per share and accordingly may be a "penny stock." Brokers and dealers effecting transactions in "penny stock" must disclose certain information concerning the transaction, obtain a written agreement from the purchaser and determine that the purchaser is reasonably suitable to purchase the securities. These rules may restrict the ability of brokers or dealers to sell the Common Stock and may affect an investor's ability to sell such shares.

## Title Matters

### No Guarantee of Title

The Company has investigated title to all mineral claims, and, to the best of its knowledge, title to all properties is in good standing. The Company has received legal opinions from legal counsel, the most recent of which is dated September 15, 2012, which confirm the title and good standing of DynaMexico and mineral claims comprising the SJG District. However, there can be no assurance of complete title, nor guarantee of title. The properties may be affected by undetected defects in title, such as the reduction in size of the mineral claims and other third party claims

affecting the Company's priority rights.

### **Dependence upon Key Personnel**

**The Company is dependent upon the efforts and abilities of its management team.**

The loss of any member of the management team could have a material adverse effect upon the business and prospects of the Company. In the event of such loss, the Company will seek suitable competent replacements, but there is no assurance that the Company will be able to retain such replacements. The Company has obtained a Key Man Life Insurance program for its Chairman and CEO, which would pay the proceeds of such policy to the Company in the event of his death.

### **Uncertainty of Resource Estimate**

**There can be no certainty that any resource estimate by the Company's consultants would ever be realized in production.**

The current formal resource estimate in respect of the SJG Property (the NI 43-101 Mineral Resource Estimate) is based on limited information, such as historical data, drilling programs, the production activity conducted by the Company in 2003 – 2006, and various reports, manual calculations and opinions. No assurance can be given that the anticipated tonnages and grades will be achieved or that the estimated or indicated level of recovery will be realized. The grade of mineralization actually recovered or produced could differ significantly from the resource estimates.

### **No Known Reserves**

Currently, the Company's drilling programs (through DynaMexico) are exploratory in nature.

### The SJG Property is without known reserves

Under U.S. standards, mineralization may not be classified as a "reserve" unless a determination has been made that the mineralization could be economically and legally produced or extracted at the time the reserve determination is made.

### **Environmental and Regulatory Concerns**

**The Company operates in an industry where there are significant environmental and regulatory requirements. The inability of the Company to satisfy these requirements could cause the value of its common stock to decline.**

The current or future operations of the Company, including acquisition, leasing, and sales activities, involve mineral properties which require permits from various federal, state and local governmental authorities. Such future operations are and will be governed by laws and regulations governing prospecting, development, mining, production, exports, taxes, labor standards, occupational health, waste disposal, toxic substances, land use, environmental protection, mine safety and other matters. Companies engaged in the development and operation of mines and related facilities generally experience increased costs, and delays in production and other schedules as a result of the need to comply with applicable laws, regulations and permits. Additional permits and studies, which may include environmental impact studies conducted before permits can be obtained, are necessary prior to operation of properties in which the Company has interests. Required permits could adversely affect the Company's ability to negotiate agreeable acquisition, lease, or sales terms and therefore adversely affect the price of the Company's common stock.

### **Competitive conditions affecting the Company could negatively impact our business**

The potential value of the Company's mining property is directly related to the market price for gold. The price of gold may also have a significant influence on the market price of its common stock. If the Company obtains positive drill results and its property progresses to a point where a commercial production decision can be made, the decision to put a mine in production and to commit funds necessary for that purpose must be made long before any revenue from production would be received. A decrease in the market price of gold at any time during future exploration and development may prevent the Company's property from being economically mined or could result in the write-off of assets whose value is impaired as a result of lower gold prices. The price of gold is affected by numerous factors beyond our control, including inflation, fluctuation of the United States dollar and foreign currencies, global and regional demand, the purchase or sale of gold by central banks, and the political and economic conditions of major gold producing countries throughout the world. During the last five years, the market price of gold has fluctuated between approximately \$608 and \$1,895 per ounce. The volatility of gold prices represents a substantial risk which no amount of planning or technical expertise can fully eliminate. In the event gold prices decline and remain low for prolonged periods of time, we might be unable to develop our property and produce revenue.

### **Majority Ownership of DynaMéxico**

DynaResource owns an 80% share interest in DynaMéxico – the 100 % owner of the SJG Project -- and the remaining 20% share interest is held by Goldgroup. As a consequence of this shared ownership, any benefits to be derived from the ownership of DynaMéxico are shared on an 80%/20 % basis between the Company and Goldgroup.

A wholly owned subsidiary of DynaResource -- Mineras de DynaResource S.A. de C.V. -- maintains an exclusive operating agreement with DynaMéxico. Additionally, another wholly owned subsidiary of DynaResource -- DynaResource Operaciones de San Jose De Gracia S.A. de C.V. (“DynaOperaciones”) maintains an exclusive agreement to manage the personnel registered as employees in Mexico.

Mr. K.W. (“K.D.”) Diepholz, the Company’s Chairman and CEO, is also President of DynaMexico and President of MinerasDyna, and Mr. Diepholz holds a broad power of attorney granted by the shareholders of DynaMéxico. The powers of attorney give Mr. Diepholz authority superior to that of any other person or group within DynaMéxico, (including the Board of Directors). The powers of attorney held by Mr. Diepholz are consistent with the laws in Mexico, whose laws are based on a civil code.

### **Historical production of Gold at the San Jose de Gracia Property May Not be Indicative of Future Production or Revenue**

The SJG Property is a high-grade mineralized system with reported historical production of over 1,000,000 Oz. Gold. The production occurred in the early 1900’s, prior to the Mexican Revolution. Since that time, the property has seen small scale mining operations, from small scale local owners, to the Company’s production in 2003–2006. Due to the uncertainties associated with exploration, including variations in geology and structure, there is no assurance that the Company’s efforts will be successful in identifying mineralization in sufficient quantities to define proven or probable reserves, and further there is no assurance that any such reserves could be developed into a commercial operation. Investors in the Company’s securities should not rely on historical operations as an indication that the SJG property will be developed into a commercial production in the future. The Company expects to incur losses unless and until such time as one or more of its properties enters into commercial production and generates sufficient revenue to fund continuing operations.

### **Item 1B. Unresolved Staff Comments**

None.

### **Item 2. Properties**

#### Executive Offices

The Company maintains its executive offices of approximately 2,100 sq. ft., at 222 W. Las Colinas Blvd., Suite 744 East Tower, Irving, Texas 75039, at \$3,840 per month, plus utility services. The Company renewed a prior 3 year lease for an additional 1 year term commencing September, 2013.

#### San Jose de Gracia Mineral Property

DynaMexico owns 100% of the mineral concessions at the San Jose de Gracia Property (“SJG”), located in Sinaloa State, Mexico, which is the only property in which DynaMexico retains an interest. The Company owns 80% of the outstanding shares of DynaMexico. DynaMexico holds title to 33 concessions covering approximately 69,121 hectares (170,802 acres).

The property is located in and around San Jose de Gracia, Sinaloa State, Mexico which is approximately 100 km northeast of Guamuchil, near the west coast of Mexico. A small airstrip is located near San Jose de Gracia, and can be accessed by a small airplane or alternatively, by dirt mountain road. Several roads on the property are accessible throughout the year, with the possible exception of July - September when the rainy season sometimes causes flooding and runoff to make the roads difficult to navigate.

Currently, the Company's drilling programs (through DynaMexico) are exploratory in nature.

The SJG Property is without Known Reserves

Under U.S. standards, mineralization may not be classified as a "reserve" unless a determination has been made that the mineralization could be economically and legally produced or extracted at the time the reserve determination is made.

SJG History

SJG reports 1,000,000 Oz. Gold historical production from a series of underground workings. The major areas report 471,000 Oz. produced at the La Purisima area of SJG, at an average grade of 66.7 g/t.; and 215,000 Oz. produced from the La Prieta area, at an average grade of 27.6 g/t. Mineralization at SJG has been traced on surface and underground over a 15 square kilometer area.

Drilling programs at SJG were conducted by a prior operator in 1997–1998, primarily at the Tres Amigos area, which outlined some of the down dip potential in this area. Approximately 6,172 meters drilling was completed in 63 drill holes.

DynaMexico was formed in March 2000, for the purpose of acquiring the concessions comprising the SJG District, and to consolidate all ownership of SJG under DynaMexico. DynaMexico focused on acquisition and consolidation work through 2003, and reports a clear title and ownership to the district.

DynaMexico mined high-grade veins at the San Pablo area of SJG from mid-2003 to June 2006, in a Pilot Production operation. 18,250 Oz Gold was produced and sold, from mill feed tonnage of 42,500 tons, at an average grade of 15-20 g/t. Average production costs during the production period were reported as \$175/Oz.

#### Drilling programs conducted from 2007 through 2011

Drilling programs completed a total of 298 drill holes covering 68,741 meters of drilling from 2007 through March 2011. Results of the drilling activity, including the results of previous drilling in 1997-1998, appear in an "SJG Drill Intercepts Summary File through 11-298", as Exhibit 99.1 to our Form 10-Q for the period ended June 30, 2011 filed with the SEC on August 22, 2011, and available on EDGAR at:

<http://sec.gov/Archives/edgar/data/1111741/000112178111000241/ex99one.htm>.

Additionally, the updated Drill Summary File is posted on the Company's web site at [www.dynaresource.com](http://www.dynaresource.com).

#### National Instrument 43-101 ("NI 43-101") Mineral Resource Estimate for the San Jose de Gracia Property

The Company received from DynaMexico on February 14, 2012, a National Instrument 43-101 Mineral Resource Estimate for San Jose de Gracia. The NI 43-101 Resource Estimate (the "2012 DynaMexico-CAM SJG Mineral Resource Estimate", the "Resource Estimate") was prepared by Mr. Robert Sandefur, BS, MSc, P.E., a Qualified Person as defined under NI 43-101, and a senior reserve analyst for Chlumsky, Armbrust & Meyer LLC, Lakewood, CO. The Resource Estimate concentrates on four separate main vein systems at SJG: Tres Amigos, San Pablo, La Union, and La Purisima.

#### National Instrument 43-101 Technical Report on the San Jose de Gracia Property

The Company received from DynaMexico on March 28, 2012 a National Instrument 43-101 ("NI 43-101") compliant Technical Report for the San Jose de Gracia Project (the "2012 DynaMexico Luna-CAM SJG Technical Report", the "Technical Report"), and approved by DynaResource de Mexico, SA de CV. ("DynaMexico"), the 100% owner of SJG.

The 2012 DynaMexico Luna-CAM SJG Technical Report was prepared by Mr. Ramon Luna, BS, P.Geo., of Servicios y Proyectos Mineros, Hermosillo, Mexico, and a Qualified Person as defined under NI 43-101; and by Mr. Robert Sandefur, BS, MSc, P.E., a senior reserve analyst for Chlumsky, Armbrust & Meyer LLC, Lakewood, CO., and a Qualified Person as defined under NI 43-101. The 2012 DynaMexico Luna-CAM SJG Technical Report includes as Section Fourteen (14) a Mineral Resource Estimate for SJG as prepared by Mr. Sandefur (the "2012 DynaMexico-CAM SJG 43-101 Mineral Resource Estimate", the "Resource Estimate").

The Company filed the Technical Report on SEDAR ([www.sedar.com](http://www.sedar.com)) on March 28, 2012.

#### Updated National Instrument 43-101 Technical Report for San Jose de Gracia

The Company received from DynaMexico on December 31, 2012, an updated NI 43-101 compliant Technical Report for the San Jose de Gracia Project (the "Updated 2012 DynaMexico Luna-CAM SJG Technical Report, and the "updated Technical Report"). The updated Technical Report was approved by DynaMexico, and filed by the Company

on SEDAR on December 31, 2012.

### Regional Geology & Mineral Deposits

San José de Gracia lies within the Sierra Madre Occidental Gold-Silver Belt, in a second-order graben directly east of the regional-scale Grete Graben. The basement to the Sierra Madre Occidental consists of deformed Paleozoic sedimentary strata, which are non-conformably overlain by Tertiary mafic to felsic volcanic and volcanoclastic strata known as the Lower Volcanic Series (“LVS”). Strata of the LVS are recognized as being spatially related to gold and silver mineralization in the region. Volcanic and sedimentary strata are capped by a thick sequence of non-deformed Late Tertiary ignimbrites, known as the Upper Volcanic Series (“UVS”).

### Property Geology

The oldest rocks exposed at San José de Gracia are deformed Paleozoic shale, sandstone, conglomerate and minor limestone, which are non-conformably overlain by andesite and rhyodacite flows and tuffs of the LVS. Volcanic and sedimentary strata are cut by quartz-feldspar porphyry, porphyritic diorite bodies and fine-grained mafic dykes, which may be co-temporal with the LVS. Ignimbrites of the UVS are exposed at higher elevations on the property and are thought to act as a post

mineralization cap rock, thereby indicating an Early to Mid-Tertiary (Paleocene to Eocene) age for gold mineralization at San José de Gracia.

### Geologic Structure

Detailed mapping within the project area has defined several stages of deformation, beginning with compression during the Laramide Orogeny which affected the Paleozoic basement and formed flat-lying reverse faults, which have been reactivated as conduits for gold-bearing fluids in the La Prieta trend (Table 2). Extension in Tertiary time led to the development of second order structures, trending south, southwest and southeast; which formed the major structural orientations for mineralization at San José de Gracia. The latest phase of deformation is characterized by late-stage extension and southwest tilting.

### Mineralization & Alteration

High grade gold mineralization at San José de Gracia is hosted within andesite and rhyodacite of the LVS and underlying Paleozoic sediments as fault breccia veins and crackle breccias that exhibit multiple stages of reactivation and fluid flow, as evidenced by crustiform/colloform textures and cross cutting veins. Locally, veins exhibit sharp, clay gouge hangingwall and footwall contacts with slickensides, indicating reactivation of structurally-hosted veins subsequent to mineralization. Gold grades can also be carried within the mineralized halo adjacent to the principal veins as quartz-chlorite stockwork. In addition to vein-hosted mineralization, broad zones of un-mineralized clay alteration, developed southwest of the main mineralized trends, may overlie lower-grade, disseminated gold mineralization at depth.

Alteration at San José de Gracia is laterally and vertically zoned from discrete zones of silicification to broad zones of illite to clay alteration with increasing elevation and/or distance from the main feeder structures. Faulting and tilting of the mineralization system has affected the surface distribution of alteration and in general has exposed deeper portions of the system in the northeast and exposed shallower, more distal portions of the hydrothermal system in the southwest part of the property.

Six principal mineralized trends have been identified at San José de Gracia, from south to north. These consist of the:

1. *La Purisima Ridge trend;*
2. *Palos Chinos trend;*
3. *La Parilla to Veta Tierra trend (Including La Union);*
4. *San Pablo trend;*
5. *La Prieta trend, and*
6. *Los Hilos to Tres Amigos trend.*

### Lab

A field laboratory is maintained within the camp facility. The Company utilized the lab for Assaying services during its production activities. Assays were performed by Company personnel for mined mineralization, feed mineralization, gravity and flotation concentrates, and tailings. The current status of the lab and equipment is care and maintenance. The Company anticipates utilizing the lab facility in the future for providing quick check assays to support the exploration and bulk sampling works.

## **Item 3. Legal Proceedings**

### US Litigation (Dallas, Texas) – Company as Plaintiff

On December 27, 2012, the Company, and DynaMexico, filed an Original Petition and Application for Temporary Injunction and Permanent Injunction in the 14<sup>th</sup> Judicial District Court of Dallas, Texas (the “Petition”) against Defendants Goldgroup Mining Inc., Goldgroup Resources Inc., and certain individuals acting in concert with Goldgroup (collectively “Goldgroup”). The Petition alleged, among other things, that Goldgroup has wrongfully used property, confidential information and data belonging to DynaMéxico and consistently failed to disclose several matters of material importance to the public.

The Petition requested that Goldgroup be enjoined from: (a) using or disseminating any confidential information belonging to DynaMéxico, (b) asserting that Goldgroup owns any interest in the San Jose de Gracia Project, rather than owning a common shares equity interest in DynaMéxico, (c) improperly disclosing that Goldgroup is the operator of the San Jose de Gracia

Project, rather than Mineras de DynaResource SA de C.V. (“Mineras”), and (d) failing to properly disclose that broad powers of attorney for acting on behalf of DynaMéxico are held by a DynaUSA senior executive.

The Petition further requested, among other things: (a) a temporary and permanent injunction; (b) declaratory relief; (c) disgorgement of funds alleged to have been improperly raised as a consequence of Goldgroup’s wrongful actions; (d) cancellation of shares of DynaMéxico stock held by Goldgroup; and, (d) actual and punitive damages.

At the time of the filing, the Company believed the Petition to be necessary in order to protect its shareholder interests in DynaMexico and in order to protect the property, data, and assets of DynaMexico.

Although Goldgroup challenged the jurisdiction to the filed litigation in Texas, Goldgroup has acknowledged that it owns no direct interest in the San Jose de Gracia Property, and it has acknowledged that Mineras de DynaResource SA de C.V. (“MinerasDyna”), DynaUSA’s 100% owned subsidiary, is the exclusive operator of the San Jose de Gracia Project. Additionally, recent developments in México in 2013, including: (1) the signing of the Exploitation Amendment Agreement (“EAA”) between MinerasDyna and DynaMéxico; (2) the signing of a 20 year land lease agreement between MinerasDyna and the Santa Maria Ejido Community surrounding the San Jose de Gracia Project; and (3) the acquisition by DynaUSA of a majority interest in DynaMéxico; protect against Goldgroup’s wrongfully obtaining and/or disseminating confidential data and information of DynaMéxico. These recent developments in México provided that the Dyna Parties non-suited the Texas action as announced on March 14, 2014, without prejudice to asserting or consolidating claims in México, as well as to contemplate additional claims or regulatory actions against Goldgroup in Canada.

Previously, the Dyna Parties have filed claims against Goldgroup in México, including, without limitation, claims for theft of confidential data and property of DynaMéxico, claims for issuing misleading and inaccurate disclosures and, claims related to Goldgroup's asserting that it owns interests that it does not own.

#### Goldgroup files for Arbitration

On March 14, 2014 Goldgroup filed for arbitration, citing the Earn In Agreement dated September 1, 2006. The Company filed an answer on April 10, disputing that any issues exist which provide for arbitration.

#### Litigation(s) in Mexico – Company is Plaintiff

The Company, and DynaMexico have filed several legal actions in Mexico against Goldgroup Mining Inc, Goldgroup Resources Inc., certain individuals employed or previously employed by Minop, S.A. de C.V. (a Company operating in Mexico and associated with Goldgroup Mining Inc.), and certain individuals retained as agents of Goldgroup Mining Inc. The Company and DynaMexico are plaintiffs in the actions filed in Mexico and the outcomes are pending.

The Company believes that no material adverse change will occur as a result of the actions taken, and the Company further believes that there is little to no potential for the assessment of a material monetary judgment against the Company for legal actions it has filed in Mexico. For purposes of confidentiality, the Company does not provide more specific disclosure in this Form 10-K.

#### Litigations – Company and/or Officers and Directors as Defendants

Other than the Goldgroup claim for arbitration above described, The Company, nor its Officers and Directors have received any formal notice of any legal actions filed against them, nor is the Company or its Officers and Directors aware of any legal actions filed against them.

**Item 4. Mine Safety Disclosures**

None.

26

## PART II

### Item 5. Market for Registrant’s Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

The Company’s common stock is traded on the OTC Markets under the symbol "DYNR". The following table sets forth, for the periods indicated, the high and low bid quotations which set forth reflect inter-dealer prices, without retail mark-up or mark-down and without commissions; and may not reflect actual transactions.

#### Calendar Quarter Ending Low High

March 31, 2012	3.85	4.20
June 30, 2012	3.25	4.15
September 30, 2012	3.70	3.95
December 31, 2012	3.10	4.00
March 31, 2013	2.00	3.95
June 30, 2013	1.20	3.25
September 30, 2013	2.15	3.50
December 31, 2013	1.21	3.50

No cash dividends on the Company common stock have been declared or paid since the Company's inception. The Company had approximately 595 shareholders at December 31, 2013. This does not include shareholders that hold their shares in street name or with a broker.

During the fiscal year ended December 31, 2013, except as included in our Quarterly Reports on Form 10-Q or in our Current Reports on Form 8-K, we have not sold any equity securities not registered under the Securities Act.

During the fiscal year ended December 31, 2013, no securities of the Company were authorized for issuance under equity compensation plans.

### Item 6. Selected Financial Data

Not applicable.

### Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations

#### General

The Company currently holds 80% of the outstanding shares of DynaResource de México, S.A. de C.V. (“DynaMéxico”), which owns 100% of the mineral concessions and related interest to the San José de Gracia mining District (“SJG”). SJG is currently comprised of 33 mining concessions covering approximately 69,121 hectares located in and around San José de Gracia, in northern Sinaloa State, México (“SJG”). SJG is located on the west side of the Sierra Madre Mountains, approximately 250 kilometers inland from the port city of Los Mochis, Sinaloa; and approximately 500 kilometers north of Mazatlan, Sinaloa.

The SJG is a High-Grade Mineralized System which reports historical production of over 1 M. Oz. AU, from a series of underground workings. DynaMéxico is focused on the exploration and future exploitation of this vein-hosted, near surface, and over 400 hundred M. down – dip gold potential, that occurs within fault breccia veins; and has been traced on surface and underground over a 15 Sq. Km. area.

Prior Drilling and Exploration Activity / SJG (1997 / 1998)

A drill program was conducted at SJG in 1997 - 1998 by Golden Hemlock Explorations, Ltd., a prior partner at SJG. Approximately 6,172 meters drilling was completed in 63 core drill holes. Significant intercepts, including bonanza grades, outlined down dip potential of the Northeast section (150 Meter NE to SW extent of the Drilling) of the Los Hilos to La Cecena to Tres Amigos Trend. And, Drill Hole 97-63 confirmed down dip and extension at the Palos Chinos Area of SJG.

Surface and underground sampling in 1999 - 2000 conducted by the Company confirmed high grades in historic workings and surface exposures throughout the SJG district and project area. These high grades outlined the presence of mineralization shoots developed within the veins. The mineralized shoots appear to be controlled by dilational jogs and/or vein intersections. A total of 544 samples were collected in 1999-2000, and assayed an average 6.51 grams/ton (g/t) gold.

Pilot Production Activities (2003 – 2006)

During the period 2003 through 2006, DynaMéxico conducted underground mining and pilot production activities at SJG. The small scale production activities at SJG consisted of improvements to an existing mill, including the installation of a gravity / flotation processing circuit. Initial test runs with tailings from historical production were completed in 2002. Actual mining at the high grade San Pablo area of the SJG property commenced in March 2003. DynaMéxico produced 18,250 Oz. gold from Mid 2003 to June 2006; from mill feed tonnage of 42,500 tons, at an average grade of approximately 15-20 g/t. Production costs were reported at approx. \$175. /Oz.

Magnetic and IP Surveys

Magnetic and IP surveys were conducted throughout the SJG district in 2009, covering an area of approximately 15 Sq. Km.

IP is the primary geophysical target at SJG, and is expected to identify pyrite-based mineralization hosting gold. Initial Survey Grid lines were located approximately perpendicular to inferred geologic strike. The data response from these grid lines indicate one or more IP sources that dip northwest. Additional grid lines were crossed with the initial lines, and appear to identify two separate IP sources.

Grid lines to the South appear to indicate an IP source at > 250 Meters.

Correlation between ground magnetic and IP

In general the correlation between the Magnetic and IP response and data was excellent.

Correlation with recent Drilling Programs and known Mineralization

The data response of the surveys correlated to the recent drilling programs and to the areas of known mineralization at SJG was excellent. Considering this excellent correlation to known mineralization, additional areas of SJG showing similar data response could be indicative of additional target areas.

Identification of Additional Resource Target Areas

Significant survey responses were reported for the following areas; and are projected for follow up drilling:

San Pablo; Up Dip;

San Pablo; Displacement Zone;

Tres Amigos; Down Dip and Northwest;

Tres Amigos; Extension Northeast;

Orange Tree; Down Dip;

La Cecena, Los Hilos, and Tepehauje;

Palos Chinos;

La Prieta;

La Purisima; Down dip at Southeast end;

Argyllic Zone; + 250 M. Down;

Activity for the Year Ended December 31, 2013 and 2012

In 2013, MinerasDyna, the Company's 100% owned subsidiary, in accordance with the terms of the Exploitation Amendment Agreement, refurbished the pilot production facility at SJG, and rehabilitated the San Pablo mine, in order to process bulk mined ore samples from San Pablo through the pilot mill facility. DynaMexico received permits as discussed above for the rehabilitation and operation of the mill facility and the exploitation and mining of the San Pablo area of SJG. The basis for the mining activity and the operation of the pilot mill facility are the NI 43-101 Mineral Resource Estimate, the Technical Report, the block models prepared as a result of the recent drilling activity, and the recent production history of 2003-2006.

National Instrument 43-101 Mineral Resource Estimate (NI 43-101) for San Jose de Gracia

The Company received from DynaMexico on February 14, 2012 a National Instrument 43-101 ("NI 43-101") Mineral Resource Estimate for the SJG property, with an Effective Date of February 6, 2012.

The NI 43-101 Mineral Resource Estimate was prepared by Mr. Robert Sandefur, BS, MSc, P.E., a Qualified Person as defined under NI 43-101, and a senior reserve analyst for Chlumsky, Armbrust & Meyer LLC, Lakewood, CO ("CAM"). The Mineral Resource Estimate concentrates on four separate vein systems at SJG: Tres Amigos, San Pablo, La Union, and La Purisima.

Updated National Instrument 43-101 Technical Report for San Jose de Gracia

The Company received an updated NI 43-101 compliant technical report from DynaMexico on December 31, 2012, for the San Jose de Gracia Project (the “Updated 2012 DynaMexico Luna-CAM SJG Technical Report, and the “updated Technical Report”). The updated Technical Report was approved by DynaMexico, and filed by the Company with SEDAR on December 31, 2012.

The Updated 2012 DynaMexico Luna-CAM SJG Technical Report - Selected Drill Results by Target AreaTres Amigos

Selected drill hole results for Tres Amigos follow:

Block Model in Surpac software

The Company has compiled its manual calculation and internal interpretation of the mineralization at SJG defined by drilling and production to date. The Company has also built the block model of mineralization at SJG using Surpac (Gemcom) software. The current block model at SJG confirms mineralization at San Pablo, Tres Amigos, La Union, Palos Chinos, and La Purisima; with portions of the mineralization in a high grade category, and including mineralization at San Pablo and Tres Amigos, and is consistent with the CAM SJG Mineral Resource Estimate. The Company will continue this Surpac modeling work as additional drill programs are planned and completed.

National Instrument 43-101 Technical Report for San Jose de Gracia

The Company received from DynaMexico on March 28, 2012 a National Instrument 43-101 (“NI 43-101”) compliant Technical Report for the San Jose de Gracia Project (the “2012 DynaMexico Luna-CAM SJG Technical Report”, the “Technical Report”), and approved by DynaResource de Mexico, SA de CV. (“DynaMexico”), the 100% owner of SJG.

The 2012 DynaMexico Luna-CAM SJG Technical Report was prepared by Mr. Ramon Luna, BS, P.Geo., of Servicios y Proyectos Mineros, Hermosillo, Mexico, and a Qualified Person as defined under NI 43-101; and by Mr. Robert Sandefur, BS, MSc, P.E., a senior reserve analyst for Chlumsky, Armbrust & Meyer LLC, Lakewood, CO., and a Qualified Person as defined under NI 43-101. The 2012 DynaMexico Luna-CAM SJG Technical Report includes as Section Fourteen (14) a Mineral Resource Estimate for SJG as prepared by Mr. Sandefur (the “2012 DynaMexico-CAM SJG 43-101 Mineral Resource Estimate”, the “Resource Estimate”).

The Company filed the Technical Report on SEDAR (www.sedar.com) on March 28, 2012.

Updated National Instrument 43-101 Technical Report for San Jose de Gracia

The Company received from DynaMexico on December 31, 2012, an updated NI 43-101 compliant Technical Report for the San Jose de Gracia Project (the “Updated 2012 DynaMexico Luna-CAM SJG Technical Report, and the “updated Technical Report”). The updated Technical Report was approved by DynaMexico, and filed by the Company with SEDAR on December 31, 2012.

Preliminary Economic Assessment Report

DynaMexico approved and released the National Instrument 43-101 (“NI 43-101”) Technical Report for SJG on March 28, 2012, and DynaMexico approved and released the NI 43-101 Updated Technical Report for SJG on December 31,

2012.

Structure of Company / Operations

Activities in México are conducted by DynaMéxico, through operating agreement to the operating subsidiary of DynaResource, Inc., Mineras de DynaResource SA de CV. (“MinerasDyna”); with the management of personnel being contracted by MinerasDyna through to the personnel management subsidiary, DynaResource Operaciones, SA de CV (“DynaOperaciones”). DynaResource, Inc. management and consultants continue to manage the 3 subsidiaries in México; while Chairman / CEO K.D. Diepholz is the President of each of the 3 companies. Management and administrative fees are charged by MinerasDyna and DynaOperaciones, which are eliminated in consolidation.

Competitive Advantage

33

The Company, through its subsidiaries, has been conducting business in México since March 2000. During this period the Company believes it has structured its subsidiaries properly and strategically, and during which time the Company has retained key personnel and developed key relationships and support. The Company believes its experience and accomplishments in México gives it a competitive advantage, even though many competitors may be larger and have more capital resources.

### Drilling Programs

Further drilling programs at SJG are anticipated, but those plans will take into consideration the recent NI 43-101 2012 DynaMexico-CAM SJG Mineral Resource Estimate and the recommendations made in the 2012 DynaMexico Luna-CAM SJG 43-101 Technical Report and the updated Technical Report. The Company expects DynaMexico to plan continued drilling programs at SJG at San Pablo, Tres Amigos, La Cecena, Palos Chinos, La Union, La Purisima, and La Prieta. And, the Company expects DynaMexico's continued exploration efforts to confirm extensions to mineralization in all directions and down dip from the main target areas.

### Note Receivable – Affiliate

DynaResource Nevada, Inc., a Nevada Corporation (“DynaNevada”), with one operating subsidiary in México, DynaNevada de México, SA de CV (“DynaNevada de Mexico”) have common officers, directors and shareholders. The total amount loaned by the Company to DynaNevada at December 31, 2010 was \$750,000 USD. The terms of the Note Receivable provide for a “Convertible Loan”, repayable at 5% interest over a 3 year period, and convertible at the Company's option into Common Stock of DynaNevada at \$0.25 / Share. DynaNevada is a related entity, and through its subsidiary in México (DynaNevada de México), (“DynaNevada de Mexico”), has entered into an Option agreement with Grupo México (“IMMSA”) in México, for the exploration and development of approximately 3,000 hectares in the State of San Luis Potosi (“the Santa Gertrudis Property”). In March, 2010, DynaNevada de Mexico completed the Option with IMMSA so that it now owns 100% of Santa Gertrudis. In June, 2010, DynaNevada de Mexico acquired an additional 6,000 Hectares in the State of Sinaloa (“the San Juan Property”). The Company has loaned additional funds to DynaNevada since 2010 for maintenance of concessions and other nominal required fees and expenses.

### Competition

DynaMéxico retains 100% of the rights to concessions over the area of the San José de Gracia property and it currently sees no competition for mining on the lands covered by those concessions. If DynaMéxico were to re-start production activities, the sale of gold and any bi-products would be subject to global market prices, which prices fluctuate daily. DynaMexico was successful in selling gold concentrates produced from SJG in prior years, and the Company expects a competitive market for produced concentrates and/or other mineral products in the future. Actual prices received by DynaMéxico would depend upon these global market prices, less deductions.

DynaMexico conducted mining and milling operations at SJG from March 2003 through June, 2006. This activity was suspended in order to focus on the exploration of the vast SJG District. The Company's operating subsidiaries, MinerasDyna and DynaOperaciones, receive monthly fees for management of the SJG activities and personnel. These fee amounts are eliminated in consolidation. Other than those intercompany fees, the Company reported no revenue in 2013 and 2012. The Company expects revenues from mining and production in 2014.

### RESULTS FOR THE YEARS ENDED DECEMBER 31, 2013 and 2012

**REVENUE.** Revenue for the years ended December 31, 2013 and 2012 was \$0 and \$0. DynaMexico ceased its production activities in 2006 in order to focus efforts on exploration and drilling activity, for the purpose of defining resources. The Company expects revenues from conducting pilot production activities in 2014.

**EXPLORATION EXPENSES.** Exploration and development costs were \$968,590 and \$895,713 for the years ended December 31, 2013 and 2012 respectively. The increase in costs was due to the increase in activity in refurbishing the mill and preparing to run bulk samples through the mill, whereas in the prior year, the focus was on completing the resource reports and preparing for the next phase of development.

**OPERATING EXPENSES.** Operating expenses for the years ended December 31, 2013 and 2012 were \$2,395,103 and \$3,129,601 respectively. The above expenses include depreciation and amortization amounts of \$67,475 and \$193,767 for the years ended December 31, 2013 and 2012, respectively.

**OTHER INCOME (EXPENSE).** Other income and expense, exclusive of currency translation gain or (loss) included interest income of \$463 and \$835 for the years ended December 31, 2013 and 2012, respectively, and interest expense of \$133,349 and \$0 for the years ended December 31, 2013 and 2012, and other expense of \$4,204 and \$62,859 for the years ended

December 31, 2013 and 2012, respectively. Currency translation gain or (loss) was (\$81,539) and \$339,980 for the years ended December 31, 2013 and 2012, respectively.

NON-CONTROLLING INTEREST. The non-controlling interest portion of our net loss for the year ended December 31, 2013 and 2012 was \$604,135 and \$1,525,745, respectively.

COMPREHENSIVE (LOSS). Comprehensive loss includes the Company's net loss plus the unrealized currency translation gain (loss) of (\$151,730) and (\$30,583) for the years ended December 31, 2013 and 2012. The comprehensive loss was \$(3,127,117) and \$(2,243,856) for the years ended December 31, 2013 and 2012, respectively.

#### Noncontrolling Interest

Under the terms of the Earn In Agreement, Goldgroup Mining Inc. (Goldgroup), through 2010, had earned and owned a 25% interest in DynaResource de Mexico, S.A. de C.V. (DynaMexico), since March 2011 through May 2013, Goldgroup's ownership percentage was 50%, and since May 2013 Goldgroup's ownership percentage was 20%. The applicable portion of the earnings or loss attributable to Goldgroup is offset in this section. In the year ended December 31, 2013 and 2012 the portion of the net loss attributable to Goldgroup was \$604,135 and \$1,525,745 respectively. The decrease in the amount attributable to the non-controlling interest in the current year is due to a decrease in the percentage allocation of expenses in DynaMexico.

#### Currency Translation Income / Loss

The currency translation (loss) was \$(81,539) for the year ended December 31, 2013 and a gain of \$339,980 for the year ended December 31, 2012. These gains or losses are caused by the fluctuation of the exchange rate between the United States dollar and the Mexican peso.

The Company's comprehensive loss before the noncontrolling interest for the years ended December 31, 2013 and 2012 was \$(3,127,117) and \$(2,243,856) respectively. The increase in the loss is attributed to more exploration activities and related costs in 2013 over 2012.

#### Plan of Operation

The Plan of operation for the next twelve months includes MinerasDyna commencing pilot production activities at SJG, while continuing drilling and exploration activities. The amount allocated to each of these activities will depend on the results of the pilot production activities. The Company is required to fund its general and administrative expenses in the US. The Company's operating subsidiaries, MinerasDyna and DynaOperaciones, receive monthly fees for management of SJG activities and personnel. These amounts are eliminated in consolidation. Other than those intercompany fees, the Company reported no revenue in 2013 and 2012. The Company believes that cash on hand is adequate to fund its ongoing general and administrative expenses through 2014. The Company plans to seek additional capital funding during the next 12 months depending on results of pilot production activities, market conditions, results of drilling and exploration activities, and other circumstances.

#### Capital Expenditures

The Company's primary activities relate to the exploration of SJG property through its 80% owned subsidiary DynaMexico. Drilling and other services at SJG are contracted through MinerasDyna, the operating entity under agreement with DynaMexico. The Company does not foresee significant capital purchases in 2014 which would require funding from current cash reserves.

Liquidity and Capital Resources

As of December 31, 2013, the Company maintained working capital of \$958,162, comprised of current assets of \$1,439,382 and current liabilities of \$481,220. This represents a decrease of \$341,179 from the working capital maintained by the Company of \$1,299,341 at December 31, 2012, due primarily to the continued funding of operations in 2013 and expenses related to the refurbishment of the pilot mill facility and the rehabilitation of the San Pablo mine at San Jose de Gracia.

Net cash used in operations for the year ended December 31, 2013 increased to (\$3,925,791) from (\$2,647,026) for the year ended December 31, 2012. Again, this was due to the increased activity relating to the refurbishing of the pilot mill facility and the rehabilitation of the San Pablo mine, and the preparation for processing bulked mine samples through the pilot mill

facility. The pilot mill facility is now operational and we expect to produce revenue from the running bulk samples processed through the mill facility in 2014, in order to fund continuing operations.

Cash used in investing activities was primarily for purchase of fixed assets of \$120,533 in 2013 and cash provided primarily by proceeds of the disposal of fixed assets of \$603,504 in 2012.

Cash provided by financing activities for the year ended December 31, 2013 was \$3,641,625 compared to \$898,544 for the year ended December 31, 2012. The significant increase is due to the Company raising funds in order to refurbish the pilot mill facility and for rehabilitating the San Pablo mine, and to prepare to process bulk mined samples through the mill facility. The main components were the issuance by the Company of notes payable totaling \$1,694,808 and selling Series B preferred stock of \$1,939,500.

#### Advances to Subsidiaries

##### DynaResource de Mexico (“DynaMexico”)

In May 2013, the Company acquired additional equity interest in DynaMexico in exchange for the retirement of accounts receivable of \$2,393,803, which amount was due from DynaMexico at December 31, 2012. As a result, as of May 17, 2013, the Company owned 80% of the outstanding equity of DynaMexico. All intercompany balances eliminate in consolidation.

As of December 31, 2013, the Company has no receivable from DynaMexico, however, the Company’s wholly owned subsidiary MinerasDyna had an accounts receivable due from DynaMexico in the amount of \$2,150,000.

As of December 31, 2012, Company has an \$806,935 account receivable from DynaMexico for expenditures incurred in the normal course of business since June 2000.

As of December 31, 2012, the Company entered into an agreement with DynaMexico in which they agreed to a fee of \$541,915 in order to continue to carry the amount as a receivable. The fee was calculated as if interest had been charged at 4% interest compounded monthly over the period in which the amounts accrued.

During the year ended December 31, 2012, the Company incurred additional expenditures of \$1,044,952 on behalf of DynaResource de Mexico, which was billed to DynaMexico in December 2012.

As of December 31, 2012, the Company had \$2,393,803 due from DynaMexico.

##### Mineras de DynaResource (“MinerasDyna”)

As of December 31, 2013, the Company had advanced \$2,543,000 to MinerasDyna and MinerasDyna had advanced \$2,150,000 to DynaMexico. The total amount of \$2,150,000 is a receivable owed to MinerasDyna from DynaMexico as of December 31, 2013.

As of December 31, 2012 the Company agreed with DynaMexico to accrue interest on the total amount receivable until repaid or otherwise retired. The interest rate to be accrued is agreed to be simple annual interest at the rate quoted by the Bank of Mexico.

The receivables from MinerasDyna and DynaMexico have been eliminated upon consolidation.

As of December 31, 2012 the Company received a commitment from DynaMexico to accrue interest on the total amounts receivable until repaid or otherwise retired. The interest rate to be accrued is agreed to be simple annual

interest at the interest rate quoted by the Bank of Mexico.

Advances from Goldgroup Mining Inc. (“Goldgroup”)

In January 2013, Goldgroup advanced \$120,000 USD to DynaMexico. This \$120,000 contribution from Goldgroup was the first contribution from Goldgroup to DynaMexico since March 2011. And, in January 2014, Goldgroup advanced \$120,000 USD to DynaMexico.

Future Advances to MinerasDyna and DynaMexico from the Company

The Company expects to make additional advances to MinerasDyna and DynaMexico. Future advances from MinerasDyna to DynaMexico will be made under the terms of the Exploitation amendment agreement. Other advances are agreed to be accrued in the same manner as previous receivables, until or unless otherwise agreed between DynaMexico and the Company.

### Sampling Process

The geological data contained in this report was verified by an appropriate quality control person using industry standard quality controls and quality assurance protocols utilized in exploration activities. Standard reference samples and various duplicates are inserted in each batch of assays. Drill core samples are cut by saw on site and samples splits are prepared for shipment, sealed and then shipped for assaying. Samples are sent to a certified assayer (Inspectorate Exploration & Mining Services Ltd., Vancouver, BC.) and analyzed for gold by fire assay and for silver and 34 other trace and major elements in accordance with standard industry practices.

### Drilling Programs

In the period September 2006 through December 31, 2011, funding from Goldgroup provided for DynaMexico's completing approximately 68,741 meters drilling at San Jose de Gracia, resulting in a defined NI 43-101 Mineral Resource Estimate as described in the 2012 DynaMexico-CAM SJG Mineral Resource Estimate. The Company expects MinerasDyna to plan continued and subsequent drilling programs at San Pablo, Tres Amigos, La Cecena, Palos Chinos, La Union, La Purisima, and La Prieta / Rosario / Rudolpho. The Company expects further drilling programs to confirm extensions to mineralization in all directions and down dip from the main target areas.

### Mineralization at San José de Gracia

The Company was informed by DynaMéxico that it had outlined significant mineralization from drilling activity at San Pablo, Tres Amigos, La Union, and La Purisima areas of SJG as described in the recent NI 43-101 2012 DynaMexico-CAM SJG Mineral Resource Estimate. Further drilling is expected to outline additional mineralization at these 4 major target areas at SJG, while additional mineralization are also expected to be defined at La Prieta and the area Northeast of Tres Amigos. Other areas at SJG indicate clear potential to develop additional mineralization.

### No Known Reserves

Currently, the Company's drilling programs (through DynaMexico) are exploratory in nature.

The SJG property is without known reserves. Under U.S. standards, mineralization may not be classified as a "reserve" unless a determination has been made that the mineralization could be economically and legally produced or extracted at the time the reserve determination is made.

### Litigation

On December 27, 2012, the Company, and DynaMexico, filed an Original Petition and Application for Temporary Injunction and Permanent Injunction in the 14<sup>th</sup> Judicial District Court of Dallas, Texas (the "Petition") against Defendants Goldgroup Mining Inc., Goldgroup Resources Inc., and certain individuals acting in concert with Goldgroup (collectively "Goldgroup"). The Petition alleged, among other things, that Goldgroup has wrongfully used property, confidential information and data belonging to DynaMéxico and consistently failed to disclose several matters of material importance to the public.

The Petition requested that Goldgroup be enjoined from: (a) using or disseminating any confidential information belonging to DynaMéxico, (b) asserting that Goldgroup owns any interest in the San Jose de Gracia Project, rather than owning a common shares equity interest in DynaMéxico, (c) improperly disclosing that Goldgroup is the operator of the San Jose de Gracia Project, rather than Mineras de DynaResource SA de C.V. ("MinerasDyna"), and (d) failing to properly disclose that broad powers of attorney for acting on behalf of DynaMéxico are held by a DynaUSA senior executive.

The Petition further requested, among other things: (a) a temporary and permanent injunction; (b) declaratory relief; (c) disgorgement of funds alleged to have been improperly raised as a consequence of Goldgroup's wrongful actions; (d) cancellation of shares of DynaMéxico stock held by Goldgroup; and, (d) actual and punitive damages.

At the time of the filing, the Company believed the Petition to be necessary in order to protect its shareholder interests in DynaMexico and in order to protect the property, data, and assets of DynaMexico.

Although Goldgroup challenged the jurisdiction to the filed litigation in Texas, Goldgroup has acknowledged that it owns no direct interest in the San Jose de Gracia Property, and it has acknowledged that Mineras de DynaResource SA de C.V. ("Mineras"), DynaUSA's 100% owned subsidiary, is the exclusive operator of the San Jose de Gracia Project. Additionally, recent developments in México in 2013, including: (1) the signing of the Exploitation Amendment Agreement ("EAA") between Mineras and DynaMéxico; (2) the signing of a 20 year land lease agreement between Mineras and the Santa Maria Ejido Community surrounding the San Jose de Gracia Project; and (3) the acquisition by DynaUSA of a majority interest in DynaMéxico; protect against Goldgroup's wrongfully obtaining and/or disseminating confidential data and information of DynaMéxico. These recent developments in Mexico provided that the Dyna Parties non-suited the Texas action as announced by the Company on March 14, 2014, without prejudice to asserting or consolidating claims in México, as well as to contemplate additional claims or regulatory actions against Goldgroup in Canada.

Goldgroup files for Arbitration

On March 14, 2014 Goldgroup filed for arbitration, citing the Earn In Agreement dated September 1, 2006. The Company filed an answer on April 10, 2104 disputing that any issues exist which provide for arbitration.

Litigation in Mexico – Company is Plaintiff

The Company, and DynaMexico have filed several legal actions in Mexico against Goldgroup Mining Inc., Goldgroup Resources Inc., certain individuals employed or previously employed by Minop, S.A. de C.V. (a Company operating in Mexico and associated with Goldgroup Mining Inc.), and certain individuals retained as agents of Goldgroup Mining Inc. The Company and DynaMexico are plaintiffs in the actions filed in Mexico and the outcomes are pending.

The Company believes that no material adverse change will occur as a result of the actions taken, and the Company further believes that there is little to no potential for the assessment of a material monetary judgment against the Company for legal actions it has filed in Mexico. For purposes of confidentiality, the Company does not provide more specific disclosure in this Form 10-K.

Litigation – Company and/or Officers and Directors as Defendants

Other than the Arbitration claim of Goldgroup described above, The Company, nor its Officers and Directors have received any formal notice of any legal actions filed against them, nor is the Company or its Officers and Directors aware of any legal actions filed against them.

**Item 7A. Quantitative and Qualitative Disclosures about Market Risk**

Not applicable.

**Item 8. Financial Statements and Supplementary Data**

Incorporated into and forming an integral part of this Form 10-K are the audited financial statements for the Company for the years ended December 31, 2013 and 2012. The financial statements as of December 31, 2013 and 2012, of the Company included in this Form 10-K have been audited by The Hall Group, CPAs, independent registered public accountants, as set forth in their report. The financial statements have been included in reliance upon the authority of them as experts in accounting and auditing.

Financial Statements included in the Form 10-K:

Report of Independent Registered Public Accounting Firm

Consolidated Balance Sheets as of December 31, 2013 and 2012

Consolidated Statements of Operations for the Years Ended December 31, 2013 and 2012 and Cumulative Since Reentering the Exploration Stage (January 1, 2007) through December 31, 2013

Consolidated Statement of Changes in Stockholders' Equity for the Years Ended December 31, 2013 and 2012

Edgar Filing: DYNARESOURCE INC - Form 10-K

Consolidated Statements of Cash Flows for the Years Ended December 31, 2013 and 2012 and Cumulative Since Reentering the Exploration Stage (January 1, 2007) through December 31, 2013

Notes to the Consolidated Financial Statements for the Years Ended December 31, 2013 and 2012

**REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM**

To the Board of Directors and Management of

DynaResource, Inc.

Irving, Texas

We have audited the accompanying consolidated balance sheets of DynaResource, Inc. and subsidiaries as of December 31, 2013 and 2012 and the related consolidated statements of operations, stockholders' equity and cash flows for the years ended December 31, 2013 and 2012 and for the period since reentering the Exploration Stage (January 1, 2007) through December 31, 2013. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits of these financial statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

We were not engaged to examine management's assertion about the effectiveness of DynaResource, Inc.'s internal control over financial reporting as of December 31, 2013 and 2012 and, accordingly, we do not express an opinion thereon.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of DynaResource, Inc. and subsidiaries as of December 31, 2013 and 2012 and the results of its operations and its cash flows for the years ended December 31, 2013 and 2012 and for the period since reentering the Exploration Stage (January 1, 2007) through December 31, 2013 in conformity with accounting principles generally accepted in the United States of America.

**DYNARESOURCE, INC.**

**(An Exploration Stage Company)**

**Notes to the Consolidated Financial Statements**

**December 31, 2013 and 2012**

**NOTE 1 – NATURE OF ACTIVITIES AND SIGNIFICANT ACCOUNTING POLICIES**

**Nature of Activities, History and Organization:**

DynaResource, Inc. (The “Company” or “DynaResource”) was organized September 28, 1937, as a California corporation under the name of West Coast Mines, Inc. In 1998, the Company re-domiciled to Delaware and changed its name to DynaResource, Inc. The Company is in the business of acquiring, investing in, and developing precious metal properties, and the production of precious metals.

In 2000, the Company formed a wholly owned subsidiary, DynaResource de Mexico S.A. de C.V. chartered in Mexico (“DynaMexico”). This Company was formed to acquire, invest in and develop resource properties in Mexico. In 2005, the Company formed DynaResource Operaciones de San Jose De Gracia S.A. de C.V. (“DynaOperaciones”), and acquired effective control of Mineras de DynaResource, S.A de C.V. (formerly Minera Finestierre S.A. De C.V.), (“MinerasDyna”). The Company owned 25% of MinerasDyna and acquired effective control of MinerasDyna by acquiring the option to purchase the remaining 75% of the Shares of MinerasDyna. The Company finalized the option and acquisition of MinerasDyna in January 2010, and now owns 100% of MinerasDyna. The results of these subsidiaries are consolidated with those of the Company.

From January 2008 through March 2011, DynaMexico issued 100 Variable Capital Series “B” Shares to Goldgroup Resources Inc., a wholly owned subsidiary of Goldgroup Mining Inc. Vancouver, BC. (“Goldgroup”), in exchange for Goldgroup’s contributing \$18,000,000 USD to DynaMexico. At March 14, 2011, Goldgroup owned 50% of the outstanding capital shares of DynaMexico.

On June 21, 2013, DynaResource acquired a Certificate for 300 Series “B” Variable Capital Shares of DynaMexico, in exchange for the settlement of accounts receivable from DynaMexico in the amount of \$31,090,710 Mexican Pesos (approximately \$2.4 M USD). After the issuance and receipt of the 300 Series B Shares, DynaUSA holds 80% of the total outstanding Capital of DynaMexico.

The Company produced approximately \$7,637,150 in revenues from production activities conducted during the years ended December 31, 2003 through 2006, and suspended this activity voluntarily to concentrate its efforts on exploration and development. In accordance with that decision, as of January 1, 2007, the Company reentered the Exploration Stage and has presented its cumulative results since reentering the Exploration Stage, in accordance with Accounting Standards Codification (“ASC”) 915 “*Development Stage Entities*” (formerly Statement of Financial Accounting Standard (“SFAS”) No. 7, “*Accounting and Reporting by Development Stage Enterprises*” (“SFAS No. 7”), and will continue this presentation until it again has revenues from operations.

The Company elected to become a voluntary reporting issuer in Canada in order to avail itself of Canadian regulations regarding reporting for mining properties, more specifically, National Instrument 43-101 (NI 43-101). This regulation

sets forth standards for reporting resources in a mineral property and is a standard recognized in the mining industry.

Significant Accounting Policies:

The Company's management selects accounting principles generally accepted in the United States of America and adopts methods for their application. The application of accounting principles requires the estimating, matching and timing of revenue and expense. The accounting policies used conform to generally accepted accounting principles which have been consistently applied in the preparation of these financial statements.

The financial statements and notes are representations of the Company's management which is responsible for their integrity and objectivity. Management further acknowledges that it is solely responsible for adopting sound accounting practices, establishing and maintaining a system of internal accounting control and preventing and detecting fraud. The Company's system of internal accounting control is designed to assure, among other items, that 1) recorded transactions are valid; 2) valid transactions are recorded; and 3) transactions are recorded in the proper period in a timely manner to produce financial statements which present fairly the

financial condition, results of operations and cash flows of the Company for the respective periods being presented.

Basis of Presentation:

The Company prepares its financial statements on the accrual basis of accounting in conformity with accounting principles generally accepted in the United States.

Principles of Consolidation:

The financial statements include the accounts of DynaResource, Inc. as well as DynaResource de Mexico, S.A. de C.V., DynaResource Operaciones S.A. de C.V. and Mineras de DynaResource S.A. de C.V. All significant inter-company transactions have been eliminated. All amounts are presented in U.S. Dollars unless otherwise stated.

Emerging Growth Company Critical Accounting Policy Disclosure:

The Company qualifies as an “emerging growth company” under the 2012 JOBS Act. Section 107 of the JOBS Act provides that an emerging growth company can take advantage of the extended transition period provided in Section 7(a)(2)(B) of the Securities Act for complying with new or revised accounting standards. As an emerging grown company, the Company can delay the adoption of certain accounting standards until those standards would otherwise apply to private companies. The Company may elect to take advantage of the benefits of this extended transition period in the future.

Foreign Currency Translation:

The functional currency for the subsidiaries of the Company is the Mexican peso. As a result, the financial statements of the subsidiary have been re-measured from Mexican pesos into U.S. dollars using (i) current exchange rates for monetary asset and liability accounts, (ii) historical exchange rates for nonmonetary asset and liability accounts, (iii) historical exchange rates for revenues and expenses associated with nonmonetary assets and liabilities and (iv) the weighted average exchange rate of the reporting period for all other revenues and expenses. In addition, foreign currency transaction gains and losses resulting from U.S. dollar denominated transactions are eliminated. The resulting re-measured gain or loss is reported as a separate component of stockholders’ equity (comprehensive income (loss)).

The financial statements of the subsidiaries should not be construed as representations that Mexican pesos have been, could have been or may in the future be converted into U.S. dollars at such rates or any other rates.

Relevant exchange rates used in the preparation of the financial statements for the subsidiary are as follows for the years ended December 31, 2013 and 2012 (Mexican pesos per one U.S. dollar):

	Dec 31, 2013	Dec 31, 2012
Current exchange rate	Pesos 13.07	13.02
Weighted Average exchange rate for the year ended	Pesos 12.75	13.16

Cash and Cash Equivalents:

The Company considers all highly liquid debt instruments with a maturity of three months or less to be cash equivalents. At times, cash balances may be in excess of the Federal Deposit Insurance Corporation ("FDIC") insurance limits. At December 31, 2013, the Company had a balance of \$743,560 that was in excess of the FDIC insurance limit and \$250,000 which is currently insured in full under the FDIC's temporary unlimited coverage on non-interest bearing transactions accounts, which expires on December 31, 2013. The carrying amount approximates fair market value.

Accounts Receivable and Allowances for Doubtful Accounts:

The allowance for accounts receivable is recorded when receivables are considered to be doubtful of collection. No allowance has been established as all receivables were deemed to be fully collectable.

Foreign Tax Receivable:

Foreign Tax Receivable (IVA) is comprised of recoverable value-added taxes charged by the Mexican government on goods and services rendered. Under certain circumstances, these taxes are recoverable by filing a tax return. Amounts paid for IVA are tracked and held as receivables until the funds are remitted. The total amount of the IVA receivable as of December 31, 2013 and 2012 was \$296,038 and \$40,022, respectively.

Inventory:

As the Company ceased mining production in 2006, there is no inventory as of December 31, 2013 and 2012.

Property:

Property is carried at cost. Depreciation is provided over each asset's estimated useful life. Upon retirement and disposal, the asset cost and related accumulated depreciation are removed from the accounts and any resulting gain or loss is included in the determination of net income. Expenditures for geological and engineering studies, maintenance and claim renewals are charged to expense when incurred. Additions and significant improvements are capitalized and depreciated.

Mining Properties:

The Company is an 'Exploration Stage' company as defined in "*SEC Industry Guide 7*". Mining properties consist of 33 mining concessions covering approximately 69,121 hectares, at the San Jose de Gracia property. The cost basis of the properties is deferred until the properties are brought into production, at which time they will be amortized on the unit of production method based on estimated recoverable reserves. The Company has elected to expense a minimal amount of amortization due to the effects of exploration activities on the recoverable reserves. If it is determined that the deferred costs related to a property are not recoverable over its productive life, those costs will be written down to fair value as a charge to operations in the period in which the determination is made. The amounts at which mineral properties and the related deferred costs are recorded do not necessarily reflect present or future values.

The recoverability of the book value of each property will be assessed annually for indicators of impairment such as adverse changes to any of the following:

- estimated recoverable ounces of gold, silver or other precious minerals;
- estimated future commodity prices;
- Estimated expected future operating costs, capital expenditures and reclamation expenditures.

A write-down to fair value will be recorded when the expected future cash flow is less than the net book value of the property or when events or changes in the property indicate that carrying amounts are not recoverable. This analysis will be completed as needed, and at least annually. As of the date of this filing, no events have occurred that would require write-down of any assets. As of December 31, 2013, no indications of impairment existed.

Exploration Costs:

Exploration costs not directly associated with reserves on the mining concessions are charged to operations as incurred. Exploration, development, direct field costs and administrative costs are expensed in the period incurred.

The carrying amounts of the mining concessions are reviewed at each calendar year end to determine whether there is any indication of impairment. As of December 31, 2013, no indications of impairment existed.

Advertising Costs:

The Company incurred no advertising costs for the years ended December 31, 2013 and 2012.

Income Taxes:

Income from the parent company, DynaUSA, is taxed at regular corporate rates per the Internal Revenue Code. Although the Company has tax loss carry-forwards (see Note 5), there is uncertainty as to utilization prior to their expiration. Accordingly, the future income tax asset amounts have been fully offset by a valuation allowance. Income from the subsidiaries, are taxed at applicable Mexican tax law.

Use of Estimates:

In order to prepare financial statements in conformity with accounting principles generally accepted in the United States, management must make estimates, judgments and assumptions that affect the amounts reported in the

financial statements and determines whether contingent assets and liabilities, if any, are disclosed in the financial statements. The ultimate resolution of issues requiring these estimates and assumptions could differ significantly from resolution currently anticipated by management and on which the financial statements are based.

Comprehensive Income:

ASC 220 "*Comprehensive Income*", (formerly SFAS No. 130 "*Reporting Comprehensive Income*"), establishes standards for reporting and display of comprehensive income and its components in a full set of general purpose financial statements. The Company's comprehensive income consists of net income and other comprehensive income (loss), consisting of unrealized net gains and losses on the translation of the assets and liabilities of its foreign operations. For the years ended December 31, 2013 and 2012, the Company's components of comprehensive income were foreign currency translation adjustments and unrealized losses on securities held for sale.

Revenue Recognition:

The Company recognizes revenue in accordance with ASC 605-10, "*Revenue Recognition in Financial Statements*", (formerly Staff Accounting Bulletin No. 104 ("SAB 104")). Revenue is recognized when persuasive evidence of an arrangement exists, delivery or service has occurred, the sale price is fixed or determinable and receipt of payment is probable.

Revenues earned from the sale of precious metal concentrates are recognized as the title to the material is passed to the buyer upon delivery.

Earnings per Common Share:

Earnings (loss) per share are calculated in accordance with ASC 260 "*Earnings per Share*". The weighted average number of common shares outstanding during each period is used to compute basic earnings (loss) per share. Diluted earnings per share are computed using the weighted average number of shares and potentially dilutive common shares outstanding. Dilutive potential common shares are additional common shares assumed to be exercised. Potentially dilutive common shares consist of stock options and are excluded from the diluted earnings per share computation in periods where the Company has incurred a net loss, as their effect would be considered anti-dilutive.

There were no potentially dilutive common stock equivalents as of December 31, 2013, therefore basic earnings per share equals diluted earnings per share for the year ended December 31, 2013. The Company had 1,151,800 options outstanding at December 31, 2013 and 2012, respectively. As the Company incurred a net losses during the years, ended December 31, 2013 and 2012, the basic and diluted loss per common share is the same amount, as any common stock equivalents would be considered anti-dilutive.

Recently Issued Accounting Pronouncements:

The Company does not expect the adoption of recently issued accounting pronouncements to have a significant impact on the Company's results of operations, financial position or cash flows.

**NOTE 2 – PROPERTY**

Property consists of the following at December 31, 2013 and 2012, respectively:

2013	2012
------	------

Mining camp equipment and fixtures	\$648,866	\$547,816
Transportation equipment	262,348	268,256
Lab equipment	14,306	14,306
Machinery and equipment	43,187	43,187
Office furniture and fixtures	76,894	76,894
Office equipment	11,673	11,673
Computer equipment	36,105	36,105
Sub-total	1,093,379	998,237
Less: Accumulated depreciation	(851,861 )	(790,318)
Total Property	\$241,518	\$207,919

51

Depreciation has been provided over each asset's estimated useful life. Depreciation expense was \$67,475 and \$159,209 for the years ended December 31, 2013 and 2012, respectively.

### **NOTE 3 – MINING PROPERTIES**

Mining properties consist of the following at December 31, 2013 and 2012, respectively:

	2013	2012
San Jose de Gracia (“SJG”):		
Mining Concessions	\$4,703,367	\$4,703,367
Less: Accumulated Amortization	(519,400 )	(519,400 )
 Total Mining Properties	 \$4,183,967	 \$4,183,967

Amortization expense was \$0 and \$34,558 for the years ended December 31, 2013 and 2012, respectively.

### **NOTE 4 – INVESTMENT IN AFFILIATE / RECEIVABLES FROM AFFILIATE**

Through December 31, 2013 the Company loaned a total of \$805,760 USD to DynaResource Nevada, Inc. (“DynaNevada”), a Nevada Corporation, which owns 100% of one operating subsidiary in Mexico, DynaNevada de Mexico, SA de CV., (“DynaNevada de Mexico”). The terms of the Note Receivable provided for a “Convertible Loan”, repayable at 5% interest over a 3 year period, and convertible at the Company’s option into common stock of DynaNevada at \$.25 / Share. DynaNevada is a related entity (affiliate), and through its subsidiary DynaNevada de Mexico, has entered into an Option agreement with Grupo Mexico (IMMSA) in Mexico, for the exploration and development of approximately 3,000 hectares in the State of San Luis Potosi (“The Santa Gertrudis Property”). DynaNevada de Mexico completed the Option with IMMSA in March 2010, so that DynaNevada de Mexico now owns 100% of the Santa Gertrudis Property. In June, 2010, DynaNevada de Mexico acquired an additional 6,000 hectares in the State of Sinaloa (the “San Juan Property”).

On December 31, 2010, the Company exercised its option to convert the note receivable and other receivable from DynaNevada into shares of common stock at a rate of \$.25 per share. The Company received 3,223,040 shares, which represents approximately 19.95% of the outstanding shares of DynaNevada. At the time of the exchange, DynaNevada’s net book value was approximately \$695,000, consisting of \$30,000 cash and the remainder unproven mining properties. DynaNevada has a contingent liability arising from the purchase of one of the mining properties, which Management believes has no merit. Based upon the above, Management estimated the value of the Company’s DynaNevada shares as of December 31, 2013 and 2012 to be \$70,000. Management believes the impairment is temporary, and therefore an unrealized loss of \$735,760 has been recorded in other comprehensive income.

The Company has advanced funds to DynaNevada on a regular basis in order for DynaNevada to meet its basis filing and reporting obligations with the Mexican authorities relating to tax returns and paying taxes on its concessions. As of December 31, 2013 and 2012, the advances totaled \$186,840 and \$48,000, respectively. The amounts in 2012 were carried as current assets and in 2013 all are carried in the other assets section.

### **NOTE 5 – PROMISSORY NOTES**

Notes Payable – Series I

At December 31, 2013, the Company was obligated to repay Promissory Notes in the amount of \$1,205,000 (the "Notes"). The Notes bear simple interest at twelve and a half percent (12.5%), accrued for twelve months, and with the accrued interest to be added to the principal, and then interest will be paid by the Company, quarterly in arrears. The holders of the Notes (In Aggregate) are also entitled to receive ten percent (10%) of the net profits received by the Company, and generated from the bulk sampling material (if any, and up to fifty thousand tons) processed through the existing, or improved mill facilities at San Jose de Gracia. This net profit percentage (if any) would be paid quarterly in arrears based on the profits generated (if any) for the prior quarter. Such net profits (if any) are to be calculated after deducting all expenses related to the processing of the bulk sample material, and after a prior deduction of thirty three percent (33%) from the profits, to be deposited in a sinking fund. The Notes mature on December 31, 2015.

The Company has the right to prepay the Notes with a ten percent (10%) penalty. The Note holder may, at any time prior to maturity or prepayment, convert any unpaid principal and accrued interest into Series B Preferred Stock of the Company at \$5.00 per share, or into Common Stock at \$5.00 per share. If the Note is converted into Common Stock, at the time of conversion, the holder would receive a warrant to purchase additional common shares of the Company for \$7.50 per share, such warrant expiring on December 31, 2015.

#### Notes Payable – Series II

At December 31, 2013, the Company was obligated to repay Promissory Notes in the amount of \$149,808 (the “Notes”). The Notes bear simple interest at twelve and a half percent (12.5%), accrued for twelve months, and with the accrued interest to be added to the principal, and then interest will be paid by the Company, quarterly in arrears. The holders of the Notes (In Aggregate) are also entitled to receive ten percent (10%) of the net profits received by the Company, and generated from the bulk sampling material (if any, on the second fifty thousand tons) processed through the existing, or improved mill facilities at San Jose de Gracia. This net profit percentage (if any) would be paid quarterly in arrears based on the profits generated (if any) for the prior quarter. Such net profits (if any) are to be calculated after deducting all expenses related to the processing of the bulk sample material, and after a prior deduction of thirty three percent (33%) from the profits, to be deposited in a sinking fund. The Notes mature on December 31, 2015.

The Company has the right to prepay the Notes with a ten percent (10%) penalty. The Note holder may, at any time prior to maturity or prepayment, convert any unpaid principal and accrued interest into common stock of the Company at \$5.00 per share. At the time of conversion, the holder would receive a warrant to purchase additional common shares of the Company for \$7.50 per share, such warrant expiring on December 31, 2015.

In the third and fourth quarters of 2013, \$340,000 of the promissory notes and \$22,734 of accrued interest were converted to Series B Preferred Stock.

#### **NOTE 6 – INCOME TAXES**

The Company has adopted ASC 740-10, “*Income Taxes*”, which requires the use of the liability method in the computation of income tax expense and the current and deferred income taxes payable (deferred tax liability) or benefit (deferred tax asset). Valuation allowances are established when necessary to reduce deferred tax assets to the amount expected to be realized.

The cumulative tax effect at the expected tax rate of 34% (blended for U.S. and Mexico) of significant items comprising the Company’s net deferred tax amounts as of December 31, 2013 and 2012, respectively:

Deferred Tax Asset Related to:

	2013	2012
	\$8,282,305	\$7,008,203
Prior Year		
Tax Benefit for Current Year	1,217,989	1,274,102
Total Deferred Tax Asset	9,500,294	8,282,305
Less: Valuation Allowance	(9,500,294)	(8,282,305)
Net Deferred Tax Asset	\$0	\$0

The net deferred tax asset and benefit for the current year is generated primarily from the cumulative net operating loss carry-forward which is approximately \$32,500,000 at December 31, 2013, and will expire in the years 2025 through 2031.

The realization of deferred tax benefits is contingent upon future earnings and is fully reserved at December 31, 2013.

**NOTE 7 – RELATED PARTY TRANSACTIONS**

DynaResource de Mexico (“DynaMexico”)

In May 2013, the Company agreed to receive a Share Certificate for 300 Series “B” Variable Capital Shares of DynaMexico, in exchange for the settlement of accounts receivable from DynaMexico in the amount of \$31,090,710

Mexican Pesos (approximately \$2.4 M USD). After the issuance and receipt of the 300 Series B Shares on June 21, 2013, DynaUSA holds 80% of the total outstanding Capital of DynaMexico. As of December 31, 2013, the Company's wholly owned subsidiary MinerasDyna had an account receivable due from DynaMexico in the amount of \$2,150,000.

As of December 31, 2012, the Company had an \$806,935 account receivable from DynaMexico for expenditures incurred in the normal course of business since June 2000.

As of December 31, 2012, the Company entered into an agreement with DynaMexico in which they agreed to a fee of \$541,915 in order to continue to carry the amount as a receivable. The fee was calculated as if interest had been charged at 4% interest compounded monthly over the period in which the amounts accrued.

During the year ended December 31, 2012, the Company incurred additional expenditures of \$1,044,952 on behalf of DynaResource de Mexico, which was billed to DynaMexico in December 2012.

As of December 31, 2012, the Company had \$2,393,803 due from DynaMexico, which is eliminated upon consolidation.

#### Mineras de DynaResource ("MinerasDyna")

As of December 31, 2013, the Company had advanced \$2,543,000 to MinerasDyna. MinerasDyna had advanced \$2,150,000 to DynaMexico as of December 31, 2013. The total amount of \$2,150,000 is a receivable owed to MinerasDyna from DynaMexico as of December 31, 2013.

As of December 31, 2012, the Company agreed with DynaMexico to accrue interest on the total amount receivable until repaid or otherwise retired. The interest rate to be accrued is agreed to be simple annual interest at the rate quoted by the Bank of Mexico.

The receivables from MinerasDyna and DynaMexico have been eliminated upon consolidation.

#### Dynacap Group Ltd.

The Company paid \$52,500 and \$102,500 to Dynacap Group, Ltd. (an entity controlled by officers of the Company) for consulting and other fees during the years ended December 31, 2013 and 2012, respectively.

#### DynaNevada, Inc. and DynaNevada de Mexico S.A. de C.V. (together "DynaNevada")

The Company advanced DynaNevada \$80,000 USD and \$875,000 Mexican pesos (approximately \$67,000 USD) in 2013 and 2012 respectively, for maintenance of its corporate obligations and mining concessions.

### **NOTE 8 – STOCKHOLDERS' EQUITY**

**Authorized Capital.** The total number of shares of all classes of capital stock which the corporation shall have the authority to issue is 45,001,000 shares, consisting of (i) twenty-five million (25,000,000) shares of Common Stock, par value \$.01 per share ("Common Stock"), and (ii) twenty million and one thousand (20,001,000) shares of Preferred Stock, par value \$0.0001 per share ("Preferred Stock"), of which one thousand (1,000) shares shall be designated as

Series A Preferred Stock.

Series A Preferred Stock:

The Company has designated 1,000 shares of its Preferred Stock as Series A, having a par value of \$0.0001 per share. Holders of the Series A Preferred Stock have the right to elect a majority of the Board of Directors of the Company. In October 2007, the Company issued 1,000 shares of Series A Preferred Stock to its CEO. At December 31, 2013 and December 31, 2012 there were 1,000 and 1,000 shares of Series A Preferred Stock outstanding, respectively. The par value changed from \$1.00 to \$0.0001 in the current year.

Series B Preferred Stock:

The Company has designated Series B Preferred Shares having a par value of \$0.0001 per share and it has authorized 1,000,000 Series B Preferred Shares. Holders of the Series B Preferred Shares have the right to convert into Common Stock of the Company on the following schedule:

54

	# of Common Stock		
	# of Common Shares	Warrants Received	Company
Date of Conversion	Received on Conversion	On Conversion for	can force the
	For Each Preferred Share	Each Preferred Share	Option?
April 1 to June 30, 2014	2	0	N
July 1 to Dec 31, 2014	1.5	.75	N
January 1 to June 30, 2015	1	1	N
July 1 to December 31, 2015	1	0	Y

The holders of Series B Preferred Shares do not have voting rights and are not entitled to receive a dividend. At December 31, 2013 and December 31, 2012 there were 460,446 and 0 shares of Series B Preferred Stock outstanding, respectively.

In the third and fourth quarters of 2013, \$340,000 of the promissory notes and \$22,734 of accrued interest were converted to Series B Preferred Stock.

**Preferred Stock:**

In addition to the 1,000 shares designated as Series A Preferred Stock and the 1,000,000 shares designated as Series B Preferred Stock, the Company is authorized to issue an additional 19,000,000 shares of Preferred Stock, having a par value of \$0.0001 per share. The Board of Directors of the Company has authority to issue the Preferred Stock from time to time in one or more series, and with respect to each series of the Preferred Stock, to fix and state by the resolution the terms attached to the Preferred Stock. At December 31, 2013 and December 31, 2012, there were no other shares of Preferred Stock outstanding.

*Separate Series; Increase or Decrease in Authorized Shares.* The shares of each series of Preferred Stock may vary from the shares of any other series thereof in any or all of the foregoing respects and in any other manner. The Board of Directors may increase the number of shares of Preferred Stock designated for any existing series by a resolution adding to such series authorized and unissued shares of Preferred Stock not designated for any other series. Unless otherwise provided in the Preferred Stock Designation, the Board of Directors may decrease the number of shares of Preferred Stock designated for any existing series by a resolution subtracting from such series authorized and unissued shares of Preferred Stock designated for such existing series, and the shares so subtracted shall become authorized, unissued and undesignated shares of Preferred Stock.

**Common Stock:**

The Company is authorized to issue 25,000,000 common shares at a par value of \$0.01 per share. These shares have full voting rights. At December 31, 2013 and 2012, there were 11,052,008 and 10,802,008 shares outstanding, respectively. No dividends were paid in 2013 or 2012.

**Preferred Rights:**

The Company issued "Preferred Rights" and received \$158,500 in 2003 and \$626,000 in 2002, for the rights to percentages of revenues generated from the San Jose de Gracia Pilot Production Plant. This has been reflected as

“Preferred Rights” in stockholders’ equity. As of December 31, 2004, \$558,312 was repaid and as of December 31, 2005, an additional \$186,188 was repaid, leaving a current balance of \$40,000 and \$40,000 as of December 31, 2013 and 2012, respectively.

Stock Issuances:

During 2013, the Company issued 387,900 Series B preferred shares for cash for \$5.00 per share.

During 2013, the Company issued 68,000 Series B preferred shares for debt at \$5.00 per share.

During 2013, the Company issued 4,546 Series B preferred shares for accrued interest at \$5.00 per share.

During 2013, the Company issued 250,000 common shares to MinerasDyna for services. This has been reflected as treasury stock in the equity section of the financial statements. Expense related to these services has been eliminated in consolidation.

During 2012, the Company issued 199,140 common shares for cash.

During 2012, the Company issued no shares for services.

Treasury Stock:

During 2013, the Company repurchased 28,551 shares for \$94,500.

During 2012, the Company repurchased 12,954 shares for \$50,750.

Treasury stock is accounted for by the cost method.

Options and Warrants:

The Company had 1,151,800 options or warrants outstanding at December 31, 2013.

During 2013, no options were issued, none were exercised and none expired. The Company recorded expense related to the issuance of these options in accordance with the Black Scholes option pricing model.

The Company had 1,151,800 options or warrants outstanding at December 31, 2012.

During 2012, 1,126,800 options were issued, none were exercised and none expired. The Company recorded expense related to the issuance of these options in accordance with the Black Scholes option pricing model.

**NOTE 9 – EMPLOYEE BENEFIT PLANS**

During the years ended December 31, 2013 and 2012, there were no qualified or non-qualified employee pension, profit sharing, stock option, or other plans authorized for any class of employees.

**NOTE 10 – COMMITMENTS AND CONTINGENCIES**

The Company is required to pay Mexican taxes in order to maintain their concessions. Additionally, the Company is required to incur a minimum amount of expenditures each year for all concessions held. The minimum expenditures are calculated based upon the land area, as well as the age of the concessions. Amounts spent in excess of the minimum may be carried forward indefinitely over the life of the concessions, and are adjusted annually for inflation. Based on Management's business plans, they do not anticipate any issues in meeting the minimum annual expenditures for the concessions, and the Company retains sufficient carry forward amounts to cover over 20 years of the minimum expenditure (as calculated at the 2010 minimum, adjusted for annual inflation of 4%). In 2013, DynaMexico paid concession taxes of \$2,812,922 Mexican pesos in January and the same amount in July which totals approximately \$441,500 US dollars.

In September 2008, the Company entered into a 37 month lease agreement for its corporate office. In August, 2013 the Company entered into a one year extension of the lease through August 31, 2014. The Company paid rent expense of \$48,008 and \$46,080 related to this lease for the years ended December 31, 2013 and 2012.

The following is a schedule of minimum lease payments required under the existing lease as of December 31, 2013:

Year Ended	Amount
December 31:	
2014	\$33,332
2015 and beyond	0

\$33,332

Litigation.

On December 27, 2012, the Company, and DynaMexico, filed an Original Petition and Application for Temporary Injunction and Permanent Injunction in the 14<sup>th</sup> Judicial District Court of Dallas, Texas (the “Petition”) against Defendants Goldgroup Mining Inc., Goldgroup Resources Inc., and certain individuals acting in concert with Goldgroup (collectively “Goldgroup”). The Petition alleged, among other things, that Goldgroup has wrongfully used property, confidential information and data belonging to DynaMéxico and consistently failed to disclose several matters of material importance to the public.

The Petition requested that Goldgroup be enjoined from: (a) using or disseminating any confidential information belonging to DynaMéxico, (b) asserting that Goldgroup owns any interest in the San Jose de Gracia Project, rather than owning a common shares equity interest in DynaMéxico, (c) improperly disclosing that Goldgroup is the operator of the San Jose de Gracia Project, rather than Mineras de DynaResource SA de C.V. (“MinerasDyna”), and (d) failing to properly disclose that broad powers of attorney for acting on behalf of DynaMéxico are held by a DynaUSA senior executive.

56

The Petition further requested, among other things: (a) a temporary and permanent injunction; (b) declaratory relief; (c) disgorgement of funds alleged to have been improperly raised as a consequence of Goldgroup's wrongful actions; (d) cancellation of shares of DynaMéxico stock held by Goldgroup; and, (d) actual and punitive damages.

At the time of the filing, the Company believed the Petition to be necessary in order to protect its shareholder interests in DynaMexico and in order to protect the property, data, and assets of DynaMexico.

Although Goldgroup challenged the jurisdiction of Texas to the filed litigation, Goldgroup has acknowledged that it owns no direct interest in the San Jose de Gracia Property, and it has acknowledged that Mineras de DynaResource SA de C.V. ("Mineras"), DynaUSA's 100% owned subsidiary, is the exclusive operator of the San Jose de Gracia Project. Additionally, recent developments in México in 2013, including: (1) the signing of the Exploitation Amendment Agreement ("EAA") between Mineras and DynaMéxico; (2) the signing of a 20 year land lease agreement between Mineras and the Santa Maria Ejido Community surrounding the San Jose de Gracia Project; and (3) the acquisition by DynaUSA of a majority interest in DynaMéxico; protect against Goldgroup's wrongfully obtaining and/or disseminating confidential data and information of DynaMéxico.

These recent developments in México provided that the Dyna Parties non-suited the Texas action as announced by the Company on March 14, 2014, without prejudice to asserting or consolidating claims in México, as well as to contemplate additional claims or regulatory actions against Goldgroup in Canada.

#### Goldgroup files for Arbitration

On March 14, 2014 Goldgroup filed for arbitration, citing the Earn In Agreement dated September 1, 2006. The Company filed an answer on April 10, 2014 disputing that any issues exist which provide for arbitration.

#### Litigation in Mexico – Company is Plaintiff

The Company, and DynaMexico have filed several legal actions in Mexico against Goldgroup Mining Inc., Goldgroup Resources Inc., certain individuals employed or previously employed by Minop, S.A. de C.V. (a Company operating in Mexico and associated with Goldgroup Mining Inc.), and certain individuals retained as agents of Goldgroup Mining Inc. The Company and DynaMexico are plaintiffs in the actions filed in Mexico and the outcomes are pending.

The Company believes that no material adverse change will occur as a result of the actions taken, and the Company further believes that there is little to no potential for the assessment of a material monetary judgment against the Company for legal actions it has filed in Mexico. For purposes of confidentiality, the Company does not provide more specific disclosure in this Form 10-K.

#### Litigation – Company and/or Officers and Directors as Defendants

Other than the filing for arbitration by Goldgroup described above, The Company, nor its Officers and Directors have received any formal notice of any legal actions filed against them, nor is the Company or its Officers and Directors aware of any legal actions filed against them.

#### **NOTE 11 – NON-CONTROLLING INTEREST**

The Company's Non-controlling Interest recorded in the consolidated financial statements relates to a minority interest in DynaResource de México, S.A. de C.V. of 50% through May 17, 2013 and 20% thereafter. Changes in Non-controlling Interest for the years ended December 31, 2013 and 2012, respectively:

	2013	2012
Beginning balance	\$(5,122,891)	\$(3,588,806)
Operating income (loss)	(604,135 )	(1,525,745)
Other comprehensive income (loss)	(2,800 )	(8,340 )
Ending balance	\$(5,729,826)	\$(5,122,891)

The Company began allocating a portion of other comprehensive income (loss) to the non-controlling interest with the adoption of FASB 160 as of January 1, 2009.

**NOTE 12 – FAIR VALUE OF FINANCIAL INSTRUMENTS**

The ASC guidance for fair value measurements and disclosure establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are described below:

*Level 1 Inputs* – Quoted prices for identical instruments in active markets.

*Level 2 Inputs* – Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations whose inputs are observable or whose significant value drivers are observable.

*Level 3 Inputs* – Instruments with primarily unobservable value drivers.

As of December 31, 2013 and 2012, the Company’s financial assets are measured at fair value using Level 3 inputs, with the exception of cash, which was valued using Level 1 inputs. There were no financial liabilities as of December 31, 2013 and 2012.

**Fair Value Measurement at December 31, 2012**

Using:

		Quoted Prices In Active Markets For Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets:				
Cash and Cash Equivalents	\$1,143,344	\$1,143,344	\$ -	\$ -
Investment in Affiliate	70,000	-	-	70,000

**Fair Value Measurement at December 31, 2011**

Using:

December 31, 2012	Quoted Prices In Active Markets	Significant Other Observable	Significant Unobservable
----------------------	--	------------------------------------	-----------------------------

		<b>For Identical Assets  (Level 1)</b>	<b>Inputs (Level 2)</b>	<b>Inputs (Level 3)</b>
Assets:				
Cash and Cash Equivalents	\$ 1,522,652	\$ 1,522,652	\$ -	\$ -
Investment in Affiliate	70,000	\$-	\$ -	\$ 70,000

**NOTE 13 – SUBSEQUENT EVENTS**

The Company has evaluated its activities subsequent to December 31, 2013 through April 15, 2014 and noted the following reportable events:

Subsequent to December 31, 2013, MinerasDyna entered into a 20 Year Land Lease Agreement with the Santa Maria Ejido Community surrounding San Jose de Gracia. The land lease agreement is dated January 6, 2014 and continues through 2033. It covers an area of 4,399 hectares surrounding the main mineral resource areas of SJG, and provides for annual lease payments by MinerasDyna of \$ 1,359,443 Pesos (approx. \$ 104,250 USD), commencing in 2014. Additionally, under the description of the 20 Year Land Lease, MinerasDyna expects to construct a Medical Facility at SJG in year 2014, and a Community Center in year 2015.

## **Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure**

None.

### **Item 9A. Controls and Procedures**

#### Evaluation of Disclosure on Controls and Procedures

We carried out an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) as of December 31, 2013. This evaluation was accomplished under the supervision and with the participation of our chief executive officer / principal executive officer, and chief financial officer / principal financial officer who concluded that our disclosure controls and procedures are effective to ensure that all material information required to be filed in the annual report on Form 10-K has been made known to them.

For purposes of this section, the term disclosure controls and procedures means controls and other procedures of an issuer that are designed to ensure that information required to be disclosed by the issuer in the reports that it files or submits under the Act (15 U.S.C. 78a et seq.) is recorded, processed, summarized and reported, within the time periods specified in the Commission's rules and forms. Disclosure, controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed in our reports filed under the Securities Exchange Act of 1934, as amended (the "Act") is accumulated and communicated to the issuer's management, including its principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

Based upon an evaluation conducted for the period ended December 31, 2013, our Chief Executive and Chief Financial Officer as of December 31, 2013 and as of the date of this Report, has concluded that as of the end of the periods covered by this report, we have identified no material weakness in our internal control.

#### Management's Annual Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rules 13a-15(f) and 15d-15(f) of the Exchange Act. Our internal control system was designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes, in accordance with generally accepted accounting principles in the United States of America. Our internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with accounting principles generally accepted in the United States of America, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management of the Company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

Because of inherent limitations, a system of internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate due to change in conditions, or that the degree of compliance with the policies or

procedures may deteriorate.

Our management conducted an evaluation of the effectiveness of our internal control over financial reporting using the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control—Integrated Framework at December 31, 2013. Based on its evaluation, our management concluded that, as of December 31, 2013, our internal control over financial reporting was effective and contained no material weaknesses. A material weakness is a deficiency, or a combination of control deficiencies, in internal control over financial reporting such that there is a reasonable possibility that a material misstatement of the Company's annual or interim financial statements will not be prevented or detected on a timely basis.

This annual report does not include an attestation report of the Company's registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to the attestation by the Company's registered public accounting firm pursuant to rules of the SEC that permit the Company to provide only management's report in this annual report.

Changes in Internal Controls over Financial Reporting

We have not made any changes in our internal controls over financial reporting that occurred during the period covered by this report on Form 10-K that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

**Item 9B. Other Information**

None.

**PART III****Item 10. Directors, Executive Officers and Corporate Governance**

The following table lists the names and ages of the executive officers, directors and key consultants of the Company. Diepholz - Graduated Lake Land College; Communications and Business Emphasis; Regional Director-Fidelity Union Insurance and Investment, Dallas, Texas (1980 -1983); President - KWD Properties Corporation, Mattoon, Illinois (1983 - 1989); a privately-held Oil & Gas Exploration and Development Company involved in all phases of The Oil & Gas Business, and Various Types of Partnerships; Vice President - American Investment Retirement Corporation, Phoenix, Arizona (1990 - 1991), Involved in Program Structuring for Pension Accounts; Vice President - Ideal Securities, Inc., Dallas, Texas (1992); Program Structuring and Marketing Management; President - DP Phoenix, a Real Estate Investment Company, Phoenix, Arizona (1991 -1992); Investment Program Structuring, Real Estate Acquisitions, General Management; Director: Farm Partners, Inc., Dallas, Texas (1992-

Present); General Management of this General Partner to Precious Metals Limited Partnership; DP Group Ltd., Dallas, Texas (1993 - Present); President of this independent Marketing firm; Dynacap Group Ltd., Dallas, Texas (1992 - Present); President of this Consulting and Management firm, directing the management of certain Limited Liability Investment Companies; DynaResource, Inc. (f/k/a: West Coast Mines, Inc.), Dallas, Texas (1994-Present); Chairman, President, Treasurer, and Director. Special skills in the areas of Business Development, Project Planning, Corporate Financing, Acquisition Analysis, Investment Program Interpretation and Structuring. Mr. Diepholz has been instrumental in the negotiations of: the acquisition of 24.9 % Net Profits Interest in the San José de Gracia in 1995; the acquisition of an additional 25 % interest in San José de Gracia in 1998; the acquisition and consolidation of 100 % of the rights to the San José de Gracia from prior owners, culminating at March, 2000; the acquisition and consolidation of several outstanding Concessions at the San José de Gracia from previous Mexican owners during 2000-3; the Direction and Management of the production operation at SJG; and the negotiation of the Stock Purchase / Earn In Agreement with Goldgroup Mining, Inc. in 2006. Mr. Diepholz is the current Chairman / CEO of the Company; and he holds the same position with DynaResource Nevada, Inc., an affiliated Company. Mr. Diepholz is also the current President of the following subsidiaries of the Company in Mexico; DynaResource de Mexico (“DynaMexico”), and holding all the Powers of Attorney for the Company, Mineras de DynaResource (“MinerasDyna”), and DynaResource Operaciones (“DynaOperaciones”); And, Mr. Diepholz is also the President of DynaNevada de Mexico, the wholly owned subsidiary of DynaResource Nevada Inc.

Dr. Jose Vargas Lugo. Dr. Vargas is a licensed physician with graduate from the Universidad Nacional Autonoma de Mexico (UNAM); and is a 4<sup>th</sup> year law student at Universidad Autonoma de Sinaloa (UAS). Dr. Vargas commenced his relation with the mining business with Minera Industrial Peñoles as a Medical Assistant to the Mining Services Division of Peñoles in Fresnillo, Zacatecas. Since 1993, Dr. Vargas has been a supplier of industrial goods and services in and around the municipalities of Sinaloa de Leyva and Mocorito Sinaloa. Dr. Vargas has worked with companies such as Compañía Minera El Rosarito, which was conducting operations at San Jose de Gracia during the period 1993 – 1995. Dr. Vargas later provided services and supplies to Mineras Finesterre at San Jose de Gracia, and to Minera Pangea, which was owned by Queenstake Resources, then Nevada Pacific, and now US. Gold. Dr. Vargas began working with DynaResource de Mexico in spring 2000; as it commenced activities to acquire and consolidate the San Jose de Gracia District. Over the past + 10 Years, Dr. Vargas has proven to be an integral part of the Company’s activities at San Jose de Gracia and in Sinaloa State; involved in all facets of the Company’s business. Dr. Vargas has proven instrumental in the areas of public relations, community relations, governmental affairs, environmental matters, and overall management of the company’s business activities in Mexico. Dr. Vargas is expected to be a leader for the Company’s activities in Mexico for the foreseeable future.

Keith W. Brogoitti. Mr. Brogoitti has more than 30 years operational and managerial experience in mineral exploration, development, and production involving uranium, base metal and precious metal sectors of the mining industry. Mr. Brogoitti worked on the development of one of the first commercial gold/silver heap leach projects in Nevada. He has held various management positions with Ivanhoe Mines Ltd., Newmont, Bema Gold and Compañía Minera Antamina. He has also worked as a technical consultant for Placer Dome, Noranda, Compañía Minera Antamina, Kennecott, Phelps Dodge, Asarco and BHP. Mr. Brogoitti has extensive international work experience in the Middle East, Asia and Central and South America.

Chad Mooney. Mr. Mooney has over 35 year’s highly productive history on Wall Street, and brings with him an extraordinary record of achievement in financial management and public and private capital markets. Mr. Mooney previously built a top 10 business at Smith Barney, where he was the largest equity syndicate producer, as well as having the largest listed equity trading business. Mr. Mooney chaired the Director’s Advisory Group at Smith Barney, representing all financial advisors at Smith Barney, and he reported directly to his mentor, Mr. Jamie Dimon, the

current Chairman and CEO of financial giant, JP Morgan Chase & Co. From 1990 to 2004, Mr. Mooney served as Director of Investments for Smith Barney, and personally oversaw and advised \$ 3.5 B. in client assets. In 2000, after playing a key role in building the largest water company in the world (U.S. Filter, a NYSE Listed Company) Mr. Mooney coordinated the sale of U.S. Filter to Vivendi, for \$ 8.1 B Cash. Joining DynaUSA in September, 2013, Mr. Mooney is expected to work directly with Company Chairman-CEO Mr. K.D. Diepholz, and will manage the Company's interface with public and private capital, capital markets, Investment Banks and individual investors.

Charles Smith. Mr. Smith graduated from Boston University, Boston, Massachusetts in 1979 and since that time has been a Certified Public Accountant involved in all phases of business including audit and tax matters. He is a

consultant to various companies. Some of Mr. Smith's business affiliations the past five years include: Chief Financial Officer of DynaResource, Inc. – May 2005 to present.
