

GENERAL CABLE CORP /DE/

Form S-3

September 19, 2003

As filed with the Securities and Exchange Commission on September 19, 2003

Registration No. 333-

SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM S-3

REGISTRATION STATEMENT UNDER THE SECURITIES ACT OF 1933

GENERAL CABLE CORPORATION

(Exact name of registrant as specified in its charter)

Delaware

(State or other jurisdiction
of incorporation or organization)

06-1398235

(I.R.S. Employer
Identification No.)

**4 Tesseneer Drive
Highland Heights, Kentucky 41076
(859) 572-8000**

(Address, including zip code, and telephone number, including area code, of registrant's principal executive offices)

**Robert J. Siverd
Executive Vice President, General Counsel and Secretary
General Cable Corporation
4 Tesseneer Drive
Highland Heights, Kentucky 41076
(859) 572-8000**

(Name, address, including zip code, and telephone number, including area code, of agent for service)

Copy to:
**Alan H. Lieblich
Brad L. Shiffman
Blank Rome LLP
One Logan Square
Philadelphia, Pennsylvania 19103
(215) 569-5500**

Approximate date of commencement of proposed sale to the public: From time to time after the effective date of this

Registration Statement, as determined in light of market and other conditions.

If the only securities being registered on this Form are being offered pursuant to dividend or interest reinvestment plans, please check the following box.

If any of the securities being registered on this Form are to be offered on a delayed or continuous basis pursuant to Rule 415 under the Securities Act of 1933, as amended (the "Securities Act"), other than securities offered only in connection with dividend or interest reinvestment plans, check the following box.

Edgar Filing: GENERAL CABLE CORP /DE/ - Form S-3

If this Form is filed to register additional securities for an offering pursuant to Rule 462(b) under the Securities Act, please check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering.

If this Form is a post-effective amendment filed pursuant to Rule 462(c) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering.

If delivery of the prospectus is expected to be made pursuant to Rule 434, please check the following box.

CALCULATION OF REGISTRATION FEE

Title of each Class of securities to be registered	Amount to be registered	Proposed maximum offering price per security	Proposed maximum aggregate offering price	Amount of registration fee
Debt Securities	(1)	(1)	(1)	N/A
Preferred Stock	(1)	(1)	(1)	N/A
Common Stock	(1)	(1)	(1)	N/A
Total	\$ 100,000,000	(1)	\$ 100,000,000	\$ 8,090.00(2)

(1) There are being registered hereunder such indeterminate principal amount of debt securities, such indeterminate number of shares of preferred stock and such indeterminate number of shares of common stock as shall have an aggregate initial offering price not to exceed \$100,000,000. If any debt securities are issued at an original issue discount, then the securities registered shall include such additional debt securities as may be necessary such that the aggregate initial public offering price of all securities issued pursuant to this Registration Statement will equal \$100,000,000. The proposed maximum initial offering price per security will be determined, from time to time, by the Registrant in connection with the issuance by the Registrant of the securities registered hereunder. There are also being registered hereunder an indeterminate number of shares of common stock as shall be issuable upon conversion or exercise of any debt securities or preferred stock that provide for that issuance or issuable as payment of dividends on, or redemption or repurchase of, preferred stock.

(2) Calculated pursuant to Rule 457(o) of the rules and regulations under the Securities Act.

The Registrant hereby amends this Registration Statement on such date or dates as may be necessary to delay its effective date until the Registrant shall file a further amendment which specifically states that this Registration Statement shall thereafter become effective in accordance with Section 8(a) of the Securities Act or until the Registration Statement shall become effective on such date as the Securities and Exchange Commission, acting pursuant to said Section 8(a), may determine.

The information in this preliminary prospectus is not complete and may be changed. We may not sell these securities until the registration statement filed with the Securities and Exchange Commission is effective. This preliminary prospectus is not an offer to sell these securities nor does it seek an offer to buy these securities in any jurisdiction where the offer or sale is not permitted.

Subject to Completion. Dated September 19, 2003.

GENERAL CABLE CORPORATION

\$100,000,000

DEBT SECURITIES PREFERRED STOCK COMMON STOCK

General Cable Corporation from time to time may offer to sell debt securities, preferred stock or common stock, including common stock issuable upon the conversion of debt securities or preferred stock or as payment of dividends on, or redemption or repurchase of, preferred stock, or any combination of the foregoing. We may also offer common stock issuable upon the conversion of debt securities or preferred stock. The total amount of these securities will have an initial aggregate offering price of up to \$100,000,000, or the equivalent amount in other currencies, currency units or composite currencies. Our common stock is listed on the New York Stock Exchange and trades under the symbol [BGC].

We may offer and sell these securities to or through one or more underwriters, dealers and agents, or directly to purchasers, on a continuous or delayed basis.

This prospectus describes some of the general terms that may apply to these securities and the general manner in which they may be offered. The specific terms of any securities to be offered, and the specific manner in which they may be offered, will be described in the applicable prospectus supplement. You should read this prospectus and the applicable prospectus supplement carefully before you invest.

An investment in the debt securities, preferred stock or common stock involves a high degree of risk. You should carefully consider the risk factors beginning on page 5 of this prospectus and any other information in this prospectus or any prospectus supplement before deciding to purchase the debt securities, preferred stock or common stock.

Neither the Securities and Exchange Commission nor any other regulatory body has approved or disapproved of these securities or passed upon the accuracy or adequacy of this prospectus. Any representation to the contrary is a criminal offense.

This prospectus is dated , 2003.

ABOUT THIS PROSPECTUS

This document is called a prospectus and is part of a registration statement that we filed with the Securities and Exchange Commission, or SEC, using a "shelf" registration or continuous offering process. Under this shelf process, we may from time to time sell any combination of the securities described in this prospectus in one or more offerings up to a total U.S. dollar equivalent of \$100,000,000.

This prospectus provides you with a general description of the securities we may offer. Each time we sell securities, we will provide a prospectus supplement containing specific information about the terms of the securities being offered. That prospectus supplement may include a discussion of any risk factors or other special considerations that apply to those securities. The prospectus supplement may also add, update or change information in this prospectus. If there is any inconsistency between the information in this prospectus and a prospectus supplement, you should rely on the information in that prospectus supplement. You should read both this prospectus and any prospectus supplement together with the additional information described under the heading "Where You Can Find More Information."

The registration statement containing this prospectus, including exhibits to the registration statement, provides additional information about us and the securities offered under this prospectus. The registration statement can be read at the SEC web site or at the SEC office mentioned under the heading "Where You Can Find More Information."

When acquiring any securities discussed in this prospectus, you should rely only on the information provided in this prospectus and the prospectus supplement, including the information incorporated by reference. Neither we, nor any underwriters or agents, have authorized anyone to provide you with different information. We are not offering the securities in any state where such an offer is prohibited. You should not assume that the information in this prospectus, any prospectus supplement, or any document incorporated by reference, is truthful or complete at any date other than the date mentioned on the cover page of those documents.

Unless otherwise mentioned or unless the context requires otherwise, all references in this prospectus to "General Cable", "we", "us", "our", or similar references mean General Cable Corporation together with its subsidiaries.

FORWARD-LOOKING STATEMENTS

Certain of the matters we discuss in this prospectus, any prospectus supplement and other documents we file with the SEC may constitute forward-looking statements. You can identify a forward-looking statement because it contains words such as "believes," "expects," "may," "will," "should," "seeks," "approximately," "intends," "plans," "estimates," "anticipates" or similar expressions which concern strategy, plans or intentions. All statements we make relating to estimated and projected earnings, margins, costs, expenditures, cash flows, growth rates and financial results are forward-looking statements. In addition, we, through our senior management, from time to time make forward-looking public statements concerning our expected future operations and performance and other developments. These statements are necessarily estimates reflecting our judgment based upon current information and involve a number of risks and uncertainties. We cannot assure you that other factors will not affect the accuracy of these forward-looking statements or that our actual results will not differ materially from the results we anticipate in the forward-looking statements. While it is impossible for us to identify all the factors which could cause our actual results to differ materially from those we estimated, we describe some of these factors under the heading "Risk Factors." We do not undertake to update any forward-looking statement, whether written or oral, that may be made from time to time by or on behalf of us.

[Back to Contents](#)

GENERAL CABLE CORPORATION

We are a leader in the development, design, manufacture, marketing and distribution of copper, aluminum and fiber optic wire and cable products for the communications, energy, industrial and specialty markets. Communications wire and cable transmit low-voltage signals for voice, data, video and control applications. Energy cables include low-, medium- and high-voltage power distribution and power transmission products. Industrial and specialty wire and cable products conduct electrical current for industrial & commercial power and control applications. We believe that our principal competitive strengths include our breadth of product line; brand recognition; distribution and logistics; service and operating efficiency.

[Back to Contents](#)

RISK FACTORS

Investing in our securities involves a high degree of risk. You should carefully consider the following risk factors and other information contained in this prospectus and any applicable prospectus supplement before investing in our securities.

RISKS RELATED TO BUSINESS

Our net sales, net income and growth depend largely on the economies in the geographic markets that we serve.

Many of our customers use our products as components in their own products or in projects undertaken for their customers. Our ability to sell our products is largely dependent on general economic conditions, including how much our customers and end-users spend on information technology, on building, maintaining or reconfiguring their communications network, industrial manufacturing assets and power transmission and distribution infrastructures and on new construction. Over the past few years many companies have significantly reduced their capital equipment and information technology budgets, and construction activity that necessitates the building or modification of communication networks and power transmission and distribution infrastructures has slowed considerably as a result of a weakening of the U.S. and foreign economies. As a result, our revenues and financial results have declined significantly. In the event that these markets do not improve, or if they were to become weaker, we could suffer further decreased sales and net income and we could be required to enact further restructurings.

The market for our products is highly competitive.

The markets for copper, aluminum and fiber optic wire and other cable products are highly competitive, and some of our competitors may have greater financial resources than we do. We compete with at least one major competitor with respect to each of our business segments, although no single competitor competes with us across the entire spectrum of our product lines. Many of our products are made to common specifications and therefore may be fungible with competitors' products. Accordingly, we are subject to competition in many markets on the basis of price, delivery time, customer service and our ability to meet specific customer needs.

We believe our competitors will continue to improve the design and performance of their products and to introduce new products with competitive price and performance characteristics. We expect that we will be required to continue to invest in product development, productivity improvements and customer service and support in order to compete in our markets. Furthermore, an increase in imports into our markets of products competitive with our products could adversely affect our sales.

Our business is subject to the economic and political risks of maintaining facilities and selling products in foreign countries.

During fiscal 2002, 30% of our sales and 40% of our assets were in markets outside the United States. Our financial results may be adversely affected by significant fluctuations in the value of the U.S. dollar against foreign currencies or by the enactment of exchange controls or foreign governmental or regulatory restrictions on the transfer of funds. In addition, negative tax consequences relating to repatriating certain foreign currencies, particularly cash generated by our operations in Spain, may adversely affect our cash flows. During 2002, our Spanish operations generated 42% of our cash flows from operations. Furthermore, our foreign operations are subject to risks inherent in maintaining operations abroad, such as economic and political destabilization, international conflicts, restrictive actions by foreign governments, nationalizations, changes in regulatory requirements, the difficulty of effectively managing diverse global operations and adverse foreign tax laws.

Changes in industry standards and regulatory requirements may adversely affect our business.

As a manufacturer and distributor of wire and cable products we are subject to a number of industry standard-setting authorities, such as Underwriters Laboratories, the Telecommunications Industry Association, the

[Back to Contents](#)

Electronics Industries Association and the Canadian Standards Association. In addition, in many markets, our products are subject to the requirements of federal, state and local or foreign regulatory authorities. Changes in the standards and requirements imposed by such authorities could have an adverse effect on us. In the event we are unable to meet any such standards when adopted our business could be adversely affected. In addition, changes in the legislative environment could affect the growth and other aspects of important markets served by us. While certain legislative bills and regulatory rulings are pending in the energy and telecommunications sectors which could improve our markets, any delay or failure to pass such legislation and regulatory rulings could adversely affect our opportunities and anticipated prospects may not arise. It is not possible at this time to predict the impact that any such legislation or regulation or failure to enact any such legislation or regulation, or other changes in laws or industry standards that may be adopted in the future, could have on our financial results, cash flows or financial position.

Advancing technologies, such as fiber optic and wireless technologies, may make some of our products less competitive.

Technological developments could have a material adverse effect on our business. For example, a significant decrease in the cost and complexity of installation of fiber optic systems or increase in the cost of copper based systems could make fiber optic systems superior on a price performance basis to copper systems and may have a material adverse effect on our business. Also, advancing wireless technologies, as they relate to network and communication systems, may represent some threat to both copper and fiber optic cable based systems by reducing the need for premise wiring. While we sell some fiber optic cable and components and cable that is used in certain wireless applications, if fiber optic systems or wireless technology were to significantly erode the markets for copper based systems, our sales of fiber optic cable and products for wireless applications may not be sufficient to offset any decrease in sales or profitability of other products that may occur.

RISKS RELATING TO OUR OPERATIONS

Volatility in the price of copper and other raw materials, as well as fuel and energy, could adversely affect our businesses.

The costs of copper and aluminum, the most significant raw material we use, have been subject to considerable volatility over the years. Volatility in the price of copper, aluminum, polyethylene and other raw materials, as well as fuel, natural gas and energy, will in turn lead to significant fluctuations in our cost of sales. Additionally, sharp increases in the price of copper can also reduce demand if customers decide to defer their purchases of copper wire and cable products or seek to purchase substitute products. Moreover, we do not engage in activities to hedge the underlying value of our copper and aluminum inventory. Although we attempt to reflect copper and other raw material price changes in the sale price of our products, there is no assurance that we can do so.

Interruptions of supplies from our copper rod mill plant or our key suppliers may affect our results of operations and financial performance.

Interruptions of supplies from our copper rod mill plant or our key suppliers could disrupt production or impact our ability to increase production and sales. During 2002, our copper rod mill plant produced approximately 50% of the copper rod used in our North American operations and two suppliers provided an aggregate of approximately 36% of our North American copper purchases. Any unanticipated problems or work stoppages at our copper rod mill facility could have a material adverse effect on our business. Additionally, we use a limited number of sources for most of the other raw materials that we do not produce. We do not have long-term or volume purchase agreements with most of our suppliers, and may have limited options in the short-term for alternative supply if these suppliers fail, for any reason, including their business failure or financial difficulties, to continue the supply of materials or components. Moreover, identifying and accessing alternative sources may increase our costs.

[Back to Contents](#)

Failure to negotiate extensions of our labor agreements as they expire may result in a disruption of our operations.

Approximately 65% of our employees are represented by various labor unions. During the last five years, we have experienced only one strike, which was settled on satisfactory terms. The labor agreement covering our Taunton, Massachusetts facility, which employs 1.1% of our employees, expired on August 1, 2003 but was extended through October 31, 2003. In addition, labor agreements covering 18% of our other employees expire prior to December 31, 2004. We cannot predict what issues may be raised by the collective bargaining units representing our employees and, if raised, whether negotiations concerning such issues will be successfully concluded. A protracted work stoppage could result in a disruption of our operations which could adversely affect our ability to deliver certain products and our financial results.

Our inability to continue to achieve productivity improvements may result in increased costs.

Part of our business strategy is to increase our profitability by lowering costs through improving our processes and productivity. In the event we are unable to continue to implement measures improving our manufacturing techniques and processes, we may not achieve desired efficiency or productivity levels and our manufacturing costs may increase. In addition, productivity increases are related in part to factory utilization rates. Our decreased utilization rates over the past few years have adversely impacted productivity.

We are substantially dependent upon distributors and retailers for sales of our products.

During 2002, approximately 44% of our net sales were to independent distributors and four of our ten largest customers were distributors. Distributors accounted for approximately 40% of sales of our communications products and 59% of our industrial & specialty products. During 2002, approximately 9% of our net sales were to retailers and the two largest retailers, AutoZone and The Home Depot, accounted for approximately 3.3% and 3.1%, respectively, of our net sales.

These distributors and retailers are not contractually obligated to carry our product lines exclusively or for any period of time. Therefore, these distributors and retailers may purchase products that compete with our products or cease purchasing our products at any time. The loss of one or more large distributors or retailers could have a material adverse effect on our ability to bring our products to end users and on our results of operations. Moreover, a downturn in the business of one or more large distributors or retailers could adversely affect our sales and could create significant credit exposure.

We face pricing pressures in each of our markets that could adversely affect our results of operations and financial performance.

We face pricing pressures in each of our markets as a result of significant competition or over-capacity, and price levels for most of our products have declined over the past few years. While we will work toward reducing our costs to respond to the pricing pressures that may continue, we may not be able to achieve proportionate reductions in costs. As a result of over-capacity and the current economic and industry downturn in the communications and industrial markets in particular, pricing pressures increased in 2002 and 2003. Pricing pressures are expected to continue throughout 2003 and for the foreseeable future. Further declines in prices, without offsetting cost-reductions, will adversely affect our financial results.

OTHER RISKS RELATING TO OUR BUSINESS

Our substantial debt and debt service requirements could adversely affect our business.

We have a significant amount of debt outstanding. As of June 30, 2003, we had \$493.9 million of debt outstanding including \$74.2 million of indebtedness under our asset-backed securitization facility. Of our total debt, \$470.6 million was secured indebtedness. As of August 31, 2003, our total debt increased by \$17.6 million to \$511.5 million. Under our credit facility, we will be required to make a payment of approximately \$5.2 million to the lenders if the total facility commitments are not reduced by at least \$100 million by December 15, 2003. We

[Back to Contents](#)

will be required to raise additional financing to make this reduction, as cash flow from operations will not be sufficient. We cannot assure you that we will be able to obtain the necessary financing.

In addition, the degree to which we are leveraged could have important adverse consequences to you and to us. For example, it could:

- make it difficult for us to make payments on or otherwise satisfy our obligations with respect to our indebtedness;
- require us to dedicate a significant portion of our cash flows from operations to debt service, thereby reducing the availability of cash flow for other purposes;
- limit our ability to borrow additional amounts for working capital, capital expenditures, potential acquisition opportunities and other purposes;
- limit our ability to withstand competitive pressures and reduce our flexibility in responding to changing business, regulatory and economic conditions in our industry;
- place us at a competitive disadvantage against our less leveraged competitors;
- subject us to increased interest costs, to the extent of the portion of our indebtedness that is subject to floating interest rates; and
- could cause us to fail to comply with applicable debt covenants and could result in an event of default that could result in all of our indebtedness being immediately due and payable.

In addition, our ability to generate cash flow from operations sufficient to make scheduled payments on our debts as they become due will depend on our future performance, our ability to successfully implement our business strategy and our ability to obtain other financing.

If our accounts payable financing for our European operations is cancelled by our lenders, our cash flow will be negatively impacted.

Our European operation participates in an arrangement with several European financial institutions which provide extended accounts payable terms to us. In general, the arrangement provides for accounts payable terms of up to 180 days. At June 30, 2003, the arrangement had a maximum availability limit of the equivalent of approximately \$99 million of which approximately \$86 million was drawn. We do not have a firm commitment from these European financial institutions requiring them to continue to extend credit and they may decline to advance additional funding. Should the availability under this arrangement be reduced or terminated, we would be required to negotiate longer payment terms with our suppliers or repay the outstanding obligations with our suppliers under this arrangement over 180 days and seek alternative financing arrangements which could increase our interest expense. We cannot assure you that such longer payment terms or alternate financing will be available on favorable terms or at all. Failure to obtain alternative financing arrangements in such case would negatively impact our cash flows.

We may be required to take certain charges to our earnings in future periods in connection with potential plant closures and our inventory accounting practices.

We are currently evaluating additional closures of certain of our facilities. Should we decide to rationalize one or more manufacturing locations in some future period, financial results and cash flows will be negatively impacted as the one-time costs relating to such action, which could be substantial, are recognized in our income statement.

As a result of declining copper prices, the historic last-in first-out (LIFO) cost of our copper inventory exceeded its replacement cost by approximately \$16 million at December 31, 2002 and \$10.9 million at June 30, 2003. If we were not able to recover the LIFO value of our inventory at a profit in some future period when replacement costs were lower than the LIFO value of the inventory, we would be required to take a charge to

[Back to Contents](#)

recognize in our income statement all or a portion of the higher LIFO value of the inventory. During 2002, we recorded a \$2.5 million charge for the liquidation of LIFO inventory in North America as we significantly reduced our inventory levels. We expect to further reduce inventory quantities in the second half of 2003 which is expected to result in an additional LIFO liquidation charge. The amount of the charge to be incurred in 2003 will be dependent upon the quantity of the inventory reduction and the market price of the metals at the time of the inventory liquidation. Additionally, if LIFO inventory quantities were reduced in a period when replacement costs were lower than the LIFO value of the inventory, we would experience a decline in reported earnings.

We are subject to certain asbestos litigation.

There are approximately 15,000 pending non-maritime asbestos cases involving our subsidiaries. The majority of these cases involve plaintiffs alleging exposure to asbestos-containing cable manufactured by our predecessors. In addition to our subsidiaries, numerous other wire and cable manufacturers have been named as defendants in these cases. Our subsidiaries have also been named, along with numerous other product manufacturers, as defendants in approximately 33,000 suits in which plaintiffs alleged that they suffered an asbestos-related injury while working in the maritime industry. These cases are referred to as MARDOC cases and are currently managed under the supervision of the US District Court for the Eastern District of Pennsylvania. On May 1, 1996, the District Court ordered that all pending MARDOC cases be administratively dismissed without prejudice and the cases cannot be reinstated, except in certain circumstances involving specific proof of injury. There can be no assurance that any judgments or settlements of the pending non-maritime and/or MARDOC asbestos cases or any cases which may be filed in the future will not have a material adverse effect on our financial results, cash flows or financial position.

Environmental liabilities could potentially adversely impact us and our affiliates.

We are subject to federal, state and local environmental protection laws and regulations governing our operations and use, handling, disposal and remediation of hazardous substances currently or formerly used by us and our affiliates. A risk of environmental liability is inherent in our and our affiliates' current and former manufacturing activities in the event of a release or discharge of a hazardous substance generated by us or our affiliates. Under certain environmental laws, we could be held jointly and severally responsible for the remediation of any hazardous substance contamination at our facilities and at third party waste disposal sites and could also be held liable for any consequences arising out of human exposure to such substances or other environmental damage. We and our affiliates have been named as potentially responsible parties in proceedings that involve environmental remediation. There can be no assurance that the costs of complying with environmental, health and safety laws in our current operations or the liabilities arising from past releases of, or exposure to, hazardous substances, will not result in future expenditures by us that could materially and adversely affect our financial results, cash flows or financial condition.

We may not be able to successfully identify, finance or integrate acquisitions.

Growth through acquisition has been, and is expected to continue to be, a significant part of our strategy. We cannot assure you that we will be successful in identifying, financing and closing acquisitions at favorable prices and terms. Potential acquisitions may require us to issue additional shares of stock or obtain additional or new financing, and such financing may not be available on terms acceptable to us, or at all. The issuance of common or preferred shares may dilute the value of shares held by our shareholders. Further, we cannot assure you that we will be successful in integrating any such acquisitions that are completed. Integration of any such acquisitions may require substantial management, financial and other resources and may pose risks with respect to production, customer service and market share of existing operations. In addition, we may acquire businesses that are subject to technological or competitive risks, and we may not be able to realize the benefits expected from such acquisitions.

Terrorist attacks and other attacks or acts of war may adversely affect the markets in which we operate, our operations and our profitability.

The attacks of September 11, 2001 and subsequent events, including the military action in Iraq, has caused and may continue to cause instability in our markets and have led and may continue to lead to, further armed hostilities or further acts of terrorism worldwide, which could cause further disruption in our markets. Acts of

[Back to Contents](#)

terrorism may impact any or all of our facilities and operations, or those of our customers or suppliers and may further limit or delay purchasing decisions of our customers. Depending on their magnitude, acts of terrorism or war could have a material adverse effect on our business, financial results, cash flows and financial position.

We carry insurance coverage on our facilities of types and in amounts that we believe are in line with coverage customarily obtained by owners of similar properties. We continue to monitor the state of the insurance market in general and the scope and cost of coverage for acts of terrorism in particular, but we cannot anticipate what coverage will be available on commercially reasonable terms in future policy years. Currently, we do not carry terrorism insurance coverage. If we experience a loss that is uninsured or that exceeds policy limits, we could lose the capital invested in the damaged facilities, as well as the anticipated future revenues from those facilities. Depending on the specific circumstances of each affected facility, it is possible that we could be liable for indebtedness or other obligations related to the facility. Any such loss could materially and adversely affect our business, financial results, cash flows and financial position.

If we fail to retain our key employees, our business may be harmed.

Our success has been largely dependent on the skills, experience and efforts of our key employees, and the loss of the services of any of our executive officers or other key employees could have an adverse effect on us. The loss of our key employees who have intimate knowledge of our manufacturing process could lead to increased competition to the extent that those employees are able to recreate our manufacturing process. Our future success will also depend in part upon our continuing ability to attract and retain highly qualified personnel, who are in great demand.

Declining returns in the investment portfolio of our defined benefit plans will increase our pension expense and require us to increase cash contributions to the plans.

Pension expense for the defined benefit pension plans sponsored by us is determined based upon a number of actuarial assumptions, including an expected long-term rate of return on assets and discount rate. During the fourth quarter of 2002, as a result of declining returns in the investment portfolio of our defined benefit pension plans, we were required to record a minimum pension liability equal to the underfunded status of our plans. As of December 31, 2002, the defined benefit plans were underfunded by approximately \$52 million based on the actuarial methods and assumptions utilized for purposes of FAS 87. We will experience an increase in our future pension expense and in our cash contributions to our defined benefit pension plan. Pension expense for our defined benefit plans is expected to increase from \$2.0 million in 2002 to approximately \$7.0 million in 2003 and our required cash contributions are expected to increase to \$5.9 million in 2003 from \$3.0 million in 2002. In 2004, cash contributions are expected to increase to \$12.6 million. In the event that actual results differ from the actuarial assumptions, the funded status of our defined benefit plans may change and any such deficiency could result in additional charges to equity and against earnings and increase our required cash contributions.

Our stock price has been and continues to be volatile.

The market price for our common stock could fluctuate due to various factors. These factors include:

- announcements relating to significant corporate transactions;
- fluctuations in our quarterly and annual financial results;
- operating and stock price performance of companies that investors deem comparable to us;
- changes in government regulation or proposals relating thereto;
- general industry and economic conditions; and
- sales or the expectation of sales of a substantial number of shares of our common stock in the public market.

[Back to Contents](#)

In addition, the stock markets have, in recent years, experienced significant price fluctuations. These fluctuations often have been unrelated to the operating performance of the specific companies whose stock is traded. Market fluctuations, as well as economic conditions, have adversely affected, and may continue to adversely affect, the market price of our common stock. Fluctuations in the price of our common stock will affect the value of any outstanding preferred stock.

Provisions in our charter documents could make it more difficult to acquire our company.

Our amended and restated certificate of incorporation and amended and restated by-laws contain provisions that may discourage, delay or prevent a third party from acquiring us, even if doing so would be beneficial to our stockholders. Under our amended and restated certificate of incorporation only our board of directors may call special meetings of stockholders, and stockholders must comply with advance notice requirements for nominating candidates for election to our board of directors or for proposing matters that can be acted upon by stockholders at stockholder meetings. Directors may be removed by stockholders only for cause and only by the effective vote of at least 66 2/3% of the voting power of all shares of capital stock then entitled to vote generally in the election of directors, voting together as a single class. Additionally, agreements with certain of our executive officers may have the effect of making a change of control more expensive and, therefore, less attractive.

Pursuant to our amended and restated certificate of incorporation, our board of directors may by resolution establish one or more series of preferred stock, having such number of shares, designation, relative voting rights, dividend rates, conversion rights, liquidation or other rights, preferences and limitations as maybe fixed by our board of directors without any further shareholder approval. Such rights, preferences, privileges and limitations as may be established could have the further effect of impeding or discouraging the acquisition of control of our company.

RATIO OF EARNINGS TO FIXED CHARGES

The following table sets forth General Cable's consolidated ratio of earnings to fixed charges for each of the periods indicated.

For purposes of calculating the ratio of earnings to fixed charges, earnings consist of pretax income from continuing operations before minority interest and before equity method earnings or losses adjusted for fixed charges. Fixed charges include: (i) interest expense; (ii) amortization of debt issuance cost; and (iii) an estimate of the interest component of rent expense. As of the date of this prospectus, we have no preferred stock outstanding. The ratio of earnings to fixed charges and preferred stock dividends is the same as the ratio of earnings to fixed charges in all periods as we have not had any preferred stock outstanding.

	Year Ended December 31,					Six Months Ended June 30,	
	1998	1999	2000	2001	2002	2002	2003
Ratio of Earnings to Fixed Charges (1)	6.5	2.3	0.6	2.1	0.4	0.5	1.2

(1) For the years ended December 31, 2000 and 2002 and the six months ended June 30, 2002, earnings were insufficient to cover fixed charges by \$28.9 million, \$27.6 million and \$10.5 million, respectively.

USE OF PROCEEDS

Except as we may specifically state in any prospectus supplement, we intend to use the net proceeds from the sale of the securities for general corporate purposes, which may include repayment of indebtedness.

PLAN OF DISTRIBUTION

We may sell securities to or through underwriters or dealers and may also sell securities directly to other purchasers or through agents. The prospectus supplement will set forth the terms of the offering of such securities, including

[Back to Contents](#)

- the name or names of any underwriters, dealers or agents and the amounts of securities underwritten or purchased by each of them,
- the initial public offering price of the securities and the proceeds to us and any discounts, commissions or concessions allowed or reallocated or paid to dealers, and
- any securities exchanges on which the securities may be listed.

Any initial public offering price and any discounts or concessions allowed or reallocated or paid to dealers may be changed from time to time.

The securities may be distributed from time to time in one or more transactions at:

- a fixed price or prices, which may be changed;
- market prices prevailing at the time of sale;
- prices related to the prevailing market prices; or
- negotiated prices.

If underwriters are used in the sale of any securities, the securities will be acquired by the underwriters for their own account and may be resold from time to time in one or more transactions. The securities may be either offered to the public through underwriting syndicates represented by managing underwriters, or directly by underwriters. Generally, the underwriters' obligations to purchase the securities will be subject to certain conditions precedent. The underwriters will be obliged to purchase all of the securities if they purchase any of the securities. In connection with the sale of securities, underwriters may receive compensation from us or from purchasers of securities for whom they may act as agents. This compensation may be in the form of discounts, concessions or commissions.

Underwriters may sell securities to or through dealers, and these dealers may receive compensation in the form of discounts, concessions or commissions from the underwriters and/or commissions from the purchasers for whom they may act as agents. Underwriters, dealers and agents that participate in the distribution of securities could be considered underwriters, and any discounts or commissions received by them from us and any profit on the resale of securities by them could be considered underwriting discounts and commissions, under the Securities Act.

Under agreements entered into by us for the purchase or sale of securities, these underwriters and agents may be entitled to indemnification by us against certain liabilities, including liabilities under the Securities Act, or to contribution with respect to payments which the agents or underwriters may be required to make in respect thereof. Agents and underwriters may be customers of, engage in transactions with, or perform services for us in the ordinary course of business.

If so indicated in the prospectus supplement, we will authorize underwriters or other persons acting as our agents to solicit offers by institutional investors to purchase securities from us under contracts requiring payment and delivery on a future date. Institutions with which these contracts may be made include, among others:

- commercial and savings banks;
- insurance companies;
- pension funds;
- investment companies; and
- educational and charitable institutions.

but in all cases we must approve these institutions. The obligations of any purchaser under these contracts will be subject to the condition that the purchase of the offered securities shall not at the time of delivery be prohibited

[Back to Contents](#)

under the laws of the jurisdiction to which that purchaser is subject. The underwriters and other agents will not have any responsibility in respect of the validity or performance of these contracts.

One or more firms, referred to as "remarketing firms," may also offer or sell the securities, if the prospectus supplement so indicates, in connection with a remarketing arrangement upon their purchase. Remarketing firms will act as principals for their own accounts or as agents for us. These remarketing firms will offer or sell the securities in accordance with a redemption or repayment pursuant to the terms of the securities. The prospectus supplement will identify any remarketing firm and the terms of its agreement, if any, with us and will describe the remarketing firm's compensation. Remarketing firms may be deemed to be underwriters in connection with the securities they remarket. Remarketing firms may be entitled under agreements that may be entered into with us to indemnification by us against certain civil liabilities, including liabilities under the Securities Act and may be customers of, engage in transactions with or perform services for us in the ordinary course of business.

DESCRIPTION OF DEBT SECURITIES WE MAY OFFER

This section outlines some of the provisions of the indentures and the debt securities. This information may not be complete in all respects and is qualified entirely by reference to the indentures under which the debt securities are issued. These indentures are incorporated by reference as exhibits to the registration statement of which this prospectus is a part. This information relates to terms and conditions that generally apply to the debt securities. The specific terms of any series of debt securities will be described in the prospectus supplement. If so described in a prospectus supplement, the terms of that series may differ from the general description of the terms presented below.

Debt Securities May Be Senior or Subordinated

We may issue senior or subordinated debt securities. The senior debt securities and the subordinated debt securities may or may not be secured by any of our property or assets.

The senior debt securities will constitute part of our senior indebtedness, will be issued under our senior debt indenture described below and will rank equally with all of our other unsecured and unsubordinated debt.

The subordinated debt securities will constitute part of our subordinated debt, will be issued under our subordinated debt indenture described below and will be subordinated in right of payment to all of our "senior indebtedness," as defined in the subordinated debt indenture. The prospectus supplement for any series of subordinated debt securities will indicate the approximate amount of senior indebtedness outstanding as of the end of our most recent fiscal quarter. Neither indenture limits our ability to incur additional senior indebtedness.

When we refer to "debt securities" in this prospectus, we mean both the senior debt securities and the subordinated debt securities.

The Senior Debt Indenture and the Subordinated Debt Indenture

The senior debt securities and the subordinated debt securities are each governed by a document called an indenture—the senior debt indenture, in the case of the senior debt securities, and the subordinated debt indenture, in the case of the subordinated debt securities. Each indenture is a contract between us and a trustee that will be named therein. The indentures are substantially identical, except for the provisions relating to subordination, which are included only in the subordinated indenture.

The trustee under each indenture has two main roles:

- First, the trustee can enforce your rights against us if we default. There are some limitations on the extent to which the trustee acts on your behalf, which we describe later under "Events of Default"; and
- Second, the trustee performs administrative duties for us, such as sending you interest payments and notices.

[Back to Contents](#)

When we refer to the indenture or the trustee with respect to any debt securities, we mean the indenture under which those debt securities are issued and the trustee under that indenture.

The indentures permit us to issue different series of securities from time to time. We may issue securities in such amounts, at such times and on such terms as we wish. The debt securities may differ from one another in their terms. Neither indenture limits the aggregate amounts of debt securities that we may issue or the aggregate amount of any particular series.

The indentures and the debt securities are governed by New York law.

This Section Is Only a Summary

Because this section is a summary, it does not describe every aspect of the debt securities. The indentures, any supplemental indentures and the debt securities contain the full legal text of the matters described in this section. This summary is subject to and qualified in its entirety by reference to all the provisions of the indentures, including definitions of some of the terms used in the indentures. We also include references in parentheses to some sections and articles of the indentures. Whenever we refer to particular sections, articles or defined terms of the indentures in this prospectus or in the prospectus supplement, those sections, articles or defined terms are incorporated by reference here or in the prospectus supplement. The indentures are exhibits to our registration statement. See [Where You Can Find More Information](#) for information on how to obtain a copy. This summary is also subject to and qualified by reference to the description of the particular terms of your series of debt securities described in any prospectus supplement.

Specific Terms of a Series of Debt Securities

In this section we summarize only the more important terms of the indentures that will apply generally to the debt securities. Each particular debt security will have financial, legal and other terms specific to it, and the specific terms of each debt security will be described in the applicable prospectus supplement. Those terms may vary from the terms described here. As you read this section, therefore, please remember that the specific terms of your debt security as described in your prospectus supplement will supplement and, if applicable, may modify or replace the general terms described in this section. The statements we make in this section may not apply to your debt security.

We may issue the debt securities as original issue discount securities, which are debt securities that are offered and sold at a substantial discount to their stated principal amount. The debt securities may also be issued as indexed securities or securities denominated in foreign currencies or currency units, as well as composite currencies or composite currency units, as described in more detail in the prospectus supplement relating to any of these types of debt securities.

The prospectus supplement relating to a series of debt securities will specify whether the securities are senior or subordinated debt securities and will describe the following terms of the series:

- the title of the series
- the aggregate principal amount (or any limit on the aggregate principal amount) of the series and, if any debt securities of a series are to be issued at a discount from their face amount, the method of computing the accretion of such discount.
- the interest rate or rates, if any, or method of calculating the interest rate;
- the date or dates from which interest will accrue;
- the record dates for interest payable on registered debt securities;
- the dates when principal and interest are payable;

□ the manner of paying principal and interest;

[Back to Contents](#)

- the places where principal and interest are payable;
- the registrar, transfer agent and paying agent;
- in the case of subordinated debt securities, any subordination provisions in addition to or in lieu of those set forth in the indenture;
- the terms of any mandatory (including any sinking fund requirements) or optional redemption by us;
- the terms of any repayment at the option of holders;
- the denominations in which debt securities are issuable;
- whether debt securities will be issuable as registered securities or bearer securities;
- whether and upon what terms registered securities and bearer securities may be exchanged;
- whether any debt securities will be represented by a debt security in global form;
- the terms of any global debt security;
- the terms of any tax indemnity;
- the currencies (including any composite currency) in which principal or interest may be paid;
- if payments of principal or interest may be made in a currency other than that in which debt securities are denominated, the manner for determining such payments;
- if amounts of principal or interest may be determined by reference to an index, formula or other method, the manner for determining such amounts;
- provisions for electronic issuance of debt securities or for debt securities in uncertificated form;
- the portion of principal payable upon acceleration of a discounted debt security;
- any events of default or covenants in addition to or in lieu of those set forth in the applicable indenture;
- whether and upon what terms debt securities may be defeased, if different from the provisions set forth in the base indenture;
- the forms of the debt securities;
- any terms that may be required by or advisable under U.S. or other applicable laws;
- the percentage of the principal amount of the debt securities which is payable if the maturity of the debt securities is accelerated in the case of debt securities issued at a discount from their face amount;
- whether and upon what terms the debt securities will be convertible into or exchangeable for our common stock; and
- any other terms not inconsistent with the indenture.

Special U.S. Federal income tax considerations may apply to a series of debt securities issued as original issue discount securities. These tax considerations will be discussed in the related prospectus supplement. In addition, if any special U.S. Federal income tax considerations apply to a series of debt securities denominated in a currency or currency unit other than U.S. dollars, the related prospectus supplement will describe those

considerations.

[Back to Contents](#)

Conversion Rights

If debt securities of any series are convertible into our common stock, the related prospectus supplement will discuss the conversion terms. Those terms will include provisions as to whether the conversion is mandatory or at the option of the holder and may also include provisions for calculating the number of shares of common stock to be delivered upon conversion.

Subordination of Subordinated Debt Securities

Holders of subordinated debt securities should recognize that contractual provisions in the subordinated debt indenture may prohibit us from making payments on those securities. Subordinated debt securities are subordinate in right of payment, to the extent and in the manner stated in the subordinated debt indenture, to all our senior debt, including all debt securities we have issued that constitute senior debt and all debt securities we will issue under the senior debt indenture.

The subordinated debt indenture defines "senior indebtedness" as all our indebtedness and other payment obligations relating to our debt, as defined below, including:

- all obligations under credit facilities (whether for principal, interest, fees, expenses or indemnities);
- all indebtedness for borrowed money or under any reimbursement obligation relating to a letter of credit or other similar instruments or evidenced by a bond, note, debenture or similar instrument, or such indebtedness of others which we guarantee (to the extent of the guarantee) and capitalized lease obligations, including principal, premium, if any, and interest on such indebtedness, unless the instrument under which such indebtedness is incurred expressly provides that such indebtedness is not senior or superior in right of payment to the subordinated debt securities;
- all obligations under interest protection agreements; and
- all obligations under currency agreements.

All amendments, renewals, extensions, modifications and refundings of these obligations will also be included in senior indebtedness. Senior indebtedness excludes the subordinated debt securities and any other indebtedness or obligations specifically designated as being subordinate, or not superior, in right of payment to the subordinated debt securities.

The subordinated debt indenture provides that, unless all principal of and any premium or interest on the senior debt has been paid in full, no payment or other distribution may be made in respect of any subordinated debt securities in the following circumstances:

- if there exists a default in the payment of all or any portion of the obligations on any senior indebtedness, whether at maturity, on account of mandatory redemption or prepayment or purchase, acceleration or otherwise, that continues beyond any applicable period of grace, and such default shall not have been cured or waived or the benefits of the subordination provisions in the subordinated debt indenture is waived by or on behalf of the holders of such senior indebtedness; or
- after receipt by the trustee of written notice from the holder or holders of certain designated senior indebtedness or the trustee or agent acting on behalf of such designated senior indebtedness and for 179 days thereafter, during the continuance of any non-payment event of default with respect to any designated senior indebtedness pursuant to which the maturity thereof may be immediately accelerated, and, then, unless and until such event of default has been cured or waived or has ceased to exist or such designated senior indebtedness has been discharged or repaid in full in cash or the benefits of the subordination provisions in the subordinated debt indenture have been waived by the holders of such designated senior indebtedness.

As defined in the subordinated debt indenture, "designated senior indebtedness" means any senior indebtedness (a) under a credit facility or (b) which, at the time of determination, has an aggregate commitment or

[Back to Contents](#)

principal amount outstanding of at least \$10.0 million if the instrument governing such senior indebtedness expressly states that such indebtedness is designated senior indebtedness for purposes of the subordinated debt indenture and a resolution of our board of directors setting forth such designation by us has been filed with the trustee.

For the purposes of the subordination provisions, the payment of cash or delivery of property or securities upon conversion of a subordinated debt security, excluding delivery of our common stock and certain of our subordinated securities, will be deemed a payment of the principal of that subordinated debt security.

Legal Ownership

Street Name and Other Indirect Holders

Investors who hold debt securities in accounts at banks or brokers will generally not be recognized by us as legal holders of debt securities. This is called holding in street name. Instead, we would recognize only the bank or broker, or the financial institution the bank or broker uses to hold its debt securities. These intermediary banks, brokers and other financial institutions pass along principal, interest and other payments on the debt securities, either because they agree to do so in their customer agreements or because they are legally required to do so. If you hold debt securities in street name, you should check with your own institution to find out:

- how it handles debt securities payments and notices;
- whether it imposes fees or charges;
- how it would handle voting, if it were ever required;
- whether and how you can instruct it to send you debt securities registered in your own name so you can be a direct holder as described below; and
- how it would pursue rights under the debt securities if there were a default or other event triggering the need for holders to act to protect their interests.

Direct Holders

Our obligations, as well as the obligations of the trustee and those of any third parties employed by us or the trustee, under the debt securities run only to persons who are registered as holders of debt securities. As noted above, we do not have obligations to you if you hold in street name or other indirect means, either because you choose to hold debt securities in that manner or because the debt securities are issued in the form of global securities as described below. For example, once we make payment to the registered holder we have no further responsibility for the payment even if that holder is legally required to pass the payment along to you as a street name customer but does not do so.

Global Securities

What is a Global Security? A global security is a special type of indirectly held security, as described above under Street Name and Other Indirect Holders. If we choose to issue debt securities in the form of global securities, the ultimate beneficial owners of global securities can only be indirect holders. We require that the global security be registered in the name of a financial institution we select.

We also require that the debt securities included in the global security not be transferred to the name of any other direct holder unless the special circumstances described in the section Legal Ownership and Book-Entry Issuance below occur. The financial institution that acts as the sole direct holder of the global security is called the depository. Any person wishing to own a security must do so indirectly by virtue of an account with a broker, bank or other financial institution that in turn has an account with the depository. The prospectus supplement indicates whether your series of debt securities will be issued only in the form of global securities.

[Back to Contents](#)

Further details of legal ownership are discussed in the section [\[Legal Ownership and Book-Entry Issuance\]](#).

In the remainder of this description [you] means direct holders and not street name or other indirect holders of debt securities. Indirect holders should read the previous subsection entitled [\[Street Name and Other Indirect Holders\]](#).

Overview of Remainder of This Description

The remainder of this description summarizes:

- Additional mechanics relevant to the debt securities under normal circumstances, such as how you transfer ownership and where we make payments.
- Your rights under several special situations, such as if we merge with another company or if we want to change a term of the debt securities.
- Covenants contained in the indentures that require us, or limit our ability to perform various acts. A particular series of debt securities may have additional covenants.
- Your rights if we default or experience other financial difficulties.
- Our relationship with the trustee.

Additional Mechanics

Exchange and Transfer

Unless otherwise provided in the prospectus supplement, debt securities will have a minimum denomination of \$1,000. You may have your debt securities divided into more debt securities of smaller denominations, but not below the minimum denomination, or combined into fewer debt securities of larger denominations, as long as the total principal amount is not changed. This is called an exchange.

You may exchange or transfer your debt securities at the office of the trustee. The trustee acts as our agent for registering debt securities in the names of holders and transferring debt securities. We may change this appointment to another entity or perform the service ourselves. The entity performing the role of maintaining the list of registered holders is called the security registrar. It will also register transfers of the debt securities.

You will not be required to pay a service charge to transfer or exchange debt securities, but you may be required to pay for any tax or other governmental charge associated with the exchange or transfer. The transfer or exchange of a debt security will only be made if the security registrar is satisfied with your proof of ownership.

If we designate additional transfer agents, they will be named in the prospectus supplement. We may cancel the designation of any particular transfer agent. We may also approve a change in the office through which any transfer agent acts.

If the debt securities are redeemable and we redeem less than all of the debt securities of a particular series, we may block the transfer or exchange of debt securities during a specified period of time in order to freeze the list of holders to prepare the mailing. The period begins 15 days before the day we mail the notice of redemption and ends on the day of that mailing. We may also refuse to register transfers or exchanges of debt securities selected for redemption. However, we will continue to permit transfers and exchanges of the unredeemed portion of any security being partially redeemed.

[Back to Contents](#)

Payment and Paying Agents

We will pay interest to you if you are a direct holder listed in the trustee's records at the close of business on a particular day in advance of each due date for interest, even if you no longer own the security on the interest due date. That particular day, usually about two weeks in advance of the interest due date, is called the regular record date and is stated in the prospectus supplement.

We will pay interest, principal and any other money due on the debt securities at the corporate trust office of the trustee in New York City. You must make arrangements to have your payments picked up at or wired from that office. We may also choose to pay interest by mailing checks.

Interest on global securities will be paid to the holder of the securities by wire transfer of same-day funds.

Holders buying and selling debt securities must work out between them how to compensate for the fact that we will pay all the interest for an interest period to the one who is the registered holder on the regular record date. The most common manner is to adjust the sales price of the debt securities to pro rate interest fairly between buyer and seller. This pro rated interest amount is called accrued interest.

Street name and other indirect holders should consult their banks or brokers for information on how they will receive payments.

We may also arrange for additional payment offices, and may cancel or change these offices, including our use of the trustee's corporate trust office. These offices are called paying agents. We may also choose to act as our own paying agent. We must notify the trustee of changes in the paying agents for any particular series of debt securities.

Notices

We and the trustee will send notices only to direct holders, using their addresses as listed in the trustee's records.

Regardless of who acts as paying agent, all money that we pay to a paying agent that remains unclaimed at the end of two years after the amount is due to direct holders will be repaid to us. After that two-year period, you may look only to us for payment and not to the trustee, any other paying agent or anyone else.

Special Situations

Mergers and Similar Events

We will generally not be permitted to consolidate with or merge into, or transfer all or substantially all of our assets to, any person unless:

- either (a) we survive the transaction or (b) the person that survived the transaction (if other than us) is organized under the laws of the United States of America or a State thereof or the District of Columbia;
- the person that survives the transaction (if other than us) assumes by supplemental indenture all our obligations under and the performance and observance of every covenant of the indenture, the debt securities and any other agreements entered into in connection therewith; and

immediately after giving effect to the transaction, no default or event of default under the indenture exists. We will also be required to deliver to the trustee prior to the consummation of the proposed transaction an officers' certificate to the foregoing effect and an opinion of counsel stating that the proposed transaction and such supplemental indenture comply with the indenture.

[Back to Contents](#)

The successor shall be substituted for us, and thereafter all our obligations under the indenture and the debt securities shall terminate.

Modification and Waiver

There are three types of changes we can make to the indentures and the debt securities.

Changes Requiring Your Approval. First, there are changes that cannot be made to your debt securities without your specific approval. Following is a list of those types of changes that require the approval of each holder of debt securities:

- reduce the amount of debt securities whose holders must consent to an amendment;
- reduce the interest on or change the time for payment of interest on any debt security;
- change the fixed maturity of any debt security
- reduce the principal of any non-discounted debt security or reduce the amount of principal of any discounted debt security that would be due upon an acceleration thereof;
- change the currency in which principal or interest on a debt security is payable;
- make any change in provisions relating to waivers of defaults and amendments, except to increase the amount of debt securities whose holders must consent to an amendment or waiver or to provide that other provisions of the indenture cannot be amended or waived without the consent of each holders of debt securities affected thereby;
- impair your right to sue for payment; or
- in the case of subordinated debt securities, modify the subordination provisions in a manner adverse to the holders.

Changes Requiring a Majority Approval. The second type of change to the indentures and the debt securities is the kind that requires an approval by holders of debt securities owning a majority of the principal amount of the particular series affected. Most changes fall into this category. Majority approval would be required for us to obtain a waiver of all or part of certain covenants or a waiver of a past default. However, we cannot obtain a waiver of a payment default or any other aspect of the indentures
