**NEWS RELEASE**

**Enbridge Files Application with State of Alaska for Alaska Highway Pipeline Project**

**CALGARY, Alberta, May 4, 2004** - Enbridge Inc. (TSE, NYSE: ENB) today announced it has filed an application with the State of Alaska to negotiate commercial agreements for the construction and operation of the segment of the Alaska Highway Pipeline Project (AHPP) proposed to be built in the state.

Enbridge intends to be at the forefront of development and planning for an Alaska gas pipeline, said Patrick D. Daniel, President & Chief Executive Officer of Enbridge. With this application, we are formalizing our intention to take a leadership position within a broad coalition of commercial interests focused on bringing Alaska gas to market. The magnitude of capital investment and risk required by this project will necessitate a partnership of producers, pipeline companies and other potential participants.

We strongly believe our application provides a competitive alternative to other pipeline proposals. Ultimately, this project will be developed by the parties that can bring together a wide array of public, private and commercial interests, Mr. Daniel said.

The application to the State of Alaska is the first significant step in a project that will require extensive producer and stakeholder consultation in advance of regulatory processes in both the U.S. and Canada. Enbridge is currently engaged in preliminary consultation and will intensify its efforts during the next few months.

Under the Alaska Stranded Gas Development Act (ASGDA), interested parties must file an application with the State to initiate formal negotiations over the commercial terms of an agreement to participate in the natural gas pipeline project. The Act governs pipeline construction and operations for the portion of the project built in Alaska, from Prudhoe Bay to the Canadian border. Separate regulatory requirements will be required for the Canadian portion of any new pipeline system.

Enbridge cited a number of strengths that position the company as a strong partner for one of the largest pipeline projects ever proposed in North America:

With more than 50 years of continental experience, Enbridge owns and operates the world's longest crude oil and liquids pipeline system, delivering more than 2 million barrels per day to markets in Canada and the U.S.

Enbridge owns and operates Canada's largest natural gas distribution company, serving more than 1.7 million customers in Ontario, Quebec, New Brunswick and New York State

It also has significant ownership interests in two large-diameter, cross-border natural-gas systems: Alliance Pipeline (50 per cent) and Vector (60 per cent)

With its Norman Wells liquids pipeline (100 per cent) and Inuvik Gas (33 per cent), Enbridge has extensive experience building and operating oil and gas pipelines in northern permafrost

Enbridge Energy Partners owns and operates more than 15,000 km (9,000 miles) of natural gas transmission and gathering pipelines in the U.S. Mid-continent and Gulf Coast areas

---

*Enbridge Inc. is a leader in energy transportation and distribution in North America and internationally. As a transporter of energy, Enbridge operates, in Canada and the U.S., the world's longest crude oil and liquids transportation system. The Company also has international operations and a growing involvement in the natural gas transmission and midstream businesses. As a distributor of energy, Enbridge owns and operates Canada's largest natural gas distribution company, and provides distribution services in Ontario, Quebec, New Brunswick and New York State. Enbridge employs approximately 4,000 people, primarily in Canada, the U.S. and South America. Enbridge's common shares trade on the Toronto Stock Exchange in Canada and on the New York Stock Exchange in the U.S. under the symbol ENB. Information about Enbridge is available on the Company's web site at [www.enbridge.com](http://www.enbridge.com).*
