NEWS RELEASE

Enbridge Announces Open Season for Spearhead Pipeline Expansion

CALGARY, Alberta, March 2, 2007 Enbridge Inc. (TSX: ENB (NYSE: ENB) today announced it will conduct a binding Open Season for Phase I of a two-phased expansion of the Spearhead Pipeline, which provides crude oil transportation between the Chicago area and Cushing, Oklahoma. Phase I will provide an incremental 65,000 barrels per day (bpd) of capacity.

The Phase I expansion Open Season, if fully subscribed, would increase the Spearhead Pipeline's average annual capacity from the current 125,000 bpd to 190,000 bpd. Given the existing commercial arrangements on the Spearhead Pipeline, the Open Season offers 30,000 bpd of new firm capacity. The remaining 35,000 bpd of expansion capacity will be available to uncommitted shippers unless and until existing committed shippers exercise their right to commit to this capacity. The Open Season is soliciting shipper interest in executing binding commitments to transport specified volumes of crude oil up to an aggregate 30,000 bpd average annual capacity over a 10-year term on the expanded pipeline. The expansion is expected to be completed in early 2009.

Should shipper interest for incremental capacity greatly exceed the available firm capacity offered in the Phase I Open Season, it is Enbridge's expectation that it would proceed with the Phase I expansion to 190,000 bpd and promptly initiate an Open Season for a Phase II expansion.

The Phase I Open Season will commence at noon CT, Friday, March 2, and will end at noon CT, Monday, April 2, 2007. Shippers desiring long-term service are requested to execute and submit completed and signed transportation service agreements (TSAs) to Enbridge affiliate, CCPS Transportation, LLC.

The Open Season documents are available on the Enbridge Inc. website at www.enbridge.com/spearhead.

More information about this open season is available by contacting:

Chris Martin
Enbridge Energy Company, Inc.
1100 Louisiana, Suite 3300
Houston, Texas 77002 5217
(713) 821-2053

(713) 353-6341

Currently the Spearhead Pipeline, which began north-to-south service in March 2006, transports crude oil from the Chicago area (Griffith, Indiana) to Cushing, Oklahoma. Upon completion of Enbridge's Southern Access Expansion, anticipated in early 2009, the Spearhead Pipeline will initiate from Flanagan, Illinois.

Spearhead was the first pipeline to provide continuous deliveries of crude oil sourced primarily from the Canadian oil sands region to the U.S. Midcontinent area. Spearhead is accessed via the Enbridge Lakehead System and has existing connection points at Griffith, Indiana and Jacksonville, Missouri.

This expansion project benefits both Canadian producers and U.S. refineries by providing cost-effective transportation for growing supplies of production from Western Canada's oil sands to refineries in southern PADD II and beyond.

Further, demand for crude oil transportation access to the Cushing Hub is anticipated to increase with the completion in 2009 of the second phase of the Southern Access expansion of the Enbridge Lakehead System.

Enbridge Inc., a Canadian company, is a leader in energy transportation and distribution in North America and internationally. As a transporter of energy, Enbridge operates, in Canada and the United States, the world's longest crude oil and liquids pipeline system. The Company also has international operations and a growing involvement in the natural gas transmission and midstream businesses. As a distributor of energy, Enbridge owns and operates Canada's largest natural gas distribution company, and provides distribution services in Ontario, Quebec, New Brunswick and New York State. Enbridge employs approximately 5,000 people, primarily in Canada, the United States and South America. Enbridge's common shares trade on the Toronto Stock Exchange in Canada and on the New York Stock Exchange in the United States under the symbol ENB. Information about Enbridge is available on the Company's website at www.enbridge.com.

NEWS RELEASE

Enbridge Files Regulatory Application for Southern Lights Pipeline Project

CALGARY, Alberta, March 9, 2007 Enbridge Inc. (TSX: ENB) (NYSE: ENB) today announced it has filed an application for regulatory approval for the Canadian facilities involved in the Southern Lights Pipeline Project with the National Energy Board. The total cost of the Southern Lights Pipeline Project, including the U.S. facilities subject to regulatory approvals, is US\$1.3 billion.

The Southern Lights Pipeline Project responds to interest from shippers to enhance the availability of diluent for bitumen blending in Western Canada. Enbridge previously announced that it has received binding long-term commitments from shippers to ensure utilization of the line and endorsement of the Southern Lights Pipeline Project from the Canadian Association of Petroleum Producers.

Enbridge will construct the 180,000 barrel-per-day pipeline to transport diluent from the U.S. Midwest to Western Canada. The Southern Lights Pipeline Project will involve a combination of new construction, changes to Enbridge's existing crude oil pipeline system, and utilization of existing facilities targeted for in-service in 2010. Also as part of this filing, Enbridge has included construction of the Canadian portion of a new 504-kilometre (313 mile) 20-inch (508-mm) crude oil pipeline to expand capacity of its existing mainline system by the end of 2008.

For details on Southern Lights Pipeline Project visit www.enbridge-expansion.com.

NEWS RELEASE

Enbridge Ontario Wind Power Project Update

TORONTO, ON, March 19, 2007 Enbridge announced today the Ontario Ministry of the Environment has confirmed that the Environmental Screening Report related to the Company's 182 megawatt wind power project in Kincardine, Ontario has been accepted and the project will not be elevated to an individual Environmental Assessment. Enbridge believes this is a significant step towards construction of the wind farm. Enbridge Ontario Wind Power has also received zoning approvals for the entire wind power project from both the Municipality of Kincardine and Bruce County. An Ontario Municipal Board hearing to address appeals related to the specific turbine sites is scheduled to begin on April 23, 2007.

The approximately \$0.5 billion project will consist of 110 wind turbine generators, each capable of producing 1,650 kilowatts. The project is planned to produce enough renewable energy to supply up to 64,000 Ontario homes. Enbridge has executed a 20-year electricity purchase agreement with the Ontario Power Authority for all the power generated.

Enbridge Ontario Wind Power L.P. is owned by Enbridge Inc. Enbridge Inc., a Canadian company, is a leader in energy transportation and distribution in North America and internationally. As a transporter of energy, Enbridge operates, in Canada and the United States, the world's longest crude oil and liquids pipeline system. The Company also has international operations and a growing involvement in the natural gas transmission and midstream businesses. As a distributor of energy, Enbridge owns and operates Canada's largest natural gas distribution company, and provides distribution services in Ontario, Quebec, New Brunswick and New York State. Enbridge employs approximately 5,000 people, primarily in Canada, the United States and South America. The Company also has investments in wind power and fuel cell projects. Enbridge's common shares trade on the Toronto Stock Exchange in Canada and on the New York Stock Exchange in the United States under the symbol ENB. NEWS RELEASE

Enbridge Gas Distribution Supports the Province's Leadership on Reducing Greenhouse Gas Emissions

TORONTO, March 30, 2007 Enbridge Gas Distribution supports Ontario's interest in reducing greenhouse gas emissions through participation in the Regional Greenhouse Gas Initiative (RGGI) and the Western Regional Climate Action Initiative.

Climate change can't be addressed in isolation, said Glenn Beaumont, Vice President, Enbridge Gas Distribution. We applaud the provincial government's efforts to develop a clean energy policy here in Ontario and to explore new strategic partnerships that demonstrate the province's commitment to ongoing dialogue and leadership on environmental issues. We are committed to working with the government to help make the vision of a clean energy future a reality.

Enbridge is a leader in the development of clean energy technology and continues to look for new and innovative ways to use energy more efficiently and to increase the use of alternative energy technologies.

Since 1995, Enbridge Gas Distribution's energy efficiency programs have helped avoid 5.5 million tonnes of carbon dioxide emissions and save about 2.9 billion cubic metres of natural gas. That's equal to delivering natural gas to 955,000 homes for a year or taking 1.2 million cars off the road for a year.

Enbridge Gas Distribution has an almost 160-year history and is Canada's largest natural gas distribution company. Enbridge Gas Distribution is owned by Enbridge Inc., a Canadian-based leader in energy transportation and distribution. Enbridge also has investments in wind power and fuel cell projects. As a distributor of energy, Enbridge owns and operates distribution services in Ontario, which distributes natural gas to more than 1.8 million customers Ontario, New York State, New Brunswick and southwestern Quebec.

NEWS RELEASE

Enbridge Extends Open Season for Spearhead Pipeline Expansion

CALGARY, ALBERTA **March 30, 2007** - Enbridge Inc. (TSX:ENB)(NYSE:ENB) announced today that it has received significant interest from shippers for Phase I of a two-phased expansion of the Spearhead Pipeline through the Open Season which was announced March 2, 2007. The Spearhead Pipeline provides crude oil transportation between the Chicago area and Cushing, Oklahoma. Phase I will provide an incremental 65,000 barrels per day (bpd) of capacity.

In response to shippers' requests for additional time to complete their analyses and secure necessary corporate approvals to enter into binding commitments, Enbridge has extended the Open Season until April 23, 2007 at noon CT. The Open Season was scheduled to close April 2, 2007 at noon CT. Shippers desiring long-term service are requested to execute and submit completed and signed transportation service agreements (TSAs) to Enbridge affiliate, CCPS Transportation, LLC. Enbridge has also modified certain terms of the TSA in response to shipper comments. The Phase I expansion Open Season, if fully subscribed, would increase the Spearhead Pipeline's average annual capacity from the current 125,000 bpd to 190,000 bpd. Given the existing commercial arrangements on the Spearhead Pipeline, the Open Season offers 30,000 bpd of new firm capacity. The remaining 35,000 bpd of expansion capacity will be available to uncommitted shippers unless and until existing committed shippers exercise their right to commit to this capacity. The Open Season is soliciting shipper interest in executing binding commitments to transport specified volumes of crude oil up to an aggregate 30,000 bpd average annual capacity over a 10-year term on the expanded pipeline. The expansion is expected to be completed in early 2009.

Should shipper interest for incremental capacity greatly exceed the available firm capacity offered in the Phase I Open Season, it is Enbridge's expectation that it would proceed with the Phase I expansion to 190,000 bpd and promptly initiate an Open Season for a Phase II expansion.

The Open Season documents are available on the Enbridge Inc. website at www.enbridge.com/spearhead.

More information about this open season is available by contacting:

Chris Martin
Enbridge Energy Company, Inc.
1100 Louisiana, Suite 3300
Houston, Texas 77002 5217
(713) 821-2053

Kent Berry
