Form 10-Q
January 27, 2012

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D. C. 20549
FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT 1934

For the quarterly period ended December 31, 2011

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934.

For the transition period from _____ to _____

Commission File Number: 0-27618

Columbus McKinnon Corporation
(Exact name of registrant as specified in its charter)

New York
(State or other jurisdiction of incorporation or organization)

16-0547600
(I.R.S. Employer Identification No.)

140 John James Audubon Parkway, Amherst, NY
(Address of principal executive offices)

14228-1197
(Zip code)

(716) 689-5400
(Registrant's telephone number, including area code)

(Former name, former address and former fiscal year, if changed since last report.)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. : Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by checkmark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definition of "large accelerated filer," "accelerated filer" and "smaller reporting company"

in Rule 12b-2 of the Act.

Large accelerated filer
Non-accelerated filer (Do not check if a smaller reporting company)

Accelerated filer
Smaller Reporting Company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).
Yes No

The number of shares of common stock outstanding as of January 24, 2012 was: 19,393,932 shares.

COLUMBUS MCKINNON CORPORATION
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)
December 31, 2011

1. Description of Business

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles for interim financial information. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation of the financial position of Columbus McKinnon Corporation (the Company) at December 31, 2011, the results of its operations for the three and nine month periods ended December 31, 2011 and December 31, 2010, and cash flows for the nine months ended December 31, 2011 and December 31, 2010, have been included. Results for the period ended December 31, 2011 are not necessarily indicative of the results that may be expected for the year ending March 31, 2012. The balance sheet at March 31, 2011 has been derived from the audited consolidated financial statements at that date, but does not include all of the information and footnotes required by U.S. generally accepted accounting principles for complete financial statements. Certain prior year numbers have been reclassified to conform to current year reporting presentations. For further information, refer to the consolidated financial statements and footnotes thereto included in the Columbus McKinnon Corporation annual report on Form 10-K for the year ended March 31, 2011.

The Company is a leading designer, marketer and manufacturer of material handling products and services which efficiently and safely move, lift, position and secure material. Key products include hoists, rigging tools, cranes, and actuators. The Company's material handling products are sold globally, principally to third party distributors through diverse distribution channels, and to a lesser extent directly to end-users. During the three and nine months ended December 31, 2011, approximately 52% and 53% of sales were to customers in the U.S., respectively.

2. Acquisitions

On December 13, 2011, the Company acquired 80% of the outstanding common shares of Yale Lifting Solutions (Pty) LTD ("YLS PTY") located in Magaliesburg, South Africa, a privately owned company with annual sales of less than \$10,000,000. The Company now owns 100% of YLS PTY. YLS PTY has been representing the Company's Yale brand of products as a distributor to the South African mining industry for over 14 years. The Company had previously owned 20% of the outstanding common shares of YLS PTY which the Company accounted for as a cost method investment as it did not exercise significant influence over YLS PTY's operating or financial policies. The carrying amount of the cost method investment prior to the acquisition of the remaining 80% interest was under \$1,000. The results of YLS PTY are included in the Company's condensed consolidated financial statements from the date of acquisition. The acquisition of YLS PTY is not considered significant to the Company's consolidated financial position and results of operations.

This transaction was accounted for as a step acquisition in accordance with Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") Topic 805 "Business Combinations." The aggregate purchase consideration for the remaining 80% ownership of Yale Lifting Solutions (Pty) LTD was \$3,356,000. The acquisition date fair value of the Company's 20% interest in YLS PTY was \$850,000 and resulted in an \$850,000 gain. The acquisition was funded with existing cash. The purchase price and fair value of the previously held 20% ownership interest has been preliminarily assigned to the assets acquired and liabilities assumed based upon their carrying values as of the date of acquisition and the excess consideration of \$2,669,000 was recorded as goodwill. Final calculations of the fair values are expected to be completed during the fourth quarter of fiscal 2012. Goodwill recorded in connection with the acquisition will not be deductible for tax purposes. The preliminary assignment of purchase

consideration to the assets acquired and liabilities assumed is as follows (in thousands):

Working capital	\$1,399
Property, plant and equipment	236
Other long term liabilities, net	(98)
Goodwill	2,669
Total	\$4,206

7

Index

3. Fair Value Measurements

ASC Topic 820 “Fair Value Measurements and Disclosures” establishes the standards for reporting financial assets and liabilities and nonfinancial assets and liabilities that are recognized or disclosed at fair value on a recurring basis (at least annually). Under these standards, fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (i.e., the “exit price”) in an orderly transaction between market participants at the measurement date.

ASC Topic 820-10-35-37, as amended, establishes a hierarchy for inputs that may be used to measure fair value. Level 1 is defined as quoted prices in active markets that the Company has the ability to access for identical assets or liabilities. The fair value of the Company’s marketable securities is based on Level 1 inputs. Level 2 is defined as quoted prices for similar assets and liabilities in active markets; quoted prices for identical or similar assets and liabilities in markets that are not active; and model-derived valuations in which all significant inputs and significant value drivers are observable in active markets. Level 3 inputs are unobservable inputs based on the Company’s own assumptions used to measure assets and liabilities at fair value. The Company primarily uses readily observable market data in conjunction with internally developed discounted cash flow valuation models when valuing its derivative portfolio and, consequently, the fair value of the Company’s derivatives is based on Level 2 inputs. As of December 31, 2011, the Company’s assets and liabilities measured at fair value on recurring bases were as follows (in thousands):

Description	December 31, 2011	Fair value measurements at reporting date using		
		Quoted prices in active markets for identical assets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)
Assets/(Liabilities):				
Marketable securities	\$23,860	\$23,860	\$-	\$ -
Derivative assets	25	-	25	-

Assets that are measured on a nonrecurring basis include the Company’s reporting units that are used to test goodwill for impairment on an annual or interim basis under the provisions of ASC Topic 350-20-35-1 “Intangibles, Goodwill and Other – Goodwill Subsequent Measurement,” as well as property, plant and equipment in circumstances when the Company determines that those assets are impaired under the provisions of ASC Topic 360-10-35-17 “Property Plant and Equipment – Subsequent Measurement” and the measurement of termination benefits in connection with the Company’s restructuring plan under the provisions of ASC Topic 420 “Exit or Disposal Cost Obligations.” During the nine months ended December 31, 2011 assets measured at fair value on a nonrecurring basis include the Company’s 20% ownership interest in YLS PTY. The fair value was determined by virtue of the amount paid by the Company to acquire the other 80% interest on December 13, 2011, and is considered a level 3 input.

Index

Fair Values of Defined Benefit Plan Assets

The Company holds a variety of equity and fixed income securities within the assets of its defined benefit plans. The fair values of these assets were determined using the fair value hierarchy of inputs described above. These fixed income securities consist primarily of insurance contracts which are carried at their liquidation value based on actuarial calculations and the terms of the contracts. A summary of changes in Level 3 fixed income securities within those defined benefit plans during the three and nine months ended December 31, 2011 is as follows (in thousands):

Three months ended December 31, 2011

Balance at October 1, 2011	\$ 16,280
Return on investment	214
Disbursements	(114)
Balance at December 31, 2011	\$ 16,380

Nine Month Period Ended December 31, 2011

Balance at April 1, 2011	\$ 15,872
Return on investment	830
Disbursements	(322)
Balance at December 31, 2011	\$ 16,380

Index

4. Inventories

Inventories consisted of the following (in thousands):

	December	
	31, 2011	March 31, 2011
At cost - FIFO basis:		
Raw materials	\$ 51,563	\$ 44,769
Work-in-process	16,209	15,175
Finished goods	56,238	47,329
	124,010	107,273
LIFO cost less than FIFO cost	(19,722)	(17,242)
Net inventories	\$ 104,288	\$ 90,031

An actual valuation of inventory under the LIFO method can be made only at the end of each year based on the inventory levels and costs at that time. Accordingly, interim LIFO calculations must necessarily be based on management's estimates of expected year-end inventory levels and costs. Because these are subject to many factors beyond management's control, estimated interim results are subject to change in the final year-end LIFO inventory valuation.

5. Marketable Securities

All of the Company's marketable securities, which consist of equity securities and fixed income securities, have been classified as available-for-sale securities and are therefore recorded at their fair values with the unrealized gains and losses, net of tax, reported in accumulated other comprehensive loss in the shareholders' equity section of the balance sheet unless unrealized losses are deemed to be other-than-temporary. In such instances, the unrealized losses are reported in the consolidated statements of operations and retained earnings within investment income. Estimated fair value is based on published trading values at the balance sheet dates. The cost of securities sold is based on the specific identification method. Interest and dividend income are included in investment income in the consolidated statements of operations and retained earnings.

The marketable securities are carried as long-term assets since they are held for the settlement of the Company's general and products liability insurance claims filed through CM Insurance Company, Inc., a wholly owned captive insurance subsidiary. The marketable securities are not available for general working capital purposes.

In accordance with ASC Topic 320-10-35-30 "Investments – Debt & Equity Securities – Subsequent Measurement," the Company reviews its marketable securities for declines in market value that may be considered other-than-temporary. The Company generally considers market value declines to be other-than-temporary if there are declines for a period longer than nine months and in excess of 20% of original cost, or when other evidence indicates impairment. There were no other-than-temporary impairments for the nine months ended December 31, 2011 or December 31, 2010.

The following is a summary of available-for-sale securities at December 31, 2011 (in thousands):

	Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
Marketable securities	\$22,308	\$1,728	\$176	\$23,860

Index

The aggregate fair value of investments and unrealized losses on available-for-sale securities in an unrealized loss position at December 31, 2011 are as follows (in thousands):

	Aggregate Fair Value	Unrealized Losses
Securities in a continuous loss position for less than 12 months	\$2,335	\$176
Securities in a continuous loss position for more than 12 months	-	-
	\$2,335	\$176

Net realized gains related to sales of marketable securities were \$31,000 and \$90,000 for the three month periods ended December 31, 2011 and 2010, respectively and \$152,000 and \$298,000 for the nine month periods then ended, respectively.

The following is a summary of available-for-sale securities at March 31, 2011 (in thousands):

	Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
Marketable securities	\$23,708	\$1,064	\$180	\$24,592

6. Goodwill and Intangible Assets

Goodwill is not amortized but is tested for impairment at least annually, in accordance with the provisions of ASC Topic 350-20-35-1. Goodwill impairment is deemed to exist if the net book value of a reporting unit exceeds its estimated fair value. The fair value of a reporting unit is determined using two valuation techniques: an income approach and a market approach. The Company's reporting units are determined based upon whether discrete financial information is available and regularly reviewed, whether those units constitute a business, and the extent of economic similarities between those reporting units for purposes of aggregation. The Company's reporting units identified under ASC Topic 350-20-35-33 are at the component level, or one level below the reporting segment level as defined under ASC Topic 280-10-50-10 "Segment Reporting – Disclosure." The Company has four reporting units. Only two of the four reporting units carry goodwill at December 31, 2011 and March 31, 2011.

In accordance with ASC Topic 350-20-35-3, the measurement of impairment of goodwill consists of two steps. In the first step, the Company compares the fair value of each reporting unit to its carrying value. As part of the impairment analysis, the Company determines the fair value of each of its reporting units with goodwill using both the income approach and market approach. The income approach uses a discounted cash flow methodology to determine fair value. This methodology recognizes value based on the expected receipt of future economic benefits. Key assumptions in the income approach include a free cash flow projection, an estimated discount rate, a long-term growth rate and a terminal value. These assumptions are based upon the Company's historical experience, current market trends and future expectations. The market approach involves the determination of implied EBITDA multiples selected from an analysis of peer companies considered to be market participants and the application of those multiples to each reporting units' historical and forecasted earnings.

No impairment charges related to goodwill or intangible assets were recorded during the nine months ended December 31, 2011 or 2010. However, future impairment indicators, such as declines in forecasted cash flows, may cause the need for interim impairment tests which may result in significant impairment charges. Impairment indicators could be the result of a significant decline in the Company's stock price, significant adverse changes in forecasted cash flows, declines in control premiums or other variables.

Index

A summary of changes in goodwill during the nine months ended December 31, 2011 is as follows (in thousands):

Balance at April 1, 2011	\$106,055
Acquisition of YLS PTY (See Note 2)	2,669
Currency translation	(2,912)
Balance at December 31, 2011	\$105,812

Identifiable intangible assets acquired in a business combination are amortized over their useful lives unless their useful lives are indefinite, in which case those intangible assets are tested for impairment annually (or upon identification of impairment indicators) and not amortized until their lives are determined to be finite.

Identifiable intangible assets are summarized as follows (in thousands):

	December 31, 2011			March 31, 2011		
	Gross Carrying Amount	Accumulated Amortization	Net	Gross Carrying Amount	Accumulated Amortization	Net
Trademark	\$5,616	\$ (1,000)	\$4,616	\$6,136	\$ (841)	\$5,295
Customer relationships	13,893	(4,146)	9,747	15,179	(3,485)	11,694
Other	1,302	(333)	969	1,339	(239)	1,100
Total	\$20,811	\$ (5,479)	\$15,332	\$22,654	\$ (4,565)	\$18,089

Based on the current amount of identifiable intangible assets, the estimated amortization expense for each of the fiscal years 2012 through 2016 is expected to be approximately \$1,900,000.

7. Derivative Instruments

The Company uses derivative instruments to manage selected foreign currency exposures. The Company does not use derivative instruments for speculative trading purposes. All derivative instruments must be recorded on the balance sheet at fair value. For derivatives designated as cash flow hedges, the effective portion of changes in the fair value of the derivative is recorded as accumulated other comprehensive loss, or AOCL, and is reclassified to earnings when the underlying transaction has an impact on earnings. The ineffective portion of changes in the fair value of the derivative is reported in foreign currency exchange loss (gain) in the Company's consolidated statement of operations. For derivatives not classified as cash flow hedges, all changes in market value are recorded as a foreign currency exchange loss (gain) in the Company's consolidated statements of operations.

The Company has foreign currency forward agreements and a cross-currency swap in place to offset changes in the value of intercompany loans to certain foreign subsidiaries due to changes in foreign exchange rates. The notional amount of these derivatives is \$12,317,000 as of December 31, 2011 and all contracts mature by September 2013. These contracts are not designated as hedges.

The Company has foreign currency forward agreements in place to hedge changes in the value of recorded foreign currency liabilities due to changes in foreign exchange rates at the settlement date. The notional amount of those derivatives is \$2,613,000 as of December 31, 2011 and all contracts mature within twelve months. These contracts are marked to market each balance sheet date and are not designated as hedges.

The Company has foreign currency forward agreements that are designated as cash flow hedges to hedge a portion of forecasted inventory purchases and sales, including multi-year contracts related to capital project sales, denominated in foreign currencies. The notional amount of those derivatives is \$9,213,000 as of December 31, 2011 and all contracts mature within thirty-three months of December 31, 2011.

The Company is exposed to credit losses in the event of non-performance by the counterparties on its financial instruments. All counterparties have investment grade credit ratings. The Company anticipates that these counterparties will be able to fully satisfy their obligations under the contracts. The Company has derivative contracts with four different counterparties as of December 31, 2011.

Index

The following is the effect of derivative instruments on the condensed consolidated statement of operations for the nine months ended December 31, 2011 (in thousands):

Derivatives Designated as Cash Flow Hedges	Amount of Gain Recognized in Other Comprehensive Loss on Derivatives (Effective Portion)	Location of Gain or (Loss) Recognized in Income on Derivatives	Amount of Gain Reclassified from AOCL into Income (Effective Portion)
Foreign exchange contracts	\$ 171	Cost of products sold	\$ 138

Derivatives Not Designated as Hedging Instruments	Location of Gain Recognized in Income on Derivatives	Amount of Gain Recognized in Income on Derivatives
Foreign exchange contracts	Foreign currency exchange gain	\$ 987

As of December 31, 2011, the Company had no derivatives designated as net investments or fair value hedges in accordance with ASC Topic 815, "Derivatives and Hedging."

The following is information relative to the Company's derivative instruments in the condensed consolidated balance sheet as of December 31, 2011 (in thousands):

Derivatives Designated as Hedging Instruments	Balance Sheet Location	Fair Value of Asset (Liability)
Foreign exchange contracts	Other Assets	\$ 147
Foreign exchange contracts	Accrued Liabilities	\$ (66)

Derivatives Not Designated as Hedging Instruments	Balance Sheet Location	Fair Value of Asset (Liability)
Foreign exchange contracts	Other Assets	\$ 33
Foreign exchange contracts	Accrued Liabilities	\$ (89)

8. Debt

The Company entered into an amended, restated and expanded revolving credit facility dated December 31, 2009. The Revolving Credit Facility provides availability up to a maximum of \$85,000,000 and has an initial term ending December 31, 2013.

Provided there is no default, the Company may, on a one-time basis, request an increase in the availability of the Revolving Credit Facility by an amount not exceeding \$65,000,000, subject to lender approval. The unused portion of the Revolving Credit Facility totalled \$69,543,000 net of outstanding borrowings of \$0 and outstanding letters of credit of \$15,457,000 as of December 31, 2011. Interest on the revolver is payable at varying Eurodollar rates based

on LIBOR or prime plus a spread determined by the Company's total leverage ratio amounting to 175 or 75 basis points, respectively, based on the Company's leverage ratio at December 31, 2011. The Revolving Credit Facility is secured by all U.S. inventory, receivables, equipment, real property, subsidiary stock (limited to 65% of non-U.S. subsidiaries) and intellectual property.

The corresponding credit agreement associated with the Revolving Credit Facility places certain debt covenant restrictions on the Company, including certain financial requirements and restrictions on dividend payments, with which the Company was in compliance as of December 31, 2011. Key financial covenants include a minimum fixed charge coverage ratio of 1.25x, a maximum total leverage ratio, net of cash, of 3.50x and maximum annual capital expenditures of \$18,000,000, excluding capital expenditures for a global ERP system.

Index

The Company entered into a third amendment to its Revolving Credit Facility on July 15, 2011 to (i) make reductions in the ‘Applicable Rate’ grid, in recognition of improved market conditions, resulting in lower unused, Libor and Base Rate borrowing and letters of credit fees at various levels in the grid, based on the Total Leverage Ratio (ii) amend the definition of Total Funded Indebtedness to exclude commercial letters of credit. Total funded indebtedness is used in the calculation of the Total Leverage Ratio covenant (iii) allow for letters of credit to be issued for any period up to 5 days prior to the expiry date of the Revolving Credit Facility and a “basket” of \$20,000,000 for letters of credit which may expire up to 1 year past the expiry date (iv) permit a general lien “basket” of \$2,500,000 (v) extend the expected date for consummation of a pre-approved specific acquisition and divestiture, and (vi) increase the general Investments “basket” by \$5,000,000 to \$30,000,000.

On January 25, 2011, the Company issued \$150,000,000 principal amount of 7 7/8% Senior Subordinated Notes due 2019 in a private placement pursuant to Rule 144A under the Securities Act of 1933, as amended (Unregistered 7 7/8% Notes). The offering price of the notes was 98.545% of par after adjustment for original issue discount.

Provisions of the Unregistered 7 7/8% Notes include, without limitation, restrictions on indebtedness, asset sales, and dividends and other restricted payments. Until February 1, 2014, the Company may redeem up to 35% of the outstanding Unregistered 7 7/8% Notes at a redemption price of 107.875% with the proceeds of equity offerings, subject to certain restrictions. On or after February 1, 2015, the Unregistered 7 7/8% Notes are redeemable at the option of the Company, in whole or in part, at a redemption price of 103.938%, reducing to 101.969% and 100% on February 1, 2016 and February 1, 2017, respectively and are due February 1, 2019. In the event of a Change of Control (as defined in the indenture for such notes), each holder of the Unregistered 7 7/8% Notes may require the Company to repurchase all or a portion of such holder’s Unregistered 7 7/8% Notes at a purchase price equal to 101% of the principal amount thereof. The Unregistered 7 7/8% Notes are guaranteed by certain existing and future U.S. subsidiaries and are not subject to any sinking fund requirements.

During the nine months ended December 31, 2011, the Company exchanged \$150,000,000 of its outstanding Unregistered 7 7/8% Notes due 2019 for a like principal amount of its 7 7/8% Notes due 2019, registered under the Securities Act of 1933, as amended (7 7/8% Notes). All of the Unregistered 7 7/8% Senior Subordinated Notes due 2019 were exchanged in the transaction. The 7 7/8% Notes contain identical terms and provisions as the Unregistered 7 7/8% Notes.

The carrying amount of the Company’s revolving credit facility, notes payable to banks and other senior debt approximate their fair values based on current market rates. The Company’s 7 7/8% Notes, which have a par value of \$150,000,000 at December 31, 2011, have an approximate fair value of \$154,875,000 based on quoted market prices.

The Company’s Notes payable to banks consist primarily of draws against unsecured non-U.S. lines of credit. The Company’s other senior debt consists primarily of capital lease obligations.

Unsecured and uncommitted lines of credit are available to meet short-term working capital needs for certain of our subsidiaries operating outside of the U.S. The lines of credit are available on an offering basis, meaning that transactions under the line of credit will be on such terms and conditions, including interest rate, maturity, representations, covenants and events of default, as mutually agreed between our subsidiaries and the local bank at the time of each specific transaction. As of December 31, 2011, significant unsecured credit lines totalled approximately \$9,022,000 of which \$235,000 was drawn.

Refer to the Company’s consolidated financial statements included in its annual report on Form 10-K for the year ended March 31, 2011 for further information on its debt arrangements.

9. Net Periodic Benefit Cost

The following table sets forth the components of net periodic pension cost for the Company's defined benefit pension plans (in thousands):

	Three months ended		Nine months ended	
	December 31, 2011	December 31, 2010	December 31, 2011	December 31, 2010
Service costs	\$846	\$986	\$2,537	\$2,957
Interest cost	2,507	2,492	7,521	7,476
Expected return on plan assets	(2,689)	(2,470)	(8,065)	(7,408)
Net amortization	1,004	912	3,012	2,736
Curtailment (see below)	-	-	1,172	-
Net periodic pension cost	\$1,668	\$1,920	\$6,177	\$5,761

During the quarter ended June 30, 2011, the Company completed negotiations with one of its labor unions which resulted in an amendment to one of its pension plans. Within cost of products sold for the nine months ended December 31, 2011, the Company recorded a curtailment charge of \$1,172,000 resulting from the amendment.

The Company currently plans to contribute approximately \$6,900,000 to its pension plans in fiscal 2012.

The following table sets forth the components of net periodic postretirement benefit cost for the Company's defined benefit postretirement plan (in thousands):

	Three months ended		Nine months ended	
	December 31, 2011	December 31, 2010	December 31, 2011	December 31, 2010
Service costs	\$-	\$-	\$-	\$-
Interest cost	120	128	359	383
Amortization of plan net losses	82	86	246	258
Net periodic postretirement cost	\$202	\$214	\$605	\$641

For additional information on the Company's defined benefit pension and postretirement benefit plans, refer to the consolidated financial statements included in the Company's annual report on Form 10-K for the year ended March 31, 2011.

10. Earnings Per Share

The following table sets forth the computation of basic and diluted earnings per share (in thousands):

	Three months ended		Nine months ended	
	December 31, 2011	December 31, 2010	December 31, 2011	December 31, 2010
Numerator for basic and diluted earnings per share:				
Net income (loss)	\$8,515	\$(39,639)	\$17,970	\$(38,493)
Denominators:				
Weighted-average common stock outstanding – denominator for basic EPS	19,313	19,082	19,256	19,050
Effect of dilutive employee stock options and other share-based awards	175	-	270	-
Adjusted weighted-average common stock outstanding and assumed conversions – denominator for diluted EPS	19,488	19,082	19,526	19,050

On July 26, 2010, the shareholders of the Company approved the 2010 Long Term Incentive Plan (“LTIP”). The Company grants share based compensation to eligible participants under the LTIP. The total number of shares of common stock with respect to which awards may be granted under the plan is 1,250,000 including shares not previously authorized for issuance under any of the Prior Stock Plans and any shares not issued or subject to outstanding awards under the Prior Stock Plans.

During the first nine months of fiscal 2012 and 2011, a total of 165,544 and 4,125 shares of stock were issued upon the exercising of stock options related to the Company’s stock option plans. During the nine months ended December 31, 2011 and 2010, 57,081 and 0 shares, respectively, of restricted stock vested and were issued. During the fiscal year ended March 31, 2011, 25,873 shares of restricted stock vested and were issued.

Refer to the Company’s consolidated financial statements included in its Form 10-K for the year ended March 31, 2011 for further information on its earnings per share and stock plans.

11. Loss Contingencies

Like many industrial manufacturers, the Company is involved in asbestos-related litigation. In continually evaluating costs relating to its estimated asbestos-related liability, the Company reviews, among other things, the incidence of past and recent claims, the historical case dismissal rate, the mix of the claimed illnesses and occupations of the plaintiffs, its recent and historical resolution of the cases, the number of cases pending against it, the status and results of broad-based settlement discussions, and the number of years such activity might continue. Based on this review, the Company has estimated its share of liability to defend and resolve probable asbestos-related personal injury claims. This estimate is highly uncertain due to the limitations of the available data and the difficulty of forecasting with any certainty the numerous variables that can affect the range of the liability. The Company will continue to study the variables in light of additional information in order to identify trends that may become evident and to assess their impact on the range of liability that is probable and estimable.

Based on actuarial information, the Company has estimated its asbestos-related aggregate liability including related legal costs to range between \$7,000,000 and \$18,000,000 using actuarial parameters of continued claims for a period of 18 to 30 years from the end of the current fiscal year. The Company's estimation of its asbestos-related aggregate liability that is probable and estimable, in accordance with U.S. generally accepted accounting principles

approximates \$12,000,000, which has been reflected as a liability in the condensed consolidated financial statements as of December 31, 2011. The recorded liability does not consider the impact of any potential favorable federal legislation. This liability will fluctuate based on the uncertainty in the number of future claims that will be filed and the cost to resolve those claims, which may be influenced by a number of factors, including the outcome of the ongoing broad-based settlement negotiations, defensive strategies, and the cost to resolve claims outside the broad-based settlement program. Of this amount, management expects to incur asbestos liability payments of approximately \$1,000,000 over the next 12 months. Because payment of the liability is likely to extend over many years, management believes that the potential additional costs for claims will not have a material after-tax effect on the financial condition of the Company or its liquidity, although the net after-tax effect of any future liabilities recorded could be material to earnings in a future period.

Index

12. Restructuring Charges

During the nine months ended December 31, 2011, the Company initiated and completed employee workforce reductions at one of its European facilities. These reductions resulted in approximately \$413,000 in one-time termination benefits recorded as restructuring costs during the nine months ended December 31, 2011. These restructuring charges were fully paid by December 31, 2011.

During the three and nine months period ended December 31, 2011 and 2010 the Company recognized a gain of \$1,467,000 and \$500,000 respectively on the sales of previously closed manufacturing facilities. The gain was recorded as a credit to restructuring expense in both periods.

13. Income Taxes

Income tax expense as a percentage of income from continuing operations before income tax expense was -16.4% and (10,915.8)% for the three month periods ended December 31, 2011 and 2010, respectively and 25.1% and 3,840.7% for the nine month periods then ended, respectively. Typically these percentages vary from the U.S. statutory rate primarily due to varying effective tax rates at the Company's foreign subsidiaries, and the jurisdictional mix of taxable income for these subsidiaries. The unusual income tax percentage in fiscal year 2011 is due to the recording of a deferred tax asset valuation allowance described in the paragraph below. During the nine month period ended December 31, 2011, the Company received notice of a tax assessment related to a prior period for one of its foreign subsidiaries. Income tax expense for the nine month period ended December 31, 2011 includes approximately \$900,000 in past due taxes, interest, and penalties related to the assessment.

During the third and fourth quarters of fiscal 2011, the Company recorded a non-cash charge of \$42,983,000 included within its provision for income taxes. This charge relates to the Company's determination that a full valuation allowance against its deferred tax assets generated in the U.S. and at three of the Company's foreign subsidiaries was necessary. Accounting rules require a reduction of the carrying amounts of deferred tax assets by a valuation allowance if, based on the available and objectively verifiable evidence, it is more likely than not that such assets will not be realized. The existence of cumulative losses for a certain threshold period is a significant form of negative evidence used in the assessment. If a cumulative loss threshold is met, the accounting rules indicate that forecasts of future profitability are generally not sufficient positive evidence to overcome the presumption that a valuation allowance is necessary.

We estimate that the effective tax rate including discrete items related to continuing operations will be approximately 20% to 25% for fiscal 2012 based on the forecasted jurisdictional mix of taxable income.

Index

14. Summary Financial Information

The following information (in thousands) sets forth the condensed consolidating summary financial information of the parent and guarantors, which guarantee the 7 7/8% Senior Subordinated Notes, and the nonguarantors. The guarantors are wholly owned and the guarantees are full, unconditional, joint and several.

The Company has reclassified certain balances in its March 31 2011 summary financial information to reflect the liquidation of a subsidiary effective as of that date. The reclassifications have no impact on the Company's consolidated financial statements.

As of December 31, 2011	Parent	Guarantors	Non Guarantors	Eliminations	Consolidated

15. Effects of New Accounting Pronouncements

In December 2011, the FASB issued ASU 2011-12, Comprehensive Income (Topic 220): Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in Accounting Standards Update No. 2011-05. Among the new provisions in ASU 2011-05 was a requirement for entities to present reclassification adjustments out of accumulated other comprehensive income by component in both the statement in which net income is presented and the statement in which other comprehensive income is presented (for both interim and annual financial statements); however this reclassification requirement is indefinitely deferred by ASU 2011-12 and will be further deliberated by the FASB at a future date.

In December 2011, the FASB issued Accounting Standards Update No. 2011-11, Balance Sheet (Topic 210)—Disclosures about Offsetting Assets and Liabilities (ASU 2011-11). The update requires entities to disclose information about offsetting and related arrangements of financial instruments and derivative instruments. The ASU is effective for annual periods beginning on or after January 1, 2013 and interim periods therein. We are currently evaluating the impact this update will have on our consolidated financial statements.

In September 2011, the FASB issued ASU 2011-08 Testing Goodwill for Impairment, which permits an entity to make a qualitative assessment of whether it is more likely than not that a reporting unit's fair value is less than its carrying value before applying the two-step goodwill impairment model that is currently in place. If it is determined

through the qualitative assessment that a reporting unit's fair value is more likely than not greater than its carrying value, the remaining impairment steps would not be necessary. The qualitative assessment is optional, allowing companies to go directly to the quantitative assessment. This update is effective for annual and interim goodwill impairment tests performed in fiscal years beginning after December 15, 2011. Early adoption is permitted. We are currently evaluating the impact this update will have on our consolidated financial statements.

Index

In June 2011, the FASB issued ASU No. 2011-05, Presentation of Comprehensive Income (“ASU 2011-05”), effective for fiscal years, and interim periods within those years, beginning after December 15, 2011. The issuance of ASU 2011-5 is intended to improve the comparability, consistency and transparency of financial reporting and to increase the prominence of items reported in other comprehensive income. The guidance in ASU 2011-5 supersedes the presentation options in ASC Topic 220 and facilitates convergence of U.S. generally accepted accounting principles and International Financial Reporting Standards by eliminating the option to present components of other comprehensive income as part of the statement of changes in stockholders’ equity and requiring that all nonowner changes in stockholders’ equity be presented either in a single continuous statement of comprehensive income or in two separate but consecutive statements. The Company does not expect that the adoption of ASU 2011-05 will have a significant impact on the Company’s consolidated financial statements.

In May 2011 the FASB issued ASU No. 2011-04, Fair Value Measurements (Topic 820): Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in US GAAP and International Financial Reporting Standards (“IFRS”) (“ASU 2011-04”). ASU 2011-04 represents the converged guidance of the FASB and the International Accounting Standards Board (the “Boards”) on fair value measurements. The collective efforts of the Boards and their staffs, reflected in ASU 2011-04, have resulted in common requirements for measuring fair value and for disclosing information about fair value measurements, including a consistent meaning of the term “fair value.” The Boards have concluded the common requirements will result in greater comparability of fair value measurements presented and disclosed in financial statements prepared in accordance with GAAP and IFRS. The amendments in this ASU are required to be applied prospectively, and are effective for interim and annual periods beginning after December 15, 2011. The Company does not expect that the adoption of ASU 2011-04 will have a significant impact on the Company’s consolidated financial statements.

In March 2011, the SEC issued Staff Accounting Bulletin (SAB) 114. This SAB revises or rescinds portions of the interpretive guidance included in the codification of the Staff Accounting Bulletin Series. This update is intended to make the relevant interpretive guidance consistent with current authoritative accounting guidance issued as a part of the FASB’s Codification. The principal changes involve revision or removal of accounting guidance references and other conforming changes to ensure consistency of referencing through the SAB Series. The effective date for SAB 114 was March 28, 2011. The adoption of the new guidance did not have a material impact on the Company’s consolidated financial statements.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF
RESULTS OF OPERATIONS AND FINANCIAL CONDITION

Executive Overview

We are a leading worldwide designer, manufacturer and marketer of material handling products, systems and services which efficiently and safely move, lift, position and secure material. Key products include hoists, actuators, cranes and lifting and rigging tools. The Company is focused on commercial and industrial applications that require the safety and quality provided by its superior design and engineering know-how.

Founded in 1875, we have grown to our current size and leadership position through organic growth and acquisitions. We developed our leading market position over our 136-year history by emphasizing technological innovation, manufacturing excellence and superior after-sale service. In addition, acquisitions significantly broadened our product lines and services and expanded our geographic reach, end-user markets and customer base. Ongoing initiatives include improving our productivity and increasing penetration of the Asian, Latin American and European marketplaces. In accordance with our strategy, we have been investing in our directed sales and marketing activities, new product development and "Lean" efforts across the Company. Shareholder value will be enhanced through continued emphasis on improvement of the fundamentals including market expansion, a high degree of customer satisfaction, new product development, manufacturing efficiency, cost containment, and efficient capital investment.

Over the course of our history, we have managed through many business cycles and our strong cash flow profile has helped us grow and expand globally. We stand with a strong capital structure which includes sufficient cash reserves, significant revolver availability with an expiration of December 2013, fixed-rate long-term debt which expires in 2019 and a strong cash flow business profile. During fiscal 2010 we initiated projects to strategically reorganize our North American hoist and rigging operations, which were essentially completed during the first quarter of fiscal 2011. The projects included the closure of two manufacturing facilities and the significant downsizing of a third facility. The closures and downsizing resulted in a reduction of approximately 500,000 square feet of manufacturing space (or approximately 25% of total manufacturing space) and we expect to generate annual savings estimated at approximately \$15,000,000.

Additionally our revenue base is now more geographically diverse than at any time in our Company's history, with approximately 47% derived from customers outside the U.S. for the nine months ended December 31, 2011. We believe this will help balance the impact of changes that will occur in local economies as well as benefit the Company from growth in emerging markets. As in the past, we monitor both U.S. and Eurozone Industrial Capacity Utilization statistics as indicators of anticipated demand for our product. Since their June 2009 trough, these statistics have improved through December 2011. In addition, we continue to monitor the potential impact of other global and U.S. trends including industrial production, energy costs, steel price fluctuations, interest rates, currency exchange and activity of end-user markets around the globe.

From a strategic perspective, we are investing in global markets and new products as we focus on our greatest opportunities for growth. We maintain a strong North American market share with significant leading market positions in hoists, lifting and sling chain, forged attachments and actuators. We seek to maintain and enhance our market share by focusing our sales and marketing activities toward select North American and global market sectors including energy, construction, entertainment, mining and food processing.

Regardless of the economic climate and point in the economic cycle, we constantly explore ways to manage our operating margins as well as further improve our productivity and competitiveness. We have specific initiatives related to improved customer satisfaction, reduction of defects, shortened lead times, improved inventory turns and on-time deliveries, reduction of warranty costs, and improved working capital utilization. The initiatives are being

driven by the continued implementation of our “Lean” efforts which are fundamentally changing our manufacturing and business processes to be more responsive to customer demand and improving on-time delivery and productivity. In addition to “Lean,” we are working to achieve these strategic initiatives through product simplification, the creation of centers of excellence, and improved supply chain management.

We continuously monitor market prices of steel. We purchase approximately \$30,000,000 to \$40,000,000 of steel annually in a variety of forms including rod, wire, bar, structural and others. Generally, as we experience fluctuations in our costs, we reflect them as price increases or surcharges to our customers with the goal of being margin neutral. Some of our steel costs have increased during this quarter as the result of higher scrap and alloy surcharges.

Index

We are also looking for opportunities for growth via strategic acquisitions or joint ventures. The focus of our acquisition strategy centers on opportunities for non-U.S. market penetration and product line expansion in alignment with our existing core product offering.

We operate in a highly competitive and global business environment. We face a variety of opportunities in those markets and geographies, including trends toward increased utilization of the global labor force and the expansion of market opportunities in Asia and other emerging markets. While we continue to execute our long-term growth strategy, we are supported by our strong capital structure, including a solid cash position and flexible cost base. We are also aggressively addressing costs and restructuring opportunities to enhance future margin opportunities.

Results of Operations

Three Months and Nine Months Ended December 31, 2011 and December 31, 2010

Net sales in the fiscal 2012 quarter ended December 31, 2011 were \$142,750,000, up \$14,054,000 or 10.9% from the fiscal 2011 quarter ended December 31, 2010 net sales of \$128,696,000. Net sales for the nine month period ended December 31, 2011 were \$432,373,000, up \$52,278,000 or 13.8% from the nine months ended December 31, 2010 net sales of \$380,095,000. For the three month period ended December 31, 2011, net sales was positively impacted \$12,201,000 by volume and mix of products sold, \$3,576,000 by price increases, and \$458,000 by foreign currency translation and negatively impacted \$2,181,000 by fewer shipping days. For the nine month period ended December 31, 2011 net sales was positively impacted \$32,148,000 by volume and mix of products sold, \$9,338,000 by price increases, and \$12,974,000 by foreign currency translation and negatively impacted \$2,181,000 by fewer shipping days.

Gross profit in the fiscal 2012 quarter ended December 31, 2011 was \$38,603,000, up \$9,252,000 or 31.5% from the fiscal 2011 quarter ended December 31, 2010 gross profit of \$29,351,000. Gross profit margin increased to 27.0% in the fiscal 2012 quarter from 22.8% in the fiscal 2011 quarter. Gross profit in the nine month period ended December 31, 2011 was \$113,476,000, up \$24,869,000 or 28.1% from the nine month period ended December 31, 2010 gross profit of \$88,607,000. Gross profit margin for the nine month period ending December 31, 2011 increased from 23.3% to 26.2%. For the quarter ended December 31, 2011, the increase in gross profit margin was due to \$5,825,000 in increased volume, \$1,897,000 in improvements at our forging facility, \$1,340,000 less product liability costs, and favorable other manufacturing variances of \$129,000. For the nine months ended December 31, 2011, the increase in gross profit margin was due to \$15,021,000 in increased volume, \$3,006,000 in less restructuring related expenses included within cost of goods sold, \$2,462,000 from lower product liability expenses, favorable other manufacturing variances of \$1,220,000, and improvements at our forging facility of \$595,000 offset by a pension plan curtailment charge of \$1,172,000. The translation of foreign currencies had a \$61,000 and \$3,737,000 positive impact on gross profit for the three months and nine months ended December 31, 2011 respectively.

Selling expenses were \$15,980,000 and \$15,524,000 in the three month periods ended December 31, 2011 and 2010, respectively. Selling expenses were \$47,515,000 and \$46,219,000 for the nine months ended December 31, 2011 and December 31, 2010, respectively. The increase for the three month period ended December 31, 2011 compared to December 31, 2010 is primarily related to the overall increase in sales offset by \$94,000 in a decrease due to foreign currency translation. The increase for the nine month period ended December 31, 2011 compared to the nine month period ended December 31, 2010 is primarily related to an increase of \$1,494,000 for foreign currency translation. Both of these increases were offset by continuing aggressive efforts to reduce or eliminate costs. As a percentage of consolidated net sales, selling expenses were 11.2% and 12.1% for the three months ended December 31, 2011 and 2010, respectively and 11.0% and 12.2% for the nine month periods then ended, respectively.

General and administrative expenses were \$11,605,000 and \$10,275,000 in the three month periods ended December 31, 2011 and 2010, respectively and \$33,956,000 and \$29,855,000 in the nine month periods then ended, respectively. The increases are related to the expansion of the management team in Asia and Latin America, and higher variable compensation, which were somewhat offset by benefits from aggressive cost reduction activities. Additionally, foreign currency translation had a \$41,000 favorable and \$894,000 unfavorable impact on general and administrative expense for the three and nine month periods ended December 31, 2011 respectively. As a percentage of consolidated net sales, general and administrative expenses were 8.1% and 8.0% for the three month periods ended December 31, 2011 and 2010, respectively and 7.9% for each of the nine month periods then ended, respectively.

Index

Restructuring (gain) charges, net were \$(1,467,000) and \$150,000 for the three months ended December 31, 2011 and 2010, respectively and \$(1,037,000) and \$1,947,000 for the nine month periods then ended, respectively. During the nine months ended December 31, 2011, the Company initiated and completed employee workforce reductions at one of its European facilities. These reductions resulted in approximately \$413,000 in one-time termination benefits recorded as restructuring costs during the nine months ended December 31, 2011. These restructuring charges were fully paid by December 31, 2011.

During the three and nine months period ended December 31, 2011 and 2010 the Company recognized net gains of \$1,462,000 and \$500,000, respectively, on the sales of previously closed manufacturing facilities. These net gains were recorded as a credit to restructuring expense in both periods.

There were no significant changes in amortization of intangibles for the three and nine months ended December 31, 2011 compared to the three and nine months ended December 31, 2010 other than the impact of foreign currency translation. Amortization of intangibles was \$485,000 and \$452,000 for the three months ended December 31, 2011 and 2010, respectively and \$1,515,000 and \$1,315,000 for the nine month periods then ended, respectively.

Interest and debt expense was \$3,590,000 and \$3,281,000 for the three months ended December 31, 2011 and 2010, respectively and \$10,651,000 and \$9,885,000 for the nine month periods then ended, respectively. The increases in interest expense in the periods ended December 31, 2011 as compared to the periods ended December 31, 2010 relate to the Company's \$150,000,000 7 7/8 Notes outstanding as of December 31, 2011, compared to the \$124,855,000 8 7/8 Notes outstanding as of December 31, 2010.

During the three and nine months ended December 31, 2011 other income, net includes an \$850,000 non-cash gain resulting from the re-measurement of our 20% interest in Yale Lifting Solutions (Pty) LTD to fair value prior to acquiring the other 80% interest on December 13, 2011. Subsequent to the acquisition we own 100% of Yale Lifting Solutions (Pty) LTD. Previously, we accounted for our 20% investment under the cost method as we did not exercise significant influence over Yale Lifting Solutions (Pty) LTD's operating and financial policies.

Income tax expense as a percentage of income from continuing operations before income tax expense was 16.4% and (10,915.8)% for the three month periods ended December 31, 2011 and 2010, respectively and 25.1% and 3,840.7% for the nine-month periods then ended, respectively. Typically these percentages vary from the U.S. statutory rate primarily due to varying effective tax rates at the Company's foreign subsidiaries, and the jurisdictional mix of taxable income for these subsidiaries. The unusual income tax percentage in fiscal year 2011 is due to the recording of a deferred tax asset valuation allowance described in the paragraph below. During the nine months ended December 31, 2011, the Company received notice of a tax assessment related to a prior period for one of its foreign subsidiaries. Income tax expense for the nine month periods ended December 31, 2011 includes approximately \$900,000 in past due taxes, interest, and penalties related to the assessment.

During the third and fourth quarters of fiscal 2011, the Company recorded a non-cash charge of \$42,983,000 included within its provision for income taxes. This charge relates to the Company's determination that a full valuation allowance against its deferred tax assets generated in the U.S. and at three of the Company's foreign subsidiaries was necessary. Accounting rules require a reduction of the carrying amounts of deferred tax assets by a valuation allowance if, based on the available and objectively verifiable evidence, it is more likely than not that such assets will not be realized. The existence of cumulative losses for a certain threshold period is a significant form of negative evidence used in the assessment. If a cumulative loss threshold is met, the accounting rules indicate that forecasts of future profitability are generally not sufficient positive evidence to overcome the presumption that a valuation allowance is necessary.

We estimate that the effective tax rate including discrete items related to continuing operations will be approximately 20% to 25% for fiscal 2012 based on the forecasted jurisdictional mix of taxable income.

Income from discontinued operations, net of tax, was \$0 and \$128,000 for the three month period ended December 31, 2011 and 2010, respectively and \$409,000 and \$261,000 for the nine month period ended December 31, 2011 and 2010, respectively.

Index

Liquidity and Capital Resources

Cash and cash equivalents totalled \$82,033,000 at December 31, 2011, an increase of \$1,894,000 from the March 31, 2011 balance of \$80,139,000.

Net cash provided for operating activities was \$13,463,000 for the nine months ended December 31, 2011 compared with cash used for operating activities of \$17,009,000 for the nine months ended December 31, 2010. The significant improvement in operating cash flow from the prior year was primarily due to a \$16,763,000 increase in net income (after reversing the effect of a \$39,700,000 non-cash valuation allowance against deferred tax assets which was charged in the nine months ended December 31, 2010), and lower increases in operating assets and liabilities of \$14,061,000, primarily driven by inventory levels, prepaid expenses and accrued and non-current liabilities. During the nine months ended December 31, 2011, inventory levels increased by \$14,011,000 and prepaid expenses and accrued and non-current liabilities decreased by \$2,440,000 and \$1,774,000 respectively. The increase in inventory during the nine months ended December 31, 2011 has primarily been to meet increasing sales volume and expected future customer demand. In contrast, during the nine months ended December 31, 2010, inventory levels and prepaid expenses increased by \$18,251,000 and \$2,836,000 respectively and accrued and non-current liabilities decreased by \$5,254,000 resulting in a significant use of cash for the period. The increase in inventories during the prior year was to meet expected future customer demand as well as avoid disruption of supply during major facility consolidation projects. The increase in prepaid expenses in the prior year was due to the timing of certain prepaid expenditures and the decrease in accrued and non-current liabilities in the prior year was due to a decrease in income taxes payable and the restructuring reserve.

Net cash used by investing activities was \$10,196,000 for the nine months ended December 31, 2011 compared with cash used by investing activities of \$930,000 for the nine months ended December 31, 2010. The net cash used by investing activities for the nine months ended December 31, 2011 was primarily the result of \$10,464,000 in capital expenditures (of which \$4,651,000 relates to implementation of the SAP ERP system) and \$3,356,000 for the purchase of the remaining 80% shares in Yale Lifting Solutions (Pty) Ltd based in South Africa partially offset by \$1,244,000 in net proceeds from the sales of marketable securities and \$1,971,000 net proceeds from the sale of our vacant property in Cedar Rapids, Iowa in the period. The net cash used by investing activities for the nine months ended December 31, 2010 was primarily the result of \$6,486,000 in net proceeds from the sales of marketable securities (related to the settlement of certain product liability insurance claims) and net proceeds of \$1,182,000, primarily from the sale of our vacant property in Muskegon, Michigan offset by capital expenditures of \$8,859,000 for the period.

Net cash provided by financing activities was \$1,331,000 for the nine months ended December 31, 2011 compared with net cash used for financing activities of \$787,000 for the nine months ended December 31, 2010. The net cash provided by financing activities for the nine months ended December 31, 2011 consisted of \$1,733,000 of proceeds from exercises of stock options offset by \$238,000 of net payments under international lines of credit and \$488,000 in repayments of debt. The net cash used for financing activities for the nine months ended December 31, 2010 consisted primarily of \$290,000 of net payments under international lines of credit, and \$835,000 in repayments of debt.

We believe that our cash on hand, cash flows, and borrowing capacity under our Revolving Credit Facility will be sufficient to fund our ongoing operations and budgeted capital expenditures for at least the next twelve months. This belief is dependent upon successful execution of our current business plan and effective working capital utilization. No material restrictions exist in accessing cash held by our non-U.S. subsidiaries. Additionally we expect to meet our U.S. funding needs without repatriating non-U.S. cash and incurring the incremental U.S. taxes. As of December 31, 2011, \$29,813,000 of cash and cash equivalents were held by foreign subsidiaries.

We have an amended, restated and expanded revolving credit facility dated December 31, 2009. The Revolving Credit Facility provides availability up to a maximum of \$85,000,000 and expires December 31, 2013.

Provided there is no default, we may, on a one-time basis, request an increase in the availability of the Revolving Credit Facility by an amount not exceeding \$65,000,000, subject to lender approval. The unused portion of the Revolving Credit Facility totalled \$69,543,000, net of outstanding borrowings of \$0 and outstanding letters of credit of \$15,457,000 as of December 31, 2011. The outstanding letters of credit at December 31, 2011 consisted of \$6,169,000 in documentary letters of credit (including a significant letter of credit related to a large customer order, amounting to \$2,606,000 which will mature in April 2012) and \$9,288,000 of standby letters of credit.

Index

Interest on the revolver is payable at varying Eurodollar rates based on LIBOR or prime plus a spread determined by our total leverage ratio amounting to 175 or 75 basis points, respectively, at December 30, 2011. The Revolving Credit Facility is secured by all domestic inventory, receivables, equipment, real property, subsidiary stock (limited to 65% of foreign subsidiaries) and intellectual property.

The corresponding credit agreement associated with the Revolving Credit Facility places certain debt covenant restrictions on us, including certain financial requirements and restrictions on dividend payments, with which we were in compliance as of December 31, 2011. Key financial covenants include a minimum fixed charge coverage ratio of 1.25x, a maximum total leverage ratio, net of cash, of 3.50x and maximum annual capital expenditures of \$18,000,000 excluding capital expenditures for a global ERP system.

During the fourth quarter of fiscal year 2011, the Company refinanced its 8 7/8% Notes through the issuance of \$150,000,000 principal amount of 7 7/8% Senior Subordinated Notes due 2019 in a private placement pursuant to Rule 144A under the Securities Act of 1933, as amended ("Unregistered 7 7/8% Notes"). The proceeds from the sale of the Unregistered 7 7/8% Notes were used to repurchase or redeem all of the outstanding 8 7/8% Notes amounting to \$124,855,000 and to fund working capital and other corporate activities. The offering price of the Unregistered 7 7/8% Notes was 98.545% after adjustment for the original issue discount. Provisions of the Unregistered 7 7/8% Notes include, without limitation, restrictions on indebtedness, asset sales, and dividends and other restrictive payments. Until February 1, 2014, the Company may redeem up to 35% of the outstanding Unregistered 7 7/8% Notes at a redemption price of 107.875% with the proceeds of equity offerings, subject to certain restrictions. On or after February 1, 2015, the Unregistered 7 7/8% Notes are redeemable at the option of the Company, in whole or in part, at a redemption price of 103.938%, reducing to 100% on February 1, 2017. In the event of a Change of Control (as defined in the indenture for such notes), each holder of the Unregistered 7 7/8% Notes may require us to repurchase all or a portion of such holder's Unregistered 7 7/8% Notes at a purchase price equal to 101% of the principal amount thereof. The Unregistered 7 7/8% Notes are guaranteed by certain existing and future U.S. subsidiaries and are not subject to any sinking fund requirements.

During the nine months ended December 31, 2011, the Company exchanged its \$150,000,000 outstanding Unregistered 7 7/8% Notes for a like principal amount of 7 7/8% Senior Subordinated Notes due 2019 registered under the Securities Act of 1933, as amended ("7 7/8% Notes"). All of the Unregistered 7 7/8% Notes were exchanged in the transaction. The 7 7/8% Notes contain identical terms and provisions as the Unregistered 7 7/8% Notes.

Our capital lease obligations related to property and equipment leases amounted to \$5,388,000 at December 31, 2011. Capital lease obligations are included in senior debt in the consolidated balance sheets.

Unsecured and uncommitted lines of credit are available to meet short-term working capital needs for certain of our subsidiaries operating outside of the U.S. The lines of credit are available on an offering basis, meaning that transactions under the line of credit will be on such terms and conditions, including interest rate, maturity, representations, covenants and events of default, as mutually agreed between our subsidiaries and the local bank at the time of each specific transaction. As of December 31, 2011, significant unsecured credit lines totalled approximately \$9,022,000 of which \$235,000 was drawn.

Capital Expenditures

In addition to keeping our current equipment and plants properly maintained, we are committed to replacing, enhancing, and upgrading our property, plant, and equipment to support new product development, improve productivity and customer responsiveness, reduce production costs, increase flexibility to respond effectively to market fluctuations and changes, meet environmental requirements, enhance safety, and promote ergonomically correct work stations. Consolidated capital expenditures for the nine months ended December 31, 2011 and December

31, 2010 were \$10,464,000 and \$8,859,000, respectively. We expect capital spending for fiscal 2012 to be approximately \$13,000,000 to \$15,000,000 compared with \$12,543,000 in fiscal 2011.

Inflation and Other Market Conditions

Our costs are affected by inflation in the U.S. economy and, to a lesser extent, in non-U.S. economies including those of Europe, Canada, Mexico, South America, and Asia Pacific. We have been impacted by fluctuations in steel costs, which vary by type of steel and we continue to monitor them and address our pricing policies accordingly. In addition, U.S. employee benefits costs such as health insurance and pension, as well as energy costs have exceeded general inflation levels. Otherwise, we do not believe that general inflation has had a material effect on results of operations over the periods presented primarily due to overall low inflation levels over such periods and our ability to generally pass on rising costs through price increases or surcharges. In the future, we may be further affected by inflation that we may not be able to offset with price increases or surcharges. Additionally, we are impacted by fluctuations in currency exchange rates which are primarily translational, but transactional fluctuations could also impact our financial results.

Critical Accounting Policies

Goodwill Impairment Testing

We test goodwill for impairment at least annually, and more frequently whenever events occur or circumstances change that indicate there may be impairment. These events or circumstances could include a significant long-term adverse change in the business climate, poor indicators of operating performance, or a sale or disposition of a significant portion of a reporting unit.

The goodwill impairment test consists of comparing the fair value of a reporting unit, determined using discounted cash flows, with its carrying amount including goodwill. If the carrying amount of the reporting unit is less than the reporting unit's fair value no impairment is recognized and Step Two of the goodwill impairment testing is not necessary.

We test goodwill at the reporting unit level, which is one level below our operating segment. We identify our reporting units by assessing whether the components of our operating segment constitute businesses for which discrete financial information is available and segment management regularly reviews the operating results of those components. We also aggregate components that have similar economic characteristics into single reporting units (for example, similar products and/or services, similar long-term financial results, product processes, classes of customers, etc.). We have four reporting units, only two of which have goodwill. Our Duff Norton reporting unit and Rest of Products reporting unit have goodwill totalling \$9,783,000 and \$96,029,000 at December 31, 2011, respectively.

We currently do not believe that we have any significant impairment indicators or that any of our reporting units with goodwill are at risk of failing Step One of the goodwill impairment test. However if the projected long-term revenue growth rates, profit margins, or terminal rates are significantly lower, and/or the estimated weighted-average cost of capital is considerably higher, future testing may indicate impairment of one or more of the Company's reporting units and, as a result, the related goodwill may be impaired.

Deferred Tax Asset Valuation Allowance

During the fiscal year ended March 31, 2011, the Company recorded a non-cash charge of \$42,983,000 included within its provision for income taxes. This charge primarily relates to the Company's determination that a full valuation allowance against its deferred tax assets generated in the U.S. was necessary. The deferred tax assets in the U.S. relate principally to liabilities related to employee benefit plans and insurance reserves and U.S. net operating loss carryforwards. The U.S. net operating loss carryforwards have been generated primarily as a result of restructuring costs in fiscal years 2010 and 2011. Accounting rules require a reduction of the carrying amounts of deferred tax assets by a valuation allowance if, based on the available and objectively verifiable evidence, it is more likely than not that such assets will not be realized. The existence of cumulative losses for a certain threshold period is a significant form of negative evidence used in the assessment. During the third quarter ended December 31, 2010, the Company determined that it would be in a three-year cumulative pretax loss position in the U.S. at March 31, 2011 primarily due to restructuring-related charges incurred in the U.S. to-date in fiscal 2011, despite our expectations of future profitability. If a cumulative loss threshold is met, the accounting rules indicate that forecasts of future profitability are generally not sufficient positive evidence to overcome the presumption that a valuation allowance is necessary.

The recording of this non-cash charge does not impact the Company's ability to realize the economic benefit of its deferred tax assets and net operating loss carryforwards on future tax returns. In future periods, the allowance could be reduced or reversed based on sufficient objectively verifiable evidence indicating that it is more likely than not that a portion or all of the Company's deferred tax assets will be realized.

Index

The Internal Revenue Code imposes limitations on a corporation's ability to utilize NOLs if it experiences an "ownership change." In general terms, an ownership change may result from transactions increasing the ownership of certain stockholders in the stock of a corporation by more than 50 percentage points over a three year period. If we were to experience an ownership change, utilization of our NOLs would be subject to an annual limitation determined by multiplying the market value of our outstanding shares of stock at the time of the ownership change by the applicable long-term tax-exempt rate. Any unused annual limitation may be carried over to later years within the allowed NOL carryforward period. The amount of the limitation may, under certain circumstances, be increased or decreased by built-in gains or losses held by us at the time of the change that are recognized in the five-year period after the change.

Seasonality and Quarterly Results

Quarterly results may be materially affected by the timing of large customer orders, periods of high vacation and holiday concentrations, gains or losses on early retirement of bonds, gains or losses in our portfolio of marketable securities, restructuring charges, favorable or unfavorable foreign currency translation, divestitures and acquisitions. Therefore, the operating results for any particular fiscal quarter are not necessarily indicative of results for any subsequent fiscal quarter or for the full fiscal year.

Effects of New Accounting Pronouncements

In December 2011, the FASB issued ASU 2011-12, Comprehensive Income (Topic 220): Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in Accounting Standards Update No. 2011-05. Among the new provisions in ASU 2011-05 was a requirement for entities to present reclassification adjustments out of accumulated other comprehensive income by component in both the statement in which net income is presented and the statement in which other comprehensive income is presented (for both interim and annual financial statements); however this reclassification requirement is indefinitely deferred by ASU 2011-12 and will be further deliberated by the FASB at a future date.

In December 2011, the FASB issued Accounting Standards Update No. 2011-11, Balance Sheet (Topic 210)—Disclosures about Offsetting Assets and Liabilities (ASU 2011-11). The update requires entities to disclose information about offsetting and related arrangements of financial instruments and derivative instruments. The ASU is effective for annual periods beginning on or after January 1, 2013 and interim periods therein. We are currently evaluating the impact this update will have on our consolidated financial statements.

In September 2011, the FASB issued ASU 2011-08 Testing Goodwill for Impairment, which permits an entity to make a qualitative assessment of whether it is more likely than not that a reporting unit's fair value is less than its carrying value before applying the two-step goodwill impairment model that is currently in place. If it is determined through the qualitative assessment that a reporting unit's fair value is more likely than not greater than its carrying value, the remaining impairment steps would not be necessary. The qualitative assessment is optional, allowing companies to go directly to the quantitative assessment. This update is effective for annual and interim goodwill impairment tests performed in fiscal years beginning after December 15, 2011. Early adoption is permitted. We are currently evaluating the impact this update will have on our consolidated financial statements.

In June 2011, the FASB issued ASU No. 2011-05, Presentation of Comprehensive Income ("ASU 2011-05"), effective for fiscal years, and interim periods within those years, beginning after December 15, 2011. The issuance of ASU 2011-5 is intended to improve the comparability, consistency and transparency of financial reporting and to increase the prominence of items reported in other comprehensive income. The guidance in ASU 2011-5 supersedes the presentation options in ASC Topic 220 and facilitates convergence of U.S. generally accepted accounting principles and International Financial Reporting Standards by eliminating the option to present components of other

comprehensive income as part of the statement of changes in stockholders' equity and requiring that all nonowner changes in stockholders' equity be presented either in a single continuous statement of comprehensive income or in two separate but consecutive statements. The Company does not expect that the adoption of ASU 2011-05 will have a significant impact on the Company's consolidated financial statements.

In May 2011 the FASB issued ASU No. 2011-04, Fair Value Measurements (Topic 820): Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in US GAAP and International Financial Reporting Standards ("IFRS") ("ASU 2011-04"). ASU 2011-04 represents the converged guidance of the FASB and the International Accounting Standards Board (the "Boards") on fair value measurements. The collective efforts of the Boards and their staffs, reflected in ASU 2011-04, have resulted in common requirements for measuring fair value and for disclosing information about fair value measurements, including a consistent meaning of the term "fair value." The Boards have concluded the common requirements will result in greater comparability of fair value measurements presented and disclosed in financial statements prepared in accordance with GAAP and IFRS. The amendments in this ASU are required to be applied prospectively, and are effective for interim and annual periods beginning after December 15, 2011. The Company does not expect that the adoption of ASU 2011-04 will have a significant impact on the Company's consolidated financial statements.

Index

In March 2011, the SEC issued Staff Accounting Bulletin (SAB) 114. This SAB revises or rescinds portions of the interpretive guidance included in the codification of the Staff Accounting Bulletin Series. This update is intended to make the relevant interpretive guidance consistent with current authoritative accounting guidance issued as a part of the FASB's Codification. The principal changes involve revision or removal of accounting guidance references and other conforming changes to ensure consistency of referencing through the SAB Series. The effective date for SAB 114 was March 28, 2011. The adoption of the new guidance did not have a material impact on the Company's consolidated financial statements.

Safe Harbor Statement under the Private Securities Litigation Reform Act of 1995

This report may include "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such statements involve known and unknown risks, uncertainties and other factors that could cause our actual results to differ materially from the results expressed or implied by such statements, including general economic and business conditions, conditions affecting the industries served by us and our subsidiaries, conditions affecting our customers and suppliers, competitor responses to our products and services, the overall market acceptance of such products and services, facility consolidations and other restructurings, our asbestos-related liability, the integration of acquisitions and other factors disclosed in our periodic reports filed with the Commission. Consequently such forward-looking statements should be regarded as our current plans, estimates and beliefs. We do not undertake and specifically decline any obligation to publicly release the results of any revisions to these forward-looking statements that may be made to reflect any future events or circumstances after the date of such statements or to reflect the occurrence of anticipated or unanticipated events.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

There have been no material changes in the market risks since the end of Fiscal 2011.

Item 4. Controls and Procedures

As of December 31, 2011, an evaluation was performed under the supervision and with the participation of the Company's management, including the chief executive officer and chief financial officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures. Based on that evaluation, the Company's management, including the chief executive officer and chief financial officer, concluded that the Company's disclosure controls and procedures were effective as of December 31, 2011, to ensure that information required to be disclosed in reports filed or submitted under the Exchange Act is made known to them on a timely basis, and that these disclosure controls and procedures are effective to ensure such information is recorded, processed, summarized and reported within the time periods specified in the Commission's rules and forms.

One of the Company's domestic plant locations implemented the enterprise resource planning system SAP during the three months ended December 31, 2011. The plant location is not material to the consolidated financial statements at December 31, 2011 and the change does not have a material effect on our internal control over financial reporting as of December 31, 2011. We expect to convert certain additional plant locations to SAP during fiscal 2013. We expect that the completion of these system implementations will enhance our internal controls as follows:

- a) The new enterprise resource planning system was designed to generate reports and other information used to account for transactions and reduce the number of manual processes employed by the Company;
- b) The new enterprise resource planning system is technologically advanced and is expected to increase the amount of application controls used to process data; and

c)The Company will design new processes and implement new procedures in connection with the implementations.

There have been no other changes in the Company's internal control over financial reporting during the most recent quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.
