**(Continued from Preceding Page)**

Supplemental disclosure of non-cash investing and financing activities:

During the six months ended June 30, 2007, the Company issued 42,000,000 shares of common stock upon conversion of \$882,240 of secured convertible notes payable. The value of the related derivative at the time of conversion was \$2,261,939, which was credited to additional paid-in capital.

During the six months ended June 30, 2007, the Company issued 64,879 shares of stock upon the cashless exercise of a warrant. The value of the related derivative at the time of conversion was \$2,530.

See accompanying notes to condensed financial statements.

**GRANT LIFE SCIENCES, INC.**  
**(A Development Stage Company)**  
**NOTES TO CONDENSED FINANCIAL STATEMENTS**  
**June 30, 2007 and 2006**  
**(Unaudited)**

**NOTE A - ORGANIZATION AND BASIS OF PRESENTATION**

Organization and Business

On July 30, 2004, Grant Ventures, Inc., a Nevada corporation, acquired Impact Diagnostics, Inc., a Utah corporation organized on July 9, 1998, through the merger of Grant Ventures, Inc.'s wholly owned subsidiary, Impact Acquisition Corporation, with Impact Diagnostics, Inc. Grant Ventures, Inc. was an inactive publicly registered shell corporation with no significant assets or operations. For accounting purposes, the merger was treated as a recapitalization. Grant Ventures, Inc. changed its name to Grant Life Sciences, Inc. (the Company) in November 2004. Impact Acquisition Corporation and Impact Diagnostics, Inc. were subsequently dissolved.

The Company's purpose is to research, develop, market and sell diagnostic kits for detecting disease with emphasis on the detection of low-grade cervical cancer.

Development Stage Company

Since July 9, 1998 (date of inception), the Company has operated as a development stage company as defined in Statement of Financial Accounting Standards No. 7, *Accounting and Reporting by Development Stage Companies*. The Company's development stage activities have consisted primarily of the development of medical diagnostic kits. Sources of financing for these development stage activities have been primarily debt and equity financing. The Company has not yet established a significant source of revenue.

Going Concern

The accompanying financial statements have been prepared assuming the Company will continue as a going concern. Continuing as a going concern is dependent upon successfully obtaining additional working capital through debt or equity financing and, eventually, achieving profitable operations. There can be no assurance of either obtaining additional funding or achieving profitable operations. No adjustments have been made to the accompanying condensed financial statements that might result from the outcome of this uncertainty.

Interim Financial Information

The interim financial information as of June 30, 2007, and for the three and six-month periods ended June 30, 2007 and 2006, is unaudited. The condensed balance sheet as of December 31, 2006 is derived from audited financial statements, the report on which included an explanatory paragraph that there is substantial doubt as to the Company's ability to continue as a going concern. The accompanying financial statements have been prepared in accordance with U.S. generally accepted accounting principles for interim financial information. Accordingly, they do not include all of the information and notes required by U.S. generally accepted accounting principles for complete financial statements. The accompanying condensed financial statements and notes should be read in conjunction with the financial statements and notes included in the Company's Annual Report on Form 10-KSB/A for the year ended December 31, 2006.

In the opinion of management, all adjustments that are necessary for a fair presentation of the financial information for the interim periods reported have been made, which consist only of normal recurring adjustments. The results of operations for the three and six-month periods ended June 30, 2007 are not necessarily indicative of the results that can be expected for the entire year ending December 31, 2007.

Certain reclassifications have been made to prior period financial statements to conform with the current presentation.

**NOTE B - SIGNIFICANT ACCOUNTING POLICIES**

Cash Equivalents

The Company considers all highly liquid investments with original maturities of three months or less to be cash equivalents.

### Concentration of Credit Risk

Financial instruments and related items that potentially subject the Company to concentrations of credit risk consist primarily of cash. The Company places its cash and temporary cash investments with credit quality institutions. At times, such investments may be in excess of the FDIC insurance limit.

### Furniture and Equipment

Furniture and equipment are stated at cost less accumulated depreciation. Depreciation is computed using the straight-line method based on the estimated useful lives of the assets. Furniture is depreciated over seven years and equipment over three to five years. When assets are retired or otherwise disposed of, the cost and related accumulated depreciation are removed from the accounts and any resulting gain or loss is recognized.

### Patents

Patents are stated at cost less accumulated amortization. Amortization is computed using the straight-line method based on an estimated useful life of fifteen years. When patents are retired or otherwise disposed of, the cost and related accumulated amortization are removed from the accounts and any resulting gain or loss is recognized.

### Long-Lived Assets

Long-lived tangible and intangible assets held and used by the Company are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Events relating to recoverability may include significant unfavorable changes in business conditions, recurring losses, or a forecasted inability to achieve break-even operating results over an extended period. The Company evaluates the recoverability of long-lived assets based upon forecasted undiscounted cash flows. Should impairment in value be indicated, the carrying value of intangible assets is adjusted based on estimates of future discounted cash flows resulting from the use and ultimate disposition of the asset.

### Convertible Notes and Related Discount

The convertible notes give the holder the right to convert such notes to common stock at a specified discount from the market price of the Company's common stock at the time of conversion. The size of the discount provides the holder with substantial incentive to convert the notes to common stock, such that it is expected that the notes will be converted to common stock rather than repaid. Thus, when a convertible note is issued, a note discount equivalent to the face amount of the note is established. The note discount is subsequently accreted to interest expense over the life of the note.

### Derivative Liability Related to Convertible Notes and Warrants

The derivative liability related to convertible notes and warrants arises because the conversion price of the Company's convertible notes is solely a function of the market price of the Company's common stock. Thus, the number of shares that may be issued upon conversion of such notes is indeterminate, which gives rise to the possibility that the Company may not be able to fully settle its convertible note and warrant obligations by the issuance of common stock.

The derivative liability related to convertible notes and warrants is adjusted to fair value as of each date that a note is converted or a warrant is exercised, as well as at each reporting date, using the Black-Scholes pricing model. Any change in fair value between reporting dates that arises because of changes in market conditions is recognized as a gain or loss. To the extent the derivative liability is reduced as a consequence of the conversion of notes or the exercise of warrants, such reduction is recognized as additional paid-in capital as of the conversion or exercise date.

### Revenue Recognition

Revenues are recognized in the period that the following four criteria are met: (1) persuasive evidence of an arrangement exists; (2) delivery has occurred; (3) the selling price is fixed or determinable; and (4) collectibility is reasonably assured. Determination of criteria (3) and (4) are based on management's judgments regarding the fixed nature of the selling prices of the products delivered and the collectibility of those amounts. Provisions for discounts

and rebates to customers, estimated returns and allowances, and other adjustments are provided for in the same period the related sales are recorded. The Company defers any revenue for which the product has not been delivered or is subject to refund until such time that the Company and the customer jointly determine that the product has been delivered or no refund will be required.

Stock-Based Compensation

The cost of employee and board member services received in exchange for an award of an equity instrument is based on the grant-date fair value of the award, determined by using the Black-Scholes pricing model. This cost is recognized over the period during which the award recipient is required to provide service in exchange for the award, which generally corresponds to the vesting period.

#### Research and Development Costs

Research and development costs are expensed as incurred. These costs include direct expenditures for goods and services, as well as some indirect expenditures such as consultant fees.

#### Deferred Income Taxes

Deferred income taxes are provided based on the asset and liability method for financial reporting purposes. Under this method, deferred income tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be removed or settled. The effect on deferred income tax assets and liabilities of a change in income tax rates is recognized in the statements of operations in the period that includes the enactment date. Valuation allowances are provided when it is more likely than not that some or all of the net deferred income tax assets may not be realized.

#### Net Loss Per Common Share

The computation of basic net loss per common share is based on the weighted average number of shares outstanding during each period. The computation of diluted earnings per common share is based on the weighted average number of common shares outstanding during the period plus common stock equivalents, unless the effect of their inclusion is anti-dilutive. During periods of net losses, basic and diluted net loss per common share are equivalent.

#### Use of Estimates in the Preparation of Financial Statements

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of reporting dates and the reported amounts of revenue and expenses during the reporting periods. Actual results could differ from those estimates.

#### New Accounting Pronouncements Applicable to the Company

In June 2006, the Financial Accounting Standards Board (FASB) issued FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes - an interpretation of FASB Statement No. 109* (FIN 48), which clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with Statement of Financial Accounting Standards (SFAS) No. 109, *Accounting for Income Taxes*. The interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN 48 requires recognition of tax benefits that satisfy a greater than 50% probability threshold. FIN 48 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. FIN 48 became effective for the Company beginning January 1, 2007. The adoption of FIN 48 had no impact on the Company's financial statements.

In September 2006, the FASB issued SFAS No. 157, *Fair Value Measurements*, which defines fair value, establishes a framework for measuring fair value in U.S. generally accepted accounting principles, and expands disclosures about fair value measurements. SFAS No. 157 does not require any new fair value measurements, but provides guidance on how to measure fair value by providing a fair value hierarchy used to classify the source of the information. This statement is effective for the Company beginning January 1, 2008. The Company is currently assessing the potential impact that adoption of SFAS No. 157 will have on its financial statements.

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities-Including an Amendment of SFAS No. 115*. SFAS No. 159 permits entities to choose to measure many financial instruments and certain other items at fair value. Most of the provisions of this statement apply only to entities that elect the fair value option. This statement is effective for the Company beginning January 1, 2008. The Company is currently assessing the potential impact that adoption of SFAS No. 159 will have on its financial statements.

**NOTE C - RESTATEMENT OF FINANCIAL STATEMENTS**

In June 2005, the Company issued \$2,000,000 of convertible notes and, subsequently, has issued additional convertible notes. At the holder's option these notes are convertible into common stock of the Company at a specified discount from the market price of the Company's common stock. As a consequence of this provision, an indeterminate number of shares are issuable upon conversion. While convertible notes are normally exempt from derivative accounting and are viewed as an equity instrument with the expectation that they will be settled by issuing stock, pursuant to the provisions of Emerging Issues Task Force Issue 00-19 (EITF 00-19), the conversion feature of the Company's convertible notes results in the requirement to use derivative accounting since the possibility exists that the Company will not be able to settle its convertible notes by issuing stock.

In addition to its applicability to the Company's convertible notes, EITF 00-19 also applies to other contracts, except those pertaining to employee compensation, normally settled by issuing stock. Thus, warrants issued by the Company to non-employees which entitle the holder to purchase common stock of the Company at a specified price also become subject to derivative accounting as a consequence of the conversion feature of the Company's convertible notes.

When the Company initially applied derivative accounting as a consequence of the foregoing in 2005, it inadvertently excluded warrants already issued as of June 2005 from its derivative calculations and only applied derivative accounting to warrants issued on a prospective basis. Further, the intrinsic value method, which is not generally considered to be a measure of fair value as defined in SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*, was used to value the derivative liability arising from the convertible notes. Finally, on reporting dates subsequent to June 2005, when the Company revalued the derivative liability applicable to its convertible notes and warrants, it failed to segregate the change in value arising from note conversions and the exercise of warrants from the change in value arising from changes in market conditions. Thus, the accounting process used by the Company, in essence, recognized gains from the conversion of notes and the exercise of warrants rather than treating such changes as additions to additional paid-in capital.

The Company restated its 2006 and 2005 financial statements (as reported in its Annual Report on Form 10-KSB/A) to (1) recognize the derivative liability arising from all of its warrants, regardless of when issued; (2) value the derivative liability arising from its convertible notes using the Black-Scholes pricing model, which is widely accepted as a measurement of fair value; and (3) recognize the fair value of converted notes and exercised warrants as additional paid-in capital, rather than as a gain, at the point of conversion or exercise.

As a consequence of the foregoing restatement, the reported net income (loss) for the three and six-month periods ended June 30, 2006, were changed from that initially reported in the Form 10-QSB for the second quarter of 2006, as follows:

| Net Income (Loss)                        | Previously Reported | Change    | As Restated |
|--|---------------------|-----------|-------------|
| For the three months ended June 30, 2006 | \$ 142,312          | \$ 15,573 | \$ 157,885  |
| For the six months ended June 30, 2006   | (64,730)            | 14,085    | (50,645)    |

#### NOTE D - CONVERTIBLE NOTES PAYABLE AND WARRANTS

During the first six months of 2007, the Company issued 42,000,000 common shares upon the conversion of \$882,240 of convertible notes payable in several separate transactions. The fair values of the related derivative liabilities at the dates of the respective conversions totaled \$2,261,939, which amounts were credited to additional paid-in capital.

Also during the first six months of 2007, the Company issued an additional \$800,000 of convertible notes plus warrants to purchase an additional 12,000,000 shares of the Company's common stock.

As of June 30, 2007, the convertible notes were convertible into 120,044,241 shares of the Company's common stock based on the market price of the common stock.

The following table summarizes changes in outstanding warrants during the six months ended June 30, 2007, plus the related weighted average exercise price and the related remaining term of such warrants:

| Number of<br>Shares | Weighted<br>Average<br>Exercise<br>Price | Expiration Date |
|---------------------|--|-----------------|

---

**NOTE E - STOCK OPTIONS**

On June 27, 2007, the Company's board of directors approved establishment of the 2007 Incentive Stock Plan (the 2007 Plan) under which options to purchase 30,000,000 shares of the Company's common stock can be granted. Terms of the 2007 Plan are essentially equivalent to the 2004 Incentive Stock Plan (the 2004 Plan) previously approved by the Company's shareholders. After consideration of the grants described in the following paragraph, options to purchase an aggregate of 1,325,000 and 8,924,915 shares of the Company's common stock can be granted under the 2004 Plan and 2007 Plan, respectively.

During the second quarter of 2007, the Company granted directors, officers, employees and a consultant options to purchase an aggregate of 24,900,000 shares of the Company's common stock. The exercise price of such options is \$0.03 per share, which was the closing price of the Company's common stock on the grant date. The options vest over a period of two years; however, vesting is accelerated, subject to certain restrictions, in the event of a merger, the acquisition of the Company by another entity or other similar transaction. The options have a contractual life of ten years.

The fair value of the stock options issued, as described in the preceding paragraph, was determined using the Black-Scholes pricing model, an expected term of five years, a volatility rate of 201%, a quarterly dividend rate of 0.00%, and a risk free interest rate of 4.47%.

The Company recorded \$245,697 and \$250,944 of compensation expense related to these option grants plus previously issued option grants existing as of December 31, 2006, for the three and six-month periods ended June 30, 2007, respectively. Compensation expense during the corresponding periods of 2006 was \$97,854 and \$182,826, respectively.

The following table summarizes changes in outstanding stock options during the six months ended June 30, 2007, and the related weighted average exercise price:

|                                | Total Options       |  | Vested Options      |  | Unvested Options    |  |
|--------------------------------|---------------------|--|---------------------|--|---------------------|--|
|                                | Number of<br>Shares | Weighted<br>Average<br>Exercise<br>Price | Number of<br>Shares | Weighted<br>Average<br>Exercise<br>Price | Number of<br>Shares | Weighted<br>Average<br>Exercise<br>Price |
| Balances, December 21,<br>2006 | 4,620,952           | \$ 0.170                                 | 4,037,618           | \$ 0.170                                 | 583,334             | \$ 0.170                                 |
| Grants                         | 24,900,000          | \$ 0.030                                 | 8,300,006           | \$ 0.030                                 | 16,599,994          | \$ 0.030                                 |
| Forfeitures                    | (1,325,000)         | \$ 0.180                                 | (1,066,666)         | \$ 0.180                                 | (258,334)           | \$ 0.180                                 |
| Vesting                        |                     |  | 166,667             | \$ 0.115                                 | (166,667)           | \$ 0.115                                 |
| Balances, June 30, 2007        | 28,195,952          | \$ 0.045                                 | 11,437,625          | \$ 0.065                                 | 16,758,327          | \$ 0.030                                 |

Unrecognized compensation expense applicable to unvested options as of June 30, 2007, was \$489,514.

**NOTE F - INCOME TAXES**

The Company incurred a net loss of \$2,271,112 and \$50,645 for the six months ended June 30, 2007 and 2006, respectively. The Company has established a valuation allowance to fully reserve against all of its net deferred income tax assets, as management has determined that it is more likely than not that those assets will not be realized based on the Company's operating history. As a result, there are no net deferred income tax assets presented in the Company's condensed balance sheets.

Section 382 of the Internal Revenue Code places limitations on the amount of taxable income which can be offset by net operating loss carryforwards and other tax attributes after a change in control of a loss corporation. As a result, there can be no assurance that some or all of the Company's net operating loss carryforwards and other tax attributes will be available to offset future taxable income and associated tax, if any.

As of June 30, 2007, the Company has net operating loss carryforwards of approximately \$7,875,000, which begin expiring in 2019.

## **NOTE G - SUBSEQUENT EVENTS**

Subsequent to June 30, 2007 and through August 7, 2007, the Company issued 55,697,780 shares of common stock upon the conversion of \$543,583 of convertible notes in various transactions.

## **Item 2. Management's Discussion and Analysis of Financial Condition or Plan of Operation**

### Forward-Looking and Cautionary Statements

This report contains certain forward-looking statements. These statements relate to future events or the Company's future performance and involve known and unknown risks and uncertainties. Actual results may differ substantially from such forward-looking statements, including, but not limited to, the following:

- The Company's ability to fund its cash and working capital needs;
- The Company's ability to maintain its corporate existence as a viable entity; and
- Other risks detailed in the Company's periodic report filings with the SEC.

In some cases, you can identify forward-looking statements by terminology such as "may", "will", "should", "expects", "intends", "plans", "anticipates", "believes", "estimates", "predicts", "potential", "continue", or the negative of these terms or comparable terminology. These statements are only predictions. Although the Company believes that the expectations reflected in the forward-looking statements are reasonable, it cannot guarantee future results, levels of activity, performance or achievements.

### Overview

The Company is a development stage company. From inception in 1998 through June 30, 2007, it has not generated significant revenues. All audit reports issued to date have included an explanatory paragraph that there is substantial doubt as to the Company's ability to continue as a going concern.

### Plan of Operations

The Company is focused on developing technologies that will be useful in commercializing rapid test products that can screen women for cervical cancer or pre-cancerous conditions. The majority of cervical cancer is generally believed to be caused by different strains of the human papilloma virus (HPV). Most of the Company's effort in prior years has centered on HPV antibody detection tests. In 2006, the Company signed a memorandum of understanding to in-license technology pertaining to HPV antigen detection tests and, in June 2007, signed another memorandum of understanding to in-license technology based on a molecular diagnostic test for HPV.

The Company's ability to conduct further research on the technologies described in the preceding paragraph is directly related to the Company's ability to raise capital to fund such research. In addition to continued funding by debt and equity transactions, which has been the Company's primary source of funding to date, the Company will investigate out-licensing of the technologies presently under its control, the feasibility of merging with a cash-flow positive operating company, and the feasibility of collaborating with other research and development companies that are better funded than the Company. The Company may also investigate the feasibility of producing and distributing rapid test

products for diseases other than cancer, such as it did in 2005 on a limited basis.

Liquidity and Capital Resources

From inception in 1998 through June 30, 2007, the Company has relied on loans and equity infusions to fund its operations. The Company has never generated positive cash flows from operating activities. In the near term, and perhaps longer, the Company will continue to be dependent on its ability to raise debt and/or equity capital. There is no assurance that the Company will be able to continue to do so. Over a longer term, the Company's continuation as a going concern is dependent on its ability to generate sufficient cash flows from operating activities to meet its obligations on a timely basis and to obtain additional financing as may be required. Since June 2005, the Company's primary source of funding has been from the sale of convertible notes.

At June 30, 2007, the Company had a working capital deficiency of \$472,017. The Company's cash balance at June 30, 2007 was \$301,301. In recent months, the Company's cash "burn rate" has ranged from \$100,000 to \$150,000 per month. Absent any cash inflows from revenues or other sources, the current cash position is expected to fund the Company until September 2007. There can be no assurance that the Company will be successful in obtaining adequate debt or equity financing and, as a result, the Company may not be able to continue its existence.

### Results of Operations

The Company has never been profitable. Since inception, aggregate losses approximate \$16,682,000. Since June 2005, the Company has incurred non-cash charges of nearly \$8,593,000 related to interest expense on the Company's convertible notes and charges arising from the change in fair value of the derivative liabilities related to the convertible notes and warrants to purchase common stock of the Company.

Aggregate results of operations for the three and six-month periods ended June 30, 2007 and 2006, are reasonably comparable except for the impact of the non-cash items described in the preceding paragraph and compensation expense arising from stock options.

### **Item 3. Controls and Procedures**

The Company's principal executive officer and principal financial officer have evaluated the effectiveness of our disclosure controls and procedures as of June 30, 2007. Based on such evaluation, they have concluded, as of the end of such period, that our disclosure controls and procedures as of that date were effective in recording, processing, summarizing and reporting, on a timely basis, information required to be disclosed by us in our reports that we file or submit under the Securities Exchange Act of 1934.

Earlier this year, the Company's chief financial officer, who joined the Company April 9, 2007, determined that the derivative liabilities related to the Company's convertible notes and warrants had not been accounted for in accordance with U.S. generally accepted accounting principles. This is explained more fully in Note C to the condensed financial statements in Part I, Item 1 of this report. Upon further investigation, and after discussions with its prior and current independent registered public accounting firms, the Company filed Form 10-KSB/A to amend its 2006 Annual Report filed with the SEC. This error in accounting and disclosure represented a material weakness in the Company's internal control at March 31, 2007.

The Company believes that the material weakness arising from the Company's inability to appropriately interpret complex accounting pronouncements, which existed at March 31, 2007, has been substantially mitigated by the addition of the current chief financial officer. Upon further review by the Company's principal executive officer and principal financial officer, and given the limited size of the Company's accounting staff and the Company's limited resources, it has been determined that it is not practical to make further changes with respect to the disclosure controls and procedures of the Company.
